PART I

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Actual results could differ materially from those set forth in the forward-looking statements. Certain factors that might cause such actual results to differ materially from those set forth in these forward-looking statements are included in Part I, Item 1A “Risk Factors” beginning on page 14.

ITEM 1. BUSINESS

General

Citrix is leading the transition to software-defining the workplace, uniting virtualization, mobility management, networking and SaaS solutions to enable new ways for businesses and people to work better. Citrix solutions power business mobility through secure, mobile workspaces that provide people with instant access to apps, desktops, data and communications on any device, over any network or cloud.

We market and license our products directly to customers, over the Web, and through systems integrators, or SIs, in addition to indirectly through value-added resellers, or VARs, value-added distributors, or VADs, original equipment manufacturers, or OEMs and service providers.

Citrix is a Delaware corporation founded on April 17, 1989.

Business Overview

For the past twenty-six years, we have been a visionary in software-defining the workplace guided by our core belief that “work is not a place”. A software-defined workplace is one where people can securely and effortlessly collaborate across the boundaries of time, place and device. In a software-defined workplace, people create better business outcomes, they are more productive and engaged and their businesses are more agile and responsive to change. We have positioned, scaled and transformed Citrix through significant growth phases from remote access, to web app delivery, to virtualization, to mobile workspaces and now we are doing it again.

Our customers are faced with the pressures to deliver business results while creating an engaging work-life experience for their employees. Our focus on enabling a software-defined workplace is putting Citrix in front of this strategic challenge through the unique integration of our workspace services, delivery networking and mobility apps.

Products and Services

Our products and services target customers of all sizes, from individuals and professional consumers, to large global enterprises. Two divisions, the Enterprise and Service Provider division and the Mobility Apps (formerly Software as a Service, or SaaS) division, administer the research and development, product marketing, and product management for our offerings. Our Enterprise and Service Provider division is comprised of Workspace Services (formerly Mobile and Desktop) and Delivery Networking (formerly Networking and Cloud) products. Our Mobility Apps (formerly SaaS) division is comprised of Communications Cloud, Documents Cloud and Workflow Cloud products. Broadly, as an organizing principle, we group our offerings in the following main categories within our two divisions:

Workspace Services

Mobile Platforms

Our Enterprise Mobility Management, or EMM products help organizations secure and manage mobile devices along with the apps and data that reside on the mobile device. XenMobile® allows IT to easily meet mobile device security and compliance requirements for BYO and corporate liable devices while giving users the freedom to experience work and life their way. Unlike other mobile device management, or MDM and mobile application management, or MAM products, XenMobile provides the quickest path to productivity for mobile users with a low cost of ownership for IT:

- XenMobile® Enterprise is a comprehensive solution to manage mobile devices, apps, and data. Users have single-click access to all of their mobile, SaaS and Windows apps from a unified corporate app store, including seamlessly integrated email, browser, data sharing, IT support and collaboration apps. IT can deliver a rich user experience with WorxMail™ for secure mobile email, calendar and contact access, WorxWeb™ for secure browsing and Sharefile for enterprise data syncing. IT gains control over mobile devices with full configuration, security, provisioning and support capabilities. Flexible deployment options give IT the choice to manage XenMobile in the cloud or on-premise. In addition, XenMobile securely delivers Worx Mobile Apps, mobile apps built for businesses using the Worx App

Software Development Kit, or SDK and found through the Worx App Gallery. With XenMobile, IT can meet their compliance and control needs while users get the freedom to experience work and life their way.

Desktop and Application Virtualization

Our Desktop and Application Virtualization products are built to transform and reduce the cost of traditional Windows app and desktop management by virtualizing applications and desktops in the datacenter and delivering a cloud-like service to users anywhere on any device. We differentiate from basic virtualization solutions with robust security and flexibility to enable IT to deliver Windows apps and desktops for better business outcomes.

XenDesktop® is a fully integrated desktop virtualization system that gives customers the flexibility to deliver desktops and applications as cloud services - enabling people to work better and simplifying desktop and app management. XenDesktop includes HDX technologies to give users a high-definition experience - even when using multimedia, real-time collaboration, USB devices, and 3D graphics content - while consuming less bandwidth than competing solutions. XenDesktop breaks down traditional cost barriers by reducing server and storage costs through the use of pooled desktops that can be personalized on-demand. XenDesktop is available in multiple editions designed for different requirements, from simple VDI-only deployments to sophisticated, enterprise-class desktop and application delivery services that can meet the needs of everything from basic call center environments to high-powered graphics workstations. In XenDesktop Enterprise and Platinum editions, customers also receive the industry-leading Citrix XenApp to manage and mobilize Windows applications.

Citrix XenApp® is a widely deployed solution that allows Windows applications to be delivered as cloud services to Android and iOS mobile devices, Macs, PCs and thin clients. XenApp enables people to work better by running applications in the security of the data center and using HDX technologies to deliver a superior user experience to any device, anywhere. XenApp can optimize the application experience for smartphones, tablets and touchscreen laptops, providing intuitive touch capabilities for the latest generation of devices. Keeping applications under the centralized control of IT administrators enhances data security and reduces the costs of managing applications on every PC.

XenApp runs on all current versions of Microsoft® Windows Server® and tightly integrates with the Microsoft® Desktop Optimization Pack, Microsoft App-V, and Microsoft System Center. Our joint solution lowers the cost of delivering and maintaining Windows applications for all users in the enterprise. The capabilities of XenApp are available standalone as well as seamlessly integrated within with XenDesktop Enterprise and Platinum Editions.

Citrix Workspace Suite

We offer customers the opportunity to acquire our mobility, desktop and app products through a single integrated product offering - the Citrix Workspace Suite. Citrix Workspace Suite is a complete, integrated business mobility solution for helping people and business become more productive with an on-demand mobile workspace.

Citrix Workspace Suite™ delivers the user experience for any app or desktop using a universal client - Citrix Receiver™ - available on all tablets, smartphones, PCs, Macs or thin clients, IT can securely deliver content over low bandwidth high latency WANs, highly variable 3G/4G mobile networks or a reliable corporate LAN to ensure native experience. Citrix Workspace Suite offers enterprise grade security to ensure data and applications are always secure and compliant. Workers can access and sync all of their data from any device and securely share it with colleagues and customers. Organizations can minimize loss of intellectual property and sensitive private information through data encryption, password authentication, secure lock and wipe on the device or through centralization of applications and desktops which keeps all content in the datacenter. Citrix Workspace Suite provides a single, flexible solution that can streamline application and desktop deployment and lifecycle management to reduce IT costs. By centrally managing and delivering on-demand standard images, IT can improve the success rate of application and desktop image updates and provide role-based management, configuration, security and support for corporate and employee-owned devices.

Delivery Networking

Our Delivery Networking products allow organizations to deliver cloud services to any device with high performance, security and reliability.

NetScaler® is an all-in-one Web application delivery controller designed to make applications run five times faster by application accelerator methods such as hypertext transfer protocol, or HTTP compression and caching, ensuring application availability through the advanced L4-7 load balancer and content switching methods; increase application security with an integrated application firewall; and substantially lower costs by offloading servers to enable server

consolidation.

ByteMobile® Smart Capacity™ solutions encompass a range of functionality that helps mobile network operators effectively address the traffic challenges and revenue opportunities of the mobile data revolution. These solutions

4

include video optimization, web optimization, policy control, mobile analytics, adaptive traffic management, and quality of experience management.

CloudBridge™ connects enterprise datacenters to any end point required of network branches, public and private clouds, data centers and other third party providers. The flexibility of CloudBridge allows enterprises to turn on optimization and acceleration features to ensure quality of experience for desktops, applications, video and multimedia applications for branch and mobile users. CloudBridge is optimized for virtual desktops and applications delivered by XenDesktop and XenApp.

Mobility Apps

Communications Cloud, Documents Cloud and Workflow Cloud products allow organizations to enable mobile workstyles and offer employees the ability to move seamlessly across a diverse mix of devices and collaborate and share information.

Communications Cloud

GoToMeeting® is an easy-to-use, secure and cost-effective product for online meetings, sales demonstrations and collaborative gatherings. GoToMeeting users can easily host, or participate in online meetings from a Mac, PC, iPad, iPhone, Windows 8 tablet, Windows Phone or Android device. GoToMeeting comes equipped with integrated conference dial-in numbers, Voice over Internet Protocol, or VoIP and HDFaces® high-definition video conferencing. It features an advanced, secure communication architecture that uses industry-standard secure sockets layer, or SSL, encryption.

GoToWebinar® is an easy-to-use, do-it-yourself webinar product, allowing organizations to increase market reach and effectively present online to geographically dispersed audiences. GoToWebinar users can easily host, attend or participate in a webinar session from a Mac, PC or mobile device without significant training or IT support; attendees can join from a Mac, PC, iPad, iPhone or Android device. GoToWebinar includes such features as full-service registration with real-time reports; customized branding; automated email templates; polling and survey capabilities; a webinar dashboard for monitoring attendance and participation; easy presenter controls for changing presenters; high-definition webcam sharing for up to 6 organizers and panelists and VoIP and toll-based phone options.

GoToTraining® is an easy-to-use and secure online training product that enables individuals and enterprises to provide interactive training sessions to customers and employees in any location. GoToTraining users can easily create curriculums for their students from a Mac or PC without significant training or IT support; attendees can join from a Mac, PC, iPad, iPhone or Android device. GoToTraining includes such features as full-service registration with real-time reports; materials; automated email templates; polling and survey capabilities as well as testing; and high-definition webcam sharing for up to 6 participants and VoIP and toll-based phone options.

OpenVoice® is a reservation-less audio conferencing service, providing robust web-based account tools that allows user provisioning and audio meeting controls for users to manage small and large audio conferences without operator assistance. OpenVoice Integrates seamlessly with all Communications Cloud products, adding a toll-free number to online sessions.

Documents Cloud

ShareFile® is a secure, cloud-based file sharing and storage solution built for business. ShareFile enables business professionals to manage and share data securely and easily and solves the mobility and collaboration needs of users. It replaces insecure and inconsistent methods of transferring large and confidential files including email attachment, FTP and consumer cloud storage services. ShareFile protects client data throughout the storage and transfer process, using up to 256-bit encryption and SSL or Transport Layer Security, or TLS encryption protocols for transfer and 256-bit encryption for files at rest on ShareFile servers. Password protection and granular access to folders and files stored with ShareFile ensure that data remains in control of the company. With ShareFile Enterprise, organizations can manage their data on premises in customer managed StorageZones, choose Citrix managed secure cloud options or create a mix of both to meet the needs for data sovereignty, compliance, performance and costs. In addition, ShareFile supports e-signature and approval workflows.

GoToMyPC® is an online service that enables mobile workstyles by providing secure, remote access to a PC or Mac from virtually any Internet-connected computer, as well as from supported iOS or Android mobile devices, such as the iPad, iPhone, Kindle Fire and, Samsung Galaxy. GoToMyPC sets up easily with a secure encrypted connection and enables individuals to remotely use any resources hosted on their desktop just as though they were sitting in front

of it.

5

Workflow Cloud

GoToAssist® provides easy-to-use cloud-based IT support solutions to deliver maximum uptime for people and their computers, mobile devices and apps. GoToAssist's integrated toolset is built specifically for IT managers, consultants and managed service providers.

License Updates and Maintenance

We provide several ways for customers to receive upgrades, support and maintenance for products.

Subscription Advantage provides customers access to the latest product version updates when made available during their membership term. These updates include major changes to the product architecture and updates to the feature set of a product. Citrix software products eligible for participating in the Subscription Advantage program come with the first year of Subscription Advantage embedded into the cost of the product.

Technical Support Services are specifically designed to address the variety of challenges facing our customers' IT environments. We offer several support-level options, global coverage and personalized relationship management. Post-sale technical support is offered through Citrix-operated support centers located in the United States, Ireland, Japan, Hong Kong, Australia, Singapore and India. In most cases, we provide technical advice to distributors, resellers, service providers and entities with which we have a technology relationship, who act as the first line of technical assistance for end-users.

Premier Support provides 24x7x365 unlimited-incidents worldwide support for Citrix software products covered by Subscription Advantage. Available at the time of product purchase or with a Subscription Advantage renewal, Premier Support is offered on a per license basis.

Hardware Maintenance provides technical support from Citrix experts to diagnose and resolve issues encountered with appliances. It also offers the latest software upgrades and replacement of malfunctioning appliances to minimize organizational downtime. Additionally, dedicated account management is available as an add-on to the program for an even higher level of service.

Software Maintenance combines 24x7x365 unlimited worldwide support with product version upgrades when available. The first year of Software Maintenance is required with certain corresponding product purchases.

Professional Services

We provide a portfolio of professional services to our business partners and customers to manage the quality of implementation, operation and support of our solutions. These services are available for additional fees paid on an annual or transactional basis.

Citrix Consulting helps guide the successful implementation of Citrix technologies and solutions through the use of proven methodologies, tools and leading practices. Citrix Consulting focuses on strategic engagements with enterprise customers who have complex, mission-critical, or large-scale Citrix deployments. These engagements are typically fee-based on-site engagements for the most challenging projects in scope and complexity, requiring consultants who are uniquely qualified with project methodology and Citrix product expertise. Citrix Consulting is also responsible for the development of best practice knowledge that is disseminated to businesses with which we have a business relationship and end-users through training and written documentation. Leveraging these best practices enables our integration resellers to provide more complex systems, reach new buyers within existing customer organizations and provide more sophisticated system proposals to prospective customers. Citrix Consulting has worked with Fortune Global 500 companies, technology providers, and government organizations to deliver solutions that achieve their unique technical and business objectives.

Product Training & Certification helps enable our customers and partners to be successful with Citrix and achieve their business objectives faster. Authorized Citrix training is available when and how it is needed. Traditional or virtual instructor-led training offerings feature Citrix Certified Instructors delivering training in a classroom or remote setting at one of approximately 400 Citrix Authorized Learning Centers™, or CALCs, worldwide. CALCs are staffed with instructors that have been certified by us and teach their students using Citrix-developed courseware. Self-Paced Online offerings, available to students 24 hours a day, seven days a week, provide technically robust course content without an instructor and include hands-on practice via virtual labs. Certifications validate key skills and are available for administrators, engineers, architects and sales professionals.

Technology

Our products are based on a full range of industry-standard open source technologies. In addition, certain of our products are also based on our proprietary technologies.

Citrix HDX™ Technologies is a family of innovations that optimize the end-to-end user experience in virtual desktop and virtual application environments. These technologies incorporate our ICA protocol, which consists of server- and client-side technology that allows graphical user interfaces to be transmitted securely over any network, and include HDX Broadcast, MediaStream, Realtime, Mobile, Plug-n-Play RichGraphics, WAN Optimization and Adaptive Orchestration features which work together to provide a high-definition user experience across a wide array of applications, devices and networks.

FlexCast® technologies combine a range of desktop and application virtualization innovations that work in concert to enable enterprise IT departments the ability to support a wide range of use cases.

Citrix personalization technologies increase desktop virtualization adoption by providing a personalized end-user experience while optimizing resource usage in the data center and overall total cost of ownership, or TCO.

NetScaler® Software Packet Engine, or the Packet Engine, forms the foundation of our NetScaler line of products.

The Packet Engine allows high-performance networking and packet processing without the need for special purpose hardware.

NetScaler® nCore™ Technology is an architecture which enables execution of multiple Packet Engines in parallel.

nCore technology allows the distribution of packet flows across multiple central processing unit cores to achieve efficient, high-performance parallel processing across multiple Packet Engines. The new architecture incorporates innovations in flow distribution and state sharing and provides for efficient execution across Packet Engines.

ByteMobile® Adaptive Traffic Management System combines functions such as video and web optimization, caching, policy control, and reporting and analytics into a single centrally managed element. These functions are performed based on dynamic awareness of mobile carrier traffic conditions and also based on User Experience Indexing (UXI), where the quality of a single mobile subscriber's data experience can be tracked and enhanced by automated modifications made to network performance.

XenMobile® is our foundational technology that delivers a holistic mobile computing platform for enterprises. Its main components include MDM, MAM and a set of mobile applications including secure email, corporate app store, web browsing, data sharing, secure note taking and document editing on a host of mobile platforms including iOS, Android and Windows mobile.

Citrix Internet Overlay Platform is our foundational technology for GoToMeeting, GoToWebinar, GoToTraining and GoToAssist. The platform implements one of the largest multicast overlay data networks in the world using the Internet. It provides proprietary screen-sharing technology that separately optimizes screen transmission for each endpoint device (such as a remote PC during an online meeting or remote access session).

Citrix PSTN/VoIP Bridge is core technology that allows the seamless integration of Public Switched Telephone Network/Voice over Internet Protocol, or PSTN/VoIP, in our products that use our audio conferencing.

HDFaces® in GoToMeeting, GoToWebinar and GoToTraining delivers high-definition video conferencing and one-to-many video streaming over the public Internet. It includes proprietary network transport protocols and transcoding software that optimize video quality for each endpoint device.

Innovation is a core Citrix competency. We have many additional unique inventions that are important enablers of our continued leadership in delivery networking, workspace services and mobility apps.

Customers

We believe that the primary IT buyers involved in decision-making related to our solutions are the following:

Strategic IT Executives including chief information officers, chief technology officers, chief information security officers and vice presidents of infrastructure, who have responsibility for ensuring that IT services are enablers to business initiatives and are delivered with the best performance, availability, security and cost.

Desktop Operations Managers who are responsible for managing Windows Desktop environments including corporate help desks.

IT Infrastructure Managers who are responsible for managing and delivering Windows-based applications.

Directors of Messaging and Mobility, who are, respectively, responsible for Exchange and defining mobile strategies and solutions for securing and managing mobile devices including their content and applications.

Network Architects who are responsible for delivering Web-based applications who have primary responsibility for the WAN infrastructure for all applications.

7

Server Operations Managers who are responsible for specifying datacenter systems and managing daily operations.
Individuals and prosumers, who are responsible for choosing personal solutions and helping small businesses select simple-to-use computing solutions.

Small business owners who are responsible for choosing the systems needed to support their business goals, such as SaaS.

Line of business and functional executives that determine the need for our mobility apps offerings at certain enterprises.

Chief technology officer office and engineering department (managers, architects, etc.) for telecommunications service providers are the primary buyers of our ByteMobile Smart Capacity solutions.

Chief information officer office and engineering departments within service providers, using Citrix products to deliver desktops and applications as hosted cloud services.

The IT buyers for our products include a wide variety of industries including those in financial services, technology, healthcare, education, government and telecom.

We offer perpetual and term-based software licenses for our products, along with annual subscriptions for software updates, technical support and SaaS. Perpetual licenses allow our customers to use the version of software initially purchased into perpetuity, while term-based licenses are limited to a specified period of time. Software update subscriptions give customers the right to upgrade to new software versions if and when any updates are delivered during the subscription term. Perpetual license software products come primarily in electronic-based forms and, in selected markets, we offer pre-packaged shrink-wrap products to meet local customer needs. We also offer subscription licenses to service providers via a Service Provider License Agreement, which are invoiced on a monthly basis or based on reported license usage. Our Mobility Apps products are accessed over the Internet for usage during the subscription period. Our hardware appliances come pre-loaded with software for which customers can purchase perpetual licenses and annual support and maintenance.

Technology Relationships

We have a number of technology relationships in place to accelerate the development of existing and future products and go-to-market. These relationships include cross-licensing, OEM, joint reference architectures, and other arrangements that result in better solutions for our customers.

Microsoft

We have collaborated with Microsoft on various technologies, including terminal services, cloud networking and virtualization. Since our inception, we have had a number of license agreements with Microsoft, including patent cross-licenses and source code licensing agreements that have provided us access to source code for versions of Microsoft Windows Server. These agreements are not required for our software development processes on Windows Server and do not provide for payments to or from Microsoft. Our two companies have a long-standing go-to-market partnership, and that continues to grow as we introduce more joint solutions in new areas. A number of key Citrix products will leverage the Microsoft Azure cloud including XenDesktop, ShareFile and NetScaler.

Cisco

We have a technology collaboration with Cisco Systems, Inc., or Cisco, to develop and deliver solutions that help customers simplify and accelerate large-scale desktop virtualization deployments, including high-definition virtual desktops and applications and improved end-user experiences, over a highly secure Citrix® HDX-enabled Cisco network. We license the specifications of ICA® to Cisco as part of this agreement. Cisco and Citrix collaborate on our delivery networking products and mobile workspaces solutions. Cisco sells an OEM version of our NetScaler Application Delivery Controller technology, called Citrix Netscaler 1000V, which is sold as a part of their Virtual Network Services architecture platform. In 2014, we introduced a number of new joint technology solutions, including Cisco Mobile Workspace solution with Citrix, an integrated DaaS solution for service providers to sell and implement for their end-user customers, and integrations of NetScaler into Cisco's data center architectures.

Additional Relationships

Our partners continue to expand their focus on the broad range of Citrix products. Some examples include HP, Dell, IBM and Fujitsu which have multiple offerings in the market with our workspace services solutions and delivery networking products. We have also built relationships with VCE, NetApp and CA Technologies that complement the benefits provided by workspace services solutions and delivery networking products. Amazon continues to re-sell

Citrix NetScaler, Citrix CloudBridge, and Citrix XenMobile in its Amazon Web Services, or AWS Marketplace, and we collaborate to allow customers to run XenDesktop on the AWS platform.

Through our Citrix Ready program, more than 25,000 products have been verified to work with Citrix technologies. In addition, numerous partners proactively incorporate Citrix products and technologies such as Receiver, XenDesktop, XenApp, NetScaler, and HDX (ICA) technologies into their customer offerings. Our HDX and Receiver technologies are often included

8

with or offered for thin clients, industry-standard servers and mobile devices, such as Apple's iPhone and iPad, Windows Mobile, Blackberry and Google Android devices. Licensees include Dell, Samsung, Fujitsu and Hewlett Packard, among others.

Research and Development

We focus our research and development efforts on developing new products and core technologies in our core markets and to further enhancing the functionality, reliability, performance and flexibility of existing products. We solicit extensive feedback concerning product development from customers, both directly from and indirectly through our channel distributors.

We believe that our software development teams and core technologies represent a significant competitive advantage for us. Included in the software development teams is a group focused on research activities that include prototyping ways to integrate emerging technologies and standards into our product offerings, such as emerging Web services technologies, management standards and Microsoft's newest technologies. Many groups within the software development teams have expertise in Extensible Markup Language, or XML, based software development, integration of acquired technology, multi-tier Web-based application development and deployment, SSL secure access, hypervisor technologies, cloud technologies, networking technologies, VoIP-based audio technology, Web-based video technology and building SaaS. We incurred research and development expenses of approximately \$553.8 million in 2014, \$516.3 million in 2013 and \$450.6 million in 2012. In addition to internal research and development, Citrix also supports an eco-system of early stage companies via our Startup Accelerator program which provides seed capital for new technologies.

Sales, Marketing and Services

We market and license our products and services through multiple channels worldwide, including selling through resellers and direct over the Web. Our partner community comprises thousands of value-added resellers known as Citrix Solution Advisors™, VADs, cloud service providers, SIs, Independent Software Vendors, or ISVs and OEMs. Distribution channels are managed by our worldwide sales and services organization. Partners receive training and certification opportunities to support our expanding portfolio of products, solutions and services. In addition, our Mobility Apps division provides our collaboration and data sharing offerings through direct corporate sales, our partner community, and direct through our web sites.

In 2014, we worked closely with partners to benefit from changes to our global partner program made in 2013. The changes included: differentiated Citrix Advisor Rewards by partner level; Citrix Opportunity Registration discounts for cloud networking; clear, published criteria for achieving Gold and Platinum status; and refreshed certification requirements to expedite acquisition of the latest knowledge and skills. Citrix Advisor Rewards™, is an innovative influencer program that rewards our partners for registering projects and demonstrating value-added selling even if the sale is fulfilled by another partner. In 2014 we offered full year promotions with additional rewards for selling to new customers as well as lowered the deal qualifications to include partner sales to Small and Medium businesses. We introduced new certifications and a sales enablement platform to provide partners with the breadth of skills required to plan, design, deliver and support our solutions. We continued to focus on increasing the productivity of our existing partners, and building capacity through targeted recruitment, introducing programs to increase partner mindshare, limit channel conflict and increase partner loyalty to us.

As Citrix continues to lead with cloud services, we have been cultivating a global base of over 2,600 partners within the Citrix Service Provider program. These partners, consisting of managed service providers, IT hosting companies and Telcos, license Citrix desktop, application, networking and MDM products on a monthly subscription basis. With these technologies partners then create various vertically differentiated offers of their own, consisting of cloud-hosted applications and cloud-hosted desktops, which they then resell both to SMBs and to enterprise IT. Besides supplying technology, Citrix is actively engaged in assisting these partners develop their hosted businesses by supplying business and marketing assistance.

For all of our channels, we regularly take actions to improve the effectiveness of our partner programs and further strengthen our channel relationships through management of non-performing partners, recruitment of partners with expertise in selling into new markets and forming additional strategic global and national partnerships. Engagement with SIs and ISVs continues to be a substantial part of our strategic roadmap within large enterprise and government markets. Our integrator partnerships include organizations such as Accenture, Capgemini, Computer Sciences

Corporation, Dimension Data, Hewlett Packard, Fujitsu, IBM Global Services, and Wipro, among others. Computer Sciences Corporation, Fujitsu, Hewlett Packard, IBM and Wipro all deliver offerings powered by the Citrix Workspace Suite. The ISV program maintains a strong representation across targeted industry verticals including healthcare, financial services and telecommunications. Members in the ISV program include Allscripts, Cerner Corporation, Epic Systems Corporation, McKesson Corporation, and Siemens Medical Health Solutions, among several others.

Our corporate marketing organization provides sales and industry event support, demand generation, web and social marketing, sales tools and collateral, advertising, direct mail, industry analyst relations and public relations coverage to our indirect channels to aid in market development and in attracting new customers. Our partner development organization actively

supports our partners to improve their commitment and capabilities with Citrix solutions. Our customer sales organization consists of field-based sales engineers and corporate sales professionals who work directly with our largest customers, and coordinate integration services provided by our partners. Additional sales personnel, working in central locations and in the field, provide support including recruitment of prospective partners and technical training with respect to our products.

Although we have thousands of partnerships, one distributor, Ingram Micro, accounted for 13% of our net revenues in 2014, 14% of our total net revenues in 2013 and 16% of our total net revenues in 2012. Our distributor arrangements with Ingram Micro consist of several non-exclusive, independently negotiated agreements with its subsidiaries, each of which covers different countries or regions. Each agreement is negotiated separately and is independent of any other contract (such as a master distribution agreement), one of which was individually responsible for over 10% of our total net revenues in each of the last three fiscal years. In addition, there was no individual VAR that accounted for over 10% of our total net revenues in 2014, 2013 and 2012.

We are not obligated to accept product returns from our distributors under any conditions, unless the product item is defective in manufacture. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations-Critical Accounting Policies and Estimates” and Note 2 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 for information regarding our revenue recognition policy.

International revenues (sales outside the United States) accounted for approximately 45.2% of our net revenues for the year ended December 31, 2014, 45.4% of our net revenues for the year ended December 31, 2013 and 45.3% of our net revenues for the year ended December 31, 2012. For detailed information on our international revenues, please refer to Note 11 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014.

Segment Revenue

Our revenues are derived from our Enterprise and Service Provider division products, which primarily include Workspace Services solutions, Delivery Networking products and related license updates and maintenance, support and professional services and from our Mobility Apps division's Communications Cloud, Documents Cloud and Workflow Cloud products. The Enterprise and Service Provider division and the Mobility Apps division constitute our two reportable segments. See Note 11 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014.

Operations

For our Cloud Networking products, including NetScaler and CloudBridge, we use independent contractors to provide a redundant source of manufacture and assembly capabilities. Independent contractors provide us with the flexibility needed to meet our product quality and delivery requirements. We have manufacturing relationships that we enter into in the ordinary course of business, primarily with Flextronics and IBM (primarily for ByteMobile Smart Capacity) under which we have subcontracted the majority of our hardware manufacturing activity, generally on a purchase order basis. These third-party contract manufacturers also provide final test, warehousing and shipping services. This subcontracting activity extends from prototypes to full production and includes activities such as material procurement, final assembly, test, control, shipment to our customers and repairs. Together with our contract manufacturers, we design, specify and monitor the tests that are required to meet internal and external quality standards. Our contract manufacturers manufacture our products based on forecasted demand for our products. Each of the contract manufacturers procures components necessary to assemble the products in our forecast and test the products according to our specifications. We are dual-sourced on our components, however, in some instances, those sources may be located in the same geographic area. Accordingly, if a natural disaster occurred in one of those areas, we may need to seek additional sources. Products are then shipped to our distributors, VARs or end-users. If the products go unsold for specified periods of time, we may incur carrying charges or obsolete material charges for products ordered to meet our forecast or customer orders. In 2014, we did not experience any material difficulties or significant delays in the manufacture and assembly of our products.

We control all purchasing, inventory, scheduling, order processing and accounting functions related to our operations. For our software products, production, warehousing and shipping are performed by our independent contractors HP, Ireland and Digital River. Master software CD-ROMs, development of user manuals, packaging designs, initial

product quality control and testing are primarily performed at our facilities. In some cases, independent contractors also duplicate CD-ROMs, print documentation and package and assemble products to our specifications. While it is generally our practice to promptly ship product upon receipt of properly finalized purchase orders, we sometimes have orders that have not shipped upon receipt of a purchase order. Although the amount of such product license orders may vary, the amount, if any, of such orders at the end of a fiscal year is not material to our business. We do not believe that backlog, as of any particular date, is a reliable indicator of future performance.

We believe that our fourth quarter revenues and expenses are affected by a number of seasonal factors, including the lapse of many corporations' fiscal year budgets and an increase in amounts paid pursuant to our sales compensation plans due to compensation plan accelerators that are often triggered in the fourth quarter. We believe that these seasonal factors are common within our industry. Such factors historically have resulted in first quarter revenues in any year being lower than the immediately preceding fourth quarter. We expect this trend to continue through the first quarter of 2015. In addition, our European operations generally generate lower revenues in the summer months because of the generally reduced economic activity in Europe during the summer. This seasonal factor also typically results in higher fourth quarter revenues.

Competition

We sell our products in intensely competitive markets. Some of our competitors and potential competitors have significantly greater financial, technical, sales and marketing and other resources than we do. As the markets for our products and services continue to develop, additional companies, including those with significant market presence in the computer appliances, software and networking industries, could enter the markets in which we compete and further intensify competition. In addition, we believe price competition could become a more significant competitive factor in the future. As a result, we may not be able to maintain our historic prices and margins, which could adversely affect our business, results of operations and financial condition. See “-Technology Relationships” and Part I-Item 1A entitled “Risk Factors” included in this Annual Report on Form 10-K for the year ended December 31, 2014.

Workspace Services

Our Desktop and Application Virtualization products are based on an alternative technology platform the success of which will depend on organizations and customers perceiving technological and operational benefits and cost savings associated with adopting desktop and application virtualization solutions. We differentiate from basic virtualization solutions with robust security and flexibility to enable IT to deliver Windows apps and desktops for better business outcomes. Our primary competition in this market is the existing IT desktop management practice of manually configuring physical desktops, which is time-consuming, expensive and subject to inconsistency. We also face numerous competitors that provide automation of these processes and alternative approaches, including VMware's Horizon product and Oracle Corporation, or Oracle's, broad virtualization stack which is a feature of its operating system and management software. We believe XenDesktop and XenApp give Citrix a competitive advantage by providing customers multiple ways to virtualize and deliver desktops and or apps with one, integrated virtualization system and delivering a higher performance user experience, more robust security and the flexibility for people to use any device and IT to use any cloud infrastructure - public or private.

Our Enterprise Mobility Management product line, XenMobile, competes with AirWatch by VMware, MobileIron, Good Technology and other smaller competitors. We believe we differentiate ourselves from these competitors by providing the most complete solution on the market, with MDM, MAM and core mobile productivity applications, including secure mobile email, calendar, browser, notes and more. Our apps feature unique workflow integrations designed to make people work better, a significant advantage over competitors that rely on third parties for their mobile apps and can drive similar integrations.

We also see competition from competitors that are combining mobile and desktop technologies. We believe the Citrix solution, Citrix Workspace Suite, is the best solution available today that can securely deliver a mobile workspace - all Windows, Web, SaaS and native mobile applications, data and virtual desktops - to any device, anywhere. VMware responded to our introduction of the Citrix Workspace Suite with the introduction of the VMware Workspace Suite. We expect other vendors to follow suit. We offer market-leading technologies for every component of the Citrix Workspace Suite. Further, we believe that our end-user experience is a competitive edge when compared to the alternative solutions due to the intuitiveness and self-service features of our offering.

Delivery Networking

Our NetScaler products compete against other established competitors, including, F5 Networks, Inc., or F5, and to a lesser extent, A10 Networks. Both compete with us for traditional enterprise sales opportunities, while F5 is our principal competitor in the Internet-centric market segment. We continue to enhance NetScaler's feature capability and aggressively market NetScaler to our existing customer base as well as expanding into telco and cloud provider markets.

Our ByteMobile Smart Capacity product's primary competition is a network engineering organization that elects not to employ the type of optimization solution we offer. In addition, ByteMobile Smart Capacity competes with single-purpose or limited-purpose vendors that address a portion of what our product offers and may or may not partner with other vendors to complete their offerings. Our ByteMobile Smart Capacity product is a market share leader in the video and web optimization market, with a large installed base of tier-one mobile network operator customers. We believe that ByteMobile Smart Capacity has competitive advantages both in core optimization technology and in its ability to consolidate disparate hardware and software functionality into a single managed network element.

Competition for CloudBridge comes in the form of alternative approaches to making the cloud a secure extension of a company's on-premise enterprise network, Internet protocol security, or IPSec, or multi-protocol label switching, or MPLS, network solutions, among others. With regards to WAN optimization, CloudBridge also competes with Riverbed Technology, Inc., or Riverbed and Cisco. Riverbed has the largest market share. While being a less established company than Citrix, Riverbed has the advantage of being focused solely on WAN optimization. Cisco with the second largest share, benefits from its leadership in the networking market. We believe CloudBridge is a more feature-rich solution than the other alternatives and provides superior flexibility through shared technology with NetScaler.

VMware is also the main competitor of our CloudPlatform product, which is an advanced platform for building highly scalable and reliable cloud computing environments, and our CloudPortal product, which is a comprehensive portal for provisioning hosted applications, desktops, services and IaaS. Unlike VMware's products, our CloudPlatform and CloudPortal products draw on the successful models and experience of large, public cloud implementations and apply them to enterprise, private clouds. The differentiation and experience of our products is expanded when coupled with our NetScaler and XenServer products, both of which are used in large, public cloud implementations. Additionally, OpenStack, an open source project, provides an alternative solution to our CloudPlatform product. We believe CloudPlatform has a competitive advantage, as it is production ready for cloud deployment.

In the server virtualization market, we compete directly with VMware, which was first to market with this technology and is widely regarded as the market leader. In addition, we also compete with Microsoft's Windows Server 2012 with Hyper-V. Microsoft first entered this market in 2008 and has since established its position as a leader in this space. To a lesser extent, and mostly only in the niche technology areas of test and development, we compete with RedHat, who recently expanded into this market. We believe XenServer, our server virtualization product, has features that are competitive with VMware's ESX Server in terms of performance, scalability and other enterprise-class capabilities. XenServer is offered as a free download, which significantly increases the reach of server virtualization to customers of all sizes and geographies. We monetize XenServer by selling maintenance and updates, which aligns with our CloudPlatform go-to-market strategy.

Mobility Apps

Our products for collaboration continue to maintain solid leadership positions in extremely competitive markets, particularly among, SMBs. We differentiate our SaaS offerings by designing simple, secure, reliable and cost-efficient products that deliver a superior customer experience. Our competitors range from large, established technology firms to small, Internet-based startups.

In Communications Cloud, we compete primarily with Cisco WebEx, Microsoft Lync and Skype, and conferencing call solutions from Intercall, PGI, AT&T and Verizon. Additionally we compete with freemium products such as Logmein's Join.me and Google's Google + Hangouts. Our GoToMeeting, GoToWebinar and GoToTraining products have proven to be competitive based on ease-of-use and the All You Can Meet® pricing model, combined with built-in VoIP and toll-based PSTN audio services. We further differentiate our collaboration products by integrating OpenVoice toll-free seamlessly with the built-in VoIP and toll audio services and having purpose-built solutions for marketing and training use cases. We believe these features give us competitive advantage among individual, prosumer and SMB customers.

In the data sharing market, our Documents Cloud direct competition includes Dropbox, Inc., Box, Inc. and HighTail, Inc. (formerly YouSendIt), as well as legacy solutions like traditional file transfer protocol, or FTP, in the SMB market. Many of these competitors have strong brand recognition through their consumer and free versions of their products. However, we believe our ShareFile product offers a superior solution as it is built specifically for the needs of businesses. In the Enterprise segment, there are fewer direct competitors to the ShareFile product. Increased competition is anticipated as large enterprises need to deploy secure data syncing and sharing solutions for a growing mobile workforce. We believe that Citrix's strong reputation in the Enterprise market, along with ShareFile's integration into Citrix products such as Receiver and XenMobile, and our unique ability to store data on-premise or in the Cloud, will be a key differentiator.

We have been a market leader with our GoToMyPC product for many years. Our direct competition includes LogMeIn, Inc., or LogMeIn, free solutions such as Microsoft's Live Mesh and those from many Internet startups. In addition, new remote access features in desktop operating systems like Microsoft Windows and Macintosh OSX

provide alternatives to our solution. We endeavor to differentiate our products by continuing our focus on security, ease-of-use and support for multiple desktop operating systems.

Our Workflow Cloud product, GoToAssist, has achieved a large market share for Web-based clientless remote support. This product includes a version purpose-built for individual users, consultants and small businesses, positioning Citrix as the only provider of remote support solutions for all segments of the market. In remote support, we compete with Cisco's WebEx and LogMeIn.

Proprietary Technology

Our success is dependent upon certain proprietary technologies and core intellectual property. We have been awarded numerous domestic and foreign patents and have numerous pending patent applications in the United States and foreign countries. Our technology is also protected under copyright laws. Additionally, we rely on trade secret protection and confidentiality and proprietary information agreements to protect our proprietary technology. We have established proprietary trademark rights in markets across the globe, and own trademark registrations and pending registration applications in the United States and other countries, including Citrix, Citrix Workspace Cloud, ByteMobile, GoToAssist, GoToMeeting, GoToWebinar, NetScaler, ShareFile, Worx Home, WorxDesktop, WorxMail, WorxWeb, Xen, XenApp, XenClient, XenDesktop, XenServer and XenMobile. While our competitive position could be affected by our ability to protect our proprietary information, we believe that because of the rapid pace of technological change in the industry, factors such as the technical expertise, knowledge and innovative skill of our management and technical personnel, our technology relationships, name recognition, the timeliness and quality of support services provided by us and our ability to rapidly develop, enhance and market software products could be more significant in maintaining our competitive position. See Part I-Item 1A entitled “Risk Factors” included in this Annual Report on Form 10-K for the year ended December 31, 2014.

Available Information

Our Internet address is <http://www.citrix.com>. We make available, free of charge, on or through our website our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act as soon as reasonably practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission. The information on our website is not part of this Annual Report on Form 10-K for the year ended December 31, 2014.

Employees

As of December 31, 2014, we had 10,081 employees. On January 28, 2015, we announced a strategic restructuring program which included steps to reduce our headcount by approximately 700 full-time positions and 200 contractor positions. We believe our relations with employees are good. In certain countries outside the United States, our relations with employees are governed by labor regulations that provide for specific terms of employment between our company and our employees.

ITEM 1A. RISK FACTORS

Our operating results and financial condition have varied in the past and could in the future vary significantly depending on a number of factors. From time to time, information provided by us or statements made by our employees contain “forward-looking” information that involves risks and uncertainties. In particular, statements contained in this Annual Report on Form 10-K for the year ended December 31, 2014, and in the documents incorporated by reference into this Annual Report on Form 10-K for the year ended December 31, 2014, that are not historical facts, including, but not limited to, statements concerning new products, product development and offerings of products and services market positioning, distribution and sales channels, our partners and other strategic or technology relationships, financial information and results of operations for future periods, product and price competition, strategy and growth initiatives, seasonal factors, natural disasters, stock-based compensation, licensing and subscription renewal programs, international operations and expansion, investment transactions and valuations of investments and derivative instruments, reinvestment or repatriation of foreign earnings, fluctuations in foreign exchange rates, tax matters, acquisitions, stock repurchases, our debt, changes in accounting rules or guidance, changes in domestic and foreign economic conditions and credit markets, delays or reductions in technology purchases, liquidity, litigation matters, and intellectual property matters constitute forward-looking statements and are made under the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements are neither promises nor guarantees. Our actual results of operations and financial condition could vary materially from those stated in any forward-looking statements. The following factors, among others, could cause actual results to differ materially from those contained in forward-looking statements made in this Annual Report on Form 10-K for the year ended December 31, 2014, in the documents incorporated by reference into this Annual Report on Form 10-K or presented elsewhere by our management from time to time. Such factors, among others, could have a material adverse effect upon our business, results of operations and financial condition. We caution readers not to place undue reliance on any forward-looking statements, which only speak as of the date made. We undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made.

RISKS RELATED TO OUR BUSINESS AND INDUSTRY

A significant portion of our revenues has historically come from our Desktop and Application Virtualization products and decreases in sales for certain of these products could adversely affect our results of operations and financial condition

A significant portion of our revenues has historically come from our Desktop and Application Virtualization products, and we continue to anticipate that sales of our Desktop and Application Virtualization products and related enhancements and upgrades will constitute a majority of our revenue for the foreseeable future. Recently, product license sales for certain of our Desktop and Application Virtualization products have declined year-over-year. Further declines and variability in sales of certain of our Desktop and Application Virtualization products could occur as a result of:

- new competitive product releases and updates to existing products;
- industry trend to focus on the delivery of applications, especially on mobile devices;
- introduction of new or alternative technologies, products or service offerings by third parties;
- termination or reduction of our product offerings and enhancements;
- potential market saturation;
- failure to enter new markets
- price and product competition resulting from rapid and frequent technological changes and customer needs;
- general economic conditions;
- complexities and cost in implementation;
- failure to deliver satisfactory technical support;
- dissatisfied customers; or
- lack of commercial success of our technology relationships.

In addition, we recently experienced increased competition in the Desktop and Application Virtualization business from directly competing products, alternative products and products on new platforms. For example, in 2014

VMWare introduced Horizon Suite, which competes with our XenApp product offerings, and Amazon and IBM introduced Desktop-as-a-Service offerings. Further, there continues to be an increase in the number of alternatives to Windows operating system powered desktops, in particular mobile devices such as smartphones and tablet computers. Users may increasingly turn to these devices to perform functions that would have been traditionally performed on desktops and laptops, which in turn may reduce the market for our Desktop and Application Virtualization products. If sales of our Desktop and Application Virtualization products decline as a result of these or other factors, our revenue would decrease and our results of operations and financial condition would be adversely affected. In addition, modifications to certain of our Desktop and Application Virtualization products may cause variability in our Desktop and Application Virtualization revenue, and make it difficult to predict our revenue growth and trends, as our customers adjust their purchasing decisions in response to such events.

Our business could be adversely impacted by conditions affecting the information technology market. The demand for our products and services depends substantially upon the general demand for business-related computer appliances and software, which fluctuates based on numerous factors, including capital spending levels, the spending levels and growth of our current and prospective customers, and general economic conditions. Moreover, the purchase of our products and services is often discretionary and may involve a significant commitment of capital and other resources. U.S economic forecasts for the information technology, or IT, sector are uncertain and continue to highlight an industry in transition from legacy platforms to mobile, cloud, big data and social solutions. If our current and prospective customers cut costs they may significantly reduce their information technology expenditures. Additionally, if our current and prospective customers shift their IT spending more rapidly towards newer technologies and solutions as mobile, cloud, big data and social platforms evolve, the demand for our products and services most aligned with legacy platforms (such as our Desktop Virtualization products) could decrease. Fluctuations in the demand for our products and services could have a material adverse effect on our business, results of operations and financial condition.

If we do not develop new products and services, integrate acquired products and services and enhance our existing products and services, our business, results of operations and financial condition could be adversely affected.

The markets for our products and services are characterized by:

- rapid technological change;
- evolving industry standards;
- fluctuations in customer demand;
- changing and increasingly sophisticated customer needs; and
- frequent new product and service introductions and enhancements.

U.S. economic forecasts for the IT sector are uncertain and continue to highlight an industry in transition from legacy platforms to mobile, cloud, big data and social solutions. Our future success depends on our ability to adapt to this fluid market and continually enhance our current products and services, integrate acquired products and services, and develop and introduce new products and services that our customers choose to buy. The emerging markets for our next generation of products and services have yet to be defined. The introduction of third-party solutions embodying new technologies and the emergence of new industry standards could make our existing and future software solutions obsolete and unmarketable. If we are unable to keep pace with technological developments of third parties, expectations of the emerging markets and customer demands by introducing new products and services and enhancements, our business, results of operations and financial condition could be adversely affected. Our future success could be hindered by:

- delays in our introduction of new products and services;
- delays in or lack of market acceptance of new products and services or new releases of our current products and services;
- our failure to support services in a timely manner;
 - our failure to identify and address significant product quality issues;
- our inability to position our and/or price our products and services to meet the market demand;
- our failure to maintain relevance and brand loyalty in the evolving marketplace; and
- the introduction of new products, services or technologies from third parties that could replace, make obsolete or shorten the life cycle of our existing product and service offerings.

We believe the demand for technology has and will continue to shift from the types of products and services we and our competitors have sold in the past to a new generation of products and services. We cannot guarantee that our Workspace Services solutions, Delivery Networking products and Mobility Apps products will achieve the broad market acceptance by our channel and strategic partners, customers and prospective customers necessary to generate significant revenue in the future. In addition, we cannot guarantee that we will be able to respond effectively to technological changes or new product announcements by others. If we experience material delays or sales shortfalls with respect to our new products and services or new releases of our current products and services, those delays or shortfalls could have a material adverse effect on our business, results of operations and financial condition.

We face intense competition, which could result in customer loss, fewer customer orders and reduced revenues and margins.

We sell our products and services in intensely competitive markets. Some of our competitors and potential competitors have significantly greater financial, technical, sales and marketing and other resources than we do. We compete based on our ability to offer to our customers the most current and desired product and services features. We expect that competition will continue to be intense, and there is a risk that our competitors' products may be less costly or, especially with respect to our Mobility Apps products, free, provide better performance or include additional features when compared to our products.

Additionally, there is a risk that our products may become outdated or that our market share may erode. Further, the announcement of the release, and the actual release, of new products incorporating similar features to our products could cause our existing and potential customers to postpone or cancel plans to license certain of our existing and future product and service offerings. Existing or new products and services that provide alternatives to our products and services could materially impact our ability to compete in these markets. As the markets for our products and services, especially those products in early stages of development, continue to develop, additional companies, including companies with significant market presence in the computer hardware, software, cloud, networking, mobile, collaboration, data sharing and related industries, could enter, or increase their footprint in, the markets in which we compete and further intensify competition. In addition, we believe price competition could become a more significant competitive factor in the future. As a result, we may not be able to maintain our historic prices and margins, which could adversely affect our business, results of operations and financial condition.

We expect to continue to face additional competition as new participants enter our markets and as our current competitors seek to increase market share. As our businesses continue to expand globally, we may see new and increased competition in different geographic regions. The generally low barriers to entry in certain of our businesses increase the potential for challenges from new industry competitors, whether small and medium sized businesses or larger, more established companies. Smaller companies new to our market may have more flexibility to develop on more agile platforms and have greater ability to adapt their strategies and cost structures, which may give them a competitive advantage with our current or prospective customers. We may also experience increased competition from new types of products as the options for mobile and cloud, networking and collaboration and data sharing solutions increase. Further, as our industry evolves and if our company grows, companies with which we have strategic alliances may become competitors in other product areas, or our current competitors may enter into new strategic relationships with new or existing competitors, all of which may further increase the competitive pressures we face. Our new product and technology initiatives subject us to additional business, legal and competitive risks.

We have transformed and continue to transform our business through several growth phases, from remote access to web app delivery, to virtualization, to mobile workspaces and to the software-defined workplace. In this transition, we are introducing new products and technologies, such as the Citrix Workspace Cloud.

This strategic transformation in our business and expansion of our offerings subjects us to additional risks, which could adversely affect our results of operations and financial condition. These risks include:

- certain of our new product initiatives have a subscription model and we may not be able to accurately predict subscription renewal rates or their impact on results;
- if customers do not adopt our new product or service offerings, we may be unable to recoup or realize a reasonable return on our investment in these new products and services;
- sales of existing products and service offerings may be delayed while customers are investigating our new offerings;
- competitive product and service offerings in emerging IT sectors may gain broad adoption before our products and services and, it may be difficult for us to displace such offerings regardless of the comparative technical merit, efficacy or cost of our products and services;
- we may not be able to develop and implement effective go-to-market strategies and train our sales team and channel partners in order to effectively market offerings in product categories in which we have less experience than our competitors;
- we may not be able to develop effective pricing strategies for our new products and services;
- hardware, software and cloud hosting vendors may not be able to ensure interoperability with our products and offer compatible products and services to end users;
- our new initiatives may be hosted by third parties whom we do not control but whose failure to prevent service disruptions, or other failures or breaches may require us compensate, indemnify or otherwise be liable to customers or third parties for business interruptions or damages that may occur.

In order to be successful, we must attract, engage, retain and integrate key employees and have adequate succession plans in place, and failure to do so could have an adverse effect on our ability to manage our business.

Our success depends, in large part, on our ability to attract, engage, retain, and integrate qualified executives and other key employees throughout all areas of our business. Identifying, developing internally or hiring externally, training and retaining highly-skilled managerial, technical, sales and services, finance and marketing personnel are critical to

our future, and competition for experienced employees can be intense. In order to attract and retain executives and other key employees in a competitive marketplace, we must provide a competitive compensation package, including cash- and equity-based compensation. If we do not obtain the stockholder approval needed to continue granting equity compensation in a competitive manner, our ability to attract, retain, and motivate executives and key employees could be weakened. Failure to successfully

hire executives and key employees or the loss of any executives and key employees could have a significant impact on our operations. Over the past six months, we have appointed three new executives to key leadership positions. This and further, changes in our management team may be disruptive to our business, and any failure to successfully integrate key new hires or promoted employees could adversely affect our business and results of operations.

Competition for qualified personnel in our industry is intense because of the limited number of people available with the necessary technical skills and understanding of products in our industry. The loss of services of any key personnel, the inability to retain and attract qualified personnel in the future or delays in hiring may harm our business and results of operations. Effective succession planning is also important to our long-term success. Failure to ensure effective transfer of knowledge and smooth transitions involving key employees could hinder our strategic planning and execution, which may likewise harm our business and results of operations.

Adverse changes in general global economic conditions could adversely affect our operating results.

As a globally operated company, we are subject to the risks arising from adverse changes in global economic and market conditions. Continued economic uncertainty across all geographic locations may adversely affect sales of our products and services and may result in longer sales cycles, slower adoption of technologies and increased price competition. Additionally, in response to sustained economic uncertainty, many governmental organizations outside the U.S. that are current or prospective customers for our products and services continue to make, significant spending cutbacks which may continue to reduce the amount of government spending on IT and demand for our products and services from government organizations. Adverse economic conditions also may negatively impact our ability to obtain payment for outstanding debts owed to us by our customers or other parties with whom we do business. Industry volatility may result in increased competition.

The industry has been volatile and there has been a trend toward industry consolidation in our markets for several years. We expect this trend to continue as companies attempt to strengthen or hold their market positions in an evolving and volatile industry and as companies are acquired or are unable to continue operations. For example, some of our competitors have made acquisitions or entered into partnerships or other strategic relationships to offer a more comprehensive solution than they had previously offered. Further, some companies are making plans or may be under pressure by stockholders to divest businesses and such divestitures may result in stronger competition. Additionally, as IT companies attempt to strengthen or maintain their market positions in the evolving delivery network, workspace services and mobility apps markets, these companies continue to seek to deliver comprehensive IT solutions to end users and combine enterprise-level hardware and software solutions that may compete with our virtualization, mobility and collaboration and data sharing solutions. These consolidators or potential consolidators may have significantly greater financial, technical and other resources and brand loyalty than we do, and may be better positioned to acquire and offer complementary products and services. The companies resulting from these possible combinations may create more compelling product and service offerings and be able to offer greater pricing flexibility or sales and marketing support for such offerings than we can. These heightened competitive pressures could result in a loss of customers or a reduction in our revenues or revenue growth rates, all of which could adversely affect our business, results of operations and financial condition.

Actual or perceived security vulnerabilities in our products and services or cyberattacks on our networks could have a material adverse impact on our business and results of operations.

Use of our products and services may involve the transmission and/or storage of data, including in certain instances customers' business and personally identifiable information. Thus, maintaining the security of products, computer networks and data storage resources is important as security breaches could result in product or service vulnerabilities and loss of and/or unauthorized access to confidential information. We devote significant resources to addressing security vulnerabilities in our products and services through our efforts to engineer more secure products and services, enhance security and reliability features in our products and services, deploy security updates to address security vulnerabilities and seeking to respond to known security incidents in sufficient time to minimize any potential adverse impact. Despite our preventive efforts, in 2013, we discovered that unauthorized parties had penetrated certain of our systems resulting in us taking certain remedial measures. Generally speaking, unauthorized parties may attempt to misappropriate or compromise our confidential information or that of third parties, create system disruptions, product or service vulnerabilities or cause shutdowns. These perpetrators of cyberattacks also may be able to develop and deploy viruses, worms, malware and other malicious software programs that directly or indirectly, for example,

though a vendor or other third-party, attack our products and services, our networks or otherwise exploit any security vulnerabilities of our products, services and networks. Because techniques used by these perpetrators to obtain unauthorized access to or sabotage systems change frequently and generally are not recognized until long after being launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures. We can make no assurance that we will be able to detect, prevent, timely and adequately address, or mitigate the negative effects of cyberattacks or other security breaches.

A breach of our security measures as a result of third-party action, malware, employee error, malfeasance or otherwise could result in (among other consequences):

harm to our reputation or brand, which could lead some customers to seek to cancel subscriptions, stop using certain of our products or services, reduce or delay future purchases of our products or services, or use competing products or services;

individual and/or class action lawsuits, which could result in financial judgments against us or the payment of settlement amounts, which would cause us to incur legal fees and costs;

state or federal enforcement action, which could result in fines and/or penalties or other sanctions and which would cause us to incur legal fees and costs; and/or

in the event that we or one of our customers were the victim of a cyberattack or other security breach, additional costs associated with responding to such breach, such as investigative and remediation costs, and the costs of providing data owners or others with notice of the breach, legal fees, the costs of any additional fraud detection activities required by such customers' credit card issuers, and costs incurred by credit card issuers associated with the compromise and additional monitoring of systems for further fraudulent activity.

Any of these actions could materially adversely impact our business and results of operations.

We recently implemented a restructuring program, which could have a material negative impact on our business.

To increase strategic focus and operational efficiency, at the end of January 2015, we implemented a restructuring program that will affect approximately 700 full-time and 200 contractor positions. We anticipate completing the majority of the activities related to our restructuring program by the end of 2015. We may incur additional restructuring costs or not realize the expected benefits of these new initiatives. Further, we could experience delays, business disruptions, decreased productivity, unanticipated employee turnover and increased litigation related costs in connection with the restructuring and other efficiency improvement activities, and there can be no assurance that our estimates of the savings achievable by the restructuring will be realized. As a result, our restructuring and our related cost reduction activities could have an adverse impact on our financial condition or results of operations.

Regulation of the Web and telecommunications, privacy and data security may adversely affect sales of our products and result in increased compliance costs.

As Web commerce continues to evolve, increasing regulation by federal, state or foreign agencies and industry groups becomes more likely. For example, we believe increased regulation is likely with respect to the solicitation, collection, processing or use of personal, financial and consumer information as regulatory authorities around the world are considering a number of legislative and regulatory proposals concerning data protection, privacy and data security. In addition, the interpretation and application of consumer and data protection laws and industry standards in the United States, Europe and elsewhere are often uncertain and in flux. The application of existing laws to cloud-based solutions is particularly uncertain and cloud-based solutions may be subject to further regulation, the impact of which cannot be fully understood at this time. Moreover, it is possible that these laws may be interpreted and applied in a manner that is inconsistent with our data and privacy practices. If so, in addition to the possibility of fines, this could result in an order requiring that we change our data and privacy practices, which could have an adverse effect on our business and results of operations. Complying with these various laws could cause us to incur substantial costs or require us to change our business practices in a manner adverse to our business. Also, any new regulation, or interpretation of existing regulation, imposing greater fees or taxes on Web-based services, such as collaboration and data sharing services and audio services, or restricting information exchange over the Web, could result in a decline in the use and adversely affect sales of our products and our results of operations.

Our Mobility Apps products may involve the storage and transmission of protected health information, or PHI, that is subject to the Health Insurance Portability and Accountability Act, or HIPAA. HIPAA, amended by the Health Information Technology for Economic and Clinical Health Act, or the HITECH ACT, has significantly increased the civil money penalties for violations of patient privacy rights protected under HIPAA. As a result of the HITECH ACT, business associates who have access to PHI provided by hospitals, healthcare providers, health insurance companies and other covered entities are now directly subject to HIPAA, including the new enforcement scheme and inspection requirements. To the extent we are required to comply with HIPAA's data security provisions, we may be liable for sanctions and penalties for any failure to so comply. Furthermore, we may be required to incur additional

expenses in order to comply with the HITECH Act and any further amendments to and/or modifications of these requirements.

18

Our products could contain errors that could delay the release of new products or that may not be detected until after our products are shipped.

Despite significant testing by us and by current and potential customers, our products, especially new products or releases or acquired products, could contain errors. In some cases, these errors may not be discovered until after commercial shipments have been made. Errors in our products could delay the development or release of new products and could adversely affect market acceptance of our products. Additionally, our products depend on third-party products, which could contain defects and could reduce the performance of our products or render them useless. Because our products are often used in mission-critical applications, errors in our products or the products of third parties upon which our products rely could give rise to warranty or other claims by our customers, which may have a material adverse effect on our business, financial condition and results of operations.

We may experience outages, data loss and service disruptions of our Mobility Apps products and Delivery Networking products, which could significantly and adversely affect our financial condition and operating results. The increasing user traffic and complexity of our Mobility Apps products, specifically those using Voice over Internet protocol and high-definition video conferencing features, and Delivery Networking products demands more computing power. We have spent and expect to continue to spend substantial amounts of time and cost to adequately resource our Mobility Apps products and Delivery Networking products and to maintain and upgrade our technology and network infrastructure to handle the increased traffic of our collaboration and data products. Maintaining and expanding the capacity and geographic footprint of our infrastructure is expensive and complex. Inefficiencies or operational failures, including temporary service outages and temporary or permanent loss of customer data, could diminish the perceived quality and reliability of our services, and result in liability claims by customers and other third parties, damage to our reputation and loss of current and potential customers, any of which could materially and adversely affect our financial condition and results of operations.

Certain of the offerings from our Enterprise and Service Provider division have sales cycles which are long and/or unpredictable which could cause significant variability and unpredictability in our revenue and operating results for any particular period.

Generally, a substantial portion of our large and medium-sized customers implement our Workspace Services solutions on a departmental or enterprise-wide basis. We have a long sales cycle for these departmental or enterprise-wide sales because:

- our sales force generally needs to explain and demonstrate the benefits of a large-scale deployment of our product to potential and existing customers prior to sale;
- our service personnel typically spend a significant amount of time assisting potential customers in their testing and evaluation of our products and services;
- our customers are typically large and medium size organizations that carefully research their technology needs and the many potential projects prior to making capital expenditures for software infrastructure; and
- before making a purchase, our potential customers usually must get approvals from various levels of decision makers within their organizations, and this process can be lengthy.

Our long sales cycle for these products makes it difficult to predict when these sales will occur, and we may not be able to sustain these sales on a predictable basis. In addition, the long sales cycle for these products makes it difficult to predict the quarter in which sales will occur. Delays in sales could cause significant variability in our revenue and operating results for any particular period, and large projects with significant IT components may fail to meet our customers' business requirements or be canceled before delivery, which likewise could adversely affect our revenue and operating results for any particular period.

Similarly, our ByteMobile Smart Capacity solutions have a long and unpredictable sales cycle, and the timing of the related revenue is difficult to predict. Because sales of our ByteMobile Smart Capacity solutions are focused on the telecommunications market, we are subject to lengthy internal budgeting, approval and competitive evaluation processes that such customers generally require.

Overall the timing of our revenue is difficult to predict. Our quarterly sales have historically reflected an uneven pattern in which a disproportionate percentage of a quarter's total sales occur in the last month, weeks and days of each quarter. In addition, our business is subject to seasonal fluctuations and such fluctuations are generally most

significant in our fourth fiscal quarter, which we believe is due to the impact on revenue from the availability (or lack thereof) in our customers' fiscal year budgets and an increase in expenses resulting from amounts paid pursuant to our sales compensation plans as performance milestones are often triggered in the fourth quarter. We believe that these seasonal factors are common within our industry. In

19

addition, our European operations generally generate lower revenues in the summer months because of the generally reduced economic activity in Europe during the summer.

If we fail to convert our free users to paying customers or retain existing customers of our Mobility Apps products, our revenue and results of operations would be adversely affected.

Initially, many users of our Mobility Apps products utilize such products free of charge through free trials or freemium versions of the products or lower priced/limited functionality versions of the products. We seek to convert these free trial users to paying customers and, where appropriate, we encourage customers utilizing a lower priced/limited functionality versions of our product to upgrade to higher priced/full functionality versions. If our rate of conversion or upgrade suffers for any reason, our revenue may decline. We sell our Mobility Apps products pursuant to subscription agreements. Such customers may not renew their subscription after their subscription period expires. We may not be able to accurately predict future trends in customer cancellation, and our customers' continuation rates may decline or fluctuate because of several factors, including their satisfaction or dissatisfaction with our Mobility Apps products, the prices of such products, the prices of products offered by our competitors or reductions in our customers' spending levels. If our customers fail to renew or cancel their subscriptions for our Mobility Apps products our revenue may grow more slowly than expected or decline, and our operating results and financial condition could be adversely impacted.

Our success depends on our ability to attract and retain and further access large enterprise customers.

We must retain and continue to expand our ability to reach and access large enterprise customers by adding effective value-added distributors, or VADs, system integrators, or SIs, and other partners, as well as expanding our direct sales teams and consulting services. Our inability to attract and retain large enterprise customers could have a material adverse effect on our business, results of operations and financial condition. Large enterprise customers usually request special pricing and purchase of multiple years of subscription and maintenance up-front and generally have longer sales cycles. By allowing these customers to purchase multiple years of subscription or maintenance up-front and by granting special pricing, such as bundled pricing or discounts, to these large customers, we may have to defer recognition of some or all of the revenue from such sales. This deferral, compounded with the longer sales cycles, could reduce our revenues and operating profits for a given reporting period and make revenues difficult to predict. Changes to our licensing or subscription renewal programs, or bundling of our products, could negatively impact the timing of our recognition of revenue.

We continually re-evaluate our licensing programs and subscription renewal programs, including specific license models, delivery methods, and terms and conditions, to market our current and future products and services. We could implement new licensing programs and subscription renewal programs, including promotional trade-up programs or offering specified enhancements to our current and future product and service lines. Such changes could result in deferring revenue recognition until the specified enhancement is delivered or at the end of the contract term as opposed to upon the initial shipment or licensing of our software product. We could implement different licensing models in certain circumstances, for which we would recognize licensing fees over a longer period, including offering additional products in a SaaS model. Changes to our licensing programs and subscription renewal programs, including the timing of the release of enhancements, upgrades, maintenance releases, the term of the contract, discounts, promotions and other factors, could impact the timing of the recognition of revenue for our products, related enhancements and services and could adversely affect our operating results and financial condition.

Further, we may be required to defer the recognition of revenue that we receive from the sale of certain bundled products if we have not established vendor specific objective evidence, or VSOE, for the undelivered elements in the arrangement in accordance with generally accepted accounting principles in the United States, or GAAP. A delay in the recognition of revenue from sales of these bundled products may cause fluctuations in our quarterly financial results and may adversely affect our operating margins. Similarly, companies that we acquire may operate with different cost and margin structures, which could further cause fluctuations in our operating results and adversely affect our operating margins. Moreover, if our quarterly financial results or our predictions of future financial results fail to meet the expectations of securities analysts and investors, our stock price could be negatively affected.

Sales and renewals of our license updates and maintenance products constitute a large portion of our deferred revenue. We anticipate that sales and renewals of our license updates and maintenance products will continue to constitute a substantial portion of our deferred revenue. Our ability to continue to generate both recognized and deferred revenue

from our license updates and maintenance products will depend on our customers continuing to perceive value in automatic delivery of our software upgrades and enhancements. A decrease in demand for our license updates and maintenance products could occur as a result of a decrease in demand for our Workspace Services solutions and our Delivery Networking products. If our

20

customers do not continue to purchase our license updates and maintenance products, our deferred revenue would decrease significantly and our results of operations and financial condition would be adversely affected.

As we expand our international footprint, we could become subject to additional risks that could harm our business. We conduct significant sales and customer support, development and engineering operations in countries outside of the United States. During the year ended December 31, 2014, we derived approximately 45.2% of our revenues from sales outside the United States. Our continued growth and profitability could require us to further expand our international operations. To successfully maintain and expand international sales, we may need to establish additional foreign operations, hire additional personnel and recruit additional international resellers. In addition, there is significant competition for entry into high growth markets where we may seek to expand, such as China, the Middle East and Eastern Europe. Our international operations are subject to a variety of risks, which could adversely affect the results of our international operations. These risks include:

- compliance with foreign regulatory and market requirements;
- variability of foreign economic, political and labor conditions;
- changing restrictions imposed by regulatory requirements, tariffs or other trade barriers or by U.S. export laws;
- regional data privacy laws that apply to the transmission of our customers' data across international borders;
- health or similar issues such as pandemic or epidemic;
- difficulties in staffing and managing international operations;
- longer accounts receivable payment cycles;
- potentially adverse tax consequences;
- difficulties in enforcing and protecting intellectual property rights;
- burdens of complying with a wide variety of foreign laws; and
- as we generate cash flow in non-U.S. jurisdictions, if required, we may experience difficulty transferring such funds to the U.S. in a tax efficient manner.

Our success depends, in part, on our ability to anticipate and address these risks. We cannot guarantee that these or other factors will not adversely affect our business or results of operations.

We rely on indirect distribution channels and major distributors that we do not control.

We rely significantly on independent distributors and resellers to market and distribute our products and services. Our distributors generally sell through resellers. Our distributor and reseller base is relatively concentrated. We maintain and periodically revise our sales incentive programs for our independent distributors and resellers, and such program revisions may adversely impact our results of operations. Our competitors may in some cases be effective in providing incentives to current or potential distributors and resellers to favor their products or to prevent or reduce sales of our products. The loss of or reduction in sales to our distributors or resellers could materially reduce our revenues.

Further, we could maintain individually significant accounts receivable balances with certain distributors. The financial condition of our distributors could deteriorate and distributors could significantly delay or default on their payment obligations. Any significant delays, defaults or terminations could have a material adverse effect on our business, results of operations and financial condition.

We are in the process of diversifying our base of channel relationships by adding and training more channel partners with abilities to reach larger enterprise customers and to sell our newer products and services. We are also in the process of building relationships with new types of channel partners, such as systems integrators, service providers and OEMs. In addition to this diversification of our partner base, we will need to maintain a healthy mix of channel members who service smaller customers. We may need to add and remove distribution partners to maintain customer satisfaction and a steady adoption rate of our products, which could increase our operating expenses. Through our Citrix Partner Network and other programs, we are currently investing, and intend to continue to invest, significant resources to develop these channels, which could reduce our profits if such channels do not result in increased revenues.

Our Delivery Networking business could suffer if there are any interruptions or delays in the supply of hardware or hardware components from our third-party sources.

We rely on a concentrated number of third-party suppliers, who provide hardware or hardware components for our Delivery Networking products, and contract manufacturers. If we are required to change suppliers, there could be a delay in the supply of our hardware or hardware components and our ability to meet the demands of our customers

could be adversely affected, which could cause the loss of Delivery Networking sales and existing or potential customers and delayed revenue recognition and adversely affect our results of operations. While we have not, to date, experienced any material difficulties or delays in the manufacture and assembly of our Delivery Networking products, our suppliers may encounter problems during manufacturing due to a variety of reasons, including failure to follow specific protocols and procedures, failure to comply with

21

applicable regulations, or the need to implement costly or time-consuming protocols to comply with applicable regulations (including regulations related to conflict minerals), equipment malfunction, natural disasters and environmental factors, any of which could delay or impede their ability to meet our demand.

We are exposed to fluctuations in foreign currency exchange rates, which could adversely affect our future operating results.

Our results of operations are subject to fluctuations in exchange rates, which could adversely affect our future revenue and overall operating results. In order to minimize volatility in earnings associated with fluctuations in the value of foreign currency relative to the U.S. dollar, we use financial instruments to hedge our exposure to foreign currencies as we deem appropriate for a portion of our expenses, which are denominated in the local currency of our foreign subsidiaries. We generally initiate our hedging of currency exchange risks one year in advance of anticipated foreign currency expenses for those currencies to which we have the greatest exposure. When the dollar is weak, foreign currency denominated expenses will be higher, and these higher expenses will be partially offset by the gains realized from our hedging contracts. If the dollar is strong, foreign currency denominated expenses will be lower. These lower expenses will in turn be partially offset by the losses incurred from our hedging contracts. There is a risk that there will be fluctuations in foreign currency exchange rates beyond the one year timeframe for which we hedge our risk and there is no guarantee that we will accurately forecast the expenses we are hedging. Changes in the value of foreign currencies relative to the value of the U.S. dollar could adversely affect future revenue and operating results. In addition, as a result of entering into these contracts with counterparties who are unrelated to us, the risk of a counterparty default exists in fulfilling the hedge contract. Should there be a counterparty default, we could be unable to recover anticipated net gains from the transactions.

If we fail to effectively manage our growth and if our new initiatives do not generate strong margins, our future operating results could be adversely affected.

Historically, we have experienced continued growth in the scope of our operations, the number of our employees and our geographic footprint. In addition to internal business initiatives, we have acquired both domestic and international companies. This growth and the assimilation of acquired operations and their employees could continue to place a significant strain on our managerial, operational and financial resources as our future acquisition activities accelerate our business expansion. We need to continue to implement and improve additional management and financial systems and controls. We may not be able to manage the current scope of our operations or future growth effectively and still exploit market opportunities for our products and services in a timely and cost-effective way and we may not meet our scalability expectations. Our future operating results could be adversely affected if we are unable to manage our expanding product lines, our marketing and sales organizations and our client support organization to the extent required for any increase in installations of our products.

Further, our operating margins in our new initiatives may be lower than those we have achieved in our more mature products and services markets, and our new initiatives may not generate sufficient revenue to recoup our investments in them. We may experience a decline in gross margin as the mix of our revenue may include more products with a hardware component and increased sales of our services, both of which have a higher cost than our software products. If we are not able to recoup our investment by normalizing our margins or reducing our costs through integration of new initiatives it could adversely affect our business, results of operations and financial condition.

If we do not generate sufficient cash flow from operations in the future, we may not be able to fund our product development efforts and acquisitions or fulfill our future obligations.

Our ability to generate sufficient cash flow from operations to fund our operations and product development efforts, including the payment of cash consideration in acquisitions and the payment of our other obligations, depends on a range of economic, competitive and business factors, many of which are outside of our control. We cannot assure you that our business will generate sufficient cash flow from operations, or that we will be able to liquidate our investments, repatriate cash and investments held in our overseas subsidiaries, sell assets or raise necessary funds through equity or debt financings when needed or desirable. An inability to fund our operations or fulfill outstanding obligations could have a material adverse effect on our business, financial condition and results of operations. For further information, please refer to "Management's Discussion and Analysis of Financial Condition and Results of Operations-Liquidity and Capital Resources."

RISKS RELATED TO ACQUISITIONS AND STRATEGIC RELATIONSHIPS

Acquisitions present many risks, and we may not realize the financial and strategic goals we anticipate at the time of an acquisition.

Our growth is dependent upon market growth, our ability to enhance existing products and services, and our ability to introduce new products and services on a timely basis. In recent years, we have addressed and intend to continue to address the need to develop new products and services and enhance existing products and services through acquisitions of other companies, product lines and/or technologies. However, acquisitions, including those of high-technology companies, are inherently risky. We cannot provide any assurance that any of our acquisitions or future acquisitions will be successful in helping us reach our financial and strategic goals. The risks we commonly encounter in undertaking, managing and integrating acquisitions are:

- an uncertain revenue and earnings stream from the acquired company, which could dilute our earnings;
- difficulties and delays integrating the personnel, operations, technologies, products and systems of the acquired companies;
- undetected errors or unauthorized use of a third-party's code in products of the acquired companies;
- our ongoing business may be disrupted and our management's attention may be diverted by acquisition, transition or integration activities;
- challenges with implementing adequate and appropriate controls, procedures and policies in the acquired business;
- difficulties managing or integrating an acquired company's technologies or lines of business;
- potential difficulties in completing projects associated with purchased in-process research and development;
- entry into markets in which we have no or limited direct prior experience and where competitors have stronger market positions and which are highly competitive;
- the potential loss of key employees of the acquired company;
- potential difficulties integrating the acquired products and services into our sales channel;
- assuming pre-existing contractual relationships of an acquired company that we would not have otherwise entered into, the termination or modification of which may be costly or disruptive to our business;
- being subject to unfavorable revenue recognition or other accounting treatment as a result of an acquired company's practices; and
- intellectual property claims or disputes.

Our failure to manage growth effectively and successfully integrate acquired companies due to these or other factors could have a material adverse effect on our business, results of operations and financial condition. Further, our 2015 operating plan assumes a significant level of financial performance from our acquisitions that were completed during 2013 and 2014 and if these acquired companies or technologies do not perform as we expect, our operating results could be materially and adversely affected.

In addition, we may not have the opportunity to make suitable acquisitions on favorable terms in the future, which could negatively impact the growth of our business. We expect that other companies in our industry will compete with us to acquire compatible businesses. This competition could increase prices for businesses and technologies that we would likely pursue, and our competitors may have greater resources than we do to complete these acquisitions. If we determine that any of our goodwill or intangible assets, including technology purchased in acquisitions, are impaired, we would be required to take a charge to earnings, which could have a material adverse effect on our results of operations.

We have a significant amount of goodwill and other intangible assets, such as product related intangible assets, from our acquisitions. We do not amortize goodwill and intangible assets that are deemed to have indefinite lives. However, we do amortize certain product related technologies, trademarks, patents and other intangibles and we periodically evaluate them for impairment. We review goodwill for impairment annually, or sooner if events or changes in circumstances indicate that the carrying amount could exceed fair value, at the reporting unit level, which for us also represents our operating segments. Significant judgments are required to estimate the fair value of our goodwill and intangible assets, including estimating future cash flows, determining appropriate discount rates, estimating the applicable tax rates, foreign exchange rates and interest rates, projecting the future industry trends and market conditions, and making other assumptions. Although we believe the assumptions, judgments and estimates we have

made have been reasonable and appropriate, different assumptions, judgments and estimates, materially affect our results of operations. Changes in these estimates and assumptions, including changes in our reporting structure, could materially affect our determinations of fair value. In addition, due to uncertain market conditions and potential changes in our strategy and product portfolio, it is possible that the forecasts we use to support our goodwill and other intangible assets could change in the future, which could result in non-cash charges that would adversely affect our results of operations and financial condition. For example, in 2014, we made changes to our business strategy and product portfolio that

partially contributed to non-cash impairment charges of \$59.3 million. Also, we may make divestitures of businesses in the future. If we determine that any of the goodwill or other intangible assets associated with our acquisitions is impaired, then we would be required to reduce the value of those assets or to write them off completely by taking a charge to current earnings. If we are required to write down or write off all or a portion of those assets, or if financial analysts or investors believe we may need to take such action in the future, our stock price and operating results could be materially and adversely affected.

Our inability to maintain or develop our strategic and technology relationships could adversely affect our business. We have several strategic and technology relationships with large and complex organizations, such as Microsoft and Cisco, and other companies with which we work to offer complementary products and services. We depend on the companies with which we have strategic relationships to successfully test our products, to incorporate our technology into their products and to market and sell those products. There can be no assurance we will realize the expected benefits from these strategic relationships or that they will continue in the future. If successful, these relationships may be mutually beneficial and result in industry growth. However, such relationships carry an element of risk because, in most cases, we must compete in some business areas with a company with which we have a strategic relationship and, at the same time, cooperate with that company in other business areas. Also, if these companies fail to perform or if these relationships fail to materialize as expected, we could suffer delays in product development, reduced sales or other operational difficulties and our business, results of operations and financial condition could be materially adversely affected.

RISKS RELATED TO INTELLECTUAL PROPERTY AND BRAND RECOGNITION

Our efforts to protect our intellectual property may not be successful, which could materially and adversely affect our business.

We rely primarily on a combination of copyright, trademark, patent and trade secret laws, confidentiality procedures and contractual provisions to protect our source code, innovations and other intellectual property, all of which offer only limited protection. The loss of any material trade secret, trademark, tradename, patent or copyright could have a material adverse effect on our business. Despite our precautions, it could be possible for unauthorized third parties to infringe our intellectual property rights or misappropriate, copy, disclose or reverse engineer our proprietary information, including certain portions of our products or to otherwise obtain and use our proprietary source code. In addition, our ability to monitor and control such misappropriation or infringement is uncertain, particularly in countries outside of the United States. If we cannot protect our intellectual property from infringement and our proprietary source code against unauthorized copying, disclosure or use, loss of our market share could result, including as a result of unauthorized third parties' development of products and technologies similar to or better than ours.

The scope of our patent protection may be affected by changes in legal precedent and patent office interpretation of these precedents. Further, any patents owned by us could be invalidated, circumvented or challenged. Any of our pending or future patent applications, whether or not being currently challenged, may not be issued with the scope of protection we seek, if at all; and if issued, may not provide any meaningful protection or competitive advantage. Our ability to protect our proprietary rights could be affected by differences in international law and the enforceability of licenses. The laws of some foreign countries do not protect our intellectual property to the same extent as do the laws of the United States and Canada. For example, we derive a significant portion of our sales from licensing our products under "click-to-accept" license agreements that are not signed by licensees and through electronic enterprise customer licensing arrangements that are delivered electronically, all of which could be unenforceable under the laws of many foreign jurisdictions in which we license our products. Moreover, with respect to the various confidentiality, license or other agreements we utilize with third parties related to their use of our products and technologies, there is no guarantee that such parties will abide by the terms of such agreements.

Our products and services, including products obtained through acquisitions, could infringe third-party intellectual property rights, which could result in material litigation costs.

We are increasingly subject to patent infringement claims and may in the future be subject to an increased number of claims, including claims alleging the unauthorized use of a third-party's code in our products. This may occur for a variety of reasons, including:

-

the expansion of our product lines, such as our Workspace Services and Delivery Networking products, and related technical services and expansion of our Mobility Apps products, through product development and acquisitions;
an increase in patent infringement litigation commenced by non-practicing entities;

an increase in the number of competitors in our industry segments and the resulting increase in the number of related products and services and the overlap in the functionality of those products and services;

an increase in the number of our competitors and third parties that use their own intellectual property rights to limit our freedom to operate and exploit our products, or to otherwise block us from taking full advantage of our markets; our products and services may rely on the technology of others and, therefore, require us to obtain intellectual property licenses from third parties in order for us to commercialize our products or services and we may not be able to obtain or continue to obtain licenses from these third parties on reasonable terms; and

the unauthorized or improperly licensed use of third-party code in our product development process.

Further, responding to any infringement claim, regardless of its validity or merit, could result in costly litigation.

Further, intellectual property litigation could compel us to do one or more of the following:

pay damages (including the potential for treble damages), license fees or royalties (including royalties for past periods) to the party claiming infringement;

stop licensing products or providing services that use the challenged intellectual property;

obtain a license from the owner of the asserted intellectual property to sell or use the relevant technology, which license may not be available on reasonable terms, or at all; or

redesign the challenged technology, which could be time consuming and costly, or not be accomplished.

If we were compelled to take any of these actions, our business, results of operations or financial condition may be impacted.

Our use of “open source” software could negatively impact our ability to sell our products and subject us to possible litigation.

The products or technologies acquired, licensed or developed by us may incorporate so-called “open source” software, and we may incorporate open source software into other products in the future. Such open source software is generally licensed by its authors or other third parties under open source licenses, including, for example, the GNU General Public License, the GNU Lesser General Public License, “Apache-style” licenses, “Berkeley Software Distribution,” “BSD-style” licenses, and other open source licenses. Even though we attempt to monitor our use of open source software in an effort to avoid subjecting our products to conditions we do not intend, it is possible that not all instances of our open source code usage are properly reviewed. Further, although we believe that we have complied with our obligations under the various applicable licenses for open source software that we use such that we have not triggered any of these conditions, there is little or no legal precedent governing the interpretation or enforcement of many of the terms of these types of licenses. If an author or other third party that distributes open source software were to allege that we had not complied with the conditions of one or more of these licenses, we could be required to incur significant legal expenses defending against such allegations. If our defenses were not successful, we could be subject to significant damages, enjoined from the distribution of our products that contained open source software, and required to comply with the terms of the applicable license, which could disrupt the distribution and sale of some of our products. In addition, if we combine our proprietary software with open source software in an unintended manner, under some open source licenses we could be required to publicly release the source code of our proprietary software, offer our products that use the open source software for no cost, make available source code for modifications or derivative works we create based upon incorporating or using the open source software, and/or license such modifications or derivative works under the terms of the particular open source license.

In addition to risks related to license requirements, usage of open source software can lead to greater risks than use of third-party commercial software, as open source licensors generally do not provide technology support, maintenance, warranties or assurance of title or controls on the origin of the software.

Our business depends on maintaining and protecting the strength of our collection of brands.

The Citrix product and service brands that we have developed has significantly contributed to the success of our business. Maintaining and enhancing the Citrix product and service brands is critical to expanding our base of customers and partners. We may be subject to reputational risks and our brand loyalty may decline if others adopt the same or confusingly similar marks in an effort to misappropriate and profit on our brand name and do not provide the same level of quality as is delivered by our products and services. Additionally, we may be unable to use some of our brands in certain countries or unable to secure trademark rights in certain jurisdictions where we do business. In order to police, maintain, enhance and protect our brands, we may be required to make substantial investments that may not

be successful. If we fail to police, maintain, enhance and protect the Citrix brands, if we incur excessive expenses in this effort or if customers or potential customers are confused by others' trademarks, our business, operating results, and financial condition may be materially and adversely affected.

If we lose access to third-party licenses, releases of our products could be delayed.

We believe that we will continue to rely, in part, on third-party licenses to enhance and differentiate our products.

Third-party licensing arrangements are subject to a number of risks and uncertainties, including:

- undetected errors or unauthorized use of another person's code in the third party's software;
- disagreement over the scope of the license and other key terms, such as royalties payable and indemnification protection;
- infringement actions brought by third-parties;
- that third parties will create solutions that directly compete with our products;
- and
- termination or expiration of the license.

If we lose or are unable to maintain any of these third-party licenses or are required to modify software obtained under third-party licenses, it could delay the release of our products. Any delays could have a material adverse effect on our business, results of operations and financial condition.

RISKS RELATED TO OUR COMMON STOCK, OUR DEBT AND EXTERNAL FACTORS

Natural disasters or other unanticipated catastrophes that result in a disruption of our operations could negatively impact our results of operations.

Our worldwide operations are dependent on our network infrastructure, internal technology systems and website. Significant portions of our computer equipment, intellectual property resources and personnel, including critical resources dedicated to research and development and administrative support functions are presently located at our corporate headquarters in Fort Lauderdale, Florida, an area of the country that is particularly prone to hurricanes, and at our various locations in California, an area of the country that is particularly prone to earthquakes. We also have operations in various domestic and international locations that expose us to additional diverse risks. The occurrence of natural disasters, such as hurricanes, floods or earthquakes, or other unanticipated catastrophes, such as telecommunications failures, cyber-attacks, fires or terrorist attacks, at any of the locations in which we or our key partners, suppliers and customers do business, could cause interruptions in our operations. For example, hurricanes have passed through southern Florida causing extensive damage to the region. In addition, even in the absence of direct damage to our operations, large disasters, terrorist attacks or other casualty events could have a significant impact on our partners', suppliers' and customers' businesses, which in turn could result in a negative impact on our results of operations. Extensive or multiple disruptions in our operations, or our partners', suppliers' or customers' businesses, due to natural disasters or other unanticipated catastrophes could have a material adverse effect on our results of operations.

Servicing our debt will require a significant amount of cash, which could adversely affect our business, financial condition and results of operations.

We have aggregate indebtedness of approximately \$1.4 billion that we have incurred in connection with the issuance of our Convertible Notes and under our Credit Agreement, and we may incur additional indebtedness in the future. Our ability to make scheduled payments of the principal of, to pay interest on or to refinance our future indebtedness, depends on our future performance, which is subject to economic, financial, competitive and other factors beyond our control. Our business may not generate cash flow from operations in the future sufficient to service our debt and make necessary capital expenditures. If we are unable to generate such cash flow, we may be required to adopt one or more alternatives, such as selling assets, restructuring debt or obtaining additional equity capital on terms that may be onerous or highly dilutive. Our ability to refinance our indebtedness will depend on the capital markets and our financial condition at such time. We may not be able to engage in any of these activities or engage in these activities on desirable terms, which could result in a default on our debt obligations. See "Management's Discussion and Analysis of Financial Condition and Results of Operations-Critical Accounting Policies and Estimates" and Notes 12 and 13 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 for information regarding our Convertible Notes and our Credit Facility.

In addition, holders of the Convertible Notes will have the right to require us to repurchase their Convertible Notes upon the occurrence of a fundamental change at a fundamental change repurchase price equal to 100% of the principal amount of the Convertible Notes to be repurchased, plus accrued and unpaid interest, if any. Further, upon conversion

of the Convertible Notes, we will be required to make cash payments for each \$1,000 in principal amount of Convertible Notes converted of at least the lesser of \$1,000 and the sum of the daily conversion values thereunder. However, we may not have enough available cash or be able to obtain financing at the time we are required to make repurchases of Convertible Notes surrendered therefor or Convertible Notes being converted. In addition, our ability to repurchase the Convertible Notes or to pay cash upon conversions of the Convertible Notes may be limited by law, by regulatory authority or by agreements governing our future indebtedness. Our failure to repurchase Convertible Notes at a time when the repurchase is required by the indenture or to pay any cash payable on future conversions of the Convertible Notes as required by the indenture would constitute a default under

the indenture. A default under the indenture or the fundamental change itself could also lead to a default under our Credit Agreements or agreements governing our future indebtedness. If the repayment of the related indebtedness were to be accelerated after any applicable notice or grace periods, we may not have sufficient funds to repay the indebtedness and repurchase the Convertible Notes or make cash payments upon conversions of the Convertible Notes.

Further, the Credit Agreement requires the Company to maintain certain leverage and interest ratios and contains various affirmative and negative covenants, including covenants that limit or restrict our ability to grant liens, merge or consolidate, dispose of all or substantially all of our assets, change our business or incur subsidiary indebtedness. If we fail to comply with these covenants or any other provision of the Credit Agreement, we may be in default under the Credit Agreement, and we cannot assure you that we will be able to obtain the necessary waivers or amendments of such default. Upon an event of default under our Credit Agreement, if not otherwise amended or waived, the affected lenders could accelerate the repayment of any outstanding principal and accrued interest on their outstanding loans and terminate their commitments to lend additional funds, which may have a material adverse effect on our liquidity and financial position and, further, we may not have sufficient funds to repay such indebtedness.

In addition, our indebtedness, combined with our other financial obligations and contractual commitments, could have other important consequences. For example, it could:

- make us more vulnerable to adverse changes in general U.S. and worldwide economic, industry and competitive conditions and adverse changes in government regulation;
- limit our flexibility in planning for, or reacting to, changes in our business and our industry;
- place us at a disadvantage compared to our competitors who have less debt; and
- limit our ability to borrow additional amounts to fund acquisitions, for working capital and for other general corporate purposes.

Any of these factors could materially and adversely affect our business, financial condition and results of operations. In addition, if we incur additional indebtedness, the risks related to our business and our ability to service or repay our indebtedness would increase.

The accounting method for convertible debt securities that may be settled in cash, such as the Convertible Notes, could have a material effect on our reported financial results.

In May 2008, the FASB issued FASB Staff Position No. APB 14-1, Accounting for Convertible Debt Instruments That May Be Settled in Cash Upon Conversion (Including Partial Cash Settlement), which has subsequently been codified as Accounting Standards Codification 470-20, Debt with Conversion and Other Options, or ASC 470-20. Under ASC 470-20, an entity must separately account for the liability and equity components of the convertible debt instruments (such as the Convertible Notes) that may be settled entirely or partially in cash upon conversion in a manner that reflects the issuer's economic interest cost. The effect of ASC 470-20 on the accounting for the Convertible Notes is that the equity component is required to be included in the additional paid-in capital section of stockholders' equity on our consolidated balance sheet, and the value of the equity component would be treated as original issue discount for purposes of accounting for the debt component of the Convertible Notes. As a result, we will be required to record a greater amount of non-cash interest expense in current periods presented as a result of the amortization of the discounted carrying value of the Convertible Notes to their face amount over the term of the Convertible Notes. We will report lower net income in our financial results as reported in accordance with U.S. GAAP because ASC 470-20 will require interest to include both the current period's amortization of the debt discount and the instrument's coupon interest, which could adversely affect our reported or future financial results.

In addition, under certain circumstances, convertible debt instruments (such as the Convertible Notes) that may be settled entirely or partly in cash are currently accounted for utilizing the treasury stock method, the effect of which is that the shares issuable upon conversion of the Convertible Notes are not included in the calculation of diluted earnings per share except to the extent that the conversion value of the Convertible Notes exceeds their principal amount. Under the treasury stock method, for diluted earnings per share purposes, the transaction is accounted for as if the number of shares of common stock that would be necessary to settle such excess, if we elected to settle such excess in shares, are issued. We cannot be sure that the accounting standards in the future will continue to permit the use of the treasury stock method. If we are unable to use the treasury stock method in accounting for the shares issuable upon conversion of the Convertible Notes, then our diluted earnings per share would be adversely affected.

A significant portion of our cash and cash equivalents are held overseas. If we are not able to generate sufficient cash domestically in order to fund our U.S. operations, stock repurchases and strategic opportunities, and to service our debt, we may incur a significant tax liability in order to repatriate the overseas cash balances, or we may need to raise additional capital in the future.

As of December 31, 2014, \$1.38 billion of cash, cash equivalents and short-term investments were held in foreign countries. These amounts are not freely available for dividend repatriation to the U.S. without triggering significant adverse tax consequences in the U.S. As a result, if the cash generated by our domestic operations is not sufficient to fund our domestic operations, our broader corporate initiatives such as stock repurchases, acquisitions, and other strategic opportunities, and to service our outstanding indebtedness, we may need to raise additional funds through public or private debt or equity financings, or we may need to obtain new credit facilities to the extent we choose not to repatriate our overseas cash. Such additional financing may not be available on terms favorable to us, or at all, and any new equity financings or offerings would dilute our current stockholders' ownership. Furthermore, lenders may not agree to extend us new, additional or continuing credit. If adequate funds are not available, or are not available on acceptable terms, we may be forced to repatriate our foreign sources of liquidity and incur a significant tax expense or we may not be able to take advantage of strategic opportunities, develop new products, respond to competitive pressures, repurchase outstanding stock or repay our outstanding indebtedness. In any such case, our business, operating results or financial condition could be adversely impacted.

Our portfolios of liquid securities and strategic investments may lose value or become impaired.

Our investment portfolio consists of agency securities, corporate securities, money market funds, municipal (including auction rate) securities, government securities and commercial paper. Although we follow an established investment policy and seek to minimize the credit risk associated with investments by investing primarily in investment grade, highly liquid securities and by limiting exposure to any one issuer depending on credit quality, we cannot give assurances that the assets in our investment portfolio will not lose value, become impaired, or suffer from illiquidity.

In addition, we invest in private companies to further our strategic objectives and support our key business initiatives. Such investments include equity or debt instruments, and many of these instruments are non-marketable at the time of our initial investment. The companies in which we invest may fail or lose value because they may not be able to secure additional funding, obtain favorable investment terms for future financings, or participate in liquidity events such as public offerings, mergers, and private sales. If any of these private companies fail or lose value, we could be required to impair or write-off all or part of our investment in that company.

Changes in our tax rates or our exposure to additional income tax liabilities could affect our operating results and financial condition.

Our future effective tax rates could be favorably or unfavorably affected by changes in the valuation of our deferred tax assets and liabilities, the geographic mix of our revenue, or by changes in tax laws or their interpretation. Significant judgment is required in determining our worldwide provision for income taxes. In addition, we are subject to the continuous examination of our income tax returns by tax authorities, including the Internal Revenue Service, or the IRS. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. There can be no assurance, however, that the outcomes from these continuous examinations will not have an adverse effect on our operating results and financial condition. Additionally, due to the evolving nature of tax rules combined with the large number of jurisdictions in which we operate, it is possible that our estimates of our tax liability and the realizability of our deferred tax assets could change in the future, which may result in additional tax liabilities and adversely affect our results of operations, financial condition and cash flows.

Our results of operations, financial condition and cash flows could be further affected by lapses in or expiration of the availability of tax credits, including the federal research and development tax credit. This tax credit expired on December 31, 2014, and may not be renewed or extended, or if renewed or extended, may be renewed or extended on terms significantly less favorable to us or on terms resulting in our disqualification from the benefits of the tax credit.

Our stock price could be volatile, particularly during times of economic uncertainty and volatility in domestic and international stock markets, and you could lose the value of your investment.

Our stock price has been volatile and has fluctuated significantly in the past. The trading price of our stock is likely to continue to be volatile and subject to fluctuations in the future. Your investment in our stock could lose some or all of its value. Some of the factors that could significantly affect the market price of our stock include:

- actual or anticipated variations in operating and financial results; analyst reports or recommendations;
- rumors, announcements, or press articles regarding our or our competitors' operations, management, organization, financial condition, or financial statements; and
- other events or factors, many of which are beyond our control.

The stock market in general, The NASDAQ Global Select Market, and the market for software companies and technology companies in particular, have experienced extreme price and volume fluctuations. These fluctuations have often been unrelated or disproportionate to operating performance. These fluctuations may continue in the future and this could materially and adversely affect the market price of our stock, regardless of operating performance.

Changes or modifications in financial accounting standards may have a material adverse impact on our reported results of operations or financial condition.

A change or modification in accounting policies can have a significant effect on our reported results and may even affect our reporting of transactions completed before the change is effective, including the potential impact of the adoption and implementation of the May 2014 Financial Accounting Standards Board's (FASB) Accounting Standards Update (ASU) No. 2014-09 regarding revenue recognition. New pronouncements and varying interpretations of existing pronouncements have occurred with frequency and may occur in the future. Changes to existing rules, or changes to the interpretations of existing rules, could lead to changes in our accounting practices, and such changes could materially adversely affect our reported financial results or the way we conduct our business.

ITEM 1B. UNRESOLVED STAFF COMMENTS

We have received no written comments regarding our periodic or current reports from the staff of the Securities and Exchange Commission that were issued 180 days or more preceding the end of our 2014 fiscal year that remain unresolved.

ITEM 2. PROPERTIES

We lease and sublease office space in the Americas, which is comprised of the United States, Canada and Latin America, EMEA, which is comprised of Europe, the Middle East and Africa, and Asia-Pacific. The following table presents the location and square footage of our leased office space by reporting segment as of December 31, 2014:

	Enterprise and Service Provider division (square footage)	Mobility Apps division
Americas	833,934	380,372
EMEA	302,255	107,186
Asia-Pacific	610,222	1,476
Total	1,746,411	489,034

In addition, we own land and buildings in Fort Lauderdale, Florida with approximately 309,000 square feet of office space used for our corporate headquarters, approximately 40,000 square feet of office space in Goleta, California related to our Mobility Apps division, and 42,000 square feet of office space in EMEA related to our Enterprise and Service Provider division.

We believe that our existing facilities are adequate for our current needs. As additional space is needed in the future, we believe that suitable space will be available in the required locations on commercially reasonable terms.

ITEM 3. LEGAL PROCEEDINGS

In April 2014, John Calma, ostensibly on behalf of Citrix, filed a shareholder derivative complaint against certain of our directors (and Citrix as a nominal defendant) in the Court of Chancery of the State of Delaware. The complaint alleges breach of fiduciary duty, waste of corporate assets and unjust enrichment related to stock awards that they received under our director

compensation program. The complaint seeks the recovery of monetary damages and other relief for damages allegedly caused to Citrix. We believe that our directors and Citrix have meritorious defenses to these allegations and that it is not reasonably possible that the ultimate outcome of this suit will materially and adversely affect our business, financial condition, results of operations or cash flows.

In April 2008, SSL Services, LLC, or SSL Services, filed a suit for patent infringement against us in the United States District Court for the Eastern District of Texas, or the SSL Matter. SSL Services alleged that we infringed U.S. Patent Nos. 6,061,796, or the '796 patent, and 6,158,011, or the '011 patent. We denied infringement and asserted that the patents-in-suit were invalid. A jury trial was held on SSL Services' claims, and in June 2012, the jury found that we did not infringe the '796 patent and found that we willfully infringe the '011 patent through the sale and use of certain products. The jury awarded SSL Services \$10.0 million. In September 2012, the court issued a final judgment confirming the jury award of \$10.0 million in damages and added \$5.0 million in enhanced damages and approximately \$5.0 million in prejudgment interest on the damages award. In October 2014, the Federal Circuit Court of Appeals affirmed the district court's judgment in all material respects. Accordingly, for the year ended December 31, 2014, we recorded an accrual for estimated damages and related interest of approximately \$20.7 million, which is included in Accrued expenses and other current liabilities in the accompanying consolidated balance sheets and General and administrative expense in the accompanying consolidated statements of income.

In addition to the SSL Matter and due to the nature of our business, we are subject to patent infringement claims, including current suits against us or one or more of our wholly-owned subsidiaries alleging infringement by various Citrix products and services, or the Other Matters. We believe that we have meritorious defenses to the allegations made in our pending cases and intend to vigorously defend these lawsuits; however, we are unable currently to determine the ultimate outcome of these or similar matters or the potential exposure to loss, if any. In addition, we are a defendant in various litigation matters generally arising out of the normal course of business. Although it is difficult to predict the ultimate outcomes of these cases, we believe that it is not reasonably possible that the ultimate outcomes will materially and adversely affect our business, financial position, results of operations or cash flows.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Price Range of Common Stock and Dividend Policy

Our common stock is currently traded on The NASDAQ Global Select Market under the symbol CTXS. The following table sets forth the high and low sales prices for our common stock as reported on The NASDAQ Global Select Market for the periods indicated, as adjusted to the nearest cent.

	High	Low
Year Ended December 31, 2014:		
Fourth quarter	\$71.19	\$59.39
Third quarter	\$72.89	\$61.83
Second quarter	\$65.72	\$53.86
First quarter	\$63.20	\$51.18
Year Ended December 31, 2013:		
Fourth quarter	\$71.74	\$54.52
Third quarter	\$77.16	\$60.50
Second quarter	\$72.65	\$58.00
First quarter	\$75.50	\$65.52

On February 13, 2015, the last reported sale price of our common stock on The NASDAQ Global Select Market was \$64.51 per share. As of February 13, 2015, there were 636 holders of record of our common stock.

We currently intend to retain any earnings for use in our business, for investment in acquisitions and to repurchase shares of our common stock. We have not paid any cash dividends on our capital stock in the last two years and do not currently anticipate paying any cash dividends on our capital stock in the foreseeable future.

Issuer Purchases of Equity Securities

Our Board of Directors has authorized an ongoing stock repurchase program with a total repurchase authority granted to us of \$5.4 billion, of which \$1.5 billion was approved in April 2014. We may use the approved dollar authority to repurchase stock at any time until the approved amount is exhausted. The objective of the stock repurchase program is to improve stockholders' returns. At December 31, 2014, approximately \$288.4 million was available to repurchase common stock pursuant to the stock repurchase program. All shares repurchased are recorded as treasury stock. The following table shows the monthly activity related to our stock repurchase program for the quarter ended December 31, 2014.

	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate dollar value of Shares that may yet be Purchased under the Plans or Programs (in thousands) ⁽²⁾
October 1, 2014 through October 31, 2014	2,785,437	\$65.81	2,762,333	\$319,913
November 1, 2014 through November 30, 2014	387,994	\$65.62	382,900	\$294,789
December 1, 2014 through December 31, 2014	158,574	\$65.65	97,100	\$288,399
Total	3,332,005	\$65.78	3,242,333	\$288,399

Represents approximately 2.6 million shares received in settlement of our accelerated share repurchase, or ASR, 0.6 million shares acquired in open market purchases under the stock repurchase program and 89,672 shares withheld from stock units that vested in the fourth quarter of 2014 to satisfy minimum tax withholding obligations that arose on the vesting of stock units. We expended approximately \$39.9 million during the quarter ended December 31, 2014 for repurchases of our common stock. For more information see Note 8 to our consolidated financial statements.

(2) Shares withheld from stock units that vested to satisfy minimum tax withholding obligations that arose on the vesting of stock units do not deplete the dollar amount available for purchases under the repurchase program. In April 2014, in connection with the \$1.5 billion increase in repurchase authority granted to us under our ongoing stock repurchase program, we used approximately \$101.0 million to purchase 1.7 million shares of our common stock from certain purchasers of the Convertible Notes in privately negotiated transactions concurrently with the closing of the Convertible Notes

31

offering discussed above, and an additional \$1.4 billion to purchase additional shares of our common stock through our ASR Agreement with Citibank. Under the ASR Agreement, we paid approximately \$1.4 billion to Citibank upon consummation of the ASR and received, in the aggregate, approximately 21.8 million shares of our common stock, including approximately 2.6 million shares delivered in October 2014 in final settlement in connection with Citibank's election to accelerate the ASR. The total number of shares that we repurchased under the ASR Agreement was based on the average of the daily volume-weighted average prices of our common stock during the term of the ASR Agreement, less a discount. See Note 8 to our consolidated financial statements for detailed information on our Convertible Notes offering and the transactions related thereto, including the ASR.

ITEM 6. SELECTED FINANCIAL DATA

The following selected consolidated financial data is derived from our consolidated financial statements. This data should be read in conjunction with the consolidated financial statements and notes thereto, and with Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations.

	Year Ended December 31,

^(a) Cost of net revenues includes amortization of product related intangible assets of \$146.4 million, \$97.9 million, \$80.0 million, \$54.7 million, and \$50.5 million in 2014, 2013, 2012, 2011 and 2010, respectively.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We are leading the transition to software-defining the workplace, uniting virtualization, mobility management, networking and SaaS solutions to enable new ways for businesses and people to work better. Citrix solutions power business mobility through secure, mobile workspaces that provide people with instant access to apps, desktops, data and communications on any device, over any network or cloud.

We market and license our products directly to customers, over the Web, and through systems integrators, or SIs, in addition to indirectly through value-added resellers, or VARs, value-added distributors, or VADs, original equipment manufacturers, or OEMs and service providers.

We are a Delaware corporation founded on April 17, 1989.

Executive Summary

We have positioned, scaled and transformed through significant growth phases - from remote access, to web app delivery, to virtualization, to mobile workspaces - and, now, we are focused on enabling a software-defined workplace where people can securely and effortlessly collaborate across any device over any network and cloud, resulting in increased business productivity for our customers. Our technologies mobilize desktops, apps, data, and people to help our customers drive value. We continue driving innovation in the datacenter with our unique technologies across both physical and software defined networking platforms while powering some of the world's largest clouds and giving enterprises the capabilities to combine best-in-class application networking services on a single, consolidated footprint.

In 2014, we continued to see an uneven spending environment in markets around the world and encountered hesitancy on the part of customers in initiating large capital projects. In addition, we introduced new product offerings within our Desktop and Application Virtualization business. These offerings are focused on simplifying the installation and management process while delivering new capabilities to enhance the user experience for audio, video and graphics. Although we expect a multi-year product cycle from these offerings, we have experienced longer than normal customer evaluations of these solutions, causing longer than anticipated sales-cycles. In the Delivery Networking business, investments that we have been making in increasing go-to-market coverage has led to growth in our Netscaler products, which partially offsets the results in our Desktop and Application Virtualization business which have been impacted by increased competition and alternative products on new platforms. In the second half of 2014, we outlined our vision for the software-defined workplace recognizing that our customers are looking for a better way to mobilize their businesses while creating a more secure, flexible and easy-to-use infrastructure.

In 2015, we will be investing in areas that will power long-term growth; mobility, cloud services and networking. We will continue to refine our delivery of the software-defined workspace solution that will deliver the quick, tangible return on investment, or ROI for our customers.

We believe that continued economic uncertainty and the transition of computing and legacy platforms to mobile, cloud, SaaS and social solutions may adversely affect sales of our products and services and may result in longer sales cycles, slower adoption of technologies and increased price competition.

In January 2015, we announced the implementation of a restructuring program designed to increase strategic focus and operational efficiency, the 2015 Restructuring Program. The restructuring will affect approximately 700 full-time and 200 contractor positions. It is anticipated that the aggregate total pre-tax restructuring charges will be in the range of \$49.0 million to \$55.0 million. Included in these pre-tax charges are approximately \$40.0 million to \$45.0 million related to employee severance arrangements and approximately \$9.0 million to \$10.0 million related to the consolidation of leased facilities during fiscal year 2015. The majority of the activities related to the 2015 Restructuring Program are anticipated to be completed by the end of 2015.

In April 2014, we completed a private placement of \$1.25 billion principal amount of 0.500% Convertible Senior Notes due 2019, or the Convertible Notes. In May 2014, we issued an additional \$187.5 million principal amount of Convertible Notes pursuant to the full exercise of the over-allotment option granted to the initial purchasers in the offering, or the Over-Allotment Option. The net proceeds from this offering were approximately \$1.42 billion (including the proceeds from the Over-Allotment Option), after deducting the initial purchasers' discounts and commissions and the offering expenses payable by us. In addition, in April 2014, in connection with the \$1.5 billion

increase in repurchase authority granted to us under our ongoing stock repurchase program, we used approximately \$101.0 million to purchase 1.7 million shares of our common stock from certain purchasers of the Convertible Notes in privately negotiated transactions concurrently with the closing of the Convertible Notes offering, and an additional \$1.4 billion to purchase additional shares of our common stock through our ASR Agreement with Citibank. Under the ASR Agreement, we paid approximately \$1.4 billion to Citibank upon consummation of the ASR and

received, in the aggregate, approximately 21.8 million shares of our common stock, including approximately 2.6 million shares delivered in October 2014 in final settlement in connection with Citibank's election to accelerate the ASR. The total number of shares that we repurchased under the ASR Agreement was based on the average of the daily volume-weighted average prices of our common stock during the term of the ASR Agreement, less a discount.

In October 2014, the Federal Circuit Court of Appeals affirmed the district court's judgment in the SSL Matter in all material respects. Accordingly, for the year ended December 31, 2014, we recorded an accrual for estimated damages and related interest of approximately \$20.7 million, which is included in Accrued expenses and other current liabilities in the accompanying consolidated balance sheets and General and administrative expense in the accompanying consolidated statements of income.

Also, in order to operate more efficiently, we announced the implementation of the 2014 Restructuring Program to better align resource allocation with our strategic imperatives. The 2014 Restructuring Program included reducing our headcount by approximately 320 full-time positions. During the year ended December 31, 2014, we incurred pre-tax charges of \$20.4 million related to employee severance and related costs.

In January 2015, we entered into a credit agreement (the "Credit Agreement") with Bank of America, N.A., as Administrative Agent, and the other lenders party thereto from time to time (collectively, the "Lenders"). The Credit Agreement provides for a \$250 million unsecured revolving credit facility for a term of five years, of which we have drawn \$95 million to date. We may elect to increase the revolving credit facility by up to \$250 million if existing or new lenders provide additional revolving commitments in accordance with the terms of the Credit Agreement. The proceeds of borrowings under the Credit Agreement may be used for working capital and general corporate purposes.

Summary of Results

For the year ended December 31, 2014 compared to the year ended December 31, 2013, we delivered the following financial performance:

- Product and license revenue increased 0.9% to \$899.7 million;
- Software as a service revenue increased 11.8% to \$651.6 million;
- License updates and maintenance revenue increased 8.5% to \$1,416.0 million;
- Professional services revenue increased 26.4% to \$175.5 million;
- Gross margin as a percentage of revenue decreased 2.5% to 80.3%;
- Operating income decreased 20.6% to \$302.3 million; and
- Diluted earnings per share decreased 18.3% to \$1.47.

The increase in our Product and licenses revenue was primarily driven by sales of our Delivery Networking products, led by NetScaler, partially offset by a decrease in sales of our desktop and application virtualization products. Our Software as a service revenues increased due to increased sales of our Communications Cloud products, led by GoToMeeting and our Documents Cloud product, ShareFile. The increase in License updates and maintenance revenue was primarily due to an increase in maintenance revenues, primarily driven by increased sales of maintenance and support across all of our Enterprise and Service Provider division's products and increased renewals of our Subscription Advantage product. The increase in Professional services revenue was primarily due to increased participation in our product training and certification programs. We currently target total revenue to increase when comparing the first quarter of 2015 to the first quarter of 2014. In addition, when comparing the 2015 fiscal year to the 2014 fiscal year we target total revenue to increase. The decrease in 2014 in gross margin as a percentage of net revenue is primarily due to the impairment of certain intangible assets and the increase in sales of our Delivery Networking products with a hardware component and increased sales of our services, both of which have a higher cost than our software products. We currently target gross margin as a percentage of net revenue to remain consistent when comparing the first quarter of 2015 to the first quarter of 2014. The decrease in operating income and diluted net income per share when comparing the 2014 to 2013 was primarily due to the charge related to previously disclosed patent litigation and restructuring costs incurred related to the 2014 Restructuring Program. Also contributing to the decrease in diluted net income per share was an increase in interest expense related to the convertible notes offering. Partially offsetting the decrease in diluted net income per share was the impact of share repurchases during the second quarter of 2014, which reduced our weighted-average shares outstanding.

2014 Acquisitions

Framehawk

On January 8, 2014, we acquired all of the issued and outstanding securities of Framehawk, Inc., or Framehawk. The Framehawk solution, which optimizes the delivery of virtual desktops and applications to mobile devices, was combined with HDX technology in the Citrix XenApp and XenDesktop products to deliver an improved user experience under adverse

network conditions. Framehawk became part of our Enterprise and Service Provider division. The total consideration for this transaction was approximately \$24.2 million, net of \$0.2 million of cash acquired, and was paid in cash. Transaction costs associated with the acquisition were approximately \$0.1 million, all of which we expensed during the year ended December 31, 2014 and are included in General and administrative expense in the accompanying consolidated statements of income.

RightSignature

In October 2014, we acquired all of the membership interests of RightSignature, LLC, or RightSignature. RightSignature became part of our Mobility Apps division and provides technology which allows users to e-sign documents within the Documents Cloud. The RightSignature technology will expand the Documents Cloud beyond storage and file transfer to supporting e-signature and approval workflows. The total consideration for this transaction was approximately \$37.8 million, net of \$1.1 million of cash acquired, and was paid in cash. Transaction costs associated with the acquisition were approximately \$0.2 million, all of which we expensed during the year ended December 31, 2014 and are included in General and administrative expense in the accompanying consolidated statements of income. In addition, in connection with the acquisition, we assumed non-vested stock units which were converted into the right to receive, in the aggregate, up to 67,500 of our common stock, for which the vesting period began on the closing of the transaction.

2014 Other Acquisitions

During the second quarter of 2014, we acquired all of the issued and outstanding securities of a privately-held company. This business became part of our Enterprise and Service Provider division. The total cash consideration for this transaction was approximately \$17.2 million, net of \$0.8 million of cash acquired. Transaction costs associated with the acquisition were approximately \$0.1 million, all of which we expensed during the year ended December 31, 2014 and are included in General and administrative expense in the accompanying consolidated statements of income.

In the fourth quarter of 2014, we acquired all of the issued and outstanding securities of two privately-held companies for total cash consideration of approximately \$19.9 million, net of \$0.2 million of cash acquired. The businesses became part of our Enterprise and Service Provider division. In addition, in connection with one of the acquisitions, we assumed non-vested stock units which were converted into the right to receive, in the aggregate, up to 23,430 shares of our common stock, for which the vesting period began on the closing of the transaction. Transaction costs associated with the acquisitions were not significant.

We have included the effects of all of the companies acquired in 2014 in our results of operations prospectively from the date of each acquisition.

2013 Acquisitions

Zenprise

In January 2013, we acquired all of the issued and outstanding securities of Zenprise, a privately-held leader in mobile device management. Zenprise became part of our Enterprise and Service Provider division, in which we have integrated the Zenprise offering for mobile device management into our XenMobile Enterprise edition. The total consideration for this transaction was approximately \$324.0 million, net of \$2.9 million of cash acquired, and was paid in cash. Transaction costs associated with the acquisition were approximately \$0.6 million, of which we expensed approximately \$0.1 million during the year ended December 31, 2013 and are included in General and administrative expense in the accompanying consolidated statements of income. In addition, in connection with the acquisition, we assumed certain stock options, which are exercisable for 285,817 shares of our common stock, for which the vesting period reset fully upon the closing of the transaction.

2013 Other Acquisitions

During the third quarter of 2013, we acquired all of the issued and outstanding securities of a privately-held company. The total cash consideration for this transaction was approximately \$5.3 million, net of \$2.8 million of cash acquired, and was paid in cash. We agreed to pay contingent consideration of up to \$3.0 million in cash upon the satisfaction of certain milestone achievements, as defined pursuant to the share purchase agreement. This business became part of our Mobility Apps division. Transaction costs associated with the acquisition were approximately \$0.2 million, all of which we expensed during the year ended December 31, 2013, and are included in General and administrative expense in the accompanying consolidated statements of income. In September 2014, we paid \$2.0 million of the

contingent consideration balance based on milestones achieved. We are expected to pay the remaining balance of up to \$1.0 million if the final milestone is achieved pursuant to the share purchase agreement.

During the fourth quarter of 2013, we acquired all of the issued and outstanding securities of a privately-held company. The total cash consideration for this transaction was approximately \$5.5 million. This business became part of our Enterprise and Service Provider division. Transaction costs associated with the acquisition were approximately \$0.3 million, of which we

expensed \$0.1 million during the year ended December 31, 2014, and are included in General and administrative expense in the accompanying consolidated statements of income.

2015 Acquisition

Subsequent Event

On January 8, 2015, we acquired all of the issued and outstanding securities of Sanbolic, Inc., or Sanbolic. Sanbolic is an innovator and leader in workload-oriented storage virtualization technologies. The Sanbolic technology, combined with XenDesktop, XenApp, and XenMobile products will enable us to develop a range of differentiated solutions that will reduce the complexity of Microsoft Windows application delivery and desktop virtualization deployments. Sanbolic will become part of our Enterprise and Service Provider division. The total preliminary consideration for this transaction was approximately \$89.4 million, net of \$0.2 million cash acquired, and was paid in cash. Transaction costs associated with the acquisition are currently estimated at \$0.4 million, of which we expensed \$0.2 million during the year ended December 31, 2014, and are included in General and administrative expense in the accompanying consolidated statements of income. In addition, in connection with the acquisition, we assumed non-vested stock units which were converted into the right to receive, in the aggregate, up to 37,057 shares of our common stock, for which the vesting period began on the closing of the transaction.

Critical Accounting Policies and Estimates

Our discussion and analysis of financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent liabilities. We base these estimates on our historical experience and on various other assumptions that we believe to be reasonable under the circumstances, and these estimates form the basis for our judgments concerning the carrying values of assets and liabilities that are not readily apparent from other sources. We periodically evaluate these estimates and judgments based on available information and experience. Actual results could differ from our estimates under different assumptions and conditions. If actual results significantly differ from our estimates, our financial condition and results of operations could be materially impacted.

We believe that the accounting policies described below are critical to understanding our business, results of operations and financial condition because they involve more significant judgments and estimates used in the preparation of our consolidated financial statements. An accounting policy is deemed to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, and if different estimates that could have been used, or changes in the accounting estimates that are reasonably likely to occur periodically, could materially impact our consolidated financial statements. We have discussed the development, selection and application of our critical accounting policies with the Audit Committee of our Board of Directors and our independent auditors, and our Audit Committee has reviewed our disclosure relating to our critical accounting policies and estimates in this “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Note 2 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 describes the significant accounting policies and methods used in the preparation of our Consolidated Financial Statements.

Revenue Recognition

We recognize revenue when it is earned and when all of the following criteria are met: persuasive evidence of the arrangement exists; delivery has occurred or the service has been provided and we have no remaining obligations; the fee is fixed or determinable; and collectability is probable. We define these four criteria as follows:

Persuasive evidence of the arrangement exists. Evidence of an arrangement generally consists of a purchase order issued pursuant to the terms and conditions of a distributor, reseller or end user agreement. For SaaS, we generally require the customer or the reseller to electronically accept the terms of an online services agreement or execute a contract.

Delivery has occurred and we have no remaining obligations. We consider delivery of licenses under electronic licensing agreements to have occurred when the related products are shipped and the end-user has been electronically provided the software activation keys that allow the end-user to take immediate possession of the product. For

hardware appliance sales, our standard delivery method is free-on-board shipping point. Consequently, we consider delivery of appliances to have occurred when the products are shipped pursuant to an agreement and purchase order. For SaaS, delivery occurs upon providing the users with their login id and password. For product training and consulting services, we fulfill our obligation when the services are performed. For license updates and maintenance,

we assume that our obligation is satisfied ratably over the respective terms of the agreements, which are typically 12 to 24 months. For SaaS, we assume that our obligation is satisfied ratably over the respective terms of the agreements, which are typically 12 months.

The fee is fixed or determinable. In the normal course of business, we do not provide customers with the right to a refund of any portion of their license fees or extended payment terms. The fees are considered fixed or determinable upon establishment of an arrangement that contains the final terms of the sale including description, quantity and price of each product or service purchased. For SaaS, the fee is considered fixed or determinable if it is not subject to refund or adjustment.

Collectability is probable. We assess collectability based primarily on the creditworthiness of the customer.

Management's judgment is required in assessing the probability of collection, which is generally based on an evaluation of customer specific information, historical experience and economic market conditions. If we determine from the outset of an arrangement that collectability is not probable, revenue recognition is deferred until customer payment is received and the other parameters of revenue recognition described above have been achieved.

The majority of our product and license revenue consists of revenue from the sale of software products. Software sales generally include a perpetual license to our software and are subject to the industry specific software revenue recognition guidance. In accordance with this guidance, we allocate revenue to license updates related to our software and any other undelivered elements of the arrangement based on VSOE of fair value of each element and such amounts are deferred until the applicable delivery criteria and other revenue recognition criteria described above have been met. The balance of the revenues, net of any discounts inherent in the arrangement, is recognized at the outset of the arrangement using the residual method as the product licenses are delivered. If management cannot objectively determine the fair value of each undelivered element based on VSOE of fair value, revenue recognition is deferred until all elements are delivered, all services have been performed, or until fair value can be objectively determined.

We also make certain judgments to record estimated reductions to revenue for customer programs and incentive offerings including volume-based incentives, at the time sales are recorded.

For hardware appliance and software transactions, the arrangement consideration is allocated to stand-alone software deliverables as a group and the non-software deliverables based on the relative selling prices of using the selling price hierarchy in the revenue recognition guidance. The selling price hierarchy for a deliverable is based on its VSOE if available, third-party evidence, or TPE, if VSOE is not available, or estimated selling price if neither VSOE nor TPE is available. We then recognize revenue on each deliverable in accordance with our policies for product and service revenue recognition. VSOE of selling price is based on the price charged when the element is sold separately. In determining VSOE, we require that a substantial majority of the selling prices fall within a reasonable range based on historical discounting trends for specific products and services. TPE of selling price is established by evaluating competitor products or services in stand-alone sales to similarly situated customers. However, as our products contain a significant element of proprietary technology and our solutions offer substantially different features and functionality, the comparable pricing of products with similar functionality typically cannot be obtained. Additionally, as we are unable to reliably determine what competitors products' selling prices are on a stand-alone basis, we are not typically able to determine TPE. The estimate of selling price is established considering multiple factors including, but not limited to, pricing practices in different geographies and through different sales channels and competitor pricing strategies.

For our non-software transactions we allocate the arrangement consideration based on the relative selling price of the deliverables. For our hardware appliances we use ESP as our selling price. For our support and services, we generally use VSOE as our selling price. When we are unable to establish selling price using VSOE for our support and services, we use ESP in our allocation of arrangement consideration.

Our Mobility Apps products are considered hosted service arrangements per the authoritative guidance; accordingly, fees related to online service agreements are recognized ratably over the contract term. In addition, SaaS revenues may also include set-up fees, which are recognized ratably over the contract term or the expected customer life, whichever is longer. Generally, our Mobility Apps products are sold separately and not bundled with Enterprise and Service Provider division products and services. See Note 2 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 for further information on our revenue recognition.

Valuation and Classification of Investments

The authoritative guidance defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). Our available-for-sale investments are measured to fair value on a recurring basis. In addition, we hold investments that are accounted for based on the cost method. These investments are periodically reviewed for impairment and when indicators of impairment exist, are measured to fair value as appropriate on a non-recurring basis. In determining the fair value of our investments we are sometimes required to use various alternative valuation techniques. The authoritative guidance establishes a hierarchy for

inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available.

The authoritative guidance establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows: Level 1, observable inputs such as quoted prices in active markets for identical assets or liabilities, Level 2, inputs, other than quoted prices in active markets, that are observable either directly or indirectly, and Level 3, unobservable inputs in which there is little or no market data, which requires us to develop our own assumptions. Observable inputs are those that market participants would use in pricing the asset or liability that are based on market data obtained from independent sources, such as market quoted prices. When Level 1 observable inputs for our investments are not available to determine their fair value, we must then use other inputs which may include indicative pricing for securities from the same issuer with similar terms, yield curve information, benchmark data, prepayment speeds and credit quality or unobservable inputs that reflect our estimates of the assumptions market participants would use in pricing the investments based on the best information available in the circumstances. When valuation techniques, other than those described as Level 1 are utilized, management must make estimations and judgments in determining the fair value for its investments. The degree to which management's estimation and judgment is required is generally dependent upon the market pricing available for the investments, the availability of observable inputs, the frequency of trading in the investments and the investment's complexity. If we make different judgments regarding unobservable inputs we could potentially reach different conclusions regarding the fair value of our investments.

After we have determined the fair value of our investments, for those that are in an unrealized loss position, we must then determine if the investment is other-than-temporarily impaired. We review our investments quarterly for indicators of other-than-temporary impairment. This determination requires significant judgment and if different judgments are used the classification of the losses related to our investments could differ. In making this judgment, we employ a systematic methodology that considers available quantitative and qualitative evidence in evaluating potential impairment of our investments. If the carrying value of an available-for-sale investment exceeds its fair value, we evaluate, among other factors, general market conditions, the duration and extent to which the fair value is less than carrying value our intent to retain or sell the investment and whether it is more likely than not that we will not be required to sell the investment before the recovery of its amortized cost basis, which may not be until maturity. We also consider specific adverse conditions related to the financial health of and business outlook for the issuer, including industry and sector performance, rating agency actions and changes in credit default swap levels. For our cost method investments, our quarterly review of impairment indicators encompasses the analysis of specific criteria of the entity, such as cash position, financing needs, operational performance, management changes, competition and turnaround potential. If any of the above impairment indicators are present, we further evaluate whether an other-than-temporary impairment should be recorded. Once a decline in fair value is determined to be other-than-temporary, an impairment charge is recorded and a new cost basis in the investment is established. See Notes 4 and 5 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 and "Liquidity and Capital Resources" for more information on our investments and fair value measurements.

Intangible Assets

We have acquired product related technology assets and other intangible assets from acquisitions and other third party agreements. We allocate the purchase price of acquired intangible assets acquired through third party agreements based on their estimated relative fair values. We allocate a portion of purchase price of acquired companies to the product related technology assets and other intangible assets acquired based on their estimated fair values. We typically engage third party appraisal firms to assist us in determining the fair values and useful lives of product related technology assets and other intangible assets acquired. Such valuations and useful life determinations require us to make significant estimates and assumptions. These estimates are based on historical experience and information obtained from the management of the acquired companies and are inherently uncertain. Critical estimates in determining the fair value and useful lives of the product related technology assets include but are not limited to future expected cash flows earned from the product related technology and discount rates applied in determining the present value of those cash flows. Critical estimates in valuing certain other intangible assets include but are not limited to future expected cash flows from customer contracts, customer lists, distribution agreements, patents, brand awareness

and market position, as well as discount rates.

Management's estimates of fair value are based upon assumptions believed to be reasonable. Unanticipated events and circumstances may occur which may affect the accuracy or validity of such assumptions, estimates or actual results.

We monitor acquired intangible assets for impairment on a periodic basis by reviewing for indicators of impairment.

If an indicator exists we compare the estimated net realizable value to the unamortized cost of the intangible asset.

The recoverability of the intangible assets is primarily dependent upon our ability to commercialize products utilizing the acquired technologies, retain existing customers and customer contracts, and maintain brand awareness. The

estimated net realizable value of the acquired intangible assets is based on the estimated undiscounted future cash flows derived from such intangible assets. Our assumptions about future revenues and expenses require significant judgment associated with the forecast of the

performance of our products, customer retention rates and ability to secure and maintain our market position. Actual revenues and costs could vary significantly from these forecasted amounts. As of December 31, 2014, the estimated undiscounted future cash flows expected from product related technology assets and other intangible assets from these acquisitions is sufficient to recover their carrying value. If these products are not ultimately accepted by our customers and distributors, and there is no alternative future use for the technology; or if we fail to retain acquired customers or successfully market acquired brands, we could determine that some or all of the remaining \$390.7 million carrying value of our acquired intangible assets is impaired. In the event of impairment, we would record an impairment charge to earnings that could have a material adverse effect on our results of operations.

Goodwill

The excess of the fair value of purchase price over the fair values of the identifiable assets and liabilities from our acquisitions is recorded as goodwill. At December 31, 2014, we had \$1.80 billion in goodwill related to our acquisitions. The goodwill recorded in relation to these acquisitions is not deductible for tax purposes. Our revenues are derived from sales of our Enterprise and Service Provider division products, which include our Workspace Services solutions, Delivery Networking products and related license updates and maintenance and from sales of our Mobility Apps division's Communications Cloud, Documents Cloud and Workflow Cloud products. The Enterprise and Service Provider division and the Mobility Apps division constitute our two reportable segments. See Note 11 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 for additional information regarding our reportable segments. We evaluate goodwill between these segments, which represent our reporting units.

We account for goodwill in accordance with FASB's authoritative guidance, which requires that goodwill and certain intangible assets are not amortized, but are subject to an annual impairment test. We complete our goodwill and certain intangible assets impairment test on an annual basis, during the fourth quarter of our fiscal year, or more frequently, if changes in facts and circumstances indicate that an impairment in the value of goodwill and certain intangible assets recorded on our balance sheet may exist.

In the fourth quarter of 2014, we performed a qualitative assessment to determine whether further quantitative impairment testing for goodwill and certain intangible assets is necessary, which we refer to this assessment as the Qualitative Screen. In performing the Qualitative Screen, we are required to make assumptions and judgments including but not limited to the following: the evaluation of macroeconomic conditions as related to our business, industry and market trends, and the overall future financial performance of our reporting units and future opportunities in the markets in which they operate. If after performing the Qualitative Screen impairment indicators are present, we would perform a quantitative impairment test to estimate the fair value of goodwill and certain intangible assets. In doing so, we would estimate future revenue, consider market factors and estimate our future cash flows. Based on these key assumptions, judgments and estimates, we determine whether we need to record an impairment charge to reduce the value of the goodwill and certain intangible assets carried on our balance sheet to its estimated fair value. Assumptions, judgments and estimates about future values are complex and often subjective and can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in our business strategy or our internal forecasts. Although we believe the assumptions, judgments and estimates we have made have been reasonable and appropriate, different assumptions, judgments and estimates could materially affect our results of operations. As a result of the Qualitative Screen, no further quantitative impairment test was deemed necessary. There was no impairment of goodwill as a result of the annual impairment tests completed during the fourth quarters of 2014 and 2013.

Income Taxes

We are required to estimate our income taxes in each of the jurisdictions in which we operate as part of the process of preparing our consolidated financial statements. At December 31, 2014, we had approximately \$164.3 million in net deferred tax assets. The authoritative guidance requires a valuation allowance to reduce the deferred tax assets reported if, based on the weight of the evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. We review deferred tax assets periodically for recoverability and make estimates and judgments regarding the expected geographic sources of taxable income and gains from investments, as well as tax planning strategies in assessing the need for a valuation allowance. At December 31, 2014, we determined that a \$15.2 million valuation allowance relating to deferred tax assets for net operating losses and tax credits was necessary. If the

estimates and assumptions used in our determination change in the future, we could be required to revise our estimates of the valuation allowances against our deferred tax assets and adjust our provisions for additional income taxes. In the ordinary course of global business, there are transactions for which the ultimate tax outcome is uncertain, thus judgment is required in determining the worldwide provision for income taxes. We provide for income taxes on transactions based on our estimate of the probable liability. We adjust our provision as appropriate for changes that impact our underlying

judgments. Changes that impact provision estimates include such items as jurisdictional interpretations on tax filing positions based on the results of tax audits and general tax authority rulings. Due to the evolving nature of tax rules combined with the large number of jurisdictions in which we operate, it is possible that our estimates of our tax liability and the realizability of our deferred tax assets could change in the future, which may result in additional tax liabilities and adversely affect our results of operations, financial condition and cash flows.

The following discussion relating to the individual financial statement captions, our overall financial performance, operations and financial position should be read in conjunction with the factors and events described in “— Overview” and Part 1 – Item 1A entitled “Risk Factors,” included in this Annual Report on Form 10-K for the year ended December 31, 2014, which could impact our future performance and financial position.

Convertible Senior Notes

In April 2014, we completed a private placement of our Convertible Notes due 2019 with a net share settlement feature, meaning that upon conversion, the principal amount will be settled in cash and the remaining amount, if any, will be settled in shares of our common stock or a combination of cash and shares of our common stock, at our election. In accordance with accounting guidance for convertible debt instruments that may be settled in cash or other assets on conversion, we first determine the carrying amount of the liability component by measuring the fair value of a similar liability that does not have an associated equity component. Then we determine the carrying amount of the equity component represented by the embedded conversion option by deducting the fair value of the liability component from the initial proceeds ascribed to the convertible debt instrument as a whole. Debt discount and debt issuance costs are amortized to interest expense using the effective interest method.

Results of Operations

The following table sets forth our consolidated statements of income data and presentation of that data as a percentage of change from year-to-year (in thousands other than percentages):

	Year Ended December 31,			2014	2013
	2014	2013	2012	Compared to 2013	Compared to 2012
Revenues:					
Product and licenses	\$899,736	\$891,630	\$830,645	0.9	% 7.3

* not meaningful

Revenues by Segment

Net revenues of our Enterprise and Service Provider division include Product and licenses, License updates and maintenance, and Professional services. Product and licenses primarily represent fees related to the licensing of the following major products:

Workspace Services is primarily comprised of our desktop and application virtualization products, which include XenDesktop and XenApp and our mobility products which include XenMobile products; and

Delivery Networking is primarily comprised of our cloud networking products, which include NetScaler, CloudBridge and ByteMobile Smart Capacity.

In addition, we offer incentive programs to our VADs and VARs to stimulate demand for our products. Product and license revenues associated with these programs are partially offset by these incentives to our VADs and VARs.

License updates and maintenance consists of:

Our Subscription Advantage program, an annual renewable program that provides subscribers with automatic delivery of unspecified software upgrades, enhancements and maintenance releases when and if they become

available during the term of the subscription, for which fees are recognized ratably over the term of the contract, which is typically 12 to 24 months; and

• Our maintenance fees, which include technical support and hardware and software maintenance, and which are recognized ratably over the contract term.

Professional services revenues are comprised of:

• Fees from consulting services related to implementation of our products, which are recognized as the services are provided; and

• Fees from product training and certification, which are recognized as the services are provided.

Our SaaS revenues from our Mobility Apps products, which are recognized ratably over the contractual term, consist of fees related to our mobility apps products including:

• Communications Cloud products, which primarily include GoToMeeting, GoToWebinar and GoToTraining;

• Documents Cloud products, which primarily include ShareFile and GoToMyPC; and

• Workflow Cloud products, which primarily includes GoToAssist.

Total net revenues	\$3,142,856	\$2,918,434	\$2,586,123	\$224,422	\$332,311

Product and licenses

Product and licenses revenue increased during 2014 when compared to 2013 primarily due to increased sales of our Delivery Networking products of \$48.2 million, led by NetScaler, partially offset by a decrease in sales of our Workspace Services solutions of \$40.8 million, primarily XenDesktop and XenApp. These Product and licenses revenue results were primarily due to the factors discussed in the Executive Summary Overview above. Product and licenses revenue increased during 2013 when compared to 2012 primarily due to increased sales of our Delivery Networking products of \$87.4 million, led by NetScaler, partially offset by a decrease in sales of our Workspace Services solutions of \$30.9 million, primarily XenDesktop and XenApp. We currently target Product and licenses revenue to increase when comparing the first quarter of 2015 to the first quarter of 2014.

Software as a Service

Software as a Service revenue increased during 2014 when compared to 2013 primarily due to increased sales of our Communications Cloud products of \$46.6 million, led by GoToMeeting, and due to increased sales of our Documents Cloud products of \$22.9 million. Software as a Service revenue increased during 2013 when compared to 2012 primarily due to increased sales of our Communications Cloud product of \$45.4 million and due to increased sales of our Documents Cloud products of \$15.9 million. We currently target our Software as a Service revenue to increase when comparing the first quarter of 2015 to the first quarter of 2014.

License updates and maintenance

License updates and maintenance revenue increased during 2014 when compared to 2013 primarily due to an increase in maintenance revenues of \$68.9 million, primarily driven by increased sales of maintenance and support contracts across all of our Enterprise and Service Provider division's products and an increase in renewals of our Subscription Advantage product of \$42.0 million. License updates and maintenance revenue increased during 2013 when compared to 2012 primarily due to an increase in maintenance revenues of \$100.3 million, primarily driven by increased sales of maintenance and support contracts across all of our Enterprise and Service Provider division's products and an increase in sales and renewals of our Subscription Advantage product of \$79.7 million. We currently are targeting that License updates and maintenance revenue will increase when comparing the first quarter of 2015 to the first quarter of 2014.

Professional services

Professional services revenue increased during 2014 when compared to 2013 primarily due to increases in product training and certification and consulting revenues related to increased implementation sales of our Enterprise and Service Provider division's products. Professional services revenue increased during 2013 when compared to 2012 primarily due to increases in consulting revenues related to increased implementation sales of our Enterprise and Service Provider division's products. We currently target Professional services revenue to be consistent when comparing the first quarter of 2015 to the first quarter of 2014.

Deferred Revenue

Deferred revenues are primarily comprised of License updates and maintenance revenue from our Subscription Advantage product as well as maintenance contracts for our software and hardware products. Deferred revenues also include SaaS revenue from annual service agreements and Professional services revenue primarily related to our consulting contracts. Deferred revenues increased approximately \$146.1 million as of December 31, 2014 compared to December 31, 2013 primarily due to an increase in sales of our hardware maintenance offerings of \$66.2 million, an increase in license updates and software maintenance offerings of \$49.1 million, an increase related to our support contracts of \$26.0 million and increased sales of our Mobility Apps products of \$7.5 million. We currently target deferred revenue to increase in 2015.

While it is generally our practice to promptly ship our products upon receipt of properly finalized purchase orders, we sometimes have product license orders that have not shipped. Although the amount of such product license orders may vary, the amount, if any, of such product license orders at the end of a particular period has not been material to total revenue at the end of any reporting period. We do not believe that backlog, as of any particular date, is a reliable indicator of future performance.

International Revenues

International revenues (sales outside the United States) accounted for approximately 45.2% of our net revenues for the year ended December 31, 2014, 45.4% of our net revenues for the year ended December 31, 2013 and 45.3% of our net revenues for the year ended December 31, 2012. For detailed information on international revenues, please refer to Note 11 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014.

Segment Revenues

Our revenues are derived from sales of Enterprise and Service Provider division products which primarily include Workspace Services solutions, Delivery Networking products and related License updates and maintenance and Professional services and from our Mobility Apps division's Communications Cloud, Documents Cloud and Workflow Cloud products. The Enterprise and Service Provider division and the Mobility Apps division constitute our two reportable segments.

An analysis of our reportable segment net revenue is presented below:

	Year Ended December 31,			Revenue	Revenue	
	2014	2013	2012	Growth	Growth	
	(In thousands)			2014 to 2013	2013 to 2012	
Enterprise and Service Provider division	\$2,491,294	\$2,335,562	\$2,074,800	6.7	% 12.6	%
Mobility Apps division	651,562	582,872	511,323	11.8	% 14.0	%
Consolidated net revenues	\$3,142,856	\$2,918,434	\$2,586,123	7.7	% 12.8	%

With respect to our segment revenues, the increase in net revenues for the comparative periods presented was due primarily to the factors previously discussed above. See Note 11 of our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 for additional information on our segment revenues.

Cost of Net Revenues

	Year Ended December 31,			2014	2013
	2014	2013	2012	Compared to 2013	Compared to 2012
	(In thousands)				
Cost of product and license revenues	\$124,110	\$114,932	\$96,962	\$9,178	\$17,970
Cost of services and maintenance revenues	349,683	289,990	227,150	59,693	62,840
Amortization of product related intangible assets	146,426	97,873	80,025	48,553	17,848
Total cost of net revenues	\$620,219	\$502,795	\$404,137	\$117,424	\$98,658

Cost of product and license revenues consists primarily of hardware, shipping expense, royalties, product media and duplication, manuals and packaging materials. Cost of services and maintenance revenues consists primarily of compensation and other personnel-related costs of providing technical support and consulting, as well as the costs related to providing our Mobility Apps, which includes the cost to support the voice and video offerings in our Communications Cloud products. Also included in Cost of net revenues is amortization of product related intangible assets.

Cost of product and license revenues increased during 2014 when compared to 2013 and during 2013 when compared to 2012 primarily due to increased sales of our Delivery Networking products, as described above, many of which contain hardware components that have a higher cost than our other software products. We currently are targeting cost of product and license revenues will increase when comparing the first quarter of 2015 to the first quarter of 2014 consistent with the targeted increase in sales of our hardware products.

Cost of services and maintenance revenues increased during 2014 compared to 2013 consistent with the increase in sales of our Communications Cloud products and cost for infrastructure to support the voice and video offerings in our Communications Cloud products of \$26.6 million. Also contributing to the increase in Cost of services and maintenance revenues is an increase in education costs of \$14.8 million related to the increase in product training and certification programs as described above and maintenance and support costs of \$16.2 million related to increased sales of our Enterprise and Service Provider division's products as described above. Cost of services and maintenance revenues increased during 2013 compared to 2012 consistent with the increase in sales of our Communications Cloud products and cost for infrastructure to support the voice and video offerings in our Communications Cloud products of \$30.5 million. Also contributing to the increase in Cost of services and maintenance revenues is an increase in consulting costs of \$16.8 million and maintenance and support costs of \$15.1 million related to increased sales of our Enterprise and Service Provider division's products as described above. We currently are targeting cost of services and maintenance revenues will increase when comparing the first quarter of 2015 to the first quarter of 2014 consistent with the increase in Software as a Service revenues as discussed above.

Amortization of product related intangible assets increased during 2014 compared to 2013 primarily due to the impairment of certain intangible assets related to our Enterprise and Service Provider division, partially offset by certain intangible assets becoming fully amortized during 2014.

Gross Margin

Gross margin as a percent of revenue was 80.3% for 2014, 82.8% for 2013 and 84.4% for 2012. The decrease in gross margin as a percentage of net revenue is primarily due to impairment charges recorded in relation to certain intangible assets during 2014 and the increase in sales of our Delivery Networking products with a hardware component and increased sales of our services, both of which have a higher cost than our software products. When comparing the first quarter of 2015 to the first quarter of 2014, we expect gross margin to remain consistent.

Operating Expenses

Foreign Currency Impact on Operating Expenses

The functional currency for all of our wholly-owned foreign subsidiaries in our Enterprise and Service Provider division is the U.S. dollar. A substantial majority of our overseas operating expenses and capital purchasing activities are transacted in local currencies and are therefore subject to fluctuations in foreign currency exchange rates. In order to minimize the impact on our operating results, we generally initiate our hedging of currency exchange risks up to 12 months in advance of anticipated foreign currency expenses. When the dollar is weak, the resulting increase to foreign currency denominated expenses will be partially offset by the gain in our hedging contracts. When the dollar is strong,

the resulting decrease to foreign currency denominated expenses will be partially offset by the loss in our hedging contracts. There is a risk that there will be fluctuations in foreign currency exchange rates beyond the timeframe for which we hedge our risk. Effective in January 2015, the functional

currency of our wholly-owned foreign subsidiaries of our Mobility Apps division became the U.S. dollar as a result of a reorganization in the foreign subsidiaries' operations.

Research and Development Expenses

	Year Ended December 31,			2014	2013
	2014	2013	2012	Compared to 2013	Compared to 2012

(In thousands)

Research and development	\$553,817	\$516,338	\$450,571	\$37,479	\$65,767
--------------------------	-----------	-----------	-----------	----------	----------

Research and development expenses consisted primarily of personnel related costs and facility and equipment costs directly related to our research and development activities. We expensed substantially all development costs included in the research and development of our products.

Research and development expenses increased during 2014 as compared to 2013 and during 2013 as compared to 2012 primarily due to an increase in compensation, including stock-based compensation and employee-related costs, primarily related to increased headcount from strategic hiring and acquisitions.

Sales, Marketing and Services Expenses

	Year Ended December 31,			2014	2013
	2014	2013	2012	Compared to 2013	Compared to 2012

(In thousands)

Sales, marketing and services	\$1,280,265	\$1,216,680	\$1,060,829	\$63,585	\$155,851
-------------------------------	-------------	-------------	-------------	----------	-----------

Sales, marketing and services expenses consisted primarily of personnel related costs, including sales commissions, pre-sales support, the costs of marketing programs aimed at increasing revenue, such as brand development, advertising, trade shows, public relations and other market development programs and costs related to our facilities, equipment and information systems that are directly related to our sales, marketing and services activities.

Sales, marketing and services expenses increased during 2014 compared to 2013 primarily due to a \$33.3 million increase in compensation, including variable compensation and employee-related costs due to additional headcount in our sales force and professional services group, as well as from our acquisitions. Also contributing to the increase in Sales, marketing and services expense when comparing 2014 to 2013 is a \$12.0 million increase in professional fees related to strategic initiatives and a \$10.9 million increase in marketing program costs related to various marketing campaigns and events.

Sales, marketing and services expenses increased during 2013 compared to 2012 primarily due to a \$91.5 million increase in compensation, including variable and stock-based compensation and employee-related costs due to additional headcount in our sales force and professional services group, as well as from our acquisitions. Also contributing to the increase in Sales, marketing and services expense when comparing 2013 to 2012 is a \$30.9 million increase in facilities costs and related depreciation, consistent with the increase in headcount and a \$21.0 million increase in marketing program costs related to various marketing campaigns and events.

General and Administrative Expenses

	Year Ended December 31,			2014	2013
	2014	2013	2012	Compared to 2013	Compared to 2012

(In thousands)

General and administrative	\$319,922	\$260,236	\$245,259	\$59,686	\$14,977
----------------------------	-----------	-----------	-----------	----------	----------

General and administrative expenses consisted primarily of personnel related costs and expenses related to outside consultants assisting with information systems, as well as accounting and legal fees.

General and administrative expenses increased during 2014 compared to 2013 primarily due to a charge related to a previously disclosed patent lawsuit of \$20.7 million, an increase in compensation and employee related costs of \$20.2 million due to additional headcount primarily in information technology and facilities, as well as from our acquisitions and an increase in professional fees of \$19.0 million primarily related to projects to support business growth.

General and administrative expenses increased during 2013 compared to 2012 primarily due to an increase in compensation and employee related costs of \$11.8 million due to additional headcount, primarily in information

technology

45

and facilities, as well as from our acquisitions. Also contributing to the increase in General and administrative expense when comparing 2013 to 2012 is an increase in stock-based compensation expense of \$10.7 million related to retention-focused stock-based awards granted to new and existing employees and assumed in connection with acquisitions. These increases were partially offset by a decrease in certain facility and depreciation costs of \$7.7 million due to a lower allocation of these costs as employees are being added at a slower rate in general and administrative functions compared to research and development and sales, marketing and services.

Restructuring Expenses

	Year Ended December 31,			2014	2013
	2014	2013	2012	Compared to 2013	Compared to 2012
	(In thousands)				
Restructuring	\$20,424	\$—	\$—	\$20,424	\$—

In March 2014, we implemented the 2014 Restructuring Program, which included the reduction of our headcount by approximately 320 full-time positions. The pre-tax charges we incurred were primarily related to severance and other costs directly related to the reduction of our workforce. The restructuring program is expected to be completed by the end of the first quarter of 2015. Additionally, in January 2015, we implemented the 2015 Restructuring Program and anticipate incurring pre-tax charges related to employee severance arrangements and the consolidation of leased facilities. For more information, see “—Executive Summary— Overview” and Note 17 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014.

2015 Operating Expense Outlook

When comparing the first quarter of 2015 to the fourth quarter of 2014, we are targeting operating expenses to increase in Sales, marketing and services as we refocus our investments on our highest growth opportunities, while remaining at consistent levels across all other functional areas. We also expect to incur charges in the first quarter of 2015 related to the 2015 Restructuring Program.

Interest Expense

	Year Ended December 31,			2014	2013
	2014	2013	2012	Compared to 2013	Compared to 2012
	(In thousands)				
Interest expense	\$28,332	\$128	\$312	\$28,204	\$(184)

Interest expense in 2014 consists primarily of interest on our convertible senior notes. The increase was primarily due to interest expense associated with the issuance of our convertible senior notes. We currently are targeting interest expense will increase when comparing the first quarter of 2015 to the first quarter of 2014 as we entered into our convertible senior note in April 2014.

Amortization of Other Intangible Assets

	Year Ended December 31,			2014	2013
	2014	2013	2012	Compared to 2013	Compared to 2012
	(In thousands)				
Amortization of other intangible assets	\$45,898	\$41,668	\$34,549	\$4,230	\$7,119

Amortization of other intangible assets consists of amortization of customer relationships, trade names and covenants not to compete primarily related to our acquisitions.

The increase in Amortization of other intangible assets when comparing 2014 to 2013 was primarily due to impairments of certain intangible assets within the Enterprise and Service Provider division during the fourth quarter of 2014 and amortization of other intangible assets acquired in conjunction with our 2014 acquisitions.

The increase in Amortization of other intangible assets when comparing 2013 to 2012 was primarily due to amortization of other intangible assets acquired in conjunction with our acquisitions, primarily Zenprise.

As of December 31, 2014, we had unamortized other identified intangible assets with estimable useful lives in the net amount of \$227.2 million. For more information regarding our acquisitions see, “— Overview” and Note 3 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014.

Other (expense) income, net

	Year Ended December 31,			2014	2013
	2014	2013	2012	Compared to 2013	Compared to 2012
	(In thousands)				
Other (expense) income, net	\$(7,694)\$ (893)\$ 9,611	\$(6,801)\$ (10,504

Other (expense) income, net is primarily comprised of remeasurement of foreign currency transaction gains (losses), realized losses related to changes in the fair value of our investments that have a decline in fair value considered other-than-temporary and recognized gains (losses) related to our investments, which was not material for all periods presented.

The change in Other (expense) income, net when comparing 2014 to 2013 is primarily driven by losses on the remeasurement of foreign currency transactions.

The change in Other (expense) income, net when comparing 2013 to 2012 is primarily driven by strategic investment activity. 2013 included a gain of \$6.0 million and 2012 included a gain of \$16.5 million from the sales of companies we invest in.

Income Taxes

As of December 31, 2014, our net unrecognized tax benefits totaled approximately \$66.9 million as compared to \$63.8 million as of December 31, 2013. All amounts included in this balance affect the annual effective tax rate. We have no amounts accrued for the payment of interest and penalties as of December 31, 2014.

We and certain of our subsidiaries are subject to U.S. federal income taxes, as well as income taxes of multiple state and foreign jurisdictions. With few exceptions, we are no longer subject to U.S. federal, state and local, or non-U.S., income tax examinations by tax authorities for years prior to 2011.

During the quarter ended June 30, 2014, the Internal Revenue Service, or IRS, concluded its field examination of our 2009 and 2010 tax years and issued proposed adjustments primarily related to transfer pricing and the research and development tax credit. In June 2014, we finalized our tax deficiency calculations and formally closed the audit with the IRS for the 2009 and 2010 tax years. As a result, we recognized a net tax benefit related to the settlement of all tax issues with the IRS for the 2009 and 2010 tax years, the impact on subsequent years and the reduction of our uncertain tax positions for the closed tax years of \$9.3 million during the second quarter of 2014.

In the ordinary course of global business, there are transactions for which the ultimate tax outcome is uncertain and judgment is required in determining the worldwide provision for income taxes. We provide for income taxes on transactions based on our estimate of the probable liability. We adjust our provision as appropriate for changes that impact our underlying judgments. Changes that impact provision estimates include such items as jurisdictional interpretations on tax filing positions based on the results of tax audits and general tax authority rulings. Due to the evolving nature of tax rules combined with the large number of jurisdictions in which we operate, it is possible that our estimates of our tax liability and the realizability of our deferred tax assets could change in the future, which may result in additional tax liabilities and adversely affect our results of operations, financial condition and cash flows.

We are required to estimate our income taxes in each of the jurisdictions in which we operate as part of the process of preparing our consolidated financial statements. At December 31, 2014, we had approximately \$164.3 million in net deferred tax assets. The authoritative guidance requires a valuation allowance to reduce the deferred tax assets reported if, based on the weight of the evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. We review deferred tax assets periodically for recoverability and make estimates and judgments regarding the expected geographic sources of taxable income and gains from investments, as well as tax planning strategies in assessing the need for a valuation allowance. At December 31, 2014, we determined that \$15.2 million valuation allowance relating to deferred tax assets for net operating losses and tax credits was necessary. If the estimates and assumptions used in our determination change in the future, we could be required to revise our estimates

of the valuation allowances against our deferred tax assets and adjust our provisions for additional income taxes. We maintain certain strategic management and operational activities in overseas subsidiaries and our foreign earnings are taxed at rates that are generally lower than in the United States. We do not expect to remit earnings from our foreign subsidiaries. Our effective tax rate was approximately 8.7% for the year ended December 31, 2014 and 12.5% for the year

ended December 31, 2013. The decrease in the effective tax rate when comparing the year ended December 31, 2014 to the year ended December 31, 2013 was primarily due to the impact of the IRS settlement for the tax years 2009 and 2010 that closed during the three months ended June 30, 2014 and the decrease in pre-tax earnings.

We currently target our effective tax rate to increase in 2015 compared to 2014 due to the expiration of the federal research and development credit.

Our effective tax rate generally differs from the U.S. federal statutory rate of 35% due primarily to lower tax rates on earnings generated by our foreign operations that are taxed primarily in Switzerland. We have not provided for U.S. taxes for those earnings because we plan to reinvest all of those earnings indefinitely outside the United States. Our effective tax rate will fluctuate based on the mix of earnings from our U.S. and foreign jurisdictions. Accordingly, earnings from the production and distribution of our products and services through our foreign headquarters in Switzerland are currently taxed at lower income tax rates than earnings from our U.S. operations.

The federal research and development credit expired on December 31, 2013. On December 19, 2014, the Tax Increase Prevention Act of 2014 was signed into law. Under this act, the federal research and development credit was retroactively extended for amounts paid or incurred after December 31, 2013 and before January 1, 2015. The effects of these changes in the tax law result in net tax benefits of approximately \$12.3 million, which was recognized in the fourth quarter of 2014, the quarter in which the law was enacted. This credit has not been extended for the 2015 tax year and may increase the effective tax rate in future years if not extended.

Liquidity and Capital Resources

During 2014, we generated operating cash flows of \$846.0 million. These operating cash flows related primarily to net income of \$251.7 million, adjusted for, among other things, non-cash charges, including depreciation and amortization expenses of \$330.3 million and stock-based compensation expense of \$169.3 million. Also contributing to these cash inflows was an aggregate increase in operating assets and liabilities of \$96.9 million, net of effects of acquisitions.

Our investing activities used \$569.5 million of cash consisting primarily of net purchases of investments of \$289.7 million, cash paid for the purchase of property and equipment of \$165.4 million and cash paid for acquisitions of \$101.1 million. Our financing activities used cash of \$292.7 million primarily due to stock repurchases of \$1.6 billion, the purchase of hedges on the convertible senior notes of \$184.3 million and cash paid for tax withholding on vested stock awards of \$33.7 million. This financing cash outflow was partially offset by proceeds from the issuance of convertible senior notes of \$1.4 billion, proceeds from the issuance of warrants of \$101.8 million and the issuance of common stock under our employee stock-based compensation plans of \$46.6 million.

During 2013, we generated operating cash flows of \$928.3 million. These operating cash flows related primarily to net income of \$339.5 million, adjusted for, among other things, non-cash charges including depreciation and amortization expenses of \$267.5 million and stock-based compensation expense of \$183.9 million. Also contributing to these cash inflows was an aggregate increase in operating assets and liabilities of \$190.5 million, net of the effects of acquisitions. Our investing activities used \$938.2 million of cash consisting primarily of cash paid for acquisitions of \$334.9 million, the purchase of property and equipment of \$162.9 million and \$19.0 million in cash paid for licensing agreements and product related intangible assets and other investments. These investing cash outflows were partially offset by net sales of investments of \$433.5 million. Our financing activities used cash of \$352.3 million primarily due to stock repurchases of \$406.3 million. This financing cash outflow was partially offset by proceeds received from the issuance of common stock under our employee stock-based compensation plans of \$73.7 million.

Convertible Senior Notes and Accelerated Share Repurchase

In April 2014, we completed a private placement of \$1.25 billion principal amount of 0.500% Convertible Senior Notes due 2019. Thereafter, in May 2014, we issued an additional \$187.5 million principal amount of Convertible Notes pursuant to the full exercise of the over-allotment option granted to the initial purchasers in the offering, or the Over-Allotment Option. The net proceeds from this offering were approximately \$1.42 billion (including the proceeds from the Over-Allotment Option), after deducting the initial purchasers' discounts and commissions and the offering expenses payable by us. We used approximately \$82.5 million of the net proceeds to pay the cost of certain bond hedges entered into in connection with the offering (after such cost was partially offset by the proceeds to us from certain warrant transactions). Please see Note 12 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 for additional details on the Convertible Notes offering and the related bond hedges and warrant transactions.

We used the remainder of the net proceeds from the offering and a portion of our existing cash and investments to purchase an aggregate of approximately \$1.5 billion of our common stock under our share repurchase program. We used approximately \$101.0 million to purchase shares of our common stock from certain purchasers of the Convertible Notes in

privately negotiated transactions concurrently with the closing of the offering, and the remaining \$1.4 billion to purchase additional shares of our common stock through an accelerated share repurchase transaction, or the ASR, which we entered into with Citibank, N.A., or Citibank, on April 25, 2014, and which is discussed in further detail in Note 8 to our consolidated financial statements. We intend to use the remaining net proceeds resulting from the exercise of the Over-Allotment Option for working capital and general corporate purposes.

Credit Facility

Subsequent Event

On January 7, 2015, we entered into a credit agreement, or Credit Agreement with Bank of America, N.A., as Administrative Agent, and the other lenders party thereto from time to time collectively, the Lenders. The Credit Agreement provides for a \$250 million unsecured revolving credit facility for a term of five years, of which we have drawn \$95 million to date. We may elect to increase the revolving credit facility by up to \$250 million if existing or new lenders provide additional revolving commitments in accordance with the terms of the Credit Agreement. The proceeds of borrowings under the Credit Agreement may be used for working capital and general corporate purposes, including acquisitions. Borrowings under the Credit Agreement will bear interest at a rate equal to either (a) a customary London interbank offered rate formula or (b) a customary base rate formula, plus the applicable margin with respect thereto, in each case as set forth in the Credit Agreement.

The Credit Agreement requires us to maintain a consolidated leverage ratio of not more than 3.5:1.0 and a consolidated interest coverage ratio of not less than 3.0:1.0. The Credit Agreement includes customary events of default, with corresponding grace periods in certain circumstances, including, without limitation, payment defaults, cross-defaults, the occurrence of a change of control and bankruptcy-related defaults. The Lenders are entitled to accelerate repayment of the loans under the Credit Agreement upon the occurrence of any of the events of default. In addition, the Credit Agreement contains customary affirmative and negative covenants, including covenants that limit or restrict our ability to grant liens, merge or consolidate, dispose of all or substantially all of its assets, change its business and incur subsidiary indebtedness, in each case subject to customary exceptions for a credit facility of this size and type. In addition, the Credit Agreement contains customary representations and warranties. Please see Note 13 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 for additional details on our Credit Agreement.

Historically, significant portions of our cash inflows were generated by our operations. We currently expect this trend to continue throughout 2015. We believe that our existing cash and investments together with cash flows expected from operations will be sufficient to meet expected operating and capital expenditure requirements for the next 12 months. We continue to search for suitable acquisition candidates and could acquire or make investments in companies we believe are related to our strategic objectives. In January 2015, we drew \$95 million under our \$250 million credit facility. We could from time to time continue to seek to raise additional funds through the issuance of debt or equity securities for larger acquisitions.

Cash, Cash Equivalents and Investments

	December 31,		2014
	2014	2013	Compared to 2013
	(In thousands)		
Cash, cash equivalents and investments	\$1,862,519	\$1,590,416	\$272,103

The increase in cash, cash equivalents and investments at December 31, 2014 as compared to December 31, 2013, is primarily due to proceeds from the issuance of convertible senior notes of \$1.42 billion, cash provided by our operating activities of \$846.0 million, and proceeds from the issuance of warrants of \$101.8 million, partially offset by expenditures made on stock repurchases of \$1.6 billion, the purchase of hedges on the convertible senior notes of \$184.3 million, purchases of property and equipment of \$165.4 million, and cash paid for acquisitions, net of cash acquired, of \$101.1 million. As of December 31, 2014, \$1.38 billion of the \$1.86 billion of cash, cash equivalents and investments was held by our foreign subsidiaries. If these funds are needed for our operations in the United States, we would be required to accrue and pay U.S. taxes to repatriate these funds. Our current plans are not expected to require repatriation of cash and investments to fund our U.S. operations and, as a result, we intend to permanently reinvest our foreign earnings. See “– Liquidity and Capital Resources.” We generally invest our cash and cash equivalents in

investment grade, highly liquid securities to allow for flexibility in the event of immediate cash needs. Our short-term and long-term investments primarily consist of interest-bearing securities.

Fair Value Measurements

The authoritative guidance defines fair value as an exit price, representing the amount that would either be received to sell an asset or be paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an

asset or liability. As a basis for considering such assumptions, the guidance establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

- Level 1. Observable inputs such as quoted prices in active markets for identical assets or liabilities;
- Level 2. Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and
- Level 3. Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Available-for-sale securities included in Level 2 are valued utilizing inputs obtained from an independent pricing service, or the Service, which uses quoted market prices for identical or comparable instruments rather than direct observations of quoted prices in active markets. The Service gathers observable inputs for all of our fixed income securities from a variety of industry data providers including, for example, large custodial institutions and other third-party sources. Once the observable inputs are gathered by the Service, all data points are considered and an average price is determined. The Service's providers utilize a variety of inputs to determine their quoted prices. These inputs may include interest rates, known historical trades, yield curve information, benchmark data, prepayment speeds, credit quality and broker/dealer quotes. Substantially all of our available-for-sale investments are valued utilizing inputs obtained from the Service and accordingly are categorized as Level 2 in the table below. We periodically independently assess the pricing obtained from the Service and historically have not adjusted the Service's pricing as a result of this assessment. Available-for-sale securities are included in Level 3 when relevant observable inputs for a security are not available.

Our assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the classification of assets and liabilities within the fair value hierarchy. In certain instances, the inputs used to measure fair value may meet the definition of more than one level of the fair value hierarchy. The input with the lowest level priority is used to determine the applicable level in the fair value hierarchy.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

Our fixed income available-for-sale security portfolio generally consists of high quality, investment grade securities from diverse issuers with a minimum credit rating of A-/A3 and a minimum weighted-average credit rating of AA-/Aa3. We value these securities based on pricing from the Service, whose sources may use quoted prices in active markets for identical assets (Level 1 inputs) or inputs other than quoted prices that are observable either directly or indirectly (Level 2 inputs) in determining fair value, and accordingly, we classify all of our fixed income available-for-sale securities as Level 2. See Note 4 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 for more information regarding our available-for-sale investments.

We measure our cash flow hedges, which are classified as Prepaid expenses and other current assets and Accrued expenses and other current liabilities, at fair value based on indicative prices in active markets (Level 2 inputs).

Assets Measured at Fair Value on a Recurring Basis Using Significant Unobservable Inputs (Level 3)

We have invested in convertible debt securities of certain early-stage entities that are classified as available-for-sale investments. As quoted prices in active markets or other observable inputs were not available for these investments, in order to measure them at fair value, we utilized a discounted cash flow model using a discount rate reflecting the market risk inherent in holding securities of an early-stage enterprise, adjusted by the probability-weighted exit possibilities associated with the convertible debt securities. This methodology required us to make assumptions that were not directly or indirectly observable regarding the fair value of the convertible debt securities; accordingly they are a Level 3 valuation and included in the table below.

	Investments (in thousands)
Balance at December 31, 2013	\$10,291
Purchases of Level 3 securities	2,050
Proceeds received on Level 3 securities	(10,441)
Total net realized gains included in earnings	3,441
Transfers into Level 3	732
Balance at December 31, 2014	\$6,073

Transfers into Level 3 relate to certain of our investments in convertible debt securities of early-stage entities that were reclassified from cost method investments, which were previously included in Other assets in the accompanying consolidated

50

balance sheets. During the year ended December 31, 2014, two of the early-stage entities in which we held convertible debt securities were acquired and as a result of such sale transactions we recorded gains of \$3.9 million, which were included in Other (expense) income, net in the accompanying consolidated statements of income.

Assets Measured at Fair Value on a Non-recurring Basis Using Significant Unobservable Inputs (Level 3)

During 2014, certain cost method investments with a combined carrying value of \$8.3 million were determined to be impaired and have been written down to their fair values of zero, resulting in impairment charges of \$8.3 million.

During 2013, certain cost method investments with a combined carrying value of \$9.3 million were determined to be impaired and have been written down to their fair values of \$5.6 million resulting in impairment charges of \$3.7 million. The impairment charges are included in Other (expense) income, net in the accompanying consolidated financial statements for the years ended December 31, 2014 and 2013. In determining the fair value of cost method investments, we consider many factors including but not limited to operating performance of the investee, the amount of cash that the investee has on-hand, the ability to obtain additional financing and the overall market conditions in which the investee operates. The fair value of the cost method investment represents a Level 3 valuation as the assumptions used in valuing this investment were not directly or indirectly observable. See Note 4 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 for further information regarding cost method investments.

Additional Disclosures Regarding Fair Value Measurements

As of December 31, 2014, the fair value of the Convertible Notes, which was determined based on inputs that are observable in the market (Level 2) based on the closing trading price per \$100 as of the last day of trading for the year ended December 31, 2014, and carrying value of debt instruments (carrying value excludes the equity component of our Convertible Notes classified in equity) was as follows (in thousands):

	Fair Value	Carrying Value
Convertible Senior Notes	\$1,530,938	\$1,292,953

The carrying value of accounts receivable, accounts payable and accrued expenses and other current liabilities approximate their fair value due to the short maturity of these items.

Accounts Receivable, Net

	December 31,		2014
	2014	2013	Compared to 2013
	(In thousands)		
Accounts receivable	\$680,377	\$660,175	\$20,202
Allowance for returns	(2,185)	(2,062)	(123)
Allowance for doubtful accounts	(3,791)	(3,292)	(499)
Accounts receivable, net	\$674,401	\$654,821	\$19,580

The increase in accounts receivable at December 31, 2014 compared to December 31, 2013 was primarily due to an increase in sales, particularly in the last month of 2014 compared to the last month of 2013. The activity in our allowance for returns was comprised primarily of \$5.0 million of provisions for returns recorded during 2014, partially offset by \$4.9 million in credits issued for returns. The activity in our allowance for doubtful accounts was comprised primarily of \$2.9 million in provisions for doubtful accounts, partially offset by \$2.4 million of uncollectible accounts written off, net of recoveries.

From time to time, we could maintain individually significant accounts receivable balances from our distributors or customers, which are comprised of large business enterprises, governments and small and medium-sized businesses. If the financial condition of our distributors or customers deteriorates, our operating results could be adversely affected. At December 31, 2014, two distributors, the Arrow Group and Ingram Micro, accounted for 11% and 10% of gross accounts receivable, respectively. At December 31, 2013, one distributor, Ingram Micro, accounted for 10% of our accounts receivable. For more information regarding significant customers see Note 11 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014.

Stock Repurchase Program

Our Board of Directors authorized an ongoing stock repurchase program with a total repurchase authority granted to us of \$5.4 billion, of which \$1.5 billion was approved in April 2014. We may use the approved dollar authority to repurchase stock at any time until the approved amounts are exhausted. The objective of our stock repurchase program is to improve stockholders' returns. At December 31, 2014, approximately \$288.4 million was available to repurchase common stock pursuant to the stock repurchase program. All shares repurchased are recorded as treasury stock in our consolidated balance sheets included in this Annual Report on Form 10-K for the year ended December 31, 2014. A portion of the funds used to repurchase stock over the course of the program was provided by net proceeds from the Convertible Notes offering, as well as proceeds from employee stock option exercises and the related tax benefit. In April 2014, in connection with the \$1.5 billion increase in repurchase authority granted to us under our ongoing stock repurchase program, we used approximately \$101.0 million to purchase 1.7 million shares of our common stock from certain purchasers of the Convertible Notes in privately negotiated transactions concurrently with the closing of the Convertible Notes offering discussed above, and an additional \$1.4 billion to purchase additional shares of our common stock through our ASR with Citibank. Under the ASR agreement, we paid approximately \$1.4 billion to Citibank upon consummation of the ASR and received, in the aggregate, approximately 21.8 million shares of our common stock, including approximately 2.6 million shares delivered in October 2014 in final settlement in connection with Citibank's election to accelerate the ASR. The total number of shares of our common stock that we repurchased under the ASR Agreement was based on the average of the daily volume-weighted average prices of our common stock during the term of the ASR Agreement, less a discount.

See Note 12 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 for detailed information on our Convertible Notes offering and the transactions related thereto and Note 8 to our consolidated financial statement for detailed information on the ASR.

We are authorized to make open market purchases of our common stock using general corporate funds through open market purchases or pursuant to a Rule 10b5-1 plan.

During the year ended December 31, 2014, we expended approximately \$139.9 million on open market purchases under the stock repurchase program, repurchasing 2,046,400 shares of outstanding common stock at an average price of \$68.36.

During the year ended December 31, 2013, we expended approximately \$406.3 million on open market purchases, repurchasing 6,563,986 shares of outstanding common stock at an average price of \$61.90.

During the year ended December 31, 2012, we expended approximately \$251.0 million on open market purchases, repurchasing 3,550,817 shares of outstanding common stock at an average price of \$70.69.

Shares for Tax Withholding

During the years ended December 31, 2014, we withheld 560,239 shares, in 2013 we withheld 444,657 shares and in 2012, we withheld 269,745 shares from stock units that vested. Amounts withheld to satisfy minimum tax withholding obligations that arose on the vesting of stock unit awards was \$33.7 million for 2014, \$31.0 million for 2013 and \$20.2 million for 2012. These shares are reflected as treasury stock in our consolidated balance sheets included in this Annual Report on Form 10-K for the year ended December 31, 2014 and the related cash outlays reduce our total stock repurchase authority.

Contractual Obligations and Off-Balance Sheet Arrangement

Contractual Obligations

We have certain contractual obligations that are recorded as liabilities in our consolidated financial statements. Other items, such as operating lease obligations, are not recognized as liabilities in our consolidated financial statements, but are required to be disclosed in the notes to our consolidated financial statements.

The following table summarizes our significant contractual obligations at December 31, 2014 and the future periods in which such obligations are expected to be settled in cash. Additional details regarding these obligations are provided in the notes to our consolidated financial statements (in thousands):

	Payments due by period				
	Total	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
Operating lease obligations	\$401,180	\$55,678	\$93,781	\$69,926	\$ 181,795
Convertible senior notes ⁽¹⁾	1,437,500			1,437,500	
Purchase obligations ⁽²⁾	27,100	27,100	—	—	—
Total contractual obligations ⁽³⁾	\$ 1,865,780	\$82,778	\$93,781	\$ 1,507,426	\$ 181,795

During the second quarter of 2014, we completed a private placement of \$1.44 billion principal amount of 0.500% Convertible Senior Notes due 2019. The amount above represents the principal balance to be repaid. See Note 12 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 for detailed information on the Convertible Notes offering and the transactions related thereto.

Purchase obligations represent non-cancelable commitments to purchase inventory ordered before year-end of approximately \$10.7 million and a contingent obligation to purchase inventory, which is based on amount of usage, of approximately \$16.4 million.

Total contractual obligations do not include agreements where our commitment is variable in nature or where cancellations without payment provisions exist and excludes \$66.9 million of liabilities related to uncertain tax positions recorded in accordance with authoritative guidance, because we could not make reasonably reliable estimates of the period or amount of cash settlement with the respective taxing authorities. See Note 10 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014 for further information.

As of December 31, 2014, we did not have any individually material capital lease obligations or other material long-term commitments reflected on our consolidated balance sheets.

Off-Balance Sheet Arrangements

We do not have any special purpose entities or off-balance sheet financing arrangements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The following discussion about our market risk includes “forward-looking statements” that involve risks and uncertainties. Actual results could differ materially from those projected in the forward-looking statements. The analysis methods we used to assess and mitigate risk discussed below should not be considered projections of future events, gains or losses.

We are exposed to financial market risks, including changes in foreign currency exchange rates and interest rates that could adversely affect our results of operations or financial condition. To mitigate foreign currency risk, we utilize derivative financial instruments. The counterparties to our derivative instruments are major financial institutions. All of the potential changes noted below are based on sensitivity analyses performed on our financial position as of December 31, 2014. Actual results could differ materially.

Discussions of our accounting policies for derivatives and hedging activities are included in Notes 2 and 14 to our consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2014.

Exposure to Exchange Rates

A substantial majority of our overseas expense and capital purchasing activities are transacted in local currencies, including Euros, British pounds sterling, Japanese yen, Australian dollars, Swiss francs, Indian rupees, Hong Kong dollars, Canadian dollars, Singapore dollars and Chinese renminbi. To reduce the volatility of future cash flows caused by changes in currency exchange rates, we have established a hedging program. We use foreign currency forward contracts to hedge certain forecasted foreign currency expenditures. Our hedging program significantly reduces, but does not entirely eliminate, the impact of currency exchange rate movements.

At December 31, 2014 and 2013, we had in place foreign currency forward sale contracts with a notional amount of \$60.9 million and \$49.7 million, respectively, and foreign currency forward purchase contracts with a notional amount of \$209.2 million and \$210.7 million, respectively. At December 31, 2014, these contracts had an aggregate fair value liability of \$8.5 million and at December 31, 2013, these contracts had an aggregate fair value asset of \$3.2 million. Based on a hypothetical 10% appreciation of the U.S. dollar from December 31, 2014 market rates, the fair value of our foreign currency forward contracts would decrease by \$14.0 million. Conversely, a hypothetical 10% depreciation of the U.S. dollar from December 31, 2014 market rates would increase the fair value of our foreign currency forward contracts by \$14.0 million, resulting in a net asset position. In these hypothetical movements, foreign operating costs would move in the opposite direction. This calculation assumes that each exchange rate would change in the same direction relative to the U.S. dollar. In addition to the direct effects of changes in exchange rates quantified above, changes in exchange rates could also change the dollar value of sales and affect the volume of sales as the prices of our competitors’ products become more or less attractive. We do not anticipate any material adverse impact to our consolidated financial position, results of operations, or cash flows as a result of these foreign exchange forward contracts.

Exposure to Interest Rates

We have interest rate exposures resulting from our interest-based available-for-sale investments. We maintain available-for-sale investments in debt securities and we limit the amount of credit exposure to any one issuer or type of instrument. The securities in our investment portfolio are not leveraged. The securities classified as available-for-sale are subject to interest rate risk. The modeling technique used measures the change in fair values arising from an immediate hypothetical shift in market interest rates and assumes that ending fair values include principal plus accrued interest and reinvestment income. If market interest rates were to increase by 100 basis points from December 31, 2014 and 2013 levels, the fair value of the available-for-sale portfolio would decline by approximately \$15.9 million and \$13.2 million, respectively. If market interest rates were to decrease by 100 basis points from December 31, 2014 and 2013 levels, the fair value of the available-for-sale portfolio would increase by approximately \$11.0 million and \$8.0 million, respectively. These amounts are determined by considering the impact of the hypothetical interest rate movements on our available-for-sale and trading investment portfolios. This analysis does not consider the effect of credit risk as a result of the changes in overall economic activity that could exist in such an environment.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Our consolidated financial statements and related financial statement schedule, together with the report of independent registered public accounting firm, appear at pages F-1 through F-41 of this Annual Report on Form 10-K for the year ended December 31, 2014.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

There have been no changes in or disagreements with our independent registered public accountants on accounting or financial disclosure matters during our two most recent fiscal years.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of December 31, 2014, our management, with the participation of our President and Chief Executive Officer and our Executive Vice President, Chief Operating Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15(b) promulgated under the Securities Exchange Act of 1934, as amended, or the Exchange Act. Based upon that evaluation, our President and Chief Executive Officer and our Executive Vice President, Chief Operating Officer and Chief Financial Officer concluded that, as of December 31, 2014, our disclosure controls and procedures were effective in ensuring that material information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, including ensuring that such material information is accumulated and communicated to our management, including our President and Chief Executive Officer and our Executive Vice President, Chief Operating Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

During the quarter ended December 31, 2014, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Exchange Act Rule 13a – 15(f). Our internal control system was designed to provide reasonable assurance to our management and the Board of Directors regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2014. In making this assessment, our management used the criteria set forth in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013, or the COSO criteria. Based on our assessment we believe that, as of December 31, 2014, our internal control over financial reporting is effective based on those criteria. The effectiveness of our internal control over financial reporting as of December 31, 2014 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report which appears below.

Report of Independent Registered Public Accounting Firm
The Board of Directors and Stockholders of Citrix Systems, Inc.

We have audited Citrix Systems, Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). Citrix Systems, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Citrix Systems, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Citrix Systems, Inc. as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2014 and our report dated February 19, 2015 expressed an unqualified opinion thereon.

CITRIX SYSTEMS, INC.

List of Financial Statements and Financial Statement Schedule

The following consolidated financial statements of Citrix Systems, Inc. are included in Item 8:

Report of Independent Registered Public Accounting Firm	F- <u>2</u>
<u>Consolidated</u> Balance Sheets — December 31, 2014 and 2013	F- <u>3</u>
<u>Consolidated</u> Statements of Income — Years ended December 31, 2014, 2013 and 2012	F- <u>4</u>
<u>Consolidated</u> Statements of Comprehensive Income — Years ended December 31, 2014, 2013 and 2012	F- <u>5</u>
<u>Consolidated</u> Statements of Equity — Years ended December 31, 2014, 2013 and 2012	F- <u>6</u>
<u>Consolidated</u> Statements of Cash Flows — Years ended December 31, 2014, 2013 and 2012	F- <u>7</u>
<u>Notes to Consolidated Financial Statements</u>	F- <u>8</u>

The following consolidated financial statement schedule of Citrix Systems, Inc. is included in Item 15(a):

Schedule II Valuation and Qualifying Accounts

All other schedules for which provision is made in the applicable accounting regulation of the Securities and Exchange Commission are not required under the related instructions or are inapplicable and therefore have been omitted.

Report of Independent Registered Public Accounting Firm
The Board of Directors and Stockholders of Citrix Systems, Inc.

We have audited the accompanying consolidated balance sheets of Citrix Systems, Inc. as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2014. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Citrix Systems, Inc. at December 31, 2014 and 2013, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Citrix Systems Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 19, 2015 expressed an unqualified opinion thereon.

CITRIX SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. ORGANIZATION

Citrix Systems, Inc. ("Citrix" or the "Company"), is a Delaware corporation founded on April 17, 1989. Citrix is leading the transition to software-defining the workplace, uniting virtualization, mobility management, networking and SaaS solutions to enable new ways for businesses and people to work better. Citrix solutions power business mobility through secure, mobile workspaces that provide people with instant access to apps, desktops, data and communications on any device, over any network or cloud.

Citrix markets and licenses its products directly to customers, over the Web, and through systems integrators ("SIs"), in addition to indirectly through value-added resellers ("VARs"), value-added distributors ("VADs"), original equipment manufacturers ("OEMs"), and service providers.

The Company's revenues are derived from its Enterprise and Service Provider products, which primarily include its Workspace Services (formerly Mobile and Desktop) products, Delivery Networking (formerly Networking and Cloud) products and related license updates and maintenance and professional services and from its Mobility Apps (formerly Software as a Service ("SaaS")) products, which primarily include Communications Cloud, Documents Cloud and Workflow Cloud products. Enterprise and Service Provider and Mobility Apps constitute the Company's two reportable segments. See Note 11 for more information on the Company's segments.

2. SIGNIFICANT ACCOUNTING POLICIES

Consolidation Policy

The consolidated financial statements of the Company include the accounts of its wholly-owned subsidiaries in the Americas, Europe, the Middle East and Africa ("EMEA") and Asia-Pacific. All significant transactions and balances between the Company and its subsidiaries have been eliminated in consolidation.

Cash and Cash Equivalents

Cash and cash equivalents at December 31, 2014 and 2013 include marketable securities, which are primarily money market funds, commercial paper, agency, and government securities, municipal securities and corporate securities with initial or remaining contractual maturities when purchased of three months or less.

Investments

Short-term and long-term investments at December 31, 2014 and 2013 primarily consist of agency securities, corporate securities, municipal securities and government securities. Investments classified as available-for-sale are stated at fair value with unrealized gains and losses, net of taxes, reported in Accumulated other comprehensive (loss) income. The Company classifies its available-for-sale investments as current and non-current based on their actual remaining time to maturity. The Company does not recognize changes in the fair value of its available-for-sale investments in income unless a decline in value is considered other-than-temporary in accordance with the authoritative guidance.

The Company's investment policy is designed to limit exposure to any one issuer depending on credit quality. The Company uses information provided by third parties to adjust the carrying value of certain of its investments to fair value at the end of each period. Fair values are based on a variety of inputs and may include interest rates, known historical trades, yield curve information, benchmark data, prepayment speeds, credit quality and broker/dealer quotes. See Note 4 for investment information.

Accounts Receivable

The Company's accounts receivable are attributable primarily to VARs, VADs and end customers. Collateral is generally not required. The Company also maintains allowances for doubtful accounts for estimated losses resulting from the inability of the Company's customers to make payments which includes both general and specific reserves. The Company periodically reviews these estimated allowances by conducting an analysis of the customer's payment history and creditworthiness, the age of the trade receivable balances and current economic conditions that may affect a customer's ability to make payments. Based on this review, the Company specifically reserves for those accounts deemed uncollectible. When receivables are determined to be uncollectible, principal amounts of such receivables outstanding are deducted from the allowance. The allowance for doubtful accounts was \$3.8 million and \$3.3 million as of December 31, 2014 and 2013, respectively. If the financial condition of a significant distributor or customer

were to deteriorate, the Company's operating results could be adversely affected. As of December 31, 2014, two distributors, the Arrow Group and Ingram Micro, accounted for 11% and 10% of gross accounts

F- 8

receivable, respectively. As of December 31, 2013, one distributor, Ingram Micro, accounted for 10% of gross accounts receivable.

Inventory

Inventories are stated at the lower of cost or market on a standard cost basis, which approximates actual cost. The Company's inventories primarily consist of finished goods as of December 31, 2014 and 2013.

Property and Equipment

Property and equipment is stated at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, which is generally three years for computer equipment and software, the lesser of the lease term or ten years for leasehold improvements, which is the estimated useful life, seven years for office equipment and furniture and the Company's enterprise resource planning system and 40 years for buildings.

During 2014 and 2013, the Company retired \$11.4 million and \$10.3 million, respectively, in property and equipment that were no longer in use. At the time of retirement, the remaining net book value of these assets was not material and no material asset retirement obligations were associated with them.

Property and equipment consist of the following:

	December 31, 2014	2013
	(In thousands)	
Buildings	\$85,092	\$85,092
Computer equipment	237,709	204,110
Software	392,009	316,902
Equipment and furniture	117,555	105,145
Leasehold improvements	211,625	168,990
	1,043,990	880,239
Less accumulated depreciation and amortization	(722,691) (597,268
Assets under construction	18,893	28,438
Land	27,587	27,587
Total	\$367,779	\$338,996

Long-Lived Assets

The Company reviews for impairment of long-lived assets and certain identifiable intangible assets to be held and used whenever events or changes in circumstances indicate that the carrying amount of such assets may not be fully recoverable. Determination of recoverability is based on an estimate of undiscounted future cash flows resulting from the use of the asset and its eventual disposition. Measurement of an impairment loss is based on the fair value of the asset compared to its carrying value. Long-lived assets and certain identifiable intangible assets to be disposed of are reported at the lower of carrying amount or fair value less costs to sell.

For the year ended December 31, 2014, the Company identified certain intangible assets that were impaired within our Enterprise and Service Provider division and recorded non-cash impairment charges of \$59.3 million. This non-recurring fair value measurement was categorized as Level 3, as significant unobservable inputs were used in the valuation analysis. The impairment charge is included in Amortization of product related intangible assets and Amortization of other intangible assets in the accompanying consolidated statements of income. During 2013, the Company did not recognize any impairment charges associated with its intangible assets. See Note 3 for more information regarding the Company's acquisitions and Note 5 for more information regarding fair value measurements.

Goodwill

The Company accounts for goodwill in accordance with the authoritative guidance, which requires that goodwill and certain intangible assets are not amortized, but are subject to an annual impairment test. There was no impairment of goodwill or indefinite lived intangible assets as a result of the annual impairment tests analyses completed during the fourth quarters of 2014 and 2013, respectively. The authoritative guidance provides entities with an option to perform a qualitative assessment to determine whether further quantitative impairment testing is necessary. The Company

performed the qualitative assessment when it performed its goodwill impairment test in the fourth quarter of 2014. As a result of the qualitative analysis, no further

9

CITRIX SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

quantitative impairment test was deemed necessary. See Note 3 for acquisition information and Note 11 for segment information.

The following table presents the change in goodwill allocated to the Company's reportable segments during 2014 and 2013 (in thousands):

	Balance at January 1, 2014	Additions	Other		Balance at December 31, 2014	Balance at January 1, 2013	Additions	Other		Balance at December 31, 2013
Enterprise and Service Provider division	\$ 1,402,156	\$ 30,317	\$ 1,896	(2)	\$ 1,434,369	\$ 1,158,580	\$ 248,800	\$(5,224)	(4)	\$ 1,402,156
Mobility Apps division	366,793	10,694	(15,005)	(3)	362,482	359,639	2,668	4,486	(3)	366,793
Consolidated	\$ 1,768,949	\$ 41,011	\$(13,109)	(1)	\$ 1,796,851	\$ 1,518,219	\$ 251,468	\$(738)	(1)	\$ 1,768,949

(1) Amount primarily relates to 2014 acquisitions. See Note 3 for more information regarding the Company's acquisitions.

(2) Amount primarily relates to adjustments to purchase price allocations for certain 2013 Acquisitions.

(3) Amount primarily relates to foreign currency translation.

(4) Amount primarily relates to adjustments to purchase price allocations for certain 2012 Acquisitions.

Intangible Assets

The Company has intangible assets which were primarily acquired in conjunction with business combinations and technology purchases. Intangible assets with finite lives are recorded at cost, less accumulated amortization. Amortization is recognized on a straight-line basis over the estimated useful lives of the respective assets, generally three to seven years, except for patents, which are amortized over the lesser of their remaining life or ten years. In accordance with the authoritative guidance, the Company records acquired product related intangible assets at net realizable value and reviews this technology for impairment on a periodic basis by comparing the estimated net realizable value to the unamortized cost of the technology. In-process R&D is initially capitalized at fair value as an intangible asset with an indefinite life and assessed for impairment thereafter. When in-process R&D projects are completed, the corresponding amount is reclassified as an amortizable intangible asset and is amortized over the asset's estimated useful life.

Intangible assets consist of the following (in thousands):

	December 31, 2014		
	Gross Carrying Amount	Accumulated Amortization	Weighted-Average Life (Years)
Product related intangible assets	\$ 618,336	\$ 454,830	5.58
Other	492,960	265,749	7.58
Total	\$ 1,111,296	\$ 720,579	6.47
	December 31, 2013		
	Gross Carrying Amount	Accumulated Amortization	Weighted-Average Life (Years)
Product related intangible assets	\$ 677,509	\$ 428,418	5.60
Other	482,918	222,414	7.52
Total	\$ 1,160,427	\$ 650,832	6.38

Other intangible assets consist primarily of customer relationships, trade names, covenants not to compete and patents. Amortization of product related intangible assets includes amortization of product related technologies and patents and is reported as a Cost of net revenues in the accompanying consolidated statements of income. Amortization of other intangible assets includes amortization of customer relationships, trade names and covenants not to compete and

is reported as an Operating expense in the accompanying consolidated statements of income.

F- 10

CITRIX SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Estimated future amortization expense of intangible assets with finite lives is as follows (in thousands):

Year ending December 31,	
2015	\$ 100,286
2016	85,000
2017	64,220
2018	53,854
2019	34,305
Thereafter	53,052
Total	\$ 390,717

Software Development Costs

The authoritative guidance requires certain internal software development costs related to software to be sold to be capitalized upon the establishment of technological feasibility. The Company's software development costs incurred subsequent to achieving technological feasibility have not been significant and substantially all software development costs have been expensed as incurred.

Internal Use Software

In accordance with the authoritative guidance, the Company capitalizes external direct costs of materials and services and internal costs such as payroll and benefits of those employees directly associated with the development of new functionality in internal use software and software developed related to its Mobility Apps products. The amount of costs capitalized in 2014 and 2013 relating to internal use software was \$79.1 million and \$62.7 million, respectively. These costs are being amortized over the estimated useful life of the software, which is generally three to seven years, and are included in property and equipment in the accompanying consolidated balance sheets. The total amounts charged to expense relating to internal use software was approximately \$66.8 million, \$58.6 million and \$44.5 million, during the years ended December 31, 2014, 2013 and 2012, respectively.

Revenue Recognition

Net revenues include the following categories: Product and licenses, SaaS from the Mobility Apps division, License updates and maintenance and Professional services. Product and licenses revenues primarily represent fees related to the licensing of the Company's software and hardware appliance products. These revenues are reflected net of sales allowances, cooperative advertising agreements, partner incentive programs and provisions for returns. Shipping charges billed to customers are included in Product and license revenue and the related shipping costs are included in Cost of product and license revenue. SaaS revenues consist primarily of fees related to online service agreements, which are recognized ratably over the contract term, which is typically 12 months. In addition, SaaS revenues may also include set-up fees, which are recognized ratably over the contract term or the expected customer life, whichever is longer. License updates and maintenance revenues consist of fees related to the Subscription Advantage program and maintenance fees, which include technical support and hardware and software maintenance. The Company licenses many of its virtualization products bundled with a one-year contract for its Subscription Advantage program. Subscription Advantage is a renewable program that provides subscribers with immediate access to software upgrades, enhancements and maintenance releases when and if they become available during the term of the contract. Subscription Advantage and maintenance fees are recognized ratably over the term of the contract, which is typically 12 to 24 months. The Company capitalizes certain third-party commissions related to Subscription Advantage, maintenance and support renewals. The capitalized commissions are amortized to Sales, marketing and services expense at the time the related deferred revenue is recognized as revenue. Hardware and software maintenance and support contracts are typically sold separately. Hardware maintenance includes technical support, the latest software upgrades and replacement of malfunctioning appliances. Dedicated account management is available as an add-on to the program for a higher level of service. Software maintenance includes unlimited support with product version upgrades. Professional services revenues are comprised of fees from consulting services related to the implementation of the Company's products and fees from product training and certification, which are recognized as the services are provided.

The Company recognizes revenue when it is earned and when all of the following criteria are met: persuasive evidence of the arrangement exists; delivery has occurred or the service has been provided and the Company has no remaining obligations; the fee is fixed or determinable; and collectability is probable. The Company defines these four criteria as follows:

F- 11

CITRIX SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Persuasive evidence of the arrangement exists. Evidence of an arrangement generally consists of a purchase order issued pursuant to the terms and conditions of a distributor, reseller or end user agreement. For SaaS, the Company generally requires the customer or the reseller to electronically accept the terms of an online services agreement or execute a contract.

Delivery has occurred and the Company has no remaining obligations. The Company considers delivery of licenses under electronic licensing agreements to have occurred when the related products are shipped and the end-user has been electronically provided the software activation keys that allow the end-user to take immediate possession of the product. For hardware appliance sales, the Company's standard delivery method is free-on-board shipping point. Consequently, it considers delivery of appliances to have occurred when they are shipped pursuant to an agreement and purchase order. For SaaS, delivery occurs upon providing the users with their login id and password. For product training and consulting services, the Company fulfills its obligation when the services are performed. For license updates and maintenance, the Company assumes that its obligation is satisfied ratably over the respective terms of the agreements, which are typically 12 to 24 months. For SaaS, the Company assumes that its obligation is satisfied ratably over the respective terms of the agreements, which are typically 12 months.

The fee is fixed or determinable. In the normal course of business, the Company does not provide customers the right to a refund of any portion of their license fees or extended payment terms. The fees are considered fixed or determinable upon establishment of an arrangement that contains the final terms of the sale including description, quantity and price of each product or service purchased. For SaaS, the fee is considered fixed or determinable if it is not subject to refund or adjustment.

Collectability is probable. The Company assesses collectability based primarily on the creditworthiness of the customer. Management's judgment is required in assessing the probability of collection, which is generally based on an evaluation of customer specific information, historical experience and economic market conditions. If the Company determines from the outset of an arrangement that collectability is not probable, revenue recognition is deferred until customer payment is received and the other parameters of revenue recognition described above have been achieved.

The majority of the Company's product and license revenue consists of revenue from the sale of software products. Software sales generally include a perpetual license to the Company's software and is subject to the industry specific software revenue recognition guidance. In accordance with this guidance, the Company allocates revenue to license updates related to its stand-alone software and any other undelivered elements of the arrangement based on vendor specific objective evidence ("VSOE") of fair value of each element and such amounts are deferred until the applicable delivery criteria and other revenue recognition criteria described above have been met. The balance of the revenues, net of any discounts inherent in the arrangement, is recognized at the outset of the arrangement using the residual method as the product licenses are delivered. If management cannot objectively determine the fair value of each undelivered element based on VSOE of fair value, revenue recognition is deferred until all elements are delivered, all services have been performed, or until fair value can be objectively determined.

For hardware appliance and software transactions, the arrangement consideration is allocated to stand-alone software deliverables as a group and the non-software deliverables based on the relative selling prices using the selling price hierarchy in the revenue recognition guidance. The selling price hierarchy for a deliverable is based on its VSOE if available, third-party evidence of selling price ("TPE") if VSOE is not available, or estimated selling price ("ESP") if neither VSOE nor TPE is available. The Company then recognizes revenue on each deliverable in accordance with its policies for product and service revenue recognition. VSOE of selling price is based on the price charged when the element is sold separately. In determining VSOE, the Company requires that a substantial majority of the selling prices fall within a reasonable range based on historical discounting trends for specific products and services. TPE of selling price is established by evaluating competitor products or services in stand-alone sales to similarly situated customers. However, as the Company's products contain a significant element of proprietary technology and its solutions offer substantially different features and functionality, the comparable pricing of products with similar functionality typically cannot be obtained. Additionally, as the Company is unable to reliably determine what

competitors products' selling prices are on a stand-alone basis, the Company is not typically able to determine TPE. The estimate of selling price is established considering multiple factors including, but not limited to, pricing practices in different geographies and through different sales channels and competitor pricing strategies. For the Company's non-software transactions, it allocates the arrangement consideration based on the relative selling price of the deliverables. For the Company's hardware appliances, it uses ESP as its selling price. For the Company's support and services, it generally uses VSOE as its selling price. When the Company is unable to establish selling price using VSOE for its support and services, the Company uses ESP in its allocation of arrangement consideration.

F- 12

CITRIX SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company's Mobility Apps products are considered hosted service arrangements per the authoritative guidance; accordingly, the Company follows the provisions of Securities and Exchange Commission Staff Accounting Bulletin ("SAB") No. 104, Revenue Recognition, when accounting for these service arrangements. Generally, the Company's Mobility Apps products are sold separately and not bundled with the Enterprise and Service Provider division's products and services.

In the normal course of business, the Company is not obligated to accept product returns from its distributors under any conditions, unless the product item is defective in manufacture. The Company establishes provisions for estimated returns, as well as other sales allowances, concurrently with the recognition of revenue. The provisions are established based upon consideration of a variety of factors, including, among other things, recent and historical return rates for both specific products and distributors and the impact of any new product releases and projected economic conditions. Product returns are provided for in the consolidated financial statements and have historically been within management's expectations. Allowances for estimated product returns amounted to approximately \$2.2 million and \$2.1 million at December 31, 2014 and December 31, 2013, respectively. The Company also records estimated reductions to revenue for customer programs and incentive offerings including volume-based incentives. The Company could take actions to increase its customer incentive offerings, which could result in an incremental reduction to revenue at the time the incentive is offered.

Product Concentration

The Company derives a substantial portion of its revenues from its Workspace Services solutions, which include its XenDesktop and XenApp products and related services, and anticipates that these products and future derivative products and product lines based upon this technology will continue to constitute a majority of its revenue. The Company could experience declines in demand for its Workspace Services solutions and other products, whether as a result of general economic conditions, the delay or reduction in technology purchases, new competitive product releases, price competition, lack of success of its strategic partners, technological change or other factors.

Cost of Net Revenues

Cost of product and license revenues consists primarily of hardware, product media and duplication, manuals, packaging materials, shipping expense and server capacity costs. In addition, the Company is a party to licensing agreements with various entities, which give the Company the right to use certain software code in its products or in the development of future products in exchange for the payment of fixed fees or amounts based upon the sales of the related product. The licensing agreements generally have terms ranging from one to five years, and generally include renewal options. However, some agreements are perpetual unless expressly terminated. Royalties and other costs related to these agreements are included in cost of net revenues. Cost of services and maintenance revenue consists primarily of compensation and other personnel-related costs of providing technical support and consulting, as well as the Company's Mobility Apps products. Also included in cost of net revenues is amortization of product related intangible assets which includes acquired core and product technology and associated patents.

Foreign Currency

The functional currency for all of the Company's wholly-owned foreign subsidiaries in its Enterprise and Service Provider division is the U.S. dollar. Monetary assets and liabilities of such subsidiaries are remeasured into U.S. dollars at exchange rates in effect at the balance sheet date, and revenues and expenses are remeasured at average rates prevailing during the year. The functional currency of the Company's wholly-owned foreign subsidiaries of its Mobility Apps division is the currency of the country in which each subsidiary is located. The Company translates assets and liabilities of these foreign subsidiaries at exchange rates in effect at the balance sheet date. The Company includes accumulated net translation adjustments in equity as a component of Accumulated other comprehensive (loss) income. Foreign currency transaction gains and losses are the result of exchange rate changes on transactions denominated in currencies other than the functional currency, including U.S. dollars. The remeasurement of those foreign currency transactions is included in determining net income or loss for the period of exchange.

Remeasurement and foreign currency transaction losses of approximately \$7.7 million, \$4.9 million and \$3.3 million for the years ended December 31, 2014, 2013, and 2012, respectively, are included in Other (expense) income, net, in the accompanying consolidated statements of income. Effective in January 2015, the functional currency of the

Company's wholly-owned foreign subsidiaries of its Mobility Apps division became the U.S. dollar as a result of a reorganization in the foreign subsidiaries' operations.

Derivatives and Hedging Activities

In accordance with the authoritative guidance, the Company records derivatives at fair value as either assets or liabilities on the balance sheet. For derivatives that are designated as and qualify as effective cash flow hedges, the portion of gain or loss on the derivative instrument effective at offsetting changes in the hedged item is reported as a component of Accumulated other

F- 13

comprehensive (loss) income and reclassified into earnings as operating expense, net, when the hedged transaction affects earnings. Derivatives not designated as hedging instruments are adjusted to fair value through earnings as Other (expense) income, net, in the period during which changes in fair value occur. The application of the authoritative guidance could impact the volatility of earnings.

The Company formally documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. This process includes attributing all derivatives that are designated as cash flow hedges to floating rate assets or liabilities or forecasted transactions. The Company also formally assesses, both at the inception of the hedge and on an ongoing basis, whether each derivative is highly effective in offsetting changes in cash flows of the hedged item. Fluctuations in the value of the derivative instruments are generally offset by changes in the hedged item; however, if it is determined that a derivative is not highly effective as a hedge or if a derivative ceases to be a highly effective hedge, the Company will discontinue hedge accounting prospectively for the affected derivative.

The Company is exposed to risk of default by its hedging counterparties. Although this risk is concentrated among a limited number of counterparties, the Company's foreign exchange hedging policy attempts to minimize this risk by placing limits on the amount of exposure that may exist with any single financial institution at a time.

Pension Liability

The Company provides retirement benefits to certain employees who are not U.S. based. Generally, benefits under these programs are based on an employee's length of service and level of compensation. The majority of these programs are commonly referred to as termination indemnities, which provide retirement benefits in accordance with programs mandated by the governments of the countries in which such employees work.

The Company had accrued \$15.6 million and \$9.2 million for these pension liabilities at December 31, 2014 and 2013, respectively. Expenses for the programs for 2014, 2013 and 2012 amounted to \$3.2 million, \$3.5 million and \$1.5 million, respectively.

Advertising Costs

The Company expenses advertising costs as incurred. The Company has advertising agreements with, and purchases advertising from, online media providers to advertise its products. The Company also has cooperative advertising agreements with certain distributors and resellers whereby the Company will reimburse distributors and resellers for qualified advertising of Company products. Reimbursement is made once the distributor, reseller or provider provides substantiation of qualified expenses. The Company estimates the impact of these expenses and recognizes them at the time of product sales as a reduction of net revenue in the accompanying consolidated statements of income. The total costs the Company recognized related to advertising were approximately \$150.1 million, \$146.5 million and \$137.5 million, during the years ended December 31, 2014, 2013 and 2012, respectively.

Income Taxes

The Company and one or more of its subsidiaries is subject to United States federal income taxes, as well as income taxes of multiple state and foreign jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years prior to 2011.

In the ordinary course of global business, there are transactions for which the ultimate tax outcome is uncertain; thus, judgment is required in determining the worldwide provision for income taxes. The Company provides for income taxes on transactions based on its estimate of the probable liability. The Company adjusts its provision as appropriate for changes that impact its underlying judgments. Changes that impact provision estimates include such items as jurisdictional interpretations on tax filing positions based on the results of tax audits and general tax authority rulings. Due to the evolving nature of tax rules combined with the large number of jurisdictions in which the Company operates, estimates of its tax liability and the realizability of its deferred tax assets could change in the future, which may result in additional tax liabilities and adversely affect the Company's results of operations, financial condition and cash flows.

The Company is required to estimate its income taxes in each of the jurisdictions in which it operates as part of the process of preparing its consolidated financial statements. The authoritative guidance requires a valuation allowance to reduce the deferred tax assets reported if, based on the weight of the evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. The Company reviews deferred tax assets periodically for

recoverability and makes estimates and judgments regarding the expected geographic sources of taxable income and gains from investments, as well as tax planning strategies in assessing the need for a valuation allowance.

F- 14

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Significant estimates made by management include the provision for doubtful accounts receivable, the provision to reduce obsolete or excess inventory to market, the provision for estimated returns, as well as sales allowances, the assumptions used in the valuation of stock-based awards, the assumptions used in the discounted cash flows to mark certain of its investments to market, the valuation of the Company's goodwill, net realizable value of product related and other intangible assets, the fair value of convertible senior notes, the provision for vacant facility costs, the provision for income taxes and the amortization and depreciation periods for intangible and long-lived assets. While the Company believes that such estimates are fair when considered in conjunction with the consolidated financial position and results of operations taken as a whole, the actual amounts of such items, when known, will vary from these estimates.

Accounting for Stock-Based Compensation Plans

The Company has various stock-based compensation plans for its employees and outside directors and accounts for stock-based compensation arrangements in accordance with the authoritative guidance, which requires the Company to measure and record compensation expense in its consolidated financial statements using a fair value method. See Note 7 for further information regarding the Company's stock-based compensation plans.

Earnings per Share

Basic earnings per share is calculated by dividing income available to stockholders by the weighted-average number of common shares outstanding during each period. Diluted earnings per share is computed using the weighted average number of common and dilutive common share equivalents outstanding during the period. Dilutive common share equivalents consist of shares issuable upon the vesting or exercise of stock awards (calculated using the treasury stock method) during the period they were outstanding. Certain shares under the Company's stock-based compensation programs were excluded from the computation of diluted earnings per share due to their anti-dilutive effect for the respective periods in which they were outstanding. The reconciliation of the numerator and denominator of the earnings per share calculation is presented in Note 15.

Reclassifications

Certain reclassifications of the prior years' amounts have been made to conform to the current year's presentation.

3. ACQUISITIONS

2014 Acquisitions

Framehawk

In January 2014, the Company acquired all of the issued and outstanding securities of Framehawk, Inc. ("Framehawk"). The Framehawk solution, which optimizes the delivery of virtual desktops and applications to mobile devices, was combined with Citrix HDX technology in the Citrix XenApp and XenDesktop products to deliver an improved user experience under adverse network conditions. Framehawk became part of the Company's Enterprise and Service Provider division. The total consideration for this transaction was approximately \$24.2 million, net of \$0.2 million of cash acquired, and was paid in cash. Transaction costs associated with the acquisition were approximately \$0.1 million, all of which the Company expensed during the year ended December 31, 2014 and are included in General and administrative expense in the accompanying consolidated statements of income.

RightSignature

In October 2014, the Company acquired all of the membership interests of RightSignature, LLC. ("RightSignature"). The RightSignature technology will expand the Documents Cloud beyond storage and file transfer to supporting e-signature and approval workflows. RightSignature became a part of the Company's Mobility Apps division. The total consideration for this transaction was approximately \$37.8 million, net of \$1.1 million of cash acquired, and was paid in cash. Transaction costs associated with the acquisition were approximately \$0.2 million, all of which the Company expensed during the year ended December 31, 2014 and are included in General and administrative expense in the accompanying consolidated statements of income. In addition, in connection with the acquisition, the Company assumed non-vested stock units which were converted into the right to receive, in the aggregate, up to 67,500 of the

Company's common stock, for which the vesting period began on the closing of the transaction.

F- 15

CITRIX SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

2014 Other Acquisitions

During the second quarter of 2014, the Company acquired all of the issued and outstanding securities of a privately-held company. This business became part of the Company's Enterprise and Service Provider division. The total cash consideration for this transaction was approximately \$17.2 million, net of \$0.8 million of cash acquired. Transaction costs associated with the acquisition were approximately \$0.1 million, all of which the Company expensed during the year ended December 31, 2014 and are included in General and administrative expense in the accompanying consolidated statements of income.

In the fourth quarter of 2014 the Company acquired all of the issued and outstanding securities of two privately-held companies for total cash consideration of approximately \$19.9 million, net of \$0.2 million of cash acquired. The businesses became part of the Company's Enterprise and Service Provider division. In addition, in connection with one of the acquisitions, the Company assumed non-vested stock units which were converted into the right to receive, in the aggregate, up to 23,430 shares of the Company's common stock, for which the vesting period began on the closing of the transaction. Transaction costs associated with the acquisitions were not significant.

Purchase Accounting for the Acquisitions in 2014

The purchase prices for the companies acquired during the year ended December 31, 2014, which include Framehawk, RightSignature and the 2014 Other Acquisitions (collectively, the "2014 Acquisitions"), were allocated to the respective acquired company's net tangible and intangible assets based on their estimated fair values as of the date of the acquisition. The allocations of the total purchase prices are summarized below (in thousands):

	Framehawk		RightSignature		2014 Other Acquisitions	
	Purchase		Purchase		Purchase	
	Price	Asset Life	Price	Asset Life	Price	Asset Life
	Allocation		Allocation		Allocation	
Current assets	\$569		\$1,305		\$1,423	
Other assets	—		—		21	
Property and equipment	36	Various	—		48	Various
Deferred tax assets, non-current	2,963		—		3,128	
Intangible assets	14,000	7.0 years	27,765	3-10 years	19,200	Various
Goodwill	11,917	Indefinite	10,694	Indefinite	18,344	Indefinite
Assets acquired	29,485		39,764		42,164	
Current liabilities assumed	(748)		(826)		(2,351)	
Long-term liabilities assumed	(3,766)		(5)		—	
Deferred tax liabilities, non-current	(564)		—		(1,667)	
Net assets acquired	\$24,407		\$38,933		\$38,146	

Current assets acquired in connection with the 2014 Acquisitions consisted primarily of cash, accounts receivable and other short-term assets. Current liabilities assumed in connection with the 2014 Acquisitions consisted primarily of short-term payables and other accrued expenses. Long-term liabilities assumed in connection with the 2014 Acquisitions consisted of long-term debt, which was paid in full subsequent to the respective acquisition date.

Goodwill from the 2014 Acquisitions was assigned to the Enterprise and Service Provider and Mobility Apps division segments. The goodwill related to the 2014 Acquisitions is not deductible for tax purposes. See Note 11 for segment information. The goodwill amounts are comprised primarily of expected synergies from combining operations and other intangible assets that do not qualify for separate recognition.

Revenues from the 2014 Acquisitions are included in the revenues of each business's respective segment. The Company has included the effect of the 2014 Acquisitions in its results of operations prospectively from the date of acquisition. The effect of the 2014 Acquisitions was not material to the Company's consolidated results for the periods presented, accordingly, proforma financial disclosures have not been presented.

CITRIX SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Identifiable intangible assets acquired in connection with the 2014 Acquisitions (in thousands) and the weighted-average lives are as follows:

	Framehawk	Asset Life	Right Signature	Asset Life	2014 Other Acquisitions	Asset Life
Core and product technologies	\$14,000	7.0 years	\$16,900	5.0 years	\$14,200	5.0 years
Trade names and trademarks	—		2,465	10.0 years	—	
Customer relationships	—		6,200	5.0 years	—	
Non-compete agreements	—		2,200	3.0 years	—	
In-process R&D	—		—		5,000	Indefinite
Total	\$14,000		\$27,765		\$19,200	

2013 Acquisitions

Zenprise

In January 2013, the Company acquired all of the issued and outstanding securities of Zenprise, Inc. ("Zenprise"), a privately-held leader in mobile device management. Zenprise became part of the Company's Enterprise and Service Provider division. Citrix has integrated the Zenprise offering for mobile device management into its XenMobile Enterprise edition. The total consideration for this transaction was approximately \$324.0 million, net of \$2.9 million of cash acquired, and was paid in cash. Transaction costs associated with the acquisition were approximately \$0.6 million, of which the Company expensed approximately \$0.1 million during the year ended December 31, 2013 and are included in General and administrative expense in the accompanying consolidated statements of income. In addition, in connection with the acquisition, the Company assumed certain stock options, which are exercisable for up to 285,817 shares of the Company's common stock, for which the vesting period reset fully upon the closing of the transaction.

2013 Other Acquisitions

During the third quarter of 2013, the Company acquired all of the issued and outstanding securities of a privately-held company. The total consideration for this transaction was approximately \$5.3 million, net of \$2.8 million of cash acquired, and was paid in cash. In addition, the Company agreed to pay contingent consideration of up to \$3.0 million in cash upon the satisfaction of certain milestone achievements, as defined pursuant to the share purchase agreement. This business became part of the Company's Mobility Apps division. Transaction costs associated with the acquisition were approximately \$0.2 million, all of which the Company expensed during the year ended December 31, 2013 and are included in General and administrative expense in the accompanying consolidated statements of income. In September 2014, the Company paid \$2.0 million of the contingent consideration balance based on milestones achieved. The Company is expected to pay the remaining balance of up to \$1.0 million if the final milestone is achieved pursuant to the share purchase agreement.

During the fourth quarter of 2013, the Company acquired all of the issued and outstanding securities of a privately-held company. The total cash consideration for this transaction was approximately \$5.5 million. This business became part of the Company's Enterprise and Service Provider division. Transaction costs associated with the acquisition were approximately \$0.3 million, of which the Company expensed \$0.1 million during the year ended December 31, 2014, and are included in General and administrative expense in the accompanying consolidated statements of income.

Subsequent Event

On January 8, 2015, the Company acquired all of the issued and outstanding securities of Sanbolic, Inc. ("Sanbolic"). Sanbolic is an innovator and leader in workload-oriented storage virtualization technologies. The Sanbolic technology, combined with XenDesktop, XenApp, and XenMobile products will enable the Company to develop a range of differentiated solutions that will reduce the complexity of Microsoft Windows application delivery and desktop virtualization deployments. Sanbolic will become part of the Company's Enterprise and Service Provider division. The total preliminary consideration for this transaction was approximately \$89.4 million, net of \$0.2 million cash acquired, and was paid in cash. Transaction costs associated with the acquisition are currently estimated at \$0.4 million, of

which the Company expensed \$0.2 million during the year ended December 31, 2014, and are included in General and administrative expense in the accompanying consolidated statements of income. In addition, in connection with the acquisition, the Company assumed non-vested stock units which were converted into the right to receive, in the aggregate, up to 37,057 shares of the Company's common stock, for which the vesting period began on the closing of the transaction.

F- 17

CITRIX SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

4. INVESTMENTS

Available-for-sale Investments

Investments in available-for-sale securities at fair value were as follows for the periods ended (in thousands):

Description of the Securities	December 31, 2014				December 31, 2013			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Agency securities	\$637,474	\$1,296	\$(457)	\$638,313	\$453,922	\$1,177	\$(349)	\$454,750
Corporate securities	795,255	232	(1,372)	794,115	643,360	947	(216)	644,091
Municipal securities	48,744	17	(31)	48,730	53,698	81	(23)	53,756
Government securities	121,431	37	(256)	121,212	156,930	196	(47)	157,079
Total	\$1,602,904	\$1,582	\$(2,116)	\$1,602,370	\$1,307,910	\$2,401	\$(635)	\$1,309,676

The change in net unrealized gains (losses) on available-for-sale securities recorded in Other comprehensive (loss) income includes unrealized gains (losses) that arose from changes in market value of specifically identified securities that were held during the period, gains (losses) that were previously unrealized, but have been recognized in current period net income due to sales, as well as prepayments of available-for-sale investments purchased at a premium. This reclassification has no effect on total comprehensive income or equity and was not material for all periods presented. See Note 16 for more information related to comprehensive income.

The average remaining maturities of the Company's short-term and long-term available-for-sale investments at December 31, 2014 were approximately six months and three years, respectively.

Realized Gains and Losses on Available-for-sale Investments

For the years ended December 31, 2014 and 2013, the Company had realized gains on the sales of available-for-sale investments of \$1.9 million and \$3.0 million, respectively. For the years ended December 31, 2014 and 2013, the Company had realized losses on available-for-sale investments of \$0.5 million and \$2.7 million, respectively, primarily related to prepayments at par of securities purchased at a premium. All realized gains and losses related to the sales of available-for-sale investments are included in Other (expense) income, net, in the accompanying consolidated statements of income.

The Company continues to monitor its overall investment portfolio and if the credit ratings of the issuers of its investments deteriorate or if the issuers experience financial difficulty, including bankruptcy, the Company may be required to make adjustments to the carrying value of the securities in its investment portfolio and recognize impairment charges for declines in fair value that are determined to be other-than-temporary.

Unrealized Losses on Available-for-Sale Investments

The gross unrealized losses on the Company's available-for-sale investments that are not deemed to be other-than-temporarily impaired were \$2.1 million and \$0.6 million as of December 31, 2014 and 2013, respectively. Because the Company does not intend to sell any of its investments in an unrealized loss position and it is more likely than not that it will not be required to sell the securities before the recovery of its amortized cost basis, which may not occur until maturity, it does not consider the securities to be other-than-temporarily impaired.

Cost Method Investments

The Company held direct investments in privately-held companies of approximately \$16.6 million and \$24.3 million as of December 31, 2014 and 2013, respectively, which are accounted for based on the cost method and are included in Other assets in the accompanying consolidated balance sheets. The Company periodically reviews these investments for impairment. If the Company determines that an other-than-temporary impairment has occurred, it will write-down the investment to its fair value. During 2014 and 2013, certain companies in which the Company held direct investments were acquired by third parties and as a result of these sales transactions the Company recorded

gains of \$2.9 million and \$6.0 million, respectively, which was included in Other (expense) income, net in the accompanying consolidated statements of income. The Company determined that certain cost method investments were impaired during 2014, 2013 and 2012 and recorded a total charge of \$8.3 million, \$3.7 million, and \$3.5 million, respectively, which is included in Other (expense) income, net in the accompanying consolidated statements of income. See Note 5 for more information.

F- 18

CITRIX SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

5. FAIR VALUE MEASUREMENTS

The authoritative guidance defines fair value as an exit price, representing the amount that would either be received to sell an asset or be paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering such assumptions, the guidance establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

Level 1. Observable inputs such as quoted prices in active markets for identical assets or liabilities;

Level 2. Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and

Level 3. Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Available-for-sale securities included in Level 2 are valued utilizing inputs obtained from an independent pricing service (the "Service") which uses quoted market prices for identical or comparable instruments rather than direct observations of quoted prices in active markets. The Service gathers observable inputs for all of the Company's fixed income securities from a variety of industry data providers including, for example, large custodial institutions and other third-party sources. Once the observable inputs are gathered by the Service, all data points are considered and an average price is determined. The Service's providers utilize a variety of inputs to determine their quoted prices. These inputs may include interest rates, known historical trades, yield curve information, benchmark data, prepayment speeds, credit quality and broker/dealer quotes. Substantially all of the Company's available-for-sale investments are valued utilizing inputs obtained from the Service and accordingly are categorized as Level 2 in the table below. The Company periodically independently assesses the pricing obtained from the Service and historically has not adjusted the Service's pricing as a result of this assessment. Available-for-sale securities are included in Level 3 when relevant observable inputs for a security are not available.

The Company's assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the classification of assets and liabilities within the fair value hierarchy. In certain instances, the inputs used to measure fair value may meet the definition of more than one level of the fair value hierarchy. The input with the lowest level priority is used to determine the applicable level in the fair value hierarchy.

Total liabilities	\$1,743	\$ —	\$ 1,743	\$ —

The Company's fixed income available-for-sale security portfolio generally consists of high quality, investment grade securities from diverse issuers with a minimum credit rating of A-/A3 and a weighted-average credit rating of AA-/Aa3. The Company values these securities based on pricing from the Service, whose sources may use quoted prices in active markets for identical assets (Level 1 inputs) or inputs other than quoted prices that are observable either directly or indirectly (Level 2 inputs) in determining fair value, and accordingly, the Company classifies all of its fixed income available-for-sale securities as Level 2.

The Company measures its cash flow hedges, which are classified as Prepaid expenses and other current assets and Accrued expenses and other current liabilities, at fair value based on indicative prices in active markets (Level 2 inputs).

Assets Measured at Fair Value on a Recurring Basis Using Significant Unobservable Inputs (Level 3)

The Company has invested in convertible debt securities of certain early-stage entities that are classified as available-for-sale investments. As quoted prices in active markets or other observable inputs were not available for these investments, in order to measure them at fair value, the Company utilized a discounted cash flow model using a discount rate reflecting the market risk inherent in holding securities of an early-stage enterprise, adjusted by the probability-weighted exit possibilities associated with the convertible debt securities. This methodology required the Company to make assumptions that were not directly or indirectly observable regarding the fair value of the convertible debt securities; accordingly they are a Level 3 valuation and included in the table below.

	Investments (in thousands)
Balance at December 31, 2013	\$10,291
Purchases of Level 3 securities	2,050
Proceeds received on Level 3 securities	(10,441)
Total net realized gains included in earnings	3,441
Transfers into Level 3	732

Balance at December 31, 2014

\$6,073

Transfers into Level 3 relate to certain of the Company's investments in convertible debt securities of early-stage entities that were reclassified from cost method investments, which were previously included in Other assets in the accompanying consolidated balance sheets. During the year ended December 31, 2014, two of the early-stage entities in which the Company

F- 20

CITRIX SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

held convertible debt securities were acquired and as a result of such sale transactions the Company recorded gains of \$3.9 million, which were included in Other (expense) income, net in the accompanying consolidated statements of income.

Assets Measured at Fair Value on a Non-recurring Basis Using Significant Unobservable Inputs (Level 3)

During 2014 and 2013, certain cost method investments with a combined carrying value of \$8.3 million and \$9.3 million, respectively, were determined to be impaired and have been written down to their fair values of zero and \$5.6 million, respectively, resulting in impairment charges of \$8.3 million and \$3.7 million, respectively. The impairment charges are included in Other (expense) income, net in the accompanying consolidated financial statements for the years ended December 31, 2014 and 2013. In determining the fair value of cost method investments, the Company considers many factors including but not limited to operating performance of the investee, the amount of cash that the investee has on-hand, the ability to obtain additional financing and the overall market conditions in which the investee operates. The fair value of the cost method investment represents a Level 3 valuation as the assumptions used in valuing this investment were not directly or indirectly observable. See Note 4 for more information regarding cost method investments.

For certain intangible assets where the unamortized balances exceeded the undiscounted future net cash flows, the Company measures the amount of the impairment by calculating the amount by which the carrying values exceed the estimated fair values. The estimated fair values of those intangible assets are based on projected discounted future net cash flows using the relief-from-royalty and excess earnings methods. Key assumptions used in the valuations include forecasts of revenue and expenses over an extended period of time, royalty rate percentages, tax rates, and estimated costs of debt and equity capital to discount the projected cash flows. These non-recurring fair value measurements are categorized as Level 3 significant unobservable inputs. See Note 2 to the Company's consolidated financial statements for detailed information related to Goodwill and Other Intangible Assets.

Additional Disclosures Regarding Fair Value Measurements

The carrying value of accounts receivable, accounts payable and accrued expenses and other current liabilities approximate their fair value due to the short maturity of these items.

As of December 31, 2014, the fair value of the Convertible Notes, which was determined based on inputs that are observable in the market (Level 2) based on the closing trading price per \$100 as of the last day of trading for the year ended December 31, 2014, and carrying value of debt instruments (carrying value excludes the equity component of the Company's Convertible Notes classified in equity) was as follows:

	Fair Value	Carrying Value
Convertible Senior Notes	\$1,530,938	\$1,292,953

See Note 12 for more information on the Convertible Notes.

6. ACCRUED EXPENSES AND OTHER CURRENT LIABILITIES

Accrued expenses consist of the following:

	December 31,	
	2014	2013
	(In thousands)	
Accrued compensation and employee benefits	\$ 158,142	\$ 141,065
Other accrued expenses	139,937	116,541
Total	\$ 298,079	\$ 257,606

7. EMPLOYEE STOCK-BASED COMPENSATION AND BENEFIT PLANS

Plans

The Company's stock-based compensation program is a long-term retention program that is intended to attract and reward talented employees and align stockholder and employee interests. As of December 31, 2014, the Company had two stock-based compensation plans under which it was granting stock options and non-vested stock units. The Company is currently granting stock-based awards from its 2014 Equity Incentive Plan (the "2014 Plan"). During 2014, the Company granted certain stock-based awards from its Amended and Restated 2005 Employee Stock Purchase Plan (as amended, the "2005 ESPP"). In December 2014, the Company's Board of Directors approved the

2015 Employee Stock Purchase Plan, which is subject to stockholder approval at the Company Annual Meeting of Stockholders on May 28, 2015. In connection with

F- 21

CITRIX SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

certain of the Company's acquisitions, the Company has assumed certain plans from acquired companies. The Company's Board of Directors has provided that no new awards will be granted under the Company's acquired stock plans. Awards previously granted under the Company's superseded and expired stock plans that are still outstanding typically expire between five and ten years from the date of grant and will continue to be subject to all the terms and conditions of such plans, as applicable. The Company's superseded and expired stock plan includes the Amended and Restated 1995 Stock Plan and the Amended and Restated 2005 Equity Incentive Plan.

Under the terms of the 2014 Plan, the Company is authorized to grant incentive stock options ("ISOs"), non-qualified stock options ("NSOs"), non-vested stock, non-vested stock units, stock appreciation rights ("SARs"), and performance units and to make stock-based awards to full and part-time employees of the Company and its subsidiaries or affiliates, where legally eligible to participate, as well as to consultants and non-employee directors of the Company. SARs and ISOs are not currently being granted. Currently, the 2014 Plan provides for the issuance of a maximum of 29,000,000 shares of common stock. In addition, shares of common stock underlying any awards granted under the Company's Amended and Restated 2005 Equity Incentive Plan, as amended, that are forfeited, canceled or otherwise terminated (other than by exercise) are added to its shares of common stock available for issuance under the 2014 Plan. Under the 2014 Plan, NSOs must be granted at exercise prices no less than fair market value on the date of grant. Non-vested stock awards may be granted for such consideration in cash, other property or services, or a combination thereof, as determined by the Company's Compensation Committee of its Board of Directors. Stock-based awards are generally exercisable or issuable upon vesting. The Company's policy is to recognize compensation cost for awards with only service conditions and a graded vesting schedule on a straight-line basis over the requisite service period for the entire award. As of December 31, 2014, there were 36,011,864 shares of common stock reserved for issuance pursuant to the Company's stock-based compensation plans, and the Company had authorization under its 2014 Plan to grant stock-based awards covering 27,163,066 shares of common stock.

Under the 2005 ESPP, all full-time and certain part-time employees of the Company are eligible to purchase common stock of the Company twice per year at the end of a six-month payment period (a "Payment Period"). During each Payment Period, eligible employees who so elect may authorize payroll deductions in an amount no less than 1% nor greater than 10% of his or her base pay for each payroll period in the Payment Period. At the end of each Payment Period, the accumulated deductions are used to purchase shares of common stock from the Company up to a maximum of 12,000 shares for any one employee during a Payment Period. Shares are purchased at a price equal to 85% of the fair market value of the Company's common stock on the last business day of a Payment Period. Employees who, after exercising their rights to purchase shares of common stock in the 2005 ESPP, would own shares representing 5% or more of the voting power of the Company's common stock, are ineligible to participate under the 2005 ESPP. The 2005 ESPP provides for the issuance of a maximum of 10,000,000 shares of common stock. As of December 31, 2014, 3,556,973 shares had been issued under the 2005 ESPP. The Company recorded stock-based compensation costs related to the 2005 ESPP of \$5.2 million, \$4.9 million and \$4.0 million for the years ended December 31, 2014, 2013 and 2012, respectively.

Expense Information under the Authoritative Guidance

As required by the authoritative guidance, the Company estimates forfeitures of stock awards and recognizes compensation costs only for those awards expected to vest. Forfeiture rates are determined based on historical experience. The Company also considers whether there have been any significant changes in facts and circumstances that would affect its forfeiture rate quarterly. Estimated forfeitures are adjusted to actual forfeiture experience as needed. The Company recorded stock-based compensation costs, related deferred tax assets and tax benefits of \$169.3 million, \$46.9 million and \$43.9 million, respectively, in 2014, \$183.9 million, \$57.1 million and \$55.7 million, respectively, in 2013 and \$149.9 million, \$46.7 million and \$65.8 million, respectively, in 2012.

The detail of the total stock-based compensation recognized by income statement classification is as follows (in thousands):

Income Statement Classifications	2014	2013	2012
Cost of services and maintenance revenues	\$2,560	\$2,540	\$2,111
