(Unaudited; tabular dollars in thousands, except for per share data)

### ***1. Basis of Presentation***

The terms "we", "us", and "our" are used in this report to refer collectively to Pitney Bowes Inc. and its subsidiaries.

The accompanying unaudited Condensed Consolidated Financial Statements of Pitney Bowes Inc. have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and the instructions to Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In addition, the December 31, 2009 Condensed Consolidated Balance Sheet data was derived from audited financial statements, but does not include all disclosures required by GAAP. In our opinion, all adjustments (consisting of only normal recurring adjustments) considered necessary to present fairly our financial position at June 30, 2010 and December 31, 2009, our results of operations for the six months ended June 30, 2010 and 2009 and our cash flows for the six months ended June 30, 2010 and 2009 have been included. Operating results for the six months ended June 30, 2010 are not necessarily indicative of the results that may be expected for any other interim period or the year ending December 31, 2010.

These statements should be read in conjunction with the financial statements and notes thereto included in our 2009 Annual Report to Stockholders on Form 10-K.

Certain prior year amounts have been reclassified to conform with the current period presentation.

### ***2. Nature of Operations***

We are the largest provider of mail processing equipment and integrated mail solutions in the world. We offer a full suite of equipment, supplies, software and services for end-to-end mailstream solutions which enable our customers to optimize the flow of physical and electronic mail, documents and packages across their operations. We conduct our business activities in seven reporting segments within two business groups: Small & Medium Business Solutions and Enterprise Business Solutions. See Note 6 to the Condensed Consolidated Financial Statements for details of our reporting segments and a description of their activities.

### ***3. Recent Accounting Pronouncements***

#### ***Revenue Recognition***

In September 2009, new guidance was introduced addressing the accounting for revenue arrangements with multiple elements and certain revenue arrangements that include software. This will allow companies to allocate consideration in a multiple element arrangement in a way that better reflects the economics of the transaction and will result in the elimination of the residual method. In addition, tangible products that have software components that are essential to the functionality of the tangible product will be scoped out of the software revenue guidance. The new guidance may also result in more expansive disclosures. The new guidance will be effective on January 1, 2011. We do not expect the adoption of this guidance to have a material impact on our financial position, results of operations, or cash flows.

### ***4. Discontinued Operations***

The following table shows selected financial information included in discontinued operations for the three and six months ended June 30, 2010 and 2009, respectively:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Pre-tax income	\$ 754	\$ 10,851	\$ 754	\$ 20,624
Tax provision	(3,420)	(5,749)	(6,550)	(12,899)
(Loss) gain from discontinued operations, net of tax	\$ (2,666)	\$ 5,102	\$ (5,796)	\$ 7,725

## Edgar Filing: PITNEY BOWES INC /DE/ - Form 10-Q

The net loss for the three and six months months ended June 30, 2010 primarily relates to the accrual of interest on uncertain tax positions. The net gain for the three months ended June 30, 2009 relates to \$10.9 million of pre-tax income (\$6.7 million net of tax) representing the release of reserves related to the expiration of an indemnity agreement associated with our former Capital Services business.

**PITNEY BOWES INC.**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**  
**(Unaudited; tabular dollars in thousands, except for per share data)**

The net gain for the six months ended June 30, 2009 includes the indemnity settlement as discussed and \$9.8 million pre-tax income (\$6.0 million net of tax) for a bankruptcy settlement, which was partially offset by the accrual of interest on uncertain tax positions. We received a bankruptcy settlement for unsecured claims pertaining to the leasing of certain aircraft. These leasing transactions were originally executed by our former Capital Services business. At the time of the Capital Services sale, we retained the rights to the bankruptcy claims. Since these claims were attributable to our former Capital Services business, we recorded the gain on this settlement in discontinued operations.

Note: The sum of the earnings per share amounts may not equal the totals above due to rounding.

The computation of diluted earnings per share as of June 30, 2010 and 2009 did not include the effects of 15.3 million and 18.2 million stock options, respectively, because their exercise prices were greater than the corresponding market value per share of our common stock.

On February 8, 2010, we made our annual stock compensation grant which consisted of approximately 1.7 million stock options and 0.8 million restricted stock units.

**6. Segment Information**

We conduct our business activities in seven reporting segments within two business groups, Small & Medium Business Solutions and Enterprise Business Solutions, based on the customers they primarily serve. The principal products and services of each of our reporting segments are as follows:

Small & Medium Business Solutions:

*U.S. Mailing:* Includes the U.S. revenue and related expenses from the sale, rental and financing of our mail finishing, mail creation, shipping equipment and software; supplies; support and other professional services; and payment solutions.

*International Mailing:* Includes the non-U.S. revenue and related expenses from the sale, rental and financing of our mail finishing, mail creation, shipping equipment and software; supplies; support and other professional services; and payment solutions.

Enterprise Business Solutions:

*Production Mail:* Includes the worldwide revenue and related expenses from the sale, financing, support and other professional services of our high-speed, production mail systems and sorting equipment.

*Software:* Includes the worldwide revenue and related expenses from the sale and support services of non-equipment-based mailing, customer communication and location intelligence software.

*Management Services:* Includes worldwide facilities management services; secure mail services; reprographic, document management services; secure document destruction; and litigation support and eDiscovery services.

*Mail Services:* Includes presort mail services and cross-border mail services.

*Marketing Services:* Includes direct marketing services for targeted customers.

Earnings before interest and taxes ( EBIT ), a non-GAAP measure, is useful to management in demonstrating the operational profitability of the segments by excluding interest and taxes, which are generally managed across the entire company on a consolidated basis. EBIT is determined by deducting from revenue the related costs and expenses attributable to the segment. Segment EBIT also excludes general corporate expenses, restructuring charges and asset impairments.

As a result of certain organizational changes made during the third quarter of 2009, we have reclassified certain 2009 amounts to conform to the revised presentation. The amounts reclassified did not have a material impact on our segment disclosures.

During the second quarter of 2010 we completed a small acquisition with an anticipated total purchase price of \$11.5 million. This included \$10.9 million of identified intangible assets with a weighted average amortization period of 9 years.

In July 2010, we announced our planned acquisition of Portrait Software PLC ( Portrait ) which we expect to complete in the third quarter. Portrait provides software to enhance existing customer relationship management systems, enabling clients to achieve improved customer retention and profitability.

The estimated future amortization expense related to intangible assets is as follows:

### **10. Long-term Debt**

On September 15, 2009, we repaid the 8.55% notes with a \$150 million face value at their maturity. The repayment of these notes was funded through cash generated from operations and issuance of commercial paper.

## Edgar Filing: PITNEY BOWES INC /DE/ - Form 10-Q

On June 29, 2009, we entered into an interest rate swap for an aggregate notional amount of \$100 million to effectively convert our interest payments on a portion of the \$400 million, 4.625% fixed rate notes due in 2012, into variable interest rates. The variable rates payable are based on one month LIBOR plus 249 basis points. In July 2009, we entered into three additional interest rate swaps for an aggregate notional amount of \$300 million to effectively convert our interest payments on the remainder of the \$400 million, 4.625% fixed rate notes due in 2012, into variable interest rates. The variable rates payable are based on one month LIBOR plus 248 basis points for \$100 million notional amount and one month LIBOR plus 250 basis points for \$200 million notional amount.

On March 2, 2009, we issued \$300 million of 10-year fixed-rate notes with a coupon rate of 6.25%. The interest is paid semi-annually beginning September 15, 2009. The notes mature on March 15, 2019. We simultaneously unwound four forward starting swap

agreements (forward swaps) used to hedge the interest rate risk associated with the forecasted issuance of the fixed-rate debt. The unwind of the derivatives resulted in a loss (and cash payment) of \$20.3 million which was recorded to other comprehensive income, net of tax, and will be amortized to net interest expense over the 10-year term of the notes. The proceeds from these notes were used for general corporate purposes, including the repayment of commercial paper.

**11. Noncontrolling Interests (Preferred Stockholders Equity in Subsidiaries)**

At January 1, 2009, Pitney Bowes International Holdings, Inc. ( PBIH ), a subsidiary of the Company, had 3,750,000 shares outstanding or \$375 million of variable term voting preferred stock owned by certain outside institutional investors. These preferred shares were entitled as a group to 25% of the combined voting power of all classes of capital stock of PBIH. All outstanding common stock of PBIH, representing the remaining 75% of the combined voting power of all classes of capital stock, was owned directly or indirectly by Pitney Bowes Inc. The preferred stock, \$.01 par value, was entitled to cumulative dividends at rates set at auction. The weighted average dividend rate was 4.8% for the variable term voting preferred stock for the three and six months ended June 30, 2009, respectively.

During 2009, PBIH issued 300,000 shares, or \$300 million, of perpetual voting preferred stock to certain outside institutional investors. These preferred shares are entitled as a group to 25% of the combined voting power of all classes of capital stock of PBIH. All outstanding common stock of PBIH, representing the remaining 75% of the combined voting power of all classes of capital stock, is owned directly or indirectly by Pitney Bowes Inc. The preferred stock is entitled to cumulative dividends at a rate of 6.125% for a period of 7 years after which it becomes callable and, if it remains outstanding, will yield a dividend that increases by 150% every six months thereafter.

During 2009, PBIH redeemed \$375 million of its existing variable term voting preferred stock. The redemption was funded by a combination of the issuance of the \$300 million perpetual voting preferred stock, cash flows from operations and the issuance of commercial paper.

Preferred dividends are reported in the Condensed Consolidated Statements of Income as Preferred stock dividends of subsidiaries attributable to noncontrolling interests. Preferred dividends totaled \$4.5 million and \$4.6 million for the three months ended June 30, 2010 and 2009, respectively. Preferred dividends totaled \$9.1 million for both six months ended June 30, 2010 and 2009. No dividends were in arrears at June 30, 2010 or December 31, 2009.

A rollforward of noncontrolling interests is as follows:

Beginning balance at January 1, 2009	\$ 374,165
Movements:	
Share issuances (1)	296,370
Share redemptions	(374,165)
Ending balance at December 31, 2009 and June 30, 2010	<b>\$ 296,370</b>

**13. Restructuring Charges and Asset Impairments**

We recorded pre-tax restructuring charges and asset impairments of \$69.2 million for the six months ended June 30, 2010.

**2009 Program**

In 2009, we announced that we were undertaking a series of initiatives that are designed to transform and enhance the way we operate as a global company. In order to enhance our responsiveness to changing market conditions, we are executing a strategic transformation program designed to create improved processes and systems to further enable us to invest in future growth in areas such as our global customer interactions and product development processes. This program is expected to continue into 2012 and will result in the reduction of up to 10 percent of the positions in the company. We expect the total pre-tax cost of this program will be in the range of \$250 million to \$350 million primarily related to severance and benefit costs incurred in connection with such workforce reductions. Most of the total pre-tax costs will be cash-related charges. Currently, we are targeting annualized benefits by 2012, net of system and related investments, in the range of at least \$150 million to \$200 million on a pre-tax basis. These costs and the related benefits will be recognized as different actions are approved and implemented.

During the six months ended June 30, 2010, we recorded pre-tax restructuring charges of \$69.2 million, of which \$38.6 million related to severance and benefit costs, \$24.6 million related to other exit costs and \$1.4 million related to asset impairments associated with this program. The cumulative charges for this program from inception to June 30, 2010 were \$136.5 million. As of June 30, 2010, approximately 1,300 employee terminations have occurred under this program. The majority of the liability at June 30, 2010 is expected to be paid during the next twelve months from cash generated from operations.

Additional asset impairments, unrelated to restructuring, were also recorded in 2010 and relate to intangible assets of \$4.7 million.

Pre-tax restructuring reserves at June 30, 2010 for the restructuring actions taken in connection with the 2009 program are composed of the following:

	Balance at December 31, 2009	Expenses	Cash payments	Non-cash charges	Balance at June 30, 2010
Severance and benefit costs	\$ 45,895	\$ 38,568	\$ (30,990)	\$ -	\$ 53,473

**2007 Program**

We announced a program in November 2007 to lower our cost structure, accelerate efforts to improve operational efficiencies, and transition our product line. The program included charges primarily associated with older equipment that we had stopped selling upon transition to the new generation of fully digital, networked, and remotely-downloadable equipment.

The cumulative charges for this program from inception to June 30, 2010 were \$445.7 million. As of June 30, 2010, approximately 3,000 employee terminations have occurred under this program. The majority of the liability at June 30, 2010 is expected to be paid during the next six months from cash generated from operations.

Pre-tax restructuring reserves at June 30, 2010 for the restructuring program announced in November 2007 are composed of the following:

	Balance at December 31, 2009	Expenses	Cash payments	Non-cash charges	Balance at June 30, 2010
Severance and benefit costs	\$ 27,897	\$ -	\$ (11,276)	\$ -	\$ 16,621

As we previously disclosed in our Consolidated Financial Statements for the year ended December 31, 2009, we expect to contribute up to \$20 million to each of our U.S. and foreign pension plans during 2010. We will reassess our funding alternatives as the year progresses. At June 30, 2010, \$15.7 million and \$5.1 million of contributions have been made to the U.S. and foreign pension plans, respectively.

*Nonpension Postretirement Benefit Plans*

The components of net periodic benefit cost for nonpension postretirement benefit plans for the six months ended June 30, 2010 and 2009 are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009

Net periodic benefit cost	\$ 5,553	\$ 5,240	\$ 10,916	\$ 9,930

For the three months ended June 30, 2010 and 2009, we made \$5.8 million and \$5.5 million of contributions representing benefit payments, respectively. Contributions for benefit payments were \$13.2 million and \$13.4 million for the six months ended June 30, 2010 and 2009, respectively.

**15. Income Taxes**

The effective tax rate for the three months ended June 30, 2010 and 2009 was 33.9% and 34.9%, respectively. The effective tax rate for the six months ended June 30, 2010 and 2009 was 41.1% and 37.7%, respectively. The year-to-date 2010 rate was increased by \$9.1 million of tax charges related to the write-off of deferred tax assets as a result of the recent health care reform legislation in the U.S. This legislation, signed in March 2010, includes a provision eliminating the tax deduction for retiree health care costs to the extent of federal subsidies received by companies that provide retiree prescription drug benefits equivalent to Medicare Part D coverage. The tax rates for 2010 and 2009 included \$9.1 million and \$12.0 million, respectively, of tax charges related to the write-off of deferred tax assets associated with the expiration of out-of-the-money vested stock options and the vesting of restricted stock units previously granted to our employees. These write-offs of deferred

tax assets will not require us to pay any taxes. The 2010 rate also includes benefits and charges associated with previously unrecognized deferred taxes on outside basis differences and unremitted earnings.

We regularly assess the likelihood of tax adjustments in each of the tax jurisdictions in which we have operations and account for the related financial statement implications. Tax reserves have been established which we believe to be appropriate given the possibility

**PITNEY BOWES INC.**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**  
**(Unaudited; tabular dollars in thousands, except for per share data)**

of tax adjustments. Determining the appropriate level of tax reserves requires us to exercise judgment regarding the uncertain application of tax law. The amount of reserves is adjusted when information becomes available or when an event occurs indicating a change in the reserve is appropriate. Future changes in tax reserve requirements could have a material impact on our results of operations.

We are continually under examination by tax authorities in the United States, other countries and local jurisdictions in which we have operations. The years under examination vary by jurisdiction. The current IRS exam of tax years 2001-2004 is estimated to be completed within the next two years and the examination of years 2005-2008 has commenced. In connection with the 2001-2004 exam, we have received notices of proposed adjustments to our filed returns. Tax reserves have been established which we believe to be appropriate given the possibility of tax adjustments. We are also disputing a formal request from the IRS in the form of a civil summons to provide certain Company workpapers. We believe that certain documents being sought should not be produced because they are privileged. A variety of post-1999 tax years remain subject to examination by other tax authorities, including the U.K., Canada, France, Germany and various U.S. states. Tax reserves have been established which we believe to be appropriate given the possibility of tax adjustments. However, the resolution of such matters could have a material impact on our results of operations, financial position and cash flows.

During 2010, an analysis of prior year non-US income tax returns indicated that lease rental income associated with certain leveraged lease transactions was not properly captured. A tax expense of \$3.3 million related to the periods 2007 through 2009 was recorded in the provision for income taxes in the second quarter of 2010. A \$14.4 million adjustment, primarily related to the same issue, was made to opening retained earnings to establish the related tax liabilities for earlier years. The impact of the adjustments was not material to any previously reported period.

#### ***16. Fair Value Measurements***

The fair value measurement guidance established a fair value hierarchy that prioritizes the inputs used to measure fair value. The three levels of the fair value hierarchy are as follows:

Level 1 Unadjusted quoted prices in active markets for identical assets and liabilities. Examples of Level 1 assets include money market securities and U.S. Treasury securities.

Level 2 Observable inputs other than Level 1 inputs such as quoted prices for similar assets or liabilities; quoted prices in markets that trade infrequently; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Examples of Level 2 assets and liabilities include derivative contracts whose values are determined using a model with inputs that are observable in the market or can be derived from or corroborated by observable market data, such as mortgage-backed securities, asset backed securities, U.S. agency securities, and corporate notes and bonds.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the asset or liability. These inputs may be derived with internally developed methodologies that result in management's best estimate of fair value.

The following tables show, by level within the fair value hierarchy, our financial assets and liabilities that are accounted for at fair value on a recurring basis at June 30, 2010 and December 31, 2009, respectively. As required by the fair value measurements guidance, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement requires judgment and may affect their placement within the fair value hierarchy levels.

**Investment Securities**

For our investments, we use the market approach for recurring fair value measurements and the valuation techniques use inputs that are observable, or can be corroborated by observable data, in an active marketplace.

The following information relates to our classification into the fair value hierarchy:

*Money Market Funds / Commercial Paper:* Money market funds typically invest in government securities, certificates of deposit, commercial paper of companies and other highly liquid and low-risk securities. Money market funds are principally used for overnight deposits and are classified in Level 1 of the fair value hierarchy when unadjusted quoted prices in active markets are available for these securities or in Level 2 of the fair value hierarchy when they are not actively traded on an exchange. Direct investments in commercial paper are not listed on an exchange in an active market and are classified in Level 2 of the fair value hierarchy.

*Equity Securities:* Equity securities are comprised of mutual funds investing in U.S. and foreign common stock. These mutual funds are classified in Level 2 of the fair value hierarchy as they are not separately listed on an exchange. As a result, the funds are valued using quoted prices for similar assets.

*Debt Securities – U.S. and Foreign Governments, Agencies and Municipalities:* Debt securities valued using active, high volume trades for identical securities are classified in Level 1 of the fair value hierarchy. Valuation adjustments are not applied to these securities. Debt securities valued using quoted market prices for similar securities or benchmarking model derived prices to quoted market prices and trade data for identical or comparable securities are classified in Level 2 of the fair value hierarchy.

*Debt Securities – Corporate:* Corporate debt securities are valued using recently executed transactions, market price quotations where observable, or bond spreads. The spread data used are for the same maturity as the security. These securities are classified in Level 2 of the fair value hierarchy.

*Asset-Backed Securities ( ABS ) and Mortgage-Backed Securities ( MBS ):* These securities are valued based on external pricing indices. When external index pricing is not observable, ABS and MBS are valued based on external price/spread data. If neither pricing method is available, we then utilize broker quotes. We verify that the unadjusted indices or broker quotes are reasonable and that the market is active by comparing prices across multiple (three or more) dealers. When inputs are observable and supported by an active market, asset backed securities and mortgage-backed securities are classified as Level 2 of the fair value hierarchy.

Investment securities are largely composed of investments by The Pitney Bowes Bank (PBB). PBB, our wholly-owned subsidiary, is a Utah-chartered Industrial Loan Company (ILC). The bank's investments at June 30, 2010 were \$279.9 million. We reported these investments in the Condensed Consolidated Balance Sheets as cash and cash equivalents of \$121.2 million, short-term investments of \$18.0 million and long-term investments, which are presented within other assets, of \$140.7 million. The bank's investments at December 31, 2009 were \$222.4 million. We reported these investments in the Condensed Consolidated Balance Sheets as cash and cash equivalents of \$151.3 million, short-term investments of \$14.2 million and long-term investments, which are presented within other assets, of \$56.9 million.

We have not experienced any write-offs in our investment portfolio. The majority of our mortgage-backed securities are either guaranteed or supported by the U.S. government. Market events have not caused our money market funds to experience declines in their net asset value below \$1.00 dollar per share or to incur imposed limits on redemptions. We have no investments in inactive markets which would warrant a possible change in our pricing methods or classification within the fair value hierarchy. Further, we have no investments in auction rate securities.

**Derivative Instruments**

In the normal course of business, we are exposed to the impact of interest rate changes and foreign currency fluctuations. The company limits these risks by following established risk management policies and procedures, including the use of derivatives. We use derivatives to manage the related cost of debt and to limit the effects of foreign exchange rate fluctuations on financial results. We do not use derivatives for trading or speculative purposes.

As required by the fair value measurements guidance, we have incorporated counterparty risk into the fair value of our derivative assets and our credit risk into the value of our derivative liabilities. We derive credit risk from observable data related to credit default swaps. We have not seen a material change in the creditworthiness of those banks acting as derivative counterparties.

The valuation of our interest rate swaps is based on the income approach using a model with inputs that are observable or that can be derived from or corroborated by observable market data. Our foreign exchange derivatives are measured at fair value using observable market inputs, such as forward rates.

The following is a summary of our derivative fair values at June 30, 2010 and December 31, 2009:

Designation of Derivatives	Balance Sheet Location	Fair Value	
		June 30, 2010	December 31, 2009

	<b>Total Net Derivative Assets</b>	\$ 36,326	\$ 12,624

**Interest Rate Swaps**

Derivatives designated as fair value hedges include interest rate swaps related to fixed rate debt. Changes in the fair value of both the derivative and item being hedged are recognized in income.

In June 2009, we entered into an interest rate swap for an aggregate notional amount of \$100 million to effectively convert our interest payments on a portion of the \$400 million, 4.625% fixed rate notes due in 2012, into variable interest rates. The variable rates payable are based on one month LIBOR plus 249 basis points. In July 2009, we entered into three additional interest rate swaps for an aggregate notional amount of \$300 million to effectively convert our interest payments on the remainder of the \$400 million, 4.625% fixed rate notes due in 2012, into variable interest rates. The variable rates payable are based on one month LIBOR plus 248 basis points for \$100 million notional amount and one month LIBOR plus 250 basis points for \$200 million notional amount. At June 30, 2010, the fair value of the derivatives was an asset of \$10.1 million. Long-term debt was increased by \$10.1 million at June 30, 2010. At December 31, 2009, the fair value of the derivatives was an asset of \$4.7 million. Long-term debt was increased by \$4.7 million at December 31, 2009.

## Edgar Filing: PITNEY BOWES INC /DE/ - Form 10-Q

In March 2008, we entered into two interest rate swaps for an aggregate notional amount of \$250 million to effectively convert the fixed rate of 5.60% on \$250 million of our notes, due 2018, into variable interest rates. The variable rates payable by us are based on

six month LIBOR plus 111.5 basis points. At June 30, 2010, the fair value of the derivatives was an asset of \$23.9 million. Long-term debt was increased by \$23.9 million at June 30, 2010. At December 31, 2009, the fair value of the derivatives was an asset of \$8.6 million. Long-term debt was increased by \$8.6 million at December 31, 2009.

**Foreign Exchange Contracts**

We enter into foreign currency exchange contracts arising from the anticipated purchase of inventory between affiliates. These contracts are designated as cash flow hedges. The effective portion of the gain or loss on the cash flow hedges is included in other comprehensive income in the period that the change in fair value occurs and is reclassified to income in the same period that the hedged item is recorded in income. At June 30, 2010, we had 126 outstanding contracts with a notional amount of \$21.3 million associated with these anticipated transactions and a derivative net asset position of \$0.8 million. At December 31, 2009, we had 149 outstanding contracts with a notional amount of \$27.8 million associated with these anticipated transactions and a derivative net liability position of \$0.7 million.

The following represents the results of cash flow hedging relationships for the three months ended June 30, 2010 and 2009:

- (1) For the three months ended June 30, 2010, there were 6 derivatives that were entered into and settled within the quarter. For the six months ended June 30, 2010, there were 8 derivatives that were entered into and settled within each respective quarter. Thus, these amounts were not recorded to AOCI but were recorded directly to income. For the three and six months ended June 30, these derivatives increased revenue by less than \$0.1 million and decreased cost of sales by less than \$0.1 million.

For the three months ended June 30, 2009, there were 9 derivatives that were entered into and settled within the quarter. For the six months ended June 30, 2009, there were 16 derivatives that were entered into and settled within each respective quarter. Thus, these amounts were not recorded to AOCI but were recorded directly to income. For the three months ended June 30, these derivatives increased revenue in the amount of \$0.2 million and reduced cost of sales in the amount of \$0.3 million. For the six months ended June 30, 2009 these derivatives reduced revenue in the amount of \$0.1 million and increased cost of sales in the amount of \$0.3 million.

As of June 30, 2010, \$0.9 million of the \$0.8 million net derivative gain recognized in AOCI will be recognized in income within the next 12 months.

No amount of ineffectiveness was recorded in the Condensed Consolidated Statements of Income for these designated cash flow hedges.

We also enter into foreign exchange contracts to minimize the impact of exchange rate fluctuations on intercompany loans and related interest that are denominated in a foreign currency. The revaluation of the short-term intercompany loans and interest and the mark-to-market on the derivatives are both recorded to income. At June 30, 2010, we had 22 outstanding foreign exchange contracts to buy or sell various currencies with a net asset value of \$1.5 million. The contracts will mature by September 30, 2010. At December 31, 2009, the net liability value of these derivatives was less than \$0.1 million.

***Credit-Risk-Related Contingent Features***

Certain of our derivative instruments contain provisions that would require us to post collateral upon a significant downgrade in our long-term senior unsecured debt ratings. At June 30, 2010, our long-term senior unsecured debt ratings were A / A1. Based on derivative values at June 30, 2010, we would have been required to post \$1.1 million in collateral only if our long-term senior unsecured debt ratings had fallen below BB- / Ba3.

On August 5, 2010, one of our credit rating services revised our long-term senior unsecured debt rating from A to BBB+. As a result, our requirement to post collateral remained unchanged.

**Fair Value of Financial Instruments**

The estimated fair value of our financial instruments follows:

	June 30, 2010		December 31, 2009	
	Carrying value (1)	Fair value	Carrying value (1)	Fair value
Investment securities	\$ 423,200	\$ 427,488	\$ 360,800	\$ 361,845
Loans receivable	\$ 449,068	\$ 449,068	\$ 478,191	\$ 478,191
Derivatives, net	\$ 36,326	\$ 36,326	\$ 12,624	\$ 12,624
Long-term debt	\$ (4,291,563)	\$ (4,553,871)	\$ (4,271,555)	\$ (4,409,961)

(1) Carrying value includes accrued interest and deferred fee income, where applicable.

The fair value of long-term debt is estimated based on quoted dealer prices for the same or similar issues. The carrying value for cash, cash equivalents, accounts receivable, loans receivable, accounts payable and notes payable approximate fair value because of the short maturity of these instruments.

***17. Commitments and Contingencies***

In the ordinary course of business, we are routinely defendants in or party to a number of pending and threatened legal actions. These may involve litigation by or against us relating to, among other things, contractual rights under vendor, insurance or other contracts; intellectual property or patent rights; equipment, service, payment or other disputes with customers; or disputes with employees. Some of these actions may be brought as a purported class action on behalf of a purported class of employees, customers or others.

Our wholly-owned subsidiary, Imagitas, Inc., was a defendant in ten purported class actions filed in six different states. These lawsuits have been coordinated in the United States District Court for the Middle District of Florida, In re: Imagitas, Driver's Privacy Protection Act Litigation (Coordinated, May 28, 2007). Each of these lawsuits alleged that the Imagitas DriverSource program violated the federal Drivers Privacy Protection Act (DPPA). Under the DriverSource program, Imagitas entered into contracts with state governments to mail out automobile registration renewal materials along with third party advertisements, without revealing the personal information of any state resident to any advertiser. The DriverSource program assisted the state in performing its governmental function of delivering these mailings and funding the costs of them. The plaintiffs in these actions were seeking statutory damages under the DPPA. On April 9, 2008, the District Court granted Imagitas motion for summary judgment in one of the coordinated cases, Rine, et al. v. Imagitas, Inc. (United States District Court, Middle District of Florida, filed August 1, 2006). On July 30, 2008, the District Court issued a final judgment in the Rine lawsuit and stayed all of the other cases filed against Imagitas pending an appellate decision in Rine. On August 27, 2008, the Rine plaintiffs filed an appeal of the District Court's decision in the United States Court of Appeals, Eleventh Judicial Circuit (the Circuit Court). On December 21, 2009, the Circuit Court affirmed the District Court decision. On February 22, 2010, the Circuit Court denied the Rine plaintiffs petition for rehearing en banc. The Rine plaintiffs ability to pursue further review of this decision has expired. With respect to the remaining stayed cases, the District Court held a status conference and set forth a briefing schedule for Imagitas to file its motion to dismiss these cases.

We expect to prevail in the lawsuits against Imagitas; however, as litigation is inherently unpredictable, there can be no assurance in this regard. If the plaintiffs do prevail, the results may have a material effect on our financial position, future results of operations or cash flows, including, for example, our ability to offer certain types of goods or services in the future.

## Edgar Filing: PITNEY BOWES INC /DE/ - Form 10-Q

On October 28, 2009, the Company and certain of our current and former officers, were named as defendants in NECA-IBEW Health & Welfare Fund v. Pitney Bowes Inc. et al., a class action lawsuit filed in the U.S. District Court for the District of Connecticut. The complaint asserts claims under the Securities Exchange Act of 1934 on behalf of those who purchased the common stock of the

Company during the period between July 30, 2007 and October 29, 2007 alleging that the company, in essence, missed two financial projections. We believe this case is without merit and intend to defend it vigorously.

*Product Warranties*

We provide product warranties in conjunction with certain product sales, generally for a period of 90 days from the date of installation. Our product warranty liability reflects our best estimate of probable liability for product warranties based on historical claims experience, which has not been significant, and other currently available evidence. Accordingly, our product warranty liability at June 30, 2010 and December 31, 2009, respectively, was not material.

**Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations**

Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) contains statements that are forward-looking. These statements are based on current expectations and assumptions that are subject to risks and uncertainties. Actual results could differ materially because of factors discussed in Forward-Looking Statements and elsewhere in this report.

The following analysis of our financial condition and results of operations should be read in conjunction with Pitney Bowes' Condensed Consolidated Financial Statements contained in this report and Pitney Bowes' Form 10-K for the year ended December 31, 2009.

**Forward-Looking Statements**

We want to caution readers that any forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 in this Form 10-Q may change based on various factors. The future is difficult to predict. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. These forward-looking statements are those which talk about our current expectations as to the future and include, but are not limited to, statements about the transformation initiatives, and amounts, timing and results of possible restructuring charges and future earnings or risks. Words such as estimate, target, project, plan, believe, expect, anticipate, intend, and similar expressions may identify such forward-looking statements. Some of the factors which could cause future financial performance to differ materially from the expectations as expressed in any forward-looking statement made by or on our behalf include, without limitation:

- negative developments in economic conditions, including adverse impacts on customer demand
- changes in postal or banking regulations
- timely development and acceptance of new products
- success in gaining product approval in new markets where regulatory approval is required
- successful entry into new markets
- mailers' utilization of alternative means of communication or competitors' products
- our success at managing customer credit risk
- our success at managing costs associated with our strategy of outsourcing functions and operations not central to our business
- changes in interest rates
- foreign currency fluctuations
- cost, timing and execution of our transformation plans including any potential asset impairments
- regulatory approvals and satisfaction of other conditions to consummation and integration of any acquisitions
- interrupted use of key information systems
- changes in international or national political conditions, including any terrorist attacks
- intellectual property infringement claims
- impact on mail volume resulting from current concerns over the use of the mail for transmitting harmful biological agents
- third-party suppliers' ability to provide product components, assemblies or inventories
- negative income tax adjustments or other regulatory levies for prior audit years and changes in tax laws or regulations
- changes in pension, healthcare and retiree medical costs

**Overview**

For the second quarter, revenue was \$1.3 billion, a decrease of 6% compared to the prior year. The decrease is due largely to continued weak business conditions.

Pitney Bowes net income was \$61.4 million or \$0.30 per diluted share in the second quarter of 2010 as compared with \$117.3 million or \$0.57 earnings per diluted share in the second quarter of 2009. Pitney Bowes net income in the second quarter of 2010 included a one-time charge of 5 cents per diluted share primarily to correct rates used to estimate unbilled International Mail Services revenue in prior periods, after-tax charges for restructuring charges and asset impairments of 15 cents per diluted share, a tax charge totaling 2 cents per diluted share associated with certain of our leveraged lease transactions and a less than 1 cent charge per diluted share for out-of-the-money stock options that expired during the quarter. Pitney Bowes net income in the second quarter of 2010 also included a 1 cent per diluted share loss associated with discontinued operations.

Despite a decline in revenue for the quarter in six of our seven business segments, EBIT increased in four of our seven business segments when compared to the second quarter of 2009 due to our ongoing productivity investments and cost reduction initiatives. We generated \$118 million of cash flow from operating activities compared to \$207 million for the same period in the prior year. Cash flow from operations was negatively impacted by higher restructuring and tax payments.

## Edgar Filing: PITNEY BOWES INC /DE/ - Form 10-Q

See Results of Operations Second Quarter of 2010 Compared to Second Quarter of 2009 for a more detailed discussion of our results of operations.

### Outlook

Some economic and business indicators in a broad range of industries continue to be weak. These factors have impacted our financial results and in particular some of our recurring revenue streams, including our relatively high-margin financing, rental, and supplies revenue streams. While we have been successful in reducing our cost structure across the entire business and shifting to a more variable cost structure, these actions have not been enough to offset the impact of lower revenues.

We continue to expect our mix of revenue to change, with a greater percentage of revenue coming from diversified revenue streams associated with fully featured smaller systems and a smaller percentage from larger system sales. We expect that our future results will continue to be impacted by changes in global economic conditions and their impact on mail intensive industries. It is not expected that total mail volumes will rebound to prior peak levels in an economic recovery, and future mail volume trends will continue to be a factor for our businesses.

The global economy and business environment have not stabilized or improved as quickly as we originally anticipated. We noted a deterioration in conditions as the second quarter progressed, particularly among the customers in our Small and Medium Business Solutions segment group. Contrary to previous expectations and based on the current economic outlook, we do not expect the business environment to improve as significantly as we previously expected in the second half of the year.

#### *Business segment results*

The following table shows revenue and earnings before interest and taxes ( EBIT ) for the three months ended June 30, 2010 and 2009 by business segment. We use EBIT, a non-GAAP measure, to determine our segment profitability. Refer to the reconciliation of segment amounts to income from continuing operations before income taxes in Note 6 to the Condensed Consolidated Financial Statements.

Prior year results have been reclassified to conform to the current year presentation. Refer to Note 6 to the Condensed Consolidated Financial Statements for further detail on these changes.

During the second quarter of 2010, Small & Medium Business Solutions revenue decreased 6% to \$683 million and EBIT decreased 11% to \$196 million, compared to the prior year. Within Small & Medium Business Solutions:

## Edgar Filing: PITNEY BOWES INC /DE/ - Form 10-Q

U.S. Mailing revenue and EBIT decreased 8% and 13%, respectively, primarily due to lower sales revenue, rental revenue, and the lower levels of finance receivables and related financing revenue. The decline in the finance receivables portfolio was due to reduced equipment sales in prior periods.

## Edgar Filing: PITNEY BOWES INC /DE/ - Form 10-Q

International Mailing revenue decreased 1%, which includes the favorable impact of foreign currency translation of 1%. The continued weak economic environment in many countries negatively impacted the demand for our products and services and as a result many customers are delaying making purchase decisions for new mailing systems. International Mailing EBIT, however, increased 9% to \$29.6 million, partially driven by our initiatives to improve productivity and consolidate administrative functions.

During the second quarter of 2010, Enterprise Business Solutions revenue decreased 6% to \$614 million. EBIT decreased 16% to \$50 million, compared to the prior year. Within Enterprise Business Solutions:

Production Mail revenue decreased 7% due to lower equipment sales in the U.S., Canada and certain European countries due to the timing of installations of inserting equipment and related software and as economic uncertainty continues to delay large-ticket capital expenditures for many large enterprises worldwide. Foreign currency translation had an unfavorable impact of 1% on revenue. Production Mail's EBIT decreased to \$9.0 million compared to \$10.4 million in the prior year due to the lower revenue compared to the prior year.

Software revenue decreased 2% which includes a favorable impact of foreign currency translation of 1% due primarily to the continued transition to annuity-based pricing for some software solutions. We plan to continue to expand our software-as-a-service offerings and recurring revenue streams from term licenses. Software EBIT increased 11% to \$5.8 million, despite the lower revenue, primarily due to our efforts to integrate our operations and focus our product offerings.

Management Services revenue decreased 6%, which includes the unfavorable impact of foreign currency translation of 1%. Revenue was adversely impacted by lower business activity in prior periods and decreased print and transaction volumes. Management Services EBIT, however, increased by 37% primarily due to the positive result of our actions to align costs with changing volumes through a more variable cost infrastructure, ongoing productivity initiatives, and a focus on more profitable contracts.

Mail Services revenue decreased 9% to \$126.2 million and EBIT decreased 75% to \$5.4 million. This business continues to process increasing volumes of presort mail and diversify its mix of mail as it grows Standard Class mail volumes. However, revenue growth and margin for the segment were adversely impacted by an adjustment made in its International Mail Services portion of the business. During the quarter, we recorded a one-time out of period adjustment, primarily related to the correction of rates used previously to estimate earned but unbilled revenue for the periods 2007 through the first quarter 2010. The aggregate adjustment for this period reduced second quarter revenue and EBIT by approximately \$21 million and \$16 million respectively, but the impact of this adjustment was not material on any individual quarter or year during these periods and not material to anticipated 2010 results.

Marketing Services revenue increased 7% primarily due to increased vendor advertising revenue for the Movers Source kits. Marketing Services EBIT increased 30% due to the increased revenue and ongoing productivity initiatives.

### *Revenue by source*

The following table shows revenue by source for the three months ended June 30, 2010 and 2009:

	Three Months Ended June 30,		
	2010	2009	% change
Equipment sales	\$ 230,235	\$ 257,196	(10)%
Supplies	77,054	81,973	(6)%
Software	86,151	87,380	(1)%
Rentals	150,141	156,151	(4)%
Financing	156,604	174,508	(10)%
Support services	175,298	179,246	(2)%
Business services	421,754	442,008	(5)%
Total revenue	\$ 1,297,237	\$ 1,378,462	(6)%

Equipment sales revenue decreased 10% compared to the prior year due to lower placements of mailing and production mail equipment worldwide. Equipment sales revenue also continues to be adversely affected by the ongoing changing mix in equipment placements to more fully featured smaller systems.

## Edgar Filing: PITNEY BOWES INC /DE/ - Form 10-Q

Supplies revenue decreased 6% compared to the prior year due to lower supplies usage resulting from lower mail volumes and fewer installed meters in the U.S. and internationally. Foreign currency translation had less than a 1% unfavorable impact.

Software revenue decreased 1% compared to the prior year. Foreign currency translation had less than a 1% positive impact compared to the prior year. Revenue has been negatively impacted as many businesses continued to delay certain capital spending worldwide as well as the impacts of expansion of our software-as-a-service offerings.

Rentals revenue decreased 4% compared to the prior year as a result of fewer equipment sales and meter rental placements in prior periods. The impact from foreign currency translation was less than 1% positive impact to the period.

Financing revenue decreased 10% compared to the prior year. Lower equipment sales over the prior periods have resulted in a decline in our U.S. and international lease portfolios. Foreign currency translation had a favorable impact of 1%.

Support services revenue decreased 2% compared to the prior year principally driven by lower new equipment placements. The impact of foreign currency translation was less than 1% positive impact to the period.

Business services revenue decreased 5% compared to the prior year primarily due to lower net new business, print and transaction volumes at Management Services and the impact of the one-time out of period adjustment in our International Mail Services business. Foreign currency translation was less than 1% negative impact to the period.

Research and development	\$ 38,168	\$ 46,622	2.9%	3.4%

Cost of equipment sales as a percentage of revenue was 44.7% in the second quarter of 2010 compared with 47.0% in the prior year, primarily due to margin improvements in U.S. Mailing and Canada.

Cost of supplies as a percentage of revenue was 31.4% in the second quarter of 2010 compared with 26.1% in the prior year primarily due to the increasing mix of lower margin product sales worldwide.

Cost of software as a percentage of revenue was 22.4% in the second quarter of 2010 compared with 24.7% in the prior year due to revenue mix and impacts of ongoing productivity initiatives.

Cost of rentals as a percentage of revenue was 22.9% in the second quarter of 2010 compared with 24.3% in the prior year. Rental margins have been positively impacted by a higher level of lease extensions.

Financing interest expense as a percentage of revenue was 13.9% in the second quarter of 2010 compared with 14.6% in the prior year primarily due to lower borrowing costs. In computing our financing interest expense, which represents our cost of borrowing associated with the generation of financing revenues, we assumed a 10:1 leveraging ratio of debt to equity and applied our overall effective interest rate to the average outstanding finance receivables.

Cost of support services as a percentage of revenue was 63.7% in the second quarter of 2010 compared with 67.1% in the prior year. Improvements in our U.S. Mailing and International Mailing segments were driven by the positive impacts of ongoing productivity initiatives.

## Edgar Filing: PITNEY BOWES INC /DE/ - Form 10-Q

Cost of business services as a percentage of revenue was 80.1% in the second quarter of 2010 compared with 78.2% in the prior year. The positive impacts of cost reduction programs in our Management Services and Mail Services businesses were offset by the one-time adjustment associated with our International Mail Services businesses.

Selling, general and administrative ( SG&A ) expenses as a percentage of revenue was 32.9% in the second quarter of 2010 compared with 31.3% in the prior year. SG&A expense declined \$4.7 million compared to the prior year but was adversely impacted by the lower revenue in the current year.

Research and development expenses decreased \$8.5 million from the prior year. The decline in overall spending is due to the wind-down of redundant costs related to our transition to offshore development capabilities and the launch of the new Connect+™ mailing system. Research and development expenses as a percentage of total revenue was 2.9% in the second quarter of 2010 compared with 3.4% in the prior year.

Business services	863,399	896,737	(4)%
Total revenue	\$ 2,645,470	\$ 2,758,046	(4)%

Equipment sales revenue decreased 4% compared to the prior year due to lower placements of mailing equipment as more customers have delayed purchases of new equipment and extended their leases on existing equipment due to the economic conditions. Revenue also continues to be adversely affected by the ongoing changing mix in equipment placements to more fully featured smaller systems. Foreign currency translation had a favorable impact of 2%.

Supplies revenue decreased 5% compared to the prior year due to lower supplies usage resulting from lower mail volumes and fewer installed meters due to customer consolidations in the U.S. and internationally. Foreign currency translation had a favorable impact of 2%.

Software revenue increased 1% compared to the prior year primarily due to favorable foreign currency translation of 3%. Revenue growth is impacted by the expansion of our software-as-a-service offerings and recurring revenue streams from term leases.

Rentals revenue decreased 6% compared to the prior year as customers in the U.S. continue to downsize to smaller, fully featured machines. The weak economic conditions have also impacted our international rental markets, specifically in Canada and France. Foreign currency translation had a favorable impact of 1%.

Financing revenue decreased 11% compared to the prior year. Lower equipment sales over the past year have resulted in a decline in both our U.S. and international lease portfolios. Foreign currency translation had a favorable impact of 2%.

Support services revenue increased less than 1% compared to the prior year. Favorable foreign currency translation of 2%, offset lower revenues in the U.S. and parts of Europe.

Business services revenue decreased 4% compared to the prior year. Lower volumes at Management Services and the impact of the one-time out of period adjustment in our International Mail Services business more than offset the increase in mail volumes processed at Mail Services. Foreign currency translation had less than a 1% favorable impact.

Cost of equipment sales as a percentage of revenue was 44.5% in the first six months of 2010 compared with 46.0% in the prior year, primarily due to favorable mix of higher margin mailing equipment in the U.S. and International.

## Edgar Filing: PITNEY BOWES INC /DE/ - Form 10-Q

Cost of supplies as a percentage of revenue was 30.5% in the first six months of 2010 compared with 26.3% in the prior year due the unfavorable mix of lower margin products sales.

Cost of software as a percentage of revenue was 23.6% in the first six months of 2010 compared with 24.6% in the prior year. This favorable impact is due to business integration measures and productivity investments.

Cost of rentals as a percentage of revenue was 23.4% in the first six months of 2010 compared with 22.8% in the prior year due to the fixed costs associated with meter depreciation and lower revenues.

Financing interest expense as a percentage of revenue was 13.7% in the first six months of 2010 compared with 14.0% in the prior year primarily due to lower borrowing costs.

Cost of support services as a percentage of revenue was 63.7% in the first six months of 2010 compared with 67.2% in the prior year due to margin improvements in U.S. Mailing and International Mailing driven by the positive impacts of ongoing productivity investments.

Cost of business services as a percentage of revenue was 77.4% in the first six months of 2010 compared with 77.9% in the prior year. This is due to the positive impacts of cost reduction programs at our Management Services and Mail Services businesses, partly offset by lower volumes of higher margin print and transaction activity which has negatively impacted Management Services.

Selling, general and administrative ( SG&A ) expenses as a percentage of revenue was 32.9% in the first six months of 2010 compared with 32.0% in the prior year. SG&A expense declined \$11.8 million and was negatively impacted by foreign currency translation of 2%.

Research and development expenses decreased \$14.5 million in the first six months of 2010 from the prior year. Foreign currency translation had a negative impact of 1%. The decline in overall spending is due to the wind down of redundant costs related to our transition to offshore development capabilities and the launch of the new Connect+™ mailing system. Research and development expenses as a percentage of total revenue was 3.0% for the first six months of 2010 compared to 3.4% in the prior year.

Other interest expense decreased \$0.4 million or 1% in the first six months of 2010 compared to the prior year primarily due to lower interest rates.			

**Income taxes**

The effective tax rate for the six months ended June 30, 2010 and 2009 was 41.1% and 37.7%, respectively. The year-to-date 2010 rate was increased by \$9.1 million of tax charges related to the write-off of deferred tax assets as a result of the recent health care reform legislation in the U.S. This legislation, signed in March 2010, includes a provision eliminating the tax deduction for retiree health care costs to the extent of federal subsidies received by companies that provide retiree prescription drug benefits equivalent to Medicare Part D coverage. The tax rates for 2010 and 2009 included \$9.1 million and \$12.0 million, respectively, of tax charges related to the write-off of deferred tax assets associated with the expiration of out-of-the-money vested stock options and the vesting of restricted stock units previously granted to our employees. These write-offs of deferred tax assets will not require us to pay any taxes. The 2010 rate also includes benefits and charges associated with previously unrecognized deferred taxes on outside basis differences and unremitted earnings..

See Note 4 to the Condensed Consolidated Financial Statements.

**Noncontrolling interests (Preferred stock dividends of subsidiaries)**

See Note 11 to the Condensed Consolidated Financial Statements.

**Liquidity and Capital Resources**

We believe that cash flow from operations, existing cash and liquid investments, as well as borrowing capacity under our commercial paper program, our existing credit facility and debt capital markets should be sufficient to finance our capital requirements and to cover our customer deposits. Our potential uses of cash include but are not limited to the following: growth and expansion opportunities; internal investments; customer financing; restructuring payments; tax payments; interest and dividend payments; pension and other benefit plan funding; acquisitions; and share repurchase program.

We continue to review our liquidity profile. We have carefully monitored for material changes in the creditworthiness of those banks acting as derivative counterparties, depository banks or credit providers to us through credit ratings and the credit default swap market. We have determined that there has not been a material variation in the underlying sources of cash flows currently used to finance the operations of the company. To date, we have had consistent access to the commercial paper market.

**Cash Flow Summary**

The change in cash and cash equivalents is as follows:

(Dollars in thousands)	<b>Six Months Ended June 30,</b>	
	<b>2010</b>	<b>2009</b>
Net cash provided by operating activities	<b>\$ 423,802</b>	\$ 483,387
Net cash used in investing activities	<b>(136,067)</b>	(89,520)
Net cash used in financing activities	<b>(232,423)</b>	(331,187)
Effect of exchange rate changes on cash and cash equivalents	<b>(8,598)</b>	5,911
Increase in cash and cash equivalents	<b>\$ 46,714</b>	\$ 68,591

**2010 Cash Flows**

Net cash provided by operating activities consists primarily of net income adjusted for non-cash items and changes in operating assets and liabilities. Cash provided by operating activities included decreases in finance receivable and accounts receivable balances of \$125.6 million and \$95.0 million, respectively. The decrease in finance receivables is due to the decline in the finance receivables portfolio as a result of reduced equipment sales from prior periods. The decrease in accounts receivable is primarily due to lower billings and strong collections. Partially offsetting these factors was an increase in inventory of \$31.8 million, timing of tax payment and \$66.8 million in restructuring payments.

Net cash used in investing activities consisted principally of capital expenditures of \$58.6 million.

Edgar Filing: PITNEY BOWES INC /DE/ - Form 10-Q

Net cash used in financing activities included a decrease of \$77.3 million of commercial paper and dividends paid to common stockholders of \$151.4 million for the six months ended June 30, 2010.

*2009 Cash Flows*

Net cash provided by operating activities consists primarily of net income adjusted for non-cash items and changes in operating assets and liabilities. Cash provided by operating activities included decreases in finance receivables and accounts receivable balances of \$165.1 million and \$99.0 million, respectively, resulting from lower levels of new business and strong collections. Partially offsetting these factors was a reduction in accounts payable and accrued liabilities of \$167.6 million, primarily due to lower compensation accruals as well as \$49.1 million in restructuring payments associated with the prior year cost reduction initiatives and a \$20.3 million payment for the unwinding of derivatives related to the March 2009 debt issuance.

Net cash used in investing activities consisted principally of capital expenditures of \$90.2 million.

Net cash used in financing activities consisted primarily of a decrease in notes payable of \$476.1 million due to the repayment of commercial paper, which was partially offset by the proceeds from long term obligations of \$297.5 million related to the March 2009 debt issuance. Dividends paid to stockholders were \$148.6 million for the six months ended June 30, 2009.

***Capital Expenditures***

During the first six months of 2010, capital expenditures included \$26.2 million in net additions to property, plant and equipment and \$32.4 million in net additions to rental equipment and related inventories compared with \$45.2 million and \$45.0 million, respectively, in the same period in 2009. The decrease in capital expenditures is due to lower placement of new postage meters and tighter control over capital spending.

***Financings and Capitalization***

We have a commercial paper program that is a significant source of liquidity for the Company. During 2010, we have continued to have consistent access to the commercial paper market. As of June 30, 2010, we had \$143 million of outstanding commercial paper issuances. We also have a committed line of credit which supports commercial papers issuance and is provided by a syndicate of 15 banks until 2013. In May 2010, we renewed our line of credit for \$1.25 billion. As of June 30, 2010, this line of credit had not been drawn down. We are a Well-Known Seasoned Issuer with the SEC which allows us to issue debt securities, preferred stock, preference stock, common stock, purchase contracts, depositary shares, warrants and units in an expedited fashion.

We believe our financing needs in the short and long-term can be met from cash generated internally, the issuance of commercial paper, debt issuance under our effective shelf registration statement and borrowing capacity under our existing credit agreements.

**Recent Accounting Pronouncements**

See Note 3 to the Condensed Consolidated Financial Statements.

**Regulatory Matters**

With exception of the impact of the U.S. health care reform legislation disclosed in Note 15 to the Condensed Consolidated Financial Statements, there have been no significant changes to the regulatory matters disclosed in our 2009 Annual Report on Form 10-K.

**Item 3: Quantitative and Qualitative Disclosures about Market Risk**

There were no material changes to the disclosures made in the Annual Report on Form 10-K for the year ended December 31, 2009 regarding this matter.

**Item 4: Controls and Procedures**

Disclosure controls and procedures are designed to reasonably assure that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures are also designed to reasonably assure that such information is accumulated and communicated to our management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), as appropriate to allow timely decisions regarding required disclosure.

Under the direction of our CEO and CFO, we evaluated the effectiveness of our disclosure controls and procedures and internal control over financial reporting. The CEO and CFO concluded that our disclosure controls and procedures were effective as of June 30, 2010. In addition, no changes in internal control over financial reporting occurred during the three months ended June 30, 2010, that have materially affected, or are reasonably likely to materially affect, such internal control over financial reporting. It should be noted that any system of controls is based in part upon certain assumptions designed to obtain reasonable (and not absolute) assurance as to its effectiveness, and there can be no assurance that any design will succeed in achieving its stated goals. Notwithstanding this caution, the disclosure controls and procedures are designed to provide reasonable assurance of achieving their stated objectives, and the CEO and CFO have concluded that the disclosure controls and procedures are effective at that reasonable assurance level.
