Notes to Schedule of Investments

- (A) Portfolio securities listed on recognized United States or foreign securities exchanges are valued at the last quoted sales price in the principal market where they are traded. Listed securities with no such sales price and unlisted securities are valued at the mean between the current bid and asked prices, if any, of two brokers. Short-term investments having maturities of sixty days or less are valued at amortized cost (original purchase cost as adjusted for amortization of premium or accretion of discount) which when combined with accrued interest approximates market value.
Open end

investment companies are valued at net asset value per share. Securities for which market quotations are readily available are valued at current market value. Securities for which market quotations are not readily available are valued at fair value using methods determined in good faith by or at the direction of the Board of Directors considering relevant factors, data and information including, if relevant, the market value of freely tradable securities of the same class in the principal market on which such securities are normally traded. Direct Investments not traded on an exchange are valued at fair value as determined by the Board of Directors based on financial and other

Summary of Fair Value Disclosure

In accordance with FASB ASC 820-10, *Fair Value Measurements and Disclosures*, the Fund discloses the fair value of its investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. The hierarchy gives the highest priority to valuations based upon unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to valuations based upon unobservable inputs that are significant to the valuation (level 3 measurements). FASB ASC 820-10-35-39 to 55 provides three levels of the fair value hierarchy as follows:

Level 1 Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access at the measurement date.

Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active.

Level 3 Inputs that are unobservable.

The following is a summary of the inputs used as of July 31, 2010 in valuing the Fund's investments carried at value:
