MARKET VECTORS HARD ASSETS ETFs

Dear Shareholder:

Market Vectors is an industry leader in offering exchange-traded funds (ETFs) for a wide range of hard asset producer stocks. In 2012, we increased our family of hard assets ETFs to twelve funds with the February launch of Market Vectors Unconventional Oil & Gas ETF (FRAK), the first ETF dedicated to this space. Additionally, we reduced the expenses for our RVE Hard Assets Producers ETF (HAP).

Unconventional Energy

Unlike several other ETFs in our family that focus on producers of an underlying commodity, FRAK is based on a theme - unconventional energy production. Initially, most unconventional energy producers were engaged in developing the vast “shale fields” in the U.S. for natural gas reserves. However, innovations in this industry converged in 2012 to help unconventional producers greatly increase yields of crude oil. In fact, the U.S. Department of Energy recently reported that total U.S. oil production increased by more than one million barrels per week in 2012, and our country is now meeting 83% of its energy needs, the highest level since 1991.¹ In November, the International Energy Agency forecast that the U.S. will surpass Saudi Arabia as the world’s largest oil producer by 2020, in part because of unconventional drilling.² Looking at the progress made in the U.S., we believe there is great potential for unconventional energy globally.

US Oil and Gas Production

Source: OECD/IEA 2012

Expense Reduction

We continually review our ETFs for opportunities to make them more cost-efficient for investors. As a result, we announced in February the reduction of the expense cap of RVE Hard Assets Producers ETF (HAP).

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSR

HAP is a broad-based ETF that can serve as the core of any natural resources investment allocation, and we expect the cost reduction will make HAP a more attractive option for long-term investors. The expense cap was reduced from 0.59% to 0.49% on a contractual basis until at least May 1, 2013. As is typically the case, interest expenses and certain other expenses are excluded from the expense cap.

MARKET VECTORS HARD ASSETS ETFs

We will continue to evaluate and identify the most attractive opportunities in the hard assets space. Please contact us at 1.888.MKT.VCTR or visit marketvectorsetfs.com if you have any questions. We value your ongoing confidence in us and look forward to helping you meet your investment goals in the future.

Jan F. van Eck
Trustee and President
Market Vectors ETF Trust

MANAGEMENT DISCUSSION*Hard Assets Market Overview*

The most comprehensive index in the hard asset producer space is the *Rogers*TM-Van Eck Hard Assets Producer Index (RVEIT), which includes equities of the world's largest and most prominent hard assets producers. For the year ending December 31, 2012, the index returned 8.59%.

The table below shows average sector weightings within this index and full year 2012 total return of each sector.

RVEIT Sector	Average Sector Weight		2012 Total Return
Energy	40.66	%	4.00 %
Agriculture	31.92	%	18.69 %
Base/industrial metals	13.00	%	7.19 %
Precious metals	6.57	%	-12.32%
Paper & forest products	4.13	%	29.86 %
Alternatives	3.98	%	10.50 %

Source: Van Eck Global, S-Network Global Indexes, LLC

Five of the six sectors – all except precious metals – had positive full year total returns. Agriculture, led by chemical and fertilizer companies, was a key driver of index performance. Energy, the largest sector by weight, had the lowest positive total return. This underperformance was driven in part by crude oil prices, which peaked for the year in February.

The graph below shows month-by-month performance of the index. After a strong start in January and February, the index declined in March, April and May – largely based on forecasts for slowing global growth and falling oil prices. Hard assets then rallied in the summer months on the strength of agriculture. After modest declines in October and November, a rebound in China's growth prospects drove positive performance in December.

Monthly Returns of the *Rogers*TM-Van Eck Hard Assets Producer Index in 2012

3

MARKET VECTORS HARD ASSETS ETFs

In summary, 2012 demonstrated the benefit of diversifying hard asset investments among several sectors of producer stocks. Although agriculture drove index performance in 2012 and precious metals lagged, the pattern could be different in other years. Diversification can be increased by mixing several Market Vectors ETFs or by participating in HAP, the family's multi-sector ETF.

Agribusiness

The sector's strong performance was driven by drought conditions across many crop-producing regions of the globe, and also by sharply rising prices for key agricultural commodities during the summer. Companies that directly support farmers with products such as seed, fertilizer and farm equipment led agribusiness stock performance in 2012.³

Coal

Coal stocks performed poorly in 2012 due to declining commodity prices, environmental concerns, and the substitution of cheap U.S. natural gas for coal as an industrial and electricity-generating fuel. Coal stock performance began to stabilize in the second half of the year based on positive catalysts, including: 1) declining coal production⁴; 2) rising natural gas prices from a 13-year low point touched in April of 2012,⁵ and an apparent uptick in China's economy in the fourth quarter.

Global Alternative Energy

Global alternative energy stocks began 2012 with a sharp decline but finished the year strong. The economies of producing electricity through wind, solar or water power are not competitive with natural gas priced at below about \$4 per thousand cubic feet, where they have been in the U.S. since late 2011. The modest rise in natural gas prices in the second half of 2012 was a positive factor for alternative energy, as was President Obama's reelection, with its potential for "green energy" policies.

Gold Miners

Although gold bullion increased by 7% in 2012 and it was bullion's twelfth straight up year, gold stocks continued to lag well behind the metal. The more volatile junior miners, which usually focus on developing a single mine prospect, underperformed the broad gold mining industry benchmark for the full year. Investors expressed broad

disappointment with mining companies' performance, especially earnings misses caused by rising mine costs and excessive capital spending. As a result, mining companies have begun retrenching, cutting capital investments, and focusing more intently on the bottom line.

Oil Services

Oil services was among the weakest performing industries in the S&P 500* in 2012, and the catalysts behind the under-performance were varied. After peaking at \$109 per barrel in February, WTI crude prices fell to \$78 over the next four months.⁷ In December, industry leader Schlumberger's (19.0% of Fund net assets) shares declined behind a surprising miss on fourth quarter earnings. The company's onshore drilling activities in the U.S. and Canada fell below expectations, based partly on oversupply of drilling equipment in shale gas fields.⁸ As offshore oil drilling moves into deeper waters, oil services companies are being forced to spend more heavily on research and development and environmental compliance. One bright spot for the industry came near yearend, when Transocean Ltd. (4.9% of Fund net assets) reached a settlement with the U.S. Justice Department for its role in the 2010 Deepwater Horizon spill, lifting its shares.⁹

Rare Earth and Strategic Metals

Rare earths and strategic metals are used in making a variety of products, ranging from flat screen TVs and iPads to military systems and “clean technologies.” China is the dominant supplier of rare earths and also their largest consumer. In 2011, China announced cuts in its export quotas of rare earths, and this caused other countries to announce plans for increasing production. Malaysia recently began a new rare earth refinery that will become the first located outside China in many years. Concerns over excess production caused a sharp decline in producer stocks in the first half of 2012. However, prices stabilized toward yearend, based in part on prospects for an economic rebound in China.

Hard Assets Producers

Among diversified hard assets producer sectors, paper and forest products and agriculture were the strongest performers in 2012, and precious metals was the weakest. The energy and agriculture sectors had the highest average weightings in the *Rogers*TM-Van Eck Hard Assets Producer Index in 2012 at 40.66% and 31.92%, respectively. Yet they produced quite different return profiles.

Solar Energy

For several years, solar energy equipment makers have faced oversupply conditions and compressed profit margins in a fiercely competitive global market. Concerned over China’s subsidies for its large solar industry, the U.S. Government imposed trade tariffs on Chinese solar equipment in October. The European Union is considering a similar response.¹⁰ Solar stock performance improved toward yearend, partially due to an upbeat report on the sector’s growth by the Solar Energy Industries Association. The report indicated that the U.S. solar industry installed a total of 1,992 megawatts in the first three quarters of 2012, more than in all of 2011. The group also reported that solar installations are booming in China.¹¹

Steel

Steel is among the most cyclical of all hard assets based on demand for automobiles, manufacturing and construction. Due to manufacturing overcapacity and uncertainties over the global economic outlook, steel producer stocks had a roller coaster ride in 2012. Stock declines in the first half of the year were driven by reports of a slowdown in China and Europe’s slumping economies. Rallies in the second half were influenced first by reports of below average steel inventories in China, and then by data suggesting a recovery in China’s GDP growth rate.

Unconventional Oil & Gas

Unconventional energy is an evolving space in which both challenges and opportunities keep changing. A major trend of 2012 was the bottoming of U.S. natural gas wellhead prices at below \$2 per thousand cubic feet, due to oversupplies produced by unconventional drilling. This put downward pressure on producer profits and stock prices, but it also produced two positives: 1) the conversion of several U.S. electricity-producing plants to natural gas fuel; and 2) increased efforts in the shale fields to extract crude oil, in addition to natural gas. Despite low natural gas prices, 2012 was a big year for acquisitions of (and by) unconventional energy companies.

Uranium and Nuclear Energy

The industry suffered a setback with the Fukushima nuclear plant disaster in Japan in 2011. However, it managed to recover momentum in 2012 with continued development of nuclear projects in China, India and even oil-rich Saudi Arabia. Nuclear power currently is estimated to generate about 13.5% of the world's electricity, and that share is expected to rise with 95 new reactions in planning stages and 62 already under construction, according to the World Nuclear Association.¹²

Life* (cumulative)	35.67%	36.13%	38.44%

**since 8/31/07*

Hypothetical Growth of \$10,000 (Since Inception)

Commencement date for the Market Vectors Agribusiness ETF (MOO) was 8/31/07.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (8/31/07) to the first day of secondary market trading in shares of the Fund (9/5/07), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting vaneck.com/etf.

Gross Expense Ratio 0.55% / Net Expense Ratio 0.55%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.56% of the Fund's average daily net assets per year until at least May 1, 2013. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

DAXglobal® Agribusiness Index (DXAG) is a modified capitalization-weighted index designed to track the movements of securities of companies engaged in the agriculture business that are traded on leading global exchanges.

DAXglobal® Agribusiness Index (DXAG), a trademark of Deutsche Börse AG, is licensed for use by Van Eck Associates Corporation in connection with Market Vectors Agribusiness ETF (MOO). Market Vectors Agribusiness ETF is not sponsored, endorsed, sold or promoted by Deutsche Börse AG and Deutsche Börse AG makes no representation regarding the advisability of investing in the Fund.

Commencement dates for the Market Vectors Global Alternative Energy ETF (GEX) was 5/3/07.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (5/3/07) to the first day of secondary market trading in shares of the Fund (5/9/07), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting vaneck.com/etf.

Gross Expense Ratio 0.81% / Net Expense Ratio 0.62%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.62% of the Fund's average daily net assets per year until at least May 1, 2013. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and

sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Ardour Global IndexSM (Extra Liquid) (AGIXLT) is a rules-based, global capitalization-weighted, float adjusted² index intended to give investors a means of tracking the overall performance of a global universe of listed companies engaged in the alternative energy industry.

“Ardour Global IndexesSM, LLC”, “ARDOUR GLOBAL INDEXSM (Extra Liquid)”, and “ARDOUR - XSM” are service marks of Ardour Global IndexesSM, LLC and have been licensed for use by Van Eck Associates Corporation in connection with Market Vectors Global Alternative Energy ETF (GEX). Market Vectors Global Alternative Energy ETF is not sponsored, endorsed, sold or promoted by Ardour Global IndexesSM, LLC and Ardour Global IndexesSM, LLC makes no representation regarding the advisability of investing in the Fund. AGIXLT is calculated by Dow Jones Indexes. The Fund, based on the AGIXLT, is not sponsored, endorsed, sold or promoted by Dow Jones Indexes, and Dow Jones Indexes makes no representation regarding the advisability of investing in the Fund.

<i>*since 5/16/06</i>			

Hypothetical Growth of \$10,000 (Since Inception)

Commencement date for the Market Vectors Gold Miners ETF (GDX) was 5/16/06.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (5/16/06) to the first day of secondary market trading in shares of the Fund (5/22/06), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting vaneck.com/etf.

Gross Expense Ratio 0.52% / Net Expense Ratio 0.52%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.53% of the Fund's average daily net assets per year until at least May 1, 2013. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and

sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

² NYSE Arca Gold Miners Index (GDM) is a modified capitalization-weighted index comprised of publicly traded companies involved primarily in the mining for gold.

NYSE Arca Gold Miners Index (GDM), a trademark of NYSE Euronext or its affiliates (NYSE Euronext), is licensed for use by Van Eck Associates Corporation in connection with Market Vectors Gold Miners ETF (GDV). On January 23, 2013, the name of the Market Vectors® Junior Gold Miners Index changed to Market Vectors® Global Junior Gold Miners Index. This was a name change only. There were no other changes to the index.

Hypothetical Growth of \$10,000 (Since Inception)

Commencement date for the Market Vectors Junior Gold Miners ETF (GDXJ) was 11/10/09.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, ¹for the period from commencement (11/10/09) to the first day of secondary market trading in shares of the Fund (11/11/09), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting vaneck.com/etf.

Gross Expense Ratio 0.55% / Net Expense Ratio 0.55%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.56% of the Fund's average daily net assets per year until at least May 1, 2013. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts

to discontinue all or a portion of such expense limitation.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Market Vectors Global Junior Gold Miners Index (MVGDXJTR) is a rules-based, modified capitalization-weighted, float-adjusted index comprised of a global universe of publicly traded small- and medium-capitalization companies² that generate at least 50% of their revenues from gold and/or silver mining, hold real property that has the potential to produce at least 50% of the company's revenue from gold or silver mining when developed, or primarily invest in gold or silver.

Market Vectors Global Junior Gold Miners Index (MVGDXJTR) is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Structured Solutions AG to maintain and calculate MVGDXJTR. Structured Solutions AG uses its best efforts to ensure that MVGDXJTR is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Structured Solutions AG has no obligation to point out errors in MVGDXJTR to third parties. Market Vectors Junior Gold Miners ETF is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.

Hypothetical Growth of \$10,000 (Since Inception)

Commencement date for the Market Vectors RVE Hard Assets Producers ETF (HAP) was 8/29/08.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, ¹ for the period from commencement (8/29/08) to the first day of secondary market trading in shares of the Fund (9/3/08), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting vaneck.com/etf.

Gross Expense Ratio 0.68% / Net Expense Ratio 0.52%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.49% of the Fund's average daily net assets per year until at least May 1, 2013. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a

premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Life* (cumulative)	(93.45)%	(93.36)%	(93.73)%

*since 4/21/08

Hypothetical Growth of \$10,000 (Since Inception)

Commencement date for the Market Vectors Solar Energy ETF (KWT) was 4/21/08.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, ¹ for the period from commencement (4/21/08) to the first day of secondary market trading in shares of the Fund (4/23/08), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting vaneck.com/etf.

Gross Expense Ratio 1.86% / Net Expense Ratio 0.66%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.65% of the Fund's average daily net assets per year until at least May 1, 2013. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a

premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Ardour Solar Energy IndexSM (SOLRXT) is a rules-based, modified global capitalization-weighted, float-adjusted index intended to give investors a means of tracking the overall performance of a global universe of listed companies engaged in the solar energy industry.

*since 8/13/07

Hypothetical Growth of \$10,000 (Since Inception)

Commencement date for the Market Vectors Uranium+Nuclear Energy ETF (NLR) was 8/13/07.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (8/13/07) to the first day of secondary market trading in shares of the Fund (8/15/07), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting vaneck.com/etf.

Gross Expense Ratio 0.67% / Net Expense Ratio 0.60%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.60% of the Fund's average daily net assets per year until at least

May 1, 2013. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

DAXglobal[®] Nuclear Energy Index (DXNE) is a modified capitalization-weighted index intended to track the movements of securities of companies engaged in the nuclear energy industry that are traded on leading global exchanges.

MARKET VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

Hypothetical \$1,000 investment at beginning of period

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, July 1, 2012 to December 31, 2012.

Actual Expenses

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period".

Hypothetical Example for Comparison Purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as program fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSR

- Expenses are equal to the Fund's annualized expense ratio (for the six months ended December 31, 2012)
- * multiplied by the average account value over the period, multiplied by 184 and divided by 366 (to reflect the one-half year period).
 - ** Assumes annual return of 5% before expenses

During the year ended December 31, 2012, transfers of securities from Level 2 to Level 1 were \$30,291,851. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

(a) As of December 31, 2012, the security was still held by the Fund and is no longer classified as an affiliate.

The summary of inputs used to value the Fund's investments as of December 31, 2012 is as follows:

	Level 1 Quoted Prices	Level 2 Significant Observable Inputs	Level 3 Significant Unobservable Inputs	Value
Common Stocks				
Australia	\$193,583,724	\$438,674,345	\$—	\$632,258,069
Canada	1,510,987,199	—	—	1,510,987,199
Cayman Islands	59,877,560	—	—	59,877,560
China / Hong Kong	—	46,720,481	5,795,817	52,516,298
Singapore	—	46,125,265	—	46,125,265
South Africa	7,511,678	—	—	7,511,678
United Kingdom	14,751,997	49,840,374	—	64,592,371
United States	165,404,566	—	—	165,404,566
Money Market Funds	281,583,644	—	—	281,583,644
Total	\$2,233,700,368	\$581,360,465	\$5,795,817	\$2,820,856,650

During the year ended December 31, 2012, transfers of securities from Level 2 to Level 1 were \$70,610,376. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account

market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

See Notes to Financial Statements

44

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the year ended December 31, 2012:

	Common Stocks	
	South Africa	China/Hong Kong
Balance as of December 31, 2011	\$—	\$ —
Realized loss	(2,088,141)	(696,779)
Net change in unrealized appreciation (depreciation)	(31,469,875)	3,647,176
Purchases	14,581,271	—
Sales	(2,578,997)	(118,326)
Transfers in and/or out of level 3	21,555,742	2,963,746
Balance as of December 31, 2012	\$—	\$ 5,795,817

Transfers from Level 1 and Level 2 to Level 3 resulted primarily from limited and suspended trading activity.

United States	34,772,744	—	—	34,772,744
Preferred Stock				
Brazil	6,395,560	—	—	6,395,560
Money Market Fund	43,047,319	—	—	43,047,319
Total	\$122,137,228	\$95,277,202	\$ —	\$217,414,430

During the year ended December 31, 2012, transfers of securities from Level 2 to Level 1 were \$4,808,445. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

† Security fully or partially on loan. Total market value of securities on loan is \$2,624,242.

Indicates a fair valued security which has not been valued utilizing an independent quote, but has been valued pursuant to guidelines established by the Board of Trustees. The aggregate value of fair valued securities is \$48,498,709 which represents 39.7% of net assets.

Reg S Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.

144A Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended, or otherwise restricted. These securities may be resold in transactions exempt from registration, unless otherwise noted, and the value amounted to \$437,094, or 0.4% of net assets.

Total	\$77,116,626	\$48,498,709	\$ —	\$125,615,335

During the year ended December 31, 2012, transfers of securities from Level 1 to Level 2 were \$872,592 and transfers from Level 2 to Level 1 were \$34,109. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

Total	\$42,623,146	\$43,026,214	\$ —	\$85,649,360

During the year ended December 31, 2012, transfers of securities from Level 1 to Level 2 were \$5,618,156. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

Ratio of net expenses, excluding interest expense, to average net assets

Ratio of net investment income to average net assets	2.82	%	1.42	%	2.53	%	1.00	%	1.31	%
Portfolio turnover rate	52	%	51	%	40	%	45	%	23	%

- (a) Commencement of operations
Total return is calculated assuming an initial investment made at the net asset value at the beginning of period, reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a redemption on the last day of the period. The return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.

MARKET VECTORS ETF TRUST
 NOTES TO FINANCIAL STATEMENTS
 December 31, 2012

Note 1—Fund Organization—Market Vectors ETF Trust (the “Trust”), is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and as of December 31, 2012, offers fifty investment portfolios, each of which represents a separate series of the Trust.

These financial statements relate only to the following investment portfolios: Agribusiness ETF, Coal ETF, Global Alternative Energy ETF, Gold Miners ETF, Junior Gold Miners ETF, Oil Services ETF, Rare Earth/Strategic Metals ETF, RVE Hard Assets Producers ETF, Solar Energy ETF, Steel ETF, Unconventional Oil & Gas ETF and Uranium+Nuclear Energy ETF (each a “Fund” and, together, the “Funds”). Each Fund was created to provide investors with the opportunity to purchase a security representing a proportionate undivided interest in a portfolio of securities consisting of substantially all of the common stocks in substantially the same weighting, in an index sponsored, licensed or managed by the NYSE Euronext, Deutsche Börse AG, Ardour Global Indexes, LLC, S-Network Global Indexes, LLC or Market Vectors Index Solutions GmbH, a wholly owned subsidiary of the Adviser.

The Funds’ commencement of operations dates and their respective Indices are presented below:

Fund	Commencement of Operations	Index
Agribusiness ETF	August 31, 2007	DAXglobal® Agribusiness Index
Coal ETF	January 10, 2008	Market Vectors Global Coal Index*
Global Alternative Energy ETF	May 03, 2007	Ardour Global Index SM (Extra Liquid)
Gold Miners ETF	May 16, 2006	NYSE Arca Gold Miners Index
Junior Gold Miners ETF	November 10, 2009	Market Vectors Junior Gold Miners Index*
Oil Services ETF	December 20, 2011	Market Vectors US Listed Oil Services 25 Index*
Rare Earth/Strategic Metals ETF	October 27, 2010	Market Vectors Rare Earth/Strategic Metals Index*
RVE Hard Assets Producers ETF	August 29, 2008	Rogers TM –Van Eck Hard Assets Producers Index
Solar Energy ETF	April 21, 2008	Ardour Solar Energy Index SM
Steel ETF	October 10, 2006	NYSE Arca Steel Index
Unconventional Oil & Gas ETF	February 14, 2012	Market Vectors Unconventional Oil & Gas Index*
Uranium+Nuclear Energy ETF	August 13, 2007	DAXglobal® Nuclear Energy Index

* Published by Market Vectors Index Solutions GmbH.

Note 2—Significant Accounting Policies—The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The following is a summary of significant accounting policies followed by the Funds.

Security Valuation—The Funds value their investments in securities and other assets and liabilities carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price. Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds' pricing time (4:00 p.m. Eastern Standard Time) but after the last close of the securities' primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR's and futures contracts. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Short-term obligations with more than sixty days remaining to maturity are valued at market value. Short-term obligations with sixty days or less to

79

NOTES TO FINANCIAL STATEMENTS

(continued)

maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. Forward foreign currency contracts are valued at the spot currency rate plus an amount (“points”), which reflects the differences in the interest rates between the U.S. and foreign markets. Securities for which quotations are not available are stated at fair value as determined by the Pricing Committee of Van Eck Associates Corporation (the “Adviser”) appointed by the Board of Trustees. The Pricing Committee provides oversight of the Funds’ valuation policies and procedures, which are approved by the Funds’ Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities, dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments for which market prices are not readily available. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of its investments on a recurring basis which includes a hierarchy that prioritizes inputs in the valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - Significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Fund’s investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Fund’s Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

Federal Income Taxes—It is each Fund’s policy to comply with the provisions of the Internal Revenue Code B. applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

Dividends and Distributions to Shareholders—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid annually. Income dividends and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.

Currency Translation—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statement of Operations.

80

Restricted Securities—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities is included at the end of each Fund's Schedule of Investments.

Use of Derivative Instruments—The Funds may make investments in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives relating to foreign currency transactions. A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts (often referred to as over-the-counter (“OTC”) derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates or currency prices. Investments in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. The Funds held no derivative instruments during the year ended December 31, 2012.

Forward Foreign Currency Contracts—The Funds are subject to foreign currency risk in the normal course of pursuing its investment objectives. The Funds may buy and sell forward foreign currency contracts to settle purchases and sales of foreign denominated securities or to hedge foreign denominated assets. Realized gains and losses from forward foreign currency contracts, if any are included in net realized gain (loss) on forward foreign currency transactions and foreign denominated assets and liabilities on the Statement of Operations. The Funds may incur additional risk from investments in forward foreign currency contracts if the counterparty is unable to fulfill its obligation or there are unanticipated movements of the foreign currency relative to the U.S. dollar. The Funds had no forward foreign currency contracts during the year ended December 31, 2012.

Other—Security transactions are accounted for on trade date. Transactions in certain securities may take longer than the customary settlement cycle to be completed. The counterparty is required to collateralize such trades with cash in excess of the market value of the transaction, which is held at the custodian and marked to market daily.

G. Realized gains and losses are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized as soon as the Fund is notified of the ex-dividend date. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

Note 3—Investment Management and Other Agreements—The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of 0.50% of each Fund's average daily net assets (except for Oil Services ETF). The management fee rate for Oil Services ETF is 0.35%.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSR

The Adviser has agreed, at least until May 1, 2013 to voluntarily waive or limit its fees and to assume as its own expense certain expenses otherwise payable by the Funds so that each Fund's total annual operating expenses does not exceed the expense caps, excluding interest expense, trading expenses, taxes and extraordinary expenses, listed in the table below.

81

NOTES TO FINANCIAL STATEMENTS

(continued)

The current expense caps and the amounts waived by the Adviser for the year ended December 31, 2012, are as follows:

Fund	Expense Cap	Waiver of Management Fees	Expenses Assumed by the Adviser
Agribusiness ETF	0.56 %	\$ —	\$ —
Coal ETF	0.59	55,372	—
Global Alternative Energy ETF	0.62	93,828	—
Gold Miners ETF	0.53	—	—
Junior Gold Miners ETF	0.56	—	—
Oil Services ETF	0.35	341,895	—
Rare Earth/Strategic Metals ETF	0.57	123,122	—
RVE Hard Assets Producers ETF	0.49 *	248,834	—
Solar Energy ETF	0.65	55,751	78,316
Steel ETF	0.55	65,303	—
Unconventional Oil & Gas ETF	0.54	55,373	—
Uranium+Nuclear Energy ETF	0.60	57,753	—

* The Fund expense cap prior to May 1, 2012 for RVE Hard Assets Producers ETF was 0.59%.

In addition, Van Eck Securities Corporation, an affiliate of the Adviser, acts as the Funds' Distributor. Certain officers and a Trustee of the Trust are officers, directors or stockholders of the Adviser and Distributor.

Note 4—Investments—For the year ended December 31, 2012, the cost of purchases and proceeds from sales of investments other than U.S. government obligations and short-term obligations (excluding in-kind transactions described in Note 6) were as follows:

Fund	Cost of Investments Purchased	Proceeds from Investments Sold
Agribusiness ETF	\$ 1,073,990,024	\$ 1,096,788,567
Coal ETF	125,117,085	124,430,479

Uranium+Nuclear Energy ETF	3,602,400	11,398,800	—	—

* Include short-term capital gains.

NOTES TO FINANCIAL STATEMENTS
(continued)

Net qualified late-year losses incurred after October 31, 2012 and within the taxable year, are deemed to arise on the first day of the Funds' next taxable year. For the year ended December 31, 2012, the Funds intend to defer to January 1, 2013 for federal tax purpose qualified late year losses as follows:

Fund	Late-Year Ordinary Losses	Post-October Capital Losses
Agribusiness ETF	\$—	\$—
Coal ETF	—	8,388,870
Global Alternative Energy ETF	—	8,113,120
Gold Miners ETF	—	491,967
Junior Gold Miners ETF	37,328,650	174,013,267
Oil Services ETF	—	1,426,563
Rare Earth/Strategic Metals ETF	—	10,240,622
RVE Hard Assets Producers ETF	—	679,121
Solar Energy ETF	850	6,155,915
Steel ETF	—	3,121,220
Unconventional Oil & Gas ETF	—	76,326
Uranium+Nuclear Energy ETF	—	5,023,472

On December 22, 2010, the Regulated Investment Company Modernization Act of 2010 (the "Act") was enacted, which changed various technical rules governing the tax treatment of regulated investment companies. The changes are generally effective for taxable years beginning after the date of enactment. One of the more prominent changes addresses capital loss carryforwards. Under the Act, each Fund will be permitted to carry forward capital losses incurred in taxable years beginning after the date of enactment for an unlimited period. However, any losses incurred during those future taxable years will be required to be utilized prior to the losses incurred in pre-enactment taxable years, which carry an expiration date. As a result of this ordering rule, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital loss carryforwards will retain their character as either short-term or long-term capital losses rather than being considered all short-term as permitted under previous regulation.

At December 31, 2012, the Funds had capital loss carryforwards available to offset future capital gains, as follows:

Post-Effective No Expiration Short-Term	Post-Effective No Expiration Long-Term	Amount Expiring in the Year Ended December 31,
---	--	--

During the year ended December 31, 2012, as a result of permanent book to tax differences, primarily due to investments in Passive Foreign Investment Companies, foreign currency gains and losses, net investment losses and tax treatment of in-kind redemptions, the Funds' incurred differences that affected undistributed net investment income (loss), accumulated net realized gain (loss) on investments and aggregate paid in capital by the amounts in the table below. Net assets were not affected by these reclassifications.

Fund	Increase/Decrease in Accumulated Net Investment Income/Loss	Increase/Decrease in Accumulated Net Realized Gain/Loss	Increase/Decrease in Aggregate Paid in Capital
Agribusiness ETF	\$ (1,385,792)	\$ (121,350,369)	\$ 122,736,161
Coal ETF	(56,033)	31,531,198	(31,475,165)
Global Alternative Energy ETF	(9,134)	3,990,078	(3,980,944)
Gold Miners ETF	3,898,402	(239,133,025)	235,234,623
Junior Gold Miners ETF	4,482,863	(16,904,264)	12,421,401
Oil Services ETF	(422,221)	(92,099,184)	92,521,405
Rare Earth/Strategic Metals ETF	189,460	986,824	(1,176,284)
RVE Hard Assets Producers ETF	(2,836)	(6,177,910)	6,180,746
Solar Energy ETF	5,294	11,499	(16,793)
Steel ETF	—	5,222,313	(5,222,313)
Unconventional Oil & Gas ETF	(6,204)	(386,001)	392,205
Uranium+Nuclear Energy ETF	(25,175)	1,017,155	(991,980)

The Funds recognize the tax benefits of uncertain tax positions only where the position is “more-likely-than-not” to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds’ tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on return filings for open tax years (tax years ended December 31, 2009-2011), or expected to be taken in the Funds’ current tax year. The Funds do not have exposure for additional years that might still be open in certain foreign jurisdictions. Therefore, no provision for income tax is required in the Funds’ financial statements.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense on the Statements of Operations. During the year ended December 31, 2012, the Funds did not incur any interest or penalties.

Note 6—Capital Share Transactions—As of December 31, 2012, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Shares are issued and redeemed by the Funds only in Creation Units, consisting of 50,000 shares, or multiples thereof. The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds’ underlying index plus a small amount of cash. For the year ended December 31, 2012 the Trust had in-kind contributions and redemptions as follows:

Fund	In-Kind Contributions	In-Kind Redemptions
Agribusiness ETF	\$ 180,488,241	\$ 664,397,260
Coal ETF	140,218,703	182,456,083
Global Alternative Energy ETF	—	12,660,584
Gold Miners ETF	8,867,249,398	7,369,071,936
Junior Gold Miners ETF	1,388,164,379	287,955,765

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSR

Oil Services ETF	5,587,770,408	5,231,887,601

Solar Energy ETF	5,721,548	—
Steel ETF	91,197,956	131,066,293
Unconventional Oil & Gas ETF	23,303,283	5,685,883
Uranium+Nuclear Energy ETF	5,471,617	6,943,593

Note 7—Concentration of Risk—The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a “passive” or index approach to achieve each Fund’s investment objective by investing in a portfolio of securities that generally replicates the Funds’ index. Each of the Funds is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks include devaluation of

NOTES TO FINANCIAL STATEMENTS

(continued)

currencies, less reliable information about issuers, different securities transaction clearance and settlement practices, and future adverse political and economic developments. These risks are heightened for investments in emerging market countries. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of comparable U.S. issuers.

Note 8—Trustee Deferred Compensation Plan—The Trust has a Deferred Compensation Plan (the “Plan”) for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan is included in “Trustees’ fees and expenses” on the Statements of Operations. The liability for the Plan is shown as “Deferred Trustee fees” on the Statements of Assets and Liabilities.

Note 9—Securities Lending—To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with The Bank of New York Mellon, the securities lending agent and also the Fund’s custodian. Each Fund may lend up to 33% of its investments requiring that the loan be continuously collateralized by cash, U.S. government securities or U.S. government agency securities, shares of an investment trust or mutual fund, or any combination of cash and such securities at all times equal to at least 102% (105% for foreign securities) of the market value plus accrued interest on the securities loaned. During the term of the loan, the Funds will continue to receive any dividends or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower or earning interest on the investment of the cash collateral. Securities lending income is disclosed as such in the Statements of Operations. The collateral for securities loaned is recognized in the Schedules of Investments and the Statements of Assets and Liabilities. The cash collateral is maintained on the Fund’s behalf by the lending agent and is invested in the Bank of New York Overnight Government Fund and/or the Bank of New York Institutional Cash Reserve. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the lender securities identical to the securities loaned. The Funds may pay reasonable finders,’ administrative and custodial fees in connection with a loan of its securities and may share the interest earned on the collateral with the securities lending agent. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. As of December 31, 2012, the loans outstanding and the collateral received are included in value of securities on loan and collateral for securities loaned, respectively, in the Statements of Assets and Liabilities.

Note 10—Share Split—On January 27, 2012, the Board of Trustees of the Trust approved a 3 for 1 share split for the Oil Services ETF. The split took place for shareholders of record as of the close of business on February 10, 2012, and were paid on February 13, 2012. Fund shares began trading on a split-adjusted basis on February 14, 2012. The Statements of Assets and Liabilities, Statements of Changes in Net Assets and Financial Highlights for the Oil Services ETF have been adjusted to reflect the 3 for 1 share split.

On July 2, 2012, the Board of Trustees of the Trust approved a 1 for 15 reverse share split for Solar Energy ETF. Fund shares began trading on a split-adjusted basis on July 2, 2012. The Statements of Assets and Liabilities, Statements of Changes in Net Assets and Financial Highlights for Solar Energy ETF have been adjusted to reflect the 1 for 15 reverse share split.

Note 11—Bank Line of Credit—Certain Funds may participate in a \$130 million committed credit facility (the “Facility”) to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the year ended December 31, 2012, the following Funds borrowed under this Facility:

Fund	Days Outstanding	Average Daily Loan Balance	Average Interest Rate
Agribusiness ETF	321	\$43,564,108	1.89 %
Coal ETF	120	693,938	1.90
Global Alternative Energy ETF	178	92,677	1.90
Gold Miners ETF	218	5,575,500	1.90
Junior Gold Miners ETF	256	4,249,642	1.89
Oil Services ETF	191	1,501,277	1.90
Rare Earth/Strategic Metals ETF	266	3,027,194	1.90

86

Fund	Days Outstanding	Average Daily Loan Balance	Average Interest Rate
RVE Hard Asset Producers ETF	329	\$652,915	1.89 %
Solar Energy ETF	89	76,764	1.90
Steel ETF	203	268,558	1.89
Uranium-Nuclear Energy ETF	108	230,611	1.90

The Funds had no outstanding loan balances at December 31, 2012.

Note 12—Custodian Fees—The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the year ended December 31, 2012, there were no offsets of custodial fees.

Note 13—Recent Accounting Pronouncements—The Funds have adopted Accounting Standards Update (“ASU”) No. 2011–04 “Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards.” ASU No. 2011–04 includes common requirements for measurement of and disclosure about fair value between U.S. GAAP and IFRS. ASU No. 2011–04 requires reporting entities to disclose the following information for fair value measurements categorized within Level 3 of the fair value hierarchy: quantitative information about the unobservable inputs used in the fair value measurement, the valuation processes used by the reporting entity and a narrative description of the sensitivity of the fair value measurement to changes in unobservable inputs and the interrelationships between those unobservable inputs. In addition, ASU No. 2011–04 requires reporting entities to make disclosures about amounts and reasons for all transfers in and out of Level 1 and Level 2 fair value measurements. The new disclosures have been implemented for annual and interim periods beginning after December 15, 2011 and can be found in Note 2 to the financial statements and the Schedule of Investments, if applicable.

In December 2011, the Financial Accounting Standards Board issued ASU No. 2011–11, *Balance Sheet (Topic 210) Disclosures about Offsetting Assets and Liabilities*, which requires an entity to make additional disclosures about offsetting assets and liabilities and related arrangements. The new guidance seeks to enhance disclosures by requiring improved information about financial instruments and derivative instruments that are either: (1) offset in accordance with GAAP, or (2) subject to enforceable master netting arrangement or similar agreement, irrespective of whether they are offset in accordance with GAAP. The new guidance is effective for periods beginning on or after January 1, 2013. Management is currently evaluating the implications of ASU No. 2011–11 and its impact on the Funds’ financial statements.

Note 14—Subsequent Event Review—The Funds have evaluated subsequent events and transactions for potential recognition or disclosure through the date the financial statements were issued.

Effective January 18, 2013, the Trust increased the line of credit from \$130 million to \$200 million.

Effective January 23, 2013, the names of the Market Vectors Junior Gold Miners Index, the Market Vectors Rare Earth/Strategic Metals Index and the Market Vectors Unconventional Oil & Gas Index have been changed to the Market Vectors Global Junior Gold Miners Index, the Market Vectors Global Rare Earth/Strategic Metals Index, and the Market Vectors Global Unconventional Oil & Gas Index respectively. The changes described above are name changes only and do not reflect any other changes to the indexes.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Trustees and Shareholders of Market Vectors ETF Trust

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Agribusiness ETF, Coal ETF, Global Alternative Energy ETF, Gold Miners ETF, Junior Gold Miners ETF, Oil Services ETF, Rare Earth/Strategic Metals ETF, RVE Hard Asset Producers ETF, Solar Energy ETF, Steel ETF, Unconventional Oil & Gas ETF and Uranium+Nuclear Energy ETF (twelve of the series constituting Market Vectors ETF Trust) (the "Funds") as of December 31, 2012, and the related statements of operations, the statements of changes in net assets and the financial highlights for the periods indicated therein. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Funds' internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2012, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Agribusiness ETF, Coal ETF, Global Alternative Energy ETF, Gold Miners ETF, Junior Gold Miners ETF, Oil Services ETF, Rare Earth/Strategic Metals ETF, RVE Hard Asset Producers ETF, Solar Energy ETF, Steel ETF, Unconventional Oil & Gas ETF and Uranium+Nuclear Energy ETF (twelve of the series constituting Market Vectors ETF Trust) at December 31, 2012, the results of their operations, the changes in their net assets and the financial highlights for the periods indicated therein, in conformity with U.S. generally accepted accounting principles.

This report is intended for the Funds' shareholders. It may not be distributed to prospective investors unless it is preceded or accompanied by a Market Vectors ETF Trust (the "Trust") Prospectus, which includes more complete information. An investor should consider the investment objective, risks, and charges and expenses of the Funds carefully before investing. The prospectus contains this and other information about the investment company. Please read the prospectus carefully before investing.

Additional information about the Trust's Board of Trustees/Officers and a description of the policies and procedures the Trust uses to determine how to vote proxies relating to portfolio securities are provided in the Statement of Additional Information. The Statement of Additional Information and information regarding how the Trust voted proxies relating to portfolio securities during the most recent twelve month period ending June 30 is available, without charge, by calling 1.888.MKT.VCTR, or by visiting vaneck.com, or on the Securities and Exchange Commission's website at <http://www.sec.gov>.

The Trust files its complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year on Form N-Q. The Trust's Form N-Qs are available on the Commission's website at <http://www.sec.gov> and may be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling 1.202.942.8090. The Funds' complete schedules of portfolio holdings are also available by calling 1.888.MKT.VCTR or by visiting vaneck.com.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSR

Item 2. CODE OF ETHICS.

- (a) The Registrant has adopted a code of ethics (the "Code of Ethics") that applies to the principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions.
- (b) Not applicable.
- (c) The Registrant has not amended its Code of Ethics during the period covered by the shareholder report presented in Item 1 hereto.
- (d) The Registrant has not granted a waiver or an implicit waiver from a provision of its Code of Ethics during the period covered by the shareholder report presented in Item 1 hereto.
- (e) Not applicable.
- (f) The Registrant's Code of Ethics is attached as an Exhibit hereto.

Item 3. AUDIT COMMITTEE FINANCIAL EXPERT.

The Registrant's Board of Trustees has determined that David Chow, R. Alastair Short and Richard Stamberger, members of the Audit and Governance Committees, are "audit committee financial experts" and "independent" as such terms are defined in the instructions to Form N-CSR Item 3(a)(2).

Item 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

(a) Audit Fees

Ernst & Young, as principal accountant for the Market Vectors ETF Trust, billed audit fees of \$1,122,050 for 2012 and \$731,650 for 2011.

(b) Audit-Related Fees

Ernst & Young billed audit-related fees of \$0 for 2012 and \$0 for 2011.

(c) Tax Fees

Ernst & Young billed tax fees of \$673,465 for 2012 and \$270,344 for 2011.

(d) All Other Fees

None.

- (e) The Audit Committee will pre-approve all audit and non-audit services, to be provided to the Fund, by the independent accountants as required by Section 10A of the Securities Exchange Act of 1934. The Audit Committee has authorized the Chairman of the Audit Committee to approve, between meeting dates, appropriate non-audit services.

The Audit Committee after considering all factors, including a review of independence issues, will recommend to the Board of Trustees the independent auditors to be selected to audit the financial statements of the Funds.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSR

(f) Not applicable. (g) Ernst & Young does not provide services to the Registrant's investment adviser or any entity controlling, controlled by, or under common control with the adviser. (h) Not applicable. Item 5. AUDIT COMMITTEE OF LISTED REGISTRANTS. Not applicable. Item 6. SCHEDULE OF INVESTMENTS. Information included in Item 1. Item 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES. Not applicable. Item 8. PORTFOLIO MANAGER OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES. Not applicable. Item 9. PURCHASE OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS. Not applicable. Item 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS. None. Item 11. CONTROLS AND PROCEDURES. (a) The Chief Executive Officer and the Chief Financial Officer have concluded that the Market Vectors ETF Trust disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act) provide reasonable assurances that material information relating to the Market Vectors ETF Trust is made known to them by the appropriate persons, based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this report. (b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act (17 CFR 270.30a-3(d)) that occurred during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting. Item 12. EXHIBITS. (a)(1) The code of ethics is attached as EX-99.CODE ETH (a)(2) A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2 under the Act (17 CFR 270.30a-2) is attached as Exhibit 99.CERT.
