Derivative Financial Instruments

The Fund has adopted enhanced disclosure regarding derivatives and hedging activity intending to improve financial reporting of derivative instruments by enabling investors to understand how and why an entity uses derivatives, how derivatives are accounted for, and how derivative instruments affect an entity's results of operations and financial position.

The Fund occasionally engages in equity option trading as a source of protection against a broad market decline, therefore, the primary risk of this strategy is fluctuation in pricing of these positions. The Fund did not hold any option contracts as of February 28, 2010.
