SCHEDULE OF INVESTMENTS (continued)  
July 31, 2009 (Unaudited)**

- (A) Portfolio securities listed on recognized United States or foreign securities exchanges are valued at the last quoted sales price in the principal market where they are traded. Listed securities with no such sales price and unlisted securities are valued at the mean between the current bid and asked prices, if any, of two brokers. Short-term investments having maturities of sixty days or less are valued at amortized cost (original purchase cost as adjusted for amortization of premium or accretion of discount) which when combined with accrued interest approximates market value. Open end investment

companies are valued at net asset value per share. Securities for which market quotations are readily available are valued at current market value. Securities for which market quotations are not readily available are valued at fair value using methods determined in good faith by or at the direction of the Board of Directors considering relevant factors, data and information including, if relevant, the market value of freely tradable securities of the same class in the principal market on which such securities are normally traded. Direct Investments not traded on an exchange are valued at fair value as determined by the Board of Directors based on financial and other information

supplied by the  
Direct  
Investment  
Manager  
regarding each  
Direct  
Investment.  
Forward  
currency  
contracts are  
valued at the  
current cost of  
offsetting the  
contract.

The Fund's  
investments in  
China  
companies  
involve certain  
risks not  
typically  
associated with  
investments in  
securities of  
U.S. companies  
or the U.S.  
Government,  
including risks  
relating to

(see Note B).

- (1) A portion or all of the security was held on loan. As of July 31, 2009, the market value of the securities loaned was \$29,571,451.
- (2) Security valued at fair value using methods determined in good faith by or at the direction of the Board of Directors.
- (3) Equity linked securities issued by Citigroup Global Markets Holdings.
- (4) Equity linked securities issued by Credit Lyonnais (CLSA).
- (5) Direct investments are generally restricted as to resale and do not have a readily available resale market. On the date of acquisition of each direct investment, there were no market quotations on similar securities, and

such  
investments  
were therefore  
valued in good  
faith by the  
Board of  
Directors at fair  
market value.

See notes to Schedule of Investments.

**Table of Contents**

**THE CHINA FUND, INC.  
SCHEDULE OF INVESTMENTS (continued)  
July 31, 2009 (Unaudited)**

The Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements ( FAS 157 ), effective November 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. FAS 157 established a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The valuation techniques used by the Fund to measure fair value during the nine months ended July 31, 2009 maximized the use of observable inputs and minimized the use of unobservable inputs. The Fund utilized the following fair value techniques: a multi-dimensional relational pricing model, option adjusted spread pricing and estimations of the price that would have prevailed in a liquid market for an international equity given information available at the time of evaluation.

The following is a summary of the inputs used as of July 31, 2009 in valuing the Fund's investments carried at value: See notes to Schedule of Investments.
