

TIERONE CORP
Form 10-K
March 11, 2008

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 For the fiscal year ended December 31, 2007

or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the period from _____ to _____.

Commission File Number 005-78774

TierOne Corporation

(Exact name of registrant as specified in its charter)

Wisconsin

(State of Incorporation)

04-3638672

(I.R.S. Employer Identification Number)

Registrant's Address of Principal Executive Offices: 1235 N Street, Lincoln, Nebraska 68508

Registrant's Telephone Number, including area code: (402) 475-0521

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act:

Title of Class Common Stock, Par Value \$0.01 Per Share

Indicate by check mark whether the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act.

Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Registrant's Address of Principal Executive Offices: 1235 N Street, Lincoln, Nebraska 68508 Registrant's Telephone

Edgar Filing: TIERONE CORP - Form 10-K

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

The aggregate market value of the voting stock held by non-affiliates of the Registrant was \$543,431,480 as of June 30, 2007. As of March 10, 2008 there were 18,059,946 issued and outstanding shares of the Registrant's common stock.

Documents Incorporated by Reference

Portions of the definitive Proxy Statement for the Registrant's 2008 Annual Meeting of Shareholders are expected to be incorporated by reference in Part III, Items 10, 11, 12, 13 and 14. In the event that such Proxy Statement is not filed on or prior to 120 days after the Registrant's fiscal year end (April 29, 2008), the Annual Report on Form 10-K will be amended to include the information required in Part III, Items 10, 11, 12, 13 and 14.

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

Statements contained in this Annual Report on Form 10-K which are not historical facts may be forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such forward looking statements are subject to risks and uncertainties which could cause actual results to differ materially from those currently anticipated due to a number of factors. In addition to the risk factors described in Item 1A. of this Annual Report on Form 10-K, factors that could result in material variations include, but are not limited to:

General economic conditions and trends, either nationally or in some or all of the areas in which we and our customers conduct our businesses;

Changes in interest rates or other competitive factors which could affect net interest margins, net interest income and noninterest income;

Changes in deposit flows, and in the demand for deposits, loans, investment products and other financial services in the markets we serve;

Changes in the quality or composition of our loan portfolios;

Changes in real estate values, which could impact the quality of the assets securing the loans in our portfolios;

Changes in the financial or operating performance of our customers' businesses;

Borrower bankruptcies, claims and assessments;

Our timely development of new lines of business and competitive products or services within our existing lines of business in a changing environment, and the acceptance of such products or services by our customers;

Any interruption or breach of security resulting in failures or disruptions in customer account management, general ledger, deposit operations, lending or other systems;

Changes in fiscal, monetary, regulatory, trade and tax policies and laws;

Increased competitive challenges and expanding product and pricing pressures among financial institutions;

Changes in accounting policies or procedures as may be required by various regulatory agencies;

Changes in consumer spending and saving habits;

Unanticipated issues relating to the recovery of insurance proceeds for claims arising out of our prior relationship with TransLand Financial Services, Inc;

Edgar Filing: TIERONE CORP - Form 10-K

Conditions precedent to our proposed merger with a subsidiary of CapitalSource Inc. may not be satisfied or the merger agreement may be terminated pursuant to its terms;

Disruption from our proposed merger with a subsidiary of CapitalSource Inc. may make it more difficult to maintain customer relationships;

The required regulatory approvals for our proposed merger with a subsidiary of CapitalSource Inc. may not be obtained or if obtained may not be on the terms anticipated by, or acceptable to, the parties;

The outcome of pending or threatened litigation, or of other matters before regulatory agencies, or of matters resulting from regulatory exams, whether currently existing or commencing in the future; and

3

Other factors discussed in documents we may file with the Securities and Exchange Commission from time to time.

These factors should be considered in evaluating the forward-looking statements and undue reliance should not be placed on such statements. We undertake no obligation, and disclaim any obligation, to update information contained in this Annual Report on Form 10-K, including these forward-looking statements, to reflect events or circumstances that occur after the date of the filing of this Annual Report on Form 10-K.

4

Part I

As used in this report, unless the context otherwise requires, the terms *we*, *us*, or *our* refer to TierOne Corporation and its wholly owned subsidiary, TierOne Bank.

Item 1. Business

General

TierOne Corporation (*Company*) is a Wisconsin corporation headquartered in Lincoln, Nebraska. TierOne Corporation is the holding company for TierOne Bank (*Bank*). The Bank has two wholly owned subsidiaries, TMS Corporation of the Americas (*TMS*) and United Farm & Ranch Management, Inc. (*UFARM*). TMS is the holding company of TierOne Investments and Insurance, Inc. (d/b/a TierOne Financial), a wholly owned subsidiary that administers the sale of securities and insurance products, and TierOne Reinsurance Company, a wholly owned subsidiary that reinsures credit life and disability insurance policies. UFARM provides agricultural customers with professional farm and ranch management and real estate brokerage services.

Edgar Filing: TIERONE CORP - Form 10-K

The assets of the Company, on an unconsolidated basis, primarily consist of 100% of the Bank's common stock. The Company has no significant independent source of income and therefore depends on cash distributions from the Bank to meet its funding requirements.

Our results of operations are dependent primarily on net interest income, which is the difference between the interest earned on our assets, primarily our loan and securities portfolios, and our cost of funds, which consists of the interest paid on our deposits and borrowings. Our net income (loss) is also affected by our provision for loan losses, noninterest income, noninterest expense and income tax expense (benefit). Noninterest income generally includes fees and service charges, debit card fees, net income (loss) from real estate operations, net gain on sales of investment securities, loans held for sale and real estate owned and other operating income. Noninterest expense consists of salaries and employee benefits, occupancy, data processing, advertising and other operating expense. Our earnings are significantly affected by general economic and competitive conditions; particularly changes in market interest rates and U.S. Treasury yield curves, governmental policies and actions of regulatory authorities.

United Nebraska Financial Co. Acquisition

On August 27, 2004, we acquired all of the issued and outstanding capital stock of United Nebraska Financial Co. (UNFC), the holding company of United Nebraska Bank (UNB), headquartered in Grand Island, Nebraska. The purchase price of the acquisition was approximately \$97.3 million. UNB had assets in excess of \$500 million and 16 banking offices located in Nebraska.

Sale / Purchase of Branches and Deposits

On June 2, 2006, we completed the purchase of Marine Bank's only banking office in Omaha Nebraska. We acquired \$8.1 million of deposits as a result of this transaction. On December 15, 2006, we sold our Plainville and Stockton, Kansas bank offices to Stockton National Bank of Stockton, Kansas. As a result of this sale, we transferred \$21.7 million of deposits to the purchaser and recorded a gain on sale of \$1.0 million.

Proposed Merger with CapitalSource Inc.

On May 17, 2007, the Company, CapitalSource Inc. (CapitalSource) and CapitalSource TRS Inc. (CapitalSource TRS) entered into and announced an Agreement and Plan of Merger (Merger Agreement). The Merger Agreement provides that, upon the terms and subject to conditions set forth in the Merger Agreement, the Company will merge with and into CapitalSource TRS (Merger), with CapitalSource TRS continuing as the surviving corporation. The Merger Agreement and the Merger were approved by the stockholders of the Company at a special meeting held on November 29, 2007.

5

Subject to the terms and conditions of the Merger Agreement, at the effective time and as a result of the Merger, each issued and outstanding share of Company common stock (other than certain shares owned by the Company) would be converted into the right to receive the following (collectively, the Merger Consideration):

- \$6.80 in cash; plus
- 0.675 shares of CapitalSource common stock; plus
- if the ten-day average closing price of CapitalSource common stock prior to the closing of the Merger is:
 - (a) less than or equal to \$25.1852, then 0.405 shares of CapitalSource common stock; or
 - (b) greater than \$25.1852, then Company stockholders can elect to receive either \$10.20 in cash or \$10.20 of CapitalSource common stock.

If, on the day the last governmental approval to complete the Merger is obtained, the ten-day average closing price of CapitalSource common stock is less than \$21.98 and the trading price of CapitalSource common stock has underperformed by more than 15% the S&P 500 Financial Sector Index during the period from May 17, 2007 to that date, then the Board of Directors of the Company has the right, in accordance with the terms of the Merger Agreement, to request that CapitalSource provide additional financial consideration, either in stock or cash. The Company previously informed CapitalSource that, under such circumstances, its Board of Directors would intend to make such a request. If, following such a request, the parties are unable to agree on such additional consideration, then the Board of Directors of the Company would have the right to terminate the Merger Agreement.

The Company and CapitalSource have made customary representations, warranties and covenants in the Merger Agreement, including, among others, covenants regarding the conduct of their businesses and other activities between the execution of the Merger Agreement and the consummation of the Merger, and have agreed to use their reasonable best efforts to consummate the Merger. During the time that the Merger Agreement is in effect, the Company is not permitted to solicit or facilitate proposals relating to alternative business combination transactions,

Edgar Filing: TIERONE CORP - Form 10-K

or, subject to certain exceptions, enter into discussions concerning alternative business combination transactions.

Consummation of the Merger is subject to customary conditions, including, without limitation, the accuracy of the representations and warranties of the parties (subject generally to a material adverse effect standard) and regulatory approval. Although CapitalSource has filed an application with the Office of Thrift Supervision (OTS) for approval of transactions contemplated by the Merger Agreement, the OTS has yet to deem the application either complete or approved, and no assurance can be given that the OTS will approve the transaction.

The Merger Agreement further provides that either the Company or CapitalSource (each acting through its respective Board of Directors) has the right at any time after February 17, 2008 to unilaterally terminate the Merger Agreement, unless the failure to effect the Merger by such date was due to the terminating party's failure to perform its obligations and covenants under the Merger Agreement. The Company has indicated that its present intent is not to terminate the Merger Agreement pending receipt of further comment from the OTS. Conversely, CapitalSource has publicly advised that its Board of Directors has authorized its Chairman and Chief Executive Officer to either terminate the Merger Agreement or negotiate new terms for the transaction. In light of the preceding sentence, the Company can provide no assurance that the Merger will be completed even if all conditions precedent to the transaction (including receipt of regulatory approval) are satisfied.

In addition to other factors affecting the Company's financial performance discussed elsewhere in this Annual Report on Form 10-K, due to the proposed Merger, the Company has been subject to or experienced limitations on the operation of its business including restrictions on certain funding opportunities; certain one-time Merger-related expenses; an increased commitment of time by Company personnel working with federal regulatory agencies in connection with Merger-related issues; and restrictions on the Company's ability to repurchase its common stock. These activities have and may continue to further impact the Company's financial performance and earnings per share.

6

Government Monetary Policy

We are affected by the credit policies of monetary authorities, including the Board of Governors of the Federal Reserve System (Federal Reserve Board). An important objective of the Federal Reserve System is to regulate the national supply of bank credit. Among the instruments of monetary policy used by the Federal Reserve Board are open market operations in U.S. Government securities, changes in the discount rate, reserve requirements on member bank deposits and funds availability regulations. The monetary policies of the Federal Reserve Board have in the past had a significant effect on operations of financial institutions, including the Bank, and will continue to do so in the future. Changing conditions in the national economy and in the money markets make it difficult to predict future changes in interest rates, deposit levels, loan demand or their effects on the business and earnings of the Company.

Market Area and Competition

We are a regional community bank offering a variety of financial products and services to meet the needs of the customers we serve. Our deposit gathering is concentrated in the communities surrounding our 69 banking offices located in Nebraska, seven counties in southwest Iowa and one county in northern Kansas. We compete for customers by emphasizing convenience and service, and by offering a full range of traditional and non-traditional products and services. We offer 24-hour ATM banking at 68 of our banking offices and currently offer 31 ATM banking locations at supermarkets, convenience stores and shopping malls.

In addition to loans generated through our banking offices, our lending efforts have been expanded in recent years to include nine loan production offices located in Arizona, Colorado, Florida, Minnesota, Nevada and North Carolina whose primary purpose is to originate commercial real estate and construction, land and land development and/or residential construction loans in their respective states.

We face significant competition, both in generating loans as well as in attracting deposits. Our market area is highly competitive and we face direct competition from a significant number of financial service providers, many with a statewide or regional presence and, in some cases, a national presence. Many of these financial service providers are significantly larger and have greater financial resources. Our competition for loans comes principally from commercial banks, savings banks and associations, credit unions, mortgage brokers, mortgage-banking companies and insurance companies. Our most direct competition for deposits has historically come from commercial banks, savings banks and associations and credit unions. In addition, we face increasing competition for deposits from non-bank institutions such as brokerage firms and insurance companies in such instruments as short-term money market funds, corporate and government securities funds, equity securities, mutual funds and annuities.

Subsequent Event

Subsequent to the filing of the Company's March 4, 2008 Form 8-K Report of financial results for the quarter and year ended December 31, 2007, an appellate court decision in our federal goodwill litigation (see Item 3. Legal Proceedings for additional information) was issued. As a result of this decision, we recorded a 2007 fourth quarter pretax charge of \$560,000 in other operating expense to reflect fees and expenses

Subsequent Event

Edgar Filing: TIERONE CORP - Form 10-K

incurred during the appeal process which had previously been capitalized. The impact after income tax benefits of \$202,000, was \$358,000. The 2007 Consolidated Statement of Operations and related loss per share data reported in this Annual Report on Form 10-K have been updated accordingly.

Available Information

We are a public company and are required to file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission (SEC). We maintain a website at www.tieronebank.com and make available, free of charge, copies of our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K and any amendments to such documents as soon as reasonably practicable after the reports have been electronically filed or furnished to the SEC. In addition, we provide our Code of Conduct and Ethics, Audit Committee Charter, Compensation Committee Charter and Nominating and Corporate Governance Committee Charter on our website. We are not including the information contained on or available through our website as a part of, nor are we incorporating such information by reference into, this Annual Report on Form 10-K.

7

Lending Activities

General. We directly originate loans to customers located in Nebraska, Iowa, Kansas, Arizona, Colorado, Florida, Minnesota, Nevada and North Carolina (Primary Lending Market Area). This Primary Lending Market Area is comprised of states in which we have banking or loan production offices. We also purchase loans and loan participation interests from financial institutions, loan correspondents and mortgage brokers located throughout the United States. At December 31, 2007 and 2006, approximately 20.2% and 20.8%, respectively, of our total loan portfolio consisted of loans secured by properties located outside of our Primary Lending Market Area.

In recent years, we have become a regional community bank by shifting our focus to multi-family residential, commercial real estate, land and land development, construction, agricultural, business, warehouse mortgage lines of credit and consumer lending. These loans typically have relatively higher yields, adjustable interest rates and/or shorter terms to maturities. Such loans, however, generally involve a higher degree of risk than financing one-to-four family residential loans because collateral is more difficult to appraise, the collateral may be difficult to obtain or liquidate following an uncured default and it can be difficult to predict the borrower's ability to generate future cash flows.

The decrease in net loans at December 31, 2007 was primarily attributable to steps taken to reduce exposure to certain lending markets, loan payoffs and periodic payments. Additionally, lower demand, more stringent underwriting guidelines and macro-economic factors have resulted in a decreased volume of residential real estate, land and land development and commercial construction related loan originations.

Loan Approval Procedures and Authority. General lending policies and procedures are established by our Asset/Liability Committee which is composed of the following officers of the Bank: Chief Executive Officer, Chief Operating Officer, Director of Lending, Director of Administration, Director of Retail Banking, Chief Financial Officer, Controller and Senior Financial Analysis Manager. Our Board of Directors reviews and approves lending policies and procedures established by the Asset/Liability Committee. Under policies approved by the Board of Directors, various officers or combinations of officers have loan approval authority, the specific amounts and requirements being set forth for each loan type. Generally, for loan amounts in excess of \$10.0 million, approval of our Board of Directors is required.

Loan Portfolio Composition. At December 31, 2007, our total loans receivable amounted to \$3.3 billion. We have, in recent years, shifted the focus of our lending strategy to place an increased emphasis on multi-family residential, commercial real estate, land and land development, construction, agricultural, business, warehouse mortgage lines of credit and consumer lending. The types of loans that we may purchase and originate are subject to federal and state laws and regulations. The interest rates we charge on loans are affected by the demand for such loans and the supply of money available for lending purposes and the rates offered by competitors. These factors are, in turn, affected by general and local economic conditions, monetary policies of the Federal Government, including the Board of Governors of the Federal Reserve System and legislative tax policies.

Residential Mortgage Lending. One-to-four family residential mortgage loan originations are generally obtained from our in-house loan representatives, from existing or past customers and from mortgage brokers. We also originate and/or purchase from correspondent lenders second mortgage loans in amounts up to 90% of the appraised value of the collateral with maturities of up to 30 years.

We currently originate fixed-rate, one-to-four family residential mortgage loans generally with terms of up to 30 years. We sell substantially all newly originated fixed-rate, one-to-four family residential loans into the secondary market on a servicing retained basis which produces noninterest income in the form of net gains and losses on sales and loan servicing fees.

We originate or purchase adjustable-rate, one-to-four family residential mortgage loans with terms of up to 30 years and interest rates which generally adjust one to seven years from the outset of the loan and thereafter annually for the duration of the loan. The interest rates for

such adjustable-rate loans are normally tied to indices such as the U.S. Treasury CMT or LIBOR, plus a margin. Our adjustable-rate loans generally provide for periodic caps (generally not more than 2.0%) on the increase or decrease in the interest rate at any adjustment date. The maximum amount the rate can increase or decrease from the initial rate during the life of the loan is 5.0% 6.0% over the start rate.

The origination or purchase of adjustable-rate, one-to-four family residential mortgage loans allows us to control our exposure to interest rate risk. However, adjustable-rate loans generally pose risks not inherent in fixed-rate loans, primarily because as interest rates rise, the underlying payments of the borrower rise, thereby increasing the potential for default. Periodic and lifetime caps on interest rate increases help to reduce the risks associated with adjustable-rate loans but also limit the interest rate sensitivity of such loans.

Generally, we originate one-to-four family residential mortgage loans in amounts up to 80% of the lower of the appraised value or the selling price of the property and up to 100% if private mortgage insurance is obtained. Mortgage loans originated by us generally include due-on-sale provisions which provide us with the contractual right to deem the loan immediately due and payable in the event the borrower transfers ownership of the property without our consent. We require fire, casualty, title and, in certain cases, flood insurance on properties securing mortgage loans made by us.

We maintain a corporate policy of not participating in subprime residential real estate lending or negative amortizing mortgage products. The Office of Thrift Supervision, our federal regulatory agency, defines subprime loans as loans to borrowers displaying one or more credit risk characteristics including lending to a borrower with a credit bureau risk score (FICO) of 660 or below. Furthermore, we have not engaged in collateralized loan obligations (CLO), collateralized debt obligations (CDO), structured investment vehicles (SIV) or asset-backed commercial paper (ABCP).

Multi-Family Residential, Commercial Real Estate and Land and Land Development Lending. We offer multi-family residential, commercial real estate and land and land development loans for permanent financing collateralized by real property. These loans are generally used for business purposes such as apartment buildings, office and retail facilities and land being held for commercial and residential development. The properties securing these loans are generally located in our Primary Lending Market Area. At December 31, 2007, 62.6%, 86.9% and 95.9% of our multi-family residential, commercial real estate and land and land development loans, respectively, were located within our Primary Lending Market Area.

Our underwriting procedures generally provide that multi-family residential, commercial real estate and land and land development loans may be made in amounts up to 80% of the value of the property if it is located within our Primary Lending Market Area and 75% of the value if it is outside our Primary Lending Market Area. Loans exceeding prescribed loan-to-value ratios must be reviewed by our Board of Directors and supported by documentation of the relevant factors justifying the deviation from policy.

Loans secured by multi-family residential, commercial real estate and land and land development properties generally involve larger principal amounts and a greater degree of risk than one-to-four family residential mortgage loans. Payments on these loan types are often dependent on the successful operation or management of the properties. Repayment of such loans may be subject to adverse conditions in the real estate market or the economy and a concentration of loans in a geographic region may be subject to greater risk because of the potential for adverse economic conditions affecting that region. We seek to minimize these risks through our underwriting standards.

Construction Lending. We offer residential construction loans for either pre-sold houses (a purchase contract has been signed) or speculative houses (properties for which no buyer yet exists). We originate most of our residential construction loans within our Primary Lending Market Area typically through direct contact with home builders. At December 31, 2007, approximately 80.2% of our residential construction loans were located in our Primary Lending Market Area. During the years ended December 31, 2007 and 2006, we purchased \$55.4 million and \$161.5 million, respectively, of residential construction loans.

We also originate commercial real estate construction loans as well as purchase participation interests in such loans. We provide commercial construction loans to real estate developers for the purpose of constructing a variety of commercial projects such as retail facilities, industrial buildings and warehouses. At December 31, 2007, 72.5% of our commercial construction loans were located in our Primary Lending Market Area.

Commercial construction lending involves a higher degree of risk than one-to-four family residential lending, therefore, we closely monitor our concentration in such loans. We also seek a broad diversification of project types, borrowers and geographic areas to reduce the level of risk associated with this lending type.

Edgar Filing: TIERONE CORP - Form 10-K

Risk of loss on construction loans is dependent largely upon the accuracy of the initial estimate of the property's value when completed or developed compared to the projected cost (including interest) of construction and other assumptions, including the approximate time to build, sell or lease the properties. If the appraised collateral value proves to be inaccurate, we may be confronted with a project, when completed, having a value which is insufficient to assure full repayment.

Agricultural Loans. Agricultural loans are made predominantly to farmers and ranchers in Nebraska, Iowa and Kansas. At December 31, 2007, 100.0% of our agricultural loans were located in our Primary Lending Market Area. Agricultural operating loans are made to finance day-to-day operations, including crop and livestock production. Intermediate term loans are used to purchase breeding livestock and machinery. Real estate loans are used to purchase or refinance farm and ranchland.

Overall credit worthiness is determined by evaluation of the borrower, including management experience and skills, financial strength and the ability to service debt. Loans are generally repaid using cash flows from agricultural activities, including the sale of agricultural commodities, produced by the operation. Underwriting standards include maximum advance rates on collateral, minimum cash flow coverage and review of the historical net worth and cash flow trends of the operation.

Risk of loss is related to the effects of the external risk factors such as adverse weather conditions and poor commodity prices. The impact of external risk factors is significantly affected by the borrower's ability to mitigate the effect of risk on the borrower's operation. Commodity-based agricultural chattel assets are relatively easy to liquidate and there is also a stable demand for agricultural real estate. Our agricultural lenders are responsible for validating the existence, value and condition of the collateral. This monitoring may include periodic on-site inspections and the use of borrowing base reports.

Warehouse Mortgage Lines of Credit. We are actively involved in originating revolving lines of credit to mortgage brokers. These lines are drawn upon by mortgage brokers to fund the origination of one-to-four family residential mortgage loans. Prior to funding the advance, the mortgage broker must have an approved commitment for the purchase of the loan which reduces credit exposure associated with the line. The lines are repaid upon sale of the mortgage loan to a third party which usually occurs within 30 days of origination of the loan. In connection with extending the line of credit to the mortgage broker, we enter into agreements with the purchaser to which such mortgage broker intends to sell loans. Under such agreements, the loan purchaser agrees to hold the mortgage documents issued by the mortgage brokers on our behalf and for our benefit until such time that the purchaser remits to us the purchase price for such loans. As part of the structure of the lines of credit, the mortgage brokers are required to maintain commercial deposits with us, with the amount of such deposits dependent upon the amount of the line and other factors. The lines are structured with adjustable rates indexed to the Wall Street Journal prime rate. Maximum amounts permitted to be advanced by us under existing warehouse mortgage lines of credit range in amounts from \$1.5 million to \$30.0 million.

Business Lending. Business loans are made predominantly to small- and mid-sized businesses located within Nebraska, Iowa and Kansas. At December 31, 2007, 98.0% of our business loans were located in our Primary Lending Market Area. The business lending products we offer include lines of credit, receivable and inventory financing and equipment loans. We have established minimum underwriting standards in regard to business loans which set forth the criteria for sources of repayment, borrower's capacity to repay, specific financial and collateral margins and financial enhancements such as guarantees. Generally, the primary source of repayment is cash flow from the business and the financial strength of the borrower.

Business loans generally involve a greater degree of risk than real estate loans, primarily because collateral is more difficult to appraise, the collateral may be difficult to obtain or liquidate following default and it is difficult to foresee the borrower's ability to generate cash flows. These loans, however, typically offer relatively higher yields and have shorter expected terms to maturity. The availability of business loans enables potential depositors to establish full-service banking relationships with us.

10

Consumer and Other Lending. Consumer loans are generally originated directly through our network of banking offices. We offer home equity loans, home improvement loans and home equity lines of credit in amounts up to \$100,000 with a term of 15 years or less and a loan-to-value ratio up to 90% of the appraised value of the collateral. A portion of our home improvement loans consist of participation interests we have purchased from a third party. Under the terms of our third party arrangement, if any loan becomes more than 120 days past due, we can require the seller to repurchase such loan at a price equal to our total investment in the loan, including any uncollected and accrued interest. We also offer automobile loans in amounts up to \$50,000 with maximum 72 month and 60 month terms for new and used cars, respectively, and purchase price ratios of generally not more than 95% and 85% for new and used cars, respectively. Most of our automobile loans are obtained through a network of 81 new and used automobile dealers located primarily in Lincoln and Omaha, Nebraska. Although employees of the automobile dealership take the application, the loan is made pursuant to our underwriting standards and must be approved by one of our authorized loan officers. Our consumer loan portfolio also includes manufactured housing, recreational vehicle, boat, motorcycle and unsecured loans.

Unsecured loans and loans secured by rapidly depreciating assets, such as automobiles, entail greater risks than one-to-four family residential mortgage loans. In such cases, repossessed collateral, if any, for a defaulted loan may not provide an adequate source of repayment of

Edgar Filing: TIERONE CORP - Form 10-K

the outstanding loan balance. Further, consumer loan collections on these loans are dependent on the borrower's continuing financial stability and, therefore, are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy. Finally, the application of various federal and state laws, including federal and state bankruptcy and insolvency laws, may limit the amount which can be recovered on such loans in the event of a default.

11

Loan Portfolio Composition. The following table shows the composition of our loan portfolio by type of loan at the dates indicated:

<i>(Dollars in thousands)</i>	At December 31,				
	2007	2006	2005	2004	2003
Real estate loans:					
One-to-four family residential (1)	\$ 314,623	\$ 339,080	\$ 384,722	\$ 418,270	\$ 559,134
Second mortgage residential	95,477	120,510	160,208	255,222	258,121
Multi-family residential	106,678	148,922	166,579	142,454	99,078
Commercial real estate	370,910	396,620	402,504	444,269	353,177
Land and land development	473,346	494,887	289,916	152,845	95,975

Other States	281,503	8.42	301,963	8.20	343,146	9.78
Total outside our primary lending market area	675,756	20.21	765,851	20.80	780,189	22.24
Total loans	\$ 3,342,864	100.00%	\$ 3,682,235	100.00%	\$ 3,508,479	100.00%

No individual state in the Other States category comprises more than one percent of total loans at December 31, 2007. Total loans declined \$339.4 million, or 9.2%, to \$3.3 billion at December 31, 2007 compared to \$3.7 billion at December 31, 2006. Our total loans in Florida at December 31, 2007 were \$168.8 million, a decrease of \$148.7 million, or 46.8%, compared to \$317.5 million at December 31, 2006.

During the latter half of 2007 the nation's equity, housing, credit and economic markets faced unprecedented pressures which have significantly impacted much of the financial sector. We have taken a number of steps related to the realignment of certain credit administration functions, including the addition of personnel with extensive depth and expertise in credit analysis, and we continue to tighten credit policies.

13

Edgar Filing: TIERONE CORP - Form 10-K

Contractual Terms to Final Maturities. The following table shows the scheduled contractual maturities of our loans at December 31, 2007. Demand and overdraft loans, which have no stated schedule of repayments and no stated maturity, are reported as due in 2008. The following amounts do not take into account loan prepayments.

Principal Payments Contractually Due in Years

(1) Gross of unamortized premiums, discounts and deferred loan fees, loans in process and allowance for loan losses.

(2) Total loans due after one year from December 31, 2007 with fixed interest rates totaled \$1.0 billion.

Total loans due after one year from December 31, 2007 with floating or adjustable interest rates totaled \$1.0 billion.

Originations, Purchases and Sales of Loans. Our lending activities are subject to underwriting standards and loan origination procedures established by our Asset/Liability Committee and approved by our Board of Directors. Applications for mortgages and other loans are primarily taken at our banking and loan production offices. In the past, we have relied on a network of loan correspondents and mortgage brokers to originate a substantial part of our loans. We significantly reduced our utilization of third-party originators of residential construction loans throughout 2006 and 2007. In recent years, we have greatly expanded our capacity to originate loans through the expansion of our loan production office network and the employment of a number of experienced loan officers. We also use loan correspondents and mortgage brokers to originate one-to-four family residential loans to supplement our origination efforts. A substantial portion of such loans consists of fixed-rate, one-to-four family residential mortgage loans which we sell into the secondary market on a servicing retained basis.

Although we originate both adjustable-rate and fixed-rate loans, our ability to originate and purchase fixed- or adjustable-rate loans is dependent upon customer demand for such loans, which is affected by the current and expected future level of interest rates. The loans purchased during 2007 consisted of one-to-four family residential, construction, consumer (primarily home improvement loans and automobile financing), business, land and land development (including participation interests), agricultural and second mortgage residential loans.

Generally, we originate adjustable-rate mortgage loans for retention in our portfolio. It is our current policy to sell substantially all the fixed-rate, one-to-four family residential mortgage loans we originate or purchase. Substantially all fixed-rate loans sold are sold to either Fannie Mae (FNMA), the Federal Home Loan Mortgage Corporation (FHLMC) or the FHLBank Topeka (FHLBank) pursuant to the Mortgage Partnership Finance Program. Upon receipt of an application to make a fixed-rate loan, we typically enter into agreements to sell such loans to FNMA, FHLMC or the FHLBank pursuant to forward sale commitments, with delivery being required in approximately 90 days. We generally agree to deliver a somewhat smaller dollar amount of loans in the event that not all the loans for which applications are submitted actually close. Loans are delivered pursuant to such sale contracts upon their origination or purchase and are not aggregated for sale as loan packages. As a result, we typically do not have a significant amount of loans held for sale at any given point in time. We recognize, at the time of disposition, the gain or loss on the sale of the loans. The gain or loss is based on the difference between the net proceeds received and the carrying value of the loans sold excluding the value of servicing rights retained.

Loan Portfolio Activity. The following table shows total loans originated, purchased, sold and repaid during the years indicated:

<i>(Dollars in thousands)</i>	Year Ended December 31,

- (1) Reflects amounts advanced and repaid under such lines of credit during the years presented.
- (2) Substantially all of these fixed-rate loans were acquired from mortgage brokers and sold to Fannie Mae, Freddie Mac or the FHLBank Topeka with servicing retained.
- (3) Other items consist of unamortized premiums, discounts and deferred loan fees, loans in process and changes in the allowance for loan losses.

15

Loan Servicing. We sell substantially all fixed-rate, one-to-four family residential mortgage loans with servicing retained in order to develop additional sources of noninterest income. Loan servicing includes collecting and remitting loan payments, accounting for principal and interest, holding escrow funds for the payment of real estate taxes and insurance premiums, contacting delinquent borrowers and supervising foreclosures and property dispositions in the event of unremedied defaults. The gross servicing fee income from loans sold is generally 0.25% to 0.50% of the total balance of each loan serviced. At December 31, 2007 and 2006, we were servicing \$1.5 billion and \$1.3 billion, respectively, of loans for others, primarily consisting of one-to-four family residential loans sold by us in the secondary market.

Loan Commitments. We generally issue written commitments to individual borrowers and mortgage brokers for the purposes of originating and purchasing loans. These loan commitments establish the terms and conditions under which we will fund the loans. At December 31, 2007 and 2006, we had issued commitments totaling \$666.2 million and \$865.9 million, respectively, excluding loans in process, to fund and purchase loans, extend credit on commercial and consumer unused lines of credit and to extend credit under unused warehouse mortgage lines of credit. These outstanding loan commitments do not necessarily represent future cash requirements since many of the commitments may expire without being drawn.

16

Asset Quality

Reports listing all delinquent loans (loans 30 or more days delinquent), classified assets and real estate owned are reviewed by management and our Board of Directors no less frequently than quarterly. The procedures we take with respect to delinquencies vary depending on the nature of the loan, period and cause of delinquency and whether the borrower is habitually delinquent. When a borrower fails to make a required payment on a loan, we take a number of steps to have the borrower cure the delinquency and restore the loan to current status. In the event payment is not then received or the loan not otherwise satisfied, letters and telephone calls generally are made. If the loan is still not brought current or satisfied and it becomes necessary for us to take legal action, which typically occurs after a loan is 90 days or more delinquent, we will commence recovery proceedings against the property securing the loan. If a legal action is instituted and the loan is not brought current, paid in full, or refinanced before the recovery sale, the property securing the loan generally is sold and, if purchased by us, becomes real estate owned or a repossessed asset.

During 2007, our levels of delinquent loans, nonperforming loans (loans 90 or more days delinquent) and impaired loans increased significantly. These increases were primarily attributable to the continued deterioration in the real estate market and the economy in general. We have been further impacted by the erosion of property values and an overall increase in housing inventory (both developed lots and completed houses) in many of the areas of the country in which we do business and where the collateral for our loans reside. Additionally, significantly tightened credit standards have made it more difficult for potential borrowers to obtain financing and for current borrowers to refinance existing loans.

In light of current market conditions, we have taken a number of steps related to the realignment of certain credit administration functions, including the addition of personnel with extensive depth and expertise in credit analysis, and we continue to tighten credit policies.

Delinquent Loans. The following table shows loans delinquent 30 - 89 days in our loan portfolio as of the dates indicated:

---------------------------------	-------	-------	-------	-------	-------

(1) Real estate owned balances are shown net of related loss allowances. Includes both real property and other repossessed collateral consisting primarily of automobiles.

Nonperforming Loans. As a result of economic conditions in the latter half of 2007, we have experienced deteriorating asset quality. At December 31, 2007, nonperforming loans totaled \$128.5 million, an increase of \$98.4 million, or 327.6%, compared to \$30.1 million at December 31, 2006. The increase in the nonperforming loans is primarily attributable to the following:

Residential Construction Loans. Due to the continued erosion of housing values and increased housing inventory in several markets throughout the country, especially Florida, we have, and may continue to experience, increased levels of nonperforming residential construction loans. At December 31, 2007 we had classified \$57.7 million of our total residential construction loans as nonperforming, of which \$31.8 million relate to loans collateralized by property in Florida. As previously disclosed in regulatory filings with the Securities and Exchange Commission, we reported that we have a group of residential construction loans we purchased from TransLand Financial Services Inc. (TransLand) which were primarily located in the Cape Coral area of southwest Florida. These loans were originally made to individual homebuyers wishing to build a second or retirement home. Subsequent to the filing of our June 30, 2007 Quarterly Report on Form 10-Q, we assumed servicing of all loans purchased from TransLand. During our due diligence process related to the transfer of residential construction loan servicing from TransLand to the Bank, alleged fraudulent servicing practices were discovered. The majority of the alleged fraud related to the withholding of loan payoff proceeds and periodic payments. A joint petition for involuntary Chapter 11 bankruptcy was filed on August 23, 2007 in the United States Bankruptcy Court for the Middle District of Florida (Court) by the Bank and two other financial institutions against TransLand. A court-appointed examiner furnished a detailed report documenting the alleged fraudulent activity. In December 2007, the Court entered an order approving the petitioning banks' plan to agree to dismiss the bankruptcy petition in return for the agreement by TransLand and certain of its principal creditors to proceed with the liquidation and proportional distribution of TransLand's remaining assets. The liquidation of TransLand's assets is currently in process.

18

Despite these challenging economic conditions, we have reduced our total residential construction loan disbursements for TransLand-related homebuyers to \$58.5 million, prior to recording loan charge-offs, at December 31, 2007 compared to \$114.9 million at December 31, 2006. Approximately \$26.5 million of total nonperforming residential construction loans at December 31, 2007 had been purchased from TransLand. During the three months ended December 31, 2007, we charged off \$25.5 million of TransLand-related residential construction loans, due in large part to a decline in the estimated fair value of undeveloped residential lots, and set up additional provisions for loan losses relating to the loans acquired from TransLand.

The increase in nonperforming residential construction loans at December 31, 2007 was also attributable to an increase in nonperforming residential construction loans located in the Las Vegas, Nevada area. At December 31, 2007, we had three residential development construction loans totaling \$7.6 million in the Las Vegas, Nevada area which were classified as nonperforming.

Land and Land Development. Our nonperforming land development loans at December 31, 2007 totaled \$38.7 million which consisted of eight residential land development properties. Of the eight nonperforming residential land development properties, three were located in the Las Vegas, Nevada area which totaled \$30.4 million, one project in Colorado at \$5.7 million, two projects in the Minneapolis, Minnesota area totaling \$2.3 million and two projects in Florida totaling \$300,000. The three Las Vegas, Nevada area properties entered nonperforming status during the three months ended December 31, 2007. Currently, we are actively engaged in discussions with the developers or guarantors of these loans for purposes of bringing the loans current or developing workout solutions.

Commercial Construction. Nonperforming commercial construction loans totaled \$19.2 million at December 31, 2007. This balance represents two loans for the construction of upscale condominiums adjacent to a golf course located in a suburban area of Las Vegas, Nevada. We provided funding to construct 33 units, of which 23 units are under contract for purchase, within a planned 113-unit development. The units we have funded have been completed and the balance of the remaining units are in various stages of construction. Following the builder's voluntary bankruptcy filing, a trustee was appointed by the court and the trustee is identifying local builders and sales agents to complete the project and sell the remaining units.

Interest income that would have been recognized had nonperforming loans and troubled debt restructurings been current or in accordance with their original terms approximates \$10.8 million and \$1.8 million for the years ended December 31, 2007 and 2006, respectively.

Edgar Filing: TIERONE CORP - Form 10-K

Impaired Loans. Included in the preceding table, within nonperforming loans and troubled debt restructurings, are impaired loans of \$125.9 million and \$3.8 million at December 31, 2007 and 2006, respectively. At December 31, 2007, impaired loans consisted primarily of \$51.9 million of residential construction loans, \$51.1 million of land and land development loans and \$19.2 million of commercial construction loans. At December 31, 2007 we had \$24.8 million of loans which were not classified as nonperforming but were classified as impaired due to a decline in the fair market value of the underlying collateral securing such loans.

The average balance of impaired and restructured loans for the years ended December 31, 2007 and 2006 totaled \$58.4 million and \$11.4 million, respectively. Interest recognized on impaired and restructured loans for the years ended December 31, 2007 and 2006 was \$675,000 and \$725,000, respectively. We had established an allowance for loan losses related to impaired loans of \$24.6 million and \$152,000 at December 31, 2007 and 2006, respectively.

19

Real Estate Owned and Repossessed Assets. When we acquire real estate owned property or other assets through foreclosure, deed in lieu of foreclosure or repossession, it is initially recorded at the lower of the recorded investment in the corresponding loan or the fair value of the related assets at the date of foreclosure, less costs to sell. If there is a further deterioration in value, we provide for a specific valuation allowance and charge operations for the decline in value. We generally obtain an appraisal or broker's price opinion on all real estate subject to foreclosure proceedings prior to the time of foreclosure. It is our policy to require appraisals on a periodic basis on foreclosed properties as well as conduct inspections of such properties.

Real Estate Owned and Repossessed Asset Activity. The following table sets forth the activity of our real estate owned and repossessed assets for the periods indicated:

<i>(Dollars in thousands)</i>	Year Ended December 31,		
	2007	2006	2005
Balance at beginning of year	\$ 5,264	\$ 2,446	\$ 382
Loan foreclosures and other additions	9,292	10,495	3,485
Sales	(7,290)	(7,172)	(1,433)
Provisions for losses	(636)	(370)	(73)
Gain (loss) on disposal	(225)	(135)	85
Balance at end of year	\$ 6,405	\$ 5,264	\$ 2,446

At December 31, 2007, real estate owned consisted primarily of 36 residential properties totaling \$3.6 million and three commercial properties totaling \$2.8 million.

Classified Assets. Federal regulations and our Asset Classification Policy require that we utilize an internal asset classification system as a means of reporting problem and potential problem assets. We have incorporated the OTS's internal asset classifications as a part of our credit monitoring system. All assets are subject to classification. Asset quality ratings are divided into three asset classifications: Pass (unclassified), special mention and classified (adverse classification). Additionally, there are three adverse classifications: substandard, doubtful and loss. A pass asset is considered to be of sufficient quality to preclude a special mention or an adverse rating. The special mention asset has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or in our credit position at a future date. Classified assets receive an adverse classification. An asset is considered substandard if it is inadequately protected by the current net worth and paying capacity of the borrower or of the collateral pledged, if any. Substandard assets include those characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have all of the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. Assets classified as loss are those considered uncollectible and of such little value that their continuance as assets without the establishment of a specific loss reserve is not warranted. When we classify one or more assets, or portions thereof, as substandard, doubtful or loss, we establish a valuation allowance for loan losses in an amount deemed prudent by management based on the specific facts of the asset.

Our Asset Classification Committee reviews and classifies assets no less frequently than quarterly and our Board of Directors reviews the asset classification reports on a quarterly basis. The Asset Classification Committee is composed of the following officers of the Bank: Chief Executive Officer, Chief Operating Officer, Director of Lending, Chief Credit Officer, Director of Real Estate Lending, Chief Financial Officer, Controller, Director of Corporate Banking, Senior Financial Analysis Manager and External Reporting Manager.

20

Allowance for Loan Losses. A provision for loan losses is charged to earnings when it is determined by management to be required based on our analysis. The allowance for loan losses is maintained at a level to cover all known and inherent losses in the loan portfolio that are both probable and reasonable to estimate at each reporting date. Management reviews the loan portfolio no less frequently than quarterly in order to identify those inherent losses and to assess the overall collection probability of the portfolio. Our review includes a quantitative analysis by loan category, using historical loss experience, classifying loans pursuant to a grading system and consideration of a series of qualitative loss factors. These loss factors are developed using our historical loan loss experience for each group of loans as further adjusted for specific factors, including the following:

- Trends and levels of delinquent, nonperforming or impaired loans;
- Trends and levels of charge-offs and recoveries;
- Underwriting terms or guarantees for loans;
- Impact of changes in underwriting standards, risk tolerances or other changes in lending practices;
- Changes in the value of collateral securing loans;
- Total loans outstanding and the volume of loan originations;
- Type, size, terms and geographic concentration of loans held;
- Changes in qualifications or experience of the lending staff;
- Changes in local or national economic or industry conditions;
- Number of loans requiring heightened management oversight;
- Changes in credit concentration; and
- Changes in regulatory requirements.

Management believes that, based on information currently available to us at this time, our allowance for loan losses is maintained at a level which covers all known and inherent losses that are both probable and reasonable to estimate at each reporting date. Actual losses are dependent upon future events and, as such, further changes to the level of allowances for loan losses may become necessary.

The allowance for loan losses consists of two elements. The first element is an allocated allowance established for specific loans identified by the credit review function that are evaluated individually for impairment and are considered to be impaired. A loan is considered impaired when, based on current information and events, it is probable that we will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. Impairment is measured by: (a) the fair value of the collateral if the loan is collateral dependent; (b) the present value of expected future cash flows; or (c) the loan's observable market price. The second element is an estimated allowance established for losses which are probable and reasonable to estimate on each category of outstanding loans. While we utilize available information to recognize probable losses on loans inherent in the portfolio, future additions to the allowance may be necessary based on changes in economic conditions and other factors. In addition, various regulatory agencies, as an integral part of their examination process, periodically review our allowance for loan losses. Such agencies may require us to recognize additions to the allowance based on their judgment of information available to them at the time of their examination.

Allowance for Loan Losses. The following table shows changes in our allowance for loan losses during the years presented:

<i>(Dollars in thousands)</i>	At or For the Year Ended December 31,				
	2007	2006	2005	2004	2003
Allowance for loan losses at beginning of year	\$ 33,129	\$ 30,870	\$ 26,831	\$ 19,586	\$ 17,108
Allowance for loan losses acquired	--	--	--	4,221	--
Charge-offs:

Residential construction	(26,385)	(368)	(114)	(138)	(13)
Business	(1,964)	(1,021)	(608)	(57)	(5)

Edgar Filing: TIERONE CORP - Form 10-K

At or For the Year Ended December 31,

Agriculture - operating	--	(227)	--	(64)	--
Warehouse mortgage lines of credit	--	--	--	(20)	(110)
Consumer	(2,250)	(1,550)	(1,192)	(1,421)	(1,368)
Total charge-offs	(33,037)	(4,107)	(3,063)	(2,236)	(1,939)
Recoveries on loans previously charged-off	1,066	313	666	373	146
Provision for loan losses	65,382	6,053	6,436	4,887	4,271
Allowance for loan losses at end of year	\$ 66,540	\$ 33,129	\$ 30,870	\$ 26,831	\$ 19,586
Allowance for loan losses as a percentage of net loans	2.24%	1.09%	1.09%	1.01%	0.96%
Allowance for loan losses as a percentage of nonperforming loans	51.79%	110.25%	214.30%	262.23%	541.65%
Ratio of net charge-offs during the year as a percentage of average loans outstanding during the year	1.07%	0.13%	0.09%	0.08%	0.10%

We generally discontinue funding of loans which become nonperforming or are deemed impaired unless additional funding is required to protect the asset. In addition, due to certain laws and regulations in selected states, some additional funding may be required. Our reserve for unfunded loan commitments at December 31, 2007 totaled \$2.7 million which represents potential future losses associated with these unfunded commitments.

22

Allowance for Loan Losses by Loan Type. The following table shows how our allowance for loan losses is allocated by type of loan at each of the dates indicated:

Investment Activities

Federally chartered savings institutions have the authority to invest in various types of liquid assets, including United States Treasury obligations, securities of various federal agencies, time deposits of insured banks and savings institutions, bankers' acceptances, repurchase agreements and federal funds. Subject to various restrictions, federally chartered savings institutions may also invest in commercial paper, investment-grade corporate debt securities and mutual funds whose assets conform to the investments that a federally chartered savings institution is otherwise authorized to make directly. Historically, we have maintained liquid assets at a level considered to be adequate to meet our normal daily activities.

Our investment policy, as approved by our Board of Directors, requires management to maintain adequate liquidity and to generate a favorable return on investment without incurring undue interest rate and credit risk. We primarily utilize investments to collateralize deposits. Additionally, we may use investment securities for liquidity management, as a method of deploying excess funding not utilized for loan originations and purchases. We have invested in U.S. Government securities and agency obligations, corporate securities, municipal obligations, agency equity securities, mutual funds, U.S. Government sponsored agency issued mortgage-backed securities and collateralized mortgage obligations. As required by SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, we have established an investment portfolio of securities that are categorized as held to maturity or available for sale. We do not currently maintain a portfolio of securities categorized as trading. Substantially all of our investment securities are purchased for the available for sale portfolio which totaled \$130.5 million, or 3.7% of total assets, at December 31, 2007. At such date, we had net unrealized losses with respect to such securities of \$161,000. Losses due to other-than-temporary impairment were \$188,000 for the year ended December 31, 2007. At December 31, 2007, the held to maturity securities portfolio totaled \$70,000.

At December 31, 2007, our mortgage-backed security portfolio (which was classified as available for sale) totaled \$6.7 million, or 0.2% of total assets. At such date, we had net unrealized losses with respect to our mortgage-backed securities of \$66,000. Investments in mortgage-backed securities involve a risk that actual prepayments will be greater than estimated prepayments over the life of the security, which may require adjustments to the amortization of any premium or accretion of any discount relating to such instruments thereby changing the net yield on such securities. There is also reinvestment risk associated with the cash flows from such securities or in the event the issuer redeems such securities. In addition, the fair value of such securities may be adversely affected by changes in interest rates.

The Government National Mortgage Association (GNMA) is a government agency within the Department of Housing and Urban Development which is intended to help finance government-assisted housing programs. GNMA securities are backed by loans insured by the

Edgar Filing: TIERONE CORP - Form 10-K

Federal Housing Administration or guaranteed by the Veterans Administration. The timely payment of principal and interest on GNMA securities is guaranteed by GNMA and backed by the full faith and credit of the U.S. Government. FHLMC is a private corporation chartered by the U.S. Government. FHLMC issues participation certificates backed principally by conventional mortgage loans. FHLMC guarantees the timely payment of interest and the ultimate return of principal on participation certificates. FNMA is a private corporation chartered by the U.S. Congress with a mandate to establish a secondary market for mortgage loans. FNMA guarantees the timely payment of principal and interest on FNMA securities. FHLMC and FNMA securities are not backed by the full faith and credit of the U.S. Government, but because FHLMC and FNMA are U.S. Government-sponsored enterprises, these securities are considered to be among the highest quality investments with minimal credit risks.

Total temporarily impaired securities	\$ 9,134	\$ 176	\$ 61,669	\$ 1,065	\$ 70,803	\$ 1,241
<hr/>						

We believe all unrealized losses at December 31, 2007 and 2006 to be market related, with no permanent sector or issuer credit concerns or impairments. The unrealized losses are believed to be temporarily impaired in value. Impairment is deemed temporary if the positive evidence indicating that an investment's carrying amount is recoverable within a reasonable time period outweighs negative evidence to the contrary. At

Edgar Filing: TIERONE CORP - Form 10-K

December 31, 2007, we had the ability and intent to hold these securities until maturity.

27

Sources of Funds

General. Our primary sources of funds are deposits; amortization of loans, loan prepayments and maturity of loans; repayment, maturity or sale of investment and mortgage-backed securities; and other funds provided from operations. While scheduled payments from the amortization of loans and mortgage-backed securities and maturing investment securities are relatively predictable sources of funds, deposit flows and loan prepayments can be greatly influenced by general interest rates, economic conditions and competition. We utilize FHLBank advances and other borrowings and brokered time deposits as additional funding sources.

Deposits. As a regional community bank, we offer a variety of products designed to attract deposits from the general public, local businesses and governmental entities. Our product offerings consist of checking (both interest- and noninterest-bearing), money market, savings, time deposits and individual retirement accounts. We also may use brokered time deposits as an alternative source of funds. During 2007, deposits generated through our retail banking facilities increased \$378.2 million or 18.4%. At December 31, 2005 we had brokered time deposits of \$78.0 million. We did not have any brokered time deposits at December 31, 2007 and 2006.

Deposit Composition. The following table shows the distribution of, and certain other information relating to, our deposits by type of deposit, as of the dates indicated:

(Dollars in thousands)	At December 31,					
	2007		2006		2005	
	Amount	%	Amount	%	Amount	%
Time deposits:

Total time deposits exceeding \$100,000	\$ 337,316	5.10%

Borrowings. We utilize advances from the FHLBank as an alternative to retail deposits to fund our operations as part of our operating strategy. The FHLBank is part of a system of 12 regional Federal Home Loan Banks, each subject to Federal Housing Finance Board supervision and regulation, that function as a central reserve bank providing credit to financial institutions. As a condition of membership in the FHLBank we are required to own stock of the FHLBank. Our FHLBank advances are collateralized by our qualifying residential, multi-family residential and commercial real estate mortgages, residential construction, commercial construction and agricultural real estate loans, and secondarily by our investment in capital stock of the FHLBank. FHLBank advances are made pursuant to several different credit programs, each of which has its own interest rate and range of maturities. The maximum amount that the FHLBank will advance to member institutions, including us, fluctuates from time to time in accordance with the policies of the FHLBank. At December 31, 2007 and 2006, we had \$634.2 million and \$907.2 million, respectively, in outstanding FHLBank advances.

On April 26, 2004, we formed TierOne Capital Trust I (TierOne Capital Trust), which issued capital securities (Trust Preferred Securities) to investors. The proceeds from the sale of the Trust Preferred Securities were used to purchase \$30.9 million of our junior subordinated debentures (debentures). The debentures are callable at par in June 2009 and mature in June 2034. Our obligation under the debentures constitutes a full and unconditional guarantee of TierOne Capital Trust s obligations under the Trust Preferred Securities. In accordance with Interpretation No. 46 (Revised), *Consolidation of Variable Interest Entities* (FIN 46R), the trust is not consolidated and related amounts are treated as debt of the Company.

In connection with our acquisition of UNFC on August 27, 2004, we assumed \$7.0 million of variable rate debentures that had been issued on November 28, 2001 by United Nebraska Capital Trust, a trust formed by UNFC. We exercised our right to call and retire these debentures in December 2006.

30

FHLBank Advances and Other Borrowings. The following table shows certain information regarding our borrowings at or for the dates indicated:

<i>(Dollars in thousands)</i>	At or For the Year Ended December 31,

31

Subsidiary Activities

TierOne Bank is the wholly owned subsidiary of TierOne Corporation. TMS Corporation of the Americas is the wholly owned subsidiary of TierOne Bank and holds all of the stock of TierOne Investments and Insurance, Inc. (d/b/a TierOne Financial) and TierOne Reinsurance Company. TierOne Financial provides a wide selection of investment and insurance products, equity securities, mutual funds and annuities. These products are made available to consumers via licensed representatives in our banking offices. TierOne Reinsurance Company reinsures credit life and disability insurance which is sold in conjunction with the origination of consumer loans by TierOne Bank. United Farm & Ranch Management, Inc. is a wholly owned subsidiary of TierOne Bank that provides agricultural customers with professional farm and ranch management and real estate brokerage services.

Personnel

As of December 31, 2007, 2006 and 2005, we had 862, 850 and 772 full-time equivalent employees, respectively. Employees are not represented by a collective bargaining unit and we consider our relationship with our employees to be good.

Regulation and Supervision

The following is not intended to be a complete discussion but is intended to be a summary of some of the more significant provisions of laws and regulations which are applicable to the Company and the Bank. This regulatory framework is intended to protect depositors, federal deposit insurance funds and the banking system as a whole, and not to protect security holders. To the extent that the information describes statutory and regulatory provisions, it is qualified in its entirety by reference to those provisions. Additionally, such statutes, regulations and policies are continually under review by Congress and state legislatures, and federal and state regulatory agencies. A change in statutes, regulations or regulatory policies applicable to the Company or the Bank, including changes in interpretations, could have a material effect on our business.

General. The Bank, as a federally chartered stock savings bank, is subject to OTS regulations, examinations and reporting requirements. The Bank is also subject to regulation and examination by the Federal Deposit Insurance Corporation (FDIC), which insures the deposits of the Bank to the maximum extent permitted by law and requirements established by the Board of Governors of the Federal Reserve System. The investment and lending authority of savings institutions is prescribed by federal laws and regulations and such institutions are prohibited from engaging in any activities not permitted by such laws and regulations. Such regulation and supervision primarily is intended for the protection of depositors and not for the purpose of protecting stockholders.

The OTS regularly examines the Bank and prepares reports for consideration by our Board of Directors on any deficiencies that it may find in the Bank's operations. The FDIC also has the authority to examine the Bank in its role as the administrator of the Deposit Insurance Fund. The Bank's relationship with its depositors and borrowers is also regulated to a great extent by both federal, and to a lesser extent, state laws, especially in such matters as the ownership of deposit accounts and the form and content of the Bank's mortgage requirements. The OTS enforcement authority over all savings institutions and their holding companies includes, among other things, the ability to assess civil money penalties, to issue cease and desist or removal orders and to initiate injunctive actions. In general, these enforcement actions may be initiated for violations of laws and regulations and unsafe or unsound practices. Other actions or inactions may provide the basis for enforcement action, including misleading or untimely reports filed with the OTS. Any change in such laws or regulations, whether by the FDIC, the OTS or the Congress, could have a material adverse impact on our operations.

Insurance of Deposit Accounts. Deposit accounts are insured by the FDIC generally up to a maximum of \$100,000 per account and up to a maximum of \$250,000 for self-directed retirement accounts. Our deposits, therefore, are subject to FDIC deposit insurance assessments.

On November 2, 2006, the FDIC adopted final regulations that assess insurance premiums based on risk. As a result, the new regulations will enable the FDIC to more closely tie each financial institution's deposit insurance premiums to the risk it poses to the Deposit Insurance Fund. Under the new risk-based assessment system, the FDIC will evaluate the risk of each financial institution based on its supervisory rating, financial ratios and its long-term debt issuer rating. The new rates for most financial institutions vary between five and seven cents for every

\$100 of domestic deposits.

We were not required to pay any deposit insurance assessments for the year ended December 31, 2007. Under the Federal Deposit Insurance Reform Act of 2005, which became law in 2006, we received a one-time assessment credit of \$1.9 million that could be applied against future premiums, subject to certain limitations. This credit was utilized during the year ended December 31, 2007 to offset \$1.5 million of deposit insurance assessments. We estimate that we will exhaust our remaining credit during the first quarter of 2008.

All FDIC-insured depository institutions must pay an annual assessment to provide funds for the payment of interest on bonds issued by the Financing Corporation (FICO), a federal corporation chartered under the authority of the Federal Housing Finance Board. The bonds (referred to as FICO bonds) were issued to capitalize the Federal Savings and Loan Insurance Corporation. The FICO has assessment authority, separate from the FDIC's authority to assess risk-based premiums for deposit insurance, to collect funds from FDIC-insured institutions sufficient to pay interest on FICO bonds. The FDIC acts as a collection agent for the FICO. The FICO assessment rate effective for the first quarter of 2008 is 1.14 cents annually per \$100 of assessable deposits. These assessments will continue until the FICO bonds mature in 2019.

Regulatory Capital Requirements. Pursuant to the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA), the OTS adopted regulations implementing new capital standards applicable to all savings associations, including the Bank. Such capital standards require that savings associations maintain: (a) capital of not less than 1.5% of adjusted total assets (Tangible Capital); (b) core (Tier 1) capital of not less than 4% of adjusted total assets; and (c) total risk-based capital of not less than 8% of risk-weighted assets. As of December 31, 2007, the Bank met all regulatory capital requirements. The OTS is authorized to impose capital requirements in excess of those standards on individual institutions on a case-by-case basis.

Under the tangible capital requirement, a savings bank must maintain tangible capital in an amount equal to at least 1.5% of adjusted total assets. Tangible capital is defined as core capital less all intangible assets and goodwill, plus a specified amount of purchased mortgage servicing rights.

Under the Core (Tier 1) capital requirement adopted by the OTS, savings banks must maintain core capital in an amount equal to at least 4.0% of adjusted total assets. Core (Tier 1) capital consists of: common stockholders' equity (including retained earnings), non-cumulative perpetual preferred stock, certain non-withdrawable and pledged deposits; and minority interests in the equity accounts of consolidated subsidiaries plus purchased mortgage servicing rights valued at the lower of 90% of fair value, 90% of original cost or the current amortized book value as determined in conformity with U.S. generally accepted accounting principles (GAAP) and goodwill, less non-qualifying intangible assets.

Under the risk-based capital requirement, a savings bank must maintain total capital (which is defined as core capital plus supplementary capital) equal to at least 8.0% of risk-weighted assets. A savings bank must calculate its risk-weighted assets by multiplying each asset and off-balance sheet item by various risk factors, which range from 0% for cash and securities issued by the United States Government or its agencies to 100% for repossessed assets or loans more than 90 days past due. Supplementary capital may include, among other items, cumulative perpetual preferred stock, perpetual subordinated debt, mandatory convertible subordinated debt, intermediate-term preferred stock and general allowances for loan losses. The allowance for loan losses includable in supplementary capital is limited to 1.25% of risk-weighted assets. The amount of supplementary capital that can be included is limited to 100% of core capital.

Certain exclusions from capital and assets are required to be made for the purpose of calculating total capital, in addition to the adjustments required for calculating core capital. However, in calculating regulatory capital, institutions can add back unrealized losses and deduct unrealized gains net of taxes, on debt securities reported as a separate component of capital calculated according to GAAP.

OTS regulations establish special capitalization requirements for savings banks that own service corporations and other subsidiaries, including subsidiary savings banks. According to these regulations, certain subsidiaries are consolidated for capital purposes and others are excluded from assets and capital. In determining compliance with the capital requirements, all subsidiaries engaged solely in activities permissible for national banks, engaged solely in mortgage-banking activities or engaged in certain other activities solely as agent for its customers are includable subsidiaries that are consolidated for capital purposes in proportion to the Bank's level of ownership, including the assets of includable subsidiaries in which the Bank has a minority interest that is not consolidated for GAAP purposes. For excludable subsidiaries, the debt and equity investments in such subsidiaries are deducted from assets and capital. At December 31, 2007, the Bank had \$1.2 million of investments subject to a deduction from tangible capital.

Under current OTS policy, savings institutions must value securities available for sale at amortized cost for regulatory capital purposes. This means that in computing regulatory capital, savings institutions should add back any unrealized losses and deduct any unrealized gains, net

Edgar Filing: TIERONE CORP - Form 10-K

of income taxes, on securities reported as a separate component of capital calculated according to GAAP.

The OTS and the FDIC generally are authorized to take enforcement action against a savings bank that fails to meet its capital requirements, which action may include restrictions on operations and banking activities, the imposition of a capital directive, a cease-and-desist order, civil money penalties or harsher measures such as the appointment of a receiver or conservator or a forced merger into another institution. In addition, under current regulatory policy, a savings bank that fails to meet its capital requirements is prohibited from paying any dividends.

At December 31, 2007, the Bank exceeded all of its regulatory capital requirements. For more information see *Note 19 Regulatory Capital Requirements* included in Item 8. Financial Statements and Supplementary Data, in Part II of this Annual Report on Form 10-K.

Prompt Corrective Action. Under the prompt corrective action regulations, the OTS is required and authorized to take supervisory actions against undercapitalized savings associations. For this purpose, a savings institution is placed in one of the following five categories based on the savings institutions capital:

well-capitalized (at least 5% leverage capital, 6% Tier 1 risk-based capital and 10% total risk-based capital);
adequately capitalized (at least 4% leverage capital, 4% Tier 1 risk-based capital and 8% total risk-based capital);
undercapitalized (less than 3% leverage capital, 4% Tier 1 risk-based capital or 8% total risk-based capital);
significantly undercapitalized (less than 3% leverage capital, 3% Tier 1 risk-based capital or 6% total risk-based capital); and
critically undercapitalized (less than 2% tangible capital)

Generally, the banking regulator is required to appoint a receiver or conservator for a savings association that is critically undercapitalized within specific time frames. The regulations also provide that a capital restoration plan must be filed with the OTS within 45 days of the date a savings institution receives notice that it is undercapitalized, significantly undercapitalized or critically undercapitalized. Any holding company for a savings institution required to submit a capital restoration plan must guarantee the lesser of an amount equal to 5% of the savings institution's assets at the time it was notified or deemed to be undercapitalized by the OTS, or the amount necessary to restore the savings institution to adequately capitalized status. This guarantee remains in place until the OTS notifies the savings institution that it has maintained adequately capitalized status for each of four consecutive calendar quarters, and the OTS has the authority to require payment and collect payment under the guarantee. Failure by a holding company to provide the required guarantee will result in certain operating restrictions on the savings institution, such as restrictions on the ability to declare and pay dividends, pay executive compensation and management fees and increase assets or expand operations. The OTS may also take any number of discretionary supervisory actions against undercapitalized institutions, including the issuance of a capital directive and the replacement of senior executive officers and directors.

At December 31, 2007, the Bank met the criteria for being considered a well capitalized institution.

34

Safety and Soundness Guidelines. Federal law requires each federal banking agency to prescribe certain standards for all insured depository institutions. These standards relate to, among other things, internal controls, information systems and audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, compensation and other operational and managerial standards as the agency deems appropriate. The federal banking agencies adopted Interagency Guidelines Prescribing Standards for Safety and Soundness to implement the safety and soundness standards required under federal law. The guidelines set forth the safety and soundness standards that the federal banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. If the appropriate federal banking agency determines that an institution fails to meet any standard prescribed by the guidelines, the agency may require the institution to submit to the agency an acceptable plan to achieve compliance with the standard. If an institution fails to meet these standards, the appropriate federal banking agency may require the institution to submit a compliance plan. The Bank believes that it is in compliance with these guidelines and standards.

Capital Distributions. OTS regulations govern capital distributions by savings institutions, which include cash dividends, stock repurchases and other transactions charged to the capital account of a savings institution. A savings institution must file an application for OTS approval of the capital distribution if any of the following occur or would occur as a result of the capital distribution:

the total capital distributions for the applicable calendar year exceed the sum of the institution's net income for that year to date plus the institution's retained net income for the preceding two years;
the institution would not be at least adequately capitalized following the distribution;
the distribution would violate any applicable statute, regulation, agreement or OTS-imposed condition; or
the institution is not eligible for expedited treatment of its filings.

Edgar Filing: TIERONE CORP - Form 10-K

Even if an application is not otherwise required, every savings institution that is a subsidiary of a holding company must still file a notice with the OTS at least 30 days before the board of directors declares a dividend or approves a capital distribution.

Branching by Federal Savings Institutions. OTS policy permits interstate branching to the full extent permitted by statute (which is essentially unlimited). Generally, federal law prohibits federal savings institutions from establishing, retaining or operating a branch outside the state in which the federal institution has its home office unless the institution meets the Internal Revenue Service (IRS) domestic building and loan test (generally, 60% of a thrift's assets must be housing-related) (IRS Test). The IRS Test requirement does not apply if: (a) the branch(es) result(s) from an emergency acquisition of a troubled savings institution (however, if the troubled savings institution is acquired by a bank holding company, does not have its home office in the state of the bank holding company bank subsidiary and does not qualify under the IRS Test, its branching is limited to the branching laws for state-chartered banks in the state where the savings institution is located); (b) the law of the state where the branch would be located would permit the branch to be established if the federal savings institution were chartered by the state in which its home office is located; or (c) the branch was operated lawfully as a branch under state law prior to the savings institution's reorganization to a federal charter.

Furthermore, the OTS will evaluate a branching applicant's record of compliance with the Community Reinvestment Act of 1977 (CRA). An unsatisfactory CRA record may be the basis for denial of a branching application.

Community Reinvestment Act and the Fair Lending Laws. Under the Community Reinvestment Act (CRA), as implemented by FDIC regulations, an institution has a continuing and affirmative obligation consistent with its safe and sound operation to help meet the credit needs of its entire community, including low and moderate income neighborhoods. The CRA does not establish specific lending requirements or programs for financial institutions, nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community, consistent with the CRA. The CRA requires the FDIC, in connection with its examinations, to assess the institution's record of meeting the credit needs of its community and to take such record into account in its evaluation of certain applications by such institutions. In addition, the Equal Credit Opportunity Act and the Fair Housing Act prohibit lenders from discriminating in their lending practices on the basis of characteristics specified in those statutes. An institution's failure to comply with the provisions of the CRA could, at a minimum, result in regulatory restrictions on its activities, and failure to comply with the fair lending laws could result in enforcement actions by the OTS, as well as other federal regulatory agencies and the Department of Justice. The Bank received a satisfactory CRA rating in its recent federal examination.

35

Loans-to-One Borrower Limitations. Generally, a federal savings institution may not make a loan or extend credit to a single or related group of borrowers in excess of 15% of unimpaired capital and surplus (this amount was approximately \$54.2 million at December 31, 2007). An additional amount may be loaned, equal to 10% of unimpaired capital and surplus, if the loan is secured by readily marketable collateral, which generally does not include real estate. As of December 31, 2007, we were in compliance with the loans-to-one borrower limitations.

Qualified Thrift Lender Test. As a federal savings institution, we are required to satisfy the qualified thrift lender (QTL) test. Under the QTL test, we must maintain at least 65% of our portfolio assets in qualified thrift investments (primarily residential mortgages and related investments, including mortgage-backed securities) in at least nine months of the most recent 12-month period. Portfolio assets generally means total assets of a savings institution, less the sum of specified liquid assets up to 20% of total assets, goodwill and other intangible assets and the value of property used to conduct the savings institutions business. We may also satisfy the QTL test by qualifying as a domestic building and loan association as defined in the Internal Revenue Code. A savings institution that fails the QTL test must either convert to a bank charter or operate under specified restrictions.

At December 31, 2007, approximately 78.1% of the portfolio assets of the Bank were qualified thrift investments.

Federal Reserve System. The Bank is subject to various regulations promulgated by the Federal Reserve, including, among others, Regulation B (Equal Credit Opportunity), Regulation D (Reserves), Regulation E (Electronic Funds Transfers), Regulation Z (Truth in Lending), Regulation CC (Availability of Funds), and Regulation DD (Truth in Savings). Regulation D requires noninterest-bearing reserve maintenance in the form of either vault cash or funds on deposit at Federal Reserve Bank of Kansas City or another designated depository institution in an amount calculated by formula. The balances maintained to meet the reserve requirements imposed by the Federal Reserve may be used to satisfy liquidity requirements. At December 31, 2007, the Bank was in compliance with these reserve requirements.

Savings banks are authorized to borrow from a Federal Reserve Bank (FRB) discount window, but FRB regulations require savings banks to exhaust other reasonable alternative sources of funds, including FHLBank advances, before borrowing from a Federal Reserve Bank.

Affiliate Restrictions. Section 11 of the Home Owners' Loan Act provides that transactions between an insured subsidiary of a holding company and an affiliate thereof will be subject to the restrictions that apply to transactions between banks that are members of the Federal Reserve System and their affiliates pursuant to Sections 23A and 23B of the Federal Reserve Act.

Edgar Filing: TIERONE CORP - Form 10-K

Generally, Section 23A and 23B and OTS regulations issued in connection therewith limit the extent to which a savings institution or its subsidiaries may engage in certain covered transactions with affiliates to an amount equal to 10% of the institution's capital stock and surplus, in the case of covered transactions with any one affiliate, and to an amount equal to 20% of such capital stock and surplus, in the case of covered transactions with all affiliates. Section 23B applies to covered transactions and certain other transactions and requires that all such transactions be on terms and under circumstances that are substantially the same, or at least as favorable to the savings institution or its subsidiary, as those prevailing at the time for comparable transactions with nonaffiliated companies. A covered transaction is defined to include a loan or extension of credit to an affiliate; a purchase of investment securities issued by an affiliate; a purchase of assets from an affiliate, with certain exceptions; the acceptance of securities issued by an affiliate as collateral for a loan or extension of credit to any party; or the issuance of a guarantee, acceptance or letter of credit on behalf of an affiliate. Section 23B transactions also apply to the provision of services and the sale of assets by a savings association to an affiliate.

In addition, under OTS regulations, a savings institution may not make a loan or extension of credit to an affiliate unless the affiliate is engaged only in activities permissible for bank holding companies; a savings institution may not purchase or invest in securities of an affiliate other than shares of a subsidiary; a savings institution and its subsidiaries may not purchase a low-quality asset from an affiliate; and covered transactions and certain other transactions between a savings institution or its subsidiaries and an affiliate must be on terms and conditions that are consistent with safe and sound banking practices. With certain exceptions, each loan or extension of credit by a savings institution to an affiliate must be secured by collateral with a fair value of at least 100% (depending on the type of collateral) of the amount of the loan or extension of credit.

36

The OTS regulation generally excludes all non-bank and non-savings institution subsidiaries of savings institutions from treatment as affiliates, except to the extent that the OTS or the FRB decides to treat such subsidiaries as affiliates. The regulation also requires savings institutions to make and retain records that reflect affiliate transactions in reasonable detail, and provides that certain classes of savings institutions may be required to give the OTS prior notice of affiliate transactions.

The U.S.A. Patriot Act. In December 2001, the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA Patriot Act) became effective. The USA Patriot Act is designed to combat money laundering and terrorist financing while protecting the United States financial system. The USA Patriot Act imposes enhanced policy, record keeping and due diligence requirements on domestic financial institutions. The USA Patriot Act also amended the Bank Secrecy Act to facilitate access to customer account information by government officials while immunizing banks from liability for releasing such information. Among other requirements, Title III of the USA Patriot Act and related OTS regulations impose the following requirements with respect to financial institutions:

- Establishment of anti-money laundering programs;
- Establishment of a program specifying procedures for obtaining identifying information from customers seeking to open new accounts, including verifying the identity of customers within a reasonable period of time;
- Establishment of enhanced due diligence policies, procedures and controls designed to detect and report money laundering; and
- Prohibition on correspondent accounts for foreign shell banks and compliance with record keeping obligations with respect to correspondent accounts of foreign banks.

In addition, bank regulators are directed to consider a holding company's effectiveness in combating money laundering when ruling on Federal Reserve Act and Bank Merger Act applications.

37

Item 1A. Risk Factors

In addition to other information contained in this Annual Report on Form 10-K, the following risk factors should be considered in evaluating our business. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may adversely affect our business, financial condition and/or results of operations.

No assurance can be given that we will complete our proposed Merger with CapitalSource.

The Merger Agreement provides that either the Company or CapitalSource (each acting through its respective Board of Directors) has the right at any time after February 17, 2008 to unilaterally terminate the Merger Agreement, unless the failure to effect the Merger by such date was due to the terminating party's failure to perform its obligations and covenants under the Merger Agreement. The Company has indicated that its present intent is not to terminate the Merger Agreement pending receipt of further comment from the OTS. Conversely, CapitalSource has

No assurance can be given that we will complete our proposed Merger with CapitalSource.

31

Edgar Filing: TIERONE CORP - Form 10-K

publicly advised that its Board of Directors has authorized its Chairman and Chief Executive Officer to either terminate the Merger Agreement or negotiate new terms for the transaction. In light of the preceding sentence, the Company can provide no assurance that the Merger will be completed even if all conditions precedent to the transaction (including receipt of regulatory approval) are satisfied.

CapitalSource and the Company must obtain regulatory approvals to complete the Merger, which, if delayed, not granted, or granted with unacceptable conditions, may jeopardize or postpone the completion of the Merger, result in additional expenditures of money and resources or reduce the anticipated benefits of the Merger.

CapitalSource and the Company must obtain certain approval in a timely manner from the OTS prior to completion of the Merger. If CapitalSource and the Company do not receive the OTS's approval, or do not receive it on terms that satisfy the conditions set forth in the Merger Agreement, then neither party will be obligated, or in some cases permitted, to complete the Merger. The OTS has broad discretion in administering the governing statutes and regulations. As a condition to approval of the Merger, the OTS may impose requirements, limitations or costs that could negatively affect the way the combined companies conduct business. These requirements, limitations or costs could jeopardize or delay the completion of the Merger.

Companies holding more than 10% of the outstanding shares of CapitalSource common stock may affect or delay the approval of the Merger by the OTS. If these holders do not become savings and loan holding companies, or the OTS does not accept a rebuttal of control from them, regulatory approval of the Merger would not be obtainable, and the Merger could not be completed.

Under the OTS's regulations, companies holding more than 10% of CapitalSource's outstanding common stock may be presumed to control CapitalSource, subject to the opportunity to rebut this presumption by obtaining the OTS's acceptance of a rebuttal submission. If a company holding 10% or more of CapitalSource's outstanding common stock does not rebut the presumption of control, or reduce its holdings to less than 10% of CapitalSource's outstanding common stock, it would be required to obtain the approval of the OTS to become a savings and loan holding company prior to completion of the Merger. Some or all of CapitalSource's 10% or greater stockholders may not be willing to become a savings and loan holding company. As a result, if the OTS does not accept a rebuttal of control from them, then regulatory approval of the Merger would not be obtainable, and the Merger could not be completed.

Failure to complete the Merger could negatively impact our stock price and future business and operations.

If the Merger is not completed, we may be subject to a number of material risks, including the following:

the price of our common stock may decline if the current market price of our common stock reflects a market assumption that the Merger will be completed; and
our costs related to the Merger, such as legal, accounting and certain financial advisor fees, generally must be paid even if the Merger is not completed.

In addition, our customers and suppliers may, in response to the announcement of the Merger, delay or defer decisions concerning us. Any delay or deferral in those decisions by our customers or suppliers could have a material adverse effect on our business, regardless of whether or not the Merger is ultimately completed. Similarly, current and prospective employees may experience uncertainty about their future role with CapitalSource until CapitalSource's strategies with regard to us are announced or executed. This uncertainty may adversely affect our ability to attract and retain key management, sales, marketing and technical personnel.

Further, if the Merger is terminated and our Board of Directors decides to pursue another merger or business combination, there can be no assurance that we will be able to find a partner willing to pay an equivalent or more attractive price than CapitalSource would have paid in the Merger.

Because the market price of CapitalSource common stock will fluctuate, our stockholders cannot be sure of the value of the merger consideration they will receive if the Merger is effected.

If the Merger is completed, the holders of each share of Company common stock owned prior to the closing of the Merger will be entitled to receive for each such share:

\$6.80 in cash; plus
0.675 shares of CapitalSource common stock; plus
If the ten-day average closing price of CapitalSource common stock prior to the closing of the Merger is:

Because the market price of CapitalSource common stock will fluctuate, our stockholders cannot be sure of the value of the merger consideration they will receive if the Merger is effected.

Edgar Filing: TIERONE CORP - Form 10-K

- a) less than or equal to \$25.1852, then 0.405 shares of CapitalSource common stock; or
- b) greater than \$25.1852, then TierOne Corporation stockholders can elect to receive either \$10.20 in cash or \$10.20 of CapitalSource common stock.

Under the Merger Agreement, the stated maximum amount of CapitalSource stock that a Company stockholder may receive is 1.08 shares. To the extent the merger consideration is paid in CapitalSource shares, any change in the market price of CapitalSource common stock prior to completion of the Merger will affect the value of the merger consideration that our stockholders will receive upon completion of the Merger. Because of this market risk, prior to the election deadline, our stockholders will not know or be able to calculate the number or the value of the shares of CapitalSource common stock they will receive upon completion of the Merger. Accordingly, the specific dollar value of CapitalSource common stock a stockholder will receive will depend on the market value of CapitalSource common stock at the time the Merger is completed and may decrease from the date the stockholder makes an election as to the third component of the merger consideration. Stock price changes may result from a variety of factors, including general market and economic conditions, changes in the Company's or CapitalSource's respective businesses, operations and prospects, and regulatory considerations. Many of these factors are beyond our control.

In the event the Merger is completed, CapitalSource and the Company may fail to realize all of the anticipated benefits of the Merger.

We entered into the Merger Agreement with the expectation that the Merger will result in significant benefits for both companies. Achieving the benefits of the Merger will depend in part on integrating the operations and personnel of the two companies in a timely and efficient manner to minimize the risk that the Merger will result in the loss of customers or key employees or the diversion of management's attention from other important issues. This integration may or may not be successful. Assuming that the Merger is effected, we cannot offer any assurances that we and CapitalSource can successfully integrate or realize any of the anticipated benefits.

Applicable regulations affecting savings and loan holding companies could negatively impact both CapitalSource's commercial lending and investing business and the business of the Bank following the Merger.

Currently, CapitalSource is not regulated as a savings and loan holding company or bank holding company and does not control any FDIC-insured depository institution. Savings banks such as the Bank are subject to extensive regulation of their activities and investments, their capitalization, their risk management policies and procedures, and their relationships with affiliated companies. Upon acquiring control of the Bank and becoming a savings and loan holding company assuming that the Merger is effected, CapitalSource's operations would be limited to financial and certain real estate-related activities. These limitations may require CapitalSource to curtail or divest some of its current commercial lending and investment business activities. For instance, in connection with its loans used by financial sponsors to finance purchases of companies, CapitalSource commonly is granted the opportunity to acquire equity in a borrower at the same time and on substantially the same terms as the financial sponsor. Some of these equity investments exceed 5% of the borrower's equity. If CapitalSource does not acquire merchant banking authority that will enable it to conform these equity investments of more than 5% in non-financial entities to the requirements of the Home Owners' Loan Act within two years of the acquisition of the Company, it will be required to divest them.

In addition, as a condition to approving the Merger, the OTS may impose restrictions on the integration of the Bank's banking and CapitalSource's commercial lending and investing businesses, and may require prior approval of any future material changes to the Bank's business plans. These regulations and conditions could constrain CapitalSource in pursuing future business opportunities following the Merger. These regulations and conditions, and CapitalSource's inexperience with them, could also affect CapitalSource's ability to realize synergies from the Merger, and could negatively affect both CapitalSource and the Bank following the Merger.

The value of the CapitalSource common stock our stockholders receive in the Merger may fluctuate after the Merger. Neither CapitalSource nor the Company can predict how the CapitalSource common stock will trade subsequent to the closing of the Merger if the Merger is completed.

Stock price changes may result from a variety of factors, including general market and economic conditions, changes in CapitalSource's businesses, operations and prospects, and regulatory considerations. Many of these factors are beyond CapitalSource's control. The market price of CapitalSource common stock may decline as a result of the Merger if:

- the integration of CapitalSource and the Company is unsuccessful;
- CapitalSource and the Company do not achieve the perceived benefits of the Merger as rapidly or to the extent anticipated by financial or industry analysts; or
- the effect of the Merger on the combined company's financial results is not consistent with the expectations of financial or industry analysts.

The Merger Agreement limits our ability to pursue alternatives to the Merger.

The Merger Agreement, so long as it is in effect, contains terms and conditions that make it more difficult for us to sell our business to a party other than CapitalSource. These no shop provisions impose restrictions on us that, subject to certain exceptions, limit our ability to discuss or facilitate competing third-party proposals to acquire all or a significant part of our company.

As a bank holding company, our earnings are dependent upon the performance of the Bank and the Bank's subsidiaries.

Since we are a holding company with no significant assets other than the Bank, we currently depend upon dividends from the Bank for a substantial portion of our revenues. These dividends are the primary funding source for the dividends we pay on our common stock. Our ability to pay dividends will continue to depend in large part upon our receipt of dividends or other capital distributions from the Bank. Various state and federal laws and regulations limit the amount of dividends that a bank may pay to a parent holding company. In addition, our right to participate in a distribution of assets upon the liquidation or reorganization of a subsidiary may be subject to prior claims of the subsidiary's creditors. In the event the Bank is unable to pay dividends to the Company, we may not be able to service our debt, pay our obligations or pay dividends on our common stock. The inability to receive dividends from the Bank could therefore have a material adverse effect on our business, our financial condition and our results of operations.

If economic conditions decline further, our financial condition and results of operations could continue to be adversely affected.

Our operating results are affected by national and local economic and competitive conditions, including changes in market interest rates, the strength of the local economy, governmental policies of the communities in which we do business and actions of regulatory authorities. A further decline in the local or national economy could continue to adversely affect our financial condition and results of operations. Deterioration in economic conditions could result in the following consequences, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows:

40

-
- A decline in the demand for the products and services we offer;
 - An increase in nonperforming loans and loan charge-offs;
 - An increase in provisions for loan losses;
 - An increase in losses on real estate owned (acquired through foreclosure); and
 - A migration from low-yielding or noninterest bearing deposits to higher-yielding deposit products such as time deposits.

Our loan origination and purchase activity is highly concentrated in certain types of loans.

At December 31, 2007, \$1.7 billion, or 52.2%, of our total loans consisted of multi-family residential, commercial real estate, land and land development, commercial construction and business loans. These types of loans generally expose a lender to a greater risk of non-payment and loss than one-to-four family residential mortgage loans because repayment of such loans is dependent upon the successful operation of the property and the income stream of the borrowers. Additionally, these types of loans typically involve larger loan balances to single borrowers or groups of related borrowers compared to one-to-four family residential mortgage loans. Also, many of the Bank's commercial borrowers have more than one loan outstanding. Consequently, an adverse development with respect to one loan or one credit relationship may expose us to a significantly greater risk of loss compared to an adverse development with respect to a one-to-four family residential mortgage loan.

At December 31, 2007, \$513.6 million, or 15.4%, of our total loans consisted of residential construction loans. Our portfolio of residential construction loans increased dramatically in 2004, 2005 and 2006 as a result of our emphasis on loans with relatively higher yields, adjustable interest rates and/or shorter terms to maturity. Risk of loss on a residential construction loan is dependent largely upon the accuracy of the initial estimate of the property's value when completed compared to the projected cost (including interest) of construction and other assumptions, including the approximate time to sell the property. Our ability to continue to originate and/or purchase residential construction loans may be impaired by adverse changes in local and regional economic conditions in the real estate markets, or by acts of nature. Due to the concentration of real estate collateral, these events could have a material adverse impact on the value of collateral, resulting in delinquencies and/or losses. Customer demand for loans secured by real estate could be reduced by a weaker economy, an increase in unemployment, a decrease in real estate values or an increase in interest rates.

Our concentration of loans in certain areas of Florida and the Las Vegas, Nevada area may expose us to increased credit risk that may cause us to record additional provisions for loan losses and/or may result in future loan charge-offs.

At December 31, 2007, \$168.8 million, or 5.1%, of our total loans were collateralized by properties in the state of Florida. Among our Florida loans, \$31.8 million were considered nonperforming residential construction loans at December 31, 2007. Approximately \$26.5 million

Our concentration of loans in certain areas of Florida and the Las Vegas, Nevada area may expose us to increased credit risk that may cause us to record additional provisions for loan losses and/or may result in future loan charge-offs.

Edgar Filing: TIERONE CORP - Form 10-K

of our total nonperforming residential construction loans in Florida were purchased from TransLand. During the three months ended December 31, 2007 we charged off \$25.5 million of TransLand residential construction loans, due in large part to a permanent decline in the estimated fair value of residential lots.

At December 31, 2007, \$247.3 million, or 7.4%, of our total loans were collateralized by properties in the state of Nevada, primarily in the Las Vegas, Nevada area. Our loans in the Las Vegas, Nevada area are primarily composed of land development, commercial construction and residential construction loans. At December 31, 2007, our nonperforming land development, commercial construction and residential construction loans in the Las Vegas, Nevada area totaled \$30.4 million, \$19.2 million and \$7.6 million, respectively.

Our results of operations are significantly affected by the fiscal and monetary policies of the federal government and the governments of the states in which we operate.

The Board of Governors of the Federal Reserve System, also known as the Federal Reserve Board, regulates the supply of money and credit in the United States. Its policies determine in large part our cost of funds for lending and investing and the return we earn on those loans and investments, both of which impact our net interest margin, and can significantly affect the value of financial instruments such as debt securities and mortgage servicing rights. Its policies can also affect our borrowers, potentially increasing the risk that they may fail to repay their loans. Changes in Federal Reserve Board policies are beyond our control and difficult to predict or anticipate.

41

The amount of income taxes we are required to pay on our earnings is based on federal and state legislation and regulations. We have provided for current and deferred income taxes in our financial statements, based on our results of operations, business activity, and interpretations of tax statutes. We may take filing positions or follow tax strategies that may be subject to challenge by federal and state taxing authorities. Our net income and earnings per share may be reduced if a federal, state or local authority assessed charges for taxes that have not been provided for in our consolidated financial statements.

If the interest payments on our interest-bearing liabilities increase relative to the interest we earn on our interest-earning assets, our net interest income may decline.

When interest-bearing liabilities mature or reprice more quickly than interest-earning assets, a significant increase in market interest rates could adversely affect net interest income. Conversely, a significant decrease in market interest rates could result in increased net interest income. We seek to manage our exposure to interest rate fluctuations, however, changes in market interest rates are neither predictable nor controllable and may have an adverse impact on our financial condition and results of operations.

Prevailing interest rates may significantly affect the overall demand for loans and could also impact the extent to which borrowers repay and refinance loans. Loan prepayments and refinancings, as well as prepayments of mortgage-backed securities, may increase in a declining interest rate environment. Call provisions associated with our investment in U.S. government securities and agency obligations and corporate securities may also negatively impact net interest income in a declining interest rate environment. Such prepayment, refinancing and security call activity may negatively impact the yield of our loan portfolio and investment and mortgage-backed security portfolios, as we would reinvest the prepaid funds in a lower interest rate environment. Additionally, adjustable-rate mortgage loans and mortgage-backed securities generally contain interim and lifetime caps that limit the amount interest rates can increase or decrease at repricing dates.

In a decreasing interest rate environment, our level of core deposits may decline if our depositors seek higher-yielding instruments or other investment products we are unwilling to offer. This may increase our cost of funds and decrease our net interest margin to the extent that alternative funding sources are utilized to fund our business activities. In an increasing interest rate environment, depositors tend to prefer higher-yielding time deposits which could adversely affect our net interest income if rates were to subsequently decline.

Potential future loan losses may increase.

We maintain an allowance for loan losses that represents management's best estimate of probable losses within our existing loan portfolio. The level of the allowance for loan losses reflects management's continuing evaluation of industry concentrations, specific credit risks, loan loss experience, current loan portfolio quality, present economic, political and regulatory conditions and unidentified losses inherent in the current loan portfolio. Over the past several years, historical loan losses had been low and our loan loss ratios had performed better than industry averages. During 2007, our levels of delinquent loans, nonperforming loans (loans 90 or more days delinquent), impaired loans and charge-offs increased significantly. These increases were primarily attributable to the continued deterioration in the real estate market and the economy in general. We have been further impacted by the erosion of property values and an overall increase in housing inventory (both developed lots and completed houses) in many of the areas of the country in which we do business and where the collateral for our loans reside. Additionally, significantly tightened credit standards have made it more difficult for potential borrowers to obtain financing and for current borrowers to refinance existing loans. Loan losses related to residential construction loans increased during the year ended December 31, 2007. If the recent

trend is prolonged and losses continue to increase, our results of operations will continue to be negatively impacted.

Our allowance for loan losses may be inadequate.

An inadequate allowance for loan losses could adversely affect our results of operations. We are exposed to the risk that our customers may be unable to repay their loans according to their terms and that any collateral securing the payment of their loans may not be sufficient to assure full repayment. We evaluate the collectibility of our loan portfolio and provide for an allowance for loan losses which is based on our historical loan loss experience for each group of loans as further adjusted for specific factors.

42

If our evaluation is incorrect, our allowance for loan losses may not be sufficient to cover losses inherent in the loan portfolio, resulting in additions to our allowance for loan losses. Increases in the allowance for loan losses result in an expense for the period. If, as a result of general economic conditions or a decrease in asset quality, management determines that additional increases in the allowance for loan losses are warranted, we may incur additional expenses. We can make no assurances that our allowance for loan losses will be adequate to cover loan losses inherent in our portfolio.

Our loans are primarily secured by real estate, including regional concentrations of loans in areas of the United States that are susceptible to tornados, earthquakes, hurricanes or other natural disasters. If a natural disaster were to occur in one of our major market areas, loan losses could occur that are not incorporated in the existing allowance for loan losses.

We could be held responsible for environmental liabilities of properties acquired through foreclosure.

If we are forced to foreclose on a defaulted mortgage loan to recover our investment, we may be subject to environmental liabilities related to the underlying real property. Hazardous substances or wastes, contaminants, pollutants or sources thereof may be discovered on properties under our ownership or after a sale to a third party. The amount of environmental liability could exceed the value of the real property. There can be no assurance that we would not be fully liable for the entire cost of any removal, remediation or other clean-up on the acquired property, that the cost of removal and clean-up would not exceed the value of the property or that costs could be recovered from any third party. Additionally, it may be difficult or impossible to sell the property prior to or following any environmental remediation.

Our cost of funds may increase as a result of general economic conditions, interest rates or competitive pressures.

Our cost of funds may increase because of general economic conditions, unfavorable conditions in capital markets, interest rates and competitive pressures. We have traditionally obtained funds primarily through deposits and borrowings. Generally, deposits are a preferable source of funds than borrowings because interest rates paid for deposits are typically less than interest rates charged for borrowings. If deposit growth is inadequate to fund our operations we may have to rely on borrowings as a source of funds. Relying on borrowings as a primary funding source may have an adverse impact on our net interest margin.

Competition could result in our loan portfolios and deposit base declining.

The banking and financial services businesses in our market areas are highly competitive. Our market area has a high density of financial institutions, some of which have greater financial resources, name recognition and market presence than us, and all of which are our competitors. Competition within the banking, mortgage and finance industries may limit our ability to attract and retain customers. Our competition for loans comes primarily from commercial banks, savings banks, savings and loan associations, mortgage banking companies, insurance companies, finance companies and credit unions. Our most direct competition for deposits historically has come from commercial banks, savings banks, savings and loan associations and credit unions. In addition, we face competition for deposits from products offered by brokerage firms, insurance companies and other financial intermediaries, such as money market and other mutual funds and annuities. If we are unable to attract and retain customers, our loan and deposit growth may be inhibited which could have an adverse impact on our financial condition and results of operations.

Legislative and regulatory issues could adversely affect our financial condition and results of operations.

We are subject to extensive regulation, supervision and examination by the OTS as our primary federal regulator, and by the FDIC, which insures our deposits. As a member of the FHLBank, we must also comply with applicable regulations of the Federal Housing Finance Board and the FHLBank. Regulation by these agencies is intended primarily for the protection of our depositors and the Deposit Insurance Fund and not for the benefit of our stockholders. Our activities are also regulated under consumer protections laws applicable to our lending, deposit and other activities. A sufficient claim against us under these laws could have a material adverse affect on our financial condition and results of operations.

43

Legislative and regulatory issues could adversely affect our financial condition and results of operations. 36

We may not be able to retain or replace key members of management or attract and retain qualified customer relationship managers.

We depend on the services of existing management personnel to carry out our business and investment strategies. It is critical that we are able to attract and retain management and other qualified personnel. Competition for qualified personnel is significant in our geographical market areas. The loss of services of any management personnel, or the inability to recruit and retain qualified personnel in the future, could have an adverse effect on our financial condition and results of operations.

We rely on communications, information, operating and financial control systems technology from third-party service providers. An interruption in these third-party systems could have an adverse effect on our business.

We rely heavily on third-party service providers for much of our communications, information, operating and financial control systems technology. Any failure, interruption or breach in security of these systems could result in failures or interruptions in our customer relationship management, general ledger, deposit, loan servicing and loan origination systems. We can make no assurances that such failures or interruptions will not occur or, if they do occur, that they will be adequately addressed by us or the third parties on which we rely. Any failure or interruption could have a material adverse effect on our business, financial condition and results of operations. If any of our third-party service providers experience financial, operational or technological difficulties, or if there is any other disruption in our relationships with them, we may be required to locate alternative sources of such services. We can make no assurances that we could negotiate terms that are favorable to us, or could obtain comparable services without the need to expend substantial resources.

Our stock price can be volatile.

Our stock price can fluctuate in response to a variety of factors, including issues related to the consummation of the Merger with CapitalSource and the CapitalSource stock price; actual or anticipated variations in quarterly operating results; changes in our stockholder dividend policy; recommendations of securities analysts; and news media reports relating to trends, concerns and other issues in the financial services industry. Other factors that may influence our stock price include products or services offered by our competitors; operating and stock price performance of other companies that investors or analysts deem comparable to us; and changes in governmental regulations.

General market fluctuations, industry factors and general economic conditions and political conditions and events, such as future terrorist activities, economic slowdowns or recessions, interest rate changes or credit loss trends, also could cause our stock price to decline regardless of our operating results.

If we fail to maintain effective systems of internal and disclosure control, we may not be able to accurately report our financial results or prevent fraud.

Effective internal and disclosure controls are necessary for us to provide reliable financial reports, to effectively prevent fraud and to operate successfully as a public company. If we were unable to provide accurate and reliable financial reports or prevent fraud, our reputation and results of operations would be adversely effected. As part of our ongoing monitoring of internal controls, we may discover material weaknesses or significant deficiencies in our internal controls as defined under standards adopted by the Public Company Accounting Oversight Board (PCAOB) that require remediation. Under PCAOB standards, a *material weakness* is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. A *significant deficiency* is a deficiency, or combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the company's financial reporting.

Any failure to maintain effective internal and disclosure controls, or to make necessary improvements in such controls in a timely manner, could harm operating results or cause us to fail in meeting our financial reporting obligations. Such a failure could have an impact on our ability to remain listed on the NASDAQ Global Select Market. Ineffective internal and disclosure controls could also cause investors to lose confidence in our reported financial information, which would likely have a negative effect on our stock price.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

We currently operate 69 banking offices in Nebraska (59), Iowa (9) and Kansas (1) of which 51 are owned by us and 18 are under operating leases. Additionally, we operate three loan production offices located in Colorado, two loan production offices located in North Carolina and one loan production office in each of Arizona, Florida, Minnesota and Nevada all of which are under operating leases. We own our corporate headquarters located in Lincoln, Nebraska.

For further information regarding our properties, see *Note 20 Lease Commitments* included in Item 8. Financial Statements and Supplementary Data, in Part II of this Annual Report on Form 10-K.

Item 3. Legal Proceedings

Except for litigation relating to certain goodwill claims against the United States (U.S.) and a court action filed by the Bank and two other financial institutions against a Florida-based mortgage broker, both of which are described below, we are not involved in any pending legal proceedings other than routine legal proceedings occurring in the ordinary course of business. Such routine legal proceedings, in the aggregate, are believed by management to be immaterial to our consolidated financial statements.

On October 31, 2006, the U.S. Court of Federal Claims (Federal Claims Court) issued an opinion finding the U.S. liable to the Bank for lost franchise value related to our damages claim against the U.S. for breach of contract following changes to the rules for computing our regulatory capital that were required by the adoption of the Financial Institution Reform Recovery and Enforcement Act of 1989. The Federal Claims Court’s opinion awarding the Bank \$4.5 million in damages was appealed to the United States Court of Appeals for the Federal Circuit (Court of Appeals) by the U.S. on December 29, 2006. The Bank subsequently filed a cross-appeal seeking review of earlier liability rulings which absolved the U.S. of liability in connection with two other related merger transactions and reduced the amount of the Bank’s potential recovery.

Oral argument of the appeal was heard before a three-judge panel of the Court of Appeals on November 8, 2007. On March 5, 2008, the Court of Appeals panel rendered a split decision. The majority found in favor of the U.S. thereby reversing the Federal Claims Court’s damage award and denying the cross-appeal. A separate dissenting opinion would have sustained the Federal Claims Court’s award for the Bank. We are currently evaluating our legal options and have not made a determination as to what, if any, further actions will be taken. There can be no assurance as to the type or amount of damages, if any, that we may recover or the timing, if we are successful, for receipt by us of any damages from the U.S.

A joint petition for involuntary Chapter 11 bankruptcy was filed on August 23, 2007 in the United States Bankruptcy Court for the Middle District of Florida by the Bank and two other financial institutions against TransLand Financial Services, Inc. (TransLand), a mortgage brokerage firm headquartered in Maitland, Florida. The petition cites TransLand for alleged failure to remit loan payoffs and periodic payments to the Bank involving approximately \$12.9 million of residential loans. On October 8, 2007 a court-appointed examiner furnished a detailed report documenting the alleged fraudulent activity. The Bank has notified its insurance carrier of a claim against a bond insuring the Bank for up to \$7.5 million against fraudulent losses by loan servicers. The Bank believes that it is probable it will collect the proceeds on the insurance bond.

Pursuant to an Inter-Creditor Settlement Agreement dated November 25, 2007, the petitioning banks agreed to dismiss the involuntary Chapter 11 bankruptcy petition that had been filed against TransLand in return for the agreement by TransLand and certain of its principal creditors to proceed with the liquidation and distribution of TransLand’s remaining assets. The Bank will receive a proportionate share of the net proceeds, if any, realized from such liquidation. On December 4, 2007 the Bankruptcy Court entered an order approving the dismissal of the involuntary bankruptcy. The liquidation of TransLand’s assets is currently in process.

Item 4. Submission of Matters to a Vote of Security Holders

On November 29, 2007, the Company held a special meeting of stockholders to obtain approval for the Agreement and Plan of Merger, dated May 17, 2007, by and among TierOne Corporation, CapitalSource Inc. and CapitalSource TRS Inc. Following is a summary of the result of the vote.

Proposal	Number of Votes		
	For	Against	Abstain
To approve Merger Agreement and Plan of Merger	10,216,926	5,457,113	42,082

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Common Stock Price Summary. Our common stock trades on the NASDAQ Global Select Market under the symbol TONE. As of December 31, 2007, we had 1,454 stockholders of record, which does not include those persons or entities holding stock in nominee or street name through brokerage firms or others. The following table shows the high and low bid prices of our common stock during the periods indicated as well as the period end closing sales price and the dividend paid each quarter.

	2007				2006			
	High	Low	Close	Dividend	High	Low	Close	Dividend
First Quarter	\$ 32.04	\$ 24.88	\$ 27.04	\$ 0.07	\$ 34.00	\$ 27.60	\$ 33.95	\$ 0.06
Second Quarter	32.98	24.01	30.10	0.08	35.58	30.69	33.77	0.07
Third Quarter	30.57	18.62	26.47	0.08	34.88	31.25	33.93	0.07
Fourth Quarter	28.16	18.62	22.15	0.08	34.12	30.36	31.61	0.07

Common Stock Repurchase Activity. The following table details our purchases of common stock during the three months ended December 31, 2007:

	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs*	Maximum Number of Shares that May Yet Be Purchased Under Plans or Programs
October 2007				
Beginning Date - October 1, 2007				
Ending Date - October 31, 2007	942	\$ 23.44	942	1,519,006
November 2007				
Beginning Date - November 1, 2007				
Ending Date - November 30, 2007	--	--	--	1,519,006
December 2007				
Beginning Date - December 1, 2007				
Ending Date - December 31, 2007	314	23.45	314	1,518,692
Total shares purchased during the three months ended December 31, 2007	1,256	\$ 23.44	1,256	1,518,692

* Information related to our publicly announced plan authorizing purchases of common stock during the three months ended December 31, 2007, is as follows:

Date Purchase Plan Announced	Number of Shares Approved for Purchase	Expiration Date of Purchase Plan
July 27, 2004	1,828,581	No stated expiration date

47

Performance Graph. The following graph represents \$100.00 invested in our common stock at the closing price of the common stock on December 31, 2002, and assumes the reinvestment of all dividends. The graph demonstrates comparison of the cumulative total returns for the common stock of TierOne Corporation, the Russell 2000 Index and the SNL Securities \$1B \$5B Thrift Index for the periods indicated.

The following information in this Item 5 of this Annual Report on Form 10-K is not deemed to be soliciting material or to be filed with the SEC or subject to Regulation 14A or 14C under the Securities Act of 1934 or to the liabilities of Section 18 of the Securities Exchange Act of 1934, and will not be deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the Securities Exchange Act of 1934, except to the extent the Company specifically incorporates it by reference into such a filing.

At or For the Year Ended December 31,

Average yield on interest-earning assets	7.21%	7.24%	6.05%	5.33%	5.51%
Average rate on interest-bearing liabilities	4.06%	3.52%	2.72%	2.31%	2.46%
Average interest rate spread (1)	3.15%	3.72%	3.33%	3.02%	3.05%
Net interest margin (1)	3.58%	4.07%	3.58%	3.29%	3.48%
Average interest-earning assets to average interest-bearing liabilities	111.80%	110.95%	110.10%	113.29%	120.94%
Net interest income after provision for loan losses to noninterest expense	50.52%	146.53%	135.93%	124.24%	138.21%
Total noninterest expense to average assets (2)	2.74%	2.48%	2.31%	2.35%	2.26%
Efficiency ratio (2)(3)	63.78%	51.64%	53.70%	56.95%	52.91%
Return on average assets (2)	-0.36%	1.25%	1.05%	0.96%	1.13%
Return on average equity (2)	-3.39%	12.48%	11.28%	8.53%	7.04%
Average equity to average assets (2)	10.56%	10.04%	9.29%	11.29%	16.11%
Return on tangible equity (2)(4)	-3.89%	14.59%	13.58%	9.08%	7.04%

(1) Excluding the receipt of a \$2.7 million loan prepayment fee, our average interest rate spread and net interest margin would have been 3.63% and 3.99%, respectively, for the year ended December 31, 2006.

(2) Employee stock options were expensed beginning January 1, 2006.

(3) Efficiency ratio is calculated as total noninterest expense, less amortization expense of other intangible assets, as a percentage of the sum of net interest income and noninterest income.

(4) Return on tangible equity is calculated as annualized net income (loss) as a percentage of average stockholders' equity adjusted for goodwill and other intangible assets.

49

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Introduction

We are a Nebraska-based financial services holding company that offers customers a wide variety of full-service consumer, commercial and agricultural banking products and services through TierOne Bank, our wholly owned banking subsidiary. TierOne Bank's franchise network includes 69 banking offices located in Nebraska, Iowa and Kansas and nine loan production offices located in Arizona, Colorado, Florida, Minnesota, Nevada and North Carolina.

As a regional community bank, our goal is to provide our customers competitive financial services through a positive, quality service environment that distinguishes us from our competition. This is achieved by our strategic focus on our core businesses of mortgage and business lending and retail banking that has contributed to the Bank's history of growth. At December 31, 2007, the Company had total assets of \$3.5 billion, net loan receivables of \$3.0 billion, total deposits of \$2.4 billion and stockholders' equity of \$345.6 million.

The following is a discussion and analysis of the Company's financial condition and results of operations including information on the Company's critical accounting policies, asset/liability management, liquidity and capital resources and contractual obligations. Information contained in this Management's Discussion and Analysis should be read in conjunction with the disclosure regarding Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995, as well as the discussion set forth in Item 1A. Risk Factors and Item 8. Financial Statements and Supplementary Data.

Critical Accounting Policies

See *Note 1 Summary of Significant Accounting Policies* included in Item 8. Financial Statements and Supplementary Data, in Part II of this Annual Report on Form 10-K for a summary of our significant accounting policies. Various elements of our accounting policies, by nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. Our policies with respect to the methodologies used to recognize income, determine the allowance for loan losses, evaluating investment and mortgage-backed securities for impairment, evaluating goodwill and other intangible assets, valuation of mortgage servicing rights, valuation and measurement of derivatives and commitments, valuation of real estate owned and estimating income taxes are our most critical accounting policies because they are important to the presentation of our financial condition and results of operations, involve a higher degree of complexity and require management to make difficult and subjective judgments which often require assumptions or estimates about highly uncertain matters. The use of different judgments, assumptions and estimates could result in material differences in our financial condition and results of operations.

Edgar Filing: TIERONE CORP - Form 10-K

Income Recognition. We recognize interest income by methods that conform to GAAP. In the event management believes collection of all or a portion of contractual interest on a loan has become doubtful, which generally occurs after a loan is contractually delinquent 90 days or more, we discontinue the accrual of interest and charge-off all previously accrued interest. Interest received on nonperforming loans is included in income only if principal recovery is reasonably assured. A nonperforming loan is restored to accrual status when it is brought current and the collectibility of the total contractual principal and interest is no longer in doubt.

Allowance for Loan Losses. We have identified the allowance for loan losses as a critical accounting policy where amounts are subject to material variation. This policy is significantly affected by our judgment and uncertainties and there is a likelihood that materially different amounts could be reported under different, but reasonably plausible, conditions or assumptions. The allowance for loan losses is considered a critical accounting estimate because there is a large degree of judgment in:

- Assigning individual loans to specific risk levels (pass, special mention, substandard, doubtful and loss);
- Valuing the underlying collateral securing the loans;
- Determining the appropriate reserve factor to be applied to specific risk levels for special mention loans and those adversely classified (substandard, doubtful and loss); and

50

Determining reserve factors to be applied to pass loans based upon loan type.

We establish provisions for loan losses, which are charges to our operating results, in order to maintain a level of total allowance for loan losses that, in management's belief, covers all known and inherent losses that are both probable and reasonably estimable at each reporting date. Management reviews the loan portfolio no less frequently than quarterly in order to identify those inherent losses and to assess the overall collection probability of the loan portfolio. Management's review includes a quantitative analysis by loan category, using historical loss experience, classifying loans pursuant to a grading system and consideration of a series of qualitative loss factors. This evaluation is inherently subjective, as it requires estimates that are susceptible to significant revision as more information becomes available or as future events occur.

The allowance for loan losses consists of two elements. The first element is an allocated allowance established for specific loans identified by the credit review function that are evaluated individually for impairment and are considered to be impaired. A loan is considered impaired when, based on current information and events, it is probable that we will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. Impairment is measured by:

- The fair value of the collateral if the loan is collateral dependent;
- The present value of expected future cash flows; or
- The loan's observable market price.

The second element is an estimated allowance established for losses that are probable and reasonable to estimate on each category of outstanding loans. While management uses available information to recognize probable losses on loans inherent in the portfolio, future additions to the allowance may be necessary based on changes in economic conditions and other factors. In addition, various regulatory agencies, as an integral part of their examination process, periodically review our allowance for loan losses. Such agencies may require us to recognize additions to the allowance based on their judgment of information available to them at the time of their examination.

Investment Securities. We evaluate our available for sale and held to maturity investment securities for impairment on a quarterly basis. An impairment charge in the Consolidated Statements of Income is recognized when the decline in the fair value of investment securities below their cost basis is judged to be other-than-temporary. Various factors are utilized in determining whether we should recognize an impairment charge, including, but not limited to, the length of time and extent to which the fair value has been less than its cost basis and our ability and intent to hold the investment security for a period of time sufficient to allow for any anticipated recovery in fair value.

Goodwill and Other Intangible Assets. Goodwill represents the excess price paid over the fair value of the tangible and intangible assets and liabilities acquired in connection with the August 27, 2004 acquisition of United Nebraska Financial Co. (UNFC). There was no goodwill recorded in connection with our Marine Bank branch purchase on June 2, 2006. In accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*, goodwill and indefinite-lived intangible balances are not being amortized, but are tested for impairment annually in accordance with the provisions of SFAS No. 142. SFAS No. 142 also requires intangible assets with estimated useful lives to be amortized over their respective estimated useful lives to their residual values, and reviewed for impairment in accordance with SFAS No. 144, *Accounting for Impairment or Disposal of Long-Lived Assets*.

Our policy is to evaluate annually the carrying value of our reporting unit goodwill and identifiable assets not subject to amortization. Goodwill was established in connection with the UNFC acquisition.

We have identified a single reporting unit for purposes of goodwill impairment testing. The impairment test is therefore performed on a consolidated basis. We perform our goodwill impairment analysis on an annual basis during the third quarter. Additional impairment analysis may be performed if circumstances or events occur which may have an impact on the fair value of our goodwill. Potential impairment is indicated when the carrying value of the entity, including goodwill, exceeds its fair value. If potential for impairment exists, the fair value of the entity is subsequently measured against the fair value of its underlying assets and liabilities, excluding goodwill, to estimate an implied fair value of the entity's goodwill. Impairment loss is recognized for any excess of the carrying value of the entity's goodwill over the implied fair value. We performed our impairment analysis as of September 30, 2007 and concluded that no potential impairment of goodwill existed as the fair value of our goodwill exceeded its carrying value. Additionally, we performed our impairment analysis as of December 31, 2007 due to the decline in our stock price and prevailing economic conditions and concluded that no potential impairment existed.

51

The value of core deposit intangible assets acquired in connection with the UNFC and Marine Bank transactions, which is subject to amortization, is included in the Consolidated Statements of Financial Condition as other intangible assets. Determining the amount of identifiable intangible assets and their average lives involves multiple assumptions and estimates and is typically determined by performing a discounted cash flow analysis, which involves a combination of any or all of the following assumptions: customer attrition, account runoff, alternative funding costs, deposit servicing costs and discount rates. Core deposit intangible assets are amortized using an accelerated method of amortization which is recorded in the Consolidated Statements of Operations as other operating expense.

We review our core deposit intangible assets for impairment whenever events or changes in circumstances indicate that we may not recover our investment in the underlying assets or liabilities which gave rise to the identifiable intangible assets. For the years ended December 31, 2007, 2006 and 2005, no events or circumstances triggered an impairment charge against our core deposit intangible assets.

Mortgage Servicing Rights. On January 1, 2007 we adopted SFAS No. 156, *Accounting for Servicing of Financial Assets – an Amendment of FASB Statement No. 140* (SFAS No. 156). In accordance with SFAS No. 156, we have elected to continue to utilize the amortization method for all of our mortgage servicing right assets, thus, carrying our mortgage servicing rights at the lower of cost or market (fair value). Under the amortization method, we amortize mortgage servicing rights in proportion to and over the period of net servicing income. Income generated as a result of new servicing assets is reported as net gain on sale of loans held for sale in the Consolidated Statements of Operations. Loan servicing fees, net of amortization of mortgage servicing rights, is recorded in fees and service charges in the Consolidated Statements of Operations.

We capitalize the estimated value of mortgage servicing rights upon the sale of loans. The estimated value takes into consideration contractually known amounts, such as loan balance, term and interest rate. These estimates are impacted by loan prepayment speeds, servicing costs and discount rates used to compute a present value of the cash flow stream. We evaluate the fair value of mortgage servicing rights on a quarterly basis using current prepayment speed, cash flow and discount rate estimates. Changes in these estimates impact fair value and could require us to record a valuation allowance or recovery. The fair value of mortgage servicing rights is highly sensitive to changes in assumptions. Changes in prepayment speed assumptions have the most significant impact on the fair value of mortgage servicing rights. Generally, as interest rates decline, prepayments accelerate with increased refinance activity, which results in a decrease in the fair value of mortgage servicing rights. As interest rates rise, prepayments generally slow, which results in an increase in the fair value of mortgage servicing rights. All assumptions are reviewed for reasonableness on a quarterly basis and adjusted as necessary to reflect current and anticipated market conditions. Thus, any measurement of fair value is limited by the conditions existing and the assumptions utilized as of a particular point in time, and those assumptions may not be appropriate if applied at a different point in time. We currently do not utilize direct financial hedges to mitigate the effect of changes in the fair value of our mortgage servicing rights.

Derivatives and Commitments. We account for our derivatives and hedging activities in accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activity*, as amended by SFAS No. 138, *Accounting for Certain Derivative Instruments and Certain Hedging Activities* and SFAS No. 149, *Amendment of Statement No. 133 on Derivative Instruments and Hedging Activities*.

In the normal course of business, we enter into contractual commitments, including loan commitments and rate lock commitments, to extend credit to finance residential mortgages. These commitments, which contain fixed expiration dates, offer the borrower an interest rate guarantee provided the loan meets underwriting guidelines and closes within the time frame established by us. Interest rate risk arises on these commitments and subsequently closed loans if interest rates increase or decrease between the time of the interest rate lock and the delivery of the loan to the investor. Loan commitments related to mortgage loans that are intended to be sold are considered derivatives in accordance with the guidance of SEC Staff Accounting Bulletin No. 105, *Application of Accounting Principles to Loan Commitments*. Accordingly, the fair value of these derivatives at the end of the reporting period is based on a quoted market price that closely approximates the amount that would have been recognized if the loan commitment was funded and sold.

52

To mitigate the effect of interest rate risk inherent in providing loan commitments, we hedge our commitments by entering into mandatory or best efforts delivery forward sale contracts. These forward contracts are marked-to-market through earnings and are not designated as accounting hedges under SFAS No. 133. The change in the fair value of loan commitments and the change in the fair value of forward sales contracts generally move in opposite directions and, accordingly, the impact of changes in these valuations on net income during the loan commitment period is generally inconsequential.

Although the forward loan sale contracts also serve as an economic hedge of loans held for sale, forward contracts have not been designated as accounting hedges under SFAS No. 133 and, accordingly, loans held for sale are accounted for at the lower of cost or market in accordance with SFAS No. 65, *Accounting for Certain Mortgage Banking Activities*.

Real Estate Owned. Property and other assets acquired through foreclosure of defaulted mortgage or other collateralized loans are carried at the lower of cost or fair value, less estimated costs to sell the property and other assets. The fair value of real estate owned is generally determined from appraisals obtained by independent appraisers. Development and improvement costs relating to such property are capitalized to the extent they are deemed to be recoverable.

An allowance for losses on real estate and other assets owned is designed to include amounts for estimated losses as a result of impairment in value of real property after repossession. We review our real estate owned for impairment in value whenever events or circumstances indicate that the carrying value of the property or other assets may not be recoverable.

Income Taxes. We estimate income taxes payable based on the amount we expect to owe various tax authorities. Accrued income taxes represent the net estimated amount due to, or to be received from, taxing authorities. In estimating accrued income taxes, we assess the relative merits and risks of the appropriate tax treatment of transactions, taking into account the applicable statutory, judicial and regulatory guidance in the context of our tax position. Although we utilize current information to record income taxes, underlying assumptions may change over time as a result of unanticipated events or circumstances.

We utilize estimates of future earnings to support our position that the benefit of our deferred tax assets will be realized. If future pre-tax income should prove nonexistent or less than the amount of temporary differences giving rise to the net deferred tax assets within the tax years to which they may be applied, the assets will not be realized and our financial results will be adversely affected.

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an Interpretation of FASB Statement No. 109* (FIN 48). FIN 48 requires that we determine whether a tax position is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Once it is determined that a position meets the recognition threshold, the position is measured to determine the amount of benefit to be recognized in the financial statements. Any interest and penalties related to uncertain tax positions are recorded in income tax expense in the Consolidated Statements of Operations.

Comparison of Financial Condition at December 31, 2007 and 2006

General. Our total assets were \$3.5 billion at December 31, 2007, an increase of \$106.6 million, or 3.1%, compared to \$3.4 billion at December 31, 2006.

Cash and Cash Equivalents. Our cash and cash equivalents totaled \$241.5 million at December 31, 2007, an increase of \$154.7 million, or 178.2%, compared to \$86.8 million at December 31, 2006. The increase was primarily attributable to an increase in deposits and a decrease in net loans partially offset by the repayment of FHLBank advances and other borrowings.

Investment Securities. Our available for sale investment securities totaled \$130.5 million at December 31, 2007, an increase of \$25.5 million, or 24.3%, compared to \$105.0 million at December 31, 2006. During the year ended December 31, 2007 we had security purchases of \$318.4 million which were partially offset by \$295.8 million in proceeds from maturing and sold investment securities. The securities purchased during 2007 were primarily agency obligations that were purchased to collateralize deposits.

Mortgage-Backed Securities. Our mortgage-backed securities, all of which are recorded as available for sale, totaled \$6.7 million at December 31, 2007, a decrease of \$5.6 million, or 45.5%, compared to \$12.3 million at December 31, 2006. The decrease in our mortgage-backed securities was the result of \$5.6 million of principal payments received during the year ended December 31, 2007.

Loans Receivable. Net loans totaled \$3.0 billion at December 31, 2007, a decrease of \$74.0 million, or 2.4%, compared to \$3.1 billion at December 31, 2006. During the year ended December 31, 2007, we originated \$1.6 billion of loans (exclusive of warehouse mortgage lines of

Edgar Filing: TIERONE CORP - Form 10-K

credit) and purchased \$411.4 million of loans. These increases were offset by \$2.0 billion of principal repayments (exclusive of warehouse mortgage lines of credit) and \$344.0 million of loan sales. The following table details the composition of our loan portfolio at the dates indicated:

<i>(Dollars in thousands)</i>	At December 31,		Increase	% Change
	2007	2006	(Decrease)	
One-to-four family residential (1)	\$ 314,623	\$ 339,080	\$ (24,457)	(7.21)%
Second mortgage residential	95,477	120,510	(25,033)	(20.77)
Multi-family residential	106,678	148,922	(42,244)	(28.37)
Commercial real estate	370,910	396,620	(25,710)	(6.48)
Land and land development	473,346	494,887	(21,541)	(4.35)
Residential construction	513,560	780,991	(267,431)	(34.24)
Commercial construction	540,797	491,997	48,800	9.92
Agriculture - real estate	91,068	68,459	22,609	33.03
Business	252,712	220,669	32,043	14.52

(1) Includes loans held for sale	\$ 9,348	\$ 19,285	\$ (9,937)	(51.53)%

(2) Loans in process represents the undisbursed portion of construction and land development loans.

At December 31, 2007, the outstanding balance (net of loans in process) of our residential construction loans was \$374.0 million, a decrease of \$123.6 million, or 24.8%, compared to \$497.6 million at December 31, 2006. The outstanding balance (net of loans in process) of our commercial construction loans was \$388.9 million at December 31, 2007, an increase of \$128.5 million, or 49.4%, compared to \$260.4 million at December 31, 2006. The outstanding balance of our land and land development loans was \$388.6 million at December 31, 2007, an increase of \$16.3 million, or 4.4%, compared to \$372.2 million at December 31, 2006.

The decrease in net loans at December 31, 2007 was primarily attributable to a decrease in loan originations and purchases, loan payoffs and periodic payments on loans. The decrease in the level of loan originations and purchases was primarily attributable to a decrease in demand resulting from the continued deterioration in the real estate market and the economy in general. We have taken a number of steps related to the realignment of certain credit administration functions, including the addition of personnel with extensive depth and expertise in credit analysis, and we continue to tighten credit policies.

We maintain a corporate policy of not participating in subprime residential real estate lending or negative amortizing mortgage products. The Office of Thrift Supervision, our federal regulatory agency, defines subprime loans as loans to borrowers displaying one or more credit risk characteristics including lending to a borrower with a credit bureau risk score (FICO) of 660 or below. Furthermore, we have not participated in collateralized loan obligations (CLO), collateralized debt obligations (CDO), structured investment vehicles (SIV) or asset-backed commercial paper (ABCP).

Edgar Filing: TIERONE CORP - Form 10-K

Allowance for Loan Losses. Our allowance for loan losses increased \$33.4 million, or 100.9%, to \$66.5 million at December 31, 2007 compared to \$33.1 million at December 31, 2006. During the year ended December 31, 2007 we recorded provisions for loan losses totaling \$68.1 million and had net charge-offs of \$32.0 million. Our allowance for loan losses as a percentage of nonperforming loans was 51.79% at December 31, 2007 compared to 110.25% at December 31, 2006. Our ratio of the allowance for loan losses to net loans was 2.24% and 1.09% at December 31, 2007 and 2006, respectively. The following table details our nonperforming and impaired loans for the periods presented:

<i>(Dollars in thousands)</i>	Nonperforming Loans			Impaired Loans		
	At December 31,			At December 31,		
	2007	2006	\$ Change	2007	2006	\$ Change

The increase in our allowance for loan losses was primarily attributable to an increase in delinquent, nonperforming and impaired loans. During 2007, our levels of delinquent loans, nonperforming loans (loans 90 or more days delinquent) and impaired loans increased significantly. These increases were primarily attributable to the continued deterioration in the real estate market and the economy in general. We have been further impacted by the erosion of property values and an overall increase in housing inventory (both developed lots and completed houses) in many of the areas of the country in which we do business and where the collateral for our loans reside. Additionally, significantly tightened credit standards have made it more difficult for potential borrowers to obtain financing and for current borrowers to refinance existing loans.

55

Our allowance for loan losses related to impaired loans totaled \$24.6 million at December 31, 2007 compared to \$152,000 at December 31, 2006. Actual losses are dependent upon future events and, as such, further changes to the level of allowance for loan losses may become necessary based on changes in economic conditions and other factors.

At December 31, 2007, our nonperforming residential construction loans totaled \$57.7 million of which \$31.8 million were located in Florida. Approximately \$26.5 million of our total nonperforming residential construction loans had been purchased from TransLand Financial Services, Inc. (TransLand), a Florida mortgage brokerage firm. To limit our geographic loan concentration, we discontinued purchasing residential construction loans in the Cape Coral area of Lee County, Florida from TransLand by December 31, 2005.

At December 31, 2007, we had classified \$51.9 million of our total residential construction loans as impaired, of which \$33.1 million relate to loans purchased from TransLand. We have established an allowance for loan losses related to the TransLand loans which have been classified as impaired of \$11.5 million at December 31, 2007.

As previously disclosed in regulatory filings with the Securities and Exchange Commission, we reported that we have a group of residential construction loans we purchased from TransLand which were primarily located in the Cape Coral area of southwest Florida. These loans were originally made to individual homebuyers wishing to build a second or retirement home. Subsequent to the filing of our June 30, 2007 Quarterly Report on Form 10-Q, we assumed servicing of all loans purchased from TransLand. During our due diligence process related to the transfer of residential construction loan servicing from TransLand to the Bank, alleged fraudulent servicing practices were discovered. The majority of the alleged fraud related to the withholding of loan payoff proceeds and periodic payments. A joint petition for involuntary Chapter 11 bankruptcy was filed on August 23, 2007 in the United States Bankruptcy Court for the Middle District of Florida (Court) by the Bank and two other financial institutions against TransLand. A court-appointed examiner furnished a detailed report documenting the alleged fraudulent activity. In December 2007, the Court entered an order approving the petitioning banks plan to agree to dismiss the bankruptcy petition in return for the agreement by TransLand and certain of its principal creditors to proceed with the liquidation and proportional distribution of TransLand s remaining assets. The liquidation of TransLand s assets is currently in process.

Edgar Filing: TIERONE CORP - Form 10-K

In addition to seeking recoveries from TransLand, the Bank is also insured up to \$7.5 million against fraudulent activity by loan servicers. A \$12.2 million receivable from TransLand associated with the alleged misappropriation of loan payoff proceeds and periodic payments due to the Bank was reclassified from loans receivable to other assets on the Company's Consolidated Statements of Financial Condition at September 30, 2007. We believe that it is probable we will collect the proceeds on the insurance bond. We wrote-off as a charge to other operating expense \$4.8 million during the three months ended September 30, 2007 in connection with the TransLand receivable. This amount represents the excess of the aggregate TransLand receivable over the amount of our insurance coverage. During the three months ended December 31, 2007, we recovered \$1.6 million related to the TransLand receivable write-off. Any future recoveries from TransLand would be recorded as other operating income in the period the funds are received.

FHLBank Topeka Stock. FHLBank stock totaled \$65.8 million at December 31, 2007, an increase of \$3.8 million, or 6.2%, compared to \$62.0 million at December 31, 2006. The increase was attributable to FHLBank dividends paid in stock received during the year ended December 31, 2007.

Premises and Equipment. Premises and equipment decreased \$1.8 million, or 4.5%, to \$38.0 million at December 31, 2007 compared to \$39.8 million at December 31, 2006. The decrease was attributable to \$4.0 million of depreciation and amortization expense which was partially offset by \$2.2 million in asset additions. Additions during the year ended December 31, 2007 consisted primarily of computer equipment, furniture and software.

Goodwill. Goodwill totaled \$42.1 million at December 31, 2007, a decrease of \$127,000, or 0.3%, compared to \$42.2 million at December 31, 2006 and relates to the 2004 acquisition of UNFC. The decline in goodwill is attributable to the realization of a \$61,000 tax benefit related to the UNFC acquisition and a \$66,000 adjustment resulting from the adoption of Financial Accounting Standards Board (FASB) Interpretation No. 48.

56

Other Intangible Assets. Other intangible assets totaled \$6.7 million at December 31, 2007, a decrease of \$1.6 million, or 19.6%, compared to \$8.4 million at December 31, 2006 and relates to the core deposit intangible assets recorded as a result of the UNFC acquisition and the Marine Bank transaction. The decrease was attributable to \$1.6 million in amortization during the year ended December 31, 2007.

Other Assets. Other assets increased \$39.0 million, or 177.0%, to \$61.0 million at December 31, 2007 compared to \$22.0 million at December 31, 2006. Other assets consists primarily of prepaid expenses, miscellaneous receivables and other miscellaneous assets. The increase in other assets at December 31, 2007 is primarily attributable to an \$18.2 million increase in deferred tax assets, an \$8.0 million income tax receivable and a \$7.4 million receivable related to TransLand. The increase in deferred tax assets was primarily related to the increase in our allowance for loan losses and the accelerated recognition of deferred loan fees.

Liabilities and Stockholders' Equity

General. Our total liabilities were \$3.2 billion at December 31, 2007, an increase of \$114.3 million, or 3.7%, compared to \$3.1 billion at December 31, 2006. We utilized increased deposits to reduce our FHLBank advances during the year ended December 31, 2007.

Deposits. Deposits increased \$378.2 million, or 18.4%, to \$2.4 billion at December 31, 2007 compared to \$2.1 billion at December 31, 2006.

(Dollars in thousands)	At December 31,		Increase (Decrease)	% Change
	2007	2006		
Noninterest-bearing checking	\$ 164,275	\$ 154,123	\$ 10,152	6.59%
Savings	188,613	45,452	143,161	314.97

Edgar Filing: TIERONE CORP - Form 10-K

At December 31,

Our transaction accounts (checking, savings and money market) totaled \$1.0 billion at December 31, 2007, an increase of \$99.6 million, or 10.7%, compared to \$931.8 million at December 31, 2006. The increase in our savings accounts was attributable to a new savings account which was introduced during the three months ended September 30, 2007. The number of transaction accounts increased by 4,800 accounts, or 3.7%, to 133,400 accounts compared to 128,600 accounts at December 31, 2006. The weighted average interest rate of our transaction accounts was 1.96% at December 31, 2007 compared to 1.68% at December 31, 2006. The increase in our time deposits was primarily the result of marketing promotions throughout 2007. The weighted average interest rate of our time deposits was 4.96% at December 31, 2007 compared to 4.81% at December 31, 2006.

FHLBank Advances and Other Borrowings. Our FHLBank advances and other borrowings totaled \$689.3 million at December 31, 2007, a decrease of \$273.1 million, or 28.4%, compared to \$962.4 million at December 31, 2006. The decrease in FHLBank advances and other borrowings at December 31, 2007 was primarily attributable to the utilization of increased deposits to reduce our FHLBank advances. During the year ended December 31, 2007 we executed one new FHLBank term advance in the amount of \$50.0 million at an interest rate of 3.94%. Additionally, we paid off eight FHLBank term advances which were called during the year ended December 31, 2007 totaling \$250.0 million. The weighted average interest rate on FHLBank advances which were called by the FHLBank during the year ended December 31, 2007 was 3.61%. We did not have an outstanding balance on our FHLBank line of credit at December 31, 2007 compared to an outstanding balance of \$72.5 million at December 31, 2006. The weighted average interest rate on our FHLBank advances and other borrowings was 4.50% at December 31, 2007, an increase of 10 basis points compared to 4.40% at December 31, 2006.

57

Accrued Expenses and Other Liabilities. Our accrued expenses and other liabilities totaled \$35.9 million at December 31, 2007, an increase of \$6.5 million, or 22.2%, compared to \$29.3 million at December 31, 2006. The primary items comprising accrued expenses and other liabilities are deferred compensation agreements, loan servicing payments and other miscellaneous accrued expenses.

Stockholders Equity. At December 31, 2007, stockholders' equity totaled \$345.6 million, a decrease of \$7.7 million, or 2.2%, compared to \$353.3 million at December 31, 2006. The decrease in stockholders' equity was primarily the result of a net loss of \$12.4 million and cash dividends of \$5.2 million paid to our stockholders during the year ended December 31, 2007. This decrease was partially offset by \$3.9 million related to common stock earned by participants in the Employee Stock Ownership Plan (ESOP), \$2.9 million related to amortization of awards under the 2003 Management Recognition and Retention Plan (MRRP) and \$1.7 million related to amortization of stock options under the 2003 Stock Option Plan (SOP). We paid cash dividends of \$0.07 per share on March 31, 2007 to stockholders of record on March 15, 2007 and \$0.08 per common share on June 29, 2007, September 28, 2007 and December 31, 2007 to stockholders of record on June 15, 2007, September 14, 2007 and December 14, 2007.

On July 27, 2004, we announced that our Board of Directors had authorized the repurchase of up to 1,828,581 shares of our outstanding common stock. There is no stated expiration date for this authorization. We repurchased 8,367 shares of our outstanding common stock to support employee benefit programs during the year ended December 31, 2007. The weighted average price paid per repurchased common share was \$24.39 for the year ended December 31, 2007. After accounting for earlier repurchases, at December 31, 2007, the total remaining common stock repurchase authority was 1,518,692 shares. These shares may be repurchased when permissible under the Merger Agreement and SEC guidelines. For further discussion regarding our common stock repurchases, see Part II, Item 5 Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities .

Comparison of Financial Condition at December 31, 2006 and 2005

Assets

General. Our total assets were \$3.4 billion at December 31, 2006, an increase of \$208.9 million, or 6.5%, compared to \$3.2 billion at December 31, 2005. The increase is primarily the result of a \$205.5 million increase in net loans.

Investment Securities. Our available for sale investment securities totaled \$105.0 million at December 31, 2006, an increase of \$2.4 million, or 2.3%, compared to \$102.6 million at December 31, 2005. During 2006 we had security purchases of \$94.5 million which were partially offset by \$92.8 million in proceeds from maturing and sold investment securities. The securities purchased during 2006 were primarily U.S. Treasury securities that were purchased to collateralize deposits.

Mortgage-Backed Securities. Our mortgage-backed securities, all of which are recorded as available for sale, totaled \$12.3 million at December 31, 2006, a decrease of \$7.5 million, or 37.9%, compared to \$19.8 million at December 31, 2005. The decrease in our mortgage-backed securities was the result of \$7.5 million of principal payments received during the year ended December 31, 2006.

Loans Receivable. Net loans totaled \$3.1 billion at December 31, 2006, an increase of \$205.5 million, or 7.2%, compared to \$2.8 billion at December 31, 2005. During the year ended December 31, 2006, we originated \$2.1 billion of loans (exclusive of warehouse mortgage lines of credit) and purchased \$484.1 million of loans. These increases were partially offset by \$2.2 billion of principal repayments (exclusive of warehouse mortgage lines of credit) and \$247.4 million of loan sales.

<i>(Dollars in thousands)</i>	At December 31,		Increase (Decrease)	% Change

(1) Includes loans held for sale

(2) Loans in process represents the undisbursed portion of construction and land development loans.

The increase in our land and land development and commercial construction loan portfolios was primarily attributable to loan origination activity related to our loan production offices (located in Arizona, Colorado, Florida, Minnesota, Nevada and North Carolina) that are strategically positioned in high growth areas of the United States. The increase in business loans was primarily the result of expanded lending capabilities resulting from the addition of commercial banking personnel specializing in corporate banking. The increase in our agricultural real estate and agriculture-operating loans was primarily the result of expanded lending opportunities resulting from the addition of lending personnel with agricultural lending expertise. The increase in our warehouse mortgage lines of credit reflected increased mortgage financing activity during the latter portion of 2006 due to a short-term decrease in mortgage interest rates. During 2006 we reduced the volume of residential construction loans we purchase from mortgage brokers in the state of Florida. This reduction resulted in a decline in our residential construction loans at December 31, 2006. Our one-to-four family residential loan portfolio declined primarily due to a decreased demand for adjustable-rate residential loans as borrowers have migrated to fixed-rate loans. Generally, we originate adjustable-rate, one-to-four family residential loans for retention in our portfolio. We sell substantially all newly originated fixed-rate, one-to-four family residential mortgage loans in the secondary market on a servicing retained basis which produces noninterest income in the form of net gains and losses on sales and servicing fees. The decrease in our second mortgage loan portfolio was primarily the result of loan repayments and prepayments. The decline in our multi-family residential and commercial real estate loan portfolios was primarily the result of refinancing activity as borrowers have migrated to fixed-rate loan products. Our consumer loan portfolio remained relatively unchanged at December 31, 2006 compared to December 31, 2005.

Edgar Filing: TIERONE CORP - Form 10-K

Allowance for Loan Losses. Our allowance for loan losses increased \$2.3 million, or 7.3%, to \$33.1 million at December 31, 2006 compared to \$30.9 million at December 31, 2005. Our allowance for loan losses as a percentage of nonperforming loans was 110.25% at December 31, 2006 compared to 214.30% at December 31, 2005. Our ratio of the allowance for loan losses to net loans was 1.09% at both December 31, 2006 and 2005.

Nonperforming loans increased \$15.6 million, or 108.6%, to \$30.1 million at December 31, 2006 compared to \$14.4 million at December 31, 2005. The increase in nonperforming loans at December 31, 2006 was primarily attributable to residential construction and land and land development loans.

FHLBank Topeka Stock. FHLBank stock totaled \$62.0 million at December 31, 2006, an increase of \$3.5 million, or 6.0%, compared to \$58.5 million at December 31, 2005. The increase was attributable to FHLBank stock dividends received during the year ended December 31, 2006.

Premises and Equipment. Premises and equipment increased \$312,000, or 0.8%, to \$39.8 million at December 31, 2006 compared to \$39.5 million at December 31, 2005. The increase was attributable to \$5.0 million in asset additions which were partially offset by depreciation and amortization of \$3.8 million during the year ended December 31, 2006. Significant additions during the year ended December 31, 2006 included new, full-service banking facilities opened in Omaha, Hastings and Papillion, Nebraska.

Goodwill. Goodwill totaled \$42.2 million at December 31, 2006, a decrease of \$55,000, or 0.1%, compared to \$42.3 million at December 31, 2005. Our goodwill at December 31, 2006 and 2005 relates to the 2004 acquisition of UNFC. There was no goodwill recorded in connection with our Marine Bank branch purchase in June 2006. The decrease in goodwill was the result of a realized tax benefit associated with the UNFC acquisition.

Other Intangible Assets. Our other intangible assets declined \$1.7 million, or 16.4%, to \$8.4 million at December 31, 2006 compared to \$10.0 million at December 31, 2005 and relates to core deposit intangible assets recorded as a result of the UNFC acquisition and the Marine Bank transaction. The decrease was attributable to \$1.8 million of amortization partially offset by a \$102,000 core deposit intangible asset recorded in conjunction with the Marine Bank transaction.

Other Assets. Other assets increased \$6.0 million, or 21.2%, to \$34.5 million at December 31, 2006 compared to \$28.5 million at December 31, 2005. At December 31, 2006, the largest item recorded in other assets was net mortgage servicing assets of \$12.5 million. The remainder consisted of prepaid expenses, miscellaneous receivables and other miscellaneous assets.

60

Liabilities and Stockholders Equity

General. Our total liabilities were \$3.1 billion at December 31, 2006, an increase of \$164.5 million, or 5.6%, compared to \$2.9 billion at December 31, 2005. We primarily utilized FHLBank advances to fund lending growth during the year ended December 31, 2006.

Deposits. During 2006, deposits generated through our retail banking facilities increased \$105.6 million and we acquired \$8.1 million in deposits related to the Marine Bank transaction. Offsetting our 2006 increase in deposits was a transfer of \$21.7 million of deposits to the purchaser of our Plainville and Stockton, Kansas bank offices and the maturing of \$78.0 million of brokered time deposits which existed at December 31, 2005. As a result, net deposits increased \$14.0 million, or 0.7%, to \$2.1 billion at December 31, 2006.

Edgar Filing: TIERONE CORP - Form 10-K

At December 31,

Total deposits	\$ 2,052,343	\$ 2,038,319	\$ 14,024	0.69%
----------------	--------------	--------------	-----------	-------

Our transaction accounts (checking, savings and money market) totaled \$931.8 million at December 31, 2006, a decrease of \$437,000 compared to \$932.2 million at December 31, 2005. The number of transaction accounts increased by 3,700 accounts, or 3.0%, to 128,600 transaction accounts. The weighted average interest rate of our transaction accounts was 1.68% at December 31, 2006 compared to 1.35% at December 31, 2005. The weighted average interest rate of our time deposits was 4.81% at December 31, 2006 compared to 3.52% at December 31, 2005. The increase in our money market accounts and time deposits was primarily the result of customers migrating to these accounts from lower-yielding deposit accounts due to a rising interest rate environment.

FHLBank Advances and Other Borrowings. Our FHLBank advances and other borrowings totaled \$962.4 million at December 31, 2006, an increase of \$147.5 million, or 18.1%, compared to \$814.9 million at December 31, 2005. We utilized FHLBank advances as our primary funding source for loan growth during the year ended December 31, 2006. The increase in FHLBank advances and other borrowings at December 31, 2006 was primarily attributable to borrowing an additional \$440.0 million of convertible fixed-rate advances from the FHLBank and an increase in the outstanding balance on our FHLBank line of credit to \$72.5 million at December 31, 2006. These new advances were partially offset by the repayment of \$352.2 million of FHLBank advances. The weighted average interest rate on FHLBank advances executed in 2006 was 4.28%. The weighted average interest rate on FHLBank advances which matured or were called by the FHLBank in 2006 was 3.08%. The weighted average interest rate on our FHLBank advances and other borrowings was 4.40% at December 31, 2006, an increase of 63 basis points compared to 3.77% at December 31, 2005.

Accrued Expenses and Other Liabilities. Our accrued expenses and other liabilities totaled \$29.3 million at December 31, 2006, an increase of \$1.3 million, or 4.8%, compared to \$28.0 million at December 31, 2005. The primary items comprising accrued expenses and other liabilities are accrued taxes payable, deferred compensation agreements, loan servicing payments and other miscellaneous accrued expenses.

Stockholders Equity. At December 31, 2006, stockholders equity totaled \$353.3 million, an increase of \$44.4 million, or 14.4%, compared to \$308.9 million at December 31, 2005. The increase in stockholders equity primarily reflected net income of \$41.3 million during the year ended December 31, 2006, \$4.9 million related to common stock earned by participants in the ESOP, \$2.9 million related to amortization of awards under the 2003 MRRP and \$1.7 million related to amortization of stock options under the 2003 SOP. These increases were partially offset by \$4.8 million in stock repurchases and \$4.5 million in cash dividends paid to our stockholders. We paid cash dividends of \$0.06 per common share on March 31, 2006 to stockholders of record on March 15, 2006 and \$0.07 per common share on June 30, 2006, September 29, 2006 and December 29, 2006 to stockholders of record on June 15, 2006, September 15, 2006 and December 15, 2006.

61

On July 27, 2004, we announced that our Board of Directors had authorized the repurchase of up to 1,828,581 shares of our outstanding common stock. There is no stated expiration date for this authorization. We repurchased 152,984 shares of our outstanding common stock during the year ended December 31, 2006. The weighted average price paid per common share was \$31.54 for the year ended December 31, 2006. After accounting for earlier repurchases, at December 31, 2006, the total remaining common stock repurchase authority was 1,527,059 shares.

Comparison of Operating Results for the Years Ended December 31, 2007 and 2006

Net Income (Loss). Net loss for the year ended December 31, 2007 was \$12.4 million, or \$0.74 per diluted and basic share, compared to net income of \$41.3 million, or \$2.41 per diluted share (\$2.50 per basic share), for the year ended December 31, 2006. The decrease in our net income for the year ended December 31, 2007 compared to the same period in 2006 was primarily attributable to the increase in the provision for loan losses resulting from an increased level of nonperforming loans. A recent appellate court decision in our federal goodwill litigation (see Item 3. Legal Proceedings for additional information) resulted in a 2007 fourth quarter pretax charge of \$560,000 recorded in other operating expense to reflect fees and expenses incurred during the appeal process which had previously been capitalized. The impact after income tax benefits of \$202,000 was \$358,000. The appellate court rendered its decision after we had reported our financial results for the quarter and year ended December 31, 2007. Our 2007 Consolidated Statement of Operations and related loss per share data in this Annual Report on Form 10-K have been updated accordingly.

Net Interest Income. Net interest income is the most significant component of our earnings and consists of interest income on interest-earning assets offset by interest expense on interest-bearing liabilities. Changes in net interest income result from changes in volume, net interest spread and net interest margin. Volume relates to the level of interest-earning assets and interest-bearing liabilities. Net interest spread refers to the difference between the yield on interest-earning assets and the rate paid on interest-bearing liabilities. Net interest margin refers to net interest income divided by total interest-earning assets and is influenced by the level and mix of interest-earning assets and interest-bearing liabilities.

Edgar Filing: TIERONE CORP - Form 10-K

Net interest income, average interest rate spread and net interest margin for the year ended December 31, 2007 were negatively affected by the increased balance of our nonperforming loans as we do not recognize interest income on nonperforming loans (loans 90 days or more past due). We had nonperforming loans totaling \$128.5 million and \$30.1 million at December 31, 2007 and 2006, respectively.

Net interest income before provision for loan losses totaled \$116.1 million for the year ended December 31, 2007, a decrease of \$9.7 million, or 7.7%, compared to \$125.9 million for the year ended December 31, 2006. The decrease in net interest income for the year ended December 31, 2007 compared to the year ended December 31, 2006 was primarily attributable to an 86 basis point increase in the average rate paid on time deposits and an increase of \$201.8 million in the average balance of time deposits. Our net interest income for the year ended December 31, 2006 was supplemented by a \$2.7 million loan prepayment fee collected on a commercial real estate loan.

Our average interest rate spread was 3.15% for the year ended December 31, 2007 compared to 3.72% for the year ended December 31, 2006. The decrease in our average interest rate spread was attributable to an increase in the average rate paid on interest-bearing liabilities, primarily time deposits. Our average interest rate spread was also negatively affected by our increased level of nonperforming loans.

The average yield on interest-earning assets was 7.21% for the year ended December 31, 2007, a three basis point decrease compared to 7.24% for the year ended December 31, 2006. Our average rate paid on interest bearing liabilities was 4.06% for the year ended December 31, 2007, an increase of 54 basis points compared to 3.52% for the year ended December 31, 2006. The increase in the average rate paid on interest-bearing liabilities was primarily the result of customers migrating to higher-yielding deposit products such as time deposits.

Our net interest margin was 3.58% for the year ended December 31, 2007 compared to 4.07% for the year ended December 31, 2006. The decrease in net interest margin was primarily attributable to the increased average interest rate on our interest-bearing liabilities, primarily time deposits. This decrease was partially offset by the increase in the average balance of loans receivable. Our net interest margin for the year ended December 31, 2007 compared to the year ended December 31, 2006 was negatively impacted by the increased balance of nonperforming loans.

62

We anticipate that our average interest rate spread and net interest margin may further compress during 2008 due to slower loan growth and increasing levels of nonperforming loans.

Average Balances, Net Interest Income, Yields Earned and Cost of Funds. The following table shows for the periods indicated the total dollar amount of interest from average interest-earning assets and the resulting yields, as well as the interest expense on average interest-bearing liabilities, expressed both in dollars and rates, net interest margin and average interest rate spread. All average balances are based on daily balances.

	Year Ended December 31,

(1) Includes securities available for sale and held to maturity. Investment securities also include FHLBank Topeka stock.

(2) Includes nonperforming loans during the respective periods. Calculated net of unamortized premiums, discounts and deferred fees, loans in process and allowance for loan losses.

(3) Net interest income divided by average interest-earning assets.

63

Rate/Volume Analysis. The following table shows the extent to which changes in interest rates and changes in the volume of interest-related assets and liabilities affected our interest income and expense during the periods indicated. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to: (1) changes in rate (change in rate multiplied by prior year volume), and (2) changes in volume (change in volume multiplied by prior year rate). The combined effect of changes in both rate and volume has been allocated proportionately to the change due to rate and the change due to volume.

Net change in net interest income	\$ (13,875)	\$ 4,127	\$ (9,748)	\$ 14,678	\$ 6,275	\$ 20,953

(1) Calculated net of unamortized premiums, discounts and deferred fees, loans in process and allowance for loan losses.

Interest Income. For the year ended December 31, 2007 our total interest income was \$234.0 million, an increase of \$10.1 million, or 4.5%, compared to \$223.9 million for the year ended December 31, 2006. Interest income on loans receivable totaled \$220.0 million for the year ended December 31, 2007, an increase of \$5.3 million, or 2.5%, compared to \$214.7 million for the year ended December 31, 2006. The average balance of loans receivable totaled \$3.0 billion for the year ended December 31, 2007, an increase of \$71.5 million, or 2.5%, compared to \$2.9 billion for the year ended December 31, 2006. The average yield earned on the loan portfolio was 7.39% for both of the years ended December 31, 2007 and 2006.

The increase in total interest income for the year ended December 31, 2007 was primarily attributable to an increase in interest income on loans receivable. The increase in interest income on loans receivable was attributable to an increase in the average balance of loans receivable. The increases in the average balance of loans receivable was offset by the increased balance of nonperforming loans.

Interest Expense. Our total interest expense for the year ended December 31, 2007 was \$117.9 million, an increase of \$19.9 million, or 20.3%, compared to \$98.0 million for the year ended December 31, 2006. Interest expense on deposits totaled \$82.0 million for the year ended December 31, 2007, an increase of \$21.8 million, or 36.1%, compared to \$60.2 million for the year ended December 31, 2006. Interest expense on FHLBank advances and other borrowings declined \$1.9 million, or 5.0%, to \$35.9 million for the year ended December 31, 2007 compared to \$37.8 million for the year ended December 31, 2006. The average rate paid on interest-bearing deposits was 3.92% and 3.18% for the years ended December 31, 2007 and 2006, respectively. The average rate paid on FHLBank advances and other borrowings increased to 4.42% for the year ended December 31, 2007 compared to 4.23% for the year ended December 31, 2006. Additionally, the average balance of our interest-bearing liabilities totaled \$2.9 billion for the year ended December 31, 2007, an increase of \$116.1 million, or 4.2%, compared to \$2.8 billion for the year ended December 31, 2006. The average balance of our interest-bearing deposits increased \$197.1 million, or 10.4%, to \$2.1 billion for the year ended December 31, 2007 compared to \$1.9 billion for the year ended December 31, 2006. The average balance of our FHLBank advances and other borrowings totaled \$812.4 million for the year ended December 31, 2007, a decrease of \$81.1 million, or 9.1%, compared to \$893.4 million for the year ended December 31, 2006.

64

The increase in interest expense was primarily attributable to an increase in the average rate paid on interest-bearing liabilities. This increase was primarily the result of increases in the average rate paid on and the average balance of time deposits. The increase in time deposits was the result of marketing promotions designed to attract new customers. Additionally, the increase was also attributable to customers migrating to other higher-yielding deposit products.

Provision for Loan Losses. We establish provisions for loan losses in order to maintain the allowance for loan losses at a level we believe, to the best of our knowledge, covers all known and inherent losses in the portfolio that are both probable and reasonable to estimate at each reporting date. Management performs reviews no less frequently than quarterly in order to identify these inherent losses and to assess the overall collection probability for the loan portfolio. Our reviews consist of a quantitative analysis by loan category, using historical loss experience, and consideration of a series of qualitative loss factors.

We recorded a provision for loan losses of \$68.1 million for the year ended December 31, 2007 compared to \$6.1 million for the year ended December 31, 2006, an increase of \$62.0 million. The increase in our provision for loan losses for the year ended December 31, 2007 compared to the year ended December 31, 2006 was primarily attributable to the increase in our nonperforming residential construction, land and land development and commercial construction loans. The increase in our provision for loan losses was also attributable to an increase in the level of loans which were deemed impaired at December 31, 2007. The following table details nonperforming and impaired loans for selected loan types for the periods presented:

Nonperforming Loans

Impaired Loans

Edgar Filing: TIERONE CORP - Form 10-K

<i>(Dollars in thousands)</i>	Nonperforming Loans			Impaired Loans		
	At December 31,			At December 31,		
	2007	2006	\$ Change	2007	2006	\$ Change
Residential construction	\$ 57,709	\$ 18,074	\$ 39,635	\$ 51,885	\$ 459	\$ 51,426
Land and land development	38,708	4,696	34,012	51,120	--	51,120
Commercial construction	19,184	--	19,184	19,184	--	19,184
Total	\$ 115,601	\$ 22,770	\$ 92,831	\$ 122,189	\$ 459	\$ 121,730

Our loan delinquency rate (30 or more days delinquent) at December 31, 2007 as a percentage of net loans (before allowance for loan losses) was 6.08% compared to 1.89% at December 31, 2006. Our level of nonperforming loans and loan delinquencies may continue to increase.

During the years ended December 31, 2007 and 2006, we charged-off, net of recoveries, \$32.0 million and \$3.8 million, respectively. Charge-offs, net of recoveries, during the year ended December 31, 2007 consisted primarily of \$26.4 million of residential construction loans, \$2.0 million of consumer loans, \$1.9 million of business loans and \$1.6 million of commercial real estate loans. Included in the \$26.4 million of residential construction loan charge-offs were \$25.5 million of charge-offs related to loans acquired from TransLand. These charge-offs relate to a decline in the estimated fair value of residential lots due to the erosion of property values and an increase in housing inventory (both developed lots and completed houses) in the Cape Coral area of Lee County Florida. The decline in the fair value of residential lots in the Cape Coral area of Lee County Florida was deemed to be unrecoverable due to the large number of similar lots in the same geographical area and the current sale prices of similar lots in this area.

65

Our charge-offs, net of recoveries, as a percentage of average loans outstanding were 1.07% and 0.13% for the years ended December 31, 2007 and 2006, respectively. Our strategy of focusing on loans with relatively higher yields, adjustable interest rates and/or shorter terms to maturity subjects us to an increased level of credit risk which has resulted in an increased amount of nonperforming loans, loan delinquencies and charge-offs. Our volume and dollar amount of loan charge-offs and related provisions for loan losses may continue to increase in future periods.

Noninterest Income. Noninterest income for the year ended December 31, 2007 was \$30.3 million, an increase of \$1.3 million, or 4.3%, compared to \$29.1 million for the year ended December 31, 2006.

<i>(Dollars in thousands)</i>	Year Ended December 31,		Increase (Decrease)	% Change
	2007	2006		
Deposit account fees and service charges	\$ 15,823	\$ 15,054	\$ 769	5.11%
Debit card fees	3,420	2,736	684	25.00
Lending fees and service charges	3,171	3,290	(119)	(3.62)
Commissions and management fee income	4,627	3,886	741	19.07
Loss from real estate operations, net	(445)	(268)	(177)	66.04
Net gain (loss) on sales of:				
Investment securities	--	21	(21)	(100.00)
Loss on impairment of securities	(188)	--	(188)	N/A
Loans held for sale	2,844	2,084	760	36.47
Real estate owned	(225)	(135)	(90)	66.67
Gain on sale of branches	--	1,024	(1,024)	(100.00)
Other operating income	1,310	1,392	(82)	(5.89)
Total noninterest income	\$ 30,337	\$ 29,084	\$ 1,253	4.31%

Growth in noninterest income during the year ended December 31, 2007 compared to the year ended December 31, 2006 was primarily attributable to increases in deposit account fees and service charges, net gains on the sale of loans held for sale, commissions and management

Edgar Filing: TIERONE CORP - Form 10-K

fee income and debit card fees. The increase in deposit account fees and service charges was primarily due to an increase in the number of transaction accounts. At December 31, 2007, we had 133,400 transaction accounts, an increase of 4,800 accounts, compared to December 31, 2006. The increase in commissions and management fee income was primarily attributable to fees collected by TierOne Financial, a subsidiary that administers the sale of securities and insurance products. The increase in debit card fees was largely due to transaction volume.

Noninterest income for the year ended December 31, 2006 included a \$1.0 million pre-tax gain on sale of two Kansas bank offices and related deposits.

66

Noninterest Expense. Our noninterest expense increased by \$13.3 million, or 16.3%, to \$95.1 million for the year ended December 31, 2007 compared to \$81.8 million for the year ended December 31, 2006.

Other	14,401	13,077	1,324	10.12
Total noninterest expense	\$ 95,057	\$ 81,769	\$ 13,288	16.25%

The increase in noninterest expense during the year ended December 31, 2007 compared to the year ended December 31, 2006 was primarily attributable to the TransLand receivable write-off, increases in employee compensation, employee benefits, payroll taxes and professional services. At December 31, 2007, other assets included a \$7.5 million insurance receivable relating to TransLand, less a \$100,000 insurance policy deductible, that was not included in other assets at December 31, 2006. At September 30, 2007, we had a \$12.2 million receivable from TransLand associated with the alleged misappropriation of loan payoff proceeds and periodic payments. At September 30, 2007, we recorded a write-off totaling \$4.8 million of the TransLand receivable to other operating expense. This amount represents the excess of the aggregate TransLand receivable over the amount of our insurance coverage. During the three months ended December 31, 2007, we entered into a liquidation agreement with TransLand which allowed us to recover \$1.6 million of the receivable previously charged-off. This liquidation agreement does not preclude us from recovering additional amounts related to the receivable write-off in future periods. We believe that it is probable we will collect the proceeds on the insurance bond. The increase in employee compensation, employee benefits and payroll taxes resulted from personnel growth and annual salary increases. At December 31, 2007 and 2006, we had 862 and 850 full-time equivalent employees, respectively. The increase in professional services expense for the year ended December 31, 2007 was primarily related to consulting, legal and accounting services associated with the proposed Merger, TransLand-related matters and the goodwill litigation expenses.

We issue debit cards through Visa U.S.A. Inc. card association or its affiliates (Visa). Accordingly, we are a member bank of Visa. Visa U.S.A. Inc. and MasterCard International (Card Associations) have been named in antitrust lawsuits challenging the practices of the Card Associations. As a Visa member bank we will be responsible for our proportionate share of any resulting settlements. During the three months ended December 31, 2007, we recognized a pre-tax charge of \$700,000 for potential liabilities in connection with the Visa antitrust lawsuit which reflects our proportionate share of potential damages as a Visa member bank.

Income Tax Expense. Our income tax expense decreased by \$30.1 million, or 116.6%, for an income tax benefit of \$4.3 million for the year ended December 31, 2007 compared to income tax expense of \$25.8 million for the year ended December 31, 2006. The decrease in income tax expense for the year ended December 31, 2007 compared to the same period in 2006 was primarily due to a decrease in net income resulting from an increase in our provision for loan losses. The effective income tax benefit rate for the year ended December 31, 2007 was

25.6% compared to an effective income tax rate of 38.5% for the year ended December 31, 2006. The decrease in the effective tax rate for the year ended December 31, 2007 was primarily attributable to the impact of permanent tax items in relation to our net income (loss). Nondeductible expenses related to the Merger Agreement with CapitalSource were \$1.9 million for the year ended December 31, 2007.

Comparison of Operating Results for the Years Ended December 31, 2006 and 2005

Net Income. Net income for the year ended December 31, 2006 was \$41.3 million, or \$2.41 per diluted share (\$2.50 per basic share), compared to net income of \$32.8 million, or \$1.97 per diluted share (\$2.02 per basic share), for the year ended December 31, 2005. Contributing to the increases in net income and earnings per share for the year ended December 31, 2006 was a \$2.7 million pre-tax prepayment fee on a commercial real estate loan and a \$1.0 million pre-tax gain on sale of two north-central Kansas bank offices and related deposits. Offsetting the positive effect of these two items were expenses related to employee stock options. Employee stock option expenses impacted earnings per share by \$0.06 for the year ended December 31, 2006. We began expensing employee stock options in the first quarter of 2006 following the implementation of new accounting guidelines.

Net Interest Income. Net interest income before provision for loan losses totaled \$125.9 million for the year ended December 31, 2006, an increase of \$21.0 million, or 20.0%, compared to \$104.9 million for the year ended December 31, 2005. The increase in net interest income was attributable to a continued increase in the average yield on our net loan portfolio, partially offset by an increase in our funding cost, supplemented by a \$2.7 million prepayment fee collected on a commercial real estate loan during the year ended December 31, 2006.

Our average interest rate spread for the years ended December 31, 2006 and 2005 was 3.72% and 3.33%, respectively. The increase in our average interest rate spread was attributable to the increase in the yield earned on our interest-earning assets, primarily our net loan portfolio, being greater than the increase in our average rate paid on interest-bearing liabilities. The average yield on interest-earning assets was 7.24% for the year ended December 31, 2006, a 119 basis point increase compared to 6.05% for the year ended December 31, 2005. The increase in the average yield earned on interest-earning assets was primarily related to an increase in the average yield earned on loans receivable. Our average yield earned on loans receivable for the years ended December 31, 2006 and 2005 was 7.39% and 6.19%, respectively. This increase was primarily the result of our lending strategy to focus on loans with relatively higher yields, adjustable interest rates and/or shorter terms to maturity. Our average rate paid on interest bearing liabilities was 3.52% for the year ended December 31, 2006, an increase of 80 basis points compared to 2.72% for the year ended December 31, 2005. The increase in the average rate paid on interest-bearing liabilities was primarily the result of customers migrating to higher-yielding deposit products such as time deposits and money market accounts coupled with increased borrowing costs associated with FHLBank advances. These increases were primarily the result of a series of interest rate increases set by the Federal Reserve Board throughout 2005 and the first half of 2006 that has affected the rate we pay on interest bearing deposits and borrowings.

Our net interest margin (net interest income divided by average interest-earning assets) increased to 4.07% for the year ended December 31, 2006 compared to 3.58% for the year ended December 31, 2005. The increase in our net interest margin for the year ended December 31, 2006 was primarily the result of increases in the average yield earned and average balance of loans receivable. The average balance of our total interest-earning assets was \$3.1 billion for the year ended December 31, 2006, an increase of \$157.0 million, or 5.4%, compared to \$2.9 billion for the year ended December 31, 2005.

Excluding the receipt of the \$2.7 million pre-tax loan prepayment fee, our average interest rate spread would have been 3.63% for the year ended December 31, 2006. Our net interest margin would have been 3.99% for the year ended December 31, 2006.

Interest Income. Our total interest income for the year ended December 31, 2006 was \$223.9 million, an increase of \$46.5 million, or 26.2%, compared to \$177.3 million for the year ended December 31, 2005. Interest income on loans receivable totaled \$214.7 million for the year ended December 31, 2006, an increase of \$45.6 million, or 26.9%, compared to \$169.2 million for year ended December 31, 2005. The average balance of loans receivable increased \$172.2 million, or 6.3%, to \$2.9 billion for the year ended December 31, 2006 compared to \$2.7 billion for year ended December 31, 2005. The average yield earned on loans receivable increased to 7.39% for the year ended December 31, 2006 compared to 6.19% for the year ended December 31, 2005.

The increase in total interest income for the year ended December 31, 2006 was primarily attributable to an increase in interest income on loans receivable. The increase in interest income on loans receivable was primarily attributable to an increase in the average yield earned. The increase in the average yield earned and average balance of loans receivable was primarily the result of our lending strategy to focus on and sustain our holdings of loans with relatively higher yields, adjustable interest rates and/or shorter terms to maturity.

Interest Expense. Our total interest expense for the year ended December 31, 2006 was \$98.0 million, an increase of \$25.6 million, or 35.3%, compared to \$72.4 million for the year ended December 31, 2005. Interest expense on deposits totaled \$60.2 million for the year ended

Edgar Filing: TIERONE CORP - Form 10-K

December 31, 2006, an increase of \$18.3 million, or 43.6%, compared to \$41.9 million for the year ended December 31, 2005. Interest expense on FHLBank advances and other borrowings increased \$7.3 million, or 24.0%, to \$37.8 million for the year ended December 31, 2006 compared to \$30.5 million for the year ended December 31, 2005. The average rate paid on interest-bearing deposits was 3.18% and 2.29% for the years ended December 31, 2006 and 2005, respectively. The average rate paid on FHLBank advances and other borrowings increased to 4.23% for the year ended December 31, 2006 compared to 3.65% for the year ended December 31, 2005. The average balance of our interest-bearing liabilities totaled \$2.8 billion for the year ended December 31, 2006, an increase of \$121.1 million, or 4.5%, compared to \$2.7 billion for the year ended December 31, 2005. The average balance of our interest-bearing deposits increased \$62.3 million, or 3.4%, to \$1.9 billion for the year ended December 31, 2006 compared to \$1.8 billion for the year ended December 31, 2005. The average balance of our FHLBank advances and other borrowings totaled \$893.4 million for the year ended December 31, 2006, an increase of \$58.8 million, or 7.0%, compared to \$834.6 million for the year ended December 31, 2005.

The increase in interest expense was attributable to an increase in the average rate paid on interest-bearing liabilities. This increase was primarily the result of a series of interest rate increases set by the Federal Reserve Board throughout 2005 and the first half of 2006 that has affected the rate we pay on interest bearing deposits and borrowings.

Provision for Loan Losses. We made a provision for loan losses of \$6.1 million for the year ended December 31, 2006 compared to \$6.4 million for the year ended December 31, 2005, a decrease of \$383,000, or 6.0%. At December 31, 2006 our nonperforming loans totaled \$30.1 million, or 0.99% of net loans, compared to \$14.4 million, or 0.51% of net loans, at December 31, 2005. The increase in nonperforming loans and assets related primarily to increases of \$16.2 million in nonperforming residential construction loans, \$3.8 million in nonperforming land and land development loans, \$2.8 million in real estate owned and \$1.8 million in nonperforming business loans partially offset by a \$4.6 million decline in nonperforming multi-family residential loans. Our focus on loans with relatively higher yields, adjustable interest rates and/or shorter terms to maturity also subjects us to a potentially higher degree of credit risk. Our loan delinquency rate (30 or more days delinquent) at December 31, 2006 as a percentage of net loans (before allowance for loan losses) was 1.89% compared to 1.34% at December 31, 2005.

During the years ended December 31, 2006 and 2005, we charged-off, net of recoveries, \$3.8 million and \$2.4 million, respectively. Charge-offs, net of recoveries, during the year ended December 31, 2006 consisted primarily of \$1.4 million of consumer loans, \$982,000 of business loans and \$532,000 of land and land development loans. Our charge-offs, net of recoveries, as a percentage of average loans outstanding were 0.13% and 0.09%, respectively, for the years ended December 31, 2006 and 2005. Our strategy of focusing on loans with relatively higher yields, adjustable interest rates and/or shorter terms to maturity subjects us to an increased level of credit risk. Our focus on such loans has contributed to an increased amount of loan delinquencies and charge-offs in recent years.

69

Noninterest Income. Noninterest income for the year ended December 31, 2006 was \$29.1 million, an increase of \$2.5 million, or 9.4%, compared to \$26.6 million for the year ended December 31, 2005.

<i>(Dollars in thousands)</i>	Year Ended December 31,		Increase (Decrease)	% Change
	2006	2005		
Deposit account fees and service charges	\$ 15,054	\$ 13,828	\$ 1,226	8.87%
Debit card fees	2,736	2,104	632	30.04
Lending fees and service charges	3,290	3,353	(63)	(1.88)
Mortgage servicing rights valuation adjustments	--	800	(800)	(100.00)
Commissions and management fee income	3,886	3,802	84	2.21
Income (loss) from real estate operations, net	(268)	(7)	(261)	3,728.57
Net gain (loss) on sales of:				
Investment securities	21	14	7	50.00
Loans held for sale	2,084	1,928	156	8.09
Real estate owned	(135)	85	(220)	(258.82)
Gain on sale of branches	1,024	--	1,024	N/A
Other operating income	1,392	678	714	105.31
Total noninterest income	\$ 29,084	\$ 26,585	\$ 2,499	9.40%

The increase in noninterest income during the year ended December 31, 2006 compared to the year ended December 31, 2005 was primarily attributable to a \$1.2 million increase in deposit account fees and service charges and a \$1.0 million pre-tax gain on sale of two north-central Kansas bank offices and related deposits. The increase in deposit account and debit card fees was largely due to an increase in the number of transaction accounts. At December 31, 2006, we had 128,600 transaction accounts, an increase of 3,700 accounts, compared to

Edgar Filing: TIERONE CORP - Form 10-K

December 31, 2005. The increases in noninterest income during the year ended December 31, 2006 compared to the year ended December 31, 2005 were partially offset by no mortgage servicing rights valuation recapture in 2006 compared to \$800,000 of recapture during 2005.

Noninterest Expense. Our noninterest expense increased by \$9.3 million, or 12.9%, to \$81.8 million for the year ended December 31, 2006 compared to \$72.5 million for the year ended December 31, 2005.

<i>(Dollars in thousands)</i>	Year Ended December 31,		Increase (Decrease)	% Change

70

The increase in noninterest expense during the year ended December 31, 2006 compared to the year ended December 31, 2005 was primarily attributable to increases in employee compensation, stock-based compensation plans and employee benefits. The increase in employee compensation, employee benefits and payroll taxes resulted from continued personnel growth and annual salary increases as well as charges related to the expensing of employee stock options. At December 31, 2006 we had 850 full-time equivalent employees compared to 772 full-time equivalent employees at December 31, 2005. In accordance with SFAS No. 123(R), *Share-Based Payment*, we began expensing stock options on January 1, 2006 using the modified-prospective application method. Other operating expenses in 2006 increased primarily due to an increase of \$874,000 in legal expense. Our legal expenses in 2006 primarily relate to a breach of contract lawsuit filed in 1995 against the federal government following the enactment of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA). Under FIRREA, the federal government eliminated approximately \$30.0 million of goodwill remaining from three supervisory mergers we completed in 1982. In October 2006, we received a favorable opinion, which is now on appeal, from the United States Court of Federal Claims awarding us \$4.5 million in damages.

Income Tax Expense. Our income tax expense increased by \$6.0 million, or 30.5%, to \$25.8 million for the year ended December 31, 2006 compared to \$19.8 million for the year ended December 31, 2005. The increase in income tax expense for the year ended December 31, 2006 compared to the same period in 2005 was primarily due to an increase in net income. The effective income tax rate for the year ended December 31, 2006 was 38.5% compared to 37.6% for the year ended December 31, 2005. This increase in our effective tax rate was the result of an increase in nondeductible employee benefits.

Asset and Liability Management

Market risk is the risk of loss from adverse changes in market prices and interest rates. Our market risk arises primarily from the interest rate risk that is inherent in our lending and deposit taking activities. The results of operations for financial institutions may be materially and adversely affected by changes in economic conditions, including rapid changes in interest rates, declines in real estate market values and the monetary and fiscal policies of the federal government. Our net interest income and the net present value of our assets, liabilities and off-balance sheet contracts are subject to fluctuations in interest rates. When interest-earning assets such as loans are funded by interest-bearing liabilities such as deposits and FHLBank advances and other borrowings, a changing interest rate environment may have a significant effect on our financial condition and results of operations. To that end, we actively manage our interest rate risk exposure. Additionally, our loan portfolio is subject to credit risk. We manage credit risk primarily through our loan underwriting and oversight policies.

Additionally, the extent to which borrowers prepay loans is affected by prevailing interest rates. When interest rates increase, borrowers are less likely to prepay loans; whereas, when interest rates decrease, borrowers are more likely to prepay loans. Loan prepayments may affect the levels of loans retained in our portfolio and may affect our net interest income.

Edgar Filing: TIERONE CORP - Form 10-K

The principal objectives of our interest rate risk management function are to evaluate the interest rate risk inherent in certain balance sheet accounts, determine the level of risk appropriate given our business strategy, operating environment, capital and liquidity requirements and performance objectives and manage the risk consistent with guidelines approved by our Board of Directors. Through such management, we seek to reduce the vulnerability of our operations to changes in interest rates. The extent of the movement in interest rates is an uncertainty that could have a negative impact on our future earnings. Our Board of Directors has established an Asset/Liability Committee, comprised of executive management, which is responsible for development and oversight of our asset/liability policies and monitoring our interest rate risk position. The Asset/Liability Committee meets on a monthly basis and reports trends and interest rate risk positions to our Board of Directors on a quarterly basis.

Our interest rate sensitivity is monitored by management through the use of financial modeling software that estimates the change in our net portfolio value (NPV) over a range of interest rate scenarios. NPV is the present value of expected cash flows from assets, liabilities and off-balance sheet contracts. The NPV ratio, under any interest rate scenario, is defined as the NPV in that scenario divided by the fair value of assets in the same scenario. The OTS produces a similar analysis using its own model, based upon data submitted in our quarterly Thrift Financial Reports, the results of which may vary from our internal model primarily due to differences in assumptions utilized, including estimated loan prepayment speeds, reinvestment rates and deposit turnover rates.

71

Net Portfolio Value. The following table sets forth our NPV as of December 31, 2007, as calculated by the OTS:

<i>(Dollars in thousands)</i>	Net Portfolio Value			NPV as a % of Portfolio Value of Assets	
	\$ Amount	\$ Change	% Change	NPV Ratio	Change
Change in Interest Rates in Basis Points (Rate Shock):					
300	\$ 381,993	\$ (12,836)	(3.25)%	10.70%	(0.20)%
200	394,606	(223)	(0.06)	10.99	0.09
100	400,061	5,232	1.40	11.08	0.18
50	398,190	3,361	0.85	11.01	0.11
Static	394,829	--	--	10.90	--
-50	387,817	(7,012)	(1.78)	10.69	(0.21)
-100	381,709	(13,120)	(3.32)	10.50	(0.40)
-200	360,066	(34,763)	(8.80)	9.87	(1.03)

Due to our recognition of the need to control our interest rate exposure, we have, in recent years, focused on loans with relatively higher yields, adjustable interest rates and shorter terms to maturity which are less subject to interest rate risk and primarily consist of multi-family residential, commercial real estate, land and land development, construction, agricultural, business, warehouse mortgage lines of credit and consumer loans.

Certain shortcomings are inherent in the methodology used in the above interest rate risk measurements. Modeling changes in NPV require the making of certain assumptions which may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. In this regard, the NPV model presented assumes that the composition of our interest sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and also assumes that a particular change in the interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or repricing of specific assets and liabilities. Accordingly, although the NPV measurements and net interest income models provide an indication of our interest rate risk exposure at a particular point in time, such measurements are not intended to and do not provide a precise forecast of the effect of changes in market interest rates on our net interest income and will differ from actual results.

72

GAP Analysis. The following table sets forth the estimated maturity/repricing and the resulting gap between our interest-earning assets and interest-bearing liabilities at December 31, 2007. The estimated maturity/repricing amounts reflect contractual maturities and amortizations, assumed loan prepayments based on our historical experience and estimated deposit account decay rates. Management believes these assumptions and estimates are reasonable, but there can be no assurance in this regard.

Edgar Filing: TIERONE CORP - Form 10-K

Maturity / Repricing During the Year Ended
December 31,

<i>(Dollars in thousands)</i>	2008	2009 - 2010	2011 - 2012	After 2012	Total

Cumulative net interest-earnings assets a percentage of cumulative interest-bearing liabilities	76.44%	97.96%	99.42%	113.05%	

- (1) Interest earnings assets are included in the period in which the balances are expected to be redeployed and/or repriced as a result of anticipated prepayments, scheduled rate adjustments and contractual maturities.
- (2) Includes held to maturity and available for sale investment and mortgage-backed securities at amortized cost.
- (3) For purposes of the gap analysis, loans receivable includes loans held for sale and nonperforming loans.

Liquidity and Capital Resources

Our primary sources of funds are deposits; amortization of loans, loan prepayments and maturity of loans; repayment, maturity or sale of investment and mortgage-backed securities; and other funds provided from operations. While scheduled payments from the amortization of loans and mortgage-backed securities and maturing investment securities are relatively predictable sources of funds, deposit flows and loan prepayments can be greatly influenced by general interest rates, economic conditions and competition. We utilize FHLBank advances and other borrowings and brokered time deposits as additional funding sources.

We actively manage our liquidity in an effort to maintain an adequate liquidity margin over the level necessary to support expected and potential loan fundings and deposit withdrawals. Our liquidity level may vary throughout the year, depending on economic conditions, deposit fluctuations and loan funding needs.

During the year ended December 31, 2007, net cash provided by operating activities was \$39.3 million, which primarily consisted of net interest income before provision for loan losses. Net cash provided by investing activities during the year ended December 31, 2007 was \$11.5 million and related to cash inflows from maturing investment securities and a decrease in loans receivable partially offset by the purchase of

Edgar Filing: TIERONE CORP - Form 10-K

available for sale investment securities. During the year ended December 31, 2007, net cash provided by financing activities was \$103.8 million, which consisted primarily of net cash inflows from deposits and FHLBank advances, partially offset by the repayment of FHLBank advances and cash dividends paid on our common stock.

Deposits, particularly core deposits, typically provide a more preferable source of funding than FHLBank advances and other borrowings. However, to the extent that competitive or market factors do not allow us to meet our funding needs with deposits alone, FHLBank advances and other borrowings provide a readily available alternative source of liquidity. Deposits generated through our retail banking facilities increased \$378.2 million, or 18.4%, to \$2.4 billion at December 31, 2007 compared to \$2.1 billion at December 31, 2006. The increase in deposits during the year ended December 31, 2007 was primarily used to reduce our FHLBank advances. In addition, due to a decreased volume of lending activity we had \$241.5 million of cash and cash equivalents at December 31, 2007. At December 31, 2007, we had time deposits maturing within the next 12 months amounting to \$1.3 billion. Based upon historical experience, we anticipate that a significant portion of the maturing time deposits will be renewed with us.

In addition to cash flows generated by loan and securities payments and prepayments, we have additional borrowing capacity to fund our asset growth. The average balance of our FHLBank advances and other borrowings was \$812.4 million for the year ended December 31, 2007 compared to \$893.4 million for the year ended December 31, 2006. To date, substantially all of our borrowings have consisted of FHLBank advances. Pursuant to blanket collateral agreements with the FHLBank, we have pledged qualifying residential, multi-family residential and commercial real estate mortgages, residential construction, commercial construction and agricultural real estate loans with carrying values totaling approximately \$1.3 billion and \$1.6 billion at December 31, 2007 and 2006, respectively. Other qualifying collateral can be pledged in the event additional borrowing capacity is required.

74

Aggregate Contractual Obligations and Off-Balance Sheet Arrangements

We believe we have sufficient liquidity to fund existing and future loan commitments, to fund maturing time deposits and demand deposit withdrawals, to invest in other interest-earning assets and to meet operating expenses. At December 31, 2007, we had the following contractual obligations (excluding bank deposits and interest) and lending commitments:

<i>(Dollars in thousands)</i>	Due In				
	Total at December 31, 2007	2008	2009 - 2010	2011 - 2012	After 2012
Contractual obligations:					
FHLBank Topeka advances and other borrowings	\$ 689,288	\$ 24,165	\$ 120,185	\$ 25,000	\$ 519,938
Recourse obligations on assets	18,953	18,953	--	--	--
Annual rental commitments under non-cancelable operating leases	4,410	1,125	1,386	558	1,341
Total contractual obligations	712,651	44,243	121,571	25,558	521,279
Lending commitments:					
Commitments to originate loans	68,149	68,149	--	--	--
Commitments to sell loans	(50,008)	(50,008)	--	--	--
Commitments to purchase loans	32,970	32,970	--	--	--
Loans in process	376,186	206,104	170,082	--	--
Standby letters of credit	2,585	2,585	--	--	--
Unused lines of credit:					
Warehouse mortgage lines of credit	210,419	210,419	--	--	--
Business loans	221,493	221,493	--	--	--
Consumer loans	133,194	133,194	--	--	--
Total lending commitments and unused lines of credit	994,988	824,906	170,082	--	--

Total contractual obligations, lending commitments and unused lines of credit	\$ 1,707,639	\$ 869,149	\$ 291,653	\$ 25,558	\$ 521,279
---	--------------	------------	------------	-----------	------------

We have not used, and have no intention to use, any significant off-balance sheet financing arrangements for liquidity purposes or otherwise. Our primary financial instruments with off-balance sheet risk are limited to loan servicing for others, our obligations to fund loans to customers pursuant to existing commitments and commitments to purchase and sell mortgage loans. In addition, we have certain risks due to limited recourse arrangements on loans serviced for others and recourse obligations related to loan sales. At December 31, 2007, the maximum total dollar amount of such recourse was approximately \$19.0 million. Based on historical experience, at December 31, 2007, we had established a liability of \$733,000 with respect to this recourse obligation. In addition, we have not had, and have no intention to have, any significant transactions, arrangements or other relationships with any unconsolidated, special purpose entities.

For more information regarding our contractual obligations, commitments, contingent liabilities and off-balance sheet arrangements see *Note 22 Commitments, Contingencies and Financial Instruments with Off-Balance Sheet Risk* included in Item 8. Financial Statements and Supplementary Data, in Part II of this Annual Report on Form 10-K.

Impact of Inflation and Changing Prices

The financial statements, accompanying notes, and related financial data presented in Item 8. Financial Statements and Supplementary Data in Part II of this Annual Report on Form 10-K have been prepared in accordance with GAAP, which require the measurement of financial position and operating results in terms of historical dollars without considering the changes in purchasing power of money over time due to inflation. The impact of inflation is reflected in increased cost of our operations. Most of our assets and liabilities are monetary in nature; therefore, the impact of interest rates has a greater impact on its performance than the effects of general levels of inflation. Interest rates do not necessarily move in the same direction or to the same extent as the prices of goods and services.

Recent Accounting Pronouncements

Statements of Financial Accounting Standards

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles and expands disclosure about fair value measurements. SFAS No. 157 emphasizes that fair value is a market-based measurement, not an entity-specific measurement. Therefore, a fair value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability. This statement clarifies that market participant assumptions include assumptions about risk. A fair value measurement should include an adjustment for risk if market participants would include one in pricing the related asset or liability, even if the adjustment is difficult to determine. This statement also clarifies that market participant assumptions should also include assumptions about the effect of a restriction on the sale or use of an asset. This statement clarifies that fair value measurement for a liability should reflect nonperformance risk (the risk that the obligation will not be fulfilled). This statement expands disclosures about the use of fair value to measure assets and liabilities in interim and annual periods subsequent to initial recognition. The disclosures focus on the inputs used to measure fair value and for recurring fair value measurements using significant unobservable inputs and the effect of the measurements on earnings (or changes in net assets) for the period. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. We do not anticipate that the adoption of SFAS No. 157 will have a material impact on our consolidated financial statements.

In September 2006, the FASB issued SFAS No. 158, *Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132(R)* (SFAS No. 158). SFAS No. 158 requires an employer to recognize the overfunded or underfunded status of defined benefit postretirement plans as an asset or liability in its statement of financial position. The funded status is measured as the difference between the assets at fair value and benefit obligation (the projected benefit obligation for pension plans or the accumulated benefit obligation for other postretirement benefit plans). An employer is also required to measure the funded status of a plan as of the date of its year-end statement of financial position with changes in the funded status recognized through comprehensive income. SFAS No. 158 also requires certain disclosures regarding the effects on net periodic benefit cost for the next fiscal year that arise from delayed recognition of gains or losses, prior service costs or credits and the transition asset or obligation. An employer with publicly traded equity securities is required to initially recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after December 15, 2006. The adoption of SFAS No. 158 did not have a material impact on our consolidated financial statements.

Edgar Filing: TIERONE CORP - Form 10-K

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities, Including an amendment of FASB Statement No. 115* (SFAS No. 159). SFAS No. 159 provides an alternative measurement treatment for certain financial assets and liabilities, under an instrument-by-instrument election, that permits fair value to be used for both initial and subsequent measurement, with changes in fair value recognized in earnings. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. We do not anticipate that the adoption of SFAS No. 159 will have a material impact on our consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51* (SFAS No. 160). The objective of this statement is to improve the relevance, comparability and transparency of the financial information that a reporting entity provides in its consolidated financial statements by establishing accounting and reporting standards. SFAS No. 160 is effective for fiscal years beginning after December 15, 2008. We do not anticipate that the adoption of SFAS No. 160 will have a material impact on our consolidated financial statements.

76

In December 2007, The FASB issued SFAS No. 141R, *Business Combinations* (SFAS No. 141R). The objective of this statement is to improve the relevance, representational faithfulness and comparability of the information that a reporting entity provides in its financial reports about a business combination and its effects. SFAS No. 141R establishes principles and requirements for how the acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed and any noncontrolling interest in the acquiree, recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008.

SEC Staff Accounting Bulletins

In November 2007, the SEC issued Staff Accounting Bulletin No. 109, *Written Loan Commitments Recorded at Fair Value Through Earnings* (SAB 109). SAB 109 expresses the views of SEC staff (Staff) regarding written loan commitments that are accounted for at fair value through earnings under GAAP. SAB 105, *Application of Accounting Principles to Loan Commitments* (SAB 105) provided the views of Staff regarding derivative loan commitments that are accounted for at fair value through earnings pursuant to SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*. SAB 105 stated that in measuring fair value of a derivative loan commitment, it was inappropriate to incorporate the expected net future cash flows related to the associated servicing of the loan. SAB 109 supersedes SAB 105, and expresses the current view of Staff that, consistent with the guidance in SFAS No. 156, *Accounting for Servicing of Financial Assets*, and SFAS No. 159, the expected net future cash flows related to the associated servicing of the loan should be included in the measurement of all written loan commitments that are accounted for at fair value through earnings. The SEC expects registrants to apply the provisions of SAB 109 on a prospective basis to derivative loan commitments issued or modified in fiscal quarters beginning after December 31, 2007. We do not anticipate that the adoption of SAB 109 will have a material impact on our consolidated financial statements.

In December 2007 the SEC issued Staff Accounting Bulletin No 110, *Certain Assumptions Used in Valuation Methods* (SAB 110). SAB 110 expresses the views of Staff regarding the use of a simplified method, as discussed in SAB 107, *Share-Based Payment*, in developing an estimate of the expected term of plain vanilla share options in accordance with SFAS No. 123(revised 2004), *Share-Based Payment*. Staff indicated in SAB 107 that it will accept a company's election to use the simplified method, regardless of whether the company has sufficient information to make more refined estimates of expected term. At the time SAB 107 was issued, the Staff believed that more detailed external information about employee exercise behavior (e.g., employee exercise patterns by industry and/or other categories of companies) would, over time, become readily available to companies. Therefore, the Staff stated in SAB 107 that it would not expect a company to use the simplified method for option grants after December 31, 2007. The Staff understands that such detailed information about employee exercise behavior may not be widely available by December 31, 2007. Accordingly, the Staff will continue to accept, under certain circumstances, the use of the simplified method beyond December 31, 2007.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The information required herein is incorporated by reference from *Asset and Liability Management* and *Impact of Inflation and Changing Prices* included in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II of this Annual Report on Form 10-K.

77

Item 8. Financial Statements and Supplementary Data**Report of Independent Registered Public Accounting Firm**

The Board of Directors and Stockholders
TierOne Corporation:

We have audited the accompanying consolidated statements of financial condition of TierOne Corporation and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of operations, changes in stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2007. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of TierOne Corporation and subsidiaries as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2007, in conformity with U.S. generally accepted accounting principles.

As discussed in note 1 to the consolidated financial statements, effective January 1, 2006, the Company changed its method of accounting for stock-based benefit plans.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), TierOne Corporation's internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 10, 2008 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

See accompanying notes to consolidated financial statements.

TierOne Corporation and Subsidiaries
Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies

Organization. TierOne Corporation (Company) is a Wisconsin corporation, incorporated in 2002 for the purpose of becoming the holding company for TierOne Bank (Bank), a federal savings bank. On October 1, 2002, the Bank converted from mutual to stock form of ownership. On the same date, the Company acquired all of the issued and outstanding capital stock of the Bank with a portion of the proceeds from the Company's initial public offering.

As used in this report, unless the context otherwise requires, the terms we, us, or our refer to TierOne Corporation and its wholly owned subsidiary, TierOne Bank.

Basis of Consolidation. The consolidated financial statements include the accounts of the Company, its wholly owned subsidiary, the Bank, and the Bank's wholly owned subsidiaries, TMS Corporation of the Americas (TMS) and United Farm & Ranch Management (UFARM). TMS is the holding company of TierOne Investments and Insurance, Inc. (d/b/a TierOne Financial), a company that administers the sale of insurance and securities products, and TierOne Reinsurance Company, which reinsures credit life and disability insurance policies. UFARM provides agricultural customers with professional farm and ranch real estate management and real estate brokerage services.

Estimates. The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amount of assets and liabilities at the date of the statement of financial condition, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Investment and Mortgage-Backed Securities. We classify our investment securities portfolio between securities we intend to hold to maturity and those securities available for sale.

Securities classified as held to maturity are securities we have the ability and positive intent to hold to maturity regardless of changes in market condition, liquidity needs or changes in general economic conditions. These securities are stated at cost, adjusted for amortization of premiums and accretion of discounts over the period to maturity using the interest method.

Securities classified as available for sale are securities we intend to hold for an indefinite period of time, but not necessarily to maturity. Any decision to sell a security classified as available for sale would be based on various factors, including movements in interest rates, changes in the maturity mix of our assets and liabilities, liquidity needs, regulatory capital considerations and other factors. These securities are carried at fair value with unrealized gains or losses reported as increases or decreases in cumulative other comprehensive income, net of the related deferred tax effect. Realized gains or losses, determined on the basis of the cost of specific securities sold, are included in our results of operations. Unrealized losses for securities classified as held to maturity and available for sale which are deemed to be other than temporary are charged to operations.

Accounting for Derivatives and Hedging Activities. We account for our derivatives and hedging activities in accordance with Statement of Financial Accounting Standard (SFAS) No. 133, *Accounting for Derivative Instruments and Hedging Activity*, as amended by SFAS No. 138, *Accounting for Certain Derivative Instruments and Certain Hedging Activities* and SFAS No. 149, *Amendment of Statement No. 133 on Derivative Instruments and Hedging Activities*. These statements establish accounting and reporting standards for derivative instruments and hedging activities, including certain derivative instruments embedded in other contracts, and requires that an entity recognize all derivatives as assets or liabilities in the statements of financial condition and measure them at fair value. If certain conditions are met, an entity may elect to designate a derivative as follows: (a) a hedge of the exposure to changes in the fair value of a recognized asset or liability or an unrecognized firm commitment; or (b) a hedge of the exposure to variable cash flows of a forecasted transaction. These statements generally provide for matching the timing of the recognition of the gain or loss on derivatives designated as hedging instruments with the recognition of the changes in the fair value of the item being hedged. Depending on the type of hedge, such recognition will be either net income or other comprehensive income. For a derivative not qualified for hedge accounting under SFAS No. 133, changes in fair value will be recognized in net income in the period of change.

**TierOne Corporation and Subsidiaries
Notes to Consolidated Financial Statements**

Loans Receivable. Net loans are stated at unpaid principal balances, plus/minus unamortized premiums, discounts and deferred loan origination fees and costs and loans in process. Interest on loans is credited to income as earned. Interest is not accrued on nonperforming loans (loans 90 or more days delinquent). Premiums or discounts on loans are amortized into income over the life of the loan using the interest method. Loan origination fees received in excess of certain direct origination costs are deferred and amortized into income over the contractual life of the loan using the interest method or recognized when the loan is sold or paid off. Additionally, accrual of interest and amortization of deferred loan fees on problem loans are excluded from income when, in the opinion of management, such suspension is warranted. Income is subsequently recognized only to the extent cash payments are received and, in management's judgment, the borrower's ability to make periodic interest and principal payments has returned to normal, in which case the loan is returned to accrual status.

Loans Held for Sale. Upon origination or purchase, we designate certain loans receivable as held for sale, as we do not intend to hold such loans through maturity. Loans held for sale generally consist of fixed-rate, one-to-four family residential loans and are carried at the lower of cost or market value, determined on an aggregate basis. Gains or losses on such loans are recognized utilizing the specific identification method.

Provision and Allowance for Loan Losses. A provision for loan losses is charged to income when it is determined to be required based on our analysis. The allowance is maintained at a level to cover all known and inherent losses in the loan portfolio that are both probable and reasonable to estimate at each reporting date. We review the loan portfolio no less frequently than quarterly in order to identify those inherent losses and to assess the overall collection probability of the portfolio. Our review includes a quantitative analysis by loan category, using historical loss experience, classifying loans pursuant to a grading system and consideration of a series of qualitative loss factors. The evaluation process includes, among other things, an analysis of delinquency trends, nonperforming loan trends, the level of charge-offs and recoveries, prior loss experience, total loans outstanding, the volume of loan originations, the type, size, terms and geographic concentration of loans held by us, the value of collateral securing loans, the number of loans requiring heightened oversight and general economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available or as future events change.

The allowance for loan losses consists of two elements. The first element is an allocated allowance established for loans identified by our credit review function that are evaluated individually for impairment and are considered to be impaired. A loan is considered impaired when, based on current information and events, it is probable that we will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. Impairment is measured by: (a) the fair value of the collateral if the loan is collateral dependent; (b) the present value of expected future cash flows; or (c) the loan's observable market price. The second element is an allowance established for losses which are probable and reasonable to estimate on each of our categories of outstanding loans. While we use available information to recognize probable losses on loans inherent in the portfolio, future additions to the allowance may be necessary based on changes in economic conditions and other factors. In addition, various regulatory agencies, as an integral part of their examination process, periodically review our allowance for loan losses. Such agencies may require us to recognize additions to the allowance for loan losses based on their judgment of information available to them at the time of their examination.

Goodwill and Intangible Assets. Goodwill represents the excess price paid over the fair value of the tangible and intangible assets and liabilities acquired in connection with the August 27, 2004 acquisition of United Nebraska Financial Co. (UNFC). There was no goodwill recorded in connection with our Marine Bank branch purchase on June 2, 2006. In accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*, goodwill and indefinite-lived intangibles balances are not being amortized, but are tested for impairment annually in accordance with the provisions of SFAS No. 142. SFAS No. 142 also requires intangible assets with estimated useful lives be amortized over their respective estimated useful lives to their residual values, and reviewed for impairment in accordance with SFAS No. 144, *Accounting for Impairment or Disposal of Long-Lived Assets*.

**TierOne Corporation and Subsidiaries
Notes to Consolidated Financial Statements**

We have identified a single reporting unit for purposes of goodwill impairment testing. The impairment test is therefore performed on a consolidated basis. We perform our goodwill impairment analysis on an annual basis during the third quarter. Additional impairment analysis may be performed if circumstances or events occur which may have an impact on the fair value of our goodwill. Potential impairment is indicated when the carrying value of the entity, including goodwill, exceeds its fair value. If potential for impairment exists, the fair value of the entity is subsequently measured against the fair value of its underlying assets and liabilities, excluding goodwill, to estimate an implied fair value of the entity's goodwill. Impairment loss is recognized for any excess of the carrying value of the entity's goodwill over the implied fair value. We performed our impairment analysis as of September 30, 2007 and concluded that no potential impairment of goodwill existed since the fair value of our goodwill exceeded its carrying value. Additionally, we performed our impairment analysis as of December 31, 2007 due to the decline in our stock price and prevailing economic conditions and concluded that no potential impairment existed.

Edgar Filing: TIERONE CORP - Form 10-K

The value of core deposit intangible assets acquired in connection with the UNFC and Marine Bank transactions, which is subject to amortization, is included in the Consolidated Statements of Financial Condition as other intangible assets. Determining the amount of identifiable intangible assets and their average lives involves multiple assumptions and estimates and is typically determined by performing a discounted cash flow analysis, which involves a combination of any or all of the following assumptions: customer attrition, account runoff, alternative funding costs, deposit servicing costs and discount rates. The core deposit intangible assets have been estimated to have nine- to ten-year lives. Core deposit intangible assets are amortized using an accelerated method of amortization which is recorded in the Consolidated Statements of Operations as other operating expense.

We review our core deposit intangible assets for impairment whenever events or changes in circumstances indicate that we may not recover our investment in the underlying assets or liabilities which gave rise to these intangible assets. For the years ended December 31, 2007 and 2006, no events or circumstances triggered an impairment charge against our core deposit intangible assets.

Mortgage Servicing Rights. On January 1, 2007 we adopted SFAS No. 156, *Accounting for Servicing of Financial Assets – an Amendment of FASB Statement No. 140* (SFAS No. 156). In accordance with SFAS No. 156, we have elected to continue to utilize the amortization method for all of our mortgage servicing right assets, thus, carrying our mortgage servicing rights at the lower of cost or market (fair value). Under the amortization method, we amortize mortgage servicing rights in proportion to and over the period of net servicing income. Income generated as a result of new servicing assets is reported as net gain on sale of loans held for sale in the Consolidated Statements of Operations. Loan servicing fees, net of amortization of mortgage servicing rights, is recorded in fees and service charges in the Consolidated Statements of Operations.

We capitalize the estimated fair value of mortgage servicing rights upon the sale of loans. The estimated value takes into consideration contractually known amounts, such as loan balance, term and interest rate. These estimates are impacted by loan prepayment speeds, servicing costs and discount rates used to compute a present value of the cash flow stream. We evaluate the fair value of mortgage servicing rights on a quarterly basis using current prepayment speed, cash flow and discount rate estimates. Changes in these estimates impact fair value and could require us to record a valuation allowance or recovery. The fair value of mortgage servicing rights is highly sensitive to changes in assumptions. Changes in prepayment speed assumptions have the most significant impact on the fair value of mortgage servicing rights. Generally, as interest rates decline, prepayments accelerate with increased refinance activity, which results in a decrease in the fair value of mortgage servicing rights. As interest rates rise, prepayments generally slow, which results in an increase in the fair value of mortgage servicing rights. All assumptions are reviewed for reasonableness on a quarterly basis and adjusted as necessary to reflect current and anticipated market conditions. Thus, any measurement of fair value is limited by the conditions existing and the assumptions utilized as of a particular point in time, and those assumptions may not be appropriate if applied at a different point in time. We currently do not utilize direct financial hedges to mitigate the effect of changes in the fair value of our mortgage servicing rights.

87

TierOne Corporation and Subsidiaries Notes to Consolidated Financial Statements

Transfers of Financial Assets. Transfers of financial assets are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when: (a) the assets have been isolated; (b) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets; and (c) we do not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity. We have not had any significant transactions, arrangements or other relationships with any special purpose entities.

Real Estate Owned. Real estate acquired through foreclosure is considered to be held for sale and is initially recorded at estimated fair value. Subsequent to foreclosure, these assets are carried at the lower of carrying value or fair value, less selling costs. Changes in the valuation allowances for unrealized gains and losses and income and operating expenses are included in other income of the current period.

Premises and Equipment. Premises and equipment are recorded at cost and include expenditures for new facilities and equipment and items that substantially increase the useful lives of existing buildings and equipment. Premises and equipment are depreciated over their estimated useful life using the straight-line method of depreciation. Expenditures for normal repairs and maintenance are charged to earnings as incurred. When facilities or equipment are retired or otherwise disposed of, the related cost and accumulated depreciation are removed from the respective accounts and the resulting gain or loss is recorded in income.

Income Taxes. We file a consolidated federal income tax return on a calendar-year basis. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Edgar Filing: TIERONE CORP - Form 10-K

In June 2006, the Financial Accounting Standards Board (FASB) issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109* (FIN 48). FIN 48 requires that we determine whether a tax position is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Once it is determined that a position meets the recognition threshold, the position is measured to determine the amount of benefit to be recognized in the financial statements. Any interest and penalties related to uncertain tax positions are recorded in income tax expense in the Consolidated Statements of Operations.

Earnings Per Share. Basic earnings per share (EPS) is computed by dividing net income by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised. It is computed after giving consideration to the weighted average dilutive effect of our Employee Stock Ownership Plan (ESOP) shares, 2003 Stock Option Plan (SOP) shares and 2003 Management Recognition and Retention Plan (MRRP) shares.

Stock-Based Compensation. SFAS No. 123(R), *Share-Based Payment* (SFAS No. 123(R)), requires that compensation expense related to stock-based payment transactions be recognized in the financial statements and that expense be measured based on the fair value of the equity or liability instrument issued. SFAS No. 123(R) also requires that forfeitures be estimated over the vesting period of the instrument. We adopted SFAS No. 123(R) using the modified-prospective method and have applied this method to the accounting for our stock options and restricted shares. Under the modified-prospective method, stock-based employee compensation expense recognized after adoption includes: (a) stock-based expense for all awards granted prior to, but not yet vested as of January 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of SFAS No. 123, *Accounting for Stock-Based Compensation* (SFAS No. 123), and (b) stock-based employee compensation expense for all awards granted subsequent to January 1, 2006, based on the grant date fair value estimated in accordance with the provisions of SFAS No. 123(R). Prior to January 1, 2006, as permitted by SFAS No. 123, we accounted for stock-based payments to employees using Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees*, and, therefore recorded no stock-based employee compensation expense for employee stock options. Results for periods prior to January 1, 2006 have not been restated.

88

TierOne Corporation and Subsidiaries Notes to Consolidated Financial Statements

Comprehensive Income. Comprehensive income (loss) consists of net income (loss) and net unrealized gains (losses) on securities and is reported, net of tax, in the Consolidated Statements of Changes in Stockholders' Equity. Increases (decreases) in other comprehensive income are net of related income taxes (benefit) of \$361,000, \$210,000 and (\$500,000) for the years ended December 31, 2007, 2006 and 2005, respectively. Reclassification adjustments for realized gross losses included in income, were approximately \$295,000, \$291,000 and \$57,000, net of tax benefit of approximately \$114,000, \$109,000 and \$20,000, respectively, for the years ended December 31, 2007, 2006 and 2005, respectively.

Cash and Cash Equivalents. For purposes of the Consolidated Statements of Cash Flows, cash and cash equivalents include cash on hand, cash due from banks and federal funds sold.

Reclassifications. Certain prior years amounts have been reclassified to conform to the 2007 presentation.

2. Industry Segment Information

Our activities are considered to be a single industry segment for financial reporting purposes. We are engaged in the business of commercial and retail banking, investment management, insurance and farm and ranch management and real estate brokerage services with operations conducted through 69 banking offices located in Nebraska, Iowa and Kansas and nine loan production offices located in Arizona, Colorado, Florida, Minnesota, Nevada and North Carolina. Substantially all income is derived from a diverse base of commercial, mortgage and retail lending activities and investments.

3. Earnings Per Share

Basic EPS is computed by dividing net income (loss) by the weighted average number of common shares outstanding for each reporting period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised. Diluted EPS is computed after giving consideration to the weighted average dilutive effect of our 2003 SOP shares and 2003 MRRP shares. All stock options are assumed to be 100% vested for purposes of the EPS computations. Due to the loss for the year ended December 31, 2007, no potentially dilutive shares were included in the loss per share calculation as including such shares would be anti-dilutive. The following table is a reconciliation of basic and diluted EPS:

Edgar Filing: TIERONE CORP - Form 10-K

Year Ended December 31,

	2007		2006		2005	
	Basic	Diluted	Basic	Diluted	Basic	Diluted
<i>(Dollars and shares in thousands, except per share data)</i>						
Net income (loss)	\$ (12,425)	\$ (12,425)	\$ 41,315	\$ 41,315	\$ 32,832	\$ 32,832
Total weighted average basic common shares outstanding	16,719	16,719	16,494	16,494	16,221	16,221
Effect of dilutive securities:						
2003 Stock Option Plan		--		576		422
2003 Management Recognition and Retention Plan		--		77		47
Total weighted average basic and diluted common shares outstanding	16,719	16,719	16,494	17,147	16,221	16,690
Net income (loss) per common share	\$ (0.74)	\$ (0.74)	\$ 2.50	\$ 2.41	\$ 2.02	\$ 1.97

89

**TierOne Corporation and Subsidiaries
Notes to Consolidated Financial Statements**

Had stock-based employee compensation expense for our SOP been determined based on a calculated fair value using the Black-Scholes model at the grant date for awards subsequent to the distribution, consistent with the recognition provisions of SFAS No. 123(R), our net income and earnings per share would have been impacted as follows for the year ended December 31, 2005:

<i>(Dollars in thousands, except per share data)</i>	Year Ended
	December 31, 2005
Net income (as reported)	\$ 32,832
Add: stock-based employee compensation expense included in reported net income, net of related tax effects	1,868
Deduct: total stock-based employee compensation expense determined under the fair value based method for all awards, net of related tax effects	(2,996)
Pro forma net income	\$ 31,704
Basic earnings per share (as reported)	\$ 2.02
Pro forma basic earnings per share	\$ 1.95
Diluted earnings per share (as reported)	\$ 1.97
Pro forma diluted earnings per share	\$ 1.90

90

2013 - 2017	--	--	6,585	6,589
After 2017	--	--	845	732
Total investment securities	\$ 70	\$ 70	\$ 130,642	\$ 130,481

There were no sales of investment securities held to maturity during the three years ended December 31, 2007. Proceeds from the sale of investment securities available for sale totaled \$10,000, \$2.3 million and \$3.2 million for the years ended December 31, 2007, 2006 and 2005, respectively. Gross realized gains on the sale of investment securities were \$21,000 and \$14,000 for the years ended December 31, 2006 and 2005, respectively. There were no gains or losses on the sale of investment securities during the year ended December 31, 2007. Losses due to other-than-temporary impairment were \$188,000 on investment securities for the year ended December 31, 2007. There were no sales of mortgage-backed securities during the three years ended December 31, 2007.

At December 31, 2007 and 2006, investment and mortgage-backed securities with fair values of approximately \$114.0 million and \$96.3 million, respectively, were pledged as collateral for certain deposits, primarily those of public institutions.

92

Investment and mortgage-backed securities with unrealized losses at December 31, 2007 and 2006 are summarized in the following table:

	Less Than 12 Months		12 Months or Longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
<i>(Dollars in thousands)</i>						
At December 31, 2007:						
Mortgage-backed securities	\$ 1,871	\$ 17	\$ 3,062	\$ 81	\$ 4,933	\$ 98
U.S. Government securities and agency obligations	19,994	3	11,999	30	31,993	33
Corporate securities	3,570	3	1,350	12	4,920	15
Municipal obligations	1,424	21	1,570	14	2,994	35
Agency equity securities	5	1	412	113	417	114
Total temporarily impaired securities	\$ 26,864	\$ 45	\$ 18,393	\$ 250	\$ 45,257	\$ 295
At December 31, 2006:						
Mortgage-backed securities	\$ 591	\$ 9	\$ 8,224	\$ 246	\$ 8,815	\$ 255
U.S. Government securities and agency obligations	3,602	73	39,063	563	42,665	636
Corporate securities	4,002	91	1,128	24	5,130	115
Municipal obligations	933	3	6,893	58	7,826	61
Agency equity securities	6	--	525	10	531	10
Asset Management Fund - ARM Fund	--	--	5,836	164	5,836	164
Total temporarily impaired securities	\$ 9,134	\$ 176	\$ 61,669	\$ 1,065	\$ 70,803	\$ 1,241

We believe all unrealized losses as of December 31, 2007 and 2006 to be market related, with no permanent sector or issuer credit concerns or impairments. We had 48 and 107 securities with unrealized losses for 12 consecutive months or longer as of December 31, 2007 and 2006,

respectively. The unrealized losses are believed to be temporarily impaired in value. Impairment is deemed temporary if the positive evidence indicating that an investment's carrying amount is recoverable within a reasonable time period outweighs negative evidence to the contrary. At December 31, 2007, we had the ability and intent to hold these securities until maturity.

Home improvement	46,045	1.38	55,513	1.51
Automobile	87,079	2.60	87,575	2.38
Other	71,141	2.13	68,365	1.86
Total consumer loans	397,247	11.88	413,000	11.22
Total loans	3,342,864	100.00%	3,682,235	100.00%
Unamortized premiums, discounts and deferred loan fees	9,451		5,602	
Loans in process (2)	(376,186)		(637,677)	
Net loans	2,976,129		3,050,160	
Allowance for loan losses	(66,540)		(33,129)	
Net loans after allowance for loan losses	\$ 2,909,589		\$ 3,017,031	
(1) Includes loans held for sale	\$ 9,348		\$ 19,285	

At December 31,

(2) Loans in process represents the undisbursed portion of construction and land development loans.

Concentration of Credit Risk. Our loans are exposed to credit risk from the possibility that customers may default on their financial obligations to us. Credit risk arises predominantly with respect to loans. Concentrations of credit risk exist if a number of customers are engaged in similar activities, are located in the same geographic region or have similar economic characteristics such that their ability to meet contractual obligations could be similarly affected by changes in economic, political or other conditions. Concentrations of credit risk indicate a related sensitivity of our performance to developments affecting a particular customer, industry or geographic location.

94

TierOne Corporation and Subsidiaries
Notes to Consolidated Financial Statements

At December 31, 2007 and 2006 our second mortgage residential, multi-family residential, commercial real estate, land and land development, construction, agricultural, business, warehouse mortgage lines of credit and consumer loans totaled \$3.0 billion and \$3.3 billion, respectively. These loan types are considered by management to be of greater risk of collectibility than one-to-four family residential loans. Additionally, at December 31, 2007 and 2006, we had \$64.7 million and \$62.4 million, respectively, of interest-only one-to-four family residential loans.

Primary Lending Market Area. Our primary lending market area consists of Nebraska, Iowa, Kansas, Arizona, Colorado, Florida, Minnesota, Nevada and North Carolina. Our Asset/Liability and Asset Classification Committees are responsible for setting guidelines related to loan concentrations and monitoring such concentrations to limit potential loss exposure. At December 31, 2007 and 2006, approximately 20.2% and 20.8%, respectively, of total loans were secured by properties or made to individuals located outside of our primary lending market area.

Allowance for Loan Losses. The activity in the allowance for loan losses is summarized in the following table:

<i>(Dollars in thousands)</i>	Year Ended December 31,		
	2007	2006	2005
Balance at beginning of year	\$ 33,129	\$ 30,870	\$ 26,831
Provision for loan losses	65,382	6,053	6,436
Charge-offs	(33,037)	(4,107)	(3,063)
Recoveries on loans previously charged-off	1,066	313	666
Balance at end of year	\$ 66,540	\$ 33,129	\$ 30,870
Allowance for loan losses as a percentage of net loans	2.24%	1.09%	1.09%

We generally discontinue funding of loans which become nonperforming or are deemed impaired unless additional funding is required to protect the asset. In addition, due to certain laws and regulations in selected states, some additional funding may be required. Our reserve for unfunded loan commitments at December 31, 2007 totaled \$2.7 million which represents potential future losses associated with these unfunded commitments.

95

TierOne Corporation and Subsidiaries
Notes to Consolidated Financial Statements

Nonperforming Assets and Troubled Debt Restructurings. Nonperforming assets consist of nonperforming loans, troubled debt restructurings and real estate owned. Nonperforming loans are loans that are 90 or more days delinquent on which interest recognition has been suspended until realized because of doubts as to the borrower's ability to repay principal and interest. Troubled debt restructurings are loans where the terms have been modified to provide a reduction or deferral of interest or principal because of deterioration in the borrower's financial position.

<i>(Dollars in thousands)</i>	At December 31,	
	2007	2006
Nonperforming loans (1)	\$ 128,490	\$ 30,050
Real estate owned, net (2)	6,405	5,264
Total nonperforming assets	134,895	35,314
Troubled debt restructurings	19,569	8,904
Total nonperforming assets and troubled debt restructurings	\$ 154,464	\$ 44,218

(1) Includes all loans 90 or more days delinquent and all uncollected accrued interest is fully reserved.

(2) Real estate owned balances are shown net of related loss allowances.

Impaired Loans. A loan is considered impaired when, based on current information and events, it is probable that we will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. Included in the preceding table, within nonperforming loans and troubled debt restructurings, are impaired loans of \$125.9 million and \$3.8 million at December 31, 2007 and 2006, respectively. At December 31, 2007, impaired loans consisted primarily of \$51.9 million of residential construction loans, \$51.1 million of land and land development loans and \$19.2 million of commercial construction loans. At December 31, 2007 we had \$24.8 million of loans which were not classified as nonperforming but were classified as impaired due to decline in the fair market value of the underlying collateral securing such loans.

The average balance of impaired and restructured loans for the years ended December 31, 2007, 2006 and 2005 totaled \$58.4 million, \$11.4 million and \$7.1 million, respectively. Interest recognized on such loans for the years ended December 31, 2007, 2006 and 2005 approximated \$675,000, \$725,000 and \$603,000, respectively. Additionally, interest income that would have been recorded for the years ended December 31, 2007, 2006 and 2005 if nonperforming loans and troubled debt restructurings had been current or in accordance with their original terms approximates \$10.8 million, \$1.8 million and \$802,000, respectively.

Loans serviced for others are not included in the accompanying Consolidated Statements of Financial Condition. Servicing loans for others consists of collecting mortgage payments, maintaining escrow accounts, disbursing payments to investors and conducting foreclosure processing. In connection with these loans serviced for others, we held borrowers' escrow balances of approximately \$19.7 million and \$17.1 million at December 31, 2007 and 2006, respectively.

Loans serviced for others include approximately \$601.1 million and \$605.8 million of unpaid principal balances of residential real estate loans at December 31, 2007 and 2006, respectively, for which we have retained a limited amount of recourse obligation. We have certain risks due to limited recourse arrangements on loans serviced for others and recourse obligations related to loan sales. The maximum total dollar amount of such recourse was approximately \$19.0 million and \$17.4 million at December 31, 2007 and 2006, respectively. We have established a liability for this recourse obligation, which is based on our historical loss experience, in the amount of approximately \$733,000 and \$742,000 at December 31, 2007 and 2006, respectively. This liability is included in accrued expenses and other liabilities.

TierOne Corporation and Subsidiaries
Notes to Consolidated Financial Statements

6. Mortgage Servicing Rights

The balance of capitalized mortgage servicing rights, net of valuation allowances, at December 31, 2007 and 2006, was \$14.5 million and \$12.5 million, respectively. The following are the key assumptions used in measuring the fair values of capitalized mortgage servicing rights and the sensitivity of the fair values to changes in those assumptions:

<i>(Dollars in thousands)</i>	At December 31,	
	2007	2006

	At December 31,	
Serviced loan portfolio balance	\$ 1,459,498	\$ 1,295,418
Fair value	18,310	15,276
Prepayment speed	6.62% - 26.07%	8.64% - 46.44%
Weighted average prepayment speed	10.37%	14.40%
Fair value with 10% adverse change	\$ 17,860	\$ 14,654
Fair value with 20% adverse change	17,166	14,034
Discount rate	9.50% - 13.00%	10.00% - 14.00%
Weighted average discount rate	10.63%	11.34%
Fair value with 10% adverse change	\$ 17,866	\$ 14,806
Fair value with 20% adverse change	17,178	14,325

The sensitivity of the fair values is hypothetical and should be used with caution. As the figures indicate, changes in fair value based on a variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in the table, the effect of a variation in a particular assumption on the fair value of the capitalized mortgage servicing rights is calculated without changing any other assumption. In reality, changes in one assumption may result in changes in another which might magnify or counteract the sensitivities.

Mortgage Servicing Right Activity. The following table summarizes activity in capitalized mortgage servicing rights, including amortization expense:

	Year Ended December 31,		
<i>(Dollars in thousands)</i>	2007	2006	2005
Balance at beginning of year	\$ 12,467	\$ 11,713	\$ 10,505
Mortgage servicing rights capitalized	5,141	3,492	3,186
Amortization expense	(3,078)	(2,738)	(2,778)
Valuation adjustment	--	--	800
Balance at end of year	\$ 14,530	\$ 12,467	\$ 11,713

The estimated future amortization expense of capitalized mortgage servicing rights for each of the years ending December 31, 2008 through 2012 is approximately \$3.3 million, \$2.6 million, \$2.0 million, \$1.5 million and \$1.2 million, respectively. These projections are based on existing asset balances and the existing interest rate environment at December 31, 2007. The amount of amortization expense in any given period may be significantly different depending upon changes in mortgage interest rates and market conditions.

We evaluate the fair value of mortgage servicing rights on a quarterly basis using current prepayment speeds, cash flow and discount rate estimates. Changes in these estimates impact fair value and could require us to record a valuation allowance or recovery. During the year ended December 31, 2005, the balance of our mortgage servicing rights valuation allowance was recaptured into earnings. Our evaluation of mortgage servicing rights at December 31, 2007 and 2006 indicated that no valuation allowance was necessary. The amortization expense and valuation adjustment is recorded as a reduction of fees and service charges in the accompanying Consolidated Statements of Operations.

TierOne Corporation and Subsidiaries
Notes to Consolidated Financial Statements

7. Accrued Interest Receivable

Accrued interest receivable at December 31, 2007 and 2006 is summarized in the following table:

	At December 31,	
<i>(Dollars in thousands)</i>	2007	2006
Loans receivable	\$ 20,813	\$ 22,024

	<u>At December 31,</u>	
Investment and mortgage-backed securities	369	983
Other	66	16
<hr/>		
Total accrued interest receivable	\$ 21,248	\$ 23,023

8. FHLBank Topeka Stock

We are a member of the FHLBank Topeka (FHLBank) and are required to purchase and hold stock to collateralize our borrowings. Our investment in FHLBank stock is carried at cost, which represents redemption value. We were required to hold approximately \$43.8 million and \$57.5 million of FHLBank stock at December 31, 2007 and 2006, respectively.

9. Real Estate Owned and Repossessed Assets

Real estate owned and repossessed assets, included in other assets in the Consolidated Statements of Financial Condition, at December 31, 2007 and 2006 aggregating \$6.4 million and \$5.3 million, respectively, is recorded net of a valuation allowance of \$540,000 and \$100,000, respectively. At December 31, 2007, real estate owned consisted primarily of 36 residential properties totaling \$3.6 million and three commercial properties totaling \$2.8 million.

10. Premises and Equipment

Premises and equipment at December 31, 2007 and 2006 is summarized in the following table:

<i>(Dollars in thousands)</i>	<u>At December 31,</u>		Useful Lives
	2007	2006	
Land	\$ 6,282	\$ 6,282	--
Buildings and improvements	46,044	45,930	1-50 years
Leasehold improvements	2,234	2,191	4-15years
Furniture, fixtures, and equipment	9,715	9,146	5-12 years
Computer equipment	6,689	5,472	3-7 years
Vehicles	998	979	2-7 years
<hr/>			
Total cost basis of premises and equipment	71,962	70,000	
Accumulated depreciation and amortization	(33,934)	(30,179)	
<hr/>			
Total premises and equipment, net	\$ 38,028	\$ 39,821	

Premises and equipment depreciation and amortization expense for the years ended December 31, 2007, 2006 and 2005 was \$4.0 million, \$3.8 million and \$3.6 million, respectively.

TierOne Corporation and Subsidiaries Notes to Consolidated Financial Statements

11. Goodwill and Acquired Intangible Assets

Goodwill. Goodwill represents the excess price paid over the fair value of the tangible and intangible assets and liabilities acquired in connection with the August 27, 2004 acquisition of UNFC. There was no goodwill recorded in connection with our Marine Bank branch purchase in June 2006. The changes in the carrying amount of goodwill for the years ended December 31, 2007 and 2006 are as follows:

Year Ended December 31,

Edgar Filing: TIERONE CORP - Form 10-K

<i>(Dollars in thousands)</i>	Year Ended December 31,	
	2007	2006
Balance at beginning of year	\$ 42,228	\$ 42,283
Realized tax benefit associated with United Nebraska Financial Co. acquisition	(61)	(55)
Adjustment due to adoption of FASB Interpretation No. 48	(66)	--
Balance at end of year	\$ 42,101	\$ 42,228

Other Intangible Assets. Our only identifiable intangible asset is the value of the core deposits acquired as part of the UNFC and Marine Bank transactions. The core deposit intangible assets have been estimated to have nine- to ten-year lives. Core deposit intangible assets are amortized using an accelerated method of amortization which is recorded in other operating expense.

Other Intangible Asset Activity. The changes in the carrying amount of acquired intangible assets for the years ended December 31, 2007 and 2006 are as follows:

<i>(Dollars in thousands)</i>	Year Ended December 31,	
	2007	2006
Balance at beginning of year	\$ 8,391	\$ 10,041
Additions during year	--	102
Amortization expense	(1,647)	(1,752)
Balance at end of year	\$ 6,744	\$ 8,391

Other Intangible Asset Estimated Amortization. Estimated amortization expense related to our core deposit intangible assets for the year ended December 31, 2008 and five years thereafter are as follows:

<i>(Dollars in thousands)</i>	Core Deposit Intangible Asset
Estimated amortization expense:	
For the year ended December 31, 2008	\$ 1,513
For the year ended December 31, 2009	1,373
For the year ended December 31, 2010	1,222
For the year ended December 31, 2011	1,052
For the year ended December 31, 2012	850
For the year ended December 31, 2013	553

13. FHLBank Topeka Advances and Other Borrowings

Borrowings Composition. At December 31, 2007 and 2006, we were indebted on notes as shown in the following table:

<i>(Dollars in thousands)</i>	Original Maturity	Interest Rate Range	At December 31,	
			2007	2006
Permanent fixed-rate notes payable to the FHLBank Topeka:	2007	2.79	\$ --	\$ 10,000
	2009	5.41	5,425	5,679
	2013	6.24	336	396
	2015	3.97	1,149	1,263
	2030	5.46	2,285	2,326
Convertible fixed-rate notes payable to the FHLBank Topeka:	2009	5.41 - 5.55	75,000	75,000
	2010	5.06 - 5.36	40,000	40,000
	2012	3.01 - 3.30	25,000	75,000
	2013	2.99	25,000	25,000
	2015	3.39 - 4.00	85,000	160,000
	2016	3.83 - 4.66	325,000	440,000
	2017	3.94	50,000	--
Line of credit with the FHLBank Topeka	2007	5.47	--	72,500
Retail repurchase agreements	2007/2006	1.29 - 4.96	24,165	24,284
Junior subordinated debentures	2031/2034	7.79 - 8.49	30,928	30,928
Total FHLBank Topeka advances and other borrowings			\$ 689,288	\$ 962,376
Weighted average interest rate			4.50 %	4.40 %

The convertible fixed-rate notes are convertible to adjustable-rate notes at the option of the FHLBank, with call dates ranging from January 2008 to September 2008. The line of credit with the FHLBank expires in November 2008. We expect the line of credit agreement with the FHLBank to be renewed in the ordinary course of business.

Pursuant to blanket collateral agreements with the FHLBank, such advances are secured by our qualifying residential, multi-family residential and commercial real estate mortgages, residential construction, commercial construction and agricultural real estate loans with carrying values totaling approximately \$1.3 billion and \$1.6 billion at December 31, 2007 and 2006, respectively. Under our blanket collateral agreement with the FHLBank, our borrowing capacity at December 31, 2007 and 2006 was \$863.0 million and \$984.4 million, respectively.

Other qualifying collateral can be pledged in the event additional borrowing capacity is required.

TierOne Corporation and Subsidiaries
Notes to Consolidated Financial Statements

Our retail repurchase agreements are primarily collateralized by U.S. Government and agency and municipal obligations (investment securities).

On April 26, 2004, we formed TierOne Capital Trust I (TierOne Capital Trust) which issued capital securities (Trust Preferred Securities) to investors. The proceeds from the sale of the Trust Preferred Securities were used to purchase \$30.9 million of junior subordinated debentures (debentures). The debentures are callable at par in June 2009 and mature in June 2034. Our obligation under the debentures constitutes a full and unconditional guarantee of TierOne Capital Trust's obligations under the Trust Preferred Securities. In accordance with Interpretation No. 46 (Revised), *Consolidation of Variable Interest Entities* (FIN 46R), the trust is not consolidated and related amounts are treated as debt of the Company.

In connection with our acquisition of UNFC on August 27, 2004, we assumed \$7.0 million of variable rate debentures that had been issued on November 28, 2001 by United Nebraska Capital Trust, a trust formed by UNFC. We exercised our right to call and retire these debentures in December 2006.

14. Income Taxes

Income Tax. Income tax expense (benefit) for the years ended December 31, 2007, 2006 and 2005 consisted of the following components:
