1. ACCOUNTING POLICIES

In the opinion of Titan International, Inc. (“Titan” or the “Company”), the accompanying unaudited consolidated condensed financial statements contain all adjustments, which are normal and recurring in nature and necessary to present fairly the Company’s financial position as of September 30, 2009, the results of operations for the three and nine months ended September 30, 2009 and 2008, and cash flows for the nine months ended September 30, 2009 and 2008.

Accounting policies have continued without significant change and are described in the Description of Business and Significant Accounting Policies contained in the Company’s 2008 Annual Report on Form 10-K. These interim financial statements have been prepared pursuant to the Securities and Exchange Commission’s rules for Form 10-Q’s and, therefore, certain information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company’s 2008 Annual Report on Form 10-K. Certain amounts from prior periods have been reclassified to conform to the current period financial presentation.

Fair value of financial instruments

The Company records all financial instruments, including cash and cash equivalents, accounts receivable, notes receivable, accounts payable, other accruals and notes payable at cost, which approximates fair value. The Company has considered the applicable guidance in Accounting Standards Codification (ASC) 323 Investments – Equity Method and Joint Ventures and has concluded that the Company’s investment in Titan Europe Plc should continue to be accounted for as an available-for-sale security and recorded at fair value in accordance with ASC 320 Investments – Debt and Equity Securities. The Company has determined that the equity method of accounting for this investment is not appropriate after considering all of the facts and circumstances relating to the investment. In particular, the Company has concluded that its inability to obtain the needed quarterly financial information from Titan Europe Plc is an indication that the Company does not have the ability to exercise significant influence over the financial and operating policies of this investee. The investment in Titan Europe Plc is included as a component of other assets on the Consolidated Condensed Balance Sheets. The increased value in the Titan Europe Plc investment at September 30, 2009, was due to a higher publicly quoted Titan Europe Plc market price and additional purchased shares.

16. EARNINGS PER SHARE

Earnings per share (EPS) are as follows (amounts in thousands, except per share data):

	Three months ended,					
	September 30, 2009			September 30, 2008		
	Net Loss	Weighted average shares	Per share amount	Net Income	Weighted average shares	Per share amount
Basic EPS	\$(11,113)	34,746	\$ (.32)	\$ 10,303	34,499	\$.30

	September 30, 2009			September 30, 2008		
	Net Income	Weighted average shares	Per share amount	Net Income	Weighted average shares	Per share amount
Basic EPS	\$ 1,838	34,692	\$.05	\$ 31,743	34,373	\$.92

Diluted EPS	\$ 1,838	35,251	\$.05	\$ 31,743	34,798	\$.91

The effect of stock options/trusts has been excluded for the three months ended September 30, 2009, as the effect would have been antidilutive. The weighted average share amount excluded was 0.6 million shares. The weighted-average diluted shares outstanding for the three and nine months ended September 30, 2009, exclude stock options to purchase approximately 0.3 million shares for both periods, because such options have an exercise price in excess of the average market price of the Company's common stock during the period.

17. FAIR VALUE MEASUREMENTS

The adoption of guidance in ASC 820 Fair Value Measurements for nonfinancial assets and nonfinancial liabilities, effective January 1, 2009, did not have a material impact on Titan's consolidated financial position, results of operations or cash flows.

ASC 820 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers are defined as:

Level 1 – Quoted prices in active markets for identical instruments;

Level 2 – Inputs other than quoted prices in active markets that are either directly or indirectly observable.

Level 3 – Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Assets and liabilities measured at fair value on a recurring basis consisted of the following (in thousands):

18. LITIGATION

The Company is a party to routine legal proceedings arising out of the normal course of business. Although it is not possible to predict with certainty the outcome of these unresolved legal actions or the range of possible loss, the Company believes at this time that none of these actions, individually or in the aggregate, will have a material adverse effect on the consolidated financial condition, results of operations or cash flows of the Company. However, due to the difficult nature of predicting unresolved and future legal claims, the Company cannot anticipate or predict the material adverse effect on its consolidated financial condition, results of operations or cash flows as a result of efforts to comply with or its liabilities pertaining to legal judgments.

19. RECENTLY ISSUED ACCOUNTING STANDARDS

Accounting Guidance on Business Combinations

In January 2009, the Company adopted revised accounting guidance on business combinations. This guidance requires an acquirer to recognize assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at their fair values on the acquisition date, with goodwill being the excess value over the net identifiable assets acquired. The adoption of this guidance had no material effect on the Company's financial position, results of operations or cash flows.

Accounting Guidance on Interim Disclosures about Fair Value of Financial Instruments

In April 2009, the Financial Accounting Standards Board (FASB) issued accounting guidance on interim disclosures about fair value of financial instruments. This guidance amends previous guidance to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This guidance also amends previous guidance to require disclosures in summarized financial information at interim reporting periods. This guidance was effective for interim reporting periods ending after June 15, 2009. The adoption of this guidance had no material effect on the Company's financial position, results of operations or cash flows.

Accounting Guidance on Other-Than-Temporary-Impairments

In April 2009, accounting guidance on recognition and presentation of other-than-temporary impairments was issued. This guidance amends the other-than-temporary impairment guidance in U.S. Generally Accepted Accounting Principles (GAAP) for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. This guidance does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. This guidance was effective for interim reporting periods ending after June 15, 2009. The adoption of this guidance had no material effect on the Company's financial position, results of operations or cash flows.

Accounting Guidance on Subsequent Events

In June 2009, the Company adopted accounting guidance on subsequent events. The objective of this guidance was to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued. This guidance was effective for interim periods ending after June 15, 2009. The adoption of this guidance had no material effect on the Company's financial position, results of operations or cash flows.

Accounting Guidance on Accounting Standards Codification and Generally Accepted Accounting Principles

In June 2009, FASB issued accounting guidance on the FASB Accounting Standards Codification (Codification) and the hierarchy of GAAP. This guidance establishes the Codification as the single source of authoritative GAAP to be applied by nongovernmental entities, except for the rules and interpretive releases of the SEC under authority of federal securities laws, which are sources of authoritative GAAP for SEC registrants. This guidance was effective for financial statements issued for interim and annual periods ending after September 15, 2009. The adoption of this guidance had no material effect on the Company's financial position, results of operations or cash flows.

Titan manufactures both wheels and tires for the majority of these market applications, allowing the Company to provide the value-added service of delivering complete wheel and tire assemblies. The Company offers a broad range of products that are manufactured in relatively short production runs to meet the specifications of original equipment manufacturers (OEMs) and/or the requirements of aftermarket customers.

Agricultural Market: Titan's agricultural rims, wheels and tires are manufactured for use on various agricultural and forestry equipment, including tractors, combines, skidders, plows, planters and irrigation equipment, and are sold directly to OEMs and to the aftermarket through independent distributors, equipment dealers and Titan's own distribution centers.

Earthmoving/Construction Market: The Company manufactures rims, wheels and tires for various types of off-the-road (OTR) earthmoving, mining, military and construction equipment, including skid steers, aerial lifts, cranes, graders and levelers, scrapers, self-propelled shovel loaders, articulated dump trucks, load transporters, haul trucks and backhoe loaders. The earthmoving/construction market is often referred to as OTR, an acronym for off-the-road.

Consumer Market: Titan builds select products for all-terrain vehicles (ATV), turf, golf and trailer applications. Titan's sales in the consumer market include sales to Goodyear, which are under an off-take/mixing agreement. This agreement includes mixed stock, which is a prepared rubber compound used in tire production. The Company provides wheels/tires and assembles brakes, actuators and components for the domestic boat, recreational and utility trailer markets.

The Company's major OEM customers include large manufacturers of off-highway equipment such as AGCO Corporation, Caterpillar Inc., CNH Global N.V., Deere & Company and Kubota Corporation, in addition to many other off-highway equipment manufacturers. The Company distributes products to OEMs, independent and OEM-affiliated dealers, and through a network of distribution facilities.

The following table provides highlights for the quarter ended September 30, 2009, compared to 2008 (amounts in thousands):

	Three months ended September 30,	
	2009	2008
Net sales	\$ 141,496	\$ 255,463
Gross profit (loss)	(3,030)	37,423
Income (loss) from operations	(15,766)	21,263
Net income (loss)	(11,113)	10,303

Quarter: The Company recorded sales of \$141.5 million for the third quarter of 2009, which were 45% lower than the third quarter 2008 sales of \$255.5 million. The lower sales levels resulted from reduced demand for the Company's products, as many of the Company's major customers implemented extended shutdowns during the period as a consequence of the worldwide recession and economic crisis. Titan in turn scheduled extended shutdowns at its production facilities to manage lower demand during the quarter. These events had a significant impact on Titan's

agricultural sales, which were down approximately 41%, and earthmoving/construction sales, which were down approximately 57%, when comparing quarter over quarter.

The following operating results were primarily related to the significantly lower sales levels. The Company's loss from operations was \$(15.8) million for the third quarter of 2009, compared to income from operations of \$21.3 million in 2008. Net loss was \$(11.1) million for the quarter, compared to net income of \$10.3 million in 2008. Basic loss per share was \$(.32) in for the three months ended September 30, 2009, compared to earnings per share of \$.30 in 2008.

The following table provides highlights for the nine months ended September 30, 2009, compared to 2008 (amounts in thousands):

	Nine months ended September 30,	
	2009	2008
Net sales	\$581,083	\$778,102
Gross profit	56,779	111,713
Income from operations	11,231	61,772
Net income	1,838	31,743

Year-to-date: The Company recorded sales of \$581.1 million for the nine months ended September 30, 2009, as compared to \$778.1 million in 2008. The lower sales levels resulted from reduced demand for the Company's products, as many of the Company's major customers implemented extended shutdowns during the third quarter of 2009 as a consequence of the worldwide recession and economic crisis. Titan in turn scheduled extended shutdowns at its production facilities to manage lower demand during the third quarter. These events had a significant impact on Titan's agricultural year-to-date sales, which were down approximately 16%, and earthmoving/construction year-to-date sales, which were down approximately 49%, when comparing to the first nine months of 2008.

The following operating results were primarily related to the lower sales levels. Titan's income from operations was \$11.2 million for the nine months ended September 30, 2009, as compared to \$61.8 million in 2008. Net income was \$1.8 million for the nine months ended September 30, 2009, as compared to \$31.7 million in 2008. Basic earnings per share were \$.05 for the nine months ended September 30, 2009, compared to \$.92 in 2008.

CRITICAL ACCOUNTING ESTIMATES

Preparation of the financial statements and related disclosures in compliance with accounting principles generally accepted in the United States of America requires the application of appropriate technical accounting rules and guidance, as well as the use of estimates. The Company's application of these policies involves assumptions that require difficult subjective judgments regarding many factors, which, in and of themselves, could materially impact the financial statements and disclosures. A future change in the estimates, assumptions or judgments applied in determining the following matters, among others, could have a material impact on future financial statements and disclosures.

Inventories

Inventories are valued at lower of cost or market. Cost is determined using the first-in, first-out (FIFO) method for approximately 77% of inventories and the last-in, first-out (LIFO) method for approximately 23% of inventories. The major rubber material inventory and related work-in-process and their finished goods are accounted for under the FIFO method. The major steel material inventory and related work-in-process and their finished goods are accounted for under the LIFO method. Market value is estimated based on current selling prices. Estimated provisions are established for slow-moving and obsolete inventory, as well as inventory carried above market price based on historical experience. Should experience change, adjustments to estimated provisions would be necessary.

Impairment of Goodwill

The Company reviews goodwill to assess recoverability from future operations during the fourth quarter of each annual reporting period, and whenever events and circumstances indicate that the carrying values may not be recoverable. The Company had goodwill of \$11.7 million at September 30, 2009. Significant assumptions relating to

future operations must be made when estimating future cash flows in analyzing goodwill for impairment. Should unforeseen events occur or operating trends continue, impairment losses could occur. Due to the difficult nature of predicting future markets and business outcomes, the Company cannot always anticipate or predict when a goodwill impairment loss may be required by the Company in the future.

Income taxes

Deferred income tax provisions are determined using the liability method whereby deferred tax assets and liabilities are recognized based upon temporary differences between the financial statement and income tax basis of assets and liabilities. The Company assesses the realizability of its deferred tax asset positions and recognizes and measures uncertain tax positions in accordance with ASC 740 Income Taxes.

Retirement Benefit Obligations

Pension benefit obligations are based on various assumptions used by third-party actuaries in calculating these amounts. These assumptions include discount rates, expected return on plan assets, mortality rates and other factors. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and obligations. The Company has three frozen defined benefit pension plans and one defined benefit plan that previously purchased a final annuity settlement. During the first nine months of 2009, the Company contributed cash funds of \$0.1 million to its frozen pension plans. Titan expects to contribute approximately \$0.1 million to these frozen defined pension plans during the remainder of 2009. For more information concerning these costs and obligations, see the discussion of the "Pensions" and Note 21 to the Company's financial statements on Form 10-K for the fiscal year ended December 31, 2008.

RESULTS OF OPERATIONS

Highlights for the three and nine months ended September 30, 2009, compared to 2008 (amounts in thousands):

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2009	2008	2008	2008
Net sales	\$ 141,496	\$ 255,463	\$ 581,083	\$ 778,102
Cost of sales	144,526	218,040	524,304	666,389
Gross profit (loss)	(3,030)	37,423	56,779	111,713
Gross profit margin	(2.1)%	14.6 %	9.8 %	14.4 %

Net Sales

Quarter: Net sales for the quarter ended September 30, 2009, were \$141.5 million, compared to \$255.5 million in 2008. The lower sales levels resulted from reduced demand for the Company's products, as many of the Company's major customers implemented extended shutdowns during the period as a consequence of the worldwide recession and economic crisis. Titan in turn scheduled extended shutdowns at its production facilities to manage lower demand during the quarter. These events had a significant impact on Titan's agricultural sales, which were down approximately 41%, and earthmoving/construction sales, which were down approximately 57%, when comparing quarter over quarter.

Year-to-date: Net sales for the nine months ended September 30, 2009, were \$581.1 million, compared to 2008 net sales of \$778.1 million. The lower sales levels resulted from reduced demand for the Company's products, as many of the Company's major customers implemented extended shutdowns during the third quarter of 2009 as a consequence of the worldwide recession and economic crisis. Titan in turn scheduled extended shutdowns at its production facilities to manage lower demand during the third quarter. These events had a significant impact on Titan's agricultural year-to-date sales, which were down approximately 16%, and earthmoving/construction year-to-date sales, which were down approximately 49%, when comparing to the first nine months of 2008.

Cost of Sales and Gross Profit (Loss)

Quarter: Cost of sales was \$144.5 million and \$218.0 million for the quarters ended September 30, 2009 and 2008, respectively. The cost of sales decreased as a result of the significantly lower sales levels.

Gross loss for the third quarter of 2009 was \$(3.0) million or (2.1)% of net sales, compared to gross profit of \$37.4 million or 14.6% of net sales for the third quarter of 2008. In response to significantly lower demand from customers, Titan scheduled extended shutdowns at all Company production facilities during the third quarter of 2009. These extended shutdowns, in conjunction with lower production levels when operating, drastically reduced the Company's

manufacturing efficiencies. These lower efficiencies resulted in the gross profit reduction.

Year-to-date: Cost of sales was \$524.3 million for the nine months ended September 30, 2009, compared to \$666.4 million in 2008. The cost of sales decreased as a result of the significantly lower sales levels.

Gross profit for the nine months ended September 30, 2009, was \$56.8 million or 9.8% of net sales, compared to \$111.7 million or 14.4% of net sales in 2008. The gross profit margin decreased primarily as the result of extended production facility shutdowns and the resulting reduction in manufacturing efficiencies in the third quarter.

Selling, general and administrative	\$ 11,272	\$ 13,789	\$ 39,425	\$ 43,155
Percentage of net sales	8.0	% 5.4	% 6.8	% 5.5

Quarter: Selling, general and administrative (SG&A) expenses for the third quarter of 2009 were \$11.3 million or 8.0% of net sales, compared to \$13.8 million or 5.4% of net sales for 2008. SG&A expenses were down primarily as the result of lower professional fees. The Company's third quarter 2009 SG&A expense was lower than that of the previous year's quarter. However, when the SG&A expenses are expressed as a percentage of net sales, the percentage is higher due to the significantly lower sales levels.

Year-to-date: Expenses for SG&A for the nine months ended September 30, 2009, were \$39.4 million or 6.8% of net sales, compared to \$43.2 million or 5.5% of net sales in 2008. SG&A expenses were down primarily as the result of lower professional fees. The Company's SG&A expense for the first nine months of 2009 was lower than that of the previous year's first nine months. However, when the SG&A expenses are expressed as a percentage of net sales, the percentage is higher due to the lower sales levels.

Quarter: Royalty expenses recorded were \$1.5 million and \$2.4 million for the quarters ended September 30, 2009 and 2008, respectively. As sales subject to the license agreement have decreased, the Company's third quarter 2009 royalty expense has decreased when compared to the previous year's quarter.

Year-to-date: Year-to-date royalty expenses recorded were \$6.1 million and \$6.8 million for the nine months ended September 30, 2009 and 2008, respectively. As sales subject to the license agreement have decreased, the Company's royalty expense for the first nine months of 2009 has decreased when compared to the previous year's first nine months.

Quarter: Net sales in the agricultural market were \$105.4 million for the quarter ended September 30, 2009, down approximately 41%, as compared to \$179.2 million in 2008. The lower sales levels resulted from reduced demand for the Company's products, as many of the Company's major customers implemented extended shutdowns during the period as a consequence of the worldwide recession and economic crisis. Titan in turn scheduled extended shutdowns at its production facilities to manage lower demand during the quarter.

Gross loss in the agricultural market was \$(0.5) million for the quarter ended September 30, 2009, as compared to gross profit of \$23.6 million in 2008. Loss from operations in the agricultural market was \$(3.8) million for the quarter ended September 30, 2009, as compared to income from operations of \$19.5 million in 2008. The reduction in gross profit and income from operations in the agricultural market was primarily attributed to lower farm equipment sales and the corresponding reduction in manufacturing efficiencies.

Quarter: The Company's earthmoving/construction market net sales were \$30.7 million for the quarter ended September 30, 2009, down approximately 57%, as compared to \$71.3 million in 2008. The lower sales levels resulted from reduced demand for the Company's products, as many of the Company's major customers implemented extended shutdowns during the period as a consequence of the worldwide recession and economic crisis. Titan in turn scheduled extended shutdowns at its production facilities to manage lower demand during the quarter. Also negatively impacting this segment was the large reduction in the construction market related to commercial, residential and infrastructure.

Gross loss in the earthmoving/construction market was \$(1.8) million for the quarter ended September 30, 2009, as compared to gross profit of \$11.1 million in 2008. Loss from operations in the earthmoving/construction market was \$(3.0) million for the quarter ended September 30, 2009, as compared to income from operations of \$9.5 million in 2008. Gross profit and income from operations declined as a result of the major sales contraction and the corresponding reduction in manufacturing efficiencies.

Year-to-date: The Company's earthmoving/construction market net sales were \$113.1 million for the nine months ended September 30, 2009, down approximately 49%, as compared to \$221.6 million in 2008. The lower sales levels resulted from reduced demand for the Company's products, as many of the Company's major customers implemented extended shutdowns during the third quarter of 2009 as a consequence of the worldwide recession and economic crisis. Titan in turn scheduled extended shutdowns at its production facilities to manage lower demand during the third quarter. Also negatively impacting this segment was the large reduction in the construction market related to commercial, residential and infrastructure.

Gross profit in the earthmoving/construction market was \$8.7 million for the nine months ended September 30, 2009, as compared to \$38.7 million in 2008. Income from operations in the earthmoving/construction market was \$3.7 million for the nine months ended September 30, 2009, as compared to \$32.6 million in 2008. Gross profit and income from operations declined as a result of the major sales contraction and the corresponding reduction in manufacturing efficiencies.

Consumer Segment Results

Consumer segment results were as follows (amounts in thousands):

Gross profit (loss)	(142)	1,008	1,254	3,438
Income (loss) from operations	(282)	854	842	2,913

Quarter: Consumer market net sales were \$5.3 million for the quarter ended September 30, 2009, as compared to \$5.0 million in 2008. Titan's consumer sales appear to have stabilized at these reduced sales levels during the third quarter of 2009.

TITAN INTERNATIONAL, INC.
Management's Discussion and Analysis of
Financial Condition and Results of Operations

Gross loss from the consumer market was \$(0.1) million for the quarter ended September 30, 2009, as compared to gross profit of \$1.0 million in 2008. Consumer market loss from operations was \$(0.3) million for the quarter ended September 30, 2009, as compared to income from operations of \$0.9 million for 2008. Gross profit and income from operations declined as a result of reduced manufacturing efficiencies related to the extended shutdowns in the 2009 quarter.

Year-to-date: Consumer market net sales were \$14.9 million for the nine months ended September 30, 2009, down approximately 18%, as compared to \$18.2 million in 2008. The reduction in consumer market sales is attributed to the large contraction in consumer discretionary spending resulting from the recession and economic crisis.

Gross profit from the consumer market was \$1.3 million for the nine months ended September 30, 2009, as compared to \$3.4 million in 2008. Consumer market income from operations was \$0.8 million for the nine months ended September 30, 2009, as compared to \$2.9 million for 2008. Gross profit and income from operations declined primarily as a result of reduced manufacturing efficiencies related to the third quarter 2009 extended shutdowns.

Corporate expenses for the three months ended September 30, 2008, were composed of selling and marketing expenses of approximately \$5 million and administrative expenses of approximately \$4 million.

Year-to-Date

Income from operations on a segment basis does not include corporate expenses or depreciation and amortization expense related to property, plant and equipment carried at the corporate level totaling \$28.9 million for the nine months ended September 30, 2009, as compared to \$31.7 million for 2008.

Corporate expenses for the nine months ended September 30, 2009, were composed of selling and marketing expenses of approximately \$13 million and administrative expenses of approximately \$16 million.

Corporate expenses for the nine months ended September 30, 2008, were composed of selling and marketing expenses of approximately \$15 million and administrative expenses of approximately \$17 million.

The lower corporate expenses for the nine months ended September 30, 2009, as compared to 2008 resulted from costs reductions and reduced spending due to the lower sales levels.

MARKET RISK SENSITIVE INSTRUMENTS

The Company's risks related to foreign currencies, commodity prices and interest rates are consistent with those for 2008. For more information, see the "Market Risk Sensitive Instruments" discussion in the Company's Form 10-K for the fiscal year ended December 31, 2008.

PENSIONS

The Company has three frozen defined benefit pension plans and one defined benefit plan that previously purchased a final annuity settlement. These plans are described in Note 21 of the Company's Notes to Consolidated Financial Statements in the 2008 Annual Report on Form 10-K.

The Company's recorded liability for pensions is based on a number of assumptions, including discount rates, rates of return on investments, mortality rates and other factors. Certain of these assumptions are determined by the Company with the assistance of outside actuaries. Assumptions are based on past experience and anticipated future trends. These assumptions are reviewed on a regular basis and revised when appropriate. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and the carrying value of the related obligations. Titan expects to contribute approximately \$0.1 million to these frozen defined pension plans during the remainder of 2009.

LIQUIDITY AND CAPITAL RESOURCES

(amounts in thousands)

	September 30, 2009	December 31, 2008
Cash	\$ 45,360	\$ 61,658

Operating cash flows

Summary of cash flows from operating activities (amounts in thousands):

	Nine months ended September 30,		
	2009	2008	Change
Net income	\$ 1,838	\$ 31,743	\$ (29,905)
Depreciation and amortization	24,759	21,543	3,216
Deferred income tax provision	550	7,537	(6,987)
Accounts receivable	46,326	(50,080)	96,406
Inventories	22,473	(15,651)	38,124
Accounts payable	(40,483)	40,954	(81,437)
Other operating activities	(3,815)	(5,878)	2,063
Cash provided by operating activities	\$ 51,648	\$ 30,168	\$ 21,480

In the first nine months of 2009, operating activities provided cash of \$51.6 million. Net income included in operating activities was \$1.8 million. Operating cash flows were primarily provided by a lower accounts receivable balance of \$46.3 million and a lower inventory balance of \$22.5 million. Included in net income were noncash charges of \$24.8 million for depreciation and amortization. Positive cash flows were offset by a decrease in the accounts payable balance of \$40.5 million. Accounts receivable and accounts payable were lower as a result of lower sales during the third quarter of 2009. Inventories were lower as the Company made a concerted effort to bring inventory levels in line with the reduced sales levels.

In the first nine months of 2008, operating activities provided cash of \$30.2 million. This cash was primarily provided by net income of \$31.7 million and a higher accounts payable balance of \$41.0 million. Included in net income were noncash charges of \$21.5 million for depreciation and amortization and a \$7.5 million deferred income tax provision. Positive cash flows were offset by an increase in the accounts receivable balance of \$50.1 million due to record sales levels and an increase in inventories of \$15.7 million.

Operating cash flows increased \$21.5 million when comparing the nine months ended September 30, 2009, to the nine months ended September 30, 2008. Net income in the first nine months of 2009 decreased \$29.9 million from the first nine months of 2008. When comparing the first nine months of 2009 to the first nine months of 2008, cash flows from accounts receivable increased by \$96.4 million and cash flows from accounts payable decreased by \$81.4 million. These large changes are the result of increasing sales during the first nine months of 2008 with corresponding increases in accounts receivable and accounts payable, while the first nine months of 2009 were a period of reduced sales with corresponding decreases in accounts receivable and accounts payable. When comparing the first nine months of 2009 to the first nine months of 2008, cash flows from inventories increased \$38.1 million.

Debt Covenants

The Company's revolving credit facility contains various covenants and restrictions. The financial covenants in this agreement require that:

- Collateral coverage be equal to or greater than 1.2 times the outstanding revolver balance.
- If the 30-day average of the outstanding revolver balance exceeds \$125 million, the fixed charge coverage ratio be equal to or greater than a 1.0 to 1.0 ratio.

Restrictions include:

- Limits on payments of dividends and repurchases of the Company's stock.
- Restrictions on the ability of the Company to make additional borrowings, or to consolidate, merge or otherwise fundamentally change the ownership of the Company.
- Limitations on investments, dispositions of assets and guarantees of indebtedness.
- Other customary affirmative and negative covenants.

These covenants and restrictions could limit the Company's ability to respond to market conditions, to provide for unanticipated capital investments, to raise additional debt or equity capital, to pay dividends or to take advantage of business opportunities, including future acquisitions. The failure by Titan to meet these covenants could result in the Company ultimately being in default on this loan agreement.

The Company is in compliance with these covenants and restrictions as of September 30, 2009. The collateral coverage was calculated to be approximately 81 times the outstanding revolver balance at September 30, 2009.

The fixed charge coverage ratio did not apply for the quarter ended September 30, 2009. The credit facility usage was \$5.0 million at September 30, 2009, consisting exclusively of letters of credit of \$5.0 million with no cash borrowings.

Other Issues

The Company's business is subject to seasonal variations in sales that affect inventory levels and accounts receivable balances. Historically, Titan tends to experience higher sales demand in the first and second quarters.

Liquidity Outlook

At September 30, 2009, the Company had \$45.4 million of cash and cash equivalents and \$145.0 million of unused availability under the terms of its credit facility. The availability under the Company's \$150 million credit facility was reduced by \$5.0 million for letters of credit.

The Company estimates that total commitments from inception related to the Giant OTR Project at this time are approximately \$105 million, of which approximately \$104 million has been disbursed through September 30, 2009. Additional capital expenditure commitments may be incurred through 2009 as the Giant OTR Project moves to completion. The final cost of these additional Giant OTR capital items have not been finalized at this time. However, the Company currently does not anticipate that additional Giant OTR capital items would exceed approximately \$5 million.

The Company currently anticipates that cash on hand and anticipated internal cash flows from operations will allow the Company sufficient funds for completion of the Giant OTR Project. In addition to the Giant OTR Project, Titan estimates approximately \$3 million of capital expenditures for other projects for the remainder of the 2009 year.

Cash on hand, anticipated internal cash flows from operations and utilization of remaining available borrowings are expected to provide sufficient liquidity for working capital needs and capital expenditures. If the Company were to exhaust all currently available working capital sources or not meet the financial covenants and conditions of its loan agreements, the Company's ability to secure additional funding may be negatively impacted.

Management's Discussion and Analysis of
Financial Condition and Results of Operations

MARKET CONDITIONS AND OUTLOOK

The magnitude and duration of this worldwide recession and economic crisis makes it extremely difficult to forecast future sales levels. In the first nine months of 2009, Titan experienced sales decline across the board. This decline was more severe in the third quarter. Titan expects to continue to experience sales declines in each of the Company's markets for the remainder of 2009. Although the short-term outlook is for continued sales declines, the Company has seen signs that the market may currently be experiencing the bottom of the cycle. The Company is cautiously optimistic that sales may move higher in the latter part of 2010.

Energy, raw material and petroleum-based product costs have been exceptionally volatile and may negatively impact the Company's margins. Many of Titan's overhead expenses are fixed; therefore, lower seasonal trends may cause negative fluctuations in quarterly profit margins and affect the financial condition of the Company.

AGRICULTURAL MARKET OUTLOOK

Agricultural market sales are forecasted to be lower in the final quarter of 2009 when compared to the record sales levels in 2008. Commodity prices have declined from last year's highs, but remain above the long-term average. The gradual increase in the use of biofuels may help sustain future production. However, the magnitude and duration of the worldwide economic crisis makes it extremely difficult to forecast future sales levels. Many variables, including weather, grain prices, export markets and future government policies and payments can greatly influence the overall health of the agricultural economy. For the remainder of 2009, the Company expects challenging conditions for the agricultural market.

EARTHMOVING/CONSTRUCTION MARKET OUTLOOK

Sales for the earthmoving/construction market are expected to be significantly lower for the remainder of 2009 as a result of the worldwide economic crisis. The magnitude and duration of this crisis makes it extremely difficult to forecast future sales levels. Metals, oil and gas prices have retreated from last year's highs as a result of the economic crisis. In the long-term, these prices are expected to return to levels that are attractive for continued investment, which should help support future earthmoving and mining sales. However, many producers are currently delaying new investments which are affecting current year sales. The significant decline in the United States housing market continues to cause a major reduction in demand for equipment used for construction. The earthmoving/construction segment is affected by many variables, including commodity prices, road construction, infrastructure, government appropriations, housing starts and the current banking and credit crisis. For the remainder of 2009, the Company expects difficult conditions for the earthmoving/construction market.

CONSUMER MARKET OUTLOOK

Consumer discretionary spending has experienced a major contraction as a result of the worldwide recession, housing market decline, and high unemployment rates. Many of the Company's consumer market sales are ultimately used in items which fall into the discretionary spending category. There is no clear consensus among economists as to when consumer spending will rebound. Many factors continue to affect the consumer market including weather, competitive pricing, energy prices and consumer attitude. For the remainder of 2009, the Company expects continued weakness in consumer spending related to Titan's consumer market.

OTHER EVENTS

In September 2009, Titan signed a letter of intent with The Goodyear Tire & Rubber Company to purchase certain farm tire assets, including the Goodyear Dunlop Tires France (GDTF) Amiens North factory. This agreement is non-binding and will be subject to GDTF's satisfactory completion of a social plan related to a consumer tire activity at the Amiens North facility, along with completion of due diligence, a definitive acquisition agreement and other standard acquisition approval requirements. At this time, the due diligence process continues.

NEW ACCOUNTING STANDARDS

Accounting Guidance on Business Combinations

In January 2009, the Company adopted revised accounting guidance on business combinations. This guidance requires an acquirer to recognize assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at their fair values on the acquisition date, with goodwill being the excess value over the net identifiable assets acquired. The adoption of this guidance had no material effect on the Company's financial position, results of operations or cash flows.

Accounting Guidance on Interim Disclosures about Fair Value of Financial Instruments

In April 2009, the Financial Accounting Standards Board (FASB) issued accounting guidance on interim disclosures about fair value of financial instruments. This guidance amends previous guidance to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This guidance also amends previous guidance to require disclosures in summarized financial information at interim reporting periods. This guidance was effective for interim reporting periods ending after June 15, 2009. The adoption of this guidance had no material effect on the Company's financial position, results of operations or cash flows.

Accounting Guidance on Other-Than-Temporary-Impairments

In April 2009, accounting guidance on recognition and presentation of other-than-temporary impairments was issued. This guidance amends the other-than-temporary impairment guidance in U.S. Generally Accepted Accounting Principles (GAAP) for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. This guidance does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. This guidance was effective for interim reporting periods ending after June 15, 2009. The adoption of this guidance had no material effect on the Company's financial position, results of operations or cash flows.

Accounting Guidance on Subsequent Events

In June 2009, the Company adopted accounting guidance on subsequent events. The objective of this guidance was to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued. This guidance was effective for interim periods ending after June 15, 2009. The adoption of this guidance had no material effect on the Company's financial position, results of operations or cash flows.

Accounting Guidance on Accounting Standards Codification and Generally Accepted Accounting Principles

In June 2009, FASB issued accounting guidance on the FASB Accounting Standards Codification (Codification) and the hierarchy of GAAP. This guidance establishes the Codification as the single source of authoritative GAAP to be applied by nongovernmental entities, except for the rules and interpretive releases of the SEC under authority of federal securities laws, which are sources of authoritative GAAP for SEC registrants. This guidance was effective for financial statements issued for interim and annual periods ending after September 15, 2009. The adoption of this guidance had no material effect on the Company's financial position, results of operations or cash flows.

Because of its inherent limitations, internal controls over financial reporting may not prevent or detect misstatements.
