Date of fiscal year end: July 31, 2008

Date of reporting period: August 1, 2007 January 31, 2008

Item 1. Report to Stockholders:

The following is a copy of the report transmitted to stockholders pursuant to Rule 30e-1 under the Investment Company Act of 1940:

What makes Putnam different?

In 1830, Massachusetts Supreme Judicial Court Justice Samuel Putnam established The Prudent Man Rule, a legal foundation for responsible money management.

THE PRUDENT MAN RULE

All that can be required of a trustee to invest is that he shall conduct himself faithfully and exercise a sound discretion. He is to observe how men of prudence, discretion, and intelligence manage their own affairs, not in regard to speculation, but in regard to the permanent disposition of their funds, considering the probable income, as well as the probable safety of the capital to be invested.

A time-honored tradition in money management

Since 1937, our values have been rooted in a profound sense of responsibility for the money entrusted to us.

A prudent approach to investing

We use a research-driven team approach to seek consistent, dependable, superior investment results over time, although there is no guarantee a fund will meet its objectives.

Funds for every investment goal

We offer a broad range of mutual funds and other financial products so investors and their financial representatives can build diversified portfolios.

A commitment to doing what □s right for investors

With a focus on investment performance and in-depth information about our funds, we put the interests of investors first and seek to set the standard for integrity and service.

Industry-leading service

We help investors, along with their financial representatives, make informed investment decisions with confidence.

Message from the Trustees

Dear Fellow Shareholder:

In early 2008, financial markets face clear challenges. What began as a rise in defaults for a limited segment of the U.S. mortgage market has spread across the global financial sector and produced a significant tightening of credit conditions. Forecasts for global growth have been reduced as a result, and markets have reacted by sending stock prices lower. In the United States, the economy weakened sharply in late 2007, raising the chance of a recession this year. Fortunately, policymakers have taken action to stimulate growth: The Federal Reserve Board cut interest rates, and federal lawmakers, working with the president, approved a \$168 billion fiscal stimulus plan.

As investors, it is natural to feel discouraged by disappointing short-term results. During these challenging times, it is important to remember the value of a long-term perspective and the counsel of your financial representative. The normal condition of the economy and corporate earnings is one of growth, albeit with occasional interruptions. As in the past, after a period of weakness the economy is likely to regain its momentum and produce the growth and corporate earnings that investors expect.

Starting this month, we have changed the portfolio manager s commentary in this report to a question-and-answer format. We feel that this makes the information more readable and accessible, and we hope you think so as well.

2

Lastly, we note that Putnam Investments celebrated its 70th anniversary in November. From modest beginnings in Boston, Massachusetts, the company has grown into a global asset manager that serves millions of investors worldwide. Although the mutual fund industry has undergone many changes since George Putnam introduced his innovative balanced fund in 1937, Putnam guiding principles have not. As we celebrate this 70-year milestone, we look forward to Putnam continuing its long tradition of prudent money management. Thank you for your support of the Putnam funds.

Putnam Premier Income Trust: Seeking broad diversification across global bond markets

When Putnam Premier Income Trust was launched in 1988, its three-pronged focus on U.S. investment-grade bonds, high-yield corporate bonds, and non-U.S. bonds was considered innovative. Lower-rated, higher-yielding corporate bonds were relatively new, having just been established in the late 1970s. And, at the time of the fund launch, few investors were venturing outside the United States for fixed-income opportunities.

The bond investment landscape has undergone a transformation in the two decades since the fund launch. New sectors such as mortgage- and asset-backed securities now make up over one third of the U.S. investment-grade market. The high-yield corporate bond sector has also grown significantly. Outside the United States, the advent of the euro has resulted in a large market of European bonds. And there are also growing opportunities to invest in the debt of emerging-market countries.

The fund original investment focus has been enhanced to keep pace with this market expansion. To process the market increasing complexity, Putnam 100-member fixed-income group aligns teams of specialists with the varied investment opportunities. Each team identifies what it considers to be compelling strategies within its area of expertise. Your fund smanagement team selects from among these strategies, systematically building a diversified portfolio that seeks to carefully balance risk and return.

We believe the fund multi-strategy approach is well suited to the expanding opportunities of today s global bond marketplace. As different factors drive the performance of the various fixed-income sectors, the fund s diversified strategy can take advantage of changing market leadership in pursuit of high current income.

International investing involves certain risks, such as currency fluctuations, economic instability, and political developments. Additional risks may be associated with emerging-market securities, including illiquidity and volatility. Lower-rated bonds may offer higher yields in return for more risk. Mutual funds that invest in government securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk. Mutual funds that invest in bonds are subject to certain risks, including interest-rate risk, credit risk, and inflation risk. As interest rates rise, the prices of bonds fall. Long-term bonds are more exposed to interest-rate risk than short-term bonds. Unlike bonds, bond funds have ongoing fees and expenses. The fund\(\sigma\)s shares trade on a stock exchange at market prices, which may be higher or lower than the fund\(\sigma\)s NAV.

How do closed-end funds differ from open-end funds?

More assets at work While open-end funds need to maintain a cash position to meet redemptions, closed-end funds are not subject to redemptions and can keep more of their assets invested in the market.

Traded like stocks Closed-end fund shares are traded on stock exchanges, and their market prices fluctuate in response to supply and demand, among other factors.

Market price vs. net asset value Like an open-end fund s net asset value (NAV) per share, the NAV of a closed-end fund share is equal to the current value of the fund sassets, minus its liabilities, divided by the number of shares outstanding. However, when buying or selling closed-end fund shares, the price you pay or receive is the market price. Market price reflects current market supply and demand and may be higher or lower than the NAV.

Balancing risk and return across multiple sectors

Putnam believes that building a diversified portfolio with multiple income-generating strategies is the best way to pursue your fund sobjectives. The fund portfolio is composed of bonds from across the credit quality spectrum.

Performance snapshot

Putnam Premier Income Trust

Data is historical. Past performance does not guarantee future results. More recent returns may be less or more than those shown. Investment return and net asset value will fluctuate, and you may have a gain or a loss when you sell your shares. Performance assumes reinvestment of distributions and does not account for taxes. Fund returns in the bar chart are at NAV. See pages 7 and $12 \square 13$ for additional performancenformation, including fund returns at market price. Index and Lipper results should be compared to fund performance at NAV. Lipper calculates performance differently than the closed-end funds it ranks, due to varying methods for determining a fund's monthly reinvestment NAV.

* Returns for the six-month period are not annualized, but cumulative.

6

The period in review

Bill, thank you for taking the time today to talk about Premier Income Trust s most recent semiannual period. How did the fund perform?

The past six months represented the most volatile period for fixed-income credits that I ve experienced during my 20 years as a money manager. Despite this challenge, the fund produced positive performance for the period. Because of the multiple problems affecting the credit markets over the past six months subprime mortgage defaults, a credit runch throughout the global financial system, spiking yields for money market instruments, a weakening U.S. housing market, and heightened recession fears the flight-to-quality trade into Treasury securities dominated the marketplace. Many investors abandoned even the highest-quality credit instruments, especially mortgages. That is why, despite our cautious stance on duration (a measure of a portfolios interest-rate risk) and credit risk, the fund significantly underperformed its benchmark, which

Broad market index and fund performance

This comparison shows your fund performance in the context of broad market indexes for the six months ended 1/31/08. See page 6 and pages 12 13 for additional fund performance information. Index descriptions can be found on page 16.

7

Let stalk about some of the major events that took place during the period within the fixed-income marketplace.

The months of August, November, and January were particularly difficult. Events during those months added up to a significant | liquidity scare| in the credit markets. In August, we received economic data that seemed to indicate that the housing market would be slowing significantly. This prompted fears of more fallout from defaulting subprime mortgages throughout the economy and the financial markets. Also, merger-and-acquisition (M&A) activity had significantly slowed by then, and big banks that had garnered easy profits from making billions of dollars in | bridge loans| to finance large leveraged buyouts (LBOs) in the M&A market now found themselves with a large volume of nonperforming loans. LBO-related bond issues | which normally would have refunded those loans and provided the banks with substantial profits | had all but dried up.

Early in the fall of 2007, the markets settled down and yields began to stabilize. In November, however, we had another wave of weak housing statistics and more problems in the bank loan market. Then, a new issue emerged within the money markets, as certain

8	

structured investment vehicles (SIVs), which provide funds for mortgages, credit cards, and student loans, began to feel the credit crunch. Although none were held in the fund portfolio, the SIV crisis affected the market for all fixed-income securities. As rates for commercial paper spiked, short-term investors began to fear that some SIVs would become insolvent, and a great deal of market liquidity froze, affecting the wider credit markets. In addition, fixed-income markets endured year-end 2007 selling pressure as corporations and financial institutions attempted to clean up their balance sheets by divesting themselves of what they perceived to be weaker credits.

For some time, the consumer has been the bulwark of the U.S. economy, but in January the markets faced the additional challenge of weaker consumer spending, and the unemployment figure was the highest we had seen for many years. Also, service sector data pointed to a much weaker economy. The market was now affected by a widespread concern that U.S. growth might be in decline, and that global growth might also be significantly affected.

What response did the tightening liquidity squeeze and economic slowdown prompt from the government?

Initially, the Federal Reserve (\Box the Fed \Box) took a cautious approach because of its ongoing inflation concerns, using some nontraditional methods to boost liquidity in the financial markets.

Comparison of top sector weightings*

This chart shows how the fund stop weightings have changed over the past six months. Weightings are shown as a percentage of net assets, and are net of TBA sales positions outstanding. Holdings will vary over time.

*May include exposure to derivative investments.

9

The European Central Bank also sought to reassure investors by providing significant amounts of cash to money markets. Eventually, the extreme pressure on global liquidity forced the Fed to act decisively, and it cut the federal funds rate by a total of 2.25% over five FOMC meetings between September 2007 and January 2008. Congress has approved a large fiscal stimulus package to try to bolster consumer spending. Another potential positive is the weaker U.S. dollar, which should continue to bolster exports.

The fund employs a number of strategies to generate returns. Which strategies helped performance during the period?

The strategy that helped performance most and enabled us to generate a positive return for the fund in a difficult environment was the fund $\$ $\$ $\$ strategy, in which we overweight shorter-term securities and underweight longer-term issues. This strategy is based on our view that the yield curve will steepen as global central banks continue to cut short-term rates and longer-term rates trend higher on inflation concerns. Also, the fund $\$ non-U.S.-dollar positions in Europe, Japan, Canada, and Australia contributed significantly, based in part on the weaker dollar.

When interest rates declined at certain points during the period, our conservative duration position prevented the fund from performing as well as some competitors. But the biggest detractors came from the fund positions within credit instruments, particularly high-yield bonds and AAA-rated securitized mortgages. Our high-yield position, although much smaller than in previous years, nevertheless hurt performance because of the credit squeeze and recession fears affecting that market. And although we have confidence in the high-quality mortgage security positions held by the fund, the entire market has been hurt in the short run by the subprime issue.

Bill, given all of the uncertainty that you ve just outlined, what is your outlook for the economy? And what areas within the fund investment universe do you plan to emphasize going forward?

Thanks to the number of measures the government is taking to prevent a sustained and deep recession, we think one of the biggest risks is, in fact, that the economy will not be as slow in six months as many are now predicting. With a great flood of economic stimulus entering the pipeline, one significant risk is that we could see markedly

higher inflation for a sustained period. That is one reason we are maintaining the fund strategy, and we will also continue to invest in inflation-linked securities that benefit from inflation increases. We also see attractive value within many high-quality mortgage and mortgage-backed securities and are

10

investing in these areas with a two- to five-year horizon in mind. This shift from government bonds to securitized instruments can be seen in the chart on page 9. Overall, we plan to continue to diversify the portfolio across a broad range of fixed-income sectors and securities.

Thanks again, Bill, for sharing your insight and time with us.

The views expressed in this report are exclusively those of Putnam Management. They are not meant as investment advice.

International investing involves certain risks, such as currency fluctuations, economic instability, and political developments. Additional risks may be associated with emerging-market securities, including illiquidity and volatility. Lower-rated bonds may offer higher yields in return for more risk. Mutual funds that invest in government securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk. Mutual funds that invest in bonds are subject to certain risks, including interest-rate risk, credit risk, and inflation risk. As interest rates rise, the prices of bonds fall. Long-term bonds are more exposed to interest-rate risk than short-term bonds. Unlike bonds, bond funds have ongoing fees and expenses. The fund shares trade on a stock exchange at market prices, which may be higher or lower than the fund NAV.

INVESTMENT INSIGHT

The credit crunch that has rocked the financial system over the past six months has had an enormously negative impact on bank lending. The challenges investors have experienced with pricing collateralized debt obligations, structured investment vehicles (SIVs), and bank loan securities have combined to make the balance sheets of major banks vulnerable, forcing many to curtail their lending operations. Although large corporations still have access to needed funds through banks and the capital markets, small and midsize businesses will probably face a credit squeeze for a significant time period. Many market watchers believe that this phenomenon should take 6 to 18 months to be completely resolved, and could hinder economic activity over that period.

Of special interest

We are pleased to report that effective January 2008, your fund solvidend was increased from \$0.0300 to \$0.0330 per share. This dividend increase was possible due to the higher yield premium offered in bonds from all sectors outside of Treasury bonds, and our increased exposure to these areas.

11

Your fund s performance

This section shows your fund sperformance for periods ended January 31, 2008, the end of the first half of its current fiscal year. In accordance with regulatory requirements for mutual funds, we also include performance as of the most recent calendar quarter-end. Performance should always be considered in light of a fund sinvestment strategy. Data represents past performance. Past performance does not guarantee future results. More recent returns may be less or more than those shown. Investment return, net asset value, and market price will fluctuate, and you may have a gain or a loss when you sell your shares.

Your fund s management

Your fund is managed by the members of the Putnam Core Fixed-Income and Core Fixed-Income High Yield teams. D. William Kohli is the Portfolio Leader, and Michael Atkin, Rob Bloemker, Kevin Murphy, and Paul Scanlon are Portfolio Members of your fund. The Portfolio Leader and Portfolio Members coordinate the teams management of the fund.

For a complete listing of the members of the Putnam Core Fixed-Income and Core Fixed-Income High-Yield teams, including those who are not Portfolio Leaders or Portfolio Members of your fund, visit Putnam[s Individual Investors Web site at www.putnam.com.

Investment team fund ownership

The table below shows how much the fund scurrent Portfolio Leader and Portfolio Members have invested in the fund and in all Putnam mutual funds (in dollar ranges). Information shown is as of January 31, 2008, and January 31, 2007.

N/A indicates the individual was not a Portfolio Leader or Portfolio Member as of 1/31/07.

Trustee and Putnam employee fund ownership

As of January 31, 2008, 12 of the 13 Trustees of the Putnam funds owned fund shares. The table below shows the approximate value of investments in the fund and all Putnam funds as of that date by the Trustees and Putnam employees. These amounts include investments by the Trustees and employees immediate family members and investments through retirement and deferred compensation plans.

	Assets in the fund	Total assets in all Putnam funds
Trustees	\$55,000	\$ 90,000,000
Putnam employees	\$ 6,000	\$669,000,000

14

Other Putnam funds managed by the Portfolio Leader and Portfolio Members

D. William Kohli is also a Portfolio Leader of Putnam Diversified Income Trust, Putnam Global Income Trust, and Putnam Master Intermediate Income Trust.

Michael Atkin is also a Portfolio Member of Putnam Diversified Income Trust, Putnam Global Income Trust, and Putnam Master Intermediate Income Trust.

Rob Bloemker is also a Portfolio Leader of Putnam U.S. Government Income Trust and Putnam American Government Income Fund, and a Portfolio Member of Putnam Diversified Income Trust, Putnam Global Income Trust. and Putnam Master Intermediate Income Trust.

Kevin Murphy is also a Portfolio Member of Putnam Income Fund, Putnam Diversified Income Trust, Putnam Master Intermediate Income Trust, and Putnam Utilities Growth and Income Fund.

Paul Scanlon is also a Portfolio Leader of Putnam High Yield Trust, Putnam High Yield Advantage Fund, and Putnam Floating Rate Income Fund, and a Portfolio Member of Putnam Diversified Income Trust and Putnam Master Intermediate Income Trust.

D. William Kohli, Michael Atkin, Rob Bloemker, Kevin Murphy, and Paul Scanlon may also manage other accounts and variable trust funds advised by Putnam Management or an affiliate.

Changes in your fund S Portfolio Leader and Portfolio Members

During the reporting period ended January 31, 2008, Michael Atkin became a Portfolio Member of your fund, and Portfolio Member Jeffrey Kaufman left your fund s management team.

15

Terms and definitions

Important terms

Total return shows how the value of the fund shares changed over time, assuming you held the shares through the entire period and reinvested all distributions in the fund.

Net asset value (NAV) is the value of all your fund sassets, minus any liabilities, divided by the number of outstanding shares.

Market price is the current trading price of one share of the fund. Market prices are set by transactions between buyers and sellers on exchanges such as the New York Stock Exchange.

Comparative indexes

Lehman Aggregate Bond Index is an unmanaged index of U.S. investment-grade fixed-income securities.

Lehman Government Bond Index is an unmanaged index of U.S. Treasury and agency securities.

Merrill Lynch 91-Day Treasury Bill Index is an unmanaged index that seeks to measure the performance of U.S. Treasury bills available in the marketplace.

S&P 500 Index is an unmanaged index of common stock performance.

Indexes assume reinvestment of all distributions and do not account for fees. Securities and performance of a fund and an index will differ. You cannot invest directly in an index.

Lipper is a third-party industry-ranking entity that ranks mutual funds. Its rankings do not reflect sales charges. Lipper rankings are based on total return at net asset value relative to other funds that have similar current investment styles or objectives as determined by Lipper. Lipper may change a fund scategory assignment at its discretion. Lipper category averages reflect performance trends for funds within a category.

16

Trustee approval of management contract

General conclusions

The Board of Trustees of the Putnam funds oversees the management of each fund and, as required by law, determines annually whether to approve the continuance of your fund management contract with Putnam Investment Management (Putnam Management) and the sub-management contract between Putnam Management saffiliate, Putnam Investments Limited (PIL), and Putnam Management. In this regard, the Board of Trustees, with the assistance of its Contract Committee consisting solely of Trustees who are not interested persons (as such term is defined in the Investment Company Act of 1940, as amended) of the Putnam funds (the Independent Trustees), requests and evaluates all information it deems reasonably necessary under the

circumstances. Over the course of several months ending in June 2007, the Contract Committee met several times to consider the information provided by Putnam Management and other information developed with the assistance of the Board[]s independent counsel and independent staff. The Contract Committee reviewed and discussed key aspects of this information with all of the Independent Trustees. The Contract Committee recommended, and the Independent Trustees approved, the continuance of your fund[]s management contract and sub-management contract, effective July 1, 2007. (Because PIL is an affiliate of Putnam Management and Putnam Management remains fully responsible for all services provided by PIL, the Trustees have not evaluated PIL as a separate entity, and all subsequent references to Putnam Management below should be deemed to include reference to PIL as necessary or appropriate in the context.)

In addition, in anticipation of the sale of Putnam Investments to Great-West Lifeco, at a series of meetings ending in March 2007, the Trustees reviewed and approved new management and distribution arrangements to take effect upon the change of control. Shareholders of all funds approved the management contracts in May 2007, and the change of control transaction was completed on August 3, 2007. Upon the change of control, the management contracts that were approved by the Trustees in June 2007 automatically terminated and were replaced by new contracts that had been approved by shareholders. In connection with their review for the June 2007 continuance of the Putnam funds management contracts, the Trustees did not identify any facts or circumstances that would alter the substance of the conclusions and recommendations they made in their review of the contracts to take effect upon the change of control.

The Independent Trustees approval was based on the following conclusions:

That the fee schedule in effect for your fund represented reasonable compensation in light of the nature and quality of the services being provided to the fund, the fees paid by competitive funds and the costs incurred by Putnam Management in providing such services, and

That this fee schedule represented an appropriate sharing between fund shareholders and Putnam Management of such economies of scale as may exist in the management of the fund at current asset levels.

17

These conclusions were based on a comprehensive consideration of all information provided to the Trustees and were not the result of any single factor. Some of the factors that figured particularly in the Trustees deliberations and how the Trustees considered these factors are described below, although individual Trustees may have evaluated the information presented differently, giving different weights to various factors. It is also important to recognize that the fee arrangements for your fund and the other Putnam funds are the result of many years of review and discussion between the Independent Trustees and Putnam Management, that certain aspects of such arrangements may receive greater scrutiny in some years than others, and that the Trustees conclusions may be based, in part, on their consideration of these same arrangements in prior years.

Management fee schedules and categories; total expenses

The Trustees reviewed the management fee schedules in effect for all Putnam funds, including fee levels and breakpoints, and the assignment of funds to particular fee categories. In reviewing fees and expenses, the Trustees generally focused their attention on material changes in circumstances [] for example, changes in a fund[]s size or investment style, changes in Putnam Management[]s operating costs or responsibilities, or changes in practices in the mutual fund industry [] that suggest that consideration of fee changes might be warranted. The Trustees concluded that the circumstances did not warrant changes to the management fee structure of your fund, which had been carefully developed over the years, re-examined on many occasions and adjusted where appropriate. The Trustees focused on two areas of particular interest, as discussed further below:

☐ **Competitiveness** The Trustees reviewed comparative fee and expense information for competitive funds, which indicated that, in a custom peer group of competitive funds selected by Lipper Inc., your fund ranked in the 67th percentile in management fees and in the 67th percentile in total expenses as of December 31, 2006 (the first percentile being the least expensive funds and the 100th percentile being the most expensive funds). The Trustees expressed their intention to monitor this information closely to ensure that fees and expenses of your fund continue to meet evolving competitive standards.

□ **Economies of scale**.Your fund currently has the benefit of breakpoints in its management fee that provide shareholders with significant economies of scale, which means that the effective management fee rate of a fund (as a percentage of fund assets) declines as a fund grows in size and crosses specified asset thresholds. Conversely, as a fund shrinks in size □ as has been the case for many Putnam funds in recent years □ these breakpoints result in increasing fee levels. In recent years, the Trustees have examined the operation of the existing breakpoint structure during periods of both growth and decline in asset levels. The Trustees concluded that the fee schedules in effect for the funds represented an appropriate sharing of economies of scale at current asset levels. In reaching this conclusion, the Trustees considered the Contract Committee□s stated intent to continue to work with Putnam Management to

18

plan for an eventual resumption in the growth of assets, and to consider the potential economies that might be produced under various growth assumptions.

In connection with their review of the management fees and total expenses of the Putnam funds, the Trustees also reviewed the costs of the services to be provided and profits to be realized by Putnam Management and its affiliates from the relationship with the funds. This information included trends in revenues, expenses and profitability of Putnam Management and its affiliates relating to the investment management and distribution services provided to the funds. In this regard, the Trustees also reviewed an analysis of Putnam Management servenues, expenses and profitability with respect to the funds management contracts, allocated on a fund-by-fund basis.

Investment performance

The quality of the investment process provided by Putnam Management represented a major factor in the Trustees evaluation of the quality of services provided by Putnam Management under your fund management contract. The Trustees were assisted in their review of the Putnam funds investment process and performance by the work of the Investment Process Committee of the Trustees and the Investment Oversight Committees of the Trustees, which had met on a regular monthly basis with the funds portfolio teams throughout the year. The Trustees concluded that Putnam Management generally provides a high-quality investment process as measured by the experience and skills of the individuals assigned to the management of fund portfolios, the resources made available to such personnel, and in general the ability of Putnam Management to attract and retain high-quality personnel but also recognized that this does not guarantee favorable investment results for every fund in every time period. The Trustees considered the investment performance of each fund over multiple time periods and considered information comparing each fund performance with various benchmarks and with the performance of competitive funds.

The Trustees noted the satisfactory investment performance of many Putnam funds. They also noted the disappointing investment performance of certain funds in recent years and discussed with senior management of Putnam Management the factors contributing to such underperformance and actions being taken to improve performance. The Trustees recognized that, in recent years, Putnam Management has made significant changes in its investment personnel and processes and in the fund product line to address areas of underperformance. In particular, they noted the important contributions of Putnam Management leadership in attracting, retaining and supporting high-quality investment professionals and in systematically implementing an investment process that seeks to merge the best features of fundamental and quantitative analysis. The Trustees indicated their intention to continue to monitor performance trends to assess the effectiveness of these changes and to evaluate whether additional changes to address areas of underperformance are warranted.

19

In the case of your fund, the Trustees considered that your fund sommon share cumulative total return performance at net asset value was in the following percentiles of its Lipper Inc. peer group (Lipper Flexible Income Funds (closed-end)) for the one-, three- and five-year periods ended March 31, 2007 (the first percentile being the best-performing funds and the 100th percentile being the worst-performing funds):

One-year period

Three-year period

Five-year period

38th 38th 38th

(Because of the passage of time, these performance results may differ from the performance results for more recent periods shown elsewhere in this report. Over the one-, three- and five-year periods ended March 31, 2007, there were 7, 7 and 7 funds, respectively, in your fund[]s Lipper peer group.* Past performance is no guarantee of future returns.)

As a general matter, the Trustees concluded that cooperative efforts between the Trustees and Putnam Management represent the most effective way to address investment performance problems. The Trustees noted that investors in the Putnam funds have, in effect, placed their trust in the Putnam organization, under the oversight of the funds. Trustees, to make appropriate decisions regarding the management of the funds. Based on the responsiveness of Putnam Management in the recent past to Trustee concerns about investment performance, the Trustees concluded that it is preferable to seek change within Putnam Management to address performance shortcomings. In the Trustees of view, the alternative of terminating a management contract and engaging a new investment adviser for an underperforming fund would entail significant disruptions and would not provide any greater assurance of improved investment performance.

Brokerage and soft-dollar allocations; other benefits

The Trustees considered various potential benefits that Putnam Management may receive in connection with the services it provides under the management contract with your fund. These include benefits related to brokerage and soft-dollar allocations, whereby a portion of the commissions paid by a fund for brokerage may be used to acquire research services that may be useful to Putnam Management in managing the assets of the fund and of other clients. The Trustees indicated their continued intent to monitor the potential benefits associated with the allocation of fund brokerage to ensure that the principle of seeking [best price and execution] remains paramount in the portfolio trading process.

* The percentile rankings for your fund sclass A share annualized total return performance in the Lipper Flexible Income Funds (closed-end) category for the one-, five-, and ten-year periods ended December 31, 2007, were 38%, 43%, and 29%, respectively. Over the one-, five-, and ten-year periods ended December 31, 2007, the fund ranked 3rd out of 7, 3rd out of 6, and 2nd out of 6 funds, respectively. Note that this more recent information was not available when the Trustees approved the continuance of your fund smanagement contract.

20

The Trustees annual review of your fund smanagement contract also included the review of your fund scustodian agreement and investor servicing agreement with Putnam Fiduciary Trust Company (PFTC), which provide benefits to affiliates of Putnam Management. In the case of the custodian agreement, the Trustees considered that, effective January 1, 2007, the Putnam funds had engaged State Street Bank and Trust Company as custodian and began to transition the responsibility for providing custody services away from PFTC.

Comparison of retail and institutional fee schedules

The information examined by the Trustees as part of their annual contract review has included for many years information regarding fees charged by Putnam Management and its affiliates to institutional clients such as defined benefit pension plans, college endowments, etc. This information included comparison of such fees with fees charged to the funds, as well as a detailed assessment of the differences in the services provided to these two types of clients. The Trustees observed, in this regard, that the differences in fee rates between institutional clients and the funds are by no means uniform when examined by individual asset sectors, suggesting that differences in the pricing of investment management services to these types of clients reflect to a substantial degree historical competitive forces operating in separate market places. The Trustees considered the fact that fee rates across all asset sectors are higher on average for funds than for institutional clients, as well as the differences between the services that Putnam Management provides to the Putnam funds and those that it provides to institutional clients of the firm, but did not rely on such comparisons to any significant extent in concluding that the management fees paid by your fund are reasonable.

Other information for shareholders

Important notice regarding share repurchase program

In September 2007, the Trustees of your fund approved the renewal of a share repurchase program that had been in effect since 2005. This renewal will allow your fund to repurchase, in the 12 months beginning October 8, 2007, up to 10% of the fund s common shares outstanding as of October 5, 2007.

Important notice regarding delivery of shareholder documents

In accordance with SEC regulations, Putnam sends a single copy of annual and semiannual shareholder reports, prospectuses, and proxy statements to Putnam shareholders who share the same address, unless a shareholder requests otherwise. If you prefer to receive your own copy of these documents, please call Putnam at 1-800-225-1581, and Putnam will begin sending individual copies within 30 days.

Proxy voting

Putnam is committed to managing our mutual funds in the best interests of our shareholders. The Putnam funds proxy voting guidelines and procedures, as well as information regarding how your fund voted proxies relating to portfolio securities during the 12-month period ended June 30, 2007, are available on the Putnam Individual Investors Web site, www.putnam.com/individual, and on the SEC Web site, www.sec.gov. If you have questions about finding forms on the SEC Web site, you may call the SEC at 1-800-SEC-0330. You may also obtain the Putnam funds proxy voting guidelines and procedures at no charge by calling Putnam Shareholder Services at 1-800-225-1581.

Fund portfolio holdings

The fund will file a complete schedule of its portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. Shareholders may obtain the fund s Forms N-Q on the SEC web site at www.sec.gov. In addition, the fund s Forms N-Q may be reviewed and copied at the SEC Public Reference Room in Washington, D.C. You may call the SEC at 1-800-SEC-0330 for information about the SEC Web site or the operation of the Public Reference Room.

Financial statements

A guide to financial statements

These sections of the report, as well as the accompanying Notes, constitute the fund statements.

The fund s **portfolid** ists all the fund s investments and their values as of the last day of the reporting period. Holdings are organized by asset type and industry sector, country, or state to show areas of concentration and diversification.

Statement of assets and liabilities shows how the fund s net assets and share price are determined. All investment and noninvestment assets are added together. Any unpaid expenses and other liabilities are subtracted from this total. The result is divided by the number of shares to determine the net asset value per share. (For funds with preferred shares, the amount subtracted from total assets includes the liquidation preference of preferred shares.)

Statement of operations shows the fund \square s net investment gain or loss. This is done by first adding up all the fund \square searnings \square from dividends and interest income \square and subtracting its operating expenses to determine net investment income (or loss). Then, any net gain or loss the fund realized on the sales of its holdings \square as well as any unrealized gains or losses over the period \square is added to or subtracted from the net investment result to determine the fund \square s net gain or loss for the fiscal period.

Statement of changes in net assets shows how the fund so net assets were affected by the fund so net investment gain or loss, by distributions to shareholders, and by changes in the number of the fund shares. It lists distributions and their sources (net investment income or realized capital gains) over the current reporting period and the most recent fiscal year-end. The distributions listed here may not match the sources listed in the Statement of operations because the distributions are determined on a tax basis and may be paid in a different period from the one in which they were earned. Dividend sources are estimated at the time of declaration. Actual results may vary. Any non-taxable return of capital cannot be determined until final tax calculations are completed after the end of the fund sfiscal year.

Financial highlights provide an overview of the fund investment results, per-share distributions, expense ratios, net investment income ratios, and portfolio turnover in one summary table, reflecting the five most recent reporting periods. In a semiannual report, the highlight table also includes the current reporting period.
