Citigroup Global Markets Holdings Inc. **Pricing Supplement No. 2018-USNCH1004**

Filed Pursuant to Rule 424(b)(2)

Registration Statement Nos. 333-216372 and 333-216372-01

Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the Common Stock of Amazon.com, Inc., the Common Stock of General Electric Company and the Common Stock of Johnson & Johnson Due February 19, 2021

The securities offered by this pricing supplement are unsecured senior debt securities issued by Citigroup Global Markets Holdings Inc. and guaranteed by Citigroup Inc. The securities offer the potential for quarterly contingent coupon payments at an annualized rate that, if all are paid, would produce a yield that is generally higher than the yield on our conventional debt securities of the same maturity. In exchange for this higher potential yield, you must be willing to accept the risks that (i) your actual yield may be lower than the yield on our conventional debt securities of the same maturity because you may not receive one or more, or any, contingent coupon payments; (ii) your actual yield may be negative because you may receive significantly less than the stated principal amount of your securities, and possibly nothing, at maturity; and (iii) the securities may be automatically redeemed prior to maturity. Each of these risks will depend on the performance of the **worst performing** of the shares of common stock of Amazon.com, Inc., the shares of common stock of General Electric Company and the shares of common stock of Johnson & Johnson (each, the “underlying shares”), as described below. You will be subject to risks associated with each of the underlying shares and will be negatively affected by adverse movements in any of the underlying shares regardless of the performance of any other underlying shares. Although you will be exposed to downside risk with respect to the worst performing underlying shares, you will not participate in any appreciation of the underlying shares or receive any dividends paid on the underlying shares.

Investors in the securities must be willing to accept (i) an investment that may have limited or no liquidity and (ii) the risk of not receiving any payments due under the securities if we and Citigroup Inc. default on our obligations. **All payments on the securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc.**

KEY TERMS

Issuer: Citigroup Global Markets Holdings Inc., a wholly owned subsidiary of Citigroup Inc.

Guarantee: All payments due on the securities are fully and unconditionally guaranteed by Citigroup Inc.

Underlying shares:

Underlying shares	Initial share price*	Coupon barrier price**	Final barrier price***
Shares of Common Stock of Amazon.com, Inc.	\$1,414.51	\$707.255	\$707.255
Shares of Common Stock of General Electric Company	\$14.67	\$7.335	\$7.335
Shares of Common Stock of Johnson & Johnson	\$129.96	\$64.980	\$64.980

* The closing price of the applicable underlying shares on the pricing date

** For each of the underlying shares, 50% of the applicable initial share price

*** For each of the underlying shares, 50% of the applicable initial share price

Aggregate stated principal amount: \$1,745,000

Stated principal amount: \$1,000 per security

Pricing date: February 13, 2018

Issue date: February 16, 2018. See “Supplemental Plan of Distribution” in this pricing supplement for additional information.

Valuation dates: May 14, 2018, August 13, 2018, November 13, 2018, February 13, 2019, May 13, 2019, August 13, 2019, November 13, 2019, February 13, 2020, May 13, 2020, August 13, 2020, November 13, 2020 and February 16, 2021 (the “final valuation date”), each subject to postponement if such date is not a scheduled trading day for any of the underlying shares or if certain market disruption events occur with respect to any of the underlying shares

Maturity date: Unless earlier redeemed, February 19, 2021

Contingent coupon payment dates: For each valuation date, the fifth business day after such valuation date, except that the contingent coupon payment date for the final valuation date will be the maturity date

Contingent coupon: On each quarterly contingent coupon payment date, unless previously redeemed, the securities will pay a contingent coupon equal to 2.175% (approximately 8.70% per annum) of the stated principal amount of the securities **if and only if** the closing price of the worst performing underlying shares on the related valuation date is greater than or equal to the applicable coupon barrier price. **If the closing price of the worst performing underlying shares on any quarterly valuation date is less than the applicable coupon barrier price, you will not receive any contingent coupon payment on the related contingent coupon payment date.**

If the securities are not automatically redeemed prior to maturity, you will be entitled to receive at maturity for each security you then hold:

If the final share price of the worst performing underlying shares on the final valuation date is **greater than or equal to** the applicable final barrier price: \$1,000 *plus* the contingent coupon payment due at maturity

If the final share price of the worst performing underlying shares on the final valuation date is **less than** the applicable final barrier price:

Payment at maturity:

\$1,000 × the share performance factor of the worst performing underlying shares on the final valuation date

If the final share price of the worst performing underlying shares on the final valuation date is less than the applicable final barrier price, you will receive less than 50% of the stated principal amount of your securities, and possibly nothing, at maturity, and you will not receive any contingent coupon payment at maturity.

Underwriting fee and issue price: Issue price⁽¹⁾ Underwriting fee⁽²⁾ Proceeds to issuer

Per security:	\$1,000.00	\$20.00	\$980.00
Total:	\$1,745,000.00	\$34,900.00	\$1,710,100.00

(Key Terms continued on next page)

(1) On the date of this pricing supplement, the estimated value of the securities is \$935.80 per security, which is less than the issue price. The estimated value of the securities is based on Citigroup Global Markets Inc.'s ("CGMI") proprietary pricing models and our internal funding rate. It is not an indication of actual profit to CGMI or other of our affiliates, nor is it an indication of the price, if any, at which CGMI or any other person may be willing to buy the securities from you at any time after issuance. See "Valuation of the Securities" in this pricing supplement.

(2) CGMI will receive an underwriting fee of up to \$20.00 for each \$1,000 security sold in this offering. Selected dealers not affiliated with CGMI and their financial advisors will collectively receive from CGMI a selling concession of up to \$20.00 for each \$1,000 security they sell. Selected dealers through whom we distribute securities may enter into arrangements with other institutions with respect to the distribution of the securities, and those institutions may share in the commissions, discounts or other compensation received by our selected dealers, may be compensated separately and may also receive commissions from purchasers for whom they may act as agents. In addition, CGMI will pay selected dealers a structuring fee of \$4.00 for each security sold in this offering. We may also engage other firms to provide marketing or promotional services in connection with the distribution of the securities. CGMI will pay these service providers a fee of up to \$2.50 per security in consideration for providing marketing, education, structuring or referral services with respect to financial advisors or selected dealers. For more information on the distribution of the securities, see "Supplemental Plan of Distribution" in this pricing supplement. In addition to the underwriting fee, CGMI and its affiliates may profit from hedging activity related to this offering, even if the value of the securities declines. See "Use of Proceeds and Hedging" in the accompanying prospectus.

Investing in the securities involves risks not associated with an investment in conventional debt securities. See "Summary Risk Factors" beginning on page PS-5.

Neither the Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved of the securities or determined that this pricing supplement and the accompanying product supplement, prospectus supplement and prospectus is truthful or complete. Any representation to the contrary is a criminal offense. *You should read this pricing supplement together with the accompanying product supplement, prospectus supplement and prospectus, each of which can be accessed via the hyperlinks below:*

Product Supplement No. EA-04-06 dated April 7, 2017, Prospectus Supplement and Prospectus each dated April 7, 2017

The securities are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

Citigroup Global Markets Holdings Inc.

Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the Common Stock of Amazon.com, Inc., the Common Stock of General Electric Company and the Common Stock of Johnson & Johnson Due February 19, 2021

KEY TERMS (continued)

- Automatic early redemption:** If, on any potential redemption date, the closing price of the worst performing underlying shares is greater than or equal to the applicable initial share price, each security you then hold will be automatically redeemed on the related contingent coupon payment date for an amount in cash equal to \$1,000 *plus* the related contingent coupon payment
- Potential redemption dates:** Each quarterly valuation date beginning in August 2018 and ending in November 2020
- Final share price:** For each of the underlying shares, the applicable closing price on the final valuation date
- Share performance factor:** For each of the underlying shares on any valuation date, the applicable closing price on that valuation date *divided by* the applicable initial share price
- Worst performing underlying shares:** For any valuation date, the underlying shares with the lowest share performance factor on that valuation date
- Listing:** The securities will not be listed on any securities exchange
- CUSIP / ISIN:** 17324CRX6 / US17324CRX64
- Underwriter:** CGMI, an affiliate of the issuer, acting as principal

Additional Information

General. The terms of the securities are set forth in the accompanying product supplement, prospectus supplement and prospectus, as supplemented by this pricing supplement. The accompanying product supplement, prospectus supplement and prospectus contain important disclosures that are not repeated in this pricing supplement. For example, certain events may occur that could affect whether you receive a contingent coupon payment on a contingent coupon payment date as well as your payment at maturity or, in the case of a delisting of the underlying shares, could give us the right to call the securities prior to maturity for an amount that may be less than the stated principal amount. These events, including market disruption events and other events affecting the underlying shares, and their consequences are described in the accompanying product supplement in the sections “Description of the Securities—Certain Additional Terms for Securities Linked to Company Shares or ETF Shares—Consequences of a Market Disruption Event; Postponement of a Valuation Date,” “—Dilution and Reorganization Adjustments” and “—Delisting of Company Shares,” and not in this pricing supplement. It is important that you read the accompanying product supplement, prospectus supplement and prospectus together with this pricing supplement in connection with your investment in the securities. Certain terms used but not defined in this pricing supplement are defined in the accompanying product supplement.

Postponement of a valuation date. If a scheduled valuation date is not a scheduled trading day for any of the underlying shares or if a market disruption event occurs with respect to any of the underlying shares on a scheduled valuation date, that valuation date will be subject to postponement as described in the accompanying product supplement in the section “Description of the Securities—Certain Additional Terms for Securities Linked to Company Shares or ETF Shares—Consequences of a Market Disruption Event; Postponement of a Valuation Date.” If a scheduled

valuation date is postponed, the closing price of each of the underlying shares in respect of that valuation date will be determined based on (i) for any underlying shares for which the originally scheduled valuation date is a scheduled trading day and as to which a market disruption event does not occur on the originally scheduled valuation date, the closing price of such underlying shares on the originally scheduled valuation date and (ii) for any other underlying shares, the closing price of such underlying shares on the valuation date as postponed (or, if earlier, the first scheduled trading day for such underlying shares following the originally scheduled valuation date on which a market disruption event did not occur with respect to such underlying shares).

Dilution and Reorganization Adjustments. With respect to each of the underlying shares, the relevant initial share price, the coupon barrier price and the final barrier price are each a “Relevant Price” for purposes of the section “Description of the Securities—Certain Additional Terms for Securities Linked to Company Shares or ETF Shares—Dilution and Reorganization Adjustments” in the accompanying product supplement. Accordingly, the initial share price, the coupon barrier price and the final barrier price applicable to each of the underlying shares are each subject to adjustment upon the occurrence of any of the events described in that section.

Citigroup Global Markets Holdings Inc.

Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the Common Stock of Amazon.com, Inc., the Common Stock of General Electric Company and the Common Stock of Johnson & Johnson Due February 19, 2021

Hypothetical Examples

The examples below illustrate how to determine whether a contingent coupon will be paid with respect to a quarterly valuation date and how to calculate the payment at maturity on the securities, assuming the securities are not automatically redeemed prior to maturity. You should understand that the term of the securities, and your opportunity to receive the contingent coupon payments on the securities, may be limited to as short as six months if the securities are automatically redeemed prior to the maturity date. Unless earlier redeemed, during the term of the securities, there are twelve valuation dates. For ease of analysis, figures in the table below may have been rounded.

The examples below are based on the following values in order to illustrate how the securities work:

Underlying shares	Initial share price	Coupon barrier price	Final barrier price
Shares of common stock of Amazon.com, Inc.	\$1,414.51	\$707.255 (50% of the applicable initial share price)	\$707.255 (50% of the applicable initial share price)
Shares of common stock of General Electric Company	\$14.67	\$7.335 (50% of the applicable initial share price)	\$7.335 (50% of the applicable initial share price)
Shares of common stock of Johnson & Johnson	\$129.96	\$64.980 (50% of the applicable initial share price)	\$64.980 (50% of the applicable initial share price)
Contingent coupon rate:		8.70% per annum (approximately 2.175% paid quarterly)	

Hypothetical Examples of Quarterly Contingent Coupon Payments and any Payment upon Automatic Early Redemption with Respect to a Quarterly Valuation Date that is also a Potential Redemption Date

Set forth below are three hypothetical examples of the calculation of the contingent coupon payment with respect to a hypothetical quarterly valuation date that is also a potential redemption date.

Hypothetical closing price of the shares of common stock of	Hypothetical closing price of the shares of common stock of	Hypothetical closing price of the shares of common stock of	Hypothetical contingent coupon payment per security and any payment
--	--	--	--

	Amazon.com, Inc.	General Electric Company	Johnson & Johnson	upon an automatic early redemption
	\$1,697.41	\$12.47	\$84.47	
Example 1	(Share performance factor = \$1,697.41 / \$1,414.51 = 1.20) \$636.53	(Share performance factor = \$12.47 / \$14.67 = 0.85) \$17.60	(Share performance factor = \$84.47 / \$129.96 = 0.65) \$142.96	\$21.75
Example 2	(Share performance factor = \$636.53 / \$1,414.51 = 0.45) \$1,555.96	(Share performance factor = \$17.60 / \$14.67 = 1.20) \$15.40	(Share performance factor = \$142.96 / \$129.96 = 1.10) \$155.95	\$0.00
Example 3	(Share performance factor = \$1,555.96 / \$1,414.51 = 1.10)	(Share performance factor = \$15.40 / \$14.67 = 1.05)	(Share performance factor = \$155.95 / \$129.96 = 1.20)	\$1,021.75 (\$1,000 stated principal amount per security plus the related contingent coupon payment)

Example 1: On the hypothetical valuation date, the shares of common stock of Johnson & Johnson have the lowest share performance factor and, therefore, are the worst performing underlying shares. In this scenario, the closing price of the worst performing underlying shares is **greater than** the applicable coupon barrier price but **less than** the applicable initial share price. As a result, investors in the securities would receive the contingent coupon payment of \$21.75 per security on the related contingent coupon payment date and the securities would not be automatically redeemed.

Example 2: On the hypothetical valuation date, the shares of common stock of Amazon.com, Inc. have the lowest share performance factor and, therefore, are the worst performing underlying shares. In this scenario, the closing price of the worst performing underlying shares is **less than** the applicable coupon barrier price and **less than** the applicable initial share price. As a result, investors would not receive any payment on the related contingent coupon payment date, even though the other underlying shares have appreciated from their applicable initial share prices, and the securities would not be automatically redeemed.

Investors in the securities will not receive a contingent coupon payment with respect to a valuation date if, on that valuation date, the closing price of the worst performing underlying shares is less than the applicable coupon barrier price.

Example 3: On the hypothetical valuation date, the hypothetical closing prices of all of the underlying shares are **greater than** their applicable coupon barrier prices and their applicable initial share prices. In this scenario, the closing price of the worst performing underlying shares is **greater than** the applicable initial share price and the securities would be automatically redeemed on the related contingent coupon payment date for an amount in cash equal to \$1,000 plus the related contingent coupon payment, or \$1,021.75. If

February 2018 PS-3

Citigroup Global Markets Holdings Inc.

Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the Common Stock of Amazon.com, Inc., the Common Stock of General Electric Company and the Common Stock of Johnson & Johnson Due February 19, 2021

the quarterly valuation date were not also a potential redemption date, the securities would not be automatically redeemed on the related contingent coupon payment date.

Hypothetical Examples of the Payment at Maturity on the Securities

The following examples illustrate the hypothetical payment at maturity on the securities as determined based on the applicable final share prices of the underlying shares on the final valuation date, assuming the securities have not been earlier automatically redeemed.

	Hypothetical final share price of the shares of common stock of Amazon.com, Inc.	Hypothetical final share price of the shares of common stock of General Electric Company	Hypothetical final share price of the shares of common stock of Johnson & Johnson	Hypothetical payment at maturity per security
	\$1,428.66	\$16.14	\$136.46	
Example 4	(Share performance factor = $\frac{\$1,428.66}{\$1,414.51} = 1.01$)	(Share performance factor = $\frac{\$16.14}{\$14.67} = 1.10$)	(Share performance factor = $\frac{\$136.46}{\$129.96} = 1.05$)	\$1,021.75
	\$1,273.06	\$4.40	\$103.97	
Example 5	(Share performance factor = $\frac{\$1,273.06}{\$1,414.51} = 0.90$)	(Share performance factor = $\frac{\$4.40}{\$14.67} = 0.30$)	(Share performance factor = $\frac{\$103.97}{\$129.96} = 0.80$)	\$300.00
	\$990.16	\$8.80	\$0.00	
Example 6	(Share performance factor = $\frac{\$990.16}{\$1,414.51} = 0.70$)	(Share performance factor = $\frac{\$8.80}{\$14.67} = 0.60$)	(Share performance factor = $\frac{\$0.00}{\$129.96} = 0.00$)	\$0.00

Example 4: In this example, the shares of common stock of Amazon.com, Inc. are the worst performing underlying shares. In this scenario, the final share price of the worst performing underlying shares is greater than the applicable final barrier price. Accordingly, at maturity, you would receive the stated principal amount of the securities *plus* the contingent coupon payment of \$21.75 per security, but you would not participate in the appreciation of any of the underlying shares.

Example 5: In this example, the shares of common stock of General Electric Company are the worst performing underlying shares. In this scenario, the final share price of the worst performing underlying shares is less than the applicable final barrier price. Accordingly, at maturity, you would receive a payment per security calculated as follows:

Payment at maturity = \$1,000 × share performance factor of the shares of common stock of General Electric Company on the final valuation date

$$= \$1,000 \times 0.30$$

$$= \$300$$

In this scenario, you would receive significantly less than the stated principal amount of your securities at maturity. You would incur a loss based on the performance of the worst performing underlying shares, even though the final share prices of the other underlying shares are greater than the applicable final barrier prices. **In addition, because the final share price of the worst performing underlying shares is below the applicable coupon barrier price, you will not receive any quarterly contingent coupon payment.**

Example 6: In this example, the shares of common stock of Johnson & Johnson are the worst performing underlying shares and their final share price is less than the applicable final barrier price. Accordingly, at maturity, you would receive a payment per security calculated as follows:

Payment at maturity = \$1,000 × share performance factor of the shares of common stock of Johnson & Johnson on the final valuation date

$$= \$1,000 \times 0.00$$

$$= \$0$$

In this scenario, because the closing price of the worst performing underlying shares on the final valuation date is \$0, you would lose your entire investment in the securities. In addition, because the final share price of the worst performing underlying shares is below the applicable coupon barrier price, you will not receive any quarterly contingent coupon payment.

If the closing price of the worst performing underlying shares were less than the applicable coupon barrier price on each valuation date and less than the final barrier price on the final valuation date, you would not have received any quarterly contingent coupon payments and, in addition, you would incur a significant loss on your securities at maturity.

February 2018 PS-4

Citigroup Global Markets Holdings Inc.

Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the Common Stock of Amazon.com, Inc., the Common Stock of General Electric Company and the Common Stock of Johnson & Johnson Due February 19, 2021

Summary Risk Factors

An investment in the securities is significantly riskier than an investment in conventional debt securities. The securities are subject to all of the risks associated with an investment in our conventional debt securities (guaranteed by Citigroup Inc.), including the risk that we and Citigroup Inc. may default on our obligations under the securities, and are also subject to risks associated with each of the underlying shares. Accordingly, the securities are suitable only for investors who are capable of understanding the complexities and risks of the securities. You should consult your own financial, tax and legal advisors as to the risks of an investment in the securities and the suitability of the securities in light of your particular circumstances.

The following is a summary of certain key risk factors for investors in the securities. You should read this summary together with the more detailed description of risks relating to an investment in the securities contained in the section “Risk Factors Relating to the Securities” beginning on page EA-6 in the accompanying product supplement. You should also carefully read the risk factors included in the accompanying prospectus supplement and in the documents incorporated by reference in the accompanying prospectus, including Citigroup Inc.’s most recent Annual Report on Form 10-K and any subsequent Quarterly Reports on Form 10-Q, which describe risks relating to the business of Citigroup Inc. more generally.

You may lose some or all of your investment. Unlike conventional debt securities, the securities do not provide for the repayment of the stated principal amount at maturity in all circumstances. If the securities are not automatically redeemed prior to maturity, your payment at maturity will depend on the performance of the worst performing underlying shares on the final valuation date. If the closing price of the worst performing underlying shares on the final valuation date is less than the applicable final barrier price, you will lose 1% of the stated principal amount of the securities for every 1% by which the worst performing underlying shares have declined from their initial share price, regardless of the performance of the other underlying shares. There is no minimum payment at maturity on the securities, and you may lose up to all of your investment.

You will not receive any contingent coupon payment for any quarter in which the closing price of the worst performing underlying shares is less than the applicable coupon barrier price on the related valuation date. A contingent coupon payment will be made on a contingent coupon payment date if and only if the closing price of the worst performing underlying shares on the related valuation date is greater than or equal to the applicable coupon barrier price. If the closing price of the worst performing underlying shares is less than the applicable coupon barrier price on any quarterly valuation date, you will not receive any contingent coupon payment on the related contingent coupon payment date. If the closing price of the worst performing underlying shares is below the applicable coupon barrier price on each valuation date, you will not receive any contingent coupon payments over the term of the securities.

The securities are subject to the risks of all of the underlying shares and will be negatively affected if any of the underlying shares perform poorly, even if the other underlying shares perform well. You are subject to risks associated with all of the underlying shares. If any of the underlying shares perform poorly, you will be negatively affected, even if the other underlying shares perform well. The securities are not linked to a basket composed of the underlying shares, where the better performance of one or two could ameliorate the poor performance of the other. Instead, you are subject to the full risks of whichever of the underlying shares are the worst performing underlying shares.

You will not benefit in any way from the performance of the better performing underlying shares. The return on the securities depends solely on the performance of the worst performing underlying shares, and you will not benefit in any way from the performance of the better performing underlying shares. The securities may underperform a similar investment in all of the underlying shares or a similar alternative investment linked to a basket composed of the underlying shares, since in either such case the performance of the better performing underlying shares would be blended with the performance of the worst performing underlying shares, resulting in a better return than the return of the worst performing underlying shares.

You will be subject to risks relating to the relationship among the underlying shares. It is preferable from your perspective for the underlying shares to be correlated with each other, in the sense that they tend to increase or decrease at similar times and by similar magnitudes. By investing in the securities, you assume the risk that the underlying shares will not exhibit this relationship. The less correlated the underlying shares, the more likely it is that any one of the underlying shares will perform poorly over the term of the securities. All that is necessary for the securities to perform poorly is for one of the underlying shares to perform poorly; the performance of the underlying shares that are not the worst performing underlying shares is not relevant to your return on the securities at maturity or upon an earlier automatic redemption. It is impossible to predict what the relationship among the underlying shares will be over the term of the securities.

Higher contingent coupon rates are associated with greater risk. The securities offer contingent coupon payments at an annualized rate that, if all are paid, would produce a yield that is generally higher than the yield on our conventional debt securities of the same maturity. This higher potential yield is associated with greater levels of expected risk as of the pricing date for the securities, including the risks that you may not receive a contingent coupon payment on one or more, or any, contingent coupon payment dates, the securities will not be automatically redeemed and the amount you receive at maturity may be significantly less than the stated principal amount of your securities. The volatility of and the correlation among the underlying shares are important factors affecting these risks. Greater expected volatility of and lower expected correlation among the underlying shares as of the pricing date may result in a higher contingent coupon rate, but would also represent a greater expected likelihood as of the pricing date that (i) the closing price of the worst performing underlying shares will be less than the applicable coupon barrier price on one or more valuation dates, such that you will not receive one or more, or any, contingent coupon payments during the term of the securities, (ii) the closing price of the worst performing underlying shares will be less than the initial share price on each potential

Citigroup Global Markets Holdings Inc.

Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the Common Stock of Amazon.com, Inc., the Common Stock of General Electric Company and the Common Stock of Johnson & Johnson Due February 19, 2021

redemption date, such that the securities are not automatically redeemed and (iii) the closing price of the worst performing underlying shares on the final valuation date will be less than the applicable final barrier price, such that you will not be repaid the stated principal amount of your securities at maturity.

You may not be adequately compensated for assuming the downside risk of the worst performing underlying shares. The potential contingent coupon payments on the securities are the compensation you receive for assuming the downside risk of the worst performing underlying shares, as well as all the other risks of the securities. That compensation is effectively “at risk” and may, therefore, be less than you currently anticipate. First, the actual yield you realize on the securities could be lower than you anticipate because the coupon is “contingent” and you may not receive a contingent coupon payment on one or more, or any, of the contingent coupon payment dates. Second, the contingent coupon payments are the compensation you receive not only for the downside risk of the worst performing underlying shares, but also for all of the other risks of the securities, including the risk that the securities may be automatically redeemed prior to maturity, interest rate risk and our and Citigroup Inc.’s credit risk. If those other risks increase or are otherwise greater than you currently anticipate, the contingent coupon payments may turn out to be inadequate to compensate you for all the risks of the securities, including the downside risk of the worst performing underlying shares.

The securities may be automatically redeemed prior to maturity, limiting your opportunity to receive contingent coupon payments. On any potential redemption date, beginning in August 2018 and ending in November 2020, the securities will be automatically redeemed if the closing price of the worst performing underlying shares on that potential redemption date is greater than or equal to the applicable initial share price. Thus, the term of the securities may be limited to as short as six months. If the securities are automatically redeemed prior to maturity, you will not receive any additional contingent coupon payments. Moreover, you may not be able to reinvest your funds in another investment that provides a similar yield with a similar level of risk.

The securities offer downside exposure to the underlying shares, but no upside exposure to the underlying shares. You will not participate in any appreciation in the price of the underlying shares over the term of the securities. Consequently, any positive return on the securities will be limited to the contingent coupon payments you receive, if any, and may be significantly less than the return on the underlying shares over the term of the securities. In addition, you will not receive any dividends or other distributions or have any other rights with respect to the underlying shares.

The performance of the securities will depend on the closing prices of the underlying shares solely on the relevant valuation dates, which makes the securities particularly sensitive to the volatility of the underlying shares. Whether the contingent coupon will be paid for any given quarter and whether the securities will be automatically redeemed prior to maturity will depend on the closing prices of the underlying shares solely on the applicable valuation dates, regardless of the closing prices of the underlying shares on other days during the term of the securities. If the securities are not automatically redeemed, what you receive at maturity will depend solely on the final share price of the worst performing underlying shares on the final valuation date, and not on any other day during the term of the securities. Because the performance of the securities depends on the closing prices of the

underlying shares on a limited number of dates, the securities will be particularly sensitive to volatility in the closing prices of the underlying shares. You should understand that each of the underlying shares has historically been highly volatile.

The securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc. If we default on our obligations under the securities and Citigroup Inc. defaults on its guarantee obligations, you may not receive any amounts owed to you under the securities.

The securities will not be listed on any securities exchange and you may not be able to sell them prior to maturity. The securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the securities. CGMI currently intends to make a secondary market in relation to the securities and to provide an indicative bid price for the securities on a daily basis. Any indicative bid price for the securities provided by CGMI will be determined in CGMI's sole discretion, taking into account prevailing market conditions and other relevant factors, and will not be a representation by CGMI that the securities can be sold at that price, or at all. CGMI may suspend or terminate making a market and providing indicative bid prices without notice, at any time and for any reason. If CGMI suspends or terminates making a market, there may be no secondary market at all for the securities because it is likely that CGMI will be the only broker-dealer that is willing to buy your securities prior to maturity. Accordingly, an investor must be prepared to hold the securities until maturity.

The estimated value of the securities on the pricing date, based on CGMI's proprietary pricing models and our internal funding rate, is less than the issue price. The difference is attributable to certain costs associated with selling, structuring and hedging the securities that are included in the issue price. These costs include (i) the selling concession, structuring fee and other fees paid in connection with the offering of the securities, (ii) hedging and other costs incurred by us and our affiliates in connection with the offering of the securities and (iii) the expected profit (which may be more or less than actual profit) to CGMI or other of our affiliates in connection with hedging our obligations under the securities. These costs adversely affect the economic terms of the securities because, if they were lower, the economic terms of the securities would be more favorable to you. The economic terms of the securities are also likely to be adversely affected by the use of our internal funding rate, rather than our secondary market rate, to price the securities. See "The estimated value of the securities would be lower if it were calculated based on our secondary market rate" below.

The estimated value of the securities was determined for us by our affiliate using proprietary pricing models. CGMI derived the estimated value disclosed on the cover page of this pricing supplement from its proprietary pricing models. In doing so, it may have made discretionary judgments about the inputs to its models, such as the volatility of and correlation among the underlying shares, dividend yields on the underlying shares and interest rates. CGMI's views on these inputs may differ from your

February 2018 PS-6

Citigroup Global Markets Holdings Inc.

Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the Common Stock of Amazon.com, Inc., the Common Stock of General Electric Company and the Common Stock of Johnson & Johnson Due February 19, 2021

or others' views, and as an underwriter in this offering, CGMI's interests may conflict with yours. Both the models and the inputs to the models may prove to be wrong and therefore not an accurate reflection of the value of the securities. Moreover, the estimated value of the securities set forth on the cover page of this pricing supplement may differ from the value that we or our affiliates may determine for the securities for other purposes, including for accounting purposes. You should not invest in the securities because of the estimated value of the securities. Instead, you should be willing to hold the securities to maturity irrespective of the initial estimated value.

The estimated value of the securities would be lower if it were calculated based on our secondary market rate.

The estimated value of the securities included in this pricing supplement is calculated based on our internal funding rate, which is the rate at which we are willing to borrow funds through the issuance of the securities. Our internal funding rate is generally lower than our secondary market rate, which is the rate that CGMI will use in determining the value of the securities for purposes of any purchases of the securities from you in the secondary market. If the estimated value included in this pricing supplement were based on our secondary market rate, rather than our internal funding rate, it would likely be lower. We determine our internal funding rate based on factors such as the costs associated with the securities, which are generally higher than the costs associated with conventional debt securities, and our liquidity needs and preferences. Our internal funding rate is not the same as the coupon that is payable on the securities.

Because there is not an active market for traded instruments referencing our outstanding debt obligations, CGMI determines our secondary market rate based on the market price of traded instruments referencing the debt obligations of Citigroup Inc., our parent company and the guarantor of all payments due on the securities, but subject to adjustments that CGMI makes in its sole discretion. As a result, our secondary market rate is not a market-determined measure of our creditworthiness, but rather reflects the market's perception of our parent company's creditworthiness as adjusted for discretionary factors such as CGMI's preferences with respect to purchasing the securities prior to maturity.

The estimated value of the securities is not an indication of the price, if any, at which CGMI or any other person may be willing to buy the securities from you in the secondary market. Any such secondary market price will fluctuate over the term of the securities based on the market and other factors described in the next risk factor. Moreover, unlike the estimated value included in this pricing supplement, any value of the securities determined for purposes of a secondary market transaction will be based on our secondary market rate, which will likely result in a lower value for the securities than if our internal funding rate were used. In addition, any secondary market price for the securities will be reduced by a bid-ask spread, which may vary depending on the aggregate stated principal amount of the securities to be purchased in the secondary market transaction, and the expected cost of unwinding related hedging transactions. As a result, it is likely that any secondary market price for the securities will be less than the issue price.

The value of the securities prior to maturity will fluctuate based on many unpredictable factors. The value of your securities prior to maturity will fluctuate based on the price and volatility of the underlying shares and a number

of other factors, including the correlation among the underlying shares, dividend yields on the underlying shares, interest rates generally, the time remaining to maturity and our and Citigroup Inc.'s creditworthiness, as reflected in our secondary market rate. Changes in the prices of the underlying shares may not result in a comparable change in the value of your securities. You should understand that the value of your securities at any time prior to maturity may be significantly less than the issue price.

Immediately following issuance, any secondary market bid price provided by CGMI, and the value that will be indicated on any brokerage account statements prepared by CGMI or its affiliates, will reflect a temporary upward adjustment. The amount of this temporary upward adjustment will steadily decline to zero over the temporary adjustment period. See "Valuation of the Securities" in this pricing supplement.

Our offering of the securities is not a recommendation of any of the underlying shares. The fact that we are offering the securities does not mean that we believe that investing in an instrument linked to any of the underlying shares is likely to achieve favorable returns. In fact, as we are part of a global financial institution, our affiliates may have positions (including short positions) in the underlying shares or in instruments related to the underlying shares and may publish research or express opinions, that in each case are inconsistent with an investment linked to the underlying shares. These and other of our affiliates' activities may affect the prices of the underlying shares in a way that has a negative impact on your interests as a holder of the securities.

The prices of the underlying shares may be adversely affected by our or our affiliates' hedging and other trading activities. We have hedged our obligations under the securities through CGMI or other of our affiliates, who have taken positions directly in the underlying shares and other financial instruments related to the underlying shares and may adjust such positions during the term of the securities. Our affiliates also trade the underlying shares and other financial instruments related to the underlying shares on a regular basis (taking long or short positions or both), for their accounts, for other accounts under their management or to facilitate transactions on behalf of customers. These activities could affect the prices of the underlying shares in a way that negatively affects the value of the securities. They could also result in substantial returns for us or our affiliates while the value of the securities declines.

We and our affiliates may have economic interests that are adverse to yours as a result of our affiliates' business activities. Our affiliates may currently or from time to time engage in business with any underlying share issuer, including extending loans to, making equity investments in or providing advisory services to those issuers. In the course of this business, we or our affiliates may acquire non-public information about the underlying share issuers, which we will not disclose to you. Moreover,

February 2018 PS-7

Citigroup Global Markets Holdings Inc.

Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the Common Stock of Amazon.com, Inc., the Common Stock of General Electric Company and the Common Stock of Johnson & Johnson Due February 19, 2021

if any of our affiliates is or becomes a creditor of any such issuer, they may exercise any remedies against that issuer that are available to them without regard to your interests.

You will have no rights and will not receive dividends with respect to the underlying shares. As of February 13, 2018, Amazon.com, Inc. does not pay regular dividends. However, that may change, and if Amazon.com, Inc. starts to pay dividends during the term of the securities, you should understand that you will not receive any dividend payments under the securities. In addition, if any change to the underlying shares is proposed, such as an amendment to any underlying share issuer's organizational documents, you will not have the right to vote on such change. Any such change may adversely affect the market price of the applicable underlying shares.

Even if any underlying share issuer pays a dividend that it identifies as special or extraordinary, no adjustment will be required under the securities for that dividend unless it meets the criteria specified in the accompanying product supplement. In general, an adjustment will not be made under the terms of the securities for any cash dividend paid on any of the underlying shares unless the amount of the dividend per share, together with any other dividends paid in the same fiscal quarter, exceeds the dividend paid per share in the most recent fiscal quarter by an amount equal to at least 10% of the closing price of the applicable shares on the date of declaration of the dividend. Any dividend will reduce the closing price of the applicable underlying shares by the amount of the dividend per share. If the applicable underlying share issuer pays any dividend for which an adjustment is not made under the terms of the securities, holders of the securities may be adversely affected. See "Description of the Securities—Certain Additional Terms for Securities Linked to Company Shares or ETF Shares—Dilution and Reorganization Adjustments—Certain Extraordinary Cash Dividends" in the accompanying product supplement.

The securities will not be adjusted for all events that could affect the price of any of the underlying shares. For example, we will not make any adjustment for ordinary dividends or extraordinary dividends that do not meet the criteria described above, partial tender offers or additional public offerings of the underlying shares. Moreover, the adjustments we do make may not fully offset the dilutive or adverse effect of the particular event. Investors in the securities may be adversely affected by such an event in a circumstance in which a direct holder of any of the underlying shares would not.

If any of the underlying shares are delisted, we may call the securities prior to maturity for an amount that may be less than the stated principal amount. If we exercise this call right, you will receive the amount described under "Description of the Securities—Certain Additional Terms for Securities Linked to Company Shares or ETF Shares—Delisting of Company Shares" in the accompanying product supplement. This amount may be less, and possibly significantly less, than the stated principal amount of the securities.

The securities may become linked to shares of an issuer other than any original underlying share issuer upon the occurrence of a reorganization event or upon the delisting of any of the underlying shares. For example, if any underlying share issuer enters into a merger agreement that provides for holders of the applicable underlying shares to receive stock of another entity, the stock of such other entity will become the applicable underlying shares

for all purposes of the securities upon consummation of the merger. Additionally, if the applicable underlying shares are delisted and we do not exercise our call right, the calculation agent may, in its sole discretion, select shares of another issuer to be the applicable underlying shares. See “Description of the Securities—Certain Additional Terms for Securities Linked to Company Shares or ETF Shares—Dilution and Reorganization Adjustments” and “—Delisting of Company Shares” in the accompanying product supplement.

The calculation agent, which is an affiliate of ours, will make important determinations with respect to the securities. If certain events occur, such as market disruption events, corporate events with respect to any of the underlying share issuers that may require a dilution adjustment or the delisting of the applicable underlying shares, CGMI, as calculation agent, will be required to make discretionary judgments that could significantly affect your return on the securities. In making these judgments, the calculation agent’s interests as an affiliate of ours could be adverse to your interests as a holder of the securities.

The U.S. federal tax consequences of an investment in the securities are unclear. There is no direct legal authority regarding the proper U.S. federal tax treatment of the securities, and we do not plan to request a ruling from the Internal Revenue Service (the “IRS”). Consequently, significant aspects of the tax treatment of the securities are uncertain, and the IRS or a court might not agree with the treatment of the securities as prepaid forward contracts. If the IRS were successful in asserting an alternative treatment of the securities, the tax consequences of the ownership and disposition of the securities might be materially and adversely affected. In particular, if a security were treated as a debt instrument for U.S. federal income tax purposes rather than as a prepaid forward contract, (i) you would generally be required to recognize income over the term of the security and (ii) any gain recognized with respect to the security would generally be treated as ordinary income and not as capital gain. As described below under “United States Federal Tax Considerations,” in 2007 the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect.

In addition, Section 871(m) of the Internal Revenue Code of 1986, as amended (the “Code”), imposes a withholding tax of up to 30% on “dividend equivalents” paid or deemed paid to non-U.S. investors in respect of certain financial instruments linked to U.S. equities. In light of Treasury regulations, as modified by an IRS notice, that provide a general exemption for financial instruments

Citigroup Global Markets Holdings Inc.

Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the Common Stock of Amazon.com, Inc., the Common Stock of General Electric Company and the Common Stock of Johnson & Johnson Due February 19, 2021

issued in 2018 that do not have a “delta” of one, the securities should not be subject to withholding under Section 871(m). However, the IRS could challenge this conclusion. If withholding applies to the securities, we will not be required to pay any additional amounts with respect to amounts withheld.

You should read carefully the discussion under “United States Federal Tax Considerations” and “Risk Factors Relating to the Securities” in the accompanying product supplement and “United States Federal Tax Considerations” in this pricing supplement. You should also consult your tax adviser regarding the U.S. federal tax consequences of an investment in the securities, as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Information About Amazon.com, Inc.

Amazon.com, Inc. is a web-based business that serves consumers, sellers, developers, enterprises and content creators. The common stock of Amazon.com, Inc. is registered under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Information provided to or filed with the SEC by Amazon.com, Inc. pursuant to the Exchange Act can be located by reference to the SEC file number 000-22513 through the SEC’s website at <http://www.sec.gov>. In addition, information regarding Amazon.com, Inc. may be obtained from other sources including, but not limited to, press releases, newspaper articles and other publicly disseminated documents. The common stock of Amazon.com, Inc. trades on the NASDAQ Global Select Market under the ticker symbol “AMZN.”

This pricing supplement relates only to the securities offered hereby and does not relate to the common stock of Amazon.com, Inc. or other securities of Amazon.com, Inc. We have derived all disclosures contained in this pricing supplement regarding Amazon.com, Inc. from the publicly available documents described above. In connection with the offering of the securities, none of Citigroup Global Markets Holdings Inc., Citigroup Inc. or CGMI has participated in the preparation of such documents or made any due diligence inquiry with respect to Amazon.com, Inc.

The securities represent obligations of Citigroup Global Markets Holdings Inc. (guaranteed by Citigroup Inc.) only. Amazon.com, Inc. is not involved in any way in this offering and has no obligation relating to the securities or to holders of the securities.

Neither we nor any of our affiliates make any representation to you as to the performance of the common stock of Amazon.com, Inc.

Historical Information

The graph below shows the closing prices of the shares of common stock of Amazon.com, Inc. for each day such price was available from January 2, 2008 to February 13, 2018. The table that follows shows the high and low closing prices of, and dividends paid on, the shares of common stock of Amazon.com, Inc. for each quarter in that same period. We obtained the closing prices and other information below from Bloomberg L.P., without independent verification. If certain corporate transactions occurred during the historical period shown below, including, but not limited to, spin-offs or mergers, then the closing prices of the shares of common stock of Amazon.com, Inc. shown below for the period prior to the occurrence of any such transaction have been adjusted by Bloomberg L.P. as if any such transaction had occurred prior to the first day in the period shown below. **You should not take the historical prices of the shares of common stock of Amazon.com, Inc. as an indication of future performance.**

This pricing supplement relates only to the securities offered hereby and does not relate to the common stock of Johnson & Johnson or other securities of Johnson & Johnson. We have derived all disclosures contained in this pricing supplement regarding Johnson & Johnson from the publicly available documents described above. In connection with the offering of the securities, none of Citigroup Global Markets Holdings Inc., Citigroup Inc. or CGMI has participated in the preparation of such documents or made any due diligence inquiry with respect to Johnson & Johnson.

The securities represent obligations of Citigroup Global Markets Holdings Inc. (guaranteed by Citigroup Inc.) only. Johnson & Johnson is not involved in any way in this offering and has no obligation relating to the securities or to holders of the securities.

Neither we nor any of our affiliates make any representation to you as to the performance of the common stock of Johnson & Johnson.

Historical Information

The graph below shows the closing prices of the shares of common stock of Johnson & Johnson for each day such price was available from January 2, 2008 to February 13, 2018. The table that follows shows the high and low closing prices of, and dividends paid on, the shares of common stock of Johnson & Johnson for each quarter in that same period. We obtained the closing prices and other information below from Bloomberg L.P., without independent verification. If certain corporate transactions occurred during the historical period shown below, including, but not limited to, spin-offs or mergers, then the closing prices of the shares of common stock of Johnson & Johnson shown below for the period prior to the occurrence of any such transaction have been adjusted by Bloomberg L.P. as if any

such transaction had occurred prior to the first day in the period shown below. **You should not take the historical prices of the shares of common stock of Johnson & Johnson as an indication of future performance.**

Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the Common Stock of Amazon.com, Inc., the Common Stock of General Electric Company and the Common Stock of Johnson & Johnson Due February 19, 2021

United States Federal Tax Considerations

You should read carefully the discussion under “United States Federal Tax Considerations” and “Risk Factors Relating to the Securities” in the accompanying product supplement and “Summary Risk Factors” in this pricing supplement.

There are no statutory, judicial or administrative authorities that address the U.S. federal income tax treatment of the securities or instruments that are similar to the securities. In the opinion of our counsel, Davis Polk & Wardwell LLP, which is based on current market conditions, it is more likely than not that a security will be treated as a prepaid forward contract for U.S. federal income tax purposes. By purchasing a security, you agree (in the absence of an administrative determination or judicial ruling to the contrary) to this treatment. There is uncertainty regarding this treatment, and the IRS or a court might not agree with it.

In particular, if a security were treated as a debt instrument for U.S. federal income tax purposes rather than as a prepaid forward contract, (i) you would generally be required to recognize income over the term of the security and (ii) any gain recognized with respect to the security would generally be treated as ordinary income and not as capital gain. Except where stated otherwise, the remaining discussion is based on the treatment of a security as a prepaid forward contract.

Subject to the discussion in “United States Federal Tax Considerations” in the accompanying product supplement, the following U.S. federal income tax consequences should result under current law:

You should not recognize taxable income over the term of the securities prior to maturity, other than pursuant to a sale or exchange.

Upon a sale or exchange of a security (including retirement at maturity), you should recognize capital gain or loss equal to the difference between the amount realized and your tax basis in the security. Such gain or loss should be long-term capital gain or loss if you held the security for more than one year.

Subject to the discussions below under “Possible Withholding Under Section 871(m) of the Code” and in “United States Federal Tax Considerations” in the accompanying product supplement, if you are a Non-U.S. Holder (as defined in the accompanying product supplement) of the securities, you generally should not be subject to U.S. federal withholding or income tax in respect of any amount paid to you with respect to the securities, provided that (i) income in respect of the securities is not effectively connected with your conduct of a trade or business in the United States, and (ii) you

comply with the applicable certification requirements.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect.

Possible Withholding Under Section 871(m) of the Code. As discussed under “United States Federal Tax Considerations—Tax Consequences to Non-U.S. Holders” in the accompanying product supplement, Section 871(m) of the Code and Treasury regulations promulgated thereunder (“Section 871(m)”) generally impose a 30% withholding tax on dividend equivalents paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities (“U.S. Underlying Equities”) or indices that include U.S. Underlying Equities. Section 871(m) generally applies to instruments that substantially replicate the economic performance of one or more U.S. Underlying Equities, as determined based on tests set forth in the applicable Treasury regulations (a “Specified Security”). However, the regulations, as modified by an IRS notice, exempt financial instruments issued in 2018 that do not have a “delta” of one. Based on the terms of the securities and representations provided by us, our counsel is of the opinion that the securities should not be treated as transactions that have a “delta” of one within the meaning of the regulations with respect to any U.S. Underlying Equity and, therefore, should not be Specified Securities subject to withholding tax under Section 871(m).

A determination that the securities are not subject to Section 871(m) is not binding on the IRS, and the IRS may disagree with this treatment. Moreover, Section 871(m) is complex and its application may depend on your particular circumstances. For example, if you enter into other transactions relating to a U.S. Underlying Equity, you could be subject to withholding tax or income tax liability under Section 871(m) even if the securities are not Specified Securities subject to Section 871(m) as a general matter. You should consult your tax adviser regarding the potential application of Section 871(m) to the securities.

If withholding tax applies to the securities, we will not be required to pay any additional amounts with respect to amounts withheld.

You should read the section entitled “United States Federal Tax Considerations” in the accompanying product supplement. The preceding discussion, when read in combination with that section, constitutes the full opinion of Davis Polk & Wardwell LLP regarding the material U.S. federal tax consequences of owning and disposing of the securities.

February 2018 PS-15

Citigroup Global Markets Holdings Inc.

Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the Common Stock of Amazon.com, Inc., the Common Stock of General Electric Company and the Common Stock of Johnson & Johnson Due February 19, 2021

You should also consult your tax adviser regarding all aspects of the U.S. federal income and estate tax consequences of an investment in the securities and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Supplemental Plan of Distribution

CGMI, an affiliate of Citigroup Global Markets Holdings Inc. and the underwriter of the sale of the securities, is acting as principal and will receive an underwriting fee of up to \$20.00 for each \$1,000 security sold in this offering. Selected dealers not affiliated with CGMI and their financial advisors will collectively receive from CGMI a selling concession of up to \$20.00 for each \$1,000 security they sell. Selected dealers through whom we distribute securities may enter into arrangements with other institutions with respect to the distribution of the securities, and those institutions may share in the commissions, discounts or other compensation received by our selected dealers, may be compensated separately and may also receive commissions from purchasers for whom they may act as agents. In addition, CGMI will pay selected dealers participating in the distribution of the securities a structuring fee of \$4.00 for each security sold in this offering. We may also engage other firms to provide marketing or promotional services in connection with the distribution of the securities. CGMI will pay these service providers a fee of up to \$2.50 per security in consideration for providing marketing, education, structuring or referral services with respect to financial advisors or selected dealers.

CGMI is an affiliate of ours. Accordingly, this offering will conform with the requirements addressing conflicts of interest when distributing the securities of an affiliate set forth in Rule 5121 of the Financial Industry Regulatory Authority. Client accounts over which Citigroup Inc. or its subsidiaries have investment discretion will not be permitted to purchase the securities, either directly or indirectly, without the prior written consent of the client.

Secondary market sales of securities typically settle two business days after the date on which the parties agree to the sale. Because the issue date for the securities is more than two business days after the pricing date, investors who wish to sell the securities at any time prior to the second business day preceding the issue date will be required to specify an alternative settlement date for the secondary market sale to prevent a failed settlement. Investors should consult their own investment advisors in this regard.

See “Plan of Distribution; Conflicts of Interest” in the accompanying product supplement and “Plan of Distribution” in each of the accompanying prospectus supplement and prospectus for additional information.

A portion of the net proceeds from the sale of the securities will be used to hedge our obligations under the securities. We have hedged our obligations under the securities through CGMI or other of our affiliates. CGMI or such other of our affiliates may profit from this hedging activity even if the value of the securities declines. This hedging activity could affect the closing prices of any of the underlying shares and, therefore, the value of and your return on the securities. For additional information on the ways in which our counterparties may hedge our obligations under the securities, see “Use of Proceeds and Hedging” in the accompanying prospectus.

Valuation of the Securities

CGMI calculated the estimated value of the securities set forth on the cover page of this pricing supplement based on proprietary pricing models. CGMI’s proprietary pricing models generated an estimated value for the securities by estimating the value of a hypothetical package of financial instruments that would replicate the payout on the securities, which consists of a fixed-income bond (the “bond component”) and one or more derivative instruments underlying the economic terms of the securities (the “derivative component”). CGMI calculated the estimated value of the bond component using a discount rate based on our internal funding rate. CGMI calculated the estimated value of the derivative component based on a proprietary derivative-pricing model, which generated a theoretical price for the instruments that constitute the derivative component based on various inputs, including the factors described under “Summary Risk Factors—The value of the securities prior to maturity will fluctuate based on many unpredictable factors” in this pricing supplement, but not including our or Citigroup Inc.’s creditworthiness. These inputs may be market-observable or may be based on assumptions made by CGMI in its discretionary judgment.

For a period of approximately three months following issuance of the securities, the price, if any, at which CGMI would be willing to buy the securities from investors, and the value that will be indicated for the securities on any brokerage account statements prepared by CGMI or its affiliates (which value CGMI may also publish through one or more financial information vendors), will reflect a temporary upward adjustment from the price or value that would otherwise be determined. This temporary upward adjustment represents a portion of the hedging profit expected to be realized by CGMI or its affiliates over the term of the securities. The amount of this temporary upward adjustment will decline to zero on a straight-line basis over the three-month temporary adjustment period. However, CGMI is not obligated to buy the securities from investors at any time. See “Summary Risk Factors—The securities will not be listed on any securities exchange and you may not be able to sell them prior to maturity.”

Certain Selling Restrictions

Hong Kong Special Administrative Region

The contents of this pricing supplement and the accompanying product supplement, prospectus supplement and prospectus have not been reviewed by any regulatory authority in the Hong Kong Special Administrative Region of the People’s Republic of China (“Hong Kong”). Investors are advised to exercise caution in relation to the offer. If investors are in any doubt about any of the contents of this pricing supplement and the accompanying product

supplement, prospectus supplement and prospectus, they should obtain independent professional advice.

February 2018 PS-16

Citigroup Global Markets Holdings Inc.

Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the Common Stock of Amazon.com, Inc., the Common Stock of General Electric Company and the Common Stock of Johnson & Johnson Due February 19, 2021

The securities have not been offered or sold and will not be offered or sold in Hong Kong by means of any document, other than

- (i) to persons whose ordinary business is to buy or sell shares or debentures (whether as principal or agent); or
- (ii) to “professional investors” as defined in the Securities and Futures Ordinance (Cap. 571) of Hong Kong (the “Securities and Futures Ordinance”) and any rules made under that Ordinance; or

in other circumstances which do not result in the document being a “prospectus” as defined in the Companies (iii) Ordinance (Cap. 32) of Hong Kong or which do not constitute an offer to the public within the meaning of that Ordinance; and

There is no advertisement, invitation or document relating to the securities which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to securities which are or are intended to be disposed of only to persons outside Hong Kong or only to “professional investors” as defined in the Securities and Futures Ordinance and any rules made under that Ordinance.

Non-insured Product: These securities are not insured by any governmental agency. These securities are not bank deposits and are not covered by the Hong Kong Deposit Protection Scheme.

Singapore

This pricing supplement and the accompanying product supplement, prospectus supplement and prospectus have not been registered as a prospectus with the Monetary Authority of Singapore, and the securities will be offered pursuant to exemptions under the Securities and Futures Act, Chapter 289 of Singapore (the “Securities and Futures Act”). Accordingly, the securities may not be offered or sold or made the subject of an invitation for subscription or purchase nor may this pricing supplement or any other document or material in connection with the offer or sale or invitation for subscription or purchase of any securities be circulated or distributed, whether directly or indirectly, to any person in Singapore other than (a) to an institutional investor pursuant to Section 274 of the Securities and Futures Act, (b) to a relevant person under Section 275(1) of the Securities and Futures Act or to any person pursuant to Section 275(1A) of the Securities and Futures Act and in accordance with the conditions specified in Section 275 of the Securities and Futures Act, or (c) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the Securities and Futures Act. Where the securities are subscribed or purchased under Section 275 of the Securities

and Futures Act by a relevant person which is:

a corporation (which is not an accredited investor (as defined in Section 4A of the Securities and Futures Act)) the (a) sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or

a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary is an individual who is an accredited investor, securities (as defined in Section 239(1) of the Securities (b) and Futures Act) of that corporation or the beneficiaries' rights and interests (howsoever described) in that trust shall not be transferable for 6 months after that corporation or that trust has acquired the relevant securities pursuant to an offer under Section 275 of the Securities and Futures Act except:

to an institutional investor or to a relevant person defined in Section 275(2) of the Securities and Futures Act or to (i) any person arising from an offer referred to in Section 275(1A) or Section 276(4)(i)(B) of the Securities and Futures Act; or

(ii) where no consideration is or will be given for the transfer; or

(iii) where the transfer is by operation of law; or

(iv) pursuant to Section 276(7) of the Securities and Futures Act; or

(v) as specified in Regulation 32 of the Securities and Futures (Offers of Investments) (shares and Debentures) Regulations 2005 of Singapore.

Any securities referred to herein may not be registered with any regulator, regulatory body or similar organization or institution in any jurisdiction.

The securities are Specified Investment Products (as defined in the Notice on Recommendations on Investment Products and Notice on the Sale of Investment Product issued by the Monetary Authority of Singapore on 28 July 2011) that is neither listed nor quoted on a securities market or a futures market.

Non-insured Product: These securities are not insured by any governmental agency. These securities are not bank deposits. These securities are not insured products subject to the provisions of the Deposit Insurance and Policy Owners' Protection Schemes Act 2011 of Singapore and are not eligible for deposit insurance coverage under the Deposit Insurance Scheme.

Prohibition of Sales to EEA Retail Investors

The securities may not be offered, sold or otherwise made available to any retail investor in the European Economic Area. For the purposes of this provision:

- (a) the expression “retail investor” means a person who is one (or more) of the following:

February 2018 PS-17

Citigroup Global Markets Holdings Inc.

Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the Common Stock of Amazon.com, Inc., the Common Stock of General Electric Company and the Common Stock of Johnson & Johnson Due February 19, 2021

- (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “MiFID II”); or
- (ii) a customer within the meaning of Directive 2002/92/EC, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or
- (iii) not a qualified investor as defined in Directive 2003/71/EC; and

the expression “offer” includes the communication in any form and by any means of sufficient information on the (b) terms of the offer and the securities offered so as to enable an investor to decide to purchase or subscribe the securities.

Validity of the Securities

In the opinion of Davis Polk & Wardwell LLP, as special products counsel to Citigroup Global Markets Holdings Inc., when the securities offered by this pricing supplement have been executed and issued by Citigroup Global Markets Holdings Inc. and authenticated by the trustee pursuant to the indenture, and delivered against payment therefor, such securities and the related guarantee of Citigroup Inc. will be valid and binding obligations of Citigroup Global Markets Holdings Inc. and Citigroup Inc., respectively, enforceable in accordance with their respective terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors’ rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), provided that such counsel expresses no opinion as to the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above. This opinion is given as of the date of this pricing supplement and is limited to the laws of the State of New York, except that such counsel expresses no opinion as to the application of state securities or Blue Sky laws to the securities.

In giving this opinion, Davis Polk & Wardwell LLP has assumed the legal conclusions expressed in the opinions set forth below of Scott L. Flood, General Counsel and Secretary of Citigroup Global Markets Holdings Inc., and Barbara Politi, Assistant General Counsel—Capital Markets of Citigroup Inc. In addition, this opinion is subject to the assumptions set forth in the letter of Davis Polk & Wardwell LLP dated April 7, 2017, which has been filed as an exhibit to a Current Report on Form 8-K filed by Citigroup Inc. on April 7, 2017, that the indenture has been duly authorized, executed and delivered by, and is a valid, binding and enforceable agreement of, the trustee and that none of the terms of the securities nor the issuance and delivery of the securities and the related guarantee, nor the compliance by Citigroup Global Markets Holdings Inc. and Citigroup Inc. with the terms of the securities and the related guarantee respectively, will result in a violation of any provision of any instrument or agreement then binding upon Citigroup Global Markets Holdings Inc. or Citigroup Inc., as applicable, or any restriction imposed by any court or governmental body having jurisdiction over Citigroup Global Markets Holdings Inc. or Citigroup Inc., as applicable.

In the opinion of Scott L. Flood, Secretary and General Counsel of Citigroup Global Markets Holdings Inc., (i) the terms of the securities offered by this pricing supplement have been duly established under the indenture and the Board of Directors (or a duly authorized committee thereof) of Citigroup Global Markets Holdings Inc. has duly authorized the issuance and sale of such securities and such authorization has not been modified or rescinded; (ii) Citigroup Global Markets Holdings Inc. is validly existing and in good standing under the laws of the State of New York; (iii) the indenture has been duly authorized, executed and delivered by Citigroup Global Markets Holdings Inc.; and (iv) the execution and delivery of such indenture and of the securities offered by this pricing supplement by Citigroup Global Markets Holdings Inc., and the performance by Citigroup Global Markets Holdings Inc. of its obligations thereunder, are within its corporate powers and do not contravene its certificate of incorporation or bylaws or other constitutive documents. This opinion is given as of the date of this pricing supplement and is limited to the laws of the State of New York.

Scott L. Flood, or other internal attorneys with whom he has consulted, has examined and is familiar with originals, or copies certified or otherwise identified to his satisfaction, of such corporate records of Citigroup Global Markets Holdings Inc., certificates or documents as he has deemed appropriate as a basis for the opinions expressed above. In such examination, he or such persons has assumed the legal capacity of all natural persons, the genuineness of all signatures (other than those of officers of Citigroup Global Markets Holdings Inc.), the authenticity of all documents submitted to him or such persons as originals, the conformity to original documents of all documents submitted to him or such persons as certified or photostatic copies and the authenticity of the originals of such copies.

In the opinion of Barbara Politi, Assistant General Counsel—Capital Markets of Citigroup Inc., (i) the Board of Directors (or a duly authorized committee thereof) of Citigroup Inc. has duly authorized the guarantee of such securities by Citigroup Inc. and such authorization has not been modified or rescinded; (ii) Citigroup Inc. is validly existing and in good standing under the laws of the State of Delaware; (iii) the indenture has been duly authorized, executed and delivered by Citigroup Inc.; and (iv) the execution and delivery of such indenture, and the performance by Citigroup Inc. of its obligations thereunder, are within its corporate powers and do not contravene its certificate of incorporation or bylaws or other constitutive documents. This opinion is given as of the date of this pricing supplement and is limited to the General Corporation Law of the State of Delaware.

Barbara Politi, or other internal attorneys with whom she has consulted, has examined and is familiar with originals, or copies certified or otherwise identified to her satisfaction, of such corporate records of Citigroup Inc., certificates or documents as she has deemed appropriate as a basis for the opinions expressed above. In such examination, she or such persons has assumed the legal capacity of all natural persons, the genuineness of all signatures (other than those of officers of Citigroup Inc.), the authenticity of all documents submitted to her or such persons as originals, the conformity to original documents of all documents submitted to her or such persons as certified or photostatic copies and the authenticity of the originals of such copies.
