MESA LABORATORIES, INC.
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2003 AND 2002

NOTE A. SUMMARY OF ACCOUNTING POLICIES

The summary of the Issuer's significant accounting policies are incorporated by reference to the Company's annual report on Form 10KSB, at March 31, 2003.

The accompanying unaudited condensed financial statements reflect all adjustments which, in the opinion of management, are necessary for a fair presentation of the results of operations, financial position and cash flows. The results of the interim period are not necessarily indicative of the results for the full year.

NOTE B. STOCK BASED COMPENSATION

The Company has stock based compensation plans, which are described more fully in Note 7 of the Company's annual report on Form 10KSB, at March 31, 2003. The Company has adopted the disclosure-only provisions of Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation." Accordingly, no compensation cost has been recognized for the stock option plans. Had compensation cost for the Company's stock option plans been determined based on the fair value at the grant date for awards in fiscal 2004 and 2003 consistent with the provisions of SFAS No. 123, the Company's net earnings and earnings per share for the fiscal third quarter and year-to-date would have been reduced to the pro forma amount indicated below:

	Three Months Ended December 31,		Nine Months Ended December 31,	
	2003	2002	2003	2002
Net income - as reported	\$ 500,162	\$ 538,595	\$1,551,643	\$1,619,402
Net income - pro forma	\$ 492,051	\$ 538,204	\$1,481,940	\$1,550,213
Income per diluted share - as reported	\$.16	\$.17	\$.50	\$.49
Income per diluted share - pro forma	\$.16	\$.17	\$.47	\$.46

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions used for grants: dividend yield of 2.0% (2004) and 0% (2003); expected volatility of approximately 14% (2004) and 20% (2003); discount rate of 3.0% (2004) and (2003); and expected lives of 5 years.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

LIQUIDITY AND CAPITAL RESOURCES

On December 31, 2003, the Company had cash and short-term investments of \$6,289,111. In addition, the Company had other current assets totaling \$3,951,111 and total current assets of \$10,240,222. Current liabilities of Mesa Laboratories, Inc. were \$585,613, which resulted in a current ratio of 17.5:1.

Edgar Filing: MESA LABORATORIES INC /CO - Form 10QSB

The Company has made net capital asset purchases of \$30,975 for the fiscal year-to-date.

The Company has instituted a program to repurchase up to 300,000 shares of its outstanding common stock. Under the plan, the shares may be purchased from time to time in the open market at prevailing prices or in negotiated transactions off the market. Shares purchased will be canceled and repurchases will be made with existing cash reserves. During the first nine months of the fiscal year, the Company repurchased 87,000 shares of our common stock.

On November 12, 2003 the company's Board of Directors declared for the first time a regular quarterly dividend of \$.05 per share of common stock. In addition the Board of Directors declared a special one-time dividend of \$.15 per share of common stock. Both dividends were paid on December 15, 2003, to shareholders of record on December 1, 2003.

RESULTS OF OPERATIONS

REVENUE

Net sales for the nine months ended December 31, 2003 increased \$47,578 or 1% to \$6,728,767 from the \$6,681,189 net sales level achieved for the same nine-month period last year. Net sales for the quarter increased \$2,875 or less than 1% to \$2,199,740 from the \$2,196,865 net sales level achieved in the same quarter last year. Over the first nine months of the fiscal year, revenues are up a small amount compared to prior year. Datatrace sales for the nine-month period produced a seven percent decline while medical instruments increased by approximately eight percent. Nusonics products have increased over twenty percent for the same period, but this gain is on a much smaller base of sales. Net sales for the quarter were up a small amount from the prior year quarter. For the quarter, medical products decreased approximately two percent and Nusonics products were almost unchanged. Datatrace products decreased seven percent from the prior year quarter, which was helped by initial shipments of the Micropack III product.

COST OF GOODS SOLD

Cost of goods sold for the first nine months as a percent of net sales was 38%, which is an increase of 1% from the 37% level for the same nine-month period last year. Cost of goods sold for the current quarter as a percent of net sales was 38%, representing a 2% increase compared to the 36% level in the same quarter last year. While the mix of products during the first nine months of the fiscal year made a shift to Medical products compared to prior year leading to a one percent change in the cost of goods sold as a percent of sales, the quarter saw an increase of two percent in cost of goods sold due to the lower Datatrace product sales described above.

SELLING, GENERAL AND ADMINISTRATIVE

Selling, general and administrative expenses for the first nine months decreased 3% or \$49,249 to \$1,587,766 from \$1,637,015 in the same period last year. For the current quarter, selling, general and administrative expenses totaled \$523,762, which was down 7% or \$38,181 from \$561,943 expended in the same quarter last year. Marketing expenses decreased 14 percent and two percent for the quarter and nine month periods, respectively with Medical marketing expenses declining six percent for the quarter and nine month periods compared to the prior year. Datatrace marketing expenses decreased 16 percent for the quarter and increased two percent for the nine-month period. The decrease in marketing expenses for Datatrace products for the quarter was due chiefly to lower bad debt expense. Individual marketing costs for medical products trended down for the quarter and nine month periods and were relatively unchanged within

Edgar Filing: MESA LABORATORIES INC /CO - Form 10QSB

the major expense categories. Administration costs remained at consistent levels increasing four percent in the current quarter and declining five percent over the first nine months of the fiscal year compared to the previous year.

RESEARCH AND DEVELOPMENT

Research and development for the first nine months increased to \$236,391 from \$199,636, which represents an 18% increase from the same period last year. Research and development for the quarter was \$85,927, which represents an increase of \$15,220 or 22% from the \$70,707 level expensed in the same quarter last year. Research and development costs increased for the quarter and nine month periods due to higher compensation and consulting costs. This trend is expected to continue throughout the fiscal year. Development of three new versions of the Micropack III Logger that will measure other parameters besides temperature is proceeding well. Development projects for the company's line of Dialysate Meters for kidney dialysis have begun, and we estimate that we will begin to introduce our next generation medical instruments in the next fiscal year.

NET INCOME

Net income for the nine months ended December 31, 2003 decreased 4% to \$1,551,643 from \$1,619,402, but earnings per share increased 2% to \$.50 per diluted share compared to \$.49 per diluted share one year ago. Net income for the quarter was \$500,162 or \$.16 per diluted share compared to net income of \$538,595 or \$.17 per diluted share last year. For the quarter and year-to-date, net income compared to last year declined slightly due to unchanged sales performance, a shift in sales mix from Datatrace to Medical products and an increase in the income tax rate compared to the prior year. On an earnings per share basis, year-to-date net income increased by \$.01 per diluted share due to the lower outstanding shares generated by the company's share buyback program.

ITEM 3. Controls and Procedures

a. Evaluation of Disclosure Controls and Procedures. The Company's Chief Executive Officer and Chief Financial Officer, have evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-14(c) and 15d-14(c) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of a date within 90 days prior to the filing date of this quarterly report (the Evaluation Date). Based on such evaluation, such officers have concluded that, as of the Evaluation Date, the Company's disclosure controls and procedures are effective in alerting them, on a timely basis, to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic filings under the Exchange Act.

b. Changes in Internal Controls. Since the Evaluation Date, there have not been any significant changes in the Company's internal controls or in other factors that could significantly affect such controls.

PART II-OTHER INFORMATION

ITEM 4. Submission of matters to a vote of securities holders

The Annual Meeting of Shareholders of Mesa Laboratories, Inc. was held on December 12, 2003. Of the 3,046,638 Shares entitled to vote, 2,564,657 were represented either in person or by proxy. Four Directors were elected to serve until the next Annual Meeting of Shareholders.

The four directors elected were:
