**PROSPECTUS SUPPLEMENT
(To Prospectus dated February 13, 2004)**

11,500,000 Shares

Common Stock

The selling stockholders named in this prospectus may offer up to 11,500,000 common shares of Luminent Mortgage Capital, Inc. We will not receive any portion of the proceeds from their sale of our shares. Our common stock is subject to transfer restrictions designed to preserve our status as a real estate investment trust. See Description of Capital Stock-Transfer Restrictions in the prospectus accompanying this prospectus supplement.

We recently completed our initial public offering of 13,110,000 shares of common stock and another public offering of an additional 12,000,000 share of common stock.

Our common stock is listed on the New York Stock Exchange under the symbol LUM. On May 5, 2004 the last reported sale price of our common stock on the NYSE was \$13.25 per share.

Investing in our common stock involves risks. See Risk Factors beginning on page S-10 of this prospectus supplement for a discussion of risks relating to our common stock, including, among others:

We commenced operations in June 2003 and have a limited operating history. Our manager, Seneca Capital Management LLC, or Seneca, has no prior experience managing a REIT. Accordingly, we might not be able to operate our business or implement our operating policies and strategies successfully.

Our investment strategy permits us to invest up to 10% of our assets in unrated mortgage-related assets, including mortgage-backed securities rated below investment grade. These assets carry an increased likelihood of default or rating downgrade relative to investment-grade assets, which may cause us to suffer losses.

Interest rate mismatches between our mortgage-backed securities and our borrowings used to fund our purchases of mortgage-backed securities might reduce our net income or result in a loss during periods of changing interest rates.

Increased levels of prepayments on the mortgages underlying our mortgage-backed securities might decrease our net interest income or result in a net loss.

We generally seek to borrow eight to 12 times the amount of our equity. Such leveraging could reduce our net income and our cash available for distributions or cause us to suffer losses.

Our board of directors may change our operating policies and strategies without prior notice to you or stockholder approval and such changes could harm our business and results of operations and the value of our stock.

Our results may suffer as a consequence of a potential conflict of interest arising out of our relationship with Seneca, on the one hand, and Seneca's relationship with other third parties, on the other hand. In addition, this potential conflict may reduce the amount of time and effort that Seneca devotes to managing our business and may result in suitable investment opportunities being allocated to other entities.

We pay Seneca incentive compensation based on our portfolio's performance. Accordingly, Seneca may recommend riskier or more speculative investments in an effort to maximize its incentive compensation.

The selling stockholders are offering these shares of common stock. The selling stockholders may sell all or a portion of these shares from time to time in market transactions through the NYSE or any other stock exchange or market on which our common stock is listed, in negotiated transactions or otherwise, and at prices and on terms that will be determined by the then prevailing market price or at negotiated prices directly or through a broker or brokers, who may act as agent or as principal or by a combination of such methods of sale. The selling stockholders will receive all proceeds from the sale of the shares of our common stock. For additional information on the methods of sale, you should refer to the section entitled "Plan of Distribution" on page 107 of the prospectus accompanying this prospectus supplement.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is May 7, 2004

This document is in two parts. The first part is this prospectus supplement, which adds to and updates information contained in the accompanying prospectus. The second part is the accompanying prospectus, which describes this offering and gives more general information about the shares of common stock being offered by our selling stockholders. To the extent there is a conflict between the information contained in this prospectus supplement, on the one hand, and the information contained in the accompanying prospectus, on the other hand, the information in this prospectus supplement shall control.

You should rely only on the information contained in this prospectus supplement and the accompanying prospectus. We have not authorized anyone to provide you with information that is different. This prospectus supplement and the accompanying prospectus may be used only where it is legal to sell these securities. The information in this prospectus supplement and the accompanying prospectus may be accurate only on the date of this prospectus supplement.

PROSPECTUS SUPPLEMENT SUMMARY

This summary highlights the material information contained elsewhere in this prospectus supplement and the accompanying prospectus. You should read this entire prospectus supplement and the accompanying prospectus carefully, including the section titled Risk Factors and our financial statements and the notes thereto before making an investment in our common stock. As used in this prospectus, Luminent, company, we, our, and us refer to Luminent Mortgage Capital, Inc., except where the context otherwise requires.

Luminent Mortgage Capital, Inc.

We were incorporated in April 2003 to invest primarily in U.S. agency and other highly-rated, single-family, adjustable-rate, hybrid adjustable-rate and fixed-rate mortgage-backed securities, which we acquire in the secondary market. Our strategy is to acquire mortgage-related assets, finance these purchases in the capital markets and use leverage in order to provide an attractive return on stockholders' equity. Through this strategy, we seek to earn income, which is generated from the spread between the yield on our earning assets and our costs, including the interest cost of the funds we borrow.

We commenced operations in June 2003, following the completion of a private placement of our common stock, in which we raised net proceeds of approximately \$159.7 million. On December 18, 2003, we completed the initial public offering of our shares of common stock and began trading on the New York Stock Exchange, or NYSE, under the trading symbol LUM on December 19, 2003. The initial public offering raised approximately \$170.4 million in gross proceeds. We received the net proceeds from our initial public offering in late December. As of March 31, 2004, we had invested all of the net proceeds from that offering. On March 29, 2004, we completed a public offering of 12,000,000 shares of common stock. On April 2, 2004, we received proceeds from the public offering in the amount of \$157.5 million, net of underwriting discount and other offering costs. Because of the timing of this offering, we had not fully levered our portfolio at March 31, 2004 to within our target range of eight to 12 times the amount of our equity. As a result, the total amount of mortgage-backed securities and repurchase agreement liabilities as of March 31, 2004 were lower than they will be once our portfolio is fully levered through additional repurchase agreement liabilities and related mortgage-backed security purchases. We invest primarily in adjustable-rate and hybrid adjustable-rate mortgage-backed securities. Adjustable-rate mortgage-backed securities have interest rates that reset periodically, typically every six months or on an annual basis. Hybrid adjustable-rate mortgage-backed securities have interest rates that are fixed for the first few years of the loan—typically three, five, seven or 10 years—and thereafter reset periodically in a manner similar to adjustable-rate mortgage-backed securities. As of March 31, 2004, approximately 4.1% of our investment portfolio was comprised of adjustable-rate mortgage-backed securities and approximately 94.6% was comprised of hybrid adjustable-rate mortgage-backed securities. In addition, as of March 31, 2004, 72% of the mortgage-backed securities in our investment portfolio were guaranteed by Fannie Mae, Freddie Mac or the Government National Mortgage Administration, or Ginnie Mae, and the remaining 28% had AAA credit ratings from at least one nationally-recognized statistical rating agency.

We have acquired and will seek to acquire additional assets that will produce competitive returns, taking into consideration the amount and nature of the anticipated returns from the investment, our ability to pledge the investment for secured, collateralized borrowings and the costs associated with financing, managing, securitizing and reserving for these investments. All of the mortgage-backed securities that we acquired with the net proceeds of our recent initial public offering, or IPO, are agency-backed or have AAA credit ratings from at least one nationally-recognized statistical rating agency, and most of the securities are hybrid adjustable-rate mortgage-backed securities. As of December 31, 2003, the market for residential mortgage debt that had been securitized into mortgage-backed securities was approximately \$4.2 trillion, approximately \$3.4 trillion of which was agency-backed and, therefore, generally consistent with our investment guidelines. As of December 31, 2003, approximately \$51.3 billion of the available mortgage-backed securities were held by REITs.

We have financed our acquisition of mortgage-related assets by investing our equity and by borrowing at short-term rates under repurchase agreements. We intend to continue to finance our acquisitions in this manner. We generally seek to borrow between eight and 12 times the amount of our equity. We actively manage the adjustment periods and the selection of the interest rate indices of our borrowings against the adjustment periods and the selection of indices on our mortgage-related assets in order to manage our liquidity and interest rate related risks. We may also choose to engage in various hedging activities designed to match more closely the terms of our assets and liabilities. As of March 31, 2004, we had entered into hedging arrangements as described in "-Recent Developments" below.

As a long-term holder of mortgage-backed securities we are focused on acquiring, financing and managing a diverse portfolio of mortgage-backed securities with a variety of characteristics that we believe will provide attractive returns in a multitude of interest rate and prepayment environments. We do not construct our overall investment portfolio in order to express a directional expectation for interest rates or mortgage prepayment rates.

S-1

Table of Contents

We review the credit risk associated with each potential investment and may diversify our portfolio to avoid undue geographic, insurer, industry and other types of concentrations. By maintaining a large percentage of our assets in high quality and highly-rated assets, many of which are guaranteed under limited circumstances as to payment of a limited amount of principal and interest by federal agencies or federally chartered entities such as Fannie Mae, Freddie Mac or Ginnie Mae, we believe we can mitigate our exposure to losses from credit risk.

In addition to the strategies described above, we intend to use other strategies to seek to generate earnings and distributions to our stockholders, which may include the following:

increasing the size of our balance sheet at a rate faster than the rate of increase in our operating expenses;

using leverage to increase the size of our balance sheet; and

lowering our effective borrowing costs over time by seeking direct funding with collateralized lenders.

We are externally managed and advised by Seneca Capital Management LLC, or Seneca, pursuant to a management agreement with Seneca. We have a full-time chief financial officer, who is not employed by Seneca, to provide us with dedicated financial management, analysis and investor relations capability.

We expect to qualify and will elect to be taxed as a real estate investment trust, or REIT, under the Internal Revenue Code of 1986, as amended, and as such will routinely distribute substantially all of the income generated from our operations to our stockholders. As long as we retain our REIT status, we generally will not be subject to U.S. federal or state taxes on our income to the extent that we distribute our net income to our stockholders.

Our principal offices are located at 909 Montgomery Street, Suite 500, San Francisco, California 94133. Our telephone number is (415) 486-2110.

Recent Developments

As of March 31, 2004

For the quarter ended March 31, 2004, we reported net income of \$10.8 million or \$0.43 diluted earnings per share based on 25,085,784 weighted-average shares outstanding.

For the quarter ended March 31, 2004, the weighted-average yield on average earning assets, net of amortization of premium was 3.20% and the weighted-average cost of funds on our repurchase agreement liabilities was 1.20% resulting in a net interest spread of 2.00%

Our book value on March 31, 2004 was \$460.5 million, or \$12.50 per share, based on 36,841,146 shares outstanding on that date. The book value at March 31, 2004 includes the impact of the cash distribution of \$0.42 per share for the first quarter. Our book value per share, excluding the accumulated other comprehensive loss related to the fair market value adjustment for our mortgage-backed securities of \$2.6 million, was \$12.57 on March 31, 2004. At March 31, 2004, our outstanding repurchase agreement balance was \$2.7 billion, equating to leverage of 5.9, with a weighted-average interest rate of 1.15%. At March 31, 2004, the outstanding repurchase agreements had a weighted-average maturity of 97 days. After consideration of the duration on our Eurodollar futures contracts, the weighted-average maturity of our total liabilities was 313 days.

At March 31, 2004, the weighted-average coupon of our mortgage assets was 3.96%. The principal prepayment rate on our mortgage-backed securities was 20% for the quarter ended March 31, 2004. The principal prepayment rate declined in comparison to the quarter ended December 31, 2003. The principal prepayment rate is a measure of the

rate of prepayment for our mortgage-backed securities, expressed as an annual rate relative to the outstanding principal balance of our mortgage-backed securities.

As of March 31, 2004, the weighted-average effective duration of the securities in our overall investment portfolio, assuming constant prepayment rates, or CPR, to the balloon or reset date, or the CPB duration, was 1.45 years. CPR is a measure of the rate of prepayment for our mortgage-backed securities, expressed as an annual rate relative to the outstanding principal balance of our mortgage-backed securities. CPB is similar to CPR except that it also assumes that the hybrid adjustable-rate mortgage-backed securities prepay in full at their next reset date. As of March 31, 2004, the mortgages underlying our hybrid adjustable-rate mortgage-backed securities had fixed interest rates for a weighted-average of approximately 43 months, after which time the interest rates reset and become adjustable. The average length of time until maturity of those mortgages was 30 years. Those mortgages are also subject to interest rate caps that limit the amount that the applicable interest rate can increase during any year, known as an annual cap, and through the maturity of the applicable security, known as a lifetime cap. As of March 31, 2004, the mortgages underlying our hybrid adjustable-rate mortgage-backed securities had average annual caps of 2.48% and average lifetime caps of 10.01%.

Table of Contents

Weighted-average stockholders' equity and return on average equity were \$302.5 million and 14.36%, respectively for the quarter ended March 31, 2004. Return on average equity is defined as annualized net income divided by weighted-average stockholders' equity.

At March 31, 2004, approximately 71.9% of our assets were invested in agency securities with the remaining 28.1% invested in AAA-rated, securitized, residential whole loan mortgages. Mortgage assets held at March 31, 2004 were approximately \$4.1 billion and were allocated as follows:

4.1% in adjustable-rate mortgage-backed securities;

94.6% in hybrid adjustable-rate mortgage-backed securities;

1.3% in one balloon mortgage-backed security which matures in April 2033; and

0.0% in fixed rate mortgage-backed securities.

As of March 31, 2004, all of the mortgage-backed securities in our portfolio had been purchased at a premium and the portfolio had an weighted-average amortized cost of 101.8% of face amount.

To hedge the impact of changes in interest rates on our liability costs, we engaged in short sales of Eurodollar futures contracts. As of March 31, 2004, we had sold short 9,600 Euro dollar futures contracts, which expire June 2004, September 2004 and December 2004, with a notional amount totaling \$9.6 million. The value of these futures contracts is marked-to-market daily in our margin account with the custodian. Based upon the daily market value of these futures contracts, we either receive funds into, or wire funds into, our margin account with the custodian to ensure that an appropriate margin account balance is maintained at all times through the expiration of the contracts. The unrealized loss on the Eurodollar futures contracts was \$3.4 million at March 31, 2004.

These contracts have been designated as cash flow hedges of our borrowings under repurchase agreements under Statement of Financial Accounting Standards, or SFAS, No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted, and therefore we have applied hedge accounting to these transactions. The futures contracts are valued at fair value with the resulting gain or loss associated with the effective portion of the hedge recognized in accumulated other comprehensive income or loss until the quarter following contract expiration. The gain or loss associated with the ineffective portion will be recognized in earnings in the current quarter when the effectiveness measurement is made.

Under SFAS No. 133 and our hedging policy, at the inception and during the life of a hedging relationship, the hedge must be expected to be highly effective in offsetting changes in the hedged item's fair value or the variability in cash flows attributable to the hedged risk. In applying our policy, we have determined that these contracts are highly effective as follows. We use regression methodology to assess the effectiveness of our hedging strategies. Specifically, at the inception of each new hedge, we assess effectiveness using ordinary least squares regression to evaluate the correlation between the rates consistent with the hedges and the underlying hedged items. A hedge is highly effective if the changes in the fair value of the derivative provide offset of at least 80% and not more than 120% of the changes in fair value or cash flows of the hedged item attributable to the risk being hedged.

As of December 31, 2003

For the quarter ended December 31, 2003, we reported net income of \$5.4 million or \$0.40 diluted earnings per share based on 13,414,260 weighted-average shares outstanding. For the period from April 26, 2003 through December 31, 2003, our net income was \$2.8 million, or \$0.27 diluted earnings per share, based on 10,139,811 weighted-average shares outstanding.

Edgar Filing: LUMINENT MORTGAGE CAPITAL INC - Form 424B3

For the quarter ended December 31, 2003, the weighted-average yield on average earning assets, net of amortization of premium was 2.81% and the weighted average interest rate on our repurchase agreement liabilities was 1.20% resulting in a net interest margin of 1.61%.

At December 31, 2003 our book value was \$282.5 million, or \$11.38 per share, based on 24,814,000 shares outstanding on that date. As of December 31, 2003, the accumulated other comprehensive loss related to the fair market value adjustment for our mortgage-backed securities was \$26.3 million. Our book value at December 31, 2003 includes the impact of the cash distribution of \$0.45 per share for the fourth quarter. At December 31, 2003, our outstanding repurchase agreement balance was \$1.7 billion, equating to leverage of 6.1, with a weighted-average interest rate of 1.19%. At December 31, 2003, the outstanding repurchase agreements had a weighted-average maturity of 145 days. After consideration of the duration on our Eurodollar futures contracts, the weighted-average maturity of our total liabilities was 255 days.

At December 31, 2003, the weighted-average coupon of our mortgage assets was 4.09%. The constant prepayment rate, or CPR, on our mortgage-backed securities was 23% for the quarter ended December 31, 2003. CPR declined over the course of the

S-3

Table of Contents

fourth quarter. CPR is a measure of the rate of prepayment for our mortgage-backed securities, expressed as an annual rate relative to the outstanding principal balance of our mortgage-backed securities.

As of December 31, 2003, the CPB duration was 1.75 years. As of December 31, 2003, the mortgages underlying our hybrid adjustable-rate mortgage-backed securities had fixed interest rates for a weighted-average of approximately 43 months, after which time the interest rates reset and become adjustable. The average length of time until maturity of those mortgages was 30 years. Those mortgages are also subject to interest rate caps that limit the amount that the applicable interest rate can increase during any year, known as an annual cap, and through the maturity of the applicable security, known as a lifetime cap. As of December 31, 2003, the mortgages underlying our hybrid adjustable-rate mortgage-backed securities had average annual caps of 2.47% and average lifetime caps of 10.03%.

Average stockholders' equity for the period from June 11, 2003, commencement of operations, through December 31, 2003 was \$128.8 million. Return on average equity was 3.85% for the period from June 11, 2003, commencement of operations, through December 31, 2003.

At December 31, 2003, approximately 63.2% of our assets were invested in agency securities with the remaining 36.8% invested in AAA-rated, securitized, residential whole loan mortgages. Mortgage assets held at December 31, 2003 were approximately \$2.2 billion and were allocated as follows:

8.6% in adjustable-rate mortgage-backed securities;

88.9% in hybrid adjustable-rate mortgage-backed securities;

2.5% in one balloon mortgage-backed security which matures in April 2033; and

0.0% in fixed rate mortgage-backed securities.

As of December 31, 2003, all of the mortgage-backed securities in our portfolio had been purchased at a premium and the portfolio had an average amortized cost of 102.2% of face amount.

Risk Factors

An investment in our common stock involves material risks, including a number of potential conflicts of interests between us, on the one hand, and Seneca and its affiliates, on the other hand. Each prospective purchaser of our common stock should consider carefully the matters discussed under "Risk Factors" beginning on page S-10 of this prospectus supplement before investing in our common stock. Some of the risks include:

We commenced operations in June 2003 and have a limited operating history. Our manager, Seneca, has no prior experience managing a REIT. Accordingly, we might not be able to operate our business or implement our operating policies and strategies successfully.

Our investment strategy permits us to invest up to 10% of our assets in unrated mortgage-related assets, including mortgage-backed securities rated below investment grade. These assets carry an increased likelihood of default or rating downgrade relative to investment-grade assets, which may cause us to suffer losses.

Interest rate mismatches between our mortgage-backed securities and our borrowings used to fund our purchases of mortgage-backed securities might reduce our net income or result in a loss during periods of changing interest rates.

Increased levels of prepayments on the mortgages underlying our mortgage-backed securities might decrease our net interest income or result in a net loss.

We generally seek to borrow eight to 12 times the amount of our equity. Such leveraging could reduce our net income and our cash available for distributions or cause us to suffer losses.

Our board of directors may change our operating policies and strategies without prior notice to you or stockholder approval and such changes could harm our business and results of operations and the value of our stock.

Our results may suffer as a consequence of a potential conflict of interest arising out of our relationship with our manager, on the one hand, and our manager's relationship with other third parties, on the other hand. In addition, this potential conflict may reduce the amount of time and effort that our manager devotes to managing our business and may result in suitable investment opportunities being allocated to other entities.

We pay our manager incentive compensation based on our portfolio's performance. Accordingly, our manager may recommend riskier or more speculative investments in an effort to maximize its incentive compensation.

S-4

Table of Contents**Our Manager and Executive Officers**

Our day-to-day operations are externally managed and advised by our manager, Seneca Capital Management LLC, or Seneca, subject to the direction and oversight of our board of directors. Established in 1989, Seneca is a registered investment adviser under the Investment Advisers Act of 1940, as amended. Seneca engages in investment management as its sole business and manages fixed-income and equity assets for pension and profit-sharing plans, financial institutions, such as banking and insurance companies, and mutual funds for retail and institutional investors. Seneca had over 100 full-time employees and approximately \$14 billion of institutional and private investment accounts at March 31, 2004.

From time to time, we will assess whether we should be internally managed. Our assessment will be based on a number of factors deemed relevant by our board of directors, including our ability to attract and retain full-time employees and the costs and expenses related to becoming internally managed.

A majority of the outstanding equity interests of Seneca are owned by Phoenix Investment Partners, Ltd. Phoenix Investment is a wholly-owned subsidiary of The Phoenix Companies, Inc. (NYSE: PNX). Our board of directors consists of seven members, five of whom are not affiliated with Seneca or Phoenix. Neither this prospectus nor this offering are endorsed or guaranteed in any way by Seneca or Phoenix.

Our executive officers have significant experience in providing investment advisory services, with an average of 16 years of experience. Prior to founding Seneca, Gail Seneca, our chief executive officer, spent two years as senior vice president of the Asset Management Division of Wells Fargo Bank, where she managed fixed-income assets in excess of \$10 billion. Before joining Seneca as its fixed income chief investment officer, Albert Gutierrez, our president, spent two years as head of portfolio management, trading and investment systems at American General Investment Management where he was responsible for approximately \$75 billion in client assets, and 12 years with Conseco Capital Management as a senior vice president in charge of fixed income research and trading as well as insurance asset portfolio management. Other than our full-time chief financial officer, all of our executive officers are also managers or employees of Seneca, as described in the following table:

<u>Name</u>	<u>Position with Seneca</u>	<u>Position with Us</u>
Gail P. Seneca, Ph.D.	President/Chief Executive Officer and Chief Investment Officer	Chairman of the Board of Directors and Chief Executive Officer
Albert J. Gutierrez, CFA	Fixed Income Chief Investment Officer and Principal	President and Director
Christopher J. Zyda	None	Senior Vice President and Chief Financial Officer
Andrew S. Chow, CFA	Fixed Income Portfolio Manager	Senior Vice President
Troy A. Grande, CFA	Fixed Income Portfolio Manager	Senior Vice President

The Management Agreement

We have entered into a management agreement with Seneca dated June 11, 2003. Pursuant to the management agreement, Seneca, as our sole manager, generally implements our business strategy, is responsible for our day-to-day operations and performs services and activities relating to our assets and operations in accordance with the terms of the management agreement. Seneca's services for us can be divided into the following three primary activities:

Asset Management-Seneca advises us with respect to, arranges for and manages the acquisition, financing, management and disposition of, our investments.

Liability Management-Seneca evaluates the credit risk and prepayment risk of our investments and arranges borrowing and hedging strategies.

Capital Management-Seneca coordinates our capital raising activities.

In conducting these activities, Seneca advises us on the formulation of, and implements, our operating strategies and policies, arranges for our acquisition of assets, monitors the performance of our assets, arranges for various types of financing and hedging strategies, and provides administrative and managerial services in connection with our operations. At all times in the performance of these activities, Seneca is subject to the direction and oversight of our board of directors.

Pursuant to the management agreement and a cost-sharing agreement between Seneca and us, Seneca may earn or be entitled to receive the following compensation, fees and other benefits:

S-5

Table of Contents

Base management fee-1% per annum of the first \$300 million of our average net worth, plus 0.8% per annum of our average net worth in excess of \$300 million during such fiscal year, calculated on a quarterly basis;

Incentive compensation-a specified percentage of our REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) in excess of a threshold amount of taxable income, calculated on a quarterly basis and subject to annual reconciliation;

Out-of-pocket expense reimbursements-reimbursement of actual out-of-pocket expenses incurred in connection with our administration on an ongoing basis;

Reimbursement of overhead expenses-reimbursement of actual costs attributable to our use of services rendered by Seneca pursuant to the cost-sharing agreement. Our portion of such costs is allocated to us as determined by Seneca, subject to reasonable approval by a majority of our independent directors; and

Termination fee-payable only upon termination by us without cause or by Seneca upon our change of control. Actual amount of fee depends on the circumstances of the termination.

For a more detailed discussion of the compensation and other fees payable to Seneca, see the sections titled *The Manager-The Management Agreement* and *The Manager-The Cost-Sharing Agreement* which are included in the prospectus accompanying this prospectus supplement.

Conflicts of Interest

We are subject to potential conflicts of interest involving Seneca and its affiliates because, among other reasons:

the incentive compensation, which is based on our net income, may create an incentive for Seneca to recommend investments with greater income potential, which may be relatively more risky than would be the case if its compensation from us did not include an incentive-based component;

Seneca and its affiliates are permitted to purchase mortgage-backed securities for their own account and to advise accounts of other clients, and certain investment opportunities appropriate for us also will be appropriate for these accounts; and

two of our directors, and all but one of our executive officers, are managers or employees of, or otherwise affiliated with, Seneca.

For a more detailed discussion of potential conflicts of interests between us, on the one hand, and Seneca and its affiliates, on the other hand, see the section titled *Conflicts of Interests; Certain Relationships and Related Transactions* which is included in the prospectus accompanying this prospectus supplement.

The management agreement does not limit or restrict the right of Seneca or any of its affiliates from engaging in any business or rendering services to any other person, including, without limitation, the purchase of, or rendering advice to others purchasing, mortgage-backed securities that meet our investment guidelines. However, Seneca has agreed that for as long as Seneca is our exclusive manager pursuant to the management agreement, it will not sponsor any other mortgage REIT that invests primarily in high-quality, residential mortgage-backed securities, without first obtaining the approval of a majority of our independent directors.

Table of Contents

This Offering

This prospectus covers the resale of up to 11,500,000 shares of our common stock. We issued and sold 8,126,189 of these shares on June 11, 2003 and June 19, 2003, in a private offering to Friedman, Billings, Ramsey & Co., Inc., which we refer to as the initial purchaser, and 3,373,811 of these shares on June 11, 2003 and June 19, 2003 in a concurrent private offering to several other accredited investors. We refer to both of these offerings, collectively, as our private placement. We were advised by the initial purchaser that the shares it purchased were resold to qualified institutional buyers, as defined in Rule 144A under the Securities Act, institutional accredited investors, as defined in Rule 501 under the Securities Act, and/or to non-U.S. Persons, as defined in Regulation S under the Securities Act, initially at a price of \$15.00 per share.

Common stock offered by the selling stockholders	11,500,000 shares
Common stock outstanding	36,927,339 shares
Use of proceeds	We will not receive any proceeds from the sale of the shares of common stock offered by this prospectus.
Trading	Our common stock is listed on the New York Stock Exchange, or NYSE, under the symbol LUM ; however, an active trading market for our shares might never develop.

The number of shares of our common stock shown as outstanding, above, is based on 36,927,339 shares outstanding on May 5, 2004, and excludes:

55,000 shares of our common stock issuable upon the exercise of options outstanding on May 5, 2004 with a weighted-average exercise price of \$14.82 per share; and

940,307 additional shares of our common stock as of May 5, 2004 available for issuance under our 2003 stock incentive plan and 2003 outside advisors stock incentive plan.

Our Tax Status

We will elect to be taxed as a REIT under the Internal Revenue Code commencing with our taxable year ending December 31, 2003. Provided we qualify as a REIT, we generally will not be subject to U.S. federal corporate income tax on taxable income that we distribute to our stockholders. REITs are subject to a number of organizational and operational requirements, including a requirement that they currently distribute at least 90% of their annual REIT net taxable income. We face the risk that we might not be able to comply with all of the REIT requirements in the future. Failure to qualify as a REIT would render us subject to U.S. federal income tax (including any applicable alternative minimum tax) on our taxable income at regular corporate rates, and distributions to our stockholders would not be deductible. Even if we qualify for taxation as a REIT, we may be subject to certain U.S. federal, state, local and foreign taxes on our income and property. See the section titled Certain U.S. Federal Income Tax Consequences which is included in the prospectus accompanying this prospectus supplement.

Restrictions on Ownership of Our Stock

In order to facilitate our qualification as a REIT, our charter prohibits any stockholder from directly or indirectly owning more than 9.8% of the outstanding shares of any class or series of our stock. We adopted this restriction to promote compliance with the provisions of the Internal Revenue Code which limit the degree to which

ownership of a REIT may be concentrated. See the section titled Description of Capital Stock-Transfer Restrictions which is included in the prospectus accompanying this prospectus supplement.

Distributions

To avoid corporate income and excise tax and to maintain our qualification as a REIT, we intend to make quarterly distributions to our stockholders that will result in annual distributions of at least 90% of our REIT net taxable income, determined without regard to the deduction for dividends paid and by excluding any net capital gains. REIT net taxable income is calculated pursuant to standards in the Internal Revenue Code and will not necessarily be the same as our net income as calculated in accordance with generally accepted accounting principles, or GAAP. Our board of directors may, in its discretion, cause us to make additional distributions of cash legally available for that purpose. Our distributions from quarter to quarter will depend on our

S-7

Table of Contents

taxable earnings, financial condition and such other factors as our board of directors deems relevant. In the future, our board of directors may elect to adopt a dividend reinvestment plan.

Selling Stockholders, Concurrent Initial Public Offering and Lock-Up Agreements

Selling Stockholders. The holders of 11,500,000 shares of our common stock issued in a private placement in June 2003, or their transferees, have registration rights pursuant to a registration rights agreement we entered into on June 11, 2003, the initial closing date of the private placement. Those stockholders have the right to sell all or a portion of their shares of our common stock from time to time in this offering, subject to limitations. The names of those stockholders are included in this prospectus supplement. Of the 11,704,000 shares of common stock outstanding prior to our IPO, a total of 204,000 shares (held by our founders and their associates) are not salable pursuant to this prospectus supplement.

Initial Public Offering. Our IPO was filed on registration statement Form S-11, which was declared effective by the SEC on December 18, 2003. The underwriters subsequently exercised their over-allotment option in full and on December 24, 2003 we issued 13,110,000 shares of common stock for net proceeds of approximately \$157.6 million, after estimated expenses and underwriting discounts and commissions.

Lock-Up Agreements. In connection with our June 2003 private placement, most of our directors and officers and some of our other stockholders, including Seneca, which collectively owned an aggregate of 297,448 shares of our common stock at that time, entered into individual lock-up agreements which, subject to various exceptions, prevent them from reselling their shares until 90 days after the effective date of the registration statement of which the prospectus accompanying this prospectus supplement is a part. In addition, in connection with our IPO, our directors, officers and Seneca, who collectively own an aggregate of 401,409 shares of our common stock, have entered into individual lock-up agreements which, subject to various exceptions, prevent them from reselling their shares until 180 days after December 18, 2003, the date of our IPO prospectus. In connection with our March 2004 public offering, each of our directors and officers and Seneca, who owned an aggregate of 415,909 shares of our common stock immediately after that offering, have entered into individual lock-up agreements. These lock-up agreements will, subject to various exceptions, prevent them from reselling their shares until June 28, 2004, which is the 91st day after the date of this prospectus. However, 10,261 of these shares are subject to additional transfer restrictions and will not be available for sale until after such date.

Table of Contents**Summary Financial Data**

The following summary financial data are derived from audited financial statements as of April 25, 2003 (inception), June 30, 2003 and December 31, 2003 and for the period from April 26, 2003 through June 30, 2003 and for the period from April 26, 2003 through December 31, 2003, and unaudited financial statements as of September 30, 2003 (as restated), as of March 31, 2004, for the period April 26, 2003 through September 30, 2003 (as restated), for the three months ended September 30, 2003 (as restated), for the three months ended December 31, 2003 and for the three months ended March 31, 2004. The selected financial data should be read in conjunction with the more detailed information contained in the financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this prospectus supplement. See Note 10 to the financial statements in the prospectus accompanying this prospectus supplement for a discussion of the restatement of the financial information below.

Table of Contents

RISK FACTORS

You should carefully consider the risks described below before making an investment decision. Our business, financial condition or results of operations could be harmed by any of these risks. Similarly, these risks could cause the market price of our common stock to decline and you might lose all or part of your investment. Our forward-looking statements in this prospectus supplement and the accompanying prospectus are subject to the following risks and uncertainties. Our actual results could differ materially from those anticipated by our forward-looking statements as a result of the risk factors below. The risks described below are not the only ones facing our company. Additional risks not presently known to us or that we currently deem immaterial might also impair our business operations.

Risks Related to Our Business

We have a limited operating history and might not be able to operate our business or implement our operating policies and strategies successfully.

We began operations in June of 2003, and we have a limited operating history. The results of our operations will depend on many factors, including the availability of opportunities for the acquisition of mortgage-related assets, the level and volatility of interest rates, readily accessible short- and long-term funding alternatives in the financial markets and economic conditions. Moreover, delays in fully leveraging and investing our net proceeds of our initial public offering may cause our performance to be weaker than other fully leveraged and invested mortgage REITs pursuing comparable investment strategies. You will not have the opportunity to evaluate the manner in which we invest or the economic merits of particular assets to be acquired. Furthermore, we face the risk that we might not successfully operate our business or implement our operating policies and strategies as described in this prospectus supplement.

Our investment guidelines permit us to invest up to 10% of our assets in unrated mortgage-related assets, including mortgage-backed securities rated below investment-grade, which carry a greater likelihood of default or rating downgrade than investments in investment-grade mortgage-backed securities and may cause us to suffer losses.

Our asset acquisition policy provides us with the ability to acquire significant amounts of lower credit quality mortgage-related assets, including mortgage-backed securities that are not rated at least investment grade by at least one nationally-recognized statistical rating organization. Under our policy, up to 10% of our total assets may be non-investment grade mortgage-backed securities or other investments such as leveraged mortgage derivative securities, shares of other REITs, mortgage loans or other mortgage-related investments. If we acquire non-investment-grade mortgage-backed securities, we are more likely to incur losses because the mortgages underlying those securities are made to borrowers possessing lower-quality credit. While all agency certificates are subject to a risk of default, that risk is greater with non-investment grade mortgage-backed securities. In addition, the rating agencies are more likely to downgrade the credit quality of those securities, which would reduce the value of those securities.

Interest rate mismatches between our adjustable-rate and hybrid adjustable-rate mortgage-backed securities and the borrowings used to fund our purchases of such mortgage-backed securities might reduce our net income or result in a loss during periods of changing interest rates.

We invest primarily in adjustable-rate and hybrid adjustable-rate mortgage-backed securities. The mortgages underlying adjustable-rate mortgage-backed securities have interest rates that reset periodically, typically every six months or on an annual basis, based upon market-based indices of interest rates such as U.S. Treasury bonds or

LIBOR. The mortgages underlying hybrid adjustable-rate mortgage-backed securities have interest rates that are fixed for the first few years of the loan-typically three, five, seven or 10 years-and thereafter their interest rates reset periodically similar to the mortgages underlying adjustable-rate mortgage-backed securities. We have funded our acquisitions and expect to fund our future acquisitions of adjustable-rate and hybrid adjustable-rate mortgage-backed securities in part with borrowings that have interest rates based on indices and repricing terms similar to, but with shorter maturities than, the interest rate indices and repricing terms of the adjustable-rate and hybrid adjustable-rate mortgage-backed securities. On March 31, 2004, 98.7% of our investment portfolio was invested in adjustable-rate or hybrid adjustable-rate mortgage-backed securities having a weighted-average term to next rate adjustment of approximately 42 months, while our borrowings had a weighted-average term of approximately 97 days. After consideration of the duration on our Eurodollar futures contracts, our weighted-average maturity was 313 days. The phrase weighted average term to next rate adjustment refers to the average of the periods of time that must elapse before the interest rates adjust for all of the mortgages underlying our adjustable-rate and hybrid adjustable-rate mortgage-backed securities in our portfolio, which average is weighted in proportion to the book values of the applicable securities. During periods of changing interest rates, this interest rate mismatch between our assets and liabilities could reduce or eliminate our net income and distributions to our stockholders and could cause us to suffer a loss.

Table of Contents

Accordingly, in a period of rising interest rates, we could experience a decrease in, or elimination of, net income or a net loss because the interest rates on our borrowings adjust faster than the interest rates on our adjustable-rate mortgage-backed securities.

Increased levels of prepayments on the mortgages underlying our mortgage-backed securities might decrease our net interest income or result in a net loss.

The mortgage-backed securities that we acquire generally represent interests in pools of mortgage loans. The principal and interest payments we receive from our mortgage-backed securities are generally funded by the payments that mortgage borrowers make on those underlying mortgage loans. When borrowers pre-pay their mortgage loans sooner than expected, corresponding prepayments on the mortgage-backed securities occur sooner than expected by the marketplace. Sooner-than-expected prepayments could harm our results of operations in the following ways, among others:

We seek to purchase mortgage-backed securities that we believe to have favorable risk-adjusted expected returns relative to market interest rates at the time of purchase. If the coupon interest rate for a mortgage-backed security is higher than the market interest rate at the time it is purchased, then that mortgage-backed security will be acquired at a premium to its par value. In accordance with applicable accounting rules, we are required to amortize any premiums or discounts related to our mortgage-backed securities over their expected terms. The amortization of a premium reduces interest income, while the amortization of a discount increases interest income. The expected terms for mortgage-backed securities are a function of the prepayment rates for the mortgages underlying the mortgage-backed securities. Mortgage-backed securities that are at a premium to their par value are more likely to experience prepayment of some or all of their principal through refinancings. If the mortgages underlying our premium mortgage-backed securities are prepaid in whole or in part more quickly than their respective maturity dates, then we must also amortize their respective premiums more quickly, which would decrease our net interest income and harm our profitability.

A substantial portion of our adjustable-rate mortgage-backed securities may bear interest at rates that are lower than their fully-indexed rates, which refers to their applicable index rates plus a margin. If an adjustable-rate mortgage-backed security is prepaid prior to or soon after the time of adjustment to a fully-indexed rate, we will have held that mortgage-backed security while it was less profitable and lost the opportunity to receive interest at the fully-indexed rate over the remainder of its expected life.

If we are unable to acquire new mortgage-backed securities to replace the prepaid mortgage-backed securities, our financial condition, results of operations and cash flow may suffer and we could incur losses.

Prepayment rates generally increase when interest rates fall and decrease when interest rates rise, but changes in prepayment rates are difficult to predict. Prepayment rates also may be affected by other factors, including, without limitation, conditions in the housing and financial markets, general economic conditions and the relative interest rates on adjustable-rate and fixed-rate mortgage loans. While we seek to minimize prepayment risk, we must balance prepayment risk against other risks and the potential returns of each investment when selecting investments. No strategy can completely insulate us from prepayment or other such risks.

We may incur increased borrowing costs related to repurchase agreements that would harm our results of operations.

Our borrowing costs under repurchase agreements are generally adjustable and correspond to short-term interest rates, such as LIBOR or a short-term Treasury index, plus or minus a margin. The margins on these borrowings over or under short-term interest rates may vary depending upon a number of factors, including, without limitation:

the movement of interest rates;

the availability of financing in the market; and

the value and liquidity of our mortgage-backed securities.

Most of our borrowings are collateralized borrowings in the form of repurchase agreements. If the interest rates on these repurchase agreements increase, our results of operations will be harmed and we may have losses.

S-11

Table of Contents

Interest rate caps related to our adjustable-rate and hybrid adjustable-rate mortgage-backed securities may reduce our income or cause us to suffer a loss during periods of rising interest rates.

The mortgages underlying our adjustable-rate and hybrid adjustable-rate mortgage-backed securities are typically subject to periodic and lifetime interest rate caps. Periodic interest rate caps limit the amount that the interest rate of a mortgage can increase during any given period. Lifetime interest rate caps limit the amount an interest rate can increase through the maturity of a mortgage. As of March 31, 2004, 98.7% of our mortgage-backed securities were based on adjustable-rate or hybrid adjustable-rate mortgages, substantially all of which were subject to interest rate caps. The percentage of adjustable-rate and hybrid adjustable-rate mortgage-backed securities in our investment portfolio which are subject to periodic interest rate caps every six months or annually were 12.5% and 86.2%, respectively.

Our borrowings are not subject to similar restrictions. The periodic adjustments to the interest rates of the mortgages underlying our adjustable-rate and hybrid adjustable-rate mortgage-backed securities are based on changes in an objective index. Substantially all of the mortgages underlying our adjustable-rate and hybrid adjustable-rate mortgage-backed securities adjust their interest rates based on one of two main indices, the U.S. Treasury index, a monthly or weekly average yield of benchmark U.S. Treasury securities as published by the Federal Reserve Board, or LIBOR, the interest rate that banks in London offer for deposits in London of U.S. dollars. The percentages of the mortgages underlying the adjustable-rate and hybrid adjustable-rate mortgage-backed securities in our investment portfolio as of December 31, 2003 with interest rates that reset based on the U.S. Treasury or LIBOR indices were 39.1% and 58.4%, respectively. The percentages of the mortgages underlying the adjustable-rate and hybrid adjustable-rate mortgage-backed securities in our investment portfolio as of March 31, 2004 with interest rates that reset based on the U.S. Treasury or LIBOR indices were 26.3% and 72.4%, respectively.

Accordingly, in a period of rapidly increasing interest rates, the interest rates paid on our borrowings could increase without limitation while interest rate caps could limit the increases in the yields on our adjustable-rate and hybrid adjustable-rate mortgage-backed securities. This problem is magnified for adjustable-rate and hybrid adjustable-rate mortgage-backed securities that are not fully indexed. Further, some of the mortgages underlying our adjustable-rate and hybrid adjustable-rate mortgage-backed securities may be subject to periodic payment caps that result in a portion of the interest being deferred and added to the principal outstanding. As a result, we may receive less cash income on adjustable-rate and hybrid adjustable-rate mortgage-backed securities than we need to pay interest on our related borrowings. These factors could reduce our net interest income or cause us to suffer a net loss.

We might experience reduced net interest income or a loss from holding fixed-rate investments during periods of rising interest rates.

A significant portion of our investment portfolio consists of hybrid adjustable-rate mortgage-backed securities. As of March 31, 2004, 94.6% of our investment portfolio consisted of hybrid adjustable-rate mortgage-backed securities. We may also invest in fixed-rate mortgage-backed securities from time to time, however, as of March 31, 2004, none of our portfolio consisted of fixed-rate mortgage-backed securities. We fund our acquisition of fixed-rate mortgage-backed securities, including those based on balloon maturity and hybrid adjustable-rate mortgages, in part with short-term repurchase agreements and term loans. During periods of rising interest rates, our costs associated with borrowings used to fund the acquisition of fixed-rate mortgage-backed securities are subject to increases while the income we earn from these assets remains substantially fixed. This would reduce and could eliminate the net interest spread between the fixed-rate mortgage-backed securities that we purchase and our borrowings used to purchase them, which would reduce our net interest income and could cause us to suffer a loss.

Our leverage strategy increases the risks of our operations, which could reduce our net income and the amount available for distributions or cause us to suffer a loss.

We generally seek to borrow between eight and 12 times the amount of our equity, although at times our borrowings may be above or below this amount. We incur this indebtedness by borrowing against a substantial portion of the market value of our mortgage-backed securities. Our total indebtedness, however, is not expressly limited by our policies and will depend on our and our prospective lender's estimate of the stability of our portfolio's cash flow. We face the risk that we might not be able to meet our debt service obligations or a lender's margin requirements from our income and, to the extent we cannot, we might be forced to liquidate some of our assets at disadvantageous prices. Our use of leverage amplifies the risks associated with other risk factors, which could reduce our net income and the amount available for distributions or cause us to suffer a loss. For example:

S-12

Table of Contents

A majority of our borrowings are secured by our mortgage-backed securities, generally under repurchase agreements. A decline in the market value of the mortgage-backed securities used to secure these debt obligations could limit our ability to borrow or result in lenders requiring us to pledge additional collateral to secure our borrowings. In that situation, we could be required to sell mortgage-backed securities under adverse market conditions in order to obtain the additional collateral required by the lender. If these sales are made at prices lower than the carrying value of the mortgage-backed securities, we would experience losses.

A default under a mortgage-related asset that constitutes collateral for a loan could also result in an involuntary liquidation of the mortgage-related asset, including any cross-collateralized mortgage-backed securities. This would result in a loss to us of the difference between the value of the mortgage-related asset upon liquidation and the amount borrowed against the mortgage-related asset.

To the extent we are compelled to liquidate qualified REIT assets to repay debts, our compliance with the REIT rules regarding our assets and our sources of income could be negatively affected, which would jeopardize our status as a REIT. Losing our REIT status would cause us to lose tax advantages applicable to REITs and would decrease our overall profitability and distributions to our stockholders.

If we experience losses as a result of our leverage policy, such losses would reduce the amounts available for distribution to our stockholders.

We might not be able to use derivatives to mitigate our interest rate and prepayment risks.

Our policies permit us to enter into interest rate swaps, caps and floors and other derivative transactions to help us reduce our interest rate and prepayment risks. As of March 31, 2004, we were engaged in short sales of Eurodollar futures contracts in order to hedge the impact of changes in interest rates on our liability costs. In the future, these transactions might mitigate our interest rate and prepayment risks, but cannot eliminate these risks. Moreover, the use of derivative transactions could have a negative impact on our earnings and our status as a REIT, and, therefore, our use of such derivatives could be limited.

We may enter into ineffective derivative transactions or other hedging activities that may reduce our net interest income or cause us to suffer losses.

Our policies permit us to, but we are not required to, enter into derivative transactions such as interest rate swaps, caps and floors and other derivative transactions to help us seek to reduce our interest rate and prepayment risks. The effectiveness of any derivative transactions will depend significantly upon whether we correctly quantify the interest rate or prepayment risks being hedged, our execution of and ongoing monitoring of our hedging activities, and the treatment of such hedging activities for GAAP accounting purposes.

As of March 31, 2004, we were engaged in short sales of Eurodollar futures contracts in order to hedge the impact of changes in interest rates on our liability costs. In the case of these hedges, and any other future efforts to hedge the effects of interest rate changes on our liability costs, if we enter into hedging instruments that have higher interest rates embedded in them as a result of the forward yield curve, and at the end of the term of these hedging instruments the spot market interest rates for the liabilities that we hedged are actually lower, then we will have locked in higher interest rates for our liabilities than would be available in the spot market at the time and this could result in a narrowing of our net interest rate margin or result in losses. In some situations, we may sell assets or hedging instruments at a loss in order to maintain adequate liquidity.

In addition, we apply SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted, and record derivatives at fair value. If the derivatives meet the criteria to be accounted for as hedging transactions, the effects of the transactions could be materially different as to timing than if they do not

qualify as hedges, and this may cause a narrowing of our net interest rate margin or result in losses.

An increase in interest rates might adversely affect our book value.

We use changes in 10-year U.S. Treasury yields as a reference indicator for changes in interest rates because it is a common market benchmark. Increases in the general level of interest rates can cause the fair market value of our assets to decline, particularly those mortgage-backed securities whose underlying mortgages have fixed-rate components. Our fixed-rate mortgage securities and our hybrid adjustable-rate mortgage-backed securities (during the fixed-rate component of the mortgages underlying such securities) will generally be more negatively affected by such increases than our adjustable-rate mortgage securities. In accordance with GAAP, we will be required to reduce the carrying value of our mortgage-backed securities by the amount of any decrease in the fair value of our mortgage-backed securities compared to their respective amortized costs. If unrealized losses in fair value occur, we will have to either reduce current earnings or reduce stockholders' equity without immediately affecting current

Table of Contents

earnings, depending on how we classify such mortgage-backed securities under GAAP. In either case, our net book value will decrease to the extent of any realized or unrealized losses in fair value.

We may invest in leveraged mortgage derivative securities that generally experience greater volatility in market prices, and thus expose us to greater risk with respect to their rate of return.

We may acquire leveraged mortgage derivative securities that expose us to a high level of interest rate risk. The characteristics of leveraged mortgage derivative securities cause those securities to experience greater volatility in their market prices. Thus, acquisition of leveraged mortgage derivative securities will expose us to the risk of greater volatility in our portfolio, which could reduce our net income and harm our overall results of operations.

We depend on borrowings to purchase mortgage-related assets and reach our desired amount of leverage. If we fail to obtain or renew sufficient funding on favorable terms or at all, we will be limited in our ability to acquire mortgage-related assets, which will harm our results of operations.

We depend on short-term borrowings to fund acquisitions of mortgage-related assets and reach our desired amount of leverage. Accordingly, our ability to achieve our investment and leverage objectives depends on our ability to borrow money in sufficient amounts and on favorable terms. In addition, we must be able to renew or replace our maturing short-term borrowings on a continuous basis. We depend on a few lenders to provide the primary credit facilities for our purchases of mortgage-related assets. In addition, our existing indebtedness may limit our ability to make additional borrowings. If our lenders do not allow us to renew our borrowings or we cannot replace maturing borrowings on favorable terms or at all, we might have to sell our mortgage-related assets under adverse market conditions, which would harm our results of operations and may result in permanent losses.

Possible market developments could cause our lenders to require us to pledge additional assets as collateral. If our assets are insufficient to meet the collateral requirements, we might be compelled to liquidate particular assets at inopportune times and at disadvantageous prices.

Possible market developments, including a sharp or prolonged rise in interest rates, a change in prepayment rates or increasing market concern about the value or liquidity of one or more types of mortgage-backed securities in which our portfolio is concentrated, might reduce the market value of our portfolio, which might cause our lenders to require additional collateral. Any requirement for additional collateral might compel us to liquidate our assets at inopportune times and at disadvantageous prices, thereby harming our operating results. If we sell mortgage-backed securities at prices lower than the carrying value of the mortgage-backed securities, we would experience losses.

Our use of repurchase agreements to borrow funds may give our lenders greater rights in the event that either we or any of our lenders file for bankruptcy.

Our borrowings under repurchase agreements may qualify for special treatment under the bankruptcy code, giving our lenders the ability to avoid the automatic stay provisions of the bankruptcy code and to take possession of and liquidate our collateral under the repurchase agreements without delay if we file for bankruptcy. Furthermore, the special treatment of repurchase agreements under the bankruptcy code may make it difficult for us to recover our pledged assets in the event that our lender files for bankruptcy. Thus, the use of repurchase agreements exposes our pledged assets to risk in the event of a bankruptcy filing by either our lender or us.

Because the assets that we acquire might experience periods of illiquidity, we might be prevented from selling our mortgage-related assets at opportune times and prices.

We bear the risk of being unable to dispose of our mortgage-related assets at advantageous times and prices or in a timely manner because mortgage-related assets generally experience periods of illiquidity. The lack of liquidity might result from the absence of a willing buyer or an established market for these assets, as well as legal or contractual restrictions on resale. If we are unable to sell our mortgage-related assets at opportune times, we might suffer a loss and/or reduce our distributions.

Our board of directors may change our operating policies and strategies without prior notice or stockholder approval and such changes could harm our business and results of operations and the value of our stock.

Our board of directors has the authority to modify or waive our current operating policies and our strategies (including our election to operate as a REIT) without prior notice and without stockholder approval. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, operating results and value of our stock. However, the effects might be adverse.

S-14

Table of Contents

Competition might prevent us from acquiring mortgage-backed securities at favorable yields, which would harm our results of operations.

Our net income depends on our ability to acquire mortgage-backed securities at favorable spreads over our borrowing costs. In acquiring mortgage-backed securities, we compete with other REITs, investment banking firms, savings and loan associations, banks, insurance companies, mutual funds, other lenders and other entities that purchase mortgage-backed securities, many of which have greater financial resources than we do. As a result, we may not be able to acquire sufficient mortgage-backed securities at favorable spreads over our borrowing costs, which would harm our results of operations.

Defaults on the mortgage loans underlying our mortgage-backed securities may reduce the value of our investment portfolio and may harm our results of operations.

We bear the risk of any losses resulting from any defaults on the mortgage loans underlying the mortgage-backed securities in our investment portfolio. Many of the mortgage-backed securities that we obtain will have one or more forms of credit enhancement provided by third parties, such as insurance against risk of loss due to default on the underlying mortgage loans or bankruptcy, fraud and special hazard losses. To the extent that third parties have been contracted to insure against these types of losses, the value of such insurance will depend in part on the creditworthiness and claims-paying ability of the insurer and the timeliness of reimbursement in the event of a default on the underlying obligations. Further, the insurance coverage for various types of losses is limited in amount, and losses in excess of these limitations would be borne by us.

Other mortgage-backed securities that we purchase will be subject to limited guarantees of the payment of limited amounts of principal and interest on mortgage loans underlying such mortgage-backed securities, either by federal government agencies, including Ginnie Mae, by federally-chartered corporations, including Fannie Mae and Freddie Mac, or by other corporate guarantors. While Ginnie Mae's obligations are backed by the full faith and credit of the United States, the obligations of Fannie Mae and Freddie Mac and other corporate guarantors are solely their own. As a result, a substantial deterioration in the financial strength of Fannie Mae, Freddie Mac or other corporate guarantors could increase our exposure to future delinquencies, defaults or credit losses on our holdings of Fannie Mae or Freddie Mac-backed mortgage-backed securities or other corporate-backed mortgage-backed securities, and could harm our results of operations. In addition, while Freddie Mac guarantees the eventual payment of principal, it does not guarantee the timely payment thereof, and our results of operations may be harmed if borrowers are late or delinquent in their payments on mortgages underlying Freddie Mac-backed mortgage-backed securities. Moreover, Fannie Mae, Freddie Mac, Ginnie Mae and other corporate guarantees relate only to payments of limited amounts of principal and interest on the mortgages underlying such agency-backed or corporate-backed securities, and do not guarantee the market value of such mortgage-backed securities or the yields on such mortgage-backed securities. As a result, we remain subject to interest rate risks, prepayment risks, extension risks and other risks associated with our investment in such mortgage-backed securities and may experience losses in our investment portfolio.

We remain subject to losses despite our strategy of investing in highly-rated mortgage-backed securities.

Our investment guidelines provide that at least 90% of our assets must be invested in mortgage-backed securities that are either agency-backed or are rated at least investment grade by at least one rating agency. While highly-rated mortgage-backed securities are generally subject to a lower risk of default than lower credit quality mortgage-backed securities and may benefit from third-party credit enhancements such as insurance or corporate guarantees, there is no assurance that such mortgage-backed securities will not be subject to credit losses. Furthermore, ratings are subject to change over time as a result of a number of factors, including greater than expected delinquencies, defaults or credit losses, or a deterioration in the financial strength of corporate guarantors, any of which may reduce the market value of such securities. Furthermore, ratings do not take into account the

reasonableness of the issue price, interest risks, prepayment risks, extension risks or other risks associated with such mortgage-backed securities. As a result, while we attempt to mitigate our exposure to credit risk on a relative basis by focusing on highly-rated mortgage-backed securities, we cannot eliminate such credit risks and remain subject to other risks to our investment portfolio and may suffer losses, which may harm the market price of our common stock.

Decreases in the value of the property underlying our mortgage-backed securities might decrease the value of our assets.

The mortgage-backed securities in which we invest are secured by underlying real property interests. To the extent that the value of the property underlying our mortgage-backed securities decreases, our security might be impaired, which might decrease the value of our assets.

S-15

Table of Contents

Insurance will not cover all potential losses on the underlying real property and the absence thereof may harm the value of our assets.

Under our asset acquisition policy, we are permitted to invest up to a maximum of 10% of our total assets in assets other than mortgage-backed securities guaranteed by federal agencies or federally chartered entities such as Fannie Mae, Freddie Mac or Ginnie Mae, or rated as at least investment grade by a nationally recognized statistical rating agency. Mortgage loans fall outside of this category of investments under our investment guidelines and are subject to the 10% limitation. If we elect in the future to purchase mortgage loans, we may require that each of the mortgage loans that we purchase include comprehensive insurance covering the underlying real property, including liability, fire and extended coverage. There are certain types of losses, however, generally of a catastrophic nature, such as earthquakes, floods and hurricanes, that may be uninsurable or not economically insurable. Inflation, changes in building codes and ordinances, environmental considerations, and other factors also might make it infeasible to use insurance proceeds to replace a property if it is damaged or destroyed. Under such circumstances, the insurance proceeds, if any, might not be adequate to restore the economic value of the underlying real property, which might impair our security and decrease the value of our assets.

Distressed mortgage loans have higher risk of future default.

If we elect in the future to purchase mortgage loans, we may purchase distressed mortgage loans as well as mortgage loans that have had a history of delinquencies. These distressed mortgage loans may be in default or may have a greater than normal risk of future defaults and delinquencies, as compared to a pool of newly-originated, high quality loans of comparable type, size and geographic concentration. Returns on an investment of this type depend on accurate pricing of such investment, the borrower's ability to make required payments or, in the event of default, the ability of the loan's servicer to foreclose and liquidate the mortgage loan. We cannot assure you that the servicer will be able to liquidate a defaulted mortgage loan in a cost-effective manner, at an advantageous price or in a timely manner.

Subordinated loans on real estate are subject to higher risks.

If we elect in the future to purchase mortgage loans, we may acquire loans secured by commercial properties, including loans that are subordinate to first liens on the underlying commercial real estate. Subordinated mortgage loans are subject to greater risks of loss than first lien mortgage loans. An overall decline in the real estate market could reduce the value of the real property securing such loans such that the aggregate outstanding balance of the second-lien loan and the balance of the more senior loan on the real property exceed the value of the real property.

We depend on our key personnel and the loss of any of our key personnel could severely and detrimentally affect our operations.

We depend on the diligence, experience and skill of our officers and the people working on behalf of our manager for the selection, acquisition, structuring and monitoring of our mortgage-related assets and associated borrowings. Our key officers include Gail Seneca, Albert Gutierrez, Christopher Zyda, Andrew Chow and Troy Grande. We have not entered into employment agreements with our senior officers other than Mr. Zyda, who is our Senior Vice President and Chief Financial Officer. With the exception of Mr. Zyda, we do not currently employ other senior officers dedicated solely to our business, and our officers (other than Mr. Zyda) are free to engage in competitive activities in our industry. The loss of any key person could harm our business, financial condition, cash flow and results of operations.

Risks Related to Our Manager

Seneca has not managed a REIT and we cannot assure you that Seneca's past experience will be sufficient to successfully manage our business as a REIT.

Seneca Capital Management LLC has not previously managed a REIT, and does not have any experience in complying with the income, asset and other limitations imposed by the REIT provisions of the Internal Revenue Code. Those provisions are complex and the failure to comply with those provisions in a timely manner could prevent us from qualifying as a REIT or could force us to pay unexpected taxes and penalties. In such event, our net income would be reduced and we could incur a loss.

Our manager has significant influence over our affairs, and might cause us to engage in transactions that are not in our or our stockholders' best interests.

In addition to managing us and having at least two of its designees as members of our board, Seneca provides advice on our operating policies and strategies. Seneca may also cause us to engage in future transactions with Seneca and its affiliates, subject to the approval of, or guidelines approved by, the independent members of our board of directors. Our directors, however,

S-16

Table of Contents

rely primarily on information supplied by our manager in reaching their determinations. Accordingly, our manager has significant influence over our affairs, and may cause us to engage in transactions which are not in our best interest.

Our manager and its affiliates might allocate mortgage-related opportunities to other entities, and thus might divert attractive investment opportunities away from us.

Our operations and assets are managed by specified individuals at Seneca. Seneca and its affiliates, including some of our officers, manage portfolios for parties unrelated to us. These multiple responsibilities might create conflicts of interest for Seneca and these individuals if they are presented with opportunities that might benefit us and their other clients. Seneca and these individuals must allocate investments among our portfolio and their other clients by determining the entity or account for which the investment is most suitable. In making this determination, Seneca and these individuals consider the investment strategy and guidelines of each entity or account with respect to acquisition of assets, leverage, liquidity and other factors that Seneca and these individuals determine appropriate. However, Seneca and those working on its behalf have no obligation to make any specific investment opportunities available to us and the above-mentioned conflicts of interest might result in decisions or allocations of investments that are not in our or our stockholders' best interests.

We will pay Seneca incentive compensation based on our portfolio's performance. This arrangement may lead Seneca to recommend riskier or more speculative investments in an effort to maximize its incentive compensation.

In addition to its base management fee, Seneca earns incentive compensation for each fiscal quarter equal to a specified percentage of the amount by which our return on equity, before deducting incentive compensation, exceeds a return based on the 10 year U.S. Treasury rate plus 2%. The percentage for this calculation is the weighted average of the following percentages based on our average net invested assets for the period:

20% for the first \$400 million of our average net invested assets; and

10% of our average net invested assets in excess of \$400 million.

Pursuant to the formula for calculating Seneca's incentive compensation, Seneca shares in our profits but not in our losses. Consequently, as Seneca evaluates different mortgage-backed securities and other investments for our account, there is a risk that Seneca will cause us to assume more risk than is prudent in an attempt to increase its incentive compensation. Other key criteria related to determining appropriate investments and investment strategies, including the preservation of capital, might be under-weighted if Seneca focuses exclusively or disproportionately on maximizing its income.

We may be obligated to pay Seneca incentive compensation even if we incur a loss.

Pursuant to the Management Agreement, Seneca is entitled to receive incentive compensation for each fiscal quarter in an amount equal to a tiered percentage of the excess of our taxable income for that quarter (before deducting incentive compensation, net operating losses and certain other items) above a threshold return for that quarter. In addition, the Management Agreement further provides that our taxable income for incentive compensation purposes excludes net capital losses that we may incur in the fiscal quarter, even if such capital losses result in a net loss on our statement of operations for that quarter. Thus, we may be required to pay Seneca incentive compensation for a fiscal quarter even if there is a decline in the value of our portfolio or we incur a net loss for that quarter.

During periods of declining market prices for shares of our common stock, we may be required to issue greater numbers of shares to Seneca for the same amount of incentive compensation arising under the Management Agreement, which will have a dilutive effect on our stockholders that may harm the market price of our

common stock.

Pursuant to the terms of the Management Agreement, the incentive compensation payable to Seneca for each fiscal quarter is paid one-half in cash and one-half in restricted shares of our common stock. The number of shares to be issued to Seneca is based on (a) one-half of the total incentive compensation for the period, divided by (b) the average of the closing prices of the common stock over the 30 day period ending three days prior to the grant date, less a fair market value discount determined by our board of directors. During periods of declining market prices for shares of our common stock, we may be required to issue more shares to Seneca for the same amount of incentive compensation. Although these shares will initially be subject to restrictions on transfer which lapse ratably over a three-year period, the issuance of these shares will have a dilutive effect on our stockholders which may harm the market price of our common stock.

S-17

Table of Contents

Because Seneca might receive a significant fee if we terminate the Management Agreement, economic considerations might preclude us from terminating the Management Agreement in the event that Seneca fails to meet our expectations.

If we terminate the Management Agreement without cause or because we decide to manage our company internally or if Seneca terminates the management in the event of a change of control, then we will have to pay a significant fee to Seneca. The amount of the fee depends on whether:

we terminate the Management Agreement without cause in connection with a decision to manage our portfolio internally, in which case we will be obligated to pay to Seneca a fee equal to the highest amount of management fees incurred in a particular year during the then three most recent years; or

our decision to terminate the Management Agreement without cause is for a reason other than our decision to manage our portfolio internally, in which case we will be obligated to pay Seneca an amount equal to two times the highest amount of management fees incurred in a particular year during the then three most recent years.

In each of the above cases, Seneca will also receive accelerated vesting of the equity component of its incentive compensation. The actual amount of such fee cannot be known at this time because it is based in part on the performance of our portfolio of mortgage-backed securities. Paying this fee would reduce significantly the cash available for distribution to our stockholders and might cause us to suffer a net operating loss. Consequently, terminating the Management Agreement might not be advisable even if we determine that it would be more efficient to operate with an internal management structure or if we are otherwise dissatisfied with Seneca's performance.

Investors may not be able to estimate with certainty the aggregate fees and expense reimbursements that will be paid to Seneca under the Management Agreement and the cost-sharing agreement due to the time and manner in which Seneca's incentive compensation and expense reimbursements are determined.

Seneca may be entitled to substantial fees pursuant to the Management Agreement. Seneca's base management fee is calculated as a percentage of our average net worth. Seneca's incentive compensation is calculated as a tiered percentage of our taxable income (before deducting certain items) in excess of a threshold amount of taxable income and is indeterminable in advance of a particular period. Since future payments of base management fees, incentive compensation and expense reimbursements are determined at future dates based upon our then-applicable average net worth, results of operations and actual expenses incurred by Seneca, such fees and expense reimbursements cannot be estimated with mathematical certainty. Any base management fees, incentive compensation or expense reimbursements payable to Seneca may be materially greater or less than the historical amounts and we can provide no assurance at this time as to the amount of any such base management fee, incentive compensation or expense reimbursements that may be payable to Seneca in the future.

Seneca may render services to other mortgage investors, which could reduce the amount of time and effort that Seneca devotes to us.

Our Management Agreement with Seneca does not restrict the right of Seneca, any persons working on its behalf or any of its affiliates, to carry on their respective businesses, including the rendering of advice to others regarding the purchase of mortgage-backed securities that would meet our investment criteria. In addition, the Management Agreement does not specify a minimum time period that Seneca and its personnel must devote to managing our investments. The ability of Seneca to engage in these other business activities, and specifically to manage mortgage-related assets for third parties, could reduce the time and effort it spends managing our portfolio to the detriment of our investment returns.

Seneca's liability is limited under the Management Agreement, and we have agreed to indemnify Seneca against certain liabilities.

Seneca has not assumed any responsibility to us other than to render the services described in the Management Agreement, and will not be responsible for any action of our board of directors in declining to follow Seneca's advice or recommendations. Seneca and its directors, officers and employees will not be liable to us for acts performed by its officers, directors, or employees in accordance with and pursuant to the Management Agreement, except for acts constituting gross negligence, recklessness, willful misconduct or active fraud in connection with their duties under the Management Agreement. We have agreed to indemnify Seneca and its directors, officers and employees with respect to all expenses, losses, damages, liabilities, demands, charges and claims arising from acts of Seneca not constituting gross negligence, recklessness, willful misconduct or active fraud.

S-18

Table of Contents

Legal and Tax Risks

If we are disqualified as a REIT, we will be subject to tax as a regular corporation and face substantial tax liability.

Qualification as a REIT involves the application of highly technical and complex U.S. federal income tax code provisions for which only a limited number of judicial or administrative interpretations exist. Accordingly, it is not certain we will be able to become and remain qualified as a REIT for U.S. federal income tax purposes. Even a technical or inadvertent mistake could jeopardize our REIT status. Furthermore, Congress or the Internal Revenue Service, or IRS, might change tax laws or regulations and the courts might issue new rulings, in each case potentially having retroactive effect, that could make it more difficult or impossible for us to qualify as a REIT. If we fail to qualify as a REIT in any tax year, then:

we would be taxed as a regular domestic corporation, which, among other things, means that we would be unable to deduct distributions to stockholders in computing taxable income and we would be subject to U.S. federal income tax on our taxable income at regular corporate rates;

any resulting tax liability could be substantial, would reduce the amount of cash available for distribution to stockholders, and could force us to liquidate assets at inopportune times, causing lower income or higher losses than would result if these assets were not liquidated; and

unless we were entitled to relief under applicable statutory provisions, we would be disqualified from treatment as a REIT for the subsequent four taxable years following the year during which we lost our qualification and, thus, our cash available for distribution to our stockholders would be reduced for each of the years during which we did not qualify as a REIT.

Even if we remain qualified as a REIT, we might face other tax liabilities that reduce our cash flow. Further, we might be subject to federal, state and local taxes on our income and property. Any of these taxes would decrease cash available for distribution to our stockholders.

Complying with REIT requirements might cause us to forego otherwise attractive opportunities.

In order to qualify as a REIT for U.S. federal income tax purposes, we must satisfy tests concerning, among other things, our sources of income, the nature and diversification of our mortgage-backed securities, the amounts we distribute to our stockholders and the ownership of our stock. We may also be required to make distributions to our stockholders at disadvantageous times or when we do not have funds readily available for distribution. Thus, compliance with REIT requirements may cause us to forego opportunities we would otherwise pursue.

In addition, the REIT provisions of the Internal Revenue Code impose a 100% tax on income from prohibited transactions. Prohibited transactions generally include sales of assets that constitute inventory or other property held for sale in the ordinary course of a business, other than foreclosure property. This 100% tax could impact our desire to sell mortgage-backed securities at otherwise opportune times if we believe such sales could be considered a prohibited transaction.

Complying with REIT requirements may limit our ability to hedge effectively.

The existing REIT provisions of the Internal Revenue Code substantially limit our ability to hedge mortgage-backed securities and related borrowings. Under these provisions, our annual income from qualified hedges, together with any other income not generated from qualified REIT real estate assets, is limited to less than 25% of our gross income. In addition, we must limit our aggregate income from hedging and services from all sources, other than

from qualified REIT real estate assets or qualified hedges, to less than 5% of our annual gross income. As a result, we might in the future have to limit our use of advantageous hedging techniques. This could leave us exposed to greater risks associated with changes in interest rates than we would otherwise want to bear. If we were to violate the 25% or 5% limitations, we might have to pay a penalty tax equal to the amount of our income in excess of those limitations, multiplied by a fraction intended to reflect our profitability. If we fail to satisfy the 25% or 5% limitations, unless our failure was due to reasonable cause and not due to willful neglect, we could lose our REIT status for federal income tax purposes.

Complying with REIT requirements may force us to liquidate otherwise attractive investments.

In order to qualify as a REIT, we must ensure that at the end of each calendar quarter at least 75% of the value of our assets consists of cash, cash items, government securities and qualified REIT real estate assets. The remainder of our investment in securities generally cannot include more than 10% of the outstanding voting securities of any one issuer or more than 10% of the total value of the outstanding securities of any one issuer. In addition, generally, no more than 5% of the value of our assets can

Table of Contents

consist of the securities of any one issuer. If we fail to comply with these requirements, we must dispose of a portion of our assets within 30 days after the end of the calendar quarter in order to avoid losing our REIT status and suffering adverse tax consequences.

Complying with REIT requirements may force us to borrow to make distributions to our stockholders.

As a REIT, we must distribute 90% of our annual taxable income (subject to certain adjustments) to our stockholders. From time to time, we might generate taxable income greater than our net income for financial reporting purposes from, among other things, amortization of capitalized purchase premiums, or our taxable income might be greater than our cash flow available for distribution to our stockholders. If we do not have other funds available in these situations, we might be unable to distribute 90% of our taxable income as required by the REIT rules. In that case, we would need to borrow funds, sell a portion of our mortgage-backed securities potentially at disadvantageous prices or find another alternative source of funds. These alternatives could increase our costs or reduce our equity and reduce amounts available to invest in mortgage-backed securities.

Failure to maintain an exemption from the Investment Company Act, would harm our results of operations.

We intend to conduct our business so as not to become regulated as an investment company under the Investment Company Act of 1940, as amended. If we fail to qualify for this exemption, our ability to use leverage would be substantially reduced and we would be unable to conduct our business as described in this prospectus supplement.

The Investment Company Act exempts entities that are primarily engaged in the business of purchasing or otherwise acquiring mortgages and other liens on, and interests in, real estate. Under the current interpretation of the SEC staff, in order to qualify for this exemption, we must maintain at least 55% of our assets directly in these qualifying real estate interests. Mortgage-backed securities that do not represent all of the certificates issued with respect to an underlying pool of mortgages may be treated as separate from the underlying mortgage loans and, thus, may not qualify for purposes of the 55% requirement. Therefore, our ownership of these mortgage-backed securities is limited by the provisions of the Investment Company Act.

In satisfying the 55% requirement under the Investment Company Act, we treat as qualifying interests mortgage-backed securities issued with respect to an underlying pool as to which we hold all issued certificates. If the SEC or its staff adopts a contrary interpretation of such treatment, we could be required to sell a substantial amount of our mortgage-backed securities under potentially adverse market conditions. Further, in our attempts to ensure that we at all times qualify for the exemption under the Investment Company Act, we might be precluded from acquiring mortgage-backed securities if their yield is higher than the yield on mortgage-backed securities that could be purchased in a manner consistent with the exemption. These factors may lower or eliminate our net income.

Misplaced reliance on legal opinions or statements by issuers of mortgage-backed securities could result in a failure to comply with REIT income or assets tests.

When purchasing mortgage-backed securities, we may rely on opinions of counsel for the issuer or sponsor of such securities, or statements made in related offering documents, for purposes of determining whether and to what extent those securities constitute REIT real estate assets for purposes of the REIT asset tests and produce income that qualifies under the REIT gross income tests. The inaccuracy of any such opinions or statements may adversely affect our REIT qualification and result in significant corporate-level tax.

One-action rules may harm the value of the underlying property.

Several states have laws that prohibit more than one action to enforce a mortgage obligation, and some courts have construed the term "action" broadly. In such jurisdictions, if the judicial action is not conducted according to law, there may be no other recourse in enforcing a mortgage obligation, thereby decreasing the value of the underlying property.

We may be harmed by changes in various laws and regulations.

Changes in the laws or regulations governing Seneca or its affiliates may impair Seneca's or its affiliates' ability to perform services in accordance with the Management Agreement. Our business may be harmed by changes to the laws and regulations affecting our manager or us, including changes to securities laws and changes to the Internal Revenue Code applicable to the taxation of REITs. New legislation may be enacted into law or new interpretations, rulings or regulations could be adopted, any of which could harm us, our manager and our stockholders, potentially with retroactive effect.

Legislation was recently enacted that reduces the maximum tax rate of non-corporate taxpayers for capital gains (for taxable years ending on or after May 6, 2003 and before January 1, 2009) and for dividends (for taxable years beginning after December 31, 2002 and before January 1, 2009) to 15%. Generally, dividends paid by REITs are not eligible for the new 15%

Table of Contents

federal income tax rate, with certain exceptions discussed at *United States Federal Income Tax Considerations-Taxation of Taxable United States Stockholders-Distributions Generally* in the prospectus accompanying this prospectus supplement. Although this legislation does not adversely affect the taxation of REITs or dividends paid by REITs, the more favorable treatment of regular corporate dividends could cause investors who are individuals to consider stocks of other corporations that pay dividends as more attractive relative to stocks of REITs. It is not possible to predict whether this change in perceived relative value will occur, or what the effect will be on the market price of our common stock.

In addition, legislation was recently introduced in the United States House of Representatives and the United States Senate that would amend certain rules relating to REITs. Among other changes, the proposed legislation would provide the Internal Revenue Service with the ability to impose monetary penalties, rather than a loss of REIT status, for reasonable cause violations of certain tests relating to REIT qualification, and would change the formula for calculating the tax imposed for certain violations of the income tests discussed at *United States Federal Income Tax Considerations-Requirements for Qualification as a REIT-Income Tests* in the prospectus accompanying this prospectus supplement. In general, the changes would apply to taxable years beginning after the date the legislation is enacted. As of the date hereof, it is not possible to predict with any certainty whether the proposed legislation will be enacted in its current form.

We may incur excess inclusion income that would increase the tax liability of our stockholders.

In general, dividend income that a tax-exempt entity receives from us should not constitute unrelated business taxable income as defined in Section 512 of the Internal Revenue Code. If we realize excess inclusion income and allocate it to stockholders, this income cannot be offset by net operating losses. If the stockholder is a tax-exempt entity, then this income would be fully taxable as unrelated business taxable income under Section 512 of the Internal Revenue Code. If the stockholder is foreign, it would be subject to U.S. federal income tax withholding on this income without reduction pursuant to any otherwise applicable income-tax treaty.

Excess inclusion income could result if we held a residual interest in a real estate mortgage investment conduit, or REMIC. Excess inclusion income also would be generated if we were to issue debt obligations with two or more maturities and the terms of the payments on these obligations bore a relationship to the payments that we received on our mortgage-backed securities securing those debt obligations. We generally structure our borrowing arrangements in a manner designed to avoid generating significant amounts of excess inclusion income. We do, however, enter into various repurchase agreements that have differing maturity dates and afford the lender the right to sell any pledged mortgage securities if we default on our obligations. The IRS may determine that these borrowings give rise to excess inclusion income that should be allocated among stockholders. Furthermore, some types of tax-exempt entities, including voluntary employee benefit associations and entities that have borrowed funds to acquire their shares of our common stock, may be required to treat a portion of or all of the dividends they may receive from us as unrelated business taxable income. Finally, we may invest in equity securities of other REITs and it is possible that we might receive excess inclusion income from those investments.

Risks Related to this Offering

We have not established a minimum distribution payment level and we cannot assure you of our ability to make distributions to our stockholders in the future.

We intend to make quarterly distributions to our stockholders in amounts such that we distribute all or substantially all of our taxable income in each year, subject to certain adjustments. This, along with other factors, should enable us to qualify for the tax benefits accorded to a REIT under the Internal Revenue Code. We have not established a minimum distribution payment level and our ability to make distributions might be harmed by the risk

factors described in this prospectus supplement. All distributions will be made at the discretion of our board of directors and will depend on our earnings, our financial condition, maintenance of our REIT status and such other factors as our board of directors may deem relevant from time to time. We cannot assure you that we will have the ability to make distributions to our stockholders in the future.

S-21

Table of Contents

Restrictions on ownership of a controlling percentage of our capital stock might limit your opportunity to receive a premium on our stock.

For the purpose of preserving our REIT qualification and for other reasons, our charter prohibits direct or constructive ownership by any person of more than 9.8% of the lesser of the total number or value of the outstanding shares of our common stock or more than 9.8% of the outstanding shares of our preferred stock. The constructive ownership rules in our charter are complex and may cause the outstanding stock owned by a group of related individuals or entities to be deemed to be constructively owned by one individual or entity. As a result, the acquisition of less than 9.8% of the outstanding stock by an individual or entity could cause that individual or entity to own constructively in excess of 9.8% of the outstanding stock, and thus be subject to the ownership limit in our charter. Any attempt to own or transfer shares of our common or preferred stock in excess of the ownership limit without the consent of our board of directors shall be void, and will result in the shares being transferred by operation of law to a charitable trust. These provisions might inhibit market activity and the resulting opportunity for our stockholders to receive a premium for their shares that might otherwise exist if any person were to attempt to assemble a block of shares of our stock in excess of the number of shares permitted under our charter and which may be in the best interests of our stockholders.

Certain provisions of Maryland law and our charter and bylaws could hinder, delay or prevent a change in control of our company.

Certain provisions of Maryland law, our charter and our bylaws have the effect of discouraging, delaying or preventing transactions that involve an actual or threatened change in control of our company. These provisions include the following:

Classified Board of Directors. Our board of directors is divided into three classes with staggered terms of office of three years each. The classification and staggered terms of office of our directors make it more difficult for a third party to gain control of our board of directors. At least two annual meetings of stockholders, instead of one, generally would be required to effect a change in a majority of the board of directors.

Removal of Directors. Under our charter, subject to the rights of one or more classes or series of preferred stock to elect one or more directors, a director may be removed only for cause and only by the affirmative vote of at least two-thirds of all votes entitled to be cast by our stockholders generally in the election of directors.

Number of Directors, Board Vacancies, Term of Office. Under certain amendments to our bylaws which will become effective at such time as a class of our equity securities is registered under the Securities Exchange Act of 1934, as amended, or the Exchange Act, (which will occur upon completion of our IPO), we have elected to be subject to certain provisions of Maryland law which vest in the board of directors the exclusive right to determine the number of directors and the exclusive right, by the affirmative vote of a majority of the remaining directors, to fill vacancies on the board even if the remaining directors do not constitute a quorum. These provisions of Maryland law, which are applicable even if other provisions of Maryland law or the charter or bylaws provide to the contrary, also provide that any director elected to fill a vacancy shall hold office for the remainder of the full term of the class of directors in which the vacancy occurred, rather than the next annual meeting of stockholders as would otherwise be the case, and until his or her successor is elected and qualifies.

Limitation on Stockholder-Requested Special Meetings. Our bylaws provide that our stockholders have the right to call a special meeting only upon the written request of stockholders entitled to cast not less than a majority of all the votes entitled to be cast by the stockholders at such meeting.

Advance Notice Provisions for Stockholder Nominations and Proposals. Our bylaws require advance written notice for stockholders to nominate persons for election as directors at, or to bring other business before, any meeting of stockholders. This bylaw provision limits the ability of stockholders to make nominations of persons for election as directors or to introduce other proposals unless we are notified in a timely manner prior to the meeting.

Exclusive Authority of our Board to Amend the Bylaws. Our bylaws provide that our board of directors has the exclusive power to adopt, alter or repeal any provision of the bylaws or to make new bylaws. Thus, our stockholders may not effect any changes to our bylaws.

Preferred Stock. Under our charter, our board of directors has authority to issue preferred stock from time to time in one or more series and to establish the terms, preferences and rights of any such series of preferred stock, all without approval of our stockholders.

Duties of Directors with Respect to Unsolicited Takeovers. Maryland law provides protection for Maryland corporations against unsolicited takeovers by limiting, among other things, the duties of the directors in unsolicited takeover situations. The duties of directors of Maryland corporations do not require them to (1) accept, recommend or respond to any proposal by a person seeking to acquire control of the corporation, (2) authorize the corporation to redeem any rights

S-22

Table of Contents

under, or modify or render inapplicable, any stockholders rights plan, (3) make a determination under the Maryland Business Combination Act or the Maryland Control Share Acquisition Act, or (4) act or fail to act solely because of the effect of the act or failure to act may have on an acquisition or potential acquisition of control of the corporation or the amount or type of consideration that may be offered or paid to the stockholders in an acquisition. Moreover, under Maryland law the act of the directors of a Maryland corporation relating to or affecting an acquisition or potential acquisition of control is not subject to any higher duty or greater scrutiny than is applied to any other act of a director. Maryland law also contains a statutory presumption that an act of a director of a Maryland corporation satisfies the applicable standards of conduct for directors under Maryland law.

Ownership Limit. In order to preserve our status as a REIT under the Internal Revenue Code, our charter generally permits any single stockholder, or any group of affiliated stockholders, from beneficially owning more than 9.8% of our outstanding common or preferred stock unless our board of directors waives or modifies this ownership limit.

Maryland Business Combination Act. The Maryland Business Combination Act provides that unless exempted, a Maryland corporation may not engage in business combinations, including mergers, dispositions of 10% or more of its assets, issuance of shares of stock and other specified transactions, with an interested stockholder or an affiliate of an interested stockholder for five years after the most recent date on which the interested stockholder became an interested stockholder, and thereafter unless specified criteria are met. An interested stockholder is generally a person owning or controlling, directly or indirectly, 10% or more of the voting power of the outstanding stock of a Maryland corporation. Our board of directors has adopted a resolution exempting our company from this statute. However, our board of directors may repeal or modify this resolution in the future, in which case the provisions of the Maryland Business Combination Act will be applicable to business combinations between our company and other persons.

Maryland Control Share Acquisition Act. Maryland law provides that control shares of a corporation acquired in a control share acquisition shall have no voting rights except to the extent approved by a vote of two-thirds of the votes eligible to be cast on the matter under the Maryland Control Share Acquisition Act. Control shares means shares of stock that, if aggregated with all other shares of stock previously acquired by the acquiror, would entitle the acquiror to exercise voting power in electing directors within one of the following ranges of the voting power: one-tenth or more but less than one-third, one-third or more but less than a majority or a majority or more of all voting power. A control share acquisition means the acquisition of control shares, subject to certain exceptions. If voting rights of control shares acquired in a control share acquisition are not approved at a stockholders meeting, then subject to certain conditions and limitations, the issuer may redeem any or all of the control shares for fair value. If voting rights of such control shares are approved at a stockholders meeting and the acquiror becomes entitled to vote a majority of the shares of stock entitled to vote, all other stockholders may exercise appraisal rights. Our bylaws contain a provision exempting acquisitions of our shares from the Maryland Control Share Acquisition Act. However, our board of directors may amend our bylaws in the future to repeal or modify this exemption, in which case any control shares of our company acquired in a control share acquisition will be subject to the Maryland Control Share Acquisition Act.

Future offerings of debt securities, which would be senior to our common stock upon liquidation, or equity securities, which would dilute our existing stockholders and may be senior to our common stock for the purposes of distributions, may harm the value of our common stock.

In the future, we may attempt to increase our capital resources by making additional offerings of debt or equity securities, including commercial paper, medium-term notes, senior or subordinated notes and classes of preferred stock or common stock. Upon the liquidation of our company, holders of our debt securities and shares of preferred stock and lenders with respect to other borrowings will receive a distribution of our available assets prior to the

holders of our common stock. Additional equity offerings by us may dilute the holdings of our existing stockholders or reduce the value of our common stock, or both. Our preferred stock, if issued, would have a preference on distributions that could limit our ability to make distributions to the holders of our common stock. Because our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Thus, our stockholders bear the risk of our future offerings reducing the market price of our common stock and diluting their stock holdings in us.

A regular trading market for our common stock might not develop, which would harm the liquidity and value of our common stock.

Our common stock is listed on the New York Stock Exchange under the symbol LUM. However, we cannot assure you that regular trading of our common stock will develop on that exchange or elsewhere or, if developed, that any such market will be sustained. Accordingly, we cannot assure you of:

the likelihood that a regular market for our common stock will develop;

the liquidity of any such market;

S-23

Table of Contents

the ability of our stockholders to sell their shares of our common stock; or

the prices that our stockholders may obtain for their shares of our common stock.

The market price and trading volume of our common stock may be volatile.

Even if an active trading market develops for our common stock after this offering, the market price of our common stock may be highly volatile and be subject to wide fluctuations. In addition, the trading volume in our common stock may fluctuate and cause significant price variations to occur. If the market price of our common stock declines significantly, you may be unable to resell your shares at or above your purchase price. We cannot assure you that the market price of our common stock will not fluctuate or decline significantly in the future. Some of the factors that could negatively affect our stock price or result in fluctuations in the price or trading volume of our common stock include:

actual or anticipated variations in our quarterly operating results or distributions;

changes in our funds from operations or earnings estimates or publication of research reports about us or the real estate industry, although there can be no assurance that any research reports about us will be published;

increases in market interest rates that lead purchasers of our shares to demand a higher yield;

changes in market valuations of similar companies;

adverse market reaction to any increased indebtedness we incur in the future;

additions or departures of key management personnel;

actions by institutional stockholders;

speculation in the press or investment community; and

general market and economic conditions.

Broad market fluctuations could harm the market price of our common stock.

The stock market has experienced extreme price and volume fluctuations that have affected the market price of many companies in industries similar or related to ours and that have been unrelated to these companies' operating performances. These broad market fluctuations could reduce the market price of our common stock. Furthermore, our operating results and prospects may be below the expectations of public market analysts and investors or may be lower than those of companies with comparable market capitalizations, which could harm the market price of our common stock.

Shares of our common stock eligible for future sale may harm our stock price.

We cannot predict the effect, if any, of future sales of shares of our common stock, or the availability of shares for future sales, on the market price of our common stock. Sales of substantial amounts of these shares of common stock, or the perception that these sales could occur, may harm prevailing market prices for our common stock. As of May 5, 2004, there are:

36,927,339 shares of outstanding common stock;

outstanding options to purchase 55,000 shares of our common stock at a weighted average exercise price of \$14.82 per share; and

an additional 940,307 shares of our common stock available for future awards under our stock incentive plans.

A total of 940,307 shares of our common stock, or 1% of our current total authorized shares, are reserved for future awards and grants under our stock incentive plans. We filed a registration statement on Form S-8 under the Securities Act on January 28, 2004 covering the 1.0 million shares of our common stock reserved for issuance under the 2003 Stock Incentive Plan and/or subject to outstanding options under that stock incentive plan. Shares of our common stock issued upon exercise of options under the Form S-8 will be available for sale in the public market, subject to Rule 144 volume limitations applicable to affiliates and subject to the contractual restrictions described above.

S-24

Table of Contents

During December 2003, we issued 13,110,000 shares of common stock in our initial public offering. All of those shares are eligible for immediate resale by their holders. During March 2004, we issued 12,000,000 shares of common stock in a public offering. All of those shares are eligible for immediate resale by their holders. Similarly, all of the shares sold, from time to time, in this offering will be eligible for immediate resale by their holders.

If any or all of the above holders sell a large number of securities in the public market, the sale could reduce the market price of our common stock and could impede our ability to raise future capital through a sale of additional equity securities.

Changes in yields may harm the market price of our stock.

Our earnings are derived primarily from the expected positive spread between the yield on our assets and the cost of our borrowings. This spread will not necessarily be larger in high interest rate environments than in low interest rate environments and may also be negative. In addition, during periods of high interest rates, our net income, and therefore the amount of any distributions on our common stock, might be less attractive compared to alternative investments of equal or lower risk. Each of these factors could harm the market price of our common stock.

Terrorist attacks and other acts of violence or war may affect any market for our common stock, the industry in which we operate, our operations and our profitability.

Terrorist attacks may harm our results of operations and your investment. We cannot assure you that there will not be further terrorist attacks against the United States or U.S. businesses. These attacks or armed conflicts may impact the property underlying our mortgage-backed securities directly or indirectly, by undermining economic conditions in the United States. Losses resulting from terrorist events are generally uninsurable.

Table of Contents**DILUTION**

Our net tangible book value as of March 31, 2004 was approximately \$460.5 million, or \$12.50 per share of our common stock. If you invest in our common stock, your interest will be diluted to the extent of the difference between the price you pay per share of our common stock and the net tangible book value per share of our common stock at the time of your purchase. Net tangible book value per share is calculated by subtracting our total liabilities from our total tangible assets, which is total assets less intangible assets, and dividing this amount by the number of shares of our common stock issued and outstanding. The sale of shares of common stock in this offering by the selling stockholders will not affect our net tangible book value because we will not receive any proceeds from their sale of our common stock. Based on our net tangible book value as of March 31, 2004, investors in this offering will experience immediate and substantial dilution to the extent that their purchase price per share exceeds \$12.50. The following table illustrates this per share dilution based on an assumed purchase price of \$13.25 per share, which was the May 5, 2004 closing price of our common stock on the NYSE:

Assumed purchase price per share		\$ 13.25
Net tangible book value per share as of March 31, 2004	\$ 12.50	
Increase per share attributable to new investors	<u>0.00</u>	
Net tangible book value per share		<u>12.50</u>
Dilution per share to new investors		<u>\$ 0.75</u>

The foregoing discussion and table are based upon 34,841,146 shares actually issued and outstanding as March 31, 2004. As of that date, there were also 55,000 options outstanding at a weighted-average exercise price of \$14.82 per share and there were a total of 943,505 shares available for future awards under our stock incentive plans. Subsequent to March 31, 2004 we issued the following shares:

we issued 55,849 shares of our common stock issued to Seneca as the equity component of its incentive fee for the first quarter of 2004;

we issued 2,792 shares of our common stock issued to Mr. Zyda under our 2003 Stock Incentive Plan as the equity component of his contractual first quarter of 2004 incentive bonus; and

we issued 406 shares of our common stock to employees under our 2003 Stock Incentive Plan as an incentive bonus.

Table of Contents

BUSINESS

The Company

Background

We were formed in April 2003 to invest primarily in U.S. agency and other highly-rated, single-family, adjustable-rate, hybrid adjustable-rate and fixed-rate mortgage-backed securities, which we acquire in the secondary market. Our strategy is to acquire mortgage-related assets, finance these purchases in the capital markets and use leverage in order to provide an attractive return on stockholders' equity. Through this strategy, we seek to earn income, which is generated from the spread between the yield on our earning assets and our costs, including the interest cost of the funds we borrow.

We commenced operations on June 11, 2003, following the completion of a private placement of our common stock, in which we raised net proceeds of approximately \$159.7 million. On December 18, 2003, we completed the initial public offering of our shares of common stock and began trading on the New York Stock Exchange, or NYSE, under the trading symbol LUM on December 19, 2003. The initial public offering raised approximately \$170.4 million in gross proceeds. The net proceeds from this offering were received in late December and all of the net offering proceeds had been used to purchase mortgage-backed securities as of March 31, 2004. On March 29, 2004, we completed a public offering of 12,000,000 shares of common stock. On April 2, 2004, we received proceeds from the public offering in the amount of \$157.5 million, net of underwriting discount and other offering costs. Because of the timing of this offering, we had not fully levered our portfolio at March 31, 2004 to within our target range of eight to 12 times the amount of our equity. As a result, the total amount of mortgage-backed securities and repurchase agreement liabilities as of March 31, 2004 were lower than they will be once our portfolio is fully levered through additional repurchase agreement liabilities and related mortgage-backed security purchases.

We are externally managed and advised by Seneca Capital Management LLC, or Seneca, pursuant to a management agreement, or the Management Agreement.

We will elect to be taxed as a real estate investment trust, or REIT, under the Internal Revenue Code of 1986, as amended, commencing with the taxable year ended December 31, 2003. As such, we will routinely distribute substantially all of the income generated from our operations to our stockholders. As long as we retain our REIT status, we generally will not be subject to U.S. federal or state taxes on our income to the extent that we distribute our net income to our stockholders.

Assets

We invest primarily in adjustable-rate and hybrid adjustable-rate mortgage-backed securities. Adjustable-rate mortgage-backed securities have interest rates that reset periodically, typically every six months or on an annual basis. Hybrid adjustable-rate mortgage-backed securities have interest rates that are fixed for the first few years of the loan—typically three, five, seven or 10 years—and thereafter reset periodically in a manner similar to adjustable-rate mortgage-backed securities. See Note 3 to the financial statements for further discussion.

We have acquired and will seek to acquire additional assets that will produce competitive returns, taking into consideration the amount and nature of the anticipated returns from the investment, our ability to pledge the investment for secured, collateralized borrowings and the costs associated with financing, managing, securitizing and reserving for these investments. We expect that all of the mortgage-backed securities that we acquire will be agency-backed or have AAA credit ratings from at least one nationally-recognized statistical rating agency, and most of the securities will be hybrid adjustable-rate mortgage-backed securities.

We review the credit risk associated with each potential investment and may diversify our portfolio to avoid undue geographic, insurer, industry and other types of concentrations. By maintaining a large percentage of our assets in high quality and highly-rated assets, many of which are guaranteed under limited circumstances as to payment of a limited amount of principal and interest by federal agencies or federally chartered entities such as Fannie Mae, Freddie Mac or Ginnie Mae, we believe we can mitigate our exposure to losses from credit risk.

We have financed our acquisition of mortgage-backed securities by investing our equity and by borrowing at short-term rates under repurchase agreements. We intend to continue to finance our acquisitions in this manner.

Borrowings

We have established 17 borrowing arrangements with various investment banking firms and other lenders, 14 of which were in use on March 31, 2004. These borrowing arrangements facilitated our purchase of our initial portfolio of securities and

S-27

Table of Contents

provided us with sufficient borrowing capacity to fully leverage the net proceeds of our initial public offering. The repurchase agreements were secured by mortgage-backed securities. We intend to seek to renew repurchase agreements as they mature under the then-applicable borrowing terms of the counterparties to our repurchase agreements. See Note 4 to the financial statements for further discussion.

We generally seek to borrow between eight and 12 times the amount of our equity. We actively manage the adjustment periods and the selection of the interest rate indices of our borrowings against the adjustment periods and the selection of indices on our mortgage-backed securities in order to manage our liquidity and interest rate related risks.

Hedging

We may also choose to engage in various hedging activities designed to match more closely the terms of our assets and liabilities. At March 31, 2004, we were engaged in short sales of Eurodollar futures contracts as a means of mitigating our interest rate risk on forecasted interest expense associated with the benchmark rate on forecasted rollover/reissuance of repurchase agreements or the interest rate repricing of repurchase agreements. The value of these futures contracts is marked-to-market daily in our margin account with the custodian. Based upon the daily market value of these futures contracts, we either receive funds into, or wire funds into, our margin account with the custodian to ensure that an appropriate margin account balance is maintained at all times through the expiration of the contracts. See Note 10 to the financial statements as of and for the quarter ended March 31, 2004 for further discussion.

Distributions

On November 17, 2003, we paid a cash distribution of \$0.50 per share to our stockholders of record on October 21, 2003. On January 28, 2004, we paid a cash distribution of \$0.45 per share to our stockholders of record on December 11, 2003. On April 26, 2004, we paid a cash distribution of \$0.42 per share to our stockholders of record on March 19, 2004. These distributions are taxable dividends, and neither of these distributions are considered return of capital. The distributions were funded with cash flow from our ongoing operations, including principal payments and interest payments on our mortgage-backed securities.

Business Strategy

Our Operating Policies and Programs

Our board of directors has established the following four primary operating policies to implement our business strategies:

asset acquisition policy;

capital/liquidity and leverage policies;

credit risk management policy; and

asset/liability management policy.

Asset Acquisition Policy

Our asset acquisition policy provides guidelines for acquiring investments in order to maintain compliance with our overall investment strategy. In particular, we acquire a portfolio of investments that can be grouped into specific

categories. Each category and our respective investment guidelines are as follows:

Category I-At least 75% of our total assets will generally be residential mortgage-related securities and short-term investments. Assets in this category are rated within one of the two highest rating categories by at least one nationally-recognized statistical rating organization, or will be obligations guaranteed by federal agencies or federally chartered agencies, such as Fannie Mae, Freddie Mac or Ginnie Mae.

Category II-At least 90% of our total assets will consist of Category I investments plus mortgage-related securities that are rated at least investment grade by at least one nationally-recognized statistical rating organization.

Category III-No more than 10% of our total assets may be of a type not meeting any of the above criteria. Among the types of assets generally assigned to this category are mortgage-related securities rated below investment grade and leveraged mortgage derivative securities, or shares of other REITs, or other investments.

S-28

Table of Contents

We expect to acquire only those mortgage-related assets which we believe our manager has the necessary expertise to evaluate and manage, which we can readily finance, and which are consistent with our overall investment strategy and our asset acquisition policy. Generally, we expect to hold our mortgage-backed securities until maturity. Therefore, we generally do not seek to acquire assets with investment returns that are attractive only in a limited range of scenarios. Future interest rates and mortgage prepayment rates are very difficult to predict and, as a result, we seek to acquire mortgage-backed securities which we believe provide acceptable returns over a broad range of interest rate and prepayment scenarios.

We expect most of our acquisitions to consist of adjustable-rate mortgage-backed securities, hybrid adjustable-rate mortgage-backed securities and fixed-rate mortgage-backed securities. We anticipate that our investments in fixed-rate mortgage-backed securities will be focused in shorter-term mortgages, including balloon mortgages. We may, however, purchase longer-term fixed-rate mortgage-backed securities if we view the potential net returns as attractive or if the acquisition of such assets serves to reduce or diversify the overall risk profile of our portfolio.

Capital/Liquidity and Leverage Policies

We employ a leverage strategy to increase our investment assets by borrowing against existing mortgage-backed securities and using the proceeds to acquire additional mortgage-backed securities. We generally seek to borrow between eight to 12 times the amount of our equity, although our borrowings may vary from time to time depending on market conditions and other factors deemed relevant by our manager and our board of directors. We believe that this leaves an adequate capital base to protect against interest rate environments in which our borrowing costs might exceed our interest income from mortgage-backed securities.

Depending on the different cost of borrowing funds at different maturities, we expect to vary the maturities of our borrowed funds to attempt to produce lower borrowing costs. In general, our borrowings are short-term. We actively manage, on an aggregate basis, both the interest-rate indices and interest-rate adjustment periods of our borrowings against the interest-rate indices and interest-rate adjustment periods related to our mortgage-backed securities.

We expect to continue to finance our mortgage-backed securities primarily at short-term borrowing rates through repurchase agreements and, to a lesser extent, our equity capital. We anticipate that, upon repayment of each borrowing under a repurchase agreement, we will use the collateral immediately for borrowing under a new repurchase agreement. In the future we may also employ borrowings under lines of credit, term loans and other collateralized financings that we may establish with approved institutional lenders and we may employ long-term borrowings.

We have established 17 borrowing arrangements with various investment banking firms and other lenders. A repurchase agreement, although structured as a sale and repurchase obligation, acts as a financing under which we effectively pledge our mortgage-backed securities as collateral to secure a short-term loan. Generally, the other party to the agreement makes the loan in an amount equal to a percentage of the market value of the pledged collateral. At the maturity of the repurchase agreement, we are required to repay the loan and correspondingly receive back our collateral. While used as collateral, the mortgage-backed securities continue to pay principal and interest to us. In the event of our insolvency or bankruptcy, certain repurchase agreements may qualify for special treatment under the U.S. Federal Bankruptcy Code, the effect of which, among other things, would be to allow the creditor under the agreement to avoid the automatic stay provisions of the U.S. Federal Bankruptcy Code and to foreclose on the collateral agreement without delay. In the event of the insolvency or bankruptcy of the lender during the term of a repurchase agreement, the lender may be permitted, under applicable insolvency laws, to repudiate the contract, and our claim against the lender for damages may be treated simply as an unsecured creditor. In addition, if the lender is a broker or

dealer subject to the Securities Investor Protection Act of 1970, or an insured depository institution subject to the Federal Deposit Insurance Act, our ability to exercise our rights to recover our securities under a repurchase agreement or to be compensated for any damages resulting from the lender's insolvency may be further limited by those statutes. These claims would be subject to significant delay and, if and when received, may be substantially less than the damages we actually incur. As a result, we expect to enter into collateralized borrowings only with institutions that we believe are financially sound and which are rated investment grade by at least one nationally-recognized statistical rating organization.

Substantially all of our borrowing agreements require us to deposit additional collateral in the event the market value of existing collateral declines, which may require us to sell assets to reduce our borrowings. We have designed our liquidity management policy to maintain an adequate capital base sufficient to provide required liquidity to respond to the effects under our borrowing arrangements of interest rate movements and changes in the market value of our mortgage-backed securities, as described above. However, a major disruption in the repurchase or other market that we rely on for short-term borrowings would harm our results of operations unless we were able to arrange alternative sources of financing on comparable terms.

Table of Contents

Credit Risk Management Policy

We review credit risk associated with each of our potential investments. In addition, we may diversify our portfolio of mortgage-backed securities to avoid undue geographic, insurer, industry and certain other types of concentration risk. We may reduce risk from sellers and servicers by obtaining representations and warranties. Our manager monitors the overall portfolio risk in order to determine appropriate levels of provision for losses we may experience.

We generally determine, at the time of purchase, whether or not a mortgage-related asset complies with our credit risk management policy guidelines, based upon the most recent information utilized by us. Such compliance is not expected to be affected by events subsequent to such purchase, such as changes in characterization, value or rating of any specific mortgage-related assets or economic conditions or events generally affecting any mortgage-related assets of the type held by us.

Asset/Liability Management Policy

Interest Rate Risk Management. To the extent consistent with our election to qualify as a REIT, we follow an interest rate risk management program intended to protect our portfolio of mortgage-backed securities and related debt against the effects of major interest rate changes. Specifically, our interest rate management program is formulated with the intent to offset, to some extent, the potential adverse effects resulting from rate adjustment limitations on our mortgage-backed securities and the differences between interest rate adjustment indices and interest rate adjustment periods of our adjustable-rate mortgage-backed securities and related borrowings.

Our interest rate risk management program encompasses a number of procedures, including the following:

monitoring and adjusting, if necessary, the interest rate sensitivity of our mortgage-backed securities compared with the interest rate sensitivities of our borrowings;

attempting to structure our borrowing agreements to have a range of different maturities and interest rate adjustment periods (although substantially all will be less than one year); and

actively managing, on an aggregate basis, the interest rate indices, interest rate adjustment periods, and gross reset margins of the mortgages underlying our mortgage-backed securities compared to the interest rate indices and adjustment periods of our borrowings.

As a result, we expect to be able to adjust the average maturity/adjustment period of our borrowings on an ongoing basis by changing the mix of maturities and interest rate adjustment periods as borrowings mature or are renewed. Through the use of these procedures, we attempt to reduce the risk of differences between interest rate adjustment periods of the mortgages underlying our adjustable-rate mortgage-backed securities and our related borrowings.

It is generally our intention to manage the assets in our portfolio with regard to risk characteristics such as duration, in order to carefully limit the overall interest rate risk of the portfolio. On occasion, we may alter the overall duration in order to better protect the portfolio in order to protect shareholder value. Similarly, it is our intention to manage the duration of our liabilities. Generally, we will seek to reduce the gap between the duration of our assets and our liabilities to a level which is consistent with protection of the portfolio during volatile interest rate environments. The means by which we will accomplish this objective will vary over time, and may include the use of hedging instruments and the alteration of the duration of the asset and/or the liability side of our balance sheet through asset purchases or sales and through the assumption or the retirement of repurchase agreements of varying maturities or the structuring of other financing arrangements.

Depending on market conditions and the cost of the transactions, we may conduct hedging activities in connection with our portfolio management. When we engage in hedging activities, we intend to do so in a manner consistent with our election to qualify as a REIT. The goal of any hedging strategy we adopt will be to lessen the effects of interest rate changes and to enable us to earn net interest income in periods of generally rising, as well as declining or static, interest rates. Specifically, if we implement a hedging program, it would likely be formulated with the intent to offset some of the potential adverse effects of changes in interest rate levels relative to the interest rates on the mortgage-backed securities held in our investment portfolio, as well as differences between the interest rate adjustment indices and maturity or reset periods related to our mortgage-backed securities and our borrowings.

Under the REIT rules of the Internal Revenue Code, some hedging activities produce income which is not qualifying income for purposes of the REIT gross income tests or create assets which are not qualifying assets for purposes of the REIT assets test. As a result, we may have to terminate certain hedging activities before the benefits of such activities are realized. In the case of

Table of Contents

excess hedging income, we would be required to pay a penalty tax for failure to satisfy certain REIT income tests under the Internal Revenue Code if the excess is due to reasonable cause and not willful neglect. In the case of having excess value in relation to mortgage-related assets, the penalty would result in our disqualification as a REIT. In addition, asset/liability management involves transaction costs that increase dramatically as the period covered by hedging protection increases and that may increase during periods of fluctuating interest rates.

Prepayment Risk Management. We also seek to lessen the effects of prepayment of mortgage loans underlying our securities at a faster or slower rate than anticipated. We expect to accomplish this by using a variety of techniques which include, without limitation, structuring a diversified portfolio with a variety of prepayment characteristics, investing in mortgage-backed securities based on mortgage loans with prepayment prohibitions and penalties, investing in certain mortgage security structures that have prepayment protections, and purchasing mortgage-backed securities at a premium and at a discount. We intend to monitor prepayment risk through the periodic review of the impact of a variety of prepayment scenarios on our revenues, net earnings, distributions, cash flow and net balance sheet market value.

We believe that we have developed cost-effective asset/liability management policies to mitigate interest rate and prepayment risks. We continually monitor our risk management strategies as market conditions change. However, no strategy can completely insulate us from interest rate and prepayment risks. Further, as noted above, certain of the U.S. federal income tax requirements that we must satisfy to qualify as a REIT limit our ability to fully hedge our interest rate and prepayment risks. Therefore, we could be prevented from effectively hedging our interest rate and prepayment risks.

Description of Mortgage-Related Assets

Mortgage-Backed Securities

Pass-Through Certificates. We expect principally to invest in pass-through certificates, which are securities representing interests in pools of mortgage loans secured by residential real property in which payments of both interest and principal on the securities are generally made monthly. In effect, these securities pass through the monthly payments made by the individual borrowers on the mortgage loans that underlie the securities, net of fees paid to the issuer or guarantor of the securities. Pass-through certificates can be divided into various categories based on the characteristics of the underlying mortgages, such as the term or whether the interest rate is fixed or variable.

A key feature of most mortgage loans is the ability of the borrower to repay principal earlier than scheduled. This is called a prepayment. Prepayments can arise due to sale of the underlying property, refinancing, foreclosure, or other events. Prepayments result in a return of principal to pass-through certificate holders. This may result in a lower or higher rate of return upon reinvestment of principal. This is generally referred to as prepayment uncertainty. If a security purchased at a premium pre-pays at a higher than expected rate, then the value of the premium would be eroded at a faster than expected rate. Similarly, if a discount mortgage pre-pays at a lower than expected rate, the amortization towards par would be accumulated at a slower than expected rate. The possibility of these undesirable effects is sometimes referred to as prepayment risk.

In general, but not always, declining interest rates tend to increase prepayments, and rising interest rates tend to slow prepayments. Like other fixed-income securities, when interest rates rise, the value of mortgage-backed securities generally decline. The rate of prepayments on underlying mortgages will affect the price and volatility of mortgage-backed securities and may have the effect of shortening or extending the effective maturity of the security beyond what was anticipated at the time of purchase. If interest rates rise, our holdings of mortgage-backed securities may experience reduced returns if the borrowers of the underlying mortgages pay off their mortgages later than anticipated. This is generally referred to as extension risk.

Payment of limited amounts of principal and interest on some mortgage pass-through securities, although not the market value of the securities themselves, may be guaranteed by the full faith and credit of the federal government, including securities backed by Ginnie Mae, or by agencies or instrumentalities of the federal government, including Fannie Mae or Freddie Mac. Mortgage-backed securities created by non-governmental issuers, including commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers and other secondary market issuers, may be supported by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance and letters of credit, which may be issued by governmental entities, private insurers or the mortgage poolers.

The mortgage loans underlying pass-through certificates can generally be classified in the following four categories:

Adjustable-Rate Mortgages. Adjustable-rate mortgages, or ARMs, are those for which the borrower pays an interest rate that varies over the term of the loan. The interest rate usually resets based on market interest rates, although the adjustment of such an interest rate may be subject to certain limitations. Traditionally, interest rate resets occur at regular set intervals (for example, once per year). We will refer to such ARMs as traditional ARMs. Because the interest rates

S-31

Table of Contents

on ARMs fluctuate based on market conditions, ARMs tend to have interest rates that do not deviate from current market rates by a large amount. This in turn can mean that ARMs have less price sensitivity to interest rates. This may be attractive to some mortgage investors.

Fixed-Rate Mortgages. Fixed-rate mortgages are those where the borrower pays an interest rate that is constant throughout the term of the loan. Traditionally, most fixed-rate mortgages have an original term of 30 years. However, shorter terms (also referred to as final maturity dates) have become common in recent years. Because the interest rate on the loan never changes, even when market interest rates change, over time there can be a divergence between the interest rate on the loan and current market interest rates. This in turn can make a fixed-rate mortgage's price sensitive to market fluctuations in interest rates. In general, the longer the remaining term on the mortgage loan, the greater the price sensitivity. One way to attempt to lower the price sensitivity of a portfolio of fixed-rate mortgages is to buy those with shorter remaining terms or maturities.

Hybrid Adjustable-Rate Mortgages. A recent development in the mortgage market has been the popularity of ARMs that do not reset at regular intervals. Many of these ARMs have a fixed-rate for the first few years of the loan—typically three, five, seven or 10 years—and thereafter reset periodically like a traditional ARM. Effectively such mortgages are hybrids, combining the features of a pure fixed-rate mortgage and a traditional ARM. Hybrid ARMs have a price sensitivity to interest rates similar to that of a fixed-rate mortgage during the period when the interest rate is fixed and similar to that of an ARM when the interest rate is in its periodic reset stage. However, because many hybrid ARMs are structured with a relatively short initial time span during which the interest rate is fixed, even during that segment of its existence, the price sensitivity may be low. The ability of hybrid ARMs to exhibit low price sensitivity to interest rates can be attractive to some mortgage investors.

Balloon Maturity Mortgages. Balloon maturity mortgages are a type of fixed-rate mortgage. Thus, they have a static interest rate for the life of the loan. However the term of the loan is usually quite short and is less than the amortization schedule of the loan. Typically, this term or maturity is less than seven years. When the mortgage matures, the investor receives all of his principal back. This is effectively a price reset of the invested principal to par. As the balloon maturity mortgage approaches its maturity date, the price sensitivity of the mortgage declines. In fact, the price sensitivity for an agency balloon mortgage with a set maturity is actually lower than that for an agency hybrid ARM with the same time to interest rate reset. The ability of a balloon mortgage to have low price sensitivity to interest rates can be attractive for some mortgage investors.

Collateralized Mortgage Obligations. Collateralized mortgage obligations, or CMOs, are a type of mortgage-backed security. Interest and principal on a CMO are paid, in most cases, on a monthly basis. CMOs may be collateralized by whole mortgage loans, but are more typically collateralized by portfolios of mortgage pass-through securities guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae. CMOs are structured into multiple classes, or tranches, with each class bearing a different stated maturity. Monthly payments of principal, including prepayments, are first returned to investors holding the shortest maturity class; investors holding the longer maturity classes receive principal only after the first class has been retired.

Generally, fixed-rate mortgages are used to collateralize CMOs. However, the CMO tranches need not all have fixed-rate coupons. Some CMO tranches have floating rate coupons that adjust based on market interest rates, subject to some limitations. Such tranches, often called CMO floaters, can have relatively low price sensitivity. As is the case with traditional ARMs, hybrid ARMs and balloons, this low price sensitivity may be attractive to some mortgage investors.

Mortgage Derivative Securities. Although we do not have any intention to do so in the near term, we may acquire mortgage derivative securities in an amount not to exceed 10% of our total assets. Mortgage derivative securities allow the holder to receive interest only, principal only, or interest and principal in amounts that are disproportionate to those payable on the underlying mortgage loans. Payments on mortgage derivative securities can

be highly sensitive to the rate of prepayments on the underlying mortgage loans. In the event of faster or slower than anticipated prepayments on these mortgage loans, the rates of return on interests in mortgage derivative securities representing the right to receive interest only or a disproportionately large amount of interest, or interest only derivatives, would be likely to decline or increase, respectively. Conversely, the rates of return on mortgage derivative securities representing the right to receive principal only or a disproportionate amount of principal, or principal only derivatives, would be likely to increase or decrease in the event of faster or slower prepayment speeds, respectively.

We may also invest in inverse floaters, a class of CMOs with a coupon rate that resets in the opposite direction from the market rate of interest to which it is indexed, including LIBOR or the 11th District Cost of Funds Index, or COFI. Any rise in the index rate, which can be caused by an increase in interest rates, causes a drop in the coupon rate of an inverse floater while any drop in the index rate causes an increase in the coupon of an inverse floater. An inverse floater may behave like a leveraged security since its interest rate usually varies by a magnitude much greater than the magnitude of the index rate of interest. The leverage-like characteristics inherent in inverse floaters are associated with greater volatility in their market prices.

Table of Contents

We may also invest in other mortgage derivative securities that may be developed in the future.

Subordinated Interests. We may also acquire subordinated interests, which are classes of mortgage-backed securities that are junior to other classes of the same series of mortgage-backed securities in the right to receive payments from the underlying mortgage loans. The subordination may be for all payment failures on the mortgage loans securing or underlying such series of mortgage securities. The subordination will not be limited to those resulting from particular types of risks, including those resulting from war, earthquake or flood, or the bankruptcy of a borrower. The subordination may be for the entire amount of the series of mortgage-related securities or may be limited in amount.

Mortgage Loans

We may acquire and accumulate mortgage loans (i.e., fixed-rate, ARMs, hybrid and balloon mortgage loans) as part of our investment strategy until a sufficient quantity has been accumulated for securitization into high-quality mortgage-backed securities in order to enhance their value and liquidity. Pursuant to our asset acquisition policies, the aggregate amount of any mortgage loans that we acquire and do not immediately securitize, together with our investments in other mortgage-related assets that are not Category I or Category II assets, will not constitute more than 10% of our total assets at any time. All mortgage loans, if any, will be acquired with the intention of securitizing them into high-credit quality mortgage securities. Despite our intentions, however, we may not be successful in securitizing these mortgage loans. To meet our investment criteria, mortgage loans acquired by us will generally conform to the underwriting guidelines established by Fannie Mae, Freddie Mac, Ginnie Mae or other credit insurers. Applicable banking laws generally require that an appraisal be obtained in connection with the original issuance of mortgage loans by the lending institution. We do not intend to obtain additional appraisals at the time of acquiring any mortgage loans.

Mortgage loans may be originated by or purchased from various suppliers of mortgage-related assets throughout the United States, including savings and loans associations, banks, mortgage bankers and other mortgage lenders. We may acquire mortgage loans directly from originators and from entities holding mortgage loans originated by others. Our board of directors has not established any limits upon the geographic concentration of mortgage loans that we may acquire. However, our asset acquisition policy will limit the amount and/or type of mortgage loans we may acquire.

Other Investments

We may acquire other investments that include equity and debt securities issued primarily by other mortgage-related finance companies, interests in mortgage-related collateralized bond obligations, other subordinated interests in pools of mortgage-related assets, commercial mortgage loans and securities, and residential mortgage loans other than high-credit quality mortgage loans. These investments are generally considered Category III investments under our asset acquisition policy and shall be limited to 10% of our total assets.

We also intend to operate in a manner that will not subject us to regulation under the Investment Company Act. Our board of directors has the authority to modify or waive our current operating policies and our strategies without prior notice to you and without stockholder approval.

Investment Strategy

Our strategy is to invest primarily in U.S. agency and other highly-rated single-family adjustable-rate and fixed-rate mortgage-backed securities. We acquire these investments in the secondary market and seek to acquire assets that will produce competitive returns after considering the amount and nature of the anticipated returns from the

investment, our ability to pledge the investment for secured, collateralized borrowings and the costs associated with financing, managing, securitizing and reserving for these investments. We do not construct our overall investment portfolio in order to express a directional expectation for interest rates or mortgage prepayment rates. Future interest rates and mortgage prepayment rates are very difficult to predict and, as a result, we seek to acquire mortgage-backed securities which we believe provide acceptable returns over a broad range of interest rate and prepayment scenarios. When evaluating the purchase of mortgage-backed securities, we analyze whether the purchase will permit us to continue to satisfy the minimum 55% portfolio whole-pool requirement, with which we must comply to maintain our REIT status. We also assess the relative value of the mortgage-backed security and how well it would fit into our existing portfolio of mortgage-backed securities. Many aspects of a mortgage-backed security, and the dynamic interaction of its characteristics with those of our portfolio, can influence our perception of what that security is worth and the amount of premium we would be willing to pay to own the specific security. The characteristics of each potential investment we analyze generally include, but are not limited to, the following:

S-33

Table of Contents

origination year-the underwriting year for the mortgages comprising the mortgage-backed security. This characteristic helps to determine how seasoned the mortgage-backed security is and can influence our expectations for the investment's future cash flows. In the current low interest rate environment, mortgages that were originated several years ago (when interest rates were higher) tend to have been refinanced. Those borrowers who did not refinance their homes during the period of lower interest rates may be relatively less likely (than more recent borrowers) to refinance during the remaining life of their mortgages. Therefore, the expected cash flows from a potential investment with an earlier origination year could exhibit less sensitivity to changes in interest rates.

originator-the financial services entity that underwrites the mortgages comprising the mortgage-backed security. Originators do not have homogeneous underwriting standards. The particular underwriting standards utilized by an originator tend to influence the characteristics of the borrowers in its mortgage loan pools which, in turn, can influence the pool's prepayment rates and other cash flows. When analyzing a pool of mortgages, it can be useful to review the historical cash flows exhibited by the originator's prior mortgage loan pools. For example, we may limit the premium we would be willing to pay for a security if the originator has a history of early refinancings. The quality of the originator's underwriting standards and the terms it offers borrowers can also be important to our purchase decisions. These variables potentially include the originator's required loan documentation, FICO scores, loan-to-value ratios, prepayment penalties, cap rates, and assumability terms. Any of these variables might influence our expectations regarding the timing of cash flows from an originator's mortgage-backed securities and, thus, their attractiveness for our portfolio.

coupon-the weighted-average mortgage coupon of the mortgage-backed security. Higher coupons are initially attractive because they can generate more interest income for us than lower-coupon mortgage-backed securities. However, the sustainability of cash flows from higher-coupon pools is less predictable because, all else being equal, higher-coupon mortgages have a greater probability of being refinanced than lower-coupon mortgages. We generally analyze a mortgage-backed security's coupon in comparison to current market rates to form an expectation regarding how sustainable the interest income from the investment will be.

margin-the spread between an adjustable-rate mortgage's market index and the interest rate that the borrower must pay to service the mortgage. Similar to higher coupons, higher margins are attractive because they can generate more interest income for us than lower-margin mortgage-backed securities. However, higher-margin mortgage pools may be more prone to experience faster refinancing rates because high-margin borrowers are relatively more likely to find opportunities to refinance into mortgages with lower spreads to the index. As a result, the sustainability of the yield from an investment in a high-margin mortgage pool is less certain and the premium we would be willing to pay on such an investment, all else being equal, is less.

periodic cap-the amount by which the interest rate on an adjustable-rate mortgage can adjust during a specified period, usually six or 12 months. In rapidly rising interest rate environments, higher periodic caps are more attractive because they reduce the risk of the adjustable-rate mortgage coupon not being able to reset fully upwards to the current market rate. Conversely, in rapidly falling interest rate environments, lower periodic caps increase the probability that the mortgage's coupon will reset to a level that remains above the current market rate.

lifetime cap-the maximum interest rate that a specific adjustable-rate mortgage can have during its lifetime. The lifetime cap of a mortgage is often correlated with market interest rates at the time of origination. An adjustable-rate mortgage originated in a low interest rate environment frequently will have a lower lifetime cap than a comparably structured mortgage originated in a high interest rate environment. If interest rates rise sufficiently, an adjustable-rate mortgage with a lifetime cap can effectively behave like a fixed-rate mortgage because the coupon of the adjustable-rate mortgage cannot adjust above the lifetime cap, and will thus remain

effectively fixed at that level until rates fall. Higher lifetime caps tend to make particularly structured hybrid or adjustable-rate mortgage pools more attractive investment candidates.

time-to-reset-the number of months before the current coupon of the hybrid or adjustable-rate mortgage will reset. Time-to-reset is an important consideration as we structure the timing of interest rate adjustments on the mortgage-backed securities in our portfolio relative to changes in our borrowing costs.

loan-to-value-the ratio between the original loan amount and the value of the collateral securing the mortgage loan. We consider this factor less important in a decision to purchase agency-backed mortgage securities but it can be an important factor when purchasing non-agency securities. This factor also influences the subordination levels required by the national rating agencies to receive AAA-rated status.

geographic dispersion-the degree to which the properties underlying the pooled mortgage loans are geographically dispersed. We prefer greater geographic dispersion because we wish to limit our exposure to specific states or regions (which might be experiencing relatively greater economic difficulties) to create a more stable portfolio.

Table of Contents

price and prepayment expectations-the expected yield of the mortgage-backed security under various assumptions about future economic conditions. A mortgage-backed security's ultimate yield is determined by its price and its actual prepayment levels. We generally form expectations, based on the above factors, regarding how the mortgage pool's prepayment levels will change over time, including in response to possible changes in prevailing interest rates and other economic conditions, so as to determine whether its offered price creates a yield that is attractive and fits well with the expected structure of our portfolio and our borrowing costs under those scenarios.

We generally consider these factors when evaluating an investment's relative value and the impact it would likely have on our overall portfolio. We do not assign a particular weight to any factor because the relative importance of the various factors varies, depending upon the characteristics we seek for our portfolio and our borrowing cost structure.

We do not currently originate mortgage loans or provide other types of financing to the owners of real estate and we do not service any mortgage loans. However, in the future, we may elect to originate mortgage loans or other types of financing, and we may elect to service mortgage loans and other types of financing.

Financing Strategy

We expect to finance the acquisition of our mortgage-backed securities with short-term borrowings and term loans with a term of less than one year and, to a lesser extent, equity capital. After analyzing the then-applicable interest rate yield curves, we may finance with long-term borrowings from time to time. The amount of borrowing we employ depends on, among other factors, the amount of our equity capital. We expect to use leverage to attempt to increase potential returns to our stockholders. Pursuant to our capital and leverage policy, we seek to strike a balance between the under-utilization of leverage, which reduces potential returns to our stockholders, and the over-utilization of leverage, which increases risk by reducing our ability to meet our obligations to creditors during adverse market conditions.

We expect to borrow at short-term rates using repurchase agreements. Repurchase agreements are generally short-term in nature. We intend to actively manage the adjustment periods and the selection of the interest rate indices of our borrowings against the adjustment periods and the selection of indices on our mortgage-backed securities in order to limit our liquidity and interest rate related risks. We generally seek to diversify our exposure by entering into repurchase agreements with multiple lenders. In addition, we expect to enter into repurchase agreements only with institutions we believe are financially sound and which meet credit standards approved by our board of directors.

Industry Trends

We believe fundamental changes are occurring in the U.S. mortgage market, resulting in the shifting of investment capital and mortgage-related assets out of traditional lending and savings institutions and into new forms of mortgage banking and mortgage investment firms, including those that qualify as REITs under the Internal Revenue Code. We believe that traditional mortgage investment companies, such as banks, thrifts and insurance companies, provide less attractive investment structures for investing in mortgage-related assets because of the costs associated with regulation, infrastructure and corporate level taxation. As a REIT, we can generally pass through earnings to our stockholders without incurring an entity-level federal income tax, thereby allowing us to make higher distributions than institutions with similar investments that are subject to federal income tax on their earnings. Additionally, with the development of highly competitive national mortgage markets (which we believe is partly due to the expansion of government sponsored enterprises such as Fannie Mae, Freddie Mac and Ginnie Mae), local and regional mortgage originators have lost market share to more efficient mortgage originators who compete nationally. The growth of the secondary mortgage market, including new securitization techniques, has also resulted in financing structures that can be utilized efficiently to fund leveraged mortgage portfolios and better manage interest rate risk.

The U.S. residential mortgage market has experienced considerable growth over the past 11 years, with total outstanding U.S. residential mortgage debt growing from approximately \$3.0 trillion in 1992 to approximately \$7.3 trillion as of December 31, 2003, according to the Federal Reserve. According to the same source, the total amount of U.S. residential mortgage debt securitized into mortgage-backed securities has grown from approximately \$1.4 trillion in 1992 to approximately \$4.2 trillion as of December 31, 2003, approximately \$3.4 trillion of which was agency-backed and therefore generally consistent with our investment guidelines. As of December 31, 2003, approximately \$51.3 billion of the available mortgage-backed securities were held by REITs.

S-35

Table of Contents

Competition

When we invest in mortgage-backed securities and other investment assets, we compete with a variety of institutional investors, including other REITs, insurance companies, mutual funds, hedge funds, pension funds, investment banking firms, banks and other financial institutions that invest in the same types of assets. Many of these investors have greater financial resources and access to lower costs of capital than we do. The existence of these competitive entities, as well as the possibility of additional entities forming in the future, may increase the competition for the acquisition of mortgage-backed securities, resulting in higher prices and lower yields on assets.

Website Access to our Periodic SEC Reports

The Internet address of our corporate website is *www.luminentcapital.com*. We make our periodic SEC reports (on Forms 10-K and 10-Q) and current reports (on Form 8-K), as well as the beneficial ownership reports filed by our directors, officers and 10% stockholders (on Forms 3, 4 and 5) available free of charge through our website as soon as reasonably practicable after they are filed electronically with the SEC. We may from time to time provide important disclosures to investors by posting them in the investor relations section of our website, as allowed by SEC rules. The information on our website is not a part of this Form 10-K.

Materials we file with the SEC may be read and copied at the SEC's Public Reference Room at 450 Fifth Street, N.W., Washington, D.C. 20549. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet website at *www.sec.gov* that will contain our reports, proxy and information statements, and other information regarding our company that we will file electronically with the SEC.

Employees

Our day-to-day operations are externally managed and advised by our manager, Seneca Capital Management LLC. At March 31, 2004 we had three full-time employees. We employ a full-time chief financial officer, Christopher J. Zyda, whose primary responsibilities include monitoring Seneca's performance under our Management Agreement, as well as a full-time controller and a full-time staff accountant.

We do not employ any of our officers other than Mr. Zyda. Our other executive officers are employees and/or officers of Seneca and are compensated by Seneca.

Facilities

Our principal offices are located at 909 Montgomery Street, Suite 500, San Francisco, California 94133. We utilize approximately 1,500 square feet of space provided by Seneca.

Legal Proceedings

At March 31, 2004, there were no pending legal proceedings to which we were party or to which any of our properties were subject.

Table of Contents**Summary Financial Data**

The following summary financial data are derived from audited financial statements as of April 25, 2003 (inception), June 30, 2003 and December 31, 2003 and for the period from April 26, 2003 through June 30, 2003 and for the period from April 26, 2003 through December 31, 2003, and unaudited financial statements as of September 30, 2003 (as restated), as of March 31, 2004, for the period April 26, 2003 through September 30, 2003 (as restated), for the three months ended September 30, 2003 (as restated), for the three months ended December 31, 2003 and for the three months ended March 31, 2004. The selected financial data should be read in conjunction with the more detailed information contained in the financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this prospectus supplement. See Note 10 to the financial statements in the prospectus accompanying this prospectus supplement for a discussion of the restatement of the financial information below.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion of our financial condition and results of operations should be read in conjunction with the financial statements and notes to those statements included elsewhere in this prospectus supplement and the accompanying prospectus. This discussion may contain forward-looking statements that involve risks and uncertainties. The words believe, expect, anticipate, estimate, may, will, or could and similar expressions or the negatives of these words or phrases are intended to identify forward-looking statements. As a result of many factors, such as those set forth under Risk Factors and elsewhere in this prospectus supplement and the accompanying prospectus, our actual results may differ materially from those anticipated in such forward-looking statements.

General

Luminent Mortgage Capital, Inc. is a REIT headquartered in San Francisco, California. We were incorporated in April 2003 to invest primarily in U.S. agency and other highly-rated, single-family, adjustable-rate, hybrid adjustable-rate and fixed-rate mortgage-backed securities, which we acquire in the secondary market. Substantive operations began mid-June 2003, after completing two private placements of our common stock. Our strategy is to acquire mortgage-related assets, finance these purchases in the capital markets and use leverage in order to provide an attractive return on stockholders' equity. Through this strategy, we seek to earn income, which is generated from the spread between the yield on our earning assets and our costs, including the interest cost of the funds we borrow. We have acquired and will seek to acquire additional assets that will produce competitive returns, taking into consideration the amount and nature of the anticipated returns from the investment, our ability to pledge the investment for secured, collateralized borrowings and the costs associated with financing, managing, securitizing and reserving for these investments.

Our business is affected by a variety of economic and industry factors which management considers. The most significant risk factors management considers while managing the business which could have a material effect on the financial condition and results of operations are:

interest rate mismatches between our adjustable-rate and hybrid adjustable-rate mortgage-backed securities and our borrowings used to fund our purchases of mortgage-backed securities;

increasing or decreasing levels of prepayments on the mortgages underlying our mortgage-backed securities;

the potential for increased borrowing costs related to repurchase agreements;

interest rate caps related to our adjustable-rate and hybrid adjustable-rate mortgage-backed securities;

the overall leverage of our portfolio;

our ability or inability to use derivatives to mitigate our interest rate and prepayment risks;

the impact that increases in interest rates would have on our book value;

maintaining adequate borrowing capacity so that we can purchase mortgage-related assets and reach our desired amount of leverage;

if we fail to obtain or renew sufficient funding on favorable terms or at all, we will be limited in our ability to acquire mortgage-related assets;

possible market developments could cause our lenders to require us to pledge additional assets as collateral. If our assets are insufficient to meet the collateral requirements, we might be compelled to liquidate particular assets at inopportune times and at disadvantageous prices;

competition might prevent us from acquiring mortgage-backed securities at favorable yields, which would harm our results of operations;

if we are disqualified as a REIT, we will be subject to tax as a regular corporation and face substantial tax liability; and

complying with REIT requirements might cause us to forego otherwise attractive opportunities.

S-38

Table of Contents

Management has established interest rate risk and other policies for managing the portfolio of mortgage-backed securities and the related borrowings outstanding. These policies include, without limitation, evaluating the level of risk we assume when purchasing adjustable-rate or hybrid adjustable-rate mortgage-backed securities which are subject to periodic and lifetime interest rate caps, matching the interest rates on our assets and liabilities, acquiring new mortgage-backed securities to replace prepaid securities, purchasing mortgage-backed securities that we believe to have favorable-risk adjusted expected returns relative to the market interest rates at the time of purchase, borrowing between eight and 12 times the amount of our stockholders' equity, entering into derivative transactions to protect us from rising interest rates on our repurchase agreements, and monitoring our qualification as a REIT.

Refer to the section titled "Risk Factors" for additional discussion regarding these and other risk factors which affect our business. Refer to "Interest Rate Risk" of the section titled "Quantitative and Qualitative Disclosure About Market Risk," for additional interest rate risk discussion.

Critical Accounting Policies

Our financial statements are prepared in accordance with accounting principles generally accepted in the United States of America, or GAAP. These accounting principles require us to make some complex and subjective decisions and assessments. Our most critical accounting policies involve decisions and assessments which could significantly affect our reported assets and liabilities, as well as our reported revenues and expenses. We believe that all of the decisions and assessments upon which our financial statements are based were reasonable at the time made based upon information available to us at that time. Descriptions of the significant accounting policies of the Company are included in Note 1 to financial statements in the Company's 2003 Annual Report on Form 10-K. There have been no significant changes to these policies during 2004. Management has identified our most critical accounting policies to be the following:

Classifications of Investment Securities

Our investments in mortgage-backed securities are classified as available-for-sale securities which are carried on the balance sheet at their fair value. The classification of the securities as available-for-sale results in changes in fair value being recorded as adjustments to accumulated other comprehensive loss, which is a component of stockholders' equity, rather than immediately through earnings. If available-for-sale securities were classified as trading securities, there could be substantially greater volatility in earnings from period-to-period.

Valuations of Mortgage-backed Securities

Our mortgage-backed securities have fair values as determined by management with reference to price estimates provided by independent pricing services and dealers in the securities. Because the price estimates may vary to some degree between sources, management must make certain judgments and assumptions about the appropriate price to use to calculate the fair values for financial reporting purposes. Different judgments and assumptions could result in different presentations of value.

When the fair value of an available-for-sale security is less than amortized cost, management considers whether there is an other-than-temporary impairment in the value of the security. If, in management's judgment, an other-than-temporary impairment exists, the cost basis of the security is written down to the then-current fair value, and the unrealized loss is transferred from accumulated other comprehensive loss as an immediate reduction of current earnings (as if the loss had been realized in the period of impairment). The determination of other-than-temporary impairment is a subjective process, and different judgments and assumptions could affect the timing of loss realization.

Management considers the following factors when evaluating the securities for an other-than-temporary impairment:

the length of the time and the extent to which the market value has been less than the amortized cost;

whether the security has been downgraded by a rating agency; and

our intent to hold the security for a period of time sufficient to allow for any anticipated recovery in market value.

The determination of other-than-temporary impairment is evaluated at least quarterly. If we determine an impairment to be permanent we may need to realize a loss that would have an impact on future income.

S-39

Table of Contents

Interest Income Recognition

Interest income on our mortgage-backed securities is accrued based on the actual coupon rate and the outstanding principal amount of the underlying mortgages. Premiums and discounts are amortized or accreted into interest income over the lives of the securities using the effective yield method adjusted for the effects of estimated prepayments based on Statement of Financial Accounting Standards, or SFAS, No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases*. If our estimate of prepayments is incorrect, we may be required to make an adjustment to the amortization or accretion of premiums and discounts that would have an impact on future income.

Accounting for Derivative Financial Instruments and Hedging Activities

Our policies permit us to enter into derivative contracts, including Eurodollar futures contracts and interest rate swaps, as a means of mitigating our interest rate risk on forecasted interest expense associated with the benchmark rate on forecasted rollover/reissuance of repurchase agreements or the interest rate repricing of repurchase agreements, or hedged items, for a specified future time period.

At March 31, 2004, we have engaged in short sales of Eurodollar futures contracts to mitigate our interest rate risk for the specified future time period, which is defined as the calendar quarter immediately following the contract expiration date. The value of these futures contracts is marked-to-market daily in our margin account with the custodian. Based upon the daily market value of these futures contracts, we either receive funds into, or wire funds into, our margin account with the custodian to ensure that an appropriate margin account balance is maintained at all times through the expiration of the contracts.

These contracts, or hedge instruments, have been designated as cash flow hedges and are evaluated at inception and on an ongoing basis in order to determine whether they qualify for hedge accounting under SFAS No. 133, as amended and interpreted. The hedge instrument must be highly effective in achieving offsetting changes in the hedged item attributable to the risk being hedged in order to qualify for hedge accounting. In order to determine whether the hedge instrument is highly effective, we use regression methodology to assess the effectiveness of our hedging strategies. Specifically, at the inception of each new hedge and on an ongoing basis, we assess effectiveness using ordinary least squares regression to evaluate the correlation between the rates consistent with the hedge instrument and the underlying hedged items. A hedge instrument is highly effective if the changes in the fair value of the derivative provide offset of at least 80% and not more than 120% of the changes in fair value or cash flows of the hedged item attributable to the risk being hedged. The futures contracts are carried on the balance sheet at fair value. Any ineffectiveness which arises during the hedging relationship, is recognized in interest expense during the period in which it arises. Prior to the end of the specified hedge time period the effective portion of all contract gains and losses (whether realized or unrealized) is recorded in other comprehensive income or loss. Realized gains and losses are reclassified into earnings as an adjustment to interest expense during the specified hedge time period. For REIT taxable net income purposes, realized gains and losses are reclassified into earnings immediately upon contract closeout or expiration.

We are not required to account for the futures contracts using hedge accounting as described above. If we decided not to designate the futures contracts as hedges and to monitor their effectiveness as hedges, or if we entered into other types of financial instruments that did not meet the criteria to be designated as hedges, changes in the fair values of these instruments would affect periodic earnings immediately.

Management Incentive Compensation Expense

The Management Agreement provides for the payment of incentive compensation to Seneca if our financial performance exceeds certain benchmarks. Incentive compensation is calculated on a cumulative, quarterly basis for GAAP purposes and on a stand-alone quarterly basis with an annual cumulative reconciliation calculation for incentive compensation payment purposes. During each quarter of the fiscal year, we will calculate the incentive compensation expense quarterly, on a cumulative basis, making any necessary adjustments for any expensed amounts that were recognized in previous quarters. As a result, if we experience poor quarterly performance in a particular quarter and this causes the cumulative incentive compensation expense for the current quarter to be lower than the cumulative incentive compensation for the prior quarter, we will record a negative incentive compensation expense in the current quarter. The incentive compensation is payable one-half in cash and one-half in the form of our restricted common stock.

For the first, second and third quarters of each fiscal year, incentive compensation payments actually paid to Seneca are calculated based upon the net income and relevant performance thresholds solely for the applicable quarter, and a cumulative calculation is performed at the end of the fiscal year. As a result, during the first three quarters of each fiscal year there will be differences between incentive compensation expense, for GAAP purposes, and the incentive compensation amounts actually paid to

S-40

Table of Contents

Seneca. Any differences between these amounts will be reflected on the balance sheet as a receivable due from or payable due to Seneca. In addition, when each annual cumulative incentive compensation calculation and reconciliation is performed, Seneca may be required to return cash incentive compensation payments earlier received or shares of common stock earlier granted, as applicable, to it as part of its incentive compensation payments for the first three quarters of the fiscal year.

The cash portion of the incentive compensation is accrued and expensed during the period for which it is calculated and paid. We account for the restricted stock portion of the incentive compensation in accordance with SFAS No. 123, *Accounting for Stock-based Compensation*, and related interpretations, and EITF 96-18, *Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services*.

This restricted stock portion of the incentive compensation will be paid or issued to Seneca on a quarterly basis pursuant to the terms of the Management Agreement. The number of shares issued is based on (a) one-half of the total incentive compensation for the period, divided by (b) the average of the closing prices of the common stock over the 30-day period ending three days prior to the grant date, less a fair market value discount determined by our board of directors to account for the transfer restrictions during the vesting period. During periods of lower stock prices, we will issue more restricted common stock to Seneca under the Management Agreement to pay for the same amount of incentive compensation earned in periods that had higher stock prices. Over the vesting period, any additional shares issued would have a dilutive effect on book value and net income per share.

On the date of each restricted stock payment or issuance to Seneca under the Management Agreement, the fair market value of the common stock shall be recorded in the stockholders' equity section of our balance sheet as common stock and additional paid-in capital. The corresponding portion of any restricted stock payment that is not expensed will be reflected in the stockholders' equity section of our balance sheet as deferred compensation. Each quarter's incentive compensation restricted stock payment or issuance to Seneca will be divided into three tranches. The first tranche will vest over a one-year period and be expensed over a five-quarter period, beginning in the quarter in which it was earned. The second tranche will vest over a two-year period and be expensed over a nine-quarter period beginning in the quarter in which it was earned. The third tranche will vest over a three-year period and be expensed over a thirteen-quarter period beginning in the quarter in which it was earned. As a result of this vesting schedule for the restricted stock issued to Seneca, we will incur incentive compensation expense in each of the periods following the issuance of the restricted stock over a three-year period. We will continue to incur incentive compensation expense related to each restricted stock payment, even in subsequent periods in which Seneca did not earn incentive compensation under the Management Agreement.

As the price of our common stock changes in future periods, the fair value of the unvested portions of shares paid to Seneca pursuant to the Management Agreement shall be marked-to-market, with corresponding entries on the balance sheet. The net effect of any mark-to-market adjustments to the value of the unvested portions of the restricted stock shall be expensed in future periods, on a ratable basis, according to the remaining vesting schedules of each respective tranche of restricted common stock. Accordingly, incentive compensation expense related to the portion of the incentive compensation paid to Seneca in each restricted stock payment or issuance may be higher or lower from one reporting period to the next, and may vary throughout the vesting period. For example, future incentive compensation expense related to previously issued but unvested restricted stock will be higher during periods of increasing stock prices, and lower during periods of decreasing stock prices. In addition, over the vesting period for each restricted stock payment or issuance, our stockholders' equity will increase or decrease based upon the current market price of our stock. As a result, this will have the effect of increasing or decreasing our net worth, the factor used in calculating Seneca's base management fee, and may increase or decrease the amount of base management fees in future periods.

Pursuant to the Management Agreement, it is possible for Seneca to earn incentive compensation each quarter and, as a result, receive a restricted stock payment each quarter. As Seneca is paid or issued multiple tranches of restricted common stock for incentive compensation, we will experience increasing management fee expense due to the cumulative impact of multiple tranches and vesting schedules of restricted stock payments, and the mark-to-market impact of the unvested portions of these payments. This will be true even in periods where there is little change in our income or stock price.

We also pay an incentive fee, in the form of cash and restricted stock, to our Chief Financial Officer, in accordance with the terms of his employment agreement. The incentive fee is accounted for in the same manner as the incentive fee earned by Seneca.

Financial Condition

Mortgage-Backed Securities

At December 31, 2003 and March 31, 2004, we held \$2.2 billion and \$4.1 billion of mortgage-backed securities at fair value, respectively, net of unrealized gains of \$1.1 million and unrealized losses of \$27.4 million and unrealized gains of \$13.9

Table of Contents

million and unrealized losses of \$16.6 million, respectively. As of December 31, 2003 and March 31, 2004, all of the mortgage-backed securities in our portfolio were purchased at a premium to their par value and our portfolio had a weighted-average amortized cost of 102.2% and 101.8% of face amount, respectively.

Certain of the securities held at December 31, 2003 and March 31, 2004 are impaired as the fair value of the securities is below amortized cost. At December 31, 2003 and March 31, 2004, our entire portfolio was invested in AAA-rated non-agency-backed or agency-backed mortgage-backed securities. None of the securities held had been downgraded by a credit rating agency since their purchase. In addition, we intend to hold the securities until maturity, allowing for the anticipated recovery in fair value of the securities held. As such, we do not believe any of securities held are other-than-temporarily impaired at December 31, 2003 and March 31, 2004.

The stated contractual final maturity of the mortgage loans underlying our portfolio of mortgage-backed securities ranges up to 30 years impaired at December 31, 2003 and March 31, 2004, however, the expected maturity is subject to change based on the prepayments of the underlying mortgage loans. The following table sets forth the maturity dates, by year, and percentage composition related to the assets that comprise our investment portfolio as of December 31, 2003:

Asset	Weighted-Average Final Maturity	% of Total
Adjustable-Rate Mortgage-Backed Securities	2033	8.6%
Hybrid Adjustable-Rate Mortgage-Backed Securities	2033	88.9%
Balloon Mortgage-Backed Securities	2033	2.5%
Fixed-Rate Mortgage-Backed Securities	N/A	N/A

The following table sets forth the maturity dates, by year, and percentage composition related to the assets that comprise our investment portfolio as of March 31, 2004:

Asset	Weighted-Average Final Maturity	% of Total
Adjustable-Rate Mortgage-Backed Securities	2033	4.1%
Hybrid Adjustable-Rate Mortgage-Backed Securities	2033	94.6%
Balloon Mortgage-Backed Securities	2033	1.3%
Fixed-Rate Mortgage-Backed Securities	N/A	N/A

Actual maturities of mortgage-backed securities are generally shorter than stated contractual maturities. Actual maturities of our mortgage-backed securities are affected by the contractual lives of the underlying mortgages, periodic payments of principal, and prepayments of principal.

The principal prepayment rate on our mortgage-backed securities was 23% and 20% for the quarter ended December 31, 2003 and March 31, 2004, respectively. The principal prepayment rate attempts to predict the percentage of principal that will paydown over the next 12 months based on historical principal paydowns. As interest rates have risen, the rate of refinancings has declined, which we believe may result in lower rates of prepayments and, as a result, a lower portfolio principal prepayment rate.

As of December 31, 2003 and March 31, 2004, the weighted-average effective duration of the securities in our overall investment portfolio, assuming constant prepayment rates, or CPR, to the balloon or reset date, or the CPB duration, was 1.75 years and 1.45 years, respectively. CPR is a measure of the rate of prepayment for our mortgage-backed securities, expressed as an annual rate relative to the outstanding principal balance of our mortgage-backed securities. CPB is similar to CPR except that it also assumes that the hybrid adjustable-rate mortgage-backed securities prepay in full at their next reset date. As of December 31, 2003 and March 31, 2004, the mortgages underlying our hybrid adjustable-rate mortgage-backed securities had fixed interest rates for a weighted-average of approximately 43 months, after which time the interest rates reset and become adjustable. The average length of time until maturity of those mortgages was 30 years as of December 31, 2003 and March 31, 2004. Those mortgages are also subject to interest rate caps that limit the amount that the applicable interest rate can increase during any year, known as an annual cap, and through the maturity of the applicable security, known as a lifetime cap. As of December 31, 2003 and March 31, 2004, the mortgages underlying our hybrid adjustable-rate mortgage-backed securities had average annual caps of 2.47% and average lifetime caps of 10.03% and average annual caps of 2.48% and average lifetime caps of 10.01%, respectively.

Table of Contents

The following table summarizes our mortgage-backed securities on December 31, 2003 according to their estimated weighted-average life classifications:

Weighted-Average Life	Fair Value	Amortized Cost	Weighted- Average Coupon
(in thousands)			
Less than one year	\$ 299,685	\$ 304,556	4.07%
Greater than one year and less than five years	1,829,471	1,850,899	4.09
Greater than five years	32,789	32,843	3.96
Total	\$ 2,161,945	\$ 2,188,298	4.09%

The following table summarizes our mortgage-backed securities on March 31, 2004 according to their estimated weighted-average life classifications:

Weighted-Average Life	Fair Value	Amortized Cost	Weighted- Average Coupon
(in thousands)			
Less than one year	\$ 345,832	\$ 348,251	3.61%
Greater than one year and less than five years	3,725,540	3,725,764	3.97
Greater than five years			
Total	\$ 4,071,372	\$ 4,074,015	3.96%

The weighted-average lives of the mortgage-backed securities at December 31, 2003 and March 31, 2004 in the tables above are based upon data provided through a subscription-based financial information service provided by a major investment bank, assuming constant principal prepayment rates to the balloon or reset date for each security. At December 31, 2003 and March 31, 2004, the weighted-average lives were calculated using estimated prepayment speeds or actual prepayment speed history. The weighted-average lives for some of the mortgage-backed securities included in the tables above were estimated using expected prepayment speeds for pools, since certain pools were new

issues and did not have historical performance data available. The prepayment model considers current yield, forward yield, steepness of the yield curve, current mortgage rates, mortgage rate of the outstanding loan, loan age, margin and volatility.

The actual weighted-average lives of the mortgage-backed securities in our investment portfolio could be longer or shorter than the estimates in the tables above depending on the actual prepayment rates experienced over the life of the applicable securities and is sensitive to changes in both prepayment rates and interest rates.

Equity Securities

Our investment policies allow us to acquire a limited amount of equity securities, including common and preferred shares issued by other real estate investment trusts. At December 31, 2003 and March 31, 2004, we did not hold any equity securities.

Unsettled Securities Purchases

At December 31, 2003 and March 31, 2004, we had unsettled securities purchases of \$156.1 million and \$1.1 billion, respectively. Of the unsettled securities purchases at December 31, 2003 and March 31, 2004, \$156.1 million and \$942.6 million, respectively, related to to be announced, or TBA, mortgage-backed securities.

Other Assets

We had other assets of \$10.2 million at December 31, 2003. Other assets consist primarily of interest receivable of \$7.3 million and principal receivable of \$2.3 million.

We had other assets of \$178.0 million at March 31, 2004. Other assets consist primarily of offering proceeds receivable of \$157.9 million, interest receivable of \$13.2 million, principal receivable of \$5.7 million, prepaid directors and officers liability

Table of Contents

insurance of \$548 thousand and deferred compensation of \$585 thousand. On April 2, 2004, we received the proceeds from the public offering which was completed on March 29, 2004.

Hedging Instruments

There can be no assurance that our hedging activities will have the desired beneficial impact on our results of operations or financial condition. Moreover, no hedging activity can completely insulate us from the risks associated with changes in interest rates and prepayment rates.

Hedging involves risk and typically involves costs, including transaction costs. The costs of hedging increase dramatically as the period covered by the hedging increases and during periods of rising and volatile interest rates. We may increase our hedging activity and, thus, increase our hedging costs during such periods when interest rates are volatile or rising. We generally intend to hedge as much of the interest rate risk as our manager determines is in the best interest of our stockholders, after considering the cost of such hedging transactions and our desire to maintain our status as a REIT. Our policies do not contain specific requirements as to the percentages or amount of interest rate risk that our manager is required to hedge.

At December 31, 2003 and March 31, 2004, we have engaged in short sales of Eurodollar futures contracts as a means of mitigating our interest rate risk on forecasted interest expense associated with the benchmark rate on forecasted rollover/reissuance of repurchase agreements or the interest rate repricing of repurchase agreements, or hedged item, for a specified future time period, which is defined as the calendar quarter immediately following the contract expiration date. At December 31, 2003, we sold short 2,090 Eurodollar futures contracts, which expire in March 2004, June 2004 and September 2004, with a notional amount totaling \$2.1 billion. At March 31, 2004, we sold short 9,600 Eurodollar futures contracts, which expire in June 2004, September 2004 and December 2004 with a notional amount totaling \$9.6 billion. The value of these futures contracts is marked-to-market daily in our margin account with the custodian. Based upon the daily market value of these futures contracts, we either receive funds into, or wire funds into, our margin account with the custodian to ensure that an appropriate margin account balance is maintained at all times through the expiration of the contracts. At December 31, 2003 and March 31, 2004, the unrealized loss on the Eurodollar futures contracts was \$157 thousand and \$3.4 million, respectively.

Liabilities

We have entered into repurchase agreements to finance some of our acquisitions of mortgage-backed securities. None of the counterparties to these agreements are affiliates of Seneca or us. These agreements are secured by our mortgage-backed securities and bear interest rates that have historically moved in close relationship to LIBOR. As of December 31, 2003 and March 31, 2004 we had established 17 borrowing arrangements with various investment banking firms and other lenders, 12 of which were in use on December 31, 2003 and 14 of which were in use on March 31, 2004.

At December 31, 2003, we had outstanding \$1.7 billion of repurchase agreements with a weighted-average current borrowing rate of 1.19%, \$337.3 million of which matures within 30 days, \$281.9 million of which matures between 31 and 90 days and \$1.1 billion of which matures in greater than 90 days. At December 31, 2003, the repurchase agreements were secured by mortgage-backed securities with an estimated fair value of \$1.8 billion and had a weighted-average maturity of 145 days. The net amount at risk, defined as fair value of securities sold, plus accrued interest income, minus repurchase agreement liabilities, plus accrued interest expense, with all counterparties was \$83.2 million as of December 31, 2003. After consideration of the duration on our Eurodollar futures contracts, our weighted-average maturity of our total liabilities was 255 days as of December 31, 2003.

We had \$167.9 million of other liabilities at December 31, 2003. Other liabilities consisted primarily of \$156.1 million of unsettled securities purchases, \$5.3 million of cash distribution payable, \$3.8 million of accrued interest expense on repurchase agreements, \$1.4 million of accounts payable and accrued expenses, and \$1.1 million of management fee payable, incentive fee payable and other related party liabilities.

At March 31, 2004, we had outstanding \$2.7 billion of repurchase agreements with a weighted-average current borrowing rate of 1.15%, \$119.6 million of which matures within 30 days, \$1.5 billion of which matures between 31 and 90 days and \$1.1 billion of which matures in greater than 90 days. It is our present intention to seek to renew these repurchase agreements as they mature under the then-applicable borrowing terms of the counterparties to our repurchase agreements. At March 31, 2004, the repurchase agreements were secured by mortgage-backed securities with an estimated fair value of \$2.8 billion and had a weighted-average maturity of 97 days. The net amount at risk, with all counterparties was \$148.5 million as of March 31, 2004. After consideration of the duration on our Eurodollar futures contracts, our weighted-average maturity of our total liabilities was 313 days as of March 31, 2004.

Table of Contents

We had \$1.1 billion of other liabilities at March 31, 2004. Other liabilities consisted primarily of \$1.1 billion of unsettled securities purchases, \$10.4 million of cash distribution payable, \$5.3 million of accrued interest expense on repurchase agreements, and \$2.2 million of management fee payable, incentive fee payable and other related party liabilities.

We have a margin lending facility with our primary custodian from which we may borrow money in connection with the purchase or sale of securities. The terms of the borrowings, including the rate of interest payable, are agreed to with the custodian for each amount borrowed. Borrowings are repayable immediately upon demand of the custodian. At December 31, 2003 and March 31, 2004, there were no outstanding borrowings under the margin lending facility.

Stockholders Equity

Stockholders equity at December 31, 2003 was \$282.5 million and included \$26.3 million of unrealized losses on mortgage-backed securities available-for-sale and \$157 thousand of unrealized losses on cash flow hedges presented as accumulated other comprehensive loss.

Stockholders equity at March 31, 2004 was \$460.5 million and included \$2.6 million of unrealized losses on mortgage-backed securities available-for-sale and \$3.8 million of realized and unrealized losses on cash flow hedges presented as accumulated other comprehensive loss.

Average stockholders equity for the period from June 11, 2003, commencement of operations, through December 31, 2003 was \$128.4 million. Return on average equity was 3.85% for the period from June 11, 2003, commencement of operations, through December 31, 2003. Because of the timing of our initial investment of portfolio assets (investment activities began on June 11, 2003, the first security purchase settled on June 16, 2003, and the remainder settled through July 31, 2003), interest income for the period from June 11, 2003 through December 31, 2003 was lower than would be expected for a typical full period, both in an absolute sense and also relative to the average net invested assets for the period. During the period, the U.S. bond markets also experienced dramatic price and yield volatility. Increasing interest rates caused the overall market value of our portfolio to decrease, and our leverage, defined as our total debt divided by stockholders equity, to increase beyond our desired range. In order to deleverage our portfolio we sold securities at a loss. In addition, operating expenses were high in proportion to gross interest income and expense and to net interest income as compared to expectations for full periods of operations because of the costs of start-up operations. As such, return on average equity was lower as compared to expectations for full periods of operations.

Average stockholders equity and return on average equity were \$302.5 million and 14.36%, respectively, for the quarter ended March 31, 2004.

Our book value at December 31, 2003 was as follows:

	Total Stockholders' Equity	Book Value per Share (1)
	(in thousands)	
Total stockholders equity (GAAP)	\$ 282,496	\$ 11.38
<i>Addback</i>	26,353	1.07

Accumulated other comprehensive loss on
mortgage-backed securities

Total stockholders' equity, excluding accumulated other
comprehensive loss on mortgage-backed securities
(NON-GAAP)

	_____	_____
	\$ 308,849	\$ 12.45
	_____	_____

(1) Based on 24,814,000 shares outstanding on December 31, 2003

S-45

Table of Contents

Our book value at March 31, 2004 was as follows:

	Total Stockholders' Equity	Book Value per Share (1)
	<u>(in thousands)</u>	
Total stockholders equity (GAAP)	\$ 460,543	\$ 12.50
<i>Addback</i>		
Accumulated other comprehensive loss on mortgage-backed securities	2,643	0.07
	<u> </u>	<u> </u>
Total stockholders equity, excluding accumulated other comprehensive loss on mortgage-backed securities (NON-GAAP)	\$ 463,186	\$ 12.57
	<u> </u>	<u> </u>

(1) Based on 36,841,146 shares outstanding on March 31, 2004

Management believes that total stockholders equity excluding accumulated other comprehensive loss on mortgage-backed securities is a useful measure to investors because book value unadjusted for temporary declines in the fair values of securities more closely represents the cost basis of our invested assets, net of our leverage, which is the basis for our net interest income and our distributions to stockholders under the provisions of the Internal Revenue Code governing REIT distributions.

Results of Operations

For the period from April 26, 2003 through December 31, 2003

For the period from April 26, 2003 through December 31, 2003, net income was \$2.8 million or \$0.27 per weighted-average share (basic and diluted). For the same period, interest income, net of premium amortization, was approximately \$22.6 million, and was primarily earned from investments in mortgage-backed securities. Interest expense on short-term borrowings was \$9.0 million. Because of the timing of our initial investment of portfolio assets (investment activities began on June 11, 2003), interest income for the period from April 26, 2003 through December 31, 2003 was substantially lower than would be expected for a typical full period, both in an absolute sense and also relative to the average net invested assets for the period. In addition, prepayment activity declined due to the changing interest rate environment and resulted in decreased premium amortization and increased yield on average earning assets.

For the quarter ended December 31, 2003, the weighted-average yield on average earning assets, net of amortization of premium was 2.81% and the weighted-average interest rate on our repurchase agreement liabilities was 1.20% resulting in a net interest margin of 1.61%. Our net interest margin improved during the course of the fourth quarter. For the period from April 26, 2003 through December 31, 2003, net interest margin and its components are not meaningful due to the timing of our initial investments and related borrowings.

Included in net income for the period from April 26, 2003 through December 31, 2003 are net losses on sales of mortgage-backed securities of \$7.8 million which occurred during the quarter ended September 30, 2003. Between June 30, 2003 and mid-August 2003, the U.S. bond markets experienced dramatic price and yield volatility. Increasing interest rates caused the overall market value of our portfolio to decrease and our leverage (defined as our total debt divided by stockholders' equity) to increase beyond management's desired range. To reduce leverage, we sold securities in mid-August totaling \$130.7 million and realized a loss of \$2.3 million. In an attempt to protect our portfolio from further increases in interest rates, we sold short \$200 million of TBA mortgage securities. Interest rates subsequently declined, and we closed out this short position in the month of September for a total realized loss of \$5.7 million. During the third quarter, we also simultaneously sold and purchased securities totaling \$215.9 million and \$215.7 million, respectively, that resulted in a realized gain on sale of \$0.2 million. We did not sell any mortgage-backed securities during the period from April 26 through June 30, 2003 or during the quarter ended December 31, 2003, therefore, there were no gains or losses on sales of securities for these periods. Although we generally intend to hold our investment securities to maturity, Seneca may determine at some time before they mature that it is in our interest to sell them and purchase securities with other characteristics. In that event, our earnings will be affected by realized gains or losses.

Operating expenses for the period from April 26, 2003 through December 31, 2003 were \$3.1 million. Operating expenses were high in proportion to gross interest income and expense and to net interest income as compared to expectations for full periods of operations because of the costs of start-up operations.

Base management fees to Seneca under the Management Agreement, which were \$901 thousand for the period from April 26, 2003 through December 31, 2003, are based on a percentage of our average net worth. Average net worth for these purposes

Table of Contents

is calculated on a monthly basis and equals the difference between the aggregate book value of our consolidated assets prior to accumulated depreciation and other non-cash items, including the fair market value adjustment on mortgage-backed securities, minus the aggregate book value of our consolidated liabilities.

Incentive fee expense to related parties for the period from April 26, 2003 through December 31, 2003 was \$980 thousand. Incentive compensation is earned by related parties when REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) relative to the average net invested assets for the period, as defined in the Management Agreement, exceeds the threshold return taxable income that would have produced an annualized return on equity equal to the sum of the 10-year U.S. Treasury rate plus 2.0% for the same period. REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) for the period from April 26, 2003 through December 31, 2003 was \$11.7 million and was greater than the threshold return taxable income of \$5.6 million for the same period. Incentive compensation earned by Seneca during the period from April 26, 2003 through December 31, 2003 was \$1.2 million, of which \$613 thousand was waived by Seneca for the quarter ended September 30, 2003.

For the quarter ended December 31, 2003, total incentive compensation expense to Seneca was \$606 thousand, one-half payable in cash and one-half payable in the form of the Company's common stock as described above. The cash portion of the incentive fee of \$303 thousand for the quarter ended December 31, 2003 was expensed in that period as well as 15.2% of the restricted stock portion of the incentive fees, or \$46 thousand. The remaining incentive fee for the quarter ended December 31, 2003 of \$30 thousand was earned by the Company's Chief Financial Officer, in accordance with the terms of his employment agreement. This portion of the incentive fee is also payable one-half in cash and one-half in the form of a restricted stock award under the Company's 2003 Stock Incentive Plan. The shares are payable and vest over the same vesting schedule as the stock issued to Seneca. The cash portion of the incentive fee of \$15 thousand for the quarter ended December 31, 2003 was expensed in that period as well as 15.2% of the restricted stock portion of the incentive fees, or \$3 thousand.

We did not pay incentive compensation to Seneca for the quarter ended September 30, 2003 or the period from April 26, 2003 to June 30, 2003. The incentive compensation expense earned by Seneca for the quarter ended September 30, 2003 of \$613 thousand was waived by Seneca on a one-time basis only due to the net loss we reported during that same period. The waived incentive fee was accounted for as incentive fee expense and a capital contribution as of September 30, 2003. We do not expect Seneca to waive incentive compensation in the future. REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) for the period from April 26, 2003 through June 30, 2003, was \$298 and was less than the threshold return taxable income of \$426 and, therefore, no incentive fee was earned by Seneca or paid by us. No incentive compensation was earned or paid to the Chief Financial Officer for the period from April 26, 2003 to September 30, 2003.

Professional services expense for the period from April 26, 2003 through December 31, 2003 of \$477 thousand includes both legal and accounting services provided to us. We experienced relatively higher levels of professional service expenses during our stabilization period as a public company. Included in this balance are organization costs of \$163 thousand, and costs related to the filing of our resale shelf registration statement totaling \$44 thousand. The insurance expense for the same period of \$291 thousand represents amortization of prepaid directors' and officers' insurance. Custody expense of \$115 thousand for the period from April 26, 2003 through December 31, 2003 includes the services provided by our primary custodian. These expenses may vary based on levels of activity within the portfolio. Included in the other general and administrative expenses of \$73 thousand for the period from April 26, 2003 through December 31, 2003 are costs related to the filing of our resale shelf registration statement totaling \$27 thousand.

Table of Contents

REIT taxable net income is calculated according to the requirements of the Internal Revenue Code, rather than GAAP. The following table reconciles GAAP net income to REIT taxable net income for the period from April 26, 2003 through December 31, 2003 (in thousands):

GAAP net income	\$ 2,761
Adjustments to GAAP net income:	
Addback of organizational costs expensed during the period	163
Amortization of organizational costs for tax purposes	(18)
Addback of net capital losses in the period	7,831
Addback waived incentive fee for the quarter ended September 30, 2003	613
Addback of stock compensation expense for incentive fee	48
Addback of stock compensation expense for unvested options	3
	<hr/>
Net adjustments to GAAP net income	8,640
	<hr/>
REIT taxable net income	\$ 11,401
	<hr/> <hr/>

We believe that the presentation of our REIT taxable net income is useful to investors because it is directly related to the distributions we are required to make in order to retain our REIT status and to the calculations of the incentive compensation payable to related parties (before deducting incentive compensation, net operating losses and certain other items). There are limitations associated with REIT taxable net income. For example, this measure does not reflect net capital losses during the period and, thus, by itself is an incomplete measure of our financial performance over any period. As a result, our REIT taxable net income should be considered in addition to, and not as a substitute for, our GAAP-based net income as a measure of our financial performance.

For the quarter ended March 31, 2004

For the quarter ended March 31, 2004, net income was \$10.8 million or \$0.43 per weighted-average share outstanding (basic and diluted). For the same period, interest income, net of premium amortization, was approximately \$20.2 million, and was primarily earned from investments in mortgage-backed securities. Interest expense on short-term borrowings was \$6.8 million. On March 29, 2004, we completed a public offering of 12,000,000 shares of common stock. Because of the timing of this offering, interest income for the quarter ended March 31, 2004 does not reflect the impact of this offering. In addition, prepayment activity declined due to the changing interest rate environment and resulted in decreased premium amortization and increased yield on average earning assets.

For the quarter ended March 31, 2004, the weighted-average yield on average earning assets, net of amortization of premium was 3.20% and the weighted-average interest rate on our repurchase agreement liabilities was 1.20% resulting in a net interest spread of 2.00%, 39 basis points higher than our net interest spread for the fourth quarter of 2003.

Operating expenses for the quarter ended March 31, 2004 were \$2.6 million.

Base management fees to Seneca under the Management Agreement, which were \$787 thousand for the quarter ended March 31, 2004, are based on a percentage of our average net worth. Average net worth for these purposes is

calculated on a monthly basis and equals the difference between the aggregate book value of our consolidated assets prior to accumulated depreciation and other non-cash items, including the fair market value adjustment on mortgage-backed securities, minus the aggregate book value of our consolidated liabilities.

Incentive fee expense to related parties for the quarter ended March 31, 2004 was \$846 thousand. Incentive compensation is earned by related parties when REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) relative to the average net invested assets for the period, as defined in the Management Agreement, exceeds the threshold return taxable income that would have produced an annualized return on equity equal to the sum of the 10-year U.S. Treasury rate plus 2.0% for the same period. REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) for the quarter ended March 31, 2004 was \$11.2 million and was greater than the threshold return taxable income of \$4.7 million for the same period.

For the quarter ended March 31, 2004, total incentive compensation earned by Seneca was \$1.3 million, one-half payable in cash and one-half payable in the form of the Company's common stock as described above. The cash portion of the incentive fee of \$652 thousand for the quarter ended March 31, 2004 was expensed in that period as well as 15.2% of the restricted stock portion of the incentive fees, or \$99 thousand. In accordance with the terms of his employment agreement, the Company's Chief Financial

Table of Contents

Officer earned an incentive fee for the quarter ended March 31, 2004 of \$65 thousand. This portion of the incentive fee is also payable one-half in cash and one-half in the form of a restricted stock award under the Company's 2003 Stock Incentive Plan. The shares are payable and vest over the same vesting schedule as the stock issued to Seneca. The cash portion of the incentive fee of \$33 thousand for the quarter ended March 31, 2004 was expensed in that period as well as 15.2% of the restricted stock portion of the incentive fees, or \$5 thousand. The remaining incentive fee for the quarter ended March 31, 2004 consists primarily of the change in fair value of unvested restricted stock awards.

Professional services expense for the quarter ended March 31, 2004 of \$417 thousand includes legal, accounting and other professional services provided to us. Included in this balance are costs related to the filing of our resale shelf registration statement totaling \$111 thousand. The insurance expense for the same period of \$220 thousand represents amortization of prepaid directors' and officers' insurance. Custody expense of \$67 thousand for the quarter ended March 31, 2004 includes the services provided by our primary custodian. These expenses may vary based on levels of activity within the portfolio. Included in the other general and administrative expenses of \$88 thousand for the quarter ended March 31, 2004 are printing costs related to the filing of our resale shelf registration statement totaling \$18 thousand.

REIT taxable net income is calculated according to the requirements of the Internal Revenue Code, rather than GAAP. The following table reconciles GAAP net income to REIT taxable net income for the quarter ended March 31, 2004 (in thousands):

GAAP net income	\$ 10,800
Adjustments to GAAP net income:	
Amortization of organizational costs	(8)
Addback of stock compensation expense for unvested options	2
Addback of stock compensation expense for unvested restricted stock	161
Addback of hedge ineffectiveness expense	10
Subtract dividend equivalent rights on restricted stock	(12)
Subtract realized losses on Eurodollar futures contracts	(412)
	<hr/>
Net adjustments to GAAP net income	(259)
	<hr/>
REIT taxable net income	\$ 10,541
	<hr/> <hr/>

We believe that the presentation of our REIT taxable net income is useful to investors because it is directly related to the distributions we are required to make in order to retain our REIT status and to the calculations of the incentive compensation payable to related parties (before deducting incentive compensation, net operating losses and certain other items). There are limitations associated with REIT taxable net income. For example, this measure does not reflect net capital losses during the period and, thus, by itself is an incomplete measure of our financial performance over any period. As a result, our REIT taxable net income should be considered in addition to, and not as a substitute for, our GAAP-based net income as a measure of our financial performance.

Contractual Obligations and Commitments

As of March 31, 2004, we had entered into a management agreement with Seneca. See Note 6 to the financial statements as of and for the quarter ended March 31, 2004 for significant terms of the management agreement.

Off-Balance Sheet Arrangements

Since inception, we have not maintained any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. Further, we have not guaranteed any obligations of unconsolidated entities nor do we have any commitment or intent to provide additional funding to any such entities. Accordingly, we are not materially exposed to any market, credit, liquidity or financing risk that could arise if we had engaged in such relationships.

Liquidity and Capital Resources

Our primary source of funds as of March 31, 2004 consisted of repurchase agreements totaling \$2.7 billion with a weighted-average current borrowing rate of 1.15% which we used to finance acquisition of mortgage-related assets. We expect to continue to borrow funds in the form of repurchase agreements. As of March 31, 2004 we had established 17 borrowing arrangements with various investment banking firms and other lenders, 14 of which were in use on March 31, 2004. Increases in

Table of Contents

short-term interest rates could negatively impact the valuation of our mortgage-related assets, which could limit our borrowing ability or cause our lenders to initiate margin calls. Amounts due upon maturity of our repurchase agreements will be funded primarily through the rollover/reissuance of repurchase agreements and monthly principal and interest payments received on our mortgage-backed securities. We generally seek to borrow between eight and 12 times the amount of our equity. Our leverage ratio, defined as total repurchase agreements divided by total stockholders' equity, at March 31, 2004 was 5.9. At March 31, 2004, net proceeds of \$157.9 million were receivable from the underwriter of our public offering which was completed on March 29, 2004. The net proceeds were received on April 2, 2004. At March 31, 2004, we had not fully levered our portfolio to within our target range of eight to 12 times the amount of our equity. As a result, the total amount of mortgage-backed securities and repurchase agreement liabilities as of March 31, 2004 were lower than they will be once our portfolio is fully levered through additional repurchase agreement liabilities and related mortgage-backed security purchases.

We have a margin lending facility with our primary custodian from which we may borrow money in connection with the purchase or sale of securities. The terms of the borrowings, including the rate of interest payable, are agreed to with the custodian for each amount borrowed. Borrowings are repayable immediately upon demand of the custodian. At March 31, 2004, there were no outstanding borrowings under the margin lending facility.

For liquidity, we also rely on the cash flow from operations, primarily monthly principal and interest payments to be received on our mortgage-backed securities, as well as any primary securities offerings authorized by our board of directors.

On November 17, 2003, we paid a cash distribution of \$0.50 per share to our stockholders of record on October 21, 2003. On January 28, 2004, we paid a cash distribution of \$0.45 per share to our stockholders of record on December 11, 2003. On April 26, 2004, we paid a cash distribution of \$0.42 per share to our stockholders of record on March 19, 2004. These distributions are taxable dividends, and neither of these distributions are considered return of capital. These distributions were funded with cash flow from our ongoing operations, including principal and interest payments received on our mortgage-backed securities. We did not distribute \$282 thousand of our REIT taxable net income for the period from April 26, 2003 through December 31, 2003. We intend to declare a spillback distribution in this amount during 2004.

We believe that equity capital, combined with the cash flow from operations and the utilization of borrowings, will be sufficient to enable us to meet anticipated liquidity requirements. However, an increase in prepayment rates substantially above our expectations could cause a liquidity shortfall. If our cash resources are at any time insufficient to satisfy our liquidity requirements, we may be required to liquidate mortgage-backed securities or sell debt or additional equity securities. If required, the sale of mortgage-backed securities at prices lower than the carrying value of such assets would result in losses and reduced income.

We intend to increase our capital resources by making additional offerings of equity and debt securities, possibly including classes of preferred stock, common stock, commercial paper, medium-term notes, collateralized mortgage obligations and senior or subordinated notes. Such financing will depend on market conditions for capital raises and for the investment of any proceeds. All debt securities, other borrowings, and classes of preferred stock will be senior to the common stock in a liquidation of our Company.

Inflation

Virtually all of our assets and liabilities are financial in nature. As a result, interest rates and other factors influence our performance far more so than does inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates. Our financial statements are prepared in accordance with accounting principles generally accepted in the United States and our distributions are determined by our board of directors based

primarily by our net income as calculated for tax purposes; in each case, our activities and balance sheet are measured with reference to historical cost and or fair market value without considering inflation.

S-50

Table of Contents

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our primary component of market risk is interest rate risk, as described below. While we do not seek to avoid risk completely, we do seek to assume risk that can be quantified from historical experience, to actively manage that risk, to earn sufficient compensation to justify taking those risks and to maintain capital levels consistent with the risks we undertake.

Interest Rate Risk

We are subject to interest rate risk in connection with our investments in fixed-rate, adjustable-rate and hybrid adjustable-rate mortgage-backed securities and our related debt obligations, which are generally repurchase agreements of limited duration that are periodically refinanced at current market rates, and our derivative contracts.

Effect on Net Interest Income

We fund our investments in some long-term, fixed-rate and hybrid adjustable-rate mortgage-backed securities with short-term borrowings under repurchase agreements. During periods of rising interest rates, the borrowing costs associated with those fixed-rate and hybrid-adjustable rate mortgage-backed securities tend to increase while the income earned on such fixed-rate and hybrid adjustable-rate mortgage-backed securities (during the fixed-rate component of such securities) may remain substantially unchanged. This results in a narrowing of the net interest spread between the related assets and borrowings and may even result in losses.

As a means to mitigate the negative impact of a rising interest rate environment, we have entered into derivative transactions, specifically Eurodollar futures contracts. Hedging techniques are based, in part, on assumed levels of prepayments of our fixed-rate and hybrid adjustable-rate mortgage-backed securities. If prepayments are slower or faster than assumed, the life of the mortgage-backed securities will be longer or shorter which would reduce the effectiveness of any hedging strategies we may utilize and may result in losses on such transactions. Hedging strategies involving the use of derivative securities are highly complex and may produce volatile returns. Our hedging activity will also be limited by the asset and sources-of-income requirements applicable to us as a REIT.

Extension Risk

We invest in fixed-rate and hybrid adjustable-rate mortgage-backed securities. Hybrid adjustable-rate mortgage-backed securities have interest rates that are fixed for the first few years of the loan typically three, five, seven or 10 years and thereafter their interest rates reset periodically on the same basis as adjustable-rate mortgage-backed securities. As of March 31, 2004, 94.6% of our investment portfolio was comprised of hybrid adjustable-rate mortgage-backed securities. We compute the projected weighted-average life of our fixed-rate and hybrid adjustable-rate mortgage-backed securities based on the market's assumptions regarding the rate at which the borrowers will prepay the underlying mortgages. In general, when a fixed-rate or hybrid adjustable-rate mortgage-backed security is acquired with borrowings, we may, but are not required to, enter into an interest rate swap agreement or other hedging instrument that effectively fixes our borrowing costs for a period close to the anticipated average life of the fixed-rate portion of the related mortgage-backed security. This strategy is designed to protect us from rising interest rates because the borrowing costs are fixed for the duration of the fixed-rate portion of the related mortgage-backed security. However, if prepayment rates decrease in a rising interest rate environment, the life of the fixed-rate portion of the related mortgage-backed security could extend beyond the term of the swap agreement or other hedging instrument. This situation could negatively impact us as borrowing costs would no longer be fixed after the end of the hedging instrument while the income earned on the fixed-rate or hybrid adjustable-rate mortgage-backed security would remain fixed. This situation may also cause the market value of our fixed-rate and hybrid adjustable-rate mortgage-backed securities to decline with little or no offsetting gain from the related hedging

transactions. In extreme situations, we may be forced to sell assets and incur losses to maintain adequate liquidity.

Adjustable-Rate and Hybrid Adjustable-Rate Mortgage-Backed Security Interest Rate Cap Risk

We also invest in adjustable-rate and hybrid adjustable-rate mortgage-backed securities which are based on mortgages that are typically subject to periodic and lifetime interest rate caps and floors, which limit the amount by which an adjustable-rate or hybrid adjustable-rate mortgage-backed security's interest yield may change during any given period. However, our borrowing costs pursuant to our repurchase agreements will not be subject to similar restrictions. Therefore, in a period of increasing interest rates, interest rate costs on our borrowings could increase without limitation by caps, while the interest-rate yields on our adjustable-rate and hybrid adjustable-rate mortgage-backed securities would effectively be limited by caps. This problem will be magnified to the extent we acquire adjustable-rate and hybrid adjustable-rate mortgage-backed securities that are not based on mortgages which are fully-indexed. In addition, the underlying mortgages may be subject to periodic payment caps that result in some portion of the interest being deferred and added to the principal outstanding. This could result in our receipt of less cash income on our adjustable-rate and hybrid adjustable-rate mortgage-backed securities than we need in order to pay the interest cost

Table of Contents

on our related borrowings. These factors could lower our net interest income or cause a net loss during periods of rising interest rates, which would negatively impact our financial condition, cash flows and results of operations.

Interest Rate Mismatch Risk

We intend to fund a substantial portion of our acquisitions of adjustable-rate and hybrid adjustable-rate mortgage-backed securities with borrowings that have interest rates based on indices and repricing terms similar to, but of somewhat shorter maturities than, the interest rate indices and repricing terms of the mortgage-backed securities. Thus, we anticipate that in most cases the interest rate indices and repricing terms of our mortgage assets and our funding sources will not be identical, thereby creating an interest rate mismatch between assets and liabilities. Therefore, our cost of funds would likely rise or fall more quickly than would our earnings rate on assets. During periods of changing interest rates, such interest rate mismatches could negatively impact our financial condition, cash flows and results of operations. To mitigate interest rate mismatches, we may utilize hedging strategies discussed above.

Our analysis of risks is based on management's experience, estimates, models and assumptions. These analyses rely on models which utilize estimates of fair value and interest rate sensitivity. Actual economic conditions or implementation of investment decisions by our management may produce results that differ significantly from the estimates and assumptions used in our models and the projected results shown in this report.

Prepayment Risk

Prepayments are the full or partial repayment of principal prior to the original term to maturity of a mortgage loan and typically occur due to refinancing of mortgage loans. Prepayment rates for existing mortgage-backed securities generally increase when prevailing interest rates fall below the market rate existing when the underlying mortgages were originated. In addition, prepayment rates on adjustable-rate and hybrid adjustable-rate mortgage-backed securities generally increase when the difference between long-term and short-term interest rates declines or becomes negative. Prepayments of mortgage-backed securities could harm our results of operations in several ways. Some adjustable-rate mortgages underlying our adjustable-rate mortgage-backed securities may bear initial teaser interest rates that are lower than their fully-indexed rates, which refers to the applicable index rates plus a margin. In the event that such an adjustable-rate mortgage is prepaid prior to or soon after the time of adjustment to a fully-indexed rate, the holder of the related mortgage-backed security would have held such security while it was less profitable and lost the opportunity to receive interest at the fully-indexed rate over the expected life of the adjustable-rate mortgage-backed security. Although we currently do not own any adjustable-rate mortgage-backed securities with teaser rates, we may obtain some in the future which would expose us to this prepayment risk. Additionally, we currently own mortgage-backed securities that were purchased at a premium. The prepayment of such mortgage-backed securities at a rate faster than anticipated would result in a write-off of any remaining capitalized premium amount and a consequent reduction of our net interest income by such amount. Finally, in the event that we are unable to acquire new mortgage-backed securities to replace the prepaid mortgage-backed securities, our financial condition, cash flow and results of operations could be negatively impacted.

Effect on Fair Value

Another component of interest rate risk is the effect changes in interest rates will have on the market value of our assets. We face the risk that the market value of our assets will increase or decrease at different rates than that of our liabilities, including our hedging instruments.

We primarily assess our interest rate risk by estimating the duration of our assets and the duration of our liabilities. Duration essentially measures the market price volatility of financial instruments as interest rates change.

We generally calculate duration using various financial models and empirical data. Different models and methodologies can produce different duration numbers for the same securities.

S-52

Table of Contents

The following sensitivity analysis table shows the estimated impact on the fair value of our interest rate-sensitive investments and repurchase agreement liabilities, at March 31, 2004, assuming rates instantaneously fall 100 basis points, rise 100 basis points and rise 200 basis points:

	Interest Rates Fall 100 Basis Points	Unchanged	Interest Rates Rise 100 Basis Points	Interest Rates Rise 200 Basis Points
(in millions)				
Adjustable-Rate Mortgage-Backed Securities				
Fair value	\$ 166.4	\$ 166.3	\$ 165.8	\$ 165.4
Change in fair value	\$ 0.1		\$ (0.5)	\$ (0.9)
Change as a percent of fair value	0.1%		(0.3)%	(0.5)%
Hybrid Adjustable-Rate Mortgage-Backed Securities				
Fair value	\$ 3,892.8	\$ 3,850.0	\$ 3,784.2	\$ 3,712.3
Change in fair value	\$ 42.8		\$ (65.8)	\$ (137.7)
Change as a percent of fair value	1.1%		(1.7)%	(3.6)%
Balloon Mortgage-Backed Securities				
Fair value	\$ 56.3	\$ 55.1	\$ 52.6	\$ 53.2
Change in fair value	\$ 1.2		\$ (1.5)	\$ (1.9)
Change as a percent of fair value	2.2%		(2.7)%	(3.4)%
Total Mortgage-Backed Securities				
Fair value	\$ 4,115.5	\$ 4,071.4	\$ 4,003.6	\$ 3,930.9
Change in fair value	\$ 44.1		\$ (67.8)	\$ (140.5)
Change as a percent of fair value	1.1%		(1.7)%	(3.5)%
Repurchase Agreements (1)				
Fair value	\$ 2,695.8	\$ 2,695.8	\$ 2,695.8	\$ 2,695.8
Change in fair value				
Change as a percent of fair value				
Hedge Instruments				
Fair value	\$ (27.4)	\$ (3.4)	\$ 20.6	\$ 44.6
Change in fair value	\$ (24.0)		\$ 24.0	\$ 48.0
Change as a percent of fair value	n/m		n/m	n/m

(1) The fair value of the repurchase agreements would not change materially due to the short-term nature of these instruments.

n/m = not meaningful

It is important to note that the impact of changing interest rates on fair value can change significantly when interest rates change beyond 100 basis points from current levels. Therefore, the volatility in the fair value of our assets could increase significantly when interest rates change beyond 100 basis points. In addition, other factors impact the fair value of our interest rate-sensitive investments and hedging instruments, such as the shape of the yield curve, market expectations as to future interest rate changes and other market conditions. Accordingly, in the event of changes in actual interest rates, the change in the fair value of our assets would likely differ from that shown above, and such difference might be material and adverse to our stockholders.

S-53

Table of Contents

Risk Management

To the extent consistent with maintaining our REIT status, we seek to manage our interest rate risk exposure to protect our portfolio of mortgage-backed securities and related debt against the effects of major interest rate changes. We generally seek to manage our interest rate risk by:

monitoring and adjusting, if necessary, the reset index and interest rate related to our mortgage-backed securities and our borrowings;

attempting to structure our borrowing agreements to have a range of different maturities, terms, amortizations and interest rate adjustment periods;

using derivatives, financial futures, swaps, options, caps, floors and forward sales, to adjust the interest rate sensitivity of our mortgage-backed securities and our borrowings; and

actively managing, on an aggregate basis, the interest rate indices, interest rate adjustment periods, and gross reset margins of our mortgage-backed securities and the interest rate indices and adjustment periods of our borrowings.

S-54

Table of Contents**SELLING STOCKHOLDERS**

The selling stockholders may from time to time offer and sell pursuant to this prospectus supplement any or all of the shares of our common stock. When we refer to the selling stockholders in this prospectus supplement or the accompanying prospectus, we mean those persons listed in the table below, as well as the permitted transferees, pledgees, donees, assignees, successors and others who later come to hold any of the selling stockholders' interests other than through a public sale.

The table below sets forth the name of each selling stockholder and the number of shares of our common stock that each selling stockholder may offer pursuant to this prospectus supplement. Except as noted below, none of the selling stockholders has, or within the past three years has had, any material relationship with us or any of our predecessors or affiliates.

Based on the information provided to us by the selling stockholders, assuming that the selling stockholders sell all of the shares of our common stock beneficially owned by them that have been registered by us and do not acquire any additional shares of stock during the offering, each selling stockholders will not own any shares of our common stock other than the shares of common stock appearing in the column entitled Beneficial ownership after resale offering. We cannot advise you as to whether the selling stockholders will in fact sell any or all of such shares of our common stock. In addition, the selling stockholders may have sold, transferred or otherwise disposed of, or may sell, transfer or otherwise dispose of, at any time and from time to time, the shares of common stock in transactions exempt from the registration requirements of the Securities Act after the date on which they provided the information set forth on the table below.

Selling stockholder	Beneficial ownership prior to resale offering		Shares offered pursuant to this prospectus (maximum number that may be sold)	Beneficial ownership after resale offering (2)

* Less than one percent (1%).

- (1) Beneficial ownership prior to resale offering includes (a) private placement shares acquired by the listed selling stockholder and not subsequently disposed of (through February 6, 2004) and (b) initial public offering shares allocated to the listed selling stockholder by the underwriters of our IPO.
- (2) Assumes that each named selling stockholder sells all of the shares of our common stock it holds that are covered by this prospectus supplement and neither acquires nor disposes of any other shares, or right to purchase other shares, of our common stock subsequent to the date as of which we obtained information regarding its holdings. Because the selling stockholders are not obligated to sell all or any portion of the shares of our common stock shown as offered by them, we cannot estimate the actual number of shares (or actual percentage of the class) of our common stock that will be held by any selling stockholder upon completion of the offering.
- (3) Calculated based on Rule 13d-3(d)(i) of the Exchange Act, using 24,841,146 shares of our common stock

outstanding as of February 6, 2004 and does not include the 12,000,000 shares of common stock we issued in March 2004. In calculating this amount for each holder, we treated as outstanding the number of shares of our common stock issuable upon conversion of any options to purchase common stock held by the selling stockholder; however, we did not assume exercise of any other holder's options.

- (4) This selling stockholder identified itself to us as an affiliate of a broker-dealer and represented to us that (a) the shares of common stock shown above as being offered by such selling stockholder were purchased by such selling stockholder in the ordinary course of business, and (b) at the time of such purchase, such selling stockholder had no arrangements or understandings, directly or indirectly, with any person to distribute such shares of common stock.
- (5) Mr. Goldstein is a member of our board of directors.
- (6) Mr. McMahan is a member of our board of directors.
- (7) Mr. Miller is a member of our board of directors.
- (8) Ms. Seneca is our chief executive officer and chairperson of our board of directors.
- (9) Mr. Whitters is a member of our board of directors.
- (10) This selling stockholder identified itself as a registered broker-dealer and, accordingly, this selling stockholder is an underwriter.
- (11) This selling stockholder had a material relationship with us during the past three years; it was the initial purchaser of the Rule 144A and Regulation S shares in our private placement, the placement agent for the Regulation D shares and was an underwriter of our initial public offering.

LEGAL MATTERS

Certain legal matters will be passed upon for us by our counsel, O Melveny & Myers LLP, San Francisco, California. The validity of the shares of our common stock to be sold in this offering and certain other matters of Maryland law will be passed upon for us by Ballard Spahr Andrews & Ingersoll LLP, Baltimore, Maryland. O Melveny & Myers LLP may rely on Ballard Spahr Andrews & Ingersoll LLP as to matters of Maryland law. Peter T. Healy, Esq., a partner of O Melveny & Myers LLP, is our corporate secretary.

EXPERTS

The financial statements as of April 25, 2003 (inception), June 30, 2003 and December 31, 2003 and for the period from April 26, 2003 through June 30, 2003 and for the period from April 26, 2003 through December 31, 2003 included in this prospectus have been audited by Deloitte & Touche LLP, independent auditors, as stated in their report appearing herein, and are included in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

WHERE YOU CAN FIND MORE INFORMATION ABOUT LUMINENT MORTGAGE CAPITAL

We have filed with the SEC a registration statement on Form S-11, including exhibits and schedules under the Securities Act with respect to the shares of our common stock to be sold in this offering. Neither this prospectus supplement nor the accompanying prospectus contains all of the information set forth in the registration statement and its exhibits and schedules. For further information with respect to our company and the common shares to be sold in this offering, reference is made to the registration statement, including the exhibits and schedules to the registration statement. Statements contained in this prospectus supplement and the accompanying prospectus as to the contents of any contract or other document referred to in this prospectus supplement and the accompanying prospectus are not necessarily complete and, where that contract is an exhibit to the registration statement, each statement is qualified in all respects by reference to the exhibit to which the reference relates. Copies of the registration statement, including the exhibits and schedules to the registration statement, may be examined without charge at the public reference room of the SEC, 450 Fifth Street, N.W. Room 1024, Washington, DC 20549. Information about the operation of the public reference room may be obtained by calling the SEC at 1-800-SEC-0300. Copies of all or a portion of the registration statement can be obtained from the public reference room of the Securities and Exchange Commission upon payment of prescribed fees. Our SEC filings, including our registration statement, are also available to you for free on the SEC's website at www.sec.gov.

We are subject to the information and reporting requirements of the Exchange Act, and pursuant thereto we file periodic reports, proxy statements and other reports with the SEC. We also intend to distribute annual reports to our stockholders containing audited financial information.

INDEPENDENT AUDITORS REPORT

To the Board of Directors and Stockholders of
Luminent Mortgage Capital, Inc.:

We have audited the accompanying balance sheet of Luminent Mortgage Capital, Inc. (the Company) as of December 31, 2003, and the related statements of operations, stockholders equity and cash flows for the period from April 26, 2003 (inception) to December 31, 2003. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of Luminent Mortgage Capital, Inc. as of December 31, 2003, and the results of its operations and its cash flows for the period from April 26, 2003 (inception) to December 31, 2003 in conformity with accounting principles generally accepted in the United States of America.

Table of Contents

LUMINENT MORTGAGE CAPITAL, INC.

NOTES TO FINANCIAL STATEMENTS

NOTE 1 ORGANIZATION

Luminent Mortgage Capital, Inc., or the Company, was organized as a Maryland corporation on April 25, 2003. The Company commenced its operations of purchasing and holding an investment portfolio of mortgage-backed securities on June 11, 2003, upon completion of a private placement offering. On December 18, 2003, the Company completed the initial public offering of its shares of common stock and began trading on the New York Stock Exchange under the trading symbol LUM on December 19, 2003.

Seneca Capital Management LLC, or the Manager, pursuant to a management agreement, or the Management Agreement, manages the Company and its investment portfolio. See Note 7 for further discussion on the Management Agreement.

The Company intends to elect to be taxed as a Real Estate Investment Trust, or REIT, and to comply with the provisions of the Internal Revenue Code, or the Code, with respect thereto. See Note 2 for further discussion on income taxes.

NOTE 2 ACCOUNTING POLICIES

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and highly liquid investments with maturities of three months or less at the time of purchase. The carrying amount of cash equivalents approximates their fair value. The Company's primary bank account is a sweep account with the custodian bank.

Securities

The Company invests primarily in U.S. agency and other highly-rated, single-family, adjustable-rate, hybrid adjustable-rate and fixed-rate mortgage-backed securities issued in the United States market.

The Company classifies its investments as either trading, available-for-sale or held-to-maturity securities. Management determines the appropriate classification of the securities at the time they are acquired and evaluates the appropriateness of such classifications at each balance sheet date. The Company currently classifies all of its securities as available-for-sale. All assets that are classified as available-for-sale are carried at fair value and unrealized gains or losses are included in accumulated other comprehensive loss as a component of stockholders' equity. The fair values of mortgage-backed securities are determined by management based upon price estimates provided by independent pricing services and securities dealers. In the event that a security becomes impaired (e.g., if the fair value falls below the amortized cost basis and recovery is not expected before the security is sold), the cost of the security would be written down and the difference would be reflected in current earnings. The determination of other-than-temporary impairment is evaluated at least quarterly.

Interest income is accrued based upon the outstanding principal amount of the securities and their contractual terms. Premiums and discounts are amortized or accreted into interest income over the lives of the securities using the effective yield method adjusted for the effects of estimated prepayments based on Statement of Financial Accounting Standards, or SFAS, No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases*.

Security transactions are recorded on the trade date. Realized gains and losses from security transactions are determined based upon the specific identification method.

S-69

Table of Contents

LUMINENT MORTGAGE CAPITAL, INC.

NOTES TO FINANCIAL STATEMENTS (Continued)

Derivative Financial Instruments

The Company may enter into derivative contracts, including futures contracts and interest rate swaps, as a means of mitigating the Company's interest rate risk on forecasted interest expense associated with the benchmark rate on forecasted rollover/reissuance of repurchase agreements, or hedged items, for a specified future time period. The Company has designated these transactions as cash flow hedges. The contracts, or hedge instruments, are evaluated at inception and on an on-going basis in order to determine whether they qualify for hedge accounting under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted. The hedge instrument must be highly effective in achieving offsetting changes in the hedged item attributable to the risk being hedged in order to qualify for hedge accounting. Derivative contracts are carried on the balance sheet at fair value. Any ineffectiveness which arises during the hedging relationship, is recognized in interest expense during the period in which it arises. Prior to the end of the specified hedge time period the effective portion of all contract gains and losses (whether realized or unrealized) is recorded in other comprehensive income or loss. Realized gains and losses are reclassified into earnings as an adjustment to interest expense during the specified hedge time period.

Repurchase Agreements

The Company finances the acquisition of its securities primarily through the use of repurchase agreements. Repurchase agreements are treated as collateralized financing transactions and are carried at their contractual amounts, including accrued interest, as specified in the respective agreements. Accrued interest on repurchase agreements is recorded as a separate line item on the balance sheet.

Income Taxes

The Company intends to elect to be taxed as a REIT and to comply with the provisions of the Code with respect thereto. Accordingly, the Company is not subject to Federal or state income tax to the extent that its distributions to stockholders satisfy the REIT requirements and certain asset, income and stock ownership tests are met.

Distributions declared per share were \$0.95 for the period from April 26, 2003 through December 31, 2003. All distributions were classified as ordinary income to stockholders for income tax purposes.

Stock Compensation

As of December 31, 2003, the Company had 55,000 outstanding stock options, and intends to issue stock options in the future. Such options may be issued to Company employees and directors, and to employees of the Manager. The Company accounts for stock options issued to its own employees and directors using the fair value based methodology prescribed by SFAS No. 123, *Accounting for Stock-Based Compensation*. Stock options issued to employees of the Manager will be recognized as expense over the vesting period based on their fair value.

Incentive Compensation

The Company has a Management Agreement that provides for the payment of an incentive fee to the Manager if the Company's financial performance exceeds certain benchmarks. See Note 7 for further discussion on the specific terms of the computation and payment of the incentive fee.

The cash portion of the incentive fee is accrued and expensed during the period for which it is calculated and earned. The Company accounts for the restricted stock portion of the incentive fee in accordance with SFAS No. 123, and related interpretations, and Emerging Issues Task Force, or EITF, 96-18, *Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services*.

S-70

Table of Contents

LUMINENT MORTGAGE CAPITAL, INC.

NOTES TO FINANCIAL STATEMENTS (Continued)

In accordance with the consensus on Issue 1 in EITF 96-18, the measurement date of the shares issued for incentive compensation is the date when the Manager's performance is complete. Since continuing service is required in order for the restrictions on issued shares to lapse and for ownership to vest, for each one-third tranche (based on varying restriction/vesting periods) of shares issued for a given period, performance is considered to be complete when the restriction period for that tranche ends and ownership vests. The period over which the stock is earned by the Manager (i.e., the period during which services are provided before the stock vests) is both the period during which the incentive compensation was initially calculated and the vesting period for each tranche issued. Therefore, expense for the stock portion of incentive fees issued for a given period is spread over five quarters for the first tranche (shares vesting one year after issuance), nine quarters for the second tranche (shares vesting two years after issuance), and 13 quarters for the third tranche. In accordance with the consensus on Issue 2 in EITF 96-18, the fair value of the shares issued is recognized in the same manner as if the Company had paid cash to the Manager for its services. When the shares are issued, they are recorded at the then-current fair value in stockholders' equity, with an offsetting entry to deferred compensation (a contra-equity account). The deferred compensation account is reduced and expense is recognized quarterly up to the measurement date, as discussed above. In accordance with the consensus in Issue 3 of EITF 96-18, fair value is adjusted quarterly for unvested shares, and changes in such fair value each quarter are reflected in the expense recognized in that quarter and in future quarters. By the end of the quarter in which performance is complete (i.e., the measurement date), the deferred compensation account is reduced to zero and there are no further adjustments to equity for changes in fair value of the shares.

The Company also pays an incentive fee, in the form of cash and restricted stock, to the Company's Chief Financial Officer, in accordance with the terms of his employment agreement. The incentive fee is accounted for in the same manner as the incentive fee earned by the Manager.

Net Income Per Share

The Company calculates basic earnings per share by dividing net income for the period by weighted-average shares of its common stock outstanding for that period. Diluted earnings per share takes into account the effect of dilutive instruments, such as stock options, but uses the average share price for the period in determining the number of incremental shares that are to be added to the weighted-average number of shares outstanding.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Estimates affecting the accompanying financial statements include the fair values of mortgage-backed securities and the prepayment speeds used to calculate amortization and accretion of premiums and discounts on mortgage-backed securities.

Concentrations of Credit Risk and Other Risks and Uncertainties

The Company's investments are concentrated in securities that pass through collections of principal and interest from underlying mortgages, and there is a risk that some borrowers on the underlying mortgages will default. Therefore, mortgage-backed securities may bear some exposure to credit losses. However, the Company mitigates

credit risk by holding securities that are either guaranteed by government or government-sponsored agencies or have credit ratings of AAA or higher. As of December 31, 2003, 63% of the Company's mortgage-backed securities portfolio, as measured by its fair value, was agency-guaranteed.

The Company bears certain other risks typical in investing in a portfolio of mortgage-backed securities. Principal risks potentially affecting the Company's financial position, results of operations and cash flows include the risks that: (a) interest rate changes can negatively affect the market value of the Company's mortgage-backed securities, (b) interest rate changes can influence decisions made by borrowers on the mortgages underlying the securities to prepay those mortgages, which can negatively affect both cash flows from, and the market value of, the securities, and (c) adverse changes in the market value of the Company's

Table of Contents

LUMINENT MORTGAGE CAPITAL, INC.

NOTES TO FINANCIAL STATEMENTS (Continued)

mortgage-backed securities and/or the inability of the Company to renew short-term borrowings can result in the need to sell securities at inopportune times and incur realized losses.

Recent Accounting Pronouncements

As of December 31, 2003, the Company has adopted early all relevant accounting standards that have been issued by authoritative bodies in the United States and for which adoption is not yet required. Therefore, the Company does not anticipate that comparability of its financial statements for future periods to the financial statements for the historical periods presented herein will be affected by any recently-issued accounting pronouncements.

In April 2003, the Financial Accounting Standards Board, or FASB, issued SFAS No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. This Statement amends and clarifies financial accounting and reporting for derivative instruments, including certain derivative instruments embedded in other contracts and for hedging activities under SFAS No. 133. The changes in this Statement improve financial reporting by requiring that contracts with comparable characteristics be accounted for similarly. SFAS No. 149 was effective for contracts entered into or modified after June 30, 2003, except as stated below, and for hedging relationships designated after June 30, 2003. All provisions of SFAS No. 149 should be applied prospectively, except for as prescribed by the Statement. In addition, the provisions of SFAS No. 149 that relate to forward purchases or sales of when-issued securities or other securities that do not yet exist should be applied to both existing contracts and new contracts entered into after June 30, 2003. Adoption of this Statement did not have a material impact on the Company's financial position or results of operations.

In May 2003, the FASB issued SFAS No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*. The Statement establishes standards for how the Company should classify and measure certain financial instruments with characteristics of both liabilities and equity. SFAS No. 150 is effective for financial instruments entered into or modified after May 31, 2003, and was otherwise generally effective at the beginning of the first interim period beginning after June 15, 2003. Adoption of this Statement did not have a material impact on the Company's financial position or results of operations.

In December 2003, the FASB issued Interpretation, or FIN 46R, *Consolidation of Variable Interest Entities*. The purpose of this interpretation is to provide guidance on how to identify a variable interest entity, or VIE, and determine when the assets, liabilities, noncontrolling interests, and results of operations of a VIE need to be included in a company's consolidated financial statements. A company that holds variable interests in an entity will need to consolidate that entity if the company's interest in the VIE is such that the company will absorb a majority of the VIE's expected losses and/or receive a majority of the VIE's expected residual returns. New disclosure requirements are also prescribed by FIN 46R. Adoption of this Statement did not have a material impact on the Company's financial position or results of operations.

Table of Contents**LUMINENT MORTGAGE CAPITAL, INC.****NOTES TO FINANCIAL STATEMENTS (Continued)****NOTE 3 MORTGAGE-BACKED SECURITIES**

The following table summarizes the Company's mortgage-backed securities classified as available-for-sale as of December 31, 2003, which are carried at fair value:

(in thousands)	Adjustable- Rate Securities	Hybrid Adjustable-Rate Securities	Balloon Maturity Securities	Total Mortgage- Backed Securities
Amortized cost	\$ 187,769	\$ 1,944,707	\$ 55,822	\$ 2,188,298
Unrealized gains	7	1,061		1,068
Unrealized losses	(2,463)	(23,828)	(1,130)	(27,421)
Fair value	<u>\$ 185,313</u>	<u>\$ 1,921,940</u>	<u>\$ 54,692</u>	<u>\$ 2,161,945</u>
% of total	8.6%	88.9%	2.5%	100.0%

Actual maturities of mortgage-backed securities are generally shorter than stated contractual maturities. Actual maturities of the Company's mortgage-backed securities are affected by the contractual lives of the underlying mortgages, periodic payments of principal, and prepayments of principal. The following table summarizes the Company's mortgage-backed securities on December 31, 2003 according to their estimated weighted-average life classifications:

Weighted-Average Life	Fair Value	Amortized Cost	Weighted- Average Coupon
(in thousands)			
Less than one year	\$ 299,685	\$ 304,556	4.07%
Greater than one year and less than five years	1,829,471	1,850,899	4.09
Greater than five years	32,789	32,843	3.96

Total	<u>\$ 2,161,945</u>	<u>\$ 2,188,298</u>	4.09%
-------	---------------------	---------------------	-------

The weighted-average lives of the mortgage-backed securities at December 31, 2003 in the table above are based upon data provided through subscription-based financial information services, assuming constant principal prepayment rates to the balloon or reset date for each security. The prepayment model considers current yield, forward yield, steepness of the yield curve, current mortgage rates, mortgage rate of the outstanding loan, loan age, margin and volatility.

The actual weighted-average lives of the mortgage-backed securities in the Company's investment portfolio could be longer or shorter than the estimates in the table above depending on the actual prepayment rates experienced over the lives of the applicable securities and are sensitive to changes in both prepayment rates and interest rates.

During the period from April 26, 2003 through December 31, 2003, the Company sold securities totaling \$130.7 million and realized a loss of \$2.3 million. The Company also sold short \$200 million of to be announced mortgage securities. The Company closed out this short position for a total realized loss of \$5.7 million. The Company also simultaneously sold and purchased securities totaling \$215.9 million and \$215.7 million, respectively, that resulted in a realized gain on sale of \$0.2 million.

At December 31, 2003, unsettled security purchases totaled \$156.1 million. These purchases settled in January 2004.

Table of Contents**LUMINENT MORTGAGE CAPITAL, INC.****NOTES TO FINANCIAL STATEMENTS (Continued)**

The following table shows the Company's investments' fair value and gross unrealized losses, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at December 31, 2003:

(in thousands)	Less than 12 Months		12 Months or More		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
Agency-backed mortgage-backed securities	\$ 1,109,858	\$ (17,261)	\$	\$	\$ 1,109,858	\$ (17,261)
Non-agency-backed mortgage-backed securities	644,448	(10,160)			644,448	(10,160)
Total temporarily impaired securities	\$ 1,754,306	\$ (27,421)	\$	\$	\$ 1,754,306	\$ (27,421)

At December 31, 2003, the Company was only invested in AAA-rated non-agency-backed or agency-backed mortgage-backed securities. The temporary impairment of the available-for-sale securities results from the fair value of the securities falling below the amortized cost basis. As of December 31, 2003, none of the securities held had been downgraded by a credit rating agency since their purchase. Management intends to hold the securities until maturity, allowing for the anticipated recovery in fair value of the securities held. As such, management does not believe any of securities held are other-than-temporarily impaired at December 31, 2003.

NOTE 4 REPURCHASE AGREEMENTS AND OTHER BORROWINGS

The Company has entered into repurchase agreements with third party financial institutions to finance most of its mortgage-backed securities. The repurchase agreements are short-term borrowings that bear interest rates that have historically moved in close relationship to the three-month London Interbank Offered Rate, or LIBOR. At December 31, 2003, the Company had an outstanding amount of \$1.7 billion with weighted-average borrowing rates of 1.19%. At December 31, 2003 securities pledged as collateral for repurchase agreements had estimated fair values of \$1.8 billion.

Table of Contents**LUMINENT MORTGAGE CAPITAL, INC.****NOTES TO FINANCIAL STATEMENTS (Continued)**

At December 31, 2003, the repurchase agreements had remaining maturities as summarized below:

(in thousands)	Overnight (1 day or less)	Between 2 and 30 days	Between 31 and 90 days	Greater than 90 days	Total
Agency-backed mortgage-backed securities:					
Amortized cost of securities sold, including accrued interest	\$	\$ 14,299	\$ 302,538	\$ 1,010,586	\$ 1,327,423
Fair market value of securities sold, including accrued interest		14,065	302,272	994,545	1,310,882
Repurchase agreement liabilities associated with these securities		12,865	281,870	952,532	1,247,267
Average interest rate of repurchase agreement liabilities	0.00%	1.20%	1.11%	1.19%	1.17%
Non-agency-backed mortgage-backed securities:					
Amortized cost of securities sold, including accrued interest	\$ 18,475	\$ 329,592	\$	\$ 165,608	\$ 513,675
Fair market value of securities sold, including accrued interest	18,431	324,769		161,881	505,081
Repurchase agreement liabilities associated with these securities	17,490	306,911		157,305	481,706
Average interest rate of repurchase agreement liabilities	1.20%	1.21%	0.00%	1.29%	1.23%
Total:					
Amortized cost of securities sold, including accrued interest	\$ 18,475	\$ 343,891	\$ 302,538	\$ 1,176,194	\$ 1,841,098
Fair market value of securities sold, including accrued interest	18,431	338,834	302,272	1,156,426	1,815,963
Repurchase agreement liabilities associated with these securities	17,490	319,776	281,870	1,109,837	1,728,973
Average interest rate of repurchase agreement liabilities	1.20%	1.21%	1.11%	1.20%	1.19%

At December 31, 2003, the repurchase agreements had the following counterparties, amounts at risk and weighted-average remaining maturities:

Repurchase Agreement Counterparties	Amount at Risk ⁽¹⁾	Weighted-Average Maturity of Repurchase Agreements
-------------------------------------	----------------------------------	---

	(in thousands)	(in days)
Bear Stearns & Co.	\$ 8,423	138
Banc of America Securities LLC	9,762	26
Countrywide Securities Corporation	2,358	23
Credit Suisse First Boston LLC	14,350	130
Deutsche Bank Securities Inc.	2,350	146
Federal Home Loan Mortgage Corporation	(279)	61
Goldman Sachs & Co.	(390)	58
J.P. Morgan Securities Inc.	1,649	177
Merrill Lynch Government Securities Inc./Merrill Lynch Pierce, Fenner & Smith Inc.	6,352	189
Morgan Stanley & Co. Inc.	972	61
Salomon Smith Barney	20,287	163
UBS Securities LLC	17,379	189
	<hr/>	
Total	\$ 83,213	145
	<hr/>	

(1) Equal to the fair value of securities sold, plus accrued interest income, minus repurchase agreement liabilities, plus accrued interest expense.

The Company had a note payable of \$92 thousand at December 31, 2003 for the purpose of financing its annual directors and officers insurance premium at an interest rate of 6.5%.

Table of Contents**LUMINENT MORTGAGE CAPITAL, INC.****NOTES TO FINANCIAL STATEMENTS (Continued)**

The Company has a margin lending facility with its primary custodian where it may borrow money in connection with the purchase or sale of securities. The terms of the borrowings, including the rate of interest payable, are agreed to with the custodian for each amount borrowed. Borrowings are repayable immediately upon demand of the custodian. At December 31, 2003, there were no outstanding borrowings under the margin lending facility.

NOTE 5 CAPITAL STOCK AND EARNINGS PER SHARE

The Company had 100,000,000 shares of par value \$0.001 common stock authorized and 24,814,000 shares outstanding as of December 31, 2003. The Company had 10,000,000 shares of par value \$0.001 preferred stock authorized and none outstanding as of December 31, 2003.

In two closings on June 11 and June 19, 2003, the Company completed a private offering of 11,092,473 shares of common stock, \$0.001 par value at an offering price of \$15.00 per share, including the exercise by the initial purchaser/placement agent of its over-allotment option to purchase 1,500,000 shares of common stock. In addition, on June 11, 2003 the Company issued 407,527 shares of common stock, par value \$0.001, at an offering price net of the initial purchaser's discount of \$13.95 per share, to employees and affiliates of the Manager, and other persons selected by the Manager. The Company received proceeds from these transactions in the amount of \$159.7 million, net of underwriting discount and other offering costs.

On December 18, 2003, the Company completed an initial public offering of 13,110,000 shares common stock, \$0.001 par value at an offering price of \$13.00 per share, including the exercise by the underwriter of its over-allotment option to purchase 1,710,000 shares of common stock. The Company received proceeds from the initial public offering in the amount of \$157.0 million, net of underwriting discount and other offering costs.

The Company filed a resale shelf registration statement with the SEC with respect to up to 11,500,000 shares of its common stock issued in the June 11, 2003 and June 19, 2003 private offerings. The registration statement was declared effective by the SEC on February 13, 2004.

The following table presents a reconciliation of basic and diluted earnings per share for the period from April 26, 2003 through December 31, 2003:

	Basic	Diluted
	<hr/>	<hr/>
Net income (in thousands)	\$ 2,761	\$ 2,761
Weighted-average number of common shares outstanding	10,139,280	10,139,280
Additional shares due to:		
Assumed conversion of dilutive stock options		531
	<hr/>	<hr/>
Adjusted weighted-average number of common shares outstanding	10,139,280	10,139,811
	<hr/>	<hr/>

Net income per share	\$ 0.27	\$ 0.27
	<u> </u>	<u> </u>

NOTE 6 2003 STOCK INCENTIVE PLANS

The Company adopted a 2003 Stock Incentive Plan, effective June 4, 2003, and a 2003 Outside Advisors Stock Incentive Plan, effective June 4, 2003, pursuant to which up to 1,000,000 shares of the Company’s common stock is authorized to be awarded at the discretion of the Compensation Committee of the Board of Directors. The plans provide for the grant of a variety of long-term incentive awards to employees and officers of the Company, individual consultants or advisors who render or have rendered bona fide services, and officers, employees or directors of the Manager as an additional means to attract, motivate, retain and reward eligible persons. These plans provide for the grant of awards that meet the requirements of Section 422 of the Code, non-qualified stock options, stock appreciation rights, restricted stock, stock units and other stock-based awards, and dividend equivalent rights. The maximum term of each grant is determined on the grant date by the Compensation Committee and shall not

Table of Contents**LUMINENT MORTGAGE CAPITAL, INC.****NOTES TO FINANCIAL STATEMENTS (Continued)**

exceed 10 years. The exercise price and the vesting requirement of each grant is determined on the grant date by the Compensation Committee.

The following table illustrates the stock options available for grant as of December 31, 2003:

	2003 Stock Incentive Plan	2003 Outside Advisors Stock Incentive Plan	Total
Shares reserved for issuance	n/a ⁽¹⁾	n/a ⁽¹⁾	1,000,000 ⁽¹⁾
Granted	55,000		55,000
Forfeited			
Expired			
Total available for grant	n/a⁽²⁾	n/a⁽²⁾	945,000⁽²⁾

(1) At June 4, 2003, adoption date of both stock incentive plans, the maximum number of shares of common stock that may be delivered pursuant to awards granted under these combined plans is 1,000,000 shares.

(2) At December 31, 2003, the maximum number of shares of common stock that may be delivered pursuant to awards granted under these combined plans is 945,000 shares.

At December 31, 2003, the Company had outstanding options under the plans with expiration dates of 2013, as illustrated in the following table:

	Number of Options	Weighted- Average Exercise Price
Outstanding at April 26, 2003		
Granted	55,000	\$ 14.82
Exercised		
Forfeited		
Outstanding at December 31, 2003	55,000	\$ 14.82

The following table illustrates information about stock options outstanding at December 31, 2003:

Range of Exercise Prices	Outstanding			Exercisable	
	Number of Options	Weighted-Average Remaining Life (in years)	Weighted-Average Exercise Price	Number of Options	Weighted-Average Exercise Price
\$13.00-\$14.00	5,000	9.8	\$13.00	—	—
\$14.01-\$15.00	50,000	9.6	\$15.00	—	—
\$13.00-\$15.00	55,000			—	—

The weighted-average grant-date fair value of options granted during the period April 26, 2003 through December 31, 2003 was \$11 thousand.

The fair value of the options granted was estimated on the date of the grant using the Black-Scholes option-pricing model with the following weighted-average assumptions: risk-free rate of 4.3 percent; dividend yield of 13.2 percent; expected life of 10 years; and volatility of 21.0 percent.

Table of Contents

LUMINENT MORTGAGE CAPITAL, INC.

NOTES TO FINANCIAL STATEMENTS (Continued)

Total stock-based employee compensation expense for the period from April 26, 2003 through December 31, 2003 was \$3 thousand.

NOTE 7 THE MANAGEMENT AGREEMENT

The Company has entered into a Management Agreement with the Manager that provides, among other things, that the Company will pay to the Manager, in exchange for investment management and certain administrative services, certain fees and reimbursements, summarized as follows:

a base management fee equal to a percentage of average net worth during each fiscal year as defined in the Management Agreement (1% of the first \$300 million plus 0.8% of the amount in excess of \$300 million);

incentive compensation based on the excess of a tiered percentage (as defined in the Management Agreement as the weighted-average of the following rates based upon average net invested assets: (1) 20% for the first \$400 million of average net invested assets; and (2) 10% for the average net invested assets in excess of \$400 million) of the difference between the Company's net income (defined in the Management Agreement as taxable income before incentive compensation, net operating losses from prior periods, and items permitted by the Internal Revenue Code when calculating taxable income for a REIT) and the threshold return (the amount of net income for the period that would produce an annualized return on equity, calculated by dividing the net income, as defined in the Management Agreement, by the average net invested assets, as defined in the Management Agreement, equal to the 10-year U.S. Treasury rate for the period plus 2.0%) for the fiscal period; and

out-of-pocket expenses and certain other costs incurred by the Manager and related directly to the Company.

The base management fee and incentive compensation will be paid quarterly and are subject to adjustment at the end of each fiscal year based on annual results. One-half of the incentive compensation will be paid to the Manager in cash and one-half will be paid in the form of a restricted stock award under the Company's 2003 Outside Advisors Stock Incentive Plan. The number of shares issued is based on (a) one-half of the total incentive compensation for the period, divided by (b) the average of the closing prices of the common stock over the 30 day period ending three days prior to the grant date, less a fair market value discount determined by the Company's Board of Directors. These shares are restricted shares for varying periods of time, and are forfeitable if the Manager ceases to perform management services for the Company before the end of the restriction periods. The Company's restrictions lapse and full rights of ownership vest for one-third of the shares on the first anniversary of the end of the period in which the incentive compensation is calculated, for one-third of the shares on the second anniversary and for the last one-third of the shares on the third anniversary. Vesting is predicated on the continuing involvement of the Manager in providing services to the Company.

From and after June 11, 2004, the Company is entitled to terminate the Management Agreement without cause provided that the Company gives the Manager 60 days prior written notice and pays a termination fee and other unpaid costs and expenses reimbursable to the Manager. If the Company terminates the Management Agreement without cause, the Company is required to pay the Manager a termination fee as follows:

If the Company terminates the Management Agreement without cause in connection with a decision to manage its portfolio internally, rather than by an external manager, the amount of the termination fee shall be equal to the amount of the highest annual base fee and the highest annual incentive compensation, for a particular year, earned

by the Manager during any of the three years (or on an annualized basis if a lesser period) preceding the effective date of the termination, plus accelerated vesting on the equity component of all incentive compensation.

S-78

Table of Contents

LUMINENT MORTGAGE CAPITAL, INC.

NOTES TO FINANCIAL STATEMENTS (Continued)

If the Company terminates the Management Agreement without cause for any other reason, the amount of the termination fee shall be equal to two times the amount of the highest annual base fee and the highest annual incentive compensation, for a particular year, earned by the Manager during any of the three years (or on an annualized basis if a lesser period) preceding the effective date of the termination, plus all deferred payments, including accelerated vesting on the equity component of all incentive compensation.

The Company is also entitled to terminate the Management Agreement with cause, in which case the Company is only obligated to reimburse unpaid costs and expenses.

The Management Agreement contains certain provisions requiring the Company to indemnify the Manager for costs (e.g., legal costs) the Manager could potentially incur in fulfilling its duties prescribed in the agreement or in other agreements related to the Company's activities. The indemnification provisions do not apply under all circumstances (e.g., if the Manager is grossly negligent, acted with reckless disregard or engaged in willful misconduct or active fraud). The provisions contain no limitation on maximum future payments. The Company has evaluated the impact of these guarantees on its financial statements and determined that it is immaterial.

The base management fee for the period from April 26, 2003 through December 31, 2003 was \$901 thousand.

Incentive compensation is earned by the Manager when REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) relative to the average net invested assets for the period, as defined in the Management Agreement, exceeds the threshold return taxable income that would have produced an annualized return on equity equal to the sum of the 10-year U.S. Treasury rate plus 2.0% for the same period. REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) for the period from April 26, 2003 through December 31, 2003 was \$11.7 million and was greater than the threshold return taxable income of \$5.6 million for the same period. Incentive compensation earned by the Manager during the period from April 26, 2003 through December 31, 2003 was \$1.2 million, of which \$613 thousand was waived by the Manager for the quarter ended September 30, 2003. Incentive compensation is paid by the Company one-half in cash and one-half in restricted stock.

Because of the timing of the Company's initial investment of portfolio assets (investment activities began on June 11, 2003, the first security purchase settled on June 16, 2003, and \$407.8 million of securities had yet to settle as of June 30, 2003), interest income for the period from April 26, 2003 through June 30, 2003 was substantially lower than would be expected for a typical full period, both in an absolute sense and also relative to the average net invested assets for the period. However, for incentive compensation purposes the calculation for threshold return net income is based on average net invested assets for the period with no adjustments made to account for such timing differences. As a result, REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items), for the period from April 26, 2003 through June 30, 2003, was \$298 thousand and was less than the threshold return net income of \$426 thousand and, therefore, no incentive fee was earned by the Manager or paid by the Company for that period.

The Company did not pay incentive compensation to the Manager for the quarter ended September 30, 2003. Although the Manager was entitled to receive incentive compensation under the Management Agreement for the quarter ended September 30, 2003, because of the net loss reported by the Company for the period, the Manager voluntarily waived, on a one-time basis, its right to incentive compensation for the period due to the net loss reported during that same period. Since the Manager waived its right to its incentive compensation for the period ended September 30, 2003, the waived incentive fee of \$613 thousand was expensed and accounted for as a capital

contribution as of September 30, 2003.

For the quarter ended December 31, 2003, total incentive fees for the Manager were \$606 thousand, one-half payable in cash and one-half payable in the form of the Company's common stock as described above. The cash portion of the incentive fee of \$303 thousand for the quarter ended December 31, 2003 was expensed in that period. In accordance with SFAS No. 123, and related interpretations, and EITF 96-18, 15.2% of the restricted stock portion of the incentive fees, or \$46 thousand, was expensed in the quarter ended December 31, 2003. Included in other assets at December 31, 2003 is \$257 thousand of deferred compensation which will be reclassified to stockholders' equity after the restricted stock is issued and will be expensed over the three-year vesting period of the restricted stock.

S-79

Table of Contents

LUMINENT MORTGAGE CAPITAL, INC.

NOTES TO FINANCIAL STATEMENTS (Continued)

The remaining incentive fee for the quarter ended December 31, 2003 of \$30 thousand was earned by the Company's Chief Financial Officer, in accordance with the terms of his employment agreement. This portion of the incentive fee is also payable one-half in cash and one-half in the form of a restricted stock award under the Company's 2003 Stock Incentive Plan. The shares are payable and vest over the same vesting schedule as the stock issued to the Manager. The cash portion of the incentive fee of \$15 thousand for the quarter ended December 31, 2003 was expensed in that period. In accordance with SFAS No. 123, and related interpretations, and EITF 96-18, 15.2% of the restricted stock portion of the incentive fees, or \$2 thousand, was expensed in the quarter ended December 31, 2003. Included in other assets at December 31, 2003 is \$13 thousand of deferred compensation which will be reclassified to stockholders' equity after the restricted stock is issued and will be expensed over the three-year vesting period of the restricted stock. No incentive compensation was earned or paid to the Chief Financial Officer for the period from April 26, 2003 to September 30, 2003.

NOTE 8 RELATED PARTY TRANSACTIONS

At December 31, 2003, the Company was indebted to the Manager for base management fees of \$418 thousand, incentive fees of \$606 thousand and reimbursement of expenses of \$16 thousand. At December 31, 2003, the Company was indebted to the Company's Chief Financial Officer for incentive fees of \$30 thousand and to officers and employees of the Company for expense reimbursement of \$18 thousand. These amounts are included in management fee payable, incentive fee payable and other related party liabilities.

The Manager's financial relationship with the Company is governed by the Management Agreement. Under the Management Agreement, the Manager shall be responsible for all expenses of the personnel employed by the Manager, and all facilities and overhead expenses of the Manager required for the day to day operations of the Company, and the expenses of a sub-manager, if any. The Company shall reimburse the Manager for its pro-rata portion of facilities and overhead expenses to the extent that the Company's employees (who are not also employed by the Manager) use such facilities or incur such expenses pursuant to a cost-sharing agreement entered into between the Company and the Manager. As of December 31, 2003, there were no expenses payable to the Manager pursuant to the cost-sharing agreement. During the period April 26, 2003 through December 31, 2003, the Company paid the Manager \$6 thousand pursuant to the cost-sharing agreement. The Company shall pay all other expenses on behalf of the Company, and shall reimburse the Manager for all direct expenses incurred on the Company's behalf that are not the Manager's specific responsibility as defined in the Management Agreement.

NOTE 9 FAIR VALUE OF FINANCIAL INSTRUMENTS

SFAS No. 107, *Disclosure About Fair Value of Financial Instruments*, requires disclosure of the fair value of financial instruments for which it is practicable to estimate that value. The fair value of mortgage-backed securities available-for-sale and futures contracts is equal to their carrying value presented in the balance sheet. The fair value of cash and cash equivalents, interest receivable, repurchase agreements, unsettled security purchases, note payable, and accrued interest expense, approximates cost as of December 31, 2003 due to the short-term nature of these instruments.

Table of Contents**LUMINENT MORTGAGE CAPITAL, INC.****NOTES TO FINANCIAL STATEMENTS (Continued)****NOTE 10 ACCUMULATED OTHER COMPREHENSIVE LOSS**

The following is a summary of the components of accumulated other comprehensive loss as of December 31, 2003:

(in thousands)	Net Unrealized Losses on Mortgage-backed Securities Available-for-Sale	Net Unrealized Losses on Cash Flow Hedges	Accumulated Other Comprehensive Loss
Beginning Balance	\$	\$	\$
Change during the period	(26,353)	(157)	(26,510)
Ending Balance	\$ (26,353)	\$ (157)	\$ (26,510)

NOTE 11 INTEREST RATE RISK

The Company's primary component of market risk is interest rate risk. The Company is subject to interest rate risk in connection with its investments in fixed-rate, adjustable-rate and hybrid adjustable-rate mortgage-backed securities, its related debt obligations, which are generally repurchase agreements of limited duration that are periodically refinanced at current market rates, and its derivative contracts. At December 31, 2003, 88.9% of the Company's securities portfolio were hybrid adjustable-rate mortgage-backed securities, 8.6% of the Company's securities were adjustable-rate mortgage-backed securities and there were no fixed-rate mortgage-backed securities.

The Company's strategy includes funding its investments in long-term, fixed-rate and hybrid adjustable-rate mortgage-backed securities with short-term borrowings under repurchase agreements. During periods of rising interest rates, the borrowing costs associated with those fixed-rate and hybrid-adjustable rate mortgage-backed securities tend to increase while the income earned on such fixed-rate and hybrid adjustable-rate mortgage-backed securities (during the fixed-rate component of such securities) may remain substantially unchanged. This results in a narrowing of the net interest spread between the related assets and borrowings and may even result in losses.

Among other strategies, the Company may use Eurodollar futures contracts and interest rate swaps to manage interest rate risk and prepayment risk. The effectiveness of any derivative transactions will depend significantly upon whether the Company correctly quantifies the interest rate or prepayment risks being hedged, execution of and ongoing monitoring of the Company's hedging activities, and the treatment of such hedging activities for accounting purposes. In the case of the Eurodollar futures contracts the Company had outstanding at December 31, 2003, and any

future efforts to hedge the effects of interest rate changes on liability costs, if management enters into hedging instruments that have higher interest rates imbedded in them as a result of the forward yield curve, and at the end of the term of these hedging instruments the spot market interest rates for the liabilities that are hedged are actually lower, then the Company will have locked in higher interest rates for its liabilities than would be available in the spot market at the time. This could result in a narrowing of the Company's net interest margin or result in losses.

Prepayments are the full or partial repayment of principal prior to the original term to maturity of a mortgage loan and typically occur due to refinancing of mortgage loans. Prepayment rates for existing mortgage-backed securities generally increase when prevailing interest rates fall below the market rate existing when the underlying mortgages were originated. In addition, prepayment rates on adjustable-rate and hybrid adjustable-rate mortgage-backed securities generally increase when the difference between long-term and short-term interest rates declines or becomes negative.

The Company intends to fund a substantial portion of its acquisitions of adjustable-rate and hybrid adjustable-rate mortgage-backed securities with borrowings that have interest rates based on indices and repricing terms similar to, but of somewhat shorter maturities than, the interest rate indices and repricing terms of the mortgage-backed securities. Thus, the Company anticipates that in most cases the interest rate indices and repricing terms of its mortgage assets and its funding sources will not be identical, thereby creating an interest rate mismatch between assets and liabilities. Therefore, the Company's cost of funds would likely rise or fall more quickly than would the Company's earnings rate on assets. During periods of changing interest

Table of Contents**LUMINENT MORTGAGE CAPITAL, INC.****NOTES TO FINANCIAL STATEMENTS (Continued)**

rates, such interest rate mismatches could negatively impact the Company's financial condition, cash flows and results of operations. To mitigate interest rate mismatches, the Company may utilize hedging strategies discussed above and in Note 12.

NOTE 12 DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company seeks to manage its interest rate risk exposure to protect the Company's repurchase agreement liabilities against the effects of major interest rate changes. Such interest rate risk may arise from the issuance and forecasted rollover of short-term liabilities with fixed rate cash flows or from liabilities with a contractual variable rate based on LIBOR. Among other strategies, the Company may use Eurodollar futures contracts and interest rate swaps to manage this interest rate risk. Derivative instruments are carried at fair value.

The following table is a summary of derivative instruments held as of December 31, 2003:

	Unrealized	Unrealized	Estimated
	Gains	Losses	Fair Value
(in thousands)			
Eurodollar futures contracts sold short	\$ 3	\$ (160)	\$ (157)

Cash Flow Hedging Strategies

Hedging instruments are designated as cash flow hedges, as appropriate, based upon the specifically identified exposure, which may be an individual item or a group of similar items. The hedged transaction is the forecasted interest expense on forecasted rollover/reissuance of repurchase agreements for a specified future time period and the hedged risk is the variability in those payments due to changes in the benchmark rate. Hedging transactions are structured at inception so that the notional amounts of the hedge are matched with an equal amount of repurchase agreements forecasted to be outstanding in that specified period for which the borrowing rate is not yet fixed. Cash flow hedging strategies include the utilization of Eurodollar futures contracts and interest rate swaps. Any ineffectiveness which arises during the hedging relationship is recognized in interest expense during the period in which it arises. Prior to the end of the specified hedge time period the effective portion of all contract gains and losses (whether realized or unrealized) is recorded in other comprehensive income or loss. Realized gains and losses are reclassified into earnings as an adjustment to interest expense during the specified hedge time period. Hedging instruments under these strategies are deemed to be broadly designated to the outstanding repurchase portfolio and the forecasted rollover thereof. Such forecasted rollovers would also include other types of borrowing arrangements that may replace the repurchase funding during the identified hedge time periods. At December 31, 2003, the maximum length of time over which the Company is hedging its exposure is 12 months.

The Company may use Eurodollar futures contracts to hedge the forecasted interest expense associated with the benchmark rate on forecasted rollover/reissuance of repurchase agreements for a specified future time period, which is defined as the calendar quarter immediately following the contract expiration date. Gains and losses on each contract are associated with forecasted interest expense for the specified future period.

The Company may use interest rate swaps to hedge the forecasted interest expense associated with the benchmark rate on forecasted rollover/reissuance of repurchase agreements for the period defined by maturity of the interest rate swap. Cash flows that occur each time the swap is repriced will be associated with forecasted interest expense for a specified future period, which is defined as the calendar period preceding each repricing date with the same number of months as the repricing frequency.

For the period from April 26, 2003 through December 31, 2003, there was no gain or loss recognized in interest expense due to ineffectiveness. Based upon the amounts included in accumulated other comprehensive income at December 31, 2003, the Company expects to recognize an increase of \$157 thousand in interest expense during 2004. This amount could differ from amounts actually realized due to changes in the benchmark rate between December 31, 2003 and when the Eurodollar futures contracts held at December 31, 2003 expire, as well as the addition of other hedges subsequent to December 31, 2003.

NOTE 14 SUBSEQUENT EVENTS

On January 28, 2004, the Company filed an S-8 with the SEC to register up to 1,000,000 shares of the Company's common stock, par value \$0.001 per share, to be issued or delivered pursuant to the Company's 2003 Stock

Incentive Plan.

On February 4, 2004, the Company's Compensation Committee issued 25,651 shares of restricted stock to the Company's Manager in relation to the incentive fees earned by the Manager during the quarter ended December 31, 2003. The Manager subsequently assigned the restricted stock to employees of the Manager, some of whom are also officers of the Company. On February 4, 2004, the Company's Compensation Committee also issued 1,283 shares of restricted stock to the Company's Chief Financial Officer under the 2003 Stock Incentive Plan in relation to the incentive fees earned by the Chief Financial Officer during the quarter ended December 31, 2003. On February 4, 2004, the Compensation Committee also issued 212 shares of restricted stock under the 2003 Stock Incentive Plan to the Company's Controller.

Table of Contents**LUMINENT MORTGAGE CAPITAL, INC.****NOTES TO FINANCIAL STATEMENTS (Continued)****(Unaudited)****NOTE 1 ACCOUNTING POLICIES**

Luminent Mortgage Capital, Inc., or the Company, is a real estate investment trust which invests primarily in U.S. agency and other highly-rated single-family, adjustable-rate, hybrid adjustable-rate and fixed rate mortgage-backed securities. Seneca Capital Management LLC, or the Manager, pursuant to a management agreement, or the Management Agreement, manages the Company and its investment portfolio.

The accounting and reporting policies of the Company conform with accounting principles generally accepted in the United States of America, or GAAP. Preparing the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and income and expenses during the reporting period.

The information furnished in these unaudited condensed interim statements reflects all adjustments that are, in the opinion of management, necessary for a fair statement of the results for the periods presented. These adjustments are of a normal recurring nature, unless otherwise disclosed in this Form 10-Q. The results of operations in the interim statements do not necessarily indicate the results that may be expected for the full year. The interim financial information should be read in conjunction with the Company's 2003 Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 3, 2004 (file number 001-31828).

Descriptions of the significant accounting policies of the Company are included in Note 1 to financial statements in the Company's 2003 Annual Report on Form 10-K. There have been no significant changes to these policies during 2004.

NOTE 2 MORTGAGE-BACKED SECURITIES

The following table summarizes the Company's mortgage-backed securities classified as available-for-sale as of March 31, 2004, which are carried at fair value:

	Adjustable- Rate Securities	Hybrid- Adjustable- Rate Securities	Balloon Maturity Securities	Total Mortgage- Backed Securities
		(in thousands)		
Amortized cost	\$ 167,744	\$ 3,850,573	\$ 55,698	\$ 4,074,015
Unrealized gains	251	13,692		13,943
Unrealized losses	(1,733)	(14,277)	(576)	(16,586)

Edgar Filing: LUMINENT MORTGAGE CAPITAL INC - Form 424B3

Fair value	<u>\$ 166,262</u>	<u>\$ 3,849,988</u>	<u>\$ 55,122</u>	<u>\$ 4,071,372</u>
% of total	4.1%	94.6%	1.3%	100.0%

S-89

Table of Contents**LUMINENT MORTGAGE CAPITAL, INC.****NOTES TO FINANCIAL STATEMENTS (Continued)****(Unaudited)**

Actual maturities of mortgage-backed securities are generally shorter than stated contractual maturities. Actual maturities of the Company's mortgage-backed securities are affected by the contractual lives of the underlying mortgages, periodic payments of principal, and prepayments of principal. The following table summarizes the Company's mortgage-backed securities on March 31, 2004 according to their estimated weighted-average life classifications:

<u>Weighted-Average Life</u>	<u>Fair Value</u>	<u>Amortized Cost</u>	<u>Weighted-Average Coupon</u>
		(in thousands)	
Less than one year	\$ 345,832	\$ 348,251	3.61%
Greater than one year and less than five years	3,725,540	3,725,764	3.97
Greater than five years			
Total	\$ 4,071,372	\$ 4,074,015	3.96%

The weighted-average lives of the mortgage-backed securities at March 31, 2004 in the table above are based upon data provided through subscription-based financial information services, assuming constant principal prepayment rates to the balloon or reset date for each security. The prepayment model considers current yield, forward yield, steepness of the yield curve, current mortgage rates, mortgage rate of the outstanding loan, loan age, margin and volatility.

The actual weighted-average lives of the mortgage-backed securities in the Company's investment portfolio could be longer or shorter than the estimates in the table above depending on the actual prepayment rates experienced over the lives of the applicable securities and are sensitive to changes in both prepayment rates and interest rates.

At March 31, 2004, unsettled security purchases totaled \$1.1 billion.

The following table shows the Company's investments' fair value and gross unrealized losses, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at March 31, 2004:

<u>Less than 12 Months</u>	<u>12 Months or More</u>	<u>Total</u>
----------------------------	--------------------------	--------------

	<u>Fair Value</u>	<u>Gross Unrealized Losses</u>	<u>Gross Fair Unrealized Value Losses</u>		<u>Fair Value</u>	<u>Gross Unrealized Losses</u>
			(in thousands)			
Agency-backed mortgage-backed securities	\$ 1,519,130	\$ (11,633)	\$	\$	\$ 1,519,130	\$ (11,633)
Non-agency-backed mortgage-backed securities	599,462	(4,953)			599,462	(4,953)
Total temporarily impaired securities	<u>\$ 2,118,592</u>	<u>\$ (16,586)</u>	<u>\$</u>	<u>\$</u>	<u>\$ 2,118,592</u>	<u>\$ (16,586)</u>

At March 31, 2004, the Company was only invested in AAA-rated non-agency-backed or agency-backed mortgage-backed securities. The temporary impairment of the available-for-sale securities results from the fair value of the securities falling below the amortized cost basis. As of March 31, 2004, none of the securities held had been downgraded by a credit rating agency since their purchase. Management intends to hold the securities until maturity, allowing for the anticipated recovery in fair value of the securities held. As such, management does not believe any of the securities held are other-than-temporarily impaired at March 31, 2004.

NOTE 3 REPURCHASE AGREEMENTS AND OTHER BORROWINGS

The Company has entered into repurchase agreements with third party financial institutions to finance most of its mortgage-backed securities. The repurchase agreements are short-term borrowings that bear interest rates that have historically moved in close relationship to the three-month London Interbank Offered Rate, or LIBOR. At March 31, 2004, the Company had

Table of Contents**LUMINENT MORTGAGE CAPITAL, INC.****NOTES TO FINANCIAL STATEMENTS (Continued)****(Unaudited)**

an outstanding amount of \$2.7 billion with weighted-average borrowing rates of 1.15%. At March 31, 2004 securities pledged as collateral for repurchase agreements had estimated fair values of \$2.8 billion.

At March 31, 2004, the repurchase agreements had remaining maturities as summarized below:

	Overnight (1 day or less)	Between 2 and 30 days	Between 31 and 90 days	Between 91 and 335 days	Total
	(in thousands)				
Agency-backed mortgage-backed securities:					
Amortized cost of securities sold, including accrued interest	\$	\$ 61,787	\$ 970,726	\$ 883,482	\$ 1,915,995
Fair market value of securities sold, including accrued interest		62,338	976,324	880,572	1,919,234
Repurchase agreement liabilities associated with these securities		60,207	920,831	846,895	1,827,933
Average interest rate of repurchase agreement liabilities	0.00%	1.24%	1.09%	1.18%	1.14%
Non-agency-backed mortgage-backed securities:

UBS Securities LLC	19,379	124
Wachovia Securities, LLC	5,853	68
Total	\$ 148,531	97

⁽¹⁾ Equal to the fair value of securities sold, plus accrued interest income, minus repurchase agreement liabilities, plus accrued interest expense.

The Company has a margin lending facility with its primary custodian where it may borrow money in connection with the purchase or sale of securities. The terms of the borrowings, including the rate of interest payable, are agreed to with the custodian for each amount borrowed. Borrowings are repayable immediately upon demand of the custodian. At March 31, 2004, there were no outstanding borrowings under the margin lending facility.

NOTE 4 CAPITAL STOCK AND NET INCOME PER SHARE

The Company had 100,000,000 shares of par value \$0.001 common stock authorized and 36,841,146 shares were issued and outstanding as of March 31, 2004. Of the 100,000,000 shares of par value \$0.001 common stock

authorized, 10,000,000 shares are reserved for issuance in order to pay incentive fees in connection with the Management Agreement. As of March 31, 2004, 9,974,349 shares remain reserved for issuance. The Company had 10,000,000 shares of par value \$0.001 preferred stock authorized and none outstanding as of March 31, 2004.

In two closings on June 11 and June 19, 2003, the Company completed a private offering of 11,092,473 shares of common stock, \$0.001 par value at an offering price of \$15.00 per share, including the exercise by the initial purchaser/placement agent of its over-allotment option to purchase 1,500,000 shares of common stock. In addition, on June 11, 2003 the Company issued 407,527 shares of common stock, par value \$0.001, at an offering price net of the initial purchaser's discount of \$13.95 per share, to employees and affiliates of the Manager, and other persons selected by the Manager. The Company received proceeds from these transactions in the amount of \$159.7 million, net of underwriting discount and other offering costs.

On December 18, 2003, the Company completed an initial public offering of 13,110,000 shares of its common stock, \$0.001 par value at an offering price of \$13.00 per share, including the exercise by the underwriter of its over-allotment option to purchase 1,710,000 shares of common stock. The Company received proceeds from the initial public offering in the amount of \$157.0 million, net of underwriting discount and other offering costs.

Table of Contents**LUMINENT MORTGAGE CAPITAL, INC.****NOTES TO FINANCIAL STATEMENTS (Continued)****(Unaudited)**

The Company filed a resale shelf registration statement with the SEC for up to 11,500,000 shares of its common stock issued in the June 11, 2003 and June 19, 2003 private offerings. The registration statement was declared effective by the SEC on February 13, 2004.

On March 29, 2004, the Company completed a public offering of 12,000,000 shares of its common stock, \$0.001 par value at an offering price of \$14.00 per share. On April 2, 2004, the Company received proceeds from the public offering in the amount of \$157.5 million, net of underwriting discount and other offering costs.

The Company calculates basic net income per share by dividing net income for the period by weighted-average shares of its common stock outstanding for that period. Diluted net income per share takes into account the effect of dilutive instruments, such as stock options and unvested restricted stock, but uses the average share price for the period in determining the number of incremental shares that are to be added to the weighted-average number of shares outstanding.

The following table presents a reconciliation of basic and diluted net income per share for the quarter ended March 31, 2004:

	Basic	Diluted
	<u> </u>	<u> </u>
Net income (in thousands)	\$ 10,800	\$ 10,800
Weighted-average number of common shares outstanding	25,077,736	25,077,736
Additional shares due to assumed conversion of dilutive instruments		8,048
	<u> </u>	<u> </u>
Adjusted weighted-average number of common shares outstanding	<u>25,077,736</u>	<u>25,085,784</u>
Net income per share	<u>\$ 0.43</u>	<u>\$ 0.43</u>

NOTE 5 2003 STOCK INCENTIVE PLANS

The Company adopted a 2003 Stock Incentive Plan, effective June 4, 2003, and a 2003 Outside Advisors Stock Incentive Plan, effective June 4, 2003, pursuant to which up to 1,000,000 shares of the Company's common stock is authorized to be awarded at the discretion of the Compensation Committee of the Board of Directors. The plans

provide for the grant of a variety of long-term incentive awards to employees and officers of the Company, individual consultants or advisors who render or have rendered bona fide services, and officers, employees or directors of the Manager as an additional means to attract, motivate, retain and reward eligible persons. These plans provide for the grant of awards that meet the requirements of Section 422 of the Code, non-qualified stock options, stock appreciation rights, restricted stock, stock units and other stock-based awards, and dividend equivalent rights. The maximum term of each grant is determined on the grant date by the Compensation Committee and shall not exceed 10 years. The exercise price and the vesting requirement of each grant is determined on the grant date by the Compensation Committee.

The following table illustrates the common stock available for grant as of March 31, 2004:

	2003 Stock Incentive Plan	2003 Outside Advisors Stock Incentive Plan	Total
	<u> </u>	<u> </u>	<u> </u>
Shares reserved for issuance			1,000,000 ⁽¹⁾
Granted	56,495		56,495
Forfeited			
Expired			
			<u> </u>
Total available for grant			<u>943,505⁽²⁾</u>

(1) At June 4, 2003, adoption date of both stock incentive plans, the maximum number of shares of common stock that may be delivered pursuant to awards granted under these combined plans is 1,000,000 shares.

(2) At March 31, 2004, the maximum number of shares of common stock that may be delivered pursuant to awards granted under these combined plans is 943,505 shares.

Table of Contents**LUMINENT MORTGAGE CAPITAL, INC.****NOTES TO FINANCIAL STATEMENTS (Continued)****(Unaudited)**

At March 31, 2004, the Company had outstanding options under the plans with expiration dates of 2013. The following table illustrates stock option transactions during the quarter ended March 31, 2004:

	Number of Options	Weighted- Average Exercise Price
Outstanding at December 31, 2003	55,000	\$ 14.82
Granted		
Exercised		
Forfeited		
Outstanding at March 31, 2004	55,000	\$ 14.82

The following table illustrates information about stock options outstanding at March 31, 2004:

Range of Exercise Prices	Outstanding			Exercisable	
	Number of Options	Weighted- Average Remaining Life (in years)	Weighted- Average Exercise Price	Number of Options	Weighted- Average Exercise Price
\$13.00-\$14.00	5,000	9.8	\$ 13.00		
\$14.01-\$15.00	50,000	9.6	\$ 15.00		
\$13.00-\$15.00	55,000				

Total stock-based employee compensation expense related to stock options for the quarter ended March 31, 2004 was \$2 thousand.

The following table illustrates restricted common stock transactions during the quarter ended March 31, 2004:

Issued	1,495	\$ 13.90
Repurchased		
	<hr/>	<hr/>
Outstanding at March 31, 2004	1,495	\$ 13.90
	<hr/>	<hr/>

NOTE 6 THE MANAGEMENT AGREEMENT

The Company has entered into a Management Agreement with the Manager that provides, among other things, that the Company will pay to the Manager, in exchange for investment management and certain administrative services, certain fees and reimbursements, summarized as follows:

a base management fee equal to a percentage of average net worth during each fiscal year as defined in the Management Agreement (1% of the first \$300 million plus 0.8% of the amount in excess of \$300 million);

S-94

Table of Contents

LUMINENT MORTGAGE CAPITAL, INC.

NOTES TO FINANCIAL STATEMENTS (Continued)

(Unaudited)

incentive compensation based on the excess of a tiered percentage (as defined in the Management Agreement as the weighted-average of the following rates based upon average net invested assets: (1) 20% for the first \$400 million of average net invested assets; and (2) 10% for the average net invested assets in excess of \$400 million) of the difference between the Company's net income (defined in the Management Agreement as taxable income before incentive compensation, net operating losses from prior periods, and items permitted by the Internal Revenue Code when calculating taxable income for a REIT) and the threshold return (the amount of net income for the period that would produce an annualized return on equity, calculated by dividing the net income, as defined in the Management Agreement, by the average net invested assets, as defined in the Management Agreement, equal to the 10-year U.S. Treasury rate for the period plus 2.0%) for the fiscal period; and

out-of-pocket expenses and certain other costs incurred by the Manager and related directly to the Company.

The base management fee and incentive compensation will be paid quarterly and are subject to adjustment at the end of each fiscal year based on annual results. One-half of the incentive compensation will be paid to the Manager in cash and one-half will be paid in the form of a restricted stock award. The number of shares issued is based on (a) one-half of the total incentive compensation for the period, divided by (b) the average of the closing prices of the common stock over the 30-day period ending three days prior to the grant date, less a fair market value discount determined by the Company's Board of Directors. These shares are restricted shares for varying periods of time, and are forfeitable if the Manager ceases to perform management services for the Company before the end of the restriction periods. The Company's restrictions lapse and full rights of ownership vest for one-third of the shares on the first anniversary of the end of the period in which the incentive compensation is calculated, for one-third of the shares on the second anniversary and for the last one-third of the shares on the third anniversary. Vesting is predicated on the continuing involvement of the Manager in providing services to the Company.

From and after June 11, 2004, the Company is entitled to terminate the Management Agreement without cause provided that the Company gives the Manager 60 days prior written notice and pays a termination fee and other unpaid costs and expenses reimbursable to the Manager. If the Company's terminates the Management Agreement without cause, the Company is required to pay the Manager a termination fee as follows:

If the Company terminates the Management Agreement without cause in connection with a decision to manage its portfolio internally, rather than by an external manager, the amount of the termination fee shall be equal to the amount of the highest annual base fee and the highest annual incentive compensation, for a particular year, earned by the Manager during any of the three years (or on an annualized basis if a lesser period) preceding the effective date of the termination, plus accelerated vesting on the equity component of all incentive compensation.

If the Company terminates the Management Agreement without cause for any other reason, the amount of the termination fee shall be equal to two times the amount of the highest annual base fee and the highest annual incentive compensation, for a particular year, earned by the Manager during any of the three years (or on an annualized basis if a lesser period) preceding the effective date of the termination, plus all deferred payments, including accelerated vesting on the equity component of all incentive compensation.

The Company is also entitled to terminate the Management Agreement with cause, in which case the Company is only obligated to reimburse the Manager for its unpaid costs and expenses.

The Management Agreement contains certain provisions requiring the Company to indemnify the Manager for costs (e.g., legal costs) the Manager could potentially incur in fulfilling its duties prescribed in the Management Agreement or in other agreements related to the Company's activities. The indemnification provisions do not apply under all circumstances (e.g., if the Manager is grossly negligent, acted with reckless disregard or engaged in willful misconduct or active fraud). The provisions contain no limitation on maximum future payments. The Company has evaluated the impact of these guarantees on its financial statements and determined that it is immaterial.

The base management fee for the quarter ended March 31, 2004 was \$787 thousand.

Incentive compensation is earned by the Manager when REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) relative to the average net invested assets for the period, as defined in the Management Agreement, exceeds the threshold return taxable income that would have produced an annualized return on equity equal to the sum of the 10-year U.S. Treasury rate plus 2.0% for the same period. For the quarter ended March 31, 2004,

S-95

Table of Contents

LUMINENT MORTGAGE CAPITAL, INC.

NOTES TO FINANCIAL STATEMENTS (Continued)

(Unaudited)

REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) was \$11.2 million and was greater than the threshold return taxable income of \$4.7 million.

For the quarter ended March 31, 2004, total incentive fees earned by the Manager were \$1.3 million, one-half payable in cash and one-half payable in the form of the Company's common stock as described above. The cash portion of the incentive fee of \$652 thousand for the quarter ended March 31, 2004 was expensed in that period. In accordance with SFAS No. 123, and related interpretations, and EITF 96-18, 15.2% of the restricted stock portion of the incentive fees, or \$99 thousand, was expensed in the quarter ended March 31, 2004. Included in other assets at March 31, 2004 is \$553 thousand of deferred compensation which will be reclassified to stockholders' equity after the restricted stock is issued and will be expensed over the three-year vesting period of the restricted stock.

In accordance with the terms of his employment agreement, the Company's Chief Financial Officer earned an incentive fee of \$65 thousand for the quarter ended March 31, 2004. This incentive fee is also payable one-half in cash and one-half in the form of a restricted stock award under the Company's 2003 Stock Incentive Plan. The shares are payable and vest over the same vesting schedule as the stock issued to the Manager. The cash portion of the incentive fee of \$33 thousand for the quarter ended March 31, 2004 was expensed in that period. In accordance with SFAS No. 123, and related interpretations, and EITF 96-18, 15.2% of the restricted stock portion of the incentive fees, or \$5 thousand, was expensed in the quarter ended March 31, 2004. Included in other assets at March 31, 2004 is \$28 thousand of deferred compensation which will be reclassified to stockholders' equity after the restricted stock is issued and will be expensed over the three-year vesting period of the restricted stock.

NOTE 7 RELATED PARTY TRANSACTIONS

At March 31, 2004, the Company was indebted to the Manager for base management fees of \$787 thousand and incentive fees of \$1.3 million. At March 31, 2004, the Company was indebted to the Company's Chief Financial Officer for incentive fees of \$65 thousand and to officers and employees of the Company for bonuses and expense reimbursement of \$16 thousand. These amounts are included in management fee payable, incentive fee payable and other related party liabilities.

The Manager's financial relationship with the Company is governed by the Management Agreement. Under the Management Agreement, the Manager shall be responsible for all expenses of the personnel employed by the Manager, and all facilities and overhead expenses of the Manager required for the day-to-day operations of the Company, and the expenses of a sub-manager, if any. The Company shall reimburse the Manager for its pro-rata portion of facilities and overhead expenses to the extent that the Company's employees (who are not also employed by the Manager) use such facilities or incur such expenses pursuant to a cost-sharing agreement entered into between the Company and the Manager. As of March 31, 2004, there were no expenses payable to the Manager pursuant to the cost-sharing agreement. During the quarter ended March 31, 2004, the Company paid the Manager \$6 thousand pursuant to the cost-sharing agreement. The Company shall pay all other expenses on behalf of the Company, and shall reimburse the Manager for all direct expenses incurred on the Company's behalf that are not the Manager's specific responsibility as defined in the Management Agreement.

NOTE 8 FAIR VALUE OF FINANCIAL INSTRUMENTS

SFAS No. 107, *Disclosure About Fair Value of Financial Instruments*, requires disclosure of the fair value of financial instruments for which it is practicable to estimate that value. The fair value of mortgage-backed securities available-for-sale and futures contracts is equal to their carrying value presented in the balance sheet. The fair value of cash and cash equivalents, interest receivable, repurchase agreements, unsettled security purchases, and accrued interest expense, approximates cost as of March 31, 2004 due to the short-term nature of these instruments.

S-96

Table of Contents**LUMINENT MORTGAGE CAPITAL, INC.****NOTES TO FINANCIAL STATEMENTS (Continued)****(Unaudited)****NOTE 9 ACCUMULATED OTHER COMPREHENSIVE LOSS**

The following is a summary of the components of accumulated other comprehensive loss as of March 31, 2004:

	Net Unrealized Gains/(Losses) on Mortgage-backed Securities Available-for-Sale	Net Realized and Unrealized Losses on Cash Flow Hedges	Accumulated Other Comprehensive Income/(Loss)
	<u> </u>	<u> </u>	<u> </u>
	(in thousands)		
Beginning Balance	\$ (26,353)	\$ (157)	\$ (26,510)
Change during the period	23,710	(3,645)	20,065
	<u> </u>	<u> </u>	<u> </u>
Ending Balance	<u>\$ (2,643)</u>	<u>\$ (3,802)</u>	<u>\$ (6,445)</u>

See Note 10 for further discussion regarding derivative instruments and hedging activities.

NOTE 10 DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company seeks to manage its interest rate risk exposure to protect the Company's repurchase agreement liabilities against the effects of major interest rate changes. Such interest rate risk may arise from the issuance and forecasted rollover and repricing of short-term liabilities with fixed rate cash flows or from liabilities with a contractual variable rate based on LIBOR. Among other strategies, the Company may use Eurodollar futures contracts and interest rate swaps to manage this interest rate risk. Derivative instruments are carried at fair value.

The following table is a summary of derivative instruments held as of March 31, 2004:

	Unrealized Gains	Unrealized Losses	Estimated Fair Value
	<u> </u>	<u> </u>	<u> </u>
	(in thousands)		
Eurodollar futures contracts sold short	\$	\$ (3,399)	\$ (3,399)

Cash Flow Hedging Strategies

Hedging instruments are designated as cash flow hedges, as appropriate, based upon the specifically identified exposure, which may be an individual item or a group of similar items. The hedged transaction is the forecasted interest expense on forecasted rollover/reissuance of repurchase agreements or the interest rate repricing of repurchase agreements for a specified future time period and the hedged risk is the variability in those payments due to changes in the benchmark rate. Hedging transactions are structured at inception so that the notional amounts of the hedge are matched with an equal amount of repurchase agreements forecasted to be outstanding in that specified period for which the borrowing rate is not yet fixed. Cash flow hedging strategies include the utilization of Eurodollar futures contracts and interest rate swaps. Any ineffectiveness which arises during the hedging relationship is recognized in interest expense during the period in which it arises. Prior to the end of the specified hedge time period the effective portion of all contract gains and losses (whether realized or unrealized) is recorded in other comprehensive income or loss. Realized gains and losses are reclassified into earnings as an adjustment to interest expense during the specified hedge time period. Hedging instruments under these strategies are deemed to be broadly designated to the outstanding repurchase portfolio and the forecasted rollover thereof. Such forecasted rollovers would also include other types of borrowing arrangements that may replace the repurchase funding during the identified hedge time periods. At March 31, 2004, the maximum length of time over which the Company is hedging its exposure is 12 months.

The Company may use Eurodollar futures contracts to hedge the forecasted interest expense associated with the benchmark rate on forecasted rollover/reissuance of repurchase agreements or the interest rate repricing of repurchase agreements for a specified future time period, which is defined as the calendar quarter immediately following the contract expiration date. Gains and losses on each contract are associated with forecasted interest expense for the specified future period.

Table of Contents

LUMINENT MORTGAGE CAPITAL, INC.

NOTES TO FINANCIAL STATEMENTS (Continued)

(Unaudited)

The Company may use interest rate swaps to hedge the forecasted interest expense associated with the benchmark rate on forecasted rollover/reissuance of repurchase agreements or the interest rate repricing of repurchase agreements for the period defined by maturity of the interest rate swap. Cash flows that occur each time the swap is repriced will be associated with forecasted interest expense for a specified future period, which is defined as the calendar period preceding each repricing date with the same number of months as the repricing frequency.

For the quarter ended March 31, 2004, losses of \$14 thousand were recognized in interest expense due to ineffectiveness. Based upon the amounts included in accumulated other comprehensive loss at March 31, 2004, the Company expects to recognize an increase of \$3.8 million in interest expense during 2004, of which \$412 thousand is due to positions closed during the quarter and \$3.4 million is due to unrealized losses on open positions at March 31, 2004. This amount could differ from amounts actually realized due to changes in the benchmark rate between March 31, 2004 and when the Eurodollar futures contracts held at March 31, 2004 are closed, as well as the addition of other hedges subsequent to March 31, 2004.

PROSPECTUS

11,500,000 Shares

Common Stock

The selling stockholders named in this prospectus may offer up to 11,500,000 common shares of Luminent Mortgage Capital, Inc. We will not receive any portion of the proceeds from their sale of our shares. Our common stock is subject to transfer restrictions designed to preserve our status as a real estate investment trust. See Description of Capital Stock Transfer Restrictions.

We recently completed our initial public offering of 13,110,000 shares of common stock.

Our common stock is listed on the New York Stock Exchange under the symbol LUM. On February 12, 2004 the last reported sale price of our common stock on the NYSE was \$15.08 per share.

Investing in our common stock involves risks. See Risk Factors beginning on page 10 for a discussion of risks relating to our common stock, including, among others:

We commenced operations in June 2003 and have a limited operating history. Our manager, Seneca Capital Management LLC, or Seneca, has no prior experience managing a REIT. Accordingly, we might not be able to operate our business or implement our operating policies and strategies successfully.

Our investment strategy permits us to invest up to 10% of our assets in unrated mortgage-related assets, including mortgage-backed securities rated below investment grade. These assets carry an increased likelihood of default or rating downgrade relative to investment-grade assets, which may cause us to suffer losses.

Interest rate mismatches between our mortgage-backed securities and our borrowings used to fund our purchases of mortgage-backed securities might reduce our net income or result in a loss during periods of changing interest rates.

Increased levels of prepayments on the mortgages underlying our mortgage-backed securities might decrease our net interest income or result in a net loss.

We generally seek to borrow eight to 12 times the amount of our equity. Such leveraging could reduce our net income and our cash available for distributions or cause us to suffer losses.

Our board of directors may change our operating policies and strategies without prior notice to you or stockholder approval and such changes could harm our business and results of operations and the value of our stock.

Our results may suffer as a consequence of a potential conflict of interest arising out of our relationship with Seneca, on the one hand, and Seneca's relationship with other third parties, on the other hand. In addition, this potential conflict may reduce the amount of time and effort that Seneca devotes to managing our business and may result in suitable investment opportunities being allocated to other entities.

We pay Seneca incentive compensation based on our portfolio's performance. Accordingly, Seneca may recommend riskier or more speculative investments in an effort to maximize its incentive compensation.

The selling stockholders are offering these shares of common stock. The selling stockholders may sell all or a portion of these shares from time to time in market transactions through the NYSE or any other stock exchange or

market on which our common stock is listed, in negotiated transactions or otherwise, and at prices and on terms that will be determined by the then prevailing market price or at negotiated prices directly or through a broker or brokers, who may act as agent or as principal or by a combination of such methods of sale. The selling stockholders will receive all proceeds from the sale of the shares of our common stock. For additional information on the methods of sale, you should refer to the section entitled "Plan of Distribution" on page 107.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is February 13, 2004

SUMMARY

This summary highlights the material information contained elsewhere in this prospectus. You should read this entire prospectus carefully, including the section titled Risk Factors and our financial statements and the notes thereto before making an investment in our common stock. As used in this prospectus, Luminent, company, we, our, and us refer to Luminent Mortgage Capital, Inc., except where the context otherwise requires.

Luminent Mortgage Capital, Inc.

We were formed in April 2003 to invest primarily in U.S. agency and other highly-rated, single-family, adjustable-rate, hybrid adjustable-rate and fixed-rate mortgage-backed securities, which we acquire in the secondary market. Our strategy is to acquire mortgage-related assets, finance these purchases in the capital markets and use leverage in order to provide an attractive return on stockholders' equity. Through this strategy, we seek to earn income, which is generated from the spread between the yield on our earning assets and our costs, including the interest cost of the funds we borrow.

We commenced operations in June 2003, following the completion of a private placement of our common stock, in which we raised net proceeds of approximately \$159.7 million. On December 18, 2003, we completed the initial public offering of our shares of common stock and began trading on the New York Stock Exchange, or NYSE, under the trading symbol LUM on December 19, 2003. The initial public offering raised approximately \$170.4 million in gross proceeds. We estimate that at December 31, 2003 substantially all of the net offering proceeds had been used to purchase mortgage-backed securities. As of December 31, 2003, we had invested substantially all of the net proceeds from that offering, plus approximately \$1.7 billion of borrowed funds, in a total of \$2.2 billion of U.S. agency and other highly-rated, residential mortgage-backed securities. We invest primarily in adjustable-rate and hybrid adjustable-rate mortgage-backed securities. Adjustable-rate mortgage-backed securities have interest rates that reset periodically, typically every six months or on an annual basis. Hybrid adjustable-rate mortgage-backed securities have interest rates that are fixed for the first few years of the loan-typically three, five, seven or 10 years-and thereafter reset periodically in a manner similar to adjustable-rate mortgage-backed securities. As of December 31, 2003, approximately 8.6% of our investment portfolio was comprised of adjustable-rate mortgage-backed securities and approximately 88.9% was comprised of hybrid adjustable-rate mortgage-backed securities. In addition, as of December 31, 2003, 63% of the mortgage-backed securities in our investment portfolio were guaranteed by Fannie Mae, Freddie Mac or the Government National Mortgage Administration, or Ginnie Mae, and the remaining 37% had AAA credit ratings from at least one nationally-recognized statistical rating agency.

We have acquired and will seek to acquire additional assets that will produce competitive returns, taking into consideration the amount and nature of the anticipated returns from the investment, our ability to pledge the investment for secured, collateralized borrowings and the costs associated with financing, managing, securitizing and reserving for these investments. We currently expect that all of the mortgage-backed securities that we acquire with the net proceeds of our recent initial public offering, or IPO, will be agency-backed or have AAA credit ratings from at least one nationally-recognized statistical rating agency, and most of the securities will be hybrid adjustable-rate mortgage-backed securities. As of June 30, 2003, the market for residential mortgage debt that had been securitized into mortgage-backed securities was approximately \$4.0 trillion, approximately \$3.2 trillion of which was agency-backed and, therefore, generally consistent with our investment guidelines. As of June 30, 2003, approximately \$45.0 billion of the available mortgage-backed securities was held by REITs.

We have financed our acquisition of mortgage-related assets by investing our equity and by borrowing at short-term rates under repurchase agreements. We intend to continue to finance our acquisitions in this manner. We generally seek to borrow between eight and 12 times the amount of our equity. We actively manage the adjustment periods and the selection of the interest rate indices of our borrowings against the adjustment periods and the selection

of indices on our mortgage-related assets in order to manage our liquidity and interest rate related risks. We may also choose to engage in various hedging activities designed to match more closely the terms of our assets and liabilities. As of December 31, 2003, we had entered into hedging arrangements as described in **Recent Developments** below.

As a long-term holder of mortgage-backed securities we are focused on acquiring, financing and managing a diverse portfolio of mortgage-backed securities with a variety of characteristics that we believe will provide attractive returns in a multitude of interest rate and prepayment environments. We do not construct our overall investment portfolio in order to express a directional expectation for interest rates or mortgage prepayment rates.

We review the credit risk associated with each potential investment and may diversify our portfolio to avoid undue geographic, insurer, industry and other types of concentrations. By maintaining a large percentage of our assets in high quality and highly-rated assets, many of which are guaranteed under limited circumstances as to payment of a limited amount of principal and interest by federal agencies or federally chartered entities such as Fannie Mae, Freddie Mac or Ginnie Mae, we believe we can mitigate our exposure to losses from credit risk.

Table of Contents

In addition to the strategies described above, we intend to use other strategies to seek to generate earnings and distributions to our stockholders, which may include the following:

increasing the size of our balance sheet at a rate faster than the rate of increase in our operating expenses;

using leverage to increase the size of our balance sheet; and

lowering our effective borrowing costs over time by seeking direct funding with collateralized lenders.

We are externally managed and advised by Seneca Capital Management LLC, or Seneca, pursuant to a management agreement with Seneca. We have a full-time chief financial officer, who is not employed by Seneca, to provide us with dedicated financial management, analysis and investor relations capability.

We expect to qualify and will elect to be taxed as a real estate investment trust, or REIT, under the Internal Revenue Code of 1986, as amended, and as such will routinely distribute substantially all of the income generated from our operations to our stockholders. As long as we retain our REIT status, we generally will not be subject to U.S. federal or state taxes on our income to the extent that we distribute our net income to our stockholders.

Our principal offices are located at 909 Montgomery Street, Suite 500, San Francisco, California 94133. Our telephone number is (415) 486-2110.

Recent Developments

Following the completion of our private placement in June and the purchase of substantially all of our mortgage-backed securities with the net proceeds of our private placement, the U.S. bond markets experienced dramatic price and yield volatility. For example, between June 1, 2003 and September 30, 2003, the 10-year U.S. Treasury yield ranged from a low of 3.11% on June 13, 2003 to a high of 4.60% on September 2, 2003, an increase of approximately 48%. This increase in interest rates caused the overall market value of our portfolio to decrease, and our leverage (defined as our total debt divided by stockholders' equity) to increase beyond our desired range. By August 13, 2003, the 10-year U.S. Treasury yield had increased to 4.56% and, as a result, the unrealized loss on the securities in our portfolio had increased to \$37.8 million and our leverage correspondingly increased to 13.6 times our stockholders' equity.

In response to these conditions, we implemented a strategy of reducing portfolio leverage by selling approximately \$130.7 million of our mortgage-backed securities on August 13, 2003. On August 14, 2003, we also sold short approximately \$200.0 million of Fannie Mae 15-year 4.50% coupon mortgage-backed securities for settlement on September 18, 2003 in an effort to seek to protect the value of our portfolio against possible additional increases in interest rates. This short position was fully covered between September 11, 2003 and September 15, 2003. These strategies successfully reduced our leverage and overall risk exposure to further increases in interest rates. Although these activities resulted in losses, other means of generating cash to reduce leverage were not practically available to us at that time. For example, because we had purchased our portfolio so recently, cash flow from interest income and prepayments was insufficient to enable us to reduce leverage through the ordinary course of portfolio management. Similarly, because our registration statements were pending with the Securities and Exchange Commission, or the SEC, additional capital could not be readily raised during this time period to effect a reduction in leverage. Given the greater seasoning of our portfolio today, the cash flow characteristics of our investments, and an opportunity to raise additional equity as a public company upon completion of our initial public offering, among a number of other considerations, we now have a greater combination of risk mitigation factors that enable us to protect our balance sheet in the future.

During the quarter ended September 30, 2003, we earned net interest income of approximately \$6.5 million. However, we realized net capital losses of \$7.8 million that resulted in a reported net loss for the quarter of \$2.8 million, or \$0.24 per fully diluted share. These results are calculated in accordance with accounting principles generally accepted in the United States, which are known as GAAP. When the net capital losses and other compensation and organizational expenses are added back for purposes of calculating the REIT taxable net income for the quarter ended September 30, 2003, REIT taxable net income was approximately \$5.7 million or \$0.48 per share. REIT taxable net income is calculated according to the requirements of the Internal Revenue Code, rather than GAAP. A reconciliation of our REIT taxable net income to our GAAP-basis net loss as of September 30, 2003 appears on page 51 of this prospectus.

On October 1, 2003, we declared and, on November 17, 2003, we paid a cash distribution of \$0.50 per share, which represented 98% of our REIT taxable net income since inception. The cash distribution was funded entirely with cash flow from our ongoing operations, including principal payments and interest payments on our mortgage-backed securities. At the end of the quarter, our manager voluntarily waived on a one-time basis its right to receive incentive fees of \$613,247 which it otherwise earned during the quarter ended September 30, 2003. The waived incentive fee has been accounted for as a capital contribution as of September 30, 2003. The incentive fee is calculated primarily based upon REIT taxable net income and was expensed in the quarter ended September 30, 2003.

Table of Contents

For the month ended September 30, 2003, the yield on average earning assets, net of amortization of premium was 2.61% and the cost of funds on the average repurchase balance as of September 30, 2003 was 1.20%, resulting in an interest rate spread of 1.41%.

Through September 30, 2003, our borrowings have been exclusively in the form of repurchase agreements from a broadly diversified group of repurchase lenders. As of September 30, 2003, the outstanding balance under our repurchase agreements was approximately \$1.5 billion, equating to leverage of approximately 10.6, with a weighted average interest rate of 1.20% and a weighted average maturity of 254 days.

As of September 30, 2003, approximately 67% of our assets were invested in agency mortgage-backed securities and the remaining 33% were invested in AAA rated mortgage-backed securities. These mortgage-backed securities were valued at approximately \$1.6 billion and were allocated as follows:

12.3% in adjustable-rate mortgage-backed securities;

84.3% in hybrid adjustable-rate mortgage-backed securities, with the majority of our holdings in 3/1 hybrids;

3.4% in one balloon mortgage-backed security which matures in January 2008; and

0.0% in fixed rate mortgage-backed securities.

The constant prepayment rate, or CPR, on our mortgage-backed securities for the month ended September 30, 2003 was 28%. CPR attempts to predict the percentage of principal that will prepay over the next 12 months based on historical principal paydowns. As interest rates have risen, the rate of refinancings has declined sharply, which we believe will result in lower rates of prepayments and, as a result, a lower portfolio CPR.

As of September 30, 2003, the weighted average effective duration of the securities in our overall investment portfolio, assuming constant prepayment rates to the balloon or reset date, or the CPB duration, was 1.7 years. CPB is similar to CPR except that it also assumes that the hybrid adjustable-rate mortgage-backed securities prepay in full at their next reset date. As of September 30, 2003, the mortgages underlying our hybrid adjustable-rate mortgage-backed securities had fixed interest rates for a weighted average of 49 months, after which time the interest rates reset and become adjustable. The average length of time until maturity of those mortgages was 30 years. Those mortgages are also subject to interest rate caps that limit the amount that the applicable interest rate can increase during any year, known as an annual cap, and through the maturity of the applicable security, known as a lifetime cap. As of September 30, 2003, the mortgages underlying our hybrid adjustable-rate mortgage-backed securities had average annual caps of 2.44% and average lifetime caps of 9.99%.

Average stockholders' equity for the quarter ended September 30, 2003 was \$147.3 million. Due to the losses on sales of securities described above, return on average equity was (1.89%) for the quarter ended September 30, 2003.

Our book value at September 30, 2003 was \$139.5 million, or \$11.91 per share, based on 11,704,000 shares outstanding on that date. As of September 30, 2003, the accumulated other comprehensive loss related to the fair market value adjustment for our mortgage-backed securities was \$18.2 million, which represents a \$13.6 million increase during the quarter.

In the month ended October 31, 2003, we earned net interest income of \$2.2 million, and net income of \$1.9 million, or \$0.16 per fully diluted share. For the month ended October 31, 2003, the yield on average earning assets, net of amortization of premium, was 2.84%, and the cost of funds on our average repurchase agreement liabilities at October 31, 2003 was 1.20%, resulting in an average interest rate spread of 1.64%. The constant prepayment rate, or CPR, on our mortgage-backed securities for the month ended October 31, 2003, was 25%.

Edgar Filing: LUMINENT MORTGAGE CAPITAL INC - Form 424B3

Our book value at November 26, 2003 was \$126.8 million, or \$10.84 per share, based on 11,704,000 shares outstanding on that date. As of November 26, 2003, the accumulated other comprehensive loss related to the fair market value adjustment for our mortgage-backed securities was \$21.7 million.

On November 24, 2003 our board of directors declared a cash distribution of \$0.45 per share for the fourth quarter of 2003, which we paid on January 28, 2004 to stockholders of record on December 11, 2003. The aggregate amount of our fourth quarter distribution paid on January 28, 2004 was \$5.3 million.

For the quarter ended December 31, 2003, we reported net income of \$5.4 million or \$0.40 diluted earnings per share based on 13,414,260 weighted-average shares outstanding. For the period from April 26, 2003, inception, through December 31, 2003, our net income was \$2.8 million, or \$0.27 diluted earnings per share, based on 10,139,811 weighted-average shares outstanding.

Table of Contents

At December 31, 2003 our book value was \$282.5 million, or \$11.38 per share, based on 24,814,000 shares outstanding on that date. Our book value at December 31, 2003 includes the impact of the cash distribution of \$0.45 per share for the fourth quarter. At December 31, 2003, our outstanding repurchase agreement balance was \$1.7 billion with a weighted-average interest rate of 1.19%. The average maturity of our total liabilities was 255 days.

At December 31, 2003, the weighted-average coupon of our mortgage assets was 4.09%. The constant prepayment rate, or CPR, on our mortgage-backed securities was 23% for the quarter ended December 31, 2003. CPR declined over the course of the fourth quarter. CPR is a measure of the rate of prepayment for our mortgage-backed securities, expressed as an annual rate relative to the outstanding principal balance of our mortgage-backed securities.

At December 31, 2003, approximately 63.2% of our assets were invested in agency securities with the remaining 36.8% invested in AAA-rated, securitized, residential whole loan mortgages. Mortgage assets held at December 31, 2003 were approximately \$2.2 billion and were allocated as follows:

8.6% adjustable-rate mortgages;

88.9% hybrid adjustable-rate mortgages; and

2.5% balloon-maturity mortgages.

As of December 31, 2003, all of the mortgage-backed securities in our portfolio had been purchased at a premium and the portfolio had an average amortized cost of 102.2.

Subsequent to September 30, 2003, we engaged in short sales of Euro dollar futures contracts in order to hedge the impact of changes in interest rates on our liability costs. Between November 21, 2003 and December 16, 2003, we sold short 1,725 Euro dollar futures contracts, which expire in March 2004, June 2004 and September 2004, with a notional amount totaling \$1,725.0 million. The value of these futures contracts is marked to market daily in our margin account with the custodian. Based upon the daily market value of these futures contracts, we either receive funds into, or wire funds into, our margin account with the custodian to ensure that an appropriate margin account balance is maintained at all times through the expiration of the contracts.

These contracts have been designated as cash flow hedges of our borrowings under repurchase agreements under Statement of Financial Accounting Standards, or SFAS, No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted, and therefore we have applied hedge accounting to these transactions. The futures contracts are valued at fair value with the resulting gain or loss associated with the effective portion of the hedge recognized in accumulated other comprehensive income until the quarter following contract expiration. The gain or loss associated with the ineffective portion will be recognized in earnings in the current quarter when the effectiveness measurement is made.

Under SFAS No. 133 and our hedging policy, at the inception and during the life of a hedging relationship, the hedge must be expected to be highly effective in offsetting changes in the hedged item's fair value or the variability in cash flows attributable to the hedged risk. In applying our policy, we have determined that these contracts are highly effective as follows. We use regression methodology to assess the effectiveness of our hedging strategies. Specifically, at the inception of each new hedge, we assess effectiveness using ordinary least squares regression to evaluate the correlation between the rates consistent with the hedges and the underlying hedged items. A hedge is highly effective if the changes in the fair value of the derivative provide offset of at least 80% and not more than 120% of the changes in fair value or cash flows of the hedged item attributable to the risk being hedged.

Risk Factors

An investment in our common stock involves material risks, including a number of potential conflicts of interests between us, on the one hand, and Seneca and its affiliates, on the other hand. Each prospective purchaser of our common stock should consider carefully the matters discussed under Risk Factors beginning on page 10 before investing in our common stock. Some of the risks include:

We commenced operations in June 2003 and have a limited operating history. Our manager, Seneca, has no prior experience managing a REIT. Accordingly, we might not be able to operate our business or implement our operating policies and strategies successfully.

Our investment strategy permits us to invest up to 10% of our assets in unrated mortgage-related assets, including mortgage-backed securities rated below investment grade. These assets carry an increased likelihood of default or rating downgrade relative to investment-grade assets, which may cause us to suffer losses.

Interest rate mismatches between our mortgage-backed securities and our borrowings used to fund our purchases of mortgage-backed securities might reduce our net income or result in a loss during periods of changing interest rates.

Table of Contents

Increased levels of prepayments on the mortgages underlying our mortgage-backed securities might decrease our net interest income or result in a net loss.

We generally seek to borrow eight to 12 times the amount of our equity. Such leveraging could reduce our net income and our cash available for distributions or cause us to suffer losses.

Our board of directors may change our operating policies and strategies without prior notice to you or stockholder approval and such changes could harm our business and results of operations and the value of our stock.

Our results may suffer as a consequence of a potential conflict of interest arising out of our relationship with our manager, on the one hand, and our manager's relationship with other third parties, on the other hand. In addition, this potential conflict may reduce the amount of time and effort that our manager devotes to managing our business and may result in suitable investment opportunities being allocated to other entities.

We pay our manager incentive compensation based on our portfolio's performance. Accordingly, our manager may recommend riskier or more speculative investments in an effort to maximize its incentive compensation.

Our Manager and Executive Officers

Our day-to-day operations are externally managed and advised by our manager, Seneca Capital Management LLC, or Seneca, subject to the direction and oversight of our board of directors. Established in 1989, Seneca is a registered investment adviser under the Investment Advisers Act of 1940, as amended. Seneca engages in investment management as its sole business and manages fixed-income and equity assets for pension and profit-sharing plans, financial institutions, such as banking and insurance companies, and mutual funds for retail and institutional investors. Seneca had over 100 full-time employees and approximately \$13 billion of institutional and private investment accounts at September 30, 2003.

From time to time, we will assess whether we should be internally managed. Our assessment will be based on a number of factors deemed relevant by our board of directors, including our ability to attract and retain full-time employees and the costs and expenses related to becoming internally managed.

A majority of the outstanding equity interests of Seneca are owned by Phoenix Investment Partners, Ltd. Phoenix Investment is a wholly-owned subsidiary of The Phoenix Companies, Inc. (NYSE: PNX). Our board of directors consists of seven members, five of whom are not affiliated with Seneca or Phoenix. Neither this prospectus nor this offering are endorsed or guaranteed in any way by Seneca or Phoenix.

Our executive officers have significant experience in providing investment advisory services, with an average of 16 years of experience. Prior to founding Seneca, Gail Seneca, our chief executive officer, spent two years as senior vice president of the Asset Management Division of Wells Fargo Bank, where she managed fixed-income assets in excess of \$10 billion. Before joining Seneca as its fixed income chief investment officer, Albert Gutierrez, our president, spent two years as head of portfolio management, trading and investment systems at American General Investment Management where he was responsible for approximately \$75 billion in client assets, and 12 years with Conseco Capital Management as a senior vice president in charge of fixed income research and trading as well as insurance asset portfolio management. Other than our full-time chief financial officer, all of our executive officers are also managers or employees of Seneca, as described in the following table:

<u>Name</u>	<u>Position with Seneca</u>	<u>Position with Us</u>
Gail P. Seneca, Ph.D.	President/Chief Executive Officer and Chief Investment Officer	Chairman of the Board of Directors and Chief Executive Officer

Edgar Filing: LUMINENT MORTGAGE CAPITAL INC - Form 424B3

Albert J. Gutierrez, CFA	Fixed Income Chief Investment Officer and Principal	President and Director
Christopher J. Zyda	None	Senior Vice President and Chief Financial Officer
Andrew S. Chow, CFA	Fixed Income Portfolio Manager	Senior Vice President
Troy A. Grande, CFA	Fixed Income Portfolio Manager	Senior Vice President

Table of Contents

The Management Agreement

We have entered into a management agreement with Seneca dated June 11, 2003. Pursuant to the management agreement, Seneca, as our sole manager, generally implements our business strategy, is responsible for our day-to-day operations and performs services and activities relating to our assets and operations in accordance with the terms of the management agreement. Seneca's services for us can be divided into the following three primary activities:

Asset Management Seneca advises us with respect to, arranges for and manages the acquisition, financing, management and disposition of, our investments.

Liability Management Seneca evaluates the credit risk and prepayment risk of our investments and arranges borrowing and hedging strategies.

Capital Management Seneca coordinates our capital raising activities.

In conducting these activities, Seneca advises us on the formulation of, and implements, our operating strategies and policies, arranges for our acquisition of assets, monitors the performance of our assets, arranges for various types of financing and hedging strategies, and provides administrative and managerial services in connection with our operations. At all times in the performance of these activities, Seneca is subject to the direction and oversight of our board of directors.

Pursuant to the management agreement and a cost-sharing agreement between Seneca and us, Seneca may earn or be entitled to receive the following compensation, fees and other benefits:

Base management fee 1% per annum of the first \$300 million of our average net worth, plus 0.8% per annum of our average net worth in excess of \$300 million during such fiscal year, calculated on a quarterly basis;

Incentive compensation a specified percentage of our REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) in excess of a threshold amount of taxable income, calculated on a quarterly basis and subject to annual reconciliation;

Out-of-pocket expense reimbursements reimbursement of actual out-of-pocket expenses incurred in connection with our administration on an on-going basis;

Reimbursement of overhead expenses reimbursement of actual costs attributable to our use of services rendered by Seneca pursuant to the cost-sharing agreement. Our portion of such costs is allocated to us as determined by Seneca, subject to reasonable approval by a majority of our independent directors; and

Termination fee payable only upon termination by us without cause or by Seneca upon our change of control. Actual amount of fee depends on the circumstances of the termination.

For a more detailed discussion of the compensation and other fees payable to Seneca, see [The Manager The Management Agreement](#) and [The Manager The Cost-Sharing Agreement](#).

Conflicts of Interest

We are subject to potential conflicts of interest involving Seneca and its affiliates because, among other reasons:

the incentive compensation, which is based on our net income, may create an incentive for Seneca to recommend investments with greater income potential, which may be relatively more risky than would be the case if its compensation from us did not include an incentive-based component;

Seneca and its affiliates are permitted to purchase mortgage-backed securities for their own account and to advise accounts of other clients, and certain investment opportunities appropriate for us also will be appropriate for these accounts; and

two of our directors, and all but one of our executive officers, are managers or employees of, or otherwise affiliated with, Seneca.

For a more detailed discussion of potential conflicts of interests between us, on the one hand, and Seneca and its affiliates, on the other hand, see [Conflicts of Interests; Certain Relationships and Related Transactions](#).

The management agreement does not limit or restrict the right of Seneca or any of its affiliates from engaging in any business or rendering services to any other person, including, without limitation, the purchase of, or rendering advice to others purchasing, mortgage-backed securities that meet our investment guidelines. However, Seneca has agreed that for as long as Seneca is our exclusive manager pursuant to the management agreement, it will not sponsor any other mortgage REIT that invests primarily in high-quality, residential mortgage-backed securities, without first obtaining the approval of a majority of our independent directors.

Table of Contents

This Offering

This prospectus covers the resale of up to 11,500,000 shares of our common stock. We issued and sold 8,126,189 of these shares on June 11, 2003 and June 19, 2003, in a private offering to Friedman, Billings, Ramsey & Co., Inc., which we refer to as the initial purchaser, and 3,373,811 of these shares on June 11, 2003 and June 19, 2003 in a concurrent private offering to several other accredited investors. We refer to both of these offerings, collectively, as our private placement. We were advised by the initial purchaser that the shares it purchased were resold to qualified institutional buyers, as defined in Rule 144A under the Securities Act, institutional accredited investors, as defined in Rule 501 under the Securities Act, and/or to non-U.S. Persons, as defined in Regulation S under the Securities Act, initially at a price of \$15.00 per share.

Common stock offered by the selling stockholders	11,500,000 shares
Common stock outstanding	24,841,146 shares
Use of proceeds	We will not receive any proceeds from the sale of the shares of common stock offered by this prospectus.
Trading	Our common stock is listed on the New York Stock Exchange, or NYSE, under the symbol LUM ; however, an active trading market for our shares might never develop.

The number of shares of our common stock shown as outstanding, above, is based on 24,841,146 shares outstanding on February 10, 2004, and excludes:

55,000 shares of our common stock issuable upon the exercise of options outstanding on February 10, 2004 with a weighted average exercise price of \$14.82 per share; and

943,505 additional shares of our common stock as of February 10, 2004 available for issuance under our 2003 stock incentive plan and 2003 outside advisors stock incentive plan.

Our Tax Status

We will elect to be taxed as a REIT under the Internal Revenue Code commencing with our taxable year ending December 31, 2003. Provided we qualify as a REIT, we generally will not be subject to U.S. federal corporate income tax on taxable income that we distribute to our stockholders. REITs are subject to a number of organizational and operational requirements, including a requirement that they currently distribute at least 90% of their annual REIT net taxable income. We face the risk that we might not be able to comply with all of the REIT requirements in the future. Failure to qualify as a REIT would render us subject to U.S. federal income tax (including any applicable alternative minimum tax) on our taxable income at regular corporate rates, and distributions to our stockholders would not be deductible. Even if we qualify for taxation as a REIT, we may be subject to certain U.S. federal, state, local and foreign taxes on our income and property. See Certain U.S. Federal Income Tax Consequences.

Restrictions on Ownership of Our Stock

In order to facilitate our qualification as a REIT, our charter prohibits any stockholder from directly or indirectly owning more than 9.8% of the outstanding shares of any class or series of our stock. We adopted this restriction to promote compliance with the provisions of the Internal Revenue Code which limit the degree to which ownership of a

REIT may be concentrated. See Description of Capital Stock Transfer Restrictions.

Distributions

To avoid corporate income and excise tax and to maintain our qualification as a REIT, we intend to make quarterly distributions to our stockholders that will result in annual distributions of at least 90% of our REIT net taxable income, determined without regard to the deduction for dividends paid and by excluding any net capital gains. REIT net taxable income is calculated pursuant to standards in the Internal Revenue Code and will not necessarily be the same as our net income as calculated in accordance with generally accepted accounting principles, or GAAP. Our board of directors may, in its discretion, cause us to make additional distributions of cash legally available for that purpose. Our distributions from quarter to quarter will depend on our taxable earnings, financial condition and such other factors as our board of directors deems relevant. In the future, our board of directors may elect to adopt a dividend reinvestment plan.

Table of Contents

Selling Stockholders, Concurrent Initial Public Offering and Lock-Up Agreements

Selling Stockholders. The holders of 11,500,000 shares of our common stock issued in a private placement in June 2003, or their transferees, have registration rights pursuant to a registration rights agreement we entered into on June 11, 2003, the initial closing date of the private placement. Those stockholders have the right to sell all or a portion of their shares of our common stock from time to time in this offering, subject to limitations. The names of those stockholders are included in this prospectus. Of the 11,704,000 shares of common stock outstanding prior to our IPO, a total of 204,000 shares (held by our founders and their associates) are not salable pursuant to this prospectus.

Initial Public Offering. Our IPO was filed on registration statement Form S-11, which was declared effective by the SEC on December 18, 2003. The underwriters subsequently exercised their over-allotment option in full and on December 24, 2003 we issued 13,110,000 shares of common stock for net proceeds of approximately \$157.6 million, after estimated expenses and underwriting discounts and commissions.

Lock-Up Agreements. Pursuant to our registration rights agreement, the holders of the 11,500,000 shares of our common stock issued in our June 2003 private placement are, subject to various exceptions, restricted from selling any of their shares until February 17, 2004 (the 61st day after December 18, 2003, the date of our IPO prospectus) without the prior written consent of Friedman, Billings, Ramsey & Co., Inc. In connection with our June 2003 private placement, most of our directors and officers and some of our other stockholders, including Seneca, which collectively owned an aggregate of 297,448 shares of our common stock at that time, entered into individual lock-up agreements which, subject to various exceptions, prevent them from reselling their shares until 90 days after the effective date of the registration statement of which this prospectus is a part. Some of these shares were purchased in our June 2003 private placement and, as a result, are also subject to the 60-day lock-up restrictions described above. In addition, in connection with the IPO, our directors, officers and Seneca, who collectively own an aggregate of 401,409 shares of our common stock as of February 6, 2004, have entered into individual lock-up agreements which, subject to various exceptions, prevent them from reselling their shares until 180 days after December 18, 2003, the date of our IPO prospectus.

Table of Contents**Summary Financial Data**

The following summary financial data are derived from audited financial statements as of April 25, 2003 (inception) and June 30, 2003 and for the period from April 26, 2003 through June 30, 2003, and unaudited financial statements as of September 30, 2003 (as restated), for the period April 26, 2003 through September 30, 2003 (as restated) and for the three months ended September 30, 2003 (as restated). The selected financial data should be read in conjunction with the more detailed information contained in the financial statements and notes thereto and

Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this prospectus. See Note 10 to the financial statements for a discussion of the restatement of the financial information below.

	For the period April 26, 2003 through September 30, 2003 (as restated)	For the three months ended September 30, 2003 (as restated)	For the period April 26, 2003 through June 30, 2003
Statement of Operations Data:			
Revenues:			
Net interest income:			
Interest income	\$ 11,449,975	\$ 10,777,462	\$ 672,513

RISK FACTORS

You should carefully consider the risks described below before making an investment decision. Our business, financial condition or results of operations could be harmed by any of these risks. Similarly, these risks could cause the market price of our common stock to decline and you might lose all or part of your investment. Our forward-looking statements in this prospectus are subject to the following risks and uncertainties. Our actual results could differ materially from those anticipated by our forward-looking statements as a result of the risk factors below. The risks described below are not the only ones facing our company. Additional risks not presently known to us or that we currently deem immaterial might also impair our business operations.

Risks Related to Our Business

We have a limited operating history and might not be able to operate our business or implement our operating policies and strategies successfully.

We began operations in June of 2003, and we have a limited operating history. The results of our operations will depend on many factors, including the availability of opportunities for the acquisition of mortgage-related assets, the level and volatility of interest rates, readily accessible short- and long-term funding alternatives in the financial markets and economic conditions. Moreover, delays in investing the proceeds of any prepayments or repayments on our mortgage-back securities or the net proceeds of any future offering may cause our performance to be weaker than other fully invested mortgage REITs pursuing comparable investment strategies. You will not have the opportunity to evaluate the manner in which we invest or the economic merits of particular assets to be acquired. Furthermore, we face the risk that we might not successfully operate our business or implement our operating policies and strategies as described in this prospectus.

Our investment guidelines permit us to invest up to 10% of our assets in unrated mortgage-related assets, including mortgage-backed securities rated below investment-grade, which carry a greater likelihood of default or rating downgrade than investments in investment-grade mortgage-backed securities and may cause us to suffer losses.

Our asset acquisition policy provides us with the ability to acquire significant amounts of lower credit quality mortgage-related assets, including mortgage-backed securities that are not rated at least investment grade by at least one nationally-recognized statistical rating organization. Under our policy, up to 10% of our total assets may be non-investment grade mortgage-backed securities or other investments such as leveraged mortgage derivative securities, shares of other REITs, mortgage loans or other mortgage-related investments. If we acquire non-investment-grade mortgage-backed securities, we are more likely to incur losses because the mortgages underlying those securities are made to borrowers possessing lower-quality credit. While all agency certificates are subject to a risk of default, that risk is greater with non-investment grade mortgage-backed securities. In addition, the rating agencies are more likely to downgrade the credit quality of those securities, which would reduce the value of those securities.

Interest rate mismatches between our adjustable-rate and hybrid adjustable-rate mortgage-backed securities and the borrowings used to fund our purchases of such mortgage-backed securities might reduce our net income or result in a loss during periods of changing interest rates.

We invest primarily in adjustable-rate and hybrid adjustable-rate mortgage-backed securities. The mortgages underlying adjustable-rate mortgage-backed securities have interest rates that reset periodically, typically every six months or on an annual basis, based upon market-based indices of interest rates such as U.S. Treasury bonds or LIBOR. The mortgages underlying hybrid adjustable-rate mortgage-backed securities have interest rates that are fixed

for the first few years of the loan typically three, five, seven or 10 years and thereafter their interest rates reset periodically similar to the mortgages underlying adjustable-rate mortgage-backed securities. We have funded our acquisitions and expect to fund our future acquisitions of adjustable-rate and hybrid adjustable-rate mortgage-backed securities in part with borrowings that have interest rates based on indices and repricing terms similar to, but with shorter maturities than, the interest rate indices and repricing terms of the adjustable-rate and hybrid adjustable-rate mortgage-backed securities. On September 30, 2003, approximately 97% of our investment portfolio was invested in adjustable-rate or hybrid adjustable-rate mortgage-backed securities having a weighted average term to next rate adjustment of approximately 44 months, while our borrowings had a weighted average term of approximately 254 days. The phrase weighted average term to next rate adjustment refers to the average of the periods of time that must elapse before the interest rates adjust for all of the mortgages underlying our adjustable-rate and hybrid adjustable-rate mortgage-backed securities in our portfolio, which average is weighted in proportion to the book values of the applicable securities. During periods of changing interest rates, this interest rate mismatch between our assets and liabilities could reduce or eliminate our net income and distributions to our stockholders and could cause us to suffer a loss.

Accordingly, in a period of rising interest rates, we could experience a decrease in, or elimination of, net income or a net loss because the interest rates on our borrowings adjust faster than the interest rates on our adjustable-rate mortgage-backed securities.

Table of Contents

Increased levels of prepayments on the mortgages underlying our mortgage-backed securities might decrease our net interest income or result in a net loss.

The mortgage-backed securities that we acquire generally represent interests in pools of mortgage loans. The principal and interest payments we receive from our mortgage-backed securities are generally funded by the payments that mortgage borrowers make on those underlying mortgage loans. When borrowers pre-pay their mortgage loans sooner than expected, corresponding prepayments on the mortgage-backed securities occur sooner than expected by the marketplace. Sooner-than-expected prepayments could harm our results of operations in the following ways, among others:

We seek to purchase mortgage-backed securities that we believe to have favorable risk-adjusted expected returns relative to market interest rates at the time of purchase. If the coupon interest rate for a mortgage-backed security is higher than the market interest rate at the time it is purchased, then that mortgage-backed security will be acquired at a premium to its par value. As of December 31, 2003, all of the mortgage-backed securities in our portfolio were purchased at a premium to their par value and our portfolio had a weighted-average amortized cost of 102.2. In accordance with applicable accounting rules, we are required to amortize any premiums or discounts related to our mortgage-backed securities over their expected terms. The amortization of a premium reduces interest income, while the amortization of a discount increases interest income. The expected terms for mortgage-backed securities are a function of the prepayment rates for the mortgages underlying the mortgage-backed securities. Mortgage-backed securities that are at a premium to their par value are more likely to experience prepayment of some or all of their principal through refinancings. If the mortgages underlying our premium mortgage-backed securities are prepaid in whole or in part more quickly than their respective maturity dates, then we must also amortize their respective premiums more quickly, which would decrease our net interest income and harm our profitability.

A substantial portion of our adjustable-rate mortgage-backed securities may bear interest at rates that are lower than their fully-indexed rates, which refers to their applicable index rates plus a margin. If an adjustable-rate mortgage-backed security is prepaid prior to or soon after the time of adjustment to a fully-indexed rate, we will have held that mortgage-backed security while it was less profitable and lost the opportunity to receive interest at the fully-indexed rate over the remainder of its expected life.

If we are unable to acquire new mortgage-backed securities to replace the prepaid mortgage-backed securities, our financial condition, results of operations and cash flow may suffer and we could incur losses.

Prepayment rates generally increase when interest rates fall and decrease when interest rates rise, but changes in prepayment rates are difficult to predict. Prepayment rates also may be affected by other factors, including, without limitation, conditions in the housing and financial markets, general economic conditions and the relative interest rates on adjustable-rate and fixed-rate mortgage loans. While we seek to minimize prepayment risk, we must balance prepayment risk against other risks and the potential returns of each investment when selecting investments. No strategy can completely insulate us from prepayment or other such risks.

We may incur increased borrowing costs related to repurchase agreements that would harm our results of operations.

Our borrowing costs under repurchase agreements are generally adjustable and correspond to short-term interest rates, such as LIBOR or a short-term Treasury index, plus or minus a margin. The margins on these borrowings over or under short-term interest rates may vary depending upon a number of factors, including, without limitation:

the movement of interest rates;

the availability of financing in the market; and

the value and liquidity of our mortgage-backed securities.

Most of our borrowings are collateralized borrowings in the form of repurchase agreements. If the interest rates on these repurchase agreements increase, our results of operations will be harmed and we may have losses.

Interest rate caps related to our adjustable-rate and hybrid adjustable-rate mortgage-backed securities may reduce our income or cause us to suffer a loss during periods of rising interest rates.

The mortgages underlying our adjustable-rate and hybrid adjustable-rate mortgage-backed securities are typically subject to periodic and lifetime interest rate caps. Periodic interest rate caps limit the amount that the interest rate of a mortgage can increase during any given period. Lifetime interest rate caps limit the amount an interest rate can increase through the maturity of a mortgage. As of September 30, 2003, approximately 97% of our mortgage-backed securities were based on adjustable-rate or hybrid adjustable-rate mortgages, substantially all of which were subject to interest rate caps. The percentage of adjustable-rate and hybrid

Table of Contents

adjustable-rate mortgage-backed securities in our investment portfolio as of June 30, 2003, and September 30, 2003, which are subject to periodic interest rate caps every six months or annually, are set forth in the following table:

<u>Term of Periodic Reset</u>	<u>June 30, 2003</u>	<u>September 30, 2003</u>
Six months	12.1%	13.1%
12 months	87.9%	86.9%

Our borrowings are not subject to similar restrictions. The periodic adjustments to the interest rates of the mortgages underlying our adjustable-rate and hybrid adjustable-rate mortgage-backed securities are based on changes in an objective index. Substantially all of the mortgages underlying our adjustable-rate and hybrid adjustable-rate mortgage-backed securities adjust their interest rates based on one of two main indices, the U.S. Treasury index, a monthly or weekly average yield of benchmark U.S. Treasury securities as published by the Federal Reserve Board, or LIBOR, the interest rate that banks in London offer for deposits in London of U.S. dollars. The percentages of the mortgages underlying the adjustable-rate and hybrid adjustable-rate mortgage-backed securities in our investment portfolio as of June 30, 2003, and September 30, 2003 with interest rates that reset based on the U.S. Treasury or LIBOR indices are set forth in the table below:

<u>Reference Index</u>	<u>June 30, 2003</u>	<u>September 30, 2003</u>
U.S. Treasury	50.1%	50.8%
LIBOR	49.9%	49.2%

Accordingly, in a period of rapidly increasing interest rates, the interest rates paid on our borrowings could increase without limitation while interest rate caps could limit the increases in the yields on our adjustable-rate and hybrid adjustable-rate mortgage-backed securities. This problem is magnified for adjustable-rate and hybrid adjustable-rate mortgage-backed securities that are not fully indexed. Further, some of the mortgages underlying our adjustable-rate and hybrid adjustable-rate mortgage-backed securities may be subject to periodic payment caps that result in a portion of the interest being deferred and added to the principal outstanding. As a result, we may receive less cash income on adjustable-rate and hybrid adjustable-rate mortgage-backed securities than we need to pay interest on our related borrowings. These factors could reduce our net interest income or cause us to suffer a net loss.

We might experience reduced net interest income or a loss from holding fixed-rate investments during periods of rising interest rates.

A significant portion of our investment portfolio consists of hybrid adjustable-rate mortgage-backed securities. As of December 31, 2003, approximately 88.9% of our investment portfolio consisted of hybrid adjustable-rate mortgage-backed securities. We may also invest in fixed-rate mortgage-backed securities from time to time, however, as of December 31, 2003, none of our portfolio consisted of fixed-rate mortgage-backed securities. We fund our acquisition of fixed-rate mortgage-backed securities, including those based on balloon maturity and hybrid adjustable-rate mortgages, in part with short-term repurchase agreements and term loans. During periods of rising interest rates, our costs associated with borrowings used to fund the acquisition of fixed-rate mortgage-backed securities assets are subject to increases while the income we earn from these assets remains substantially fixed. This would reduce and could eliminate the net interest spread between the fixed-rate mortgage-backed securities that we purchase and our borrowings used to purchase them, which would reduce our net interest income and could cause us

to suffer a loss.

Our leverage strategy increases the risks of our operations, which could reduce our net income and the amount available for distributions or cause us to suffer a loss.

As of December 31, 2003, we had indebtedness of approximately \$1.7 billion. We generally seek to borrow between eight and 12 times the amount of our equity, although at times our borrowings may be above or below this amount. We incur this indebtedness by borrowing against a substantial portion of the market value of our mortgage-backed securities. Our total indebtedness, however, is not expressly limited by our policies and will depend on our and our prospective lender's estimate of the stability of our portfolio's cash flow. We face the risk that we might not be able to meet our debt service obligations or a lender's margin requirements from our income and, to the extent we cannot, we might be forced to liquidate some of our assets at disadvantageous prices. Our use of leverage amplifies the risks associated with other risk factors, which could reduce our net income and the amount available for distributions or cause us to suffer a loss. For example:

A majority of our borrowings are secured by our mortgage-backed securities, generally under repurchase agreements. A decline in the market value of the mortgage-backed securities used to secure these debt obligations could limit our ability to borrow or result in lenders requiring us to pledge additional collateral to secure our borrowings. In that situation, we could be required to sell mortgage-backed securities under adverse market conditions in order to obtain the additional

Table of Contents

collateral required by the lender. If these sales are made at prices lower than the carrying value of the mortgage-backed securities, we would experience losses.

A default under a mortgage-related asset that constitutes collateral for a loan could also result in an involuntary liquidation of the mortgage-related asset, including any cross-collateralized mortgage-backed securities. This would result in a loss to us of the difference between the value of the mortgage-related asset upon liquidation and the amount borrowed against the mortgage-related asset.

To the extent we are compelled to liquidate qualified REIT assets to repay debts, our compliance with the REIT rules regarding our assets and our sources of income could be negatively affected, which would jeopardize our status as a REIT. Losing our REIT status would cause us to lose tax advantages applicable to REITs and would decrease our overall profitability and distributions to our stockholders.

If we experience losses as a result of our leverage policy, such losses would reduce the amounts available for distribution to our stockholders.

We might not be able to use derivatives to mitigate our interest rate and prepayment risks.

Our policies permit us to enter into interest rate swaps, caps and floors and other derivative transactions to help us reduce our interest rate and prepayment risks. As of September 30, 2003, we were not a counterparty to any derivative arrangements. Between November 21, 2003 and December 31, 2003, we engaged in a short sale of Euro dollar futures contracts in order to hedge the impact of changes in interest rates on our liability costs. In the future, these transactions might mitigate our interest rate and prepayment risks, but cannot eliminate these risks. Moreover, the use of derivative transactions could have a negative impact on our earnings and our status as a REIT, and, therefore, our use of such derivatives could be limited.

We may enter into ineffective derivative transactions or other hedging activities that may reduce our net interest income or cause us to suffer losses.

Our policies permit us to, but we are not required to, enter into derivative transactions such as interest rate swaps, caps and floors and other derivative transactions to help us seek to reduce our interest rate and prepayment risks. The effectiveness of any derivative transactions will depend significantly upon whether we correctly quantify the interest rate or prepayment risks being hedged, our execution of and ongoing monitoring of our hedging activities, and the treatment of such hedging activities for GAAP accounting purposes.

Subsequent to September 30, 2003, we engaged in short sales of Euro dollar futures contracts in order to hedge the impact of changes in interest rates on our liability costs. Between November 21, 2003 and December 16, 2003 we sold short 1,725 Euro dollar futures contracts, which expire in March 2004, June 2004 and September 2004, with a notional amount totaling \$1,725.0 million. In the case of these hedges, and any other future efforts to hedge the effects of interest rate changes on our liability costs, if we enter into hedging instruments that have higher interest rates embedded in them as a result of the forward yield curve, and at the end of the term of these hedging instruments the spot market interest rates for the liabilities that we hedged are actually lower, then we will have locked in higher interest rates for our liabilities than would be available in the spot market at the time and this could result in a narrowing of our net interest rate margin or result in losses. In some situations, we may sell assets or hedging instruments at a loss in order to maintain adequate liquidity.

In addition, we will apply SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted, and record any derivatives at fair value. If the derivatives meet the criteria to be accounted for as hedging transactions, the effects of the transactions could be materially different as to timing than if they do not qualify as hedges, and this may cause a narrowing of our net interest rate margin or result in losses.

An increase in interest rates might adversely affect our book value.

We use changes in 10-year U.S. Treasury yields as a reference indicator for changes in interest rates because it is a common market benchmark. Between June 1, 2003 and September 30, 2003, the 10-year U.S. Treasury yield ranged from a low of 3.11% on June 13, 2003 to a high of 4.60% on September 2, 2003, an increase of approximately 48%. Increases in the general level of interest rates can cause the fair market value of our assets to decline, particularly those mortgage-backed securities whose underlying mortgages have fixed-rate components. Our fixed-rate mortgage securities and our hybrid adjustable-rate mortgage-backed securities (during the fixed-rate component of the mortgages underlying such securities) will generally be more negatively affected by such increases than our adjustable-rate mortgage securities. In accordance with GAAP, we will be required to reduce the carrying value of our mortgage-backed securities by the amount of any decrease in the fair value of our mortgage-backed securities compared to their respective amortized costs. If unrealized losses in fair value occur, we will have to either reduce current earnings

Table of Contents

or reduce stockholders' equity without immediately affecting current earnings, depending on how we classify such mortgage-backed securities under GAAP. In either case, our net book value will decrease to the extent of any realized or unrealized losses in fair value.

We may invest in leveraged mortgage derivative securities that generally experience greater volatility in market prices, and thus expose us to greater risk with respect to their rate of return.

We may acquire leveraged mortgage derivative securities that expose us to a high level of interest rate risk. The characteristics of leveraged mortgage derivative securities cause those securities to experience greater volatility in their market prices. Thus, acquisition of leveraged mortgage derivative securities will expose us to the risk of greater volatility in our portfolio, which could reduce our net income and harm our overall results of operations.

We depend on borrowings to purchase mortgage-related assets and reach our desired amount of leverage. If we fail to obtain or renew sufficient funding on favorable terms or at all, we will be limited in our ability to acquire mortgage-related assets, which will harm our results of operations.

We depend on short-term borrowings to fund acquisitions of mortgage-related assets and reach our desired amount of leverage. Accordingly, our ability to achieve our investment and leverage objectives depends on our ability to borrow money in sufficient amounts and on favorable terms. In addition, we must be able to renew or replace our maturing short-term borrowings on a continuous basis. We depend on a few lenders to provide the primary credit facilities for our purchases of mortgage-related assets. In addition, our existing indebtedness may limit our ability to make additional borrowings. If our lenders do not allow us to renew our borrowings or we cannot replace maturing borrowings on favorable terms or at all, we might have to sell our mortgage-related assets under adverse market conditions, which would harm our results of operations and may result in permanent losses.

Possible market developments could cause our lenders to require us to pledge additional assets as collateral. If our assets are insufficient to meet the collateral requirements, we might be compelled to liquidate particular assets at inopportune times and at disadvantageous prices.

Possible market developments, including a sharp or prolonged rise in interest rates, a change in prepayment rates or increasing market concern about the value or liquidity of one or more types of mortgage-backed securities in which our portfolio is concentrated, might reduce the market value of our portfolio, which might cause our lenders to require additional collateral. Any requirement for additional collateral might compel us to liquidate our assets at inopportune times and at disadvantageous prices, thereby harming our operating results. If we sell mortgage-backed securities at prices lower than the carrying value of the mortgage-backed securities, we would experience losses.

Our use of repurchase agreements to borrow funds may give our lenders greater rights in the event that either we or any of our lenders file for bankruptcy.

Our borrowings under repurchase agreements may qualify for special treatment under the bankruptcy code, giving our lenders the ability to avoid the automatic stay provisions of the bankruptcy code and to take possession of and liquidate our collateral under the repurchase agreements without delay if we file for bankruptcy. Furthermore, the special treatment of repurchase agreements under the bankruptcy code may make it difficult for us to recover our pledged assets in the event that our lender files for bankruptcy. Thus, the use of repurchase agreements exposes our pledged assets to risk in the event of a bankruptcy filing by either our lender or us.

Because the assets that we acquire might experience periods of illiquidity, we might be prevented from selling our mortgage-related assets at opportune times and prices.

We bear the risk of being unable to dispose of our mortgage-related assets at advantageous times and prices or in a timely manner because mortgage-related assets generally experience periods of illiquidity. The lack of liquidity might result from the absence of a willing buyer or an established market for these assets, as well as legal or contractual restrictions on resale. If we are unable to sell our mortgage-related assets at opportune times, we might suffer a loss and/or reduce our distributions.

Our board of directors may change our operating policies and strategies without prior notice or stockholder approval and such changes could harm our business and results of operations and the value of our stock.

Our board of directors has the authority to modify or waive our current operating policies and our strategies (including our election to operate as a REIT) without prior notice and without stockholder approval. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, operating results and value of our stock. However, the effects might be adverse.

Table of Contents

Competition might prevent us from acquiring mortgage-backed securities at favorable yields, which would harm our results of operations.

Our net income depends on our ability to acquire mortgage-backed securities at favorable spreads over our borrowing costs. In acquiring mortgage-backed securities, we compete with other REITs, investment banking firms, savings and loan associations, banks, insurance companies, mutual funds, other lenders and other entities that purchase mortgage-backed securities, many of which have greater financial resources than we do. As a result, we may not be able to acquire sufficient mortgage-backed securities at favorable spreads over our borrowing costs, which would harm our results of operations.

Defaults on the mortgage loans underlying our mortgage-backed securities may reduce the value of our investment portfolio and may harm our results of operations.

We bear the risk of any losses resulting from any defaults on the mortgage loans underlying the mortgage-backed securities in our investment portfolio. Many of the mortgage-backed securities that we obtain will have one or more forms of credit enhancement provided by third parties, such as insurance against risk of loss due to default on the underlying mortgage loans or bankruptcy, fraud and special hazard losses. To the extent that third parties have been contracted to insure against these types of losses, the value of such insurance will depend in part on the creditworthiness and claims-paying ability of the insurer and the timeliness of reimbursement in the event of a default on the underlying obligations. Further, the insurance coverage for various types of losses is limited in amount, and losses in excess of these limitations would be borne by us.

Other mortgage-backed securities that we purchase will be subject to limited guarantees of the payment of limited amounts of principal and interest on mortgage loans underlying such mortgage-backed securities, either by federal government agencies, including Ginnie Mae, by federally-chartered corporations, including Fannie Mae and Freddie Mac, or by other corporate guarantors. While Ginnie Mae's obligations are backed by the full faith and credit of the United States, the obligations of Fannie Mae and Freddie Mac and other corporate guarantors are solely their own. As a result, a substantial deterioration in the financial strength of Fannie Mae, Freddie Mac or other corporate guarantors could increase our exposure to future delinquencies, defaults or credit losses on our holdings of Fannie Mae or Freddie Mac-backed mortgage-backed securities or other corporate-backed mortgage-backed securities, and could harm our results of operations. In addition, while Freddie Mac guarantees the eventual payment of principal, it does not guarantee the timely payment thereof, and our results of operations may be harmed if borrowers are late or delinquent in their payments on mortgages underlying Freddie Mac-backed mortgage-backed securities. Moreover, Fannie Mae, Freddie Mac, Ginnie Mae and other corporate guarantees relate only to payments of limited amounts of principal and interest on the mortgages underlying such agency-backed or corporate-backed securities, and do not guarantee the market value of such mortgage-backed securities or the yields on such mortgage-backed securities. As a result, we remain subject to interest rate risks, prepayment risks, extension risks and other risks associated with our investment in such mortgage-backed securities and may experience losses in our investment portfolio.

We remain subject to losses despite our strategy of investing in highly-rated mortgage-backed securities.

Our investment guidelines provide that at least 90% of our assets must be invested in mortgage-backed securities that are either agency-backed or are rated at least investment grade by at least one rating agency. While highly-rated mortgage-backed securities are generally subject to a lower risk of default than lower credit quality mortgage-backed securities and may benefit from third-party credit enhancements such as insurance or corporate guarantees, there is no assurance that such mortgage-backed securities will not be subject to credit losses. Furthermore, ratings are subject to change over time as a result of a number of factors, including greater than expected delinquencies, defaults or credit losses, or a deterioration in the financial strength of corporate guarantors, any of which may reduce the market value of such securities. Furthermore, ratings do not take into account the reasonableness of the issue price, interest risks,

prepayment risks, extension risks or other risks associated with such mortgage-backed securities. As a result, while we attempt to mitigate our exposure to credit risk on a relative basis by focusing on highly-rated mortgage-backed securities, we cannot eliminate such credit risks and remain subject to other risks to our investment portfolio and may suffer losses, which may harm the market price of our common stock.

Decreases in the value of the property underlying our mortgage-backed securities might decrease the value of our assets.

The mortgage-backed securities in which we invest are secured by underlying real property interests. To the extent that the value of the property underlying our mortgage-backed securities decreases, our security might be impaired, which might decrease the value of our assets.

Insurance will not cover all potential losses on the underlying real property and the absence thereof may harm the value of our assets.

Under our asset acquisition policy, we are permitted to invest up to a maximum of 10% of our total assets in assets other than mortgage-backed securities guaranteed by federal agencies or federally chartered entities such as Fannie Mae, Freddie Mac or

Table of Contents

Ginnie Mae, or rated as at least investment grade by a nationally recognized statistical rating agency. Mortgage loans fall outside of this category of investments under our investment guidelines and are subject to the 10% limitation. If we elect in the future to purchase mortgage loans, we may require that each of the mortgage loans that we purchase include comprehensive insurance covering the underlying real property, including liability, fire and extended coverage. There are certain types of losses, however, generally of a catastrophic nature, such as earthquakes, floods and hurricanes, that may be uninsurable or not economically insurable. Inflation, changes in building codes and ordinances, environmental considerations, and other factors also might make it infeasible to use insurance proceeds to replace a property if it is damaged or destroyed. Under such circumstances, the insurance proceeds, if any, might not be adequate to restore the economic value of the underlying real property, which might impair our security and decrease the value of our assets.

Distressed mortgage loans have higher risk of future default.

If we elect in the future to purchase mortgage loans, we may purchase distressed mortgage loans as well as mortgage loans that have had a history of delinquencies. These distressed mortgage loans may be in default or may have a greater than normal risk of future defaults and delinquencies, as compared to a pool of newly-originated, high quality loans of comparable type, size and geographic concentration. Returns on an investment of this type depend on accurate pricing of such investment, the borrower's ability to make required payments or, in the event of default, the ability of the loan's servicer to foreclose and liquidate the mortgage loan. We cannot assure you that the servicer will be able to liquidate a defaulted mortgage loan in a cost-effective manner, at an advantageous price or in a timely manner.

Subordinated loans on real estate are subject to higher risks.

If we elect in the future to purchase mortgage loans, we may acquire loans secured by commercial properties, including loans that are subordinate to first liens on the underlying commercial real estate. Subordinated mortgage loans are subject to greater risks of loss than first lien mortgage loans. An overall decline in the real estate market could reduce the value of the real property securing such loans such that the aggregate outstanding balance of the second-lien loan and the balance of the more senior loan on the real property exceed the value of the real property.

We depend on our key personnel and the loss of any of our key personnel could severely and detrimentally affect our operations.

We depend on the diligence, experience and skill of our officers and the people working on behalf of our manager for the selection, acquisition, structuring and monitoring of our mortgage-related assets and associated borrowings. Our key officers include Gail Seneca, Albert Gutierrez, Christopher Zyda, Andrew Chow and Troy Grande. We have not entered into employment agreements with our senior officers other than Mr. Zyda, who is our senior vice president and chief financial officer. With the exception of Mr. Zyda, we do not currently employ personnel dedicated solely to our business, and our officers (other than Mr. Zyda) are free to engage in competitive activities in our industry. The loss of any key person could harm our business, financial condition, cash flow and results of operations.

Risks Related to Our Manager

Seneca has not managed a REIT and we cannot assure you that Seneca's past experience will be sufficient to successfully manage our business as a REIT.

Seneca Capital Management LLC has not previously managed a REIT, and does not have any experience in complying with the income, asset and other limitations imposed by the REIT provisions of the Internal Revenue Code. Those provisions are complex and the failure to comply with those provisions in a timely manner could prevent us

from qualifying as a REIT or could force us to pay unexpected taxes and penalties. In such event, our net income would be reduced and we could incur a loss.

Our manager has significant influence over our affairs, and might cause us to engage in transactions that are not in our or our stockholders best interests.

In addition to managing us and having at least two of its designees as members of our board, Seneca provides advice on our operating policies and strategies. Seneca may also cause us to engage in future transactions with Seneca and its affiliates, subject to the approval of, or guidelines approved by, the independent members of our board of directors. Our directors, however, rely primarily on information supplied by our manager in reaching their determinations. Accordingly, our manager has significant influence over our affairs, and may cause us to engage in transactions which are not in our best interest.

Table of Contents

Our manager and its affiliates might allocate mortgage-related opportunities to other entities, and thus might divert attractive investment opportunities away from us.

Our operations and assets are managed by specified individuals at Seneca. Seneca and its affiliates, including some of our officers, manage portfolios for parties unrelated to us. These multiple responsibilities might create conflicts of interest for Seneca and these individuals if they are presented with opportunities that might benefit us and their other clients. Seneca and these individuals must allocate investments among our portfolio and their other clients by determining the entity or account for which the investment is most suitable. In making this determination, Seneca and these individuals consider the investment strategy and guidelines of each entity or account with respect to acquisition of assets, leverage, liquidity and other factors that Seneca and these individuals determine appropriate. However, Seneca and those working on its behalf have no obligation to make any specific investment opportunities available to us and the above-mentioned conflicts of interest might result in decisions or allocations of investments that are not in our or our stockholders' best interests.

We will pay Seneca incentive compensation based on our portfolio's performance. This arrangement may lead Seneca to recommend riskier or more speculative investments in an effort to maximize its incentive compensation.

In addition to its base management fee, Seneca earns incentive compensation for each fiscal quarter equal to a specified percentage of the amount by which our return on equity, before deducting incentive compensation, exceeds a return based on the 10 year U.S. Treasury rate plus 2%. The percentage for this calculation is the weighted average of the following percentages based on our average net invested assets for the period:

20% for the first \$400 million of our average net invested assets; and

10% of our average net invested assets in excess of \$400 million.

During the quarter ended September 30, 2003 Seneca earned, but subsequently waived its right to receive, incentive fees of \$613,247. The waived incentive fee was expensed in the quarter ended September 30, 2003 and has been accounted for as a capital contribution as of September 30, 2003. Seneca's waiver applies only to the third quarter of 2003. For the quarter ended December 31, 2003, the total incentive fee earned by Seneca was \$606 thousand, one-half payable in cash and one-half payable in the form of the our common stock. The cash portion of the incentive fee of \$303 thousand for the quarter ended December 31, 2003 was expensed in that period as well as 15.2% of the restricted stock portion of the incentive fees, or \$46 thousand.

Pursuant to the formula for calculating Seneca's incentive compensation, Seneca shares in our profits but not in our losses. Consequently, as Seneca evaluates different mortgage-backed securities and other investments for our account, there is a risk that Seneca will cause us to assume more risk than is prudent in an attempt to increase its incentive compensation. Other key criteria related to determining appropriate investments and investment strategies, including the preservation of capital, might be under-weighted if Seneca focuses exclusively or disproportionately on maximizing its income.

We may be obligated to pay Seneca incentive compensation even if we incur a loss.

Pursuant to the management agreement, Seneca is entitled to receive incentive compensation for each fiscal quarter in an amount equal to a tiered percentage of the excess of our taxable income for that quarter (before deducting incentive compensation, net operating losses and certain other items) above a threshold return for that quarter. In addition, the management agreement further provides that our taxable income for incentive compensation purposes excludes net capital losses that we may incur in the fiscal quarter, even if such capital losses result in a net loss on our statement of operations for that quarter. Thus, we may be required to pay Seneca incentive compensation for a fiscal

quarter even if there is a decline in the value of our portfolio or we incur a net loss for that quarter. For example, we incurred a net loss for the quarter ended September 30, 2003 of \$2.8 million, however, taxable income for purposes of calculating the incentive compensation for the same period was \$6.0 million. As a result, taxable income for incentive compensation purposes was greater than the threshold return taxable income of \$2.9 million and, therefore, incentive compensation of \$613,247 was earned by Seneca. Although Seneca was entitled to receive incentive compensation for the quarter ended September 30, 2003, Seneca voluntarily waived on a one-time basis its right to incentive compensation for this period. There is no expectation that Seneca will waive its right to incentive compensation in the future.

During periods of declining market prices for shares of our common stock, we may be required to issue greater numbers of shares to Seneca for the same amount of incentive compensation arising under the management agreement, which will have a dilutive effect on our stockholders that may harm the market price of our common stock.

Pursuant to the terms of the management agreement, the incentive compensation payable to Seneca for each fiscal quarter is paid one-half in cash and one-half in restricted shares of our common stock. The number of shares to be issued to Seneca is based on (a) one-half of the total incentive compensation for the period, divided by (b) the fair value of the shares on the last date of the

Table of Contents

period for which the incentive compensation is calculated, less a fair market value discount determined by our board of directors. During periods of declining market prices for shares of our common stock, we may be required to issue more shares to Seneca for the same amount of incentive compensation. Although these shares will initially be subject to restrictions on transfer which lapse ratably over a three-year period, the issuance of these shares will have a dilutive effect on our stockholders which may harm the market price of our common stock.

Because Seneca might receive a significant fee if we terminate the management agreement, economic considerations might preclude us from terminating the management agreement in the event that Seneca fails to meet our expectations.

If we terminate the management agreement without cause or because we decide to manage our company internally or if Seneca terminates the management in the event of a change of control, then we will have to pay a significant fee to Seneca. The amount of the fee depends on whether:

we terminate the management agreement without cause in connection with a decision to manage our portfolio internally, in which case we will be obligated to pay to Seneca a fee equal to the highest amount of management fees incurred in a particular year during the then three most recent years; or

our decision to terminate the management agreement without cause is for a reason other than our decision to manage our portfolio internally, in which case we will be obligated to pay Seneca an amount equal to two times the highest amount of management fees incurred in a particular year during the then three most recent years.

In each of the above cases, Seneca will also receive accelerated vesting of the equity component of its incentive compensation. The actual amount of such fee cannot be known at this time because it is based in part on the performance of our portfolio of mortgage-backed securities. Paying this fee would reduce significantly the cash available for distribution to our stockholders and might cause us to suffer a net operating loss. Consequently, terminating the management agreement might not be advisable even if we determine that it would be more efficient to operate with an internal management structure or if we are otherwise dissatisfied with Seneca's performance.

Investors may not be able to estimate with certainty the aggregate fees and expense reimbursements that will be paid to Seneca under the management agreement and the cost-sharing agreement due to the time and manner in which Seneca's incentive compensation and expense reimbursements are determined.

Seneca may be entitled to substantial fees pursuant to the management agreement. Base management fees to Seneca under the management agreement, are based on a percentage of our average net worth and were \$85 thousand for the three months ended June 30, 2003, \$399 thousand for the three months ended September 30, 2003, and \$417 thousand for the three months ended December 31, 2003. Average net worth for these purposes is calculated on a monthly basis and equals the difference between the aggregate book value of our consolidated assets prior to accumulated depreciation and other non-cash items, including the fair market value adjustment on mortgage-backed securities, minus the aggregate book value of our consolidated liabilities. Seneca's incentive compensation is calculated as a tiered percentage of our taxable income (before deducting certain items) in excess of a threshold amount of taxable income and is indeterminable in advance of a particular period. We did not pay Seneca any incentive compensation for the three months ended June 30, 2003 and, for the three months ended September 30, 2003 Seneca waived its right to incentive compensation. The incentive fee was expensed in the quarter ended September 30, 2003 and the waived incentive fee has been accounted for as a capital contribution as of September 30, 2003. From inception through December 31, 2003, aggregate out-of-pocket expenses that have been accrued and/or paid to Seneca and/or its affiliates under the management agreement and expenses accrued for reimbursement to Seneca but not yet paid under the cost-sharing agreement were approximately \$1.3 million and \$6 thousand, respectively. Since future payments of base management fees, incentive compensation and expense reimbursements are determined at future dates based upon our then-applicable average net worth, results of operations and actual expenses incurred by Seneca,

such fees and expense reimbursements cannot be estimated with mathematical certainty. Any base management fees, incentive compensation or expense reimbursements payable to Seneca may be materially greater or less than the historical amounts set forth above and we can provide no assurance at this time as to the amount of any such base management fee, incentive compensation or expense reimbursements that may be payable to Seneca in the future.

Seneca may render services to other mortgage investors, which could reduce the amount of time and effort that Seneca devotes to us.

Our management agreement with Seneca does not restrict the right of Seneca, any persons working on its behalf or any of its affiliates, to carry on their respective businesses, including the rendering of advice to others regarding the purchase of mortgage-backed securities that would meet our investment criteria. In addition, the management agreement does not specify a minimum time period that Seneca and its personnel must devote to managing our investments. The ability of Seneca to engage in these other

Table of Contents

business activities, and specifically to manage mortgage-related assets for third parties, could reduce the time and effort it spends managing our portfolio to the detriment of our investment returns.

Seneca's liability is limited under the management agreement, and we have agreed to indemnify Seneca against certain liabilities.

Seneca has not assumed any responsibility to us other than to render the services described in the management agreement, and will not be responsible for any action of our board of directors in declining to follow Seneca's advice or recommendations. Seneca and its directors, officers and employees will not be liable to us for acts performed by its officers, directors, or employees in accordance with and pursuant to the management agreement, except for acts constituting gross negligence, recklessness, willful misconduct or active fraud in connection with their duties under the management agreement. We have agreed to indemnify Seneca and its directors, officers and employees with respect to all expenses, losses, damages, liabilities, demands, charges and claims arising from acts of Seneca not constituting gross negligence, recklessness, willful misconduct or active fraud.

Legal and Tax Risks

If we are disqualified as a REIT, we will be subject to tax as a regular corporation and face substantial tax liability.

Qualification as a REIT involves the application of highly technical and complex U.S. federal income tax code provisions for which only a limited number of judicial or administrative interpretations exist. Accordingly, it is not certain we will be able to become and remain qualified as a REIT for U.S. federal income tax purposes. Even a technical or inadvertent mistake could jeopardize our REIT status. Furthermore, Congress or the Internal Revenue Service, or IRS, might change tax laws or regulations and the courts might issue new rulings, in each case potentially having retroactive effect, that could make it more difficult or impossible for us to qualify as a REIT. If we fail to qualify as a REIT in any tax year, then:

we would be taxed as a regular domestic corporation, which, among other things, means that we would be unable to deduct distributions to stockholders in computing taxable income and we would be subject to U.S. federal income tax on our taxable income at regular corporate rates;

any resulting tax liability could be substantial, would reduce the amount of cash available for distribution to stockholders, and could force us to liquidate assets at inopportune times, causing lower income or higher losses than would result if these assets were not liquidated; and

unless we were entitled to relief under applicable statutory provisions, we would be disqualified from treatment as a REIT for the subsequent four taxable years following the year during which we lost our qualification and, thus, our cash available for distribution to our stockholders would be reduced for each of the years during which we did not qualify as a REIT.

Even if we remain qualified as a REIT, we might face other tax liabilities that reduce our cash flow. Further, we might be subject to federal, state and local taxes on our income and property. Any of these taxes would decrease cash available for distribution to our stockholders.

Complying with REIT requirements might cause us to forego otherwise attractive opportunities.

In order to qualify as a REIT for U.S. federal income tax purposes, we must satisfy tests concerning, among other things, our sources of income, the nature and diversification of our mortgage-backed securities, the amounts we distribute to our stockholders and the ownership of our stock. We may also be required to make distributions to our

stockholders at disadvantageous times or when we do not have funds readily available for distribution. Thus, compliance with REIT requirements may cause us to forego opportunities we would otherwise pursue.

In addition, the REIT provisions of the Internal Revenue Code impose a 100% tax on income from prohibited transactions. Prohibited transactions generally include sales of assets that constitute inventory or other property held for sale in the ordinary course of a business, other than foreclosure property. This 100% tax could impact our desire to sell mortgage-backed securities at otherwise opportune times if we believe such sales could be considered a prohibited transaction.

Complying with REIT requirements may limit our ability to hedge effectively.

The existing REIT provisions of the Internal Revenue Code substantially limit our ability to hedge mortgage-backed securities and related borrowings. Under these provisions, our annual income from qualified hedges, together with any other income not generated from qualified REIT real estate assets, is limited to less than 25% of our gross income. In addition, we must limit our

Table of Contents

aggregate income from hedging and services from all sources, other than from qualified REIT real estate assets or qualified hedges, to less than 5% of our annual gross income. As a result, we might in the future have to limit our use of advantageous hedging techniques. This could leave us exposed to greater risks associated with changes in interest rates than we would otherwise want to bear. If we were to violate the 25% or 5% limitations, we might have to pay a penalty tax equal to the amount of our income in excess of those limitations, multiplied by a fraction intended to reflect our profitability. If we fail to satisfy the 25% or 5% limitations, unless our failure was due to reasonable cause and not due to willful neglect, we could lose our REIT status for federal income tax purposes.

Complying with REIT requirements may force us to liquidate otherwise attractive investments.

In order to qualify as a REIT, we must ensure that at the end of each calendar quarter at least 75% of the value of our assets consists of cash, cash items, government securities and qualified REIT real estate assets. The remainder of our investment in securities generally cannot include more than 10% of the outstanding voting securities of any one issuer or more than 10% of the total value of the outstanding securities of any one issuer. In addition, generally, no more than 5% of the value of our assets can consist of the securities of any one issuer. If we fail to comply with these requirements, we must dispose of a portion of our assets within 30 days after the end of the calendar quarter in order to avoid losing our REIT status and suffering adverse tax consequences.

Complying with REIT requirements may force us to borrow to make distributions to our stockholders.

As a REIT, we must distribute 90% of our annual taxable income (subject to certain adjustments) to our stockholders. From time to time, we might generate taxable income greater than our net income for financial reporting purposes from, among other things, amortization of capitalized purchase premiums, or our taxable income might be greater than our cash flow available for distribution to our stockholders. If we do not have other funds available in these situations, we might be unable to distribute 90% of our taxable income as required by the REIT rules. In that case, we would need to borrow funds, sell a portion of our mortgage-backed securities potentially at disadvantageous prices or find another alternative source of funds. These alternatives could increase our costs or reduce our equity and reduce amounts available to invest in mortgage-backed securities.

Failure to maintain an exemption from the Investment Company Act, would harm our results of operations.

We intend to conduct our business so as not to become regulated as an investment company under the Investment Company Act of 1940, as amended. If we fail to qualify for this exemption, our ability to use leverage would be substantially reduced and we would be unable to conduct our business as described in this prospectus.

The Investment Company Act exempts entities that are primarily engaged in the business of purchasing or otherwise acquiring mortgages and other liens on, and interests in, real estate. Under the current interpretation of the SEC staff, in order to qualify for this exemption, we must maintain at least 55% of our assets directly in these qualifying real estate interests. Mortgage-backed securities that do not represent all of the certificates issued with respect to an underlying pool of mortgages may be treated as separate from the underlying mortgage loans and, thus, may not qualify for purposes of the 55% requirement. Therefore, our ownership of these mortgage-backed securities is limited by the provisions of the Investment Company Act.

In satisfying the 55% requirement under the Investment Company Act, we treat as qualifying interests mortgage-backed securities issued with respect to an underlying pool as to which we hold all issued certificates. If the SEC or its staff adopts a contrary interpretation of such treatment, we could be required to sell a substantial amount of our mortgage-backed securities under potentially adverse market conditions. Further, in our attempts to ensure that we at all times qualify for the exemption under the Investment Company Act, we might be precluded from acquiring mortgage-backed securities if their yield is higher than the yield on mortgage-backed securities that could be

purchased in a manner consistent with the exemption. These factors may lower or eliminate our net income.

Misplaced reliance on legal opinions or statements by issuers of mortgage-backed securities could result in a failure to comply with REIT income or assets tests.

When purchasing mortgage-backed securities, we may rely on opinions of counsel for the issuer or sponsor of such securities, or statements made in related offering documents, for purposes of determining whether and to what extent those securities constitute REIT real estate assets for purposes of the REIT asset tests and produce income that qualifies under the REIT gross income tests. The inaccuracy of any such opinions or statements may adversely affect our REIT qualification and result in significant corporate-level tax.

One-action rules may harm the value of the underlying property.

Several states have laws that prohibit more than one action to enforce a mortgage obligation, and some courts have construed the term "action" broadly. In such jurisdictions, if the judicial action is not conducted according to law, there may be no other recourse in enforcing a mortgage obligation, thereby decreasing the value of the underlying property.

Table of Contents

We may be harmed by changes in various laws and regulations.

Changes in the laws or regulations governing Seneca or its affiliates may impair Seneca's or its affiliates' ability to perform services in accordance with the management agreement. Our business may be harmed by changes to the laws and regulations affecting our manager or us, including changes to securities laws and changes to the Internal Revenue Code applicable to the taxation of REITs. New legislation may be enacted into law or new interpretations, rulings or regulations could be adopted, any of which could harm us, our manager and our stockholders, potentially with retroactive effect.

Legislation was recently enacted that reduces the maximum tax rate of non-corporate taxpayers for capital gains (for taxable years ending on or after May 6, 2003 and before January 1, 2009) and for dividends (for taxable years beginning after December 31, 2002 and before January 1, 2009) to 15%. Generally, dividends paid by REITs are not eligible for the new 15% federal income tax rate, with certain exceptions discussed at [United States Federal Income Tax Considerations Taxation of Taxable United States Stockholders Distributions Generally](#). Although this legislation does not adversely affect the taxation of REITs or dividends paid by REITs, the more favorable treatment of regular corporate dividends could cause investors who are individuals to consider stocks of other corporations that pay dividends as more attractive relative to stocks of REITs. It is not possible to predict whether this change in perceived relative value will occur, or what the effect will be on the market price of our common stock.

In addition, legislation was recently introduced in the United States House of Representatives and the United States Senate that would amend certain rules relating to REITs. Among other changes, the proposed legislation would provide the Internal Revenue Service with the ability to impose monetary penalties, rather than a loss of REIT status, for reasonable cause violations of certain tests relating to REIT qualification, and would change the formula for calculating the tax imposed for certain violations of the income tests discussed at [United States Federal Income Tax Considerations Requirements for Qualification as a REIT Income Tests](#). In general, the changes would apply to taxable years beginning after the date the legislation is enacted. As of the date hereof, it is not possible to predict with any certainty whether the proposed legislation will be enacted in its current form.

We may incur excess inclusion income that would increase the tax liability of our stockholders.

In general, dividend income that a tax-exempt entity receives from us should not constitute unrelated business taxable income as defined in Section 512 of the Internal Revenue Code. If we realize excess inclusion income and allocate it to stockholders, this income cannot be offset by net operating losses. If the stockholder is a tax-exempt entity, then this income would be fully taxable as unrelated business taxable income under Section 512 of the Internal Revenue Code. If the stockholder is foreign, it would be subject to U.S. federal income tax withholding on this income without reduction pursuant to any otherwise applicable income-tax treaty.

Excess inclusion income could result if we held a residual interest in a real estate mortgage investment conduit, or REMIC. Excess inclusion income also would be generated if we were to issue debt obligations with two or more maturities and the terms of the payments on these obligations bore a relationship to the payments that we received on our mortgage-backed securities securing those debt obligations. We generally structure our borrowing arrangements in a manner designed to avoid generating significant amounts of excess inclusion income. We do, however, enter into various repurchase agreements that have differing maturity dates and afford the lender the right to sell any pledged mortgage securities if we default on our obligations. The IRS may determine that these borrowings give rise to excess inclusion income that should be allocated among stockholders. Furthermore, some types of tax-exempt entities, including voluntary employee benefit associations and entities that have borrowed funds to acquire their shares of our common stock, may be required to treat a portion of or all of the dividends they may receive from us as unrelated business taxable income. Finally, we may invest in equity securities of other REITs and it is possible that we might receive excess inclusion income from those investments.

Risks Related to this Offering

We have not established a minimum distribution payment level and we cannot assure you of our ability to make distributions to our stockholders in the future.

We intend to make quarterly distributions to our stockholders in amounts such that we distribute all or substantially all of our taxable income in each year, subject to certain adjustments. This, along with other factors, should enable us to qualify for the tax benefits accorded to a REIT under the Internal Revenue Code. We have not established a minimum distribution payment level and our ability to make distributions might be harmed by the risk factors described in this prospectus. All distributions will be made at the discretion of our board of directors and will depend on our earnings, our financial condition, maintenance of our REIT status and such other factors as our board of directors may deem relevant from time to time. We cannot assure you that we will have the ability to make distributions to our stockholders in the future.

Table of Contents

Restrictions on ownership of a controlling percentage of our capital stock might limit your opportunity to receive a premium on our stock.

For the purpose of preserving our REIT qualification and for other reasons, our charter prohibits direct or constructive ownership by any person of more than 9.8% of the lesser of the total number or value of the outstanding shares of our common stock or more than 9.8% of the outstanding shares of our preferred stock. The constructive ownership rules in our charter are complex and may cause the outstanding stock owned by a group of related individuals or entities to be deemed to be constructively owned by one individual or entity. As a result, the acquisition of less than 9.8% of the outstanding stock by an individual or entity could cause that individual or entity to own constructively in excess of 9.8% of the outstanding stock, and thus be subject to the ownership limit in our charter. Any attempt to own or transfer shares of our common or preferred stock in excess of the ownership limit without the consent of our board of directors shall be void, and will result in the shares being transferred by operation of law to a charitable trust. These provisions might inhibit market activity and the resulting opportunity for our stockholders to receive a premium for their shares that might otherwise exist if any person were to attempt to assemble a block of shares of our stock in excess of the number of shares permitted under our charter and which may be in the best interests of our stockholders.

Certain provisions of Maryland law and our charter and bylaws could hinder, delay or prevent a change in control of our company.

Certain provisions of Maryland law, our charter and our bylaws have the effect of discouraging, delaying or preventing transactions that involve an actual or threatened change in control of our company. These provisions include the following:

Classified Board of Directors. Our board of directors is divided into three classes with staggered terms of office of three years each. The classification and staggered terms of office of our directors make it more difficult for a third party to gain control of our board of directors. At least two annual meetings of stockholders, instead of one, generally would be required to effect a change in a majority of the board of directors.

Removal of Directors. Under our charter, subject to the rights of one or more classes or series of preferred stock to elect one or more directors, a director may be removed only for cause and only by the affirmative vote of at least two-thirds of all votes entitled to be cast by our stockholders generally in the election of directors.

Number of Directors, Board Vacancies, Term of Office. Under certain amendments to our bylaws which will

become effective at such time as a class of our equity securities is registered under the Securities Exchange Act of 1934, as amended, or the Exchange Act, (which will occur upon completion of our IPO), we have elected to be subject to certain provisions of Maryland law which vest in the board of directors the exclusive right to determine the number of directors and the exclusive right, by the affirmative vote of a majority of the remaining directors, to fill vacancies on the board even if the remaining directors do not constitute a quorum. These provisions of Maryland law, which are applicable even if other provisions of Maryland law or the charter or bylaws provide to the contrary, also provide that any director elected to fill a vacancy shall hold office for the remainder of the full term of the class of directors in which the vacancy occurred, rather than the next annual meeting of stockholders as would otherwise be the case, and until his or her successor is elected and qualifies.

Limitation on Stockholder-Requested Special Meetings. Our bylaws provide that our stockholders have the right to call a special meeting only upon the written request of stockholders entitled to cast not less than a majority of all the votes entitled to be cast by the stockholders at such meeting.

Advance Notice Provisions for Stockholder Nominations and Proposals. Our bylaws require advance written notice for stockholders to nominate persons for election as directors at, or to bring other business before, any meeting of stockholders. This bylaw provision limits the ability of stockholders to make nominations of persons for election as directors or to introduce other proposals unless we are notified in a timely manner prior to the meeting.

Exclusive Authority of our Board to Amend the Bylaws. Our bylaws provide that our board of directors has the

exclusive power to adopt, alter or repeal any provision of the bylaws or to make new bylaws. Thus, our stockholders may not effect any changes to our bylaws.

Preferred Stock. Under our charter, our board of directors has authority to issue preferred stock from time to time in one or more series and to establish the terms, preferences and rights of any such series of preferred stock, all without approval of our stockholders.

Duties of Directors with Respect to Unsolicited Takeovers. Maryland law provides protection for Maryland corporations against unsolicited takeovers by limiting, among other things, the duties of the directors in unsolicited takeover situations. The duties of directors of Maryland corporations do not require them to (1) accept, recommend or respond to any proposal by a person seeking to acquire control of the corporation, (2) authorize the corporation to redeem any rights

Table of Contents

under, or modify or render inapplicable, any stockholders rights plan, (3) make a determination under the Maryland Business Combination Act or the Maryland Control Share Acquisition Act, or (4) act or fail to act solely because of the effect of the act or failure to act may have on an acquisition or potential acquisition of control of the corporation or the amount or type of consideration that may be offered or paid to the stockholders in an acquisition. Moreover, under Maryland law the act of the directors of a Maryland corporation relating to or affecting an acquisition or potential acquisition of control is not subject to any higher duty or greater scrutiny than is applied to any other act of a director. Maryland law also contains a statutory presumption that an act of a director of a Maryland corporation satisfies the applicable standards of conduct for directors under Maryland law.

Ownership Limit. In order to preserve our status as a REIT under the Internal Revenue Code, our charter generally permits any single stockholder, or any group of affiliated stockholders, from beneficially owning more than 9.8% of our outstanding common or preferred stock unless our board of directors waives or modifies this ownership limit.

Maryland Business Combination Act. The Maryland Business Combination Act provides that unless exempted, a Maryland corporation may not engage in business combinations, including mergers, dispositions of 10% or more of its assets, issuance of shares of stock and other specified transactions, with an interested stockholder or an affiliate of an interested stockholder for five years after the most recent date on which the interested stockholder became an interested stockholder, and thereafter unless specified criteria are met. An interested stockholder is generally a person owning or controlling, directly or indirectly, 10% or more of the voting power of the outstanding stock of a Maryland corporation. Our board of directors has adopted a resolution exempting our company from this statute. However, our board of directors may repeal or modify this resolution in the future, in which case the provisions of the Maryland Business Combination Act will be applicable to business combinations between our company and other persons.

Maryland Control Share Acquisition Act. Maryland law provides that control shares of a corporation acquired in a control share acquisition shall have no voting rights except to the extent approved by a vote of two-thirds of the votes eligible to be cast on the matter under the Maryland Control Share Acquisition Act. Control shares means shares of stock that, if aggregated with all other shares of stock previously acquired by the acquiror, would entitle the acquiror to exercise voting power in electing directors within one of the following ranges of the voting power: one-tenth or more but less than one-third, one-third or more but less than a majority or a majority or more of all voting power. A control share acquisition means the acquisition of control shares, subject to certain exceptions. If voting rights of control shares acquired in a control share acquisition are not approved at a stockholders meeting, then subject to certain conditions and limitations, the issuer may redeem any or all of the control shares for fair value. If voting rights of such control shares are approved at a stockholders meeting and the acquiror becomes entitled to vote a majority of the shares of stock entitled to vote, all other stockholders may exercise appraisal rights. Our bylaws contain a provision exempting acquisitions of our shares from the Maryland Control Share Acquisition Act. However, our board of directors may amend our bylaws in the future to repeal or modify this exemption, in which case any control shares of our company acquired in a control share acquisition will be subject to the Maryland Control Share Acquisition Act.

Future offerings of debt securities, which would be senior to our common stock upon liquidation, or equity securities, which would dilute our existing stockholders and may be senior to our common stock for the purposes of distributions, may harm the value of our common stock.

In the future, we may attempt to increase our capital resources by making additional offerings of debt or equity securities, including commercial paper, medium-term notes, senior or subordinated notes and classes of preferred stock or common stock. Upon the liquidation of our company, holders of our debt securities and shares of preferred stock and lenders with respect to other borrowings will receive a distribution of our available assets prior to the holders of our common stock. Additional equity offerings by us may dilute the holdings of our existing stockholders

or reduce the value of our common stock, or both. Our preferred stock, if issued, would have a preference on distributions that could limit our ability to make distributions to the holders of our common stock. Because our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Thus, our stockholders bear the risk of our future offerings reducing the market price of our common stock and diluting their stock holdings in us.

A regular trading market for our common stock might not develop, which would harm the liquidity and value of our common stock.

Our common stock is listed on the New York Stock Exchange under the symbol LUM. However, we cannot assure you that regular trading of our common stock will develop on that exchange or elsewhere or, if developed, that any such market will be sustained. Accordingly, we cannot assure you of:

the likelihood that a regular market for our common stock will develop;

the liquidity of any such market;

Table of Contents

the ability of our stockholders to sell their shares of our common stock; or

the prices that our stockholders may obtain for their shares of our common stock.

The market price and trading volume of our common stock may be volatile.

Even if an active trading market develops for our common stock after this offering, the market price of our common stock may be highly volatile and be subject to wide fluctuations. In addition, the trading volume in our common stock may fluctuate and cause significant price variations to occur. If the market price of our common stock declines significantly, you may be unable to resell your shares at or above your purchase price. We cannot assure you that the market price of our common stock will not fluctuate or decline significantly in the future. Some of the factors that could negatively affect our stock price or result in fluctuations in the price or trading volume of our common stock include:

actual or anticipated variations in our quarterly operating results or distributions;

changes in our funds from operations or earnings estimates or publication of research reports about us or the real estate industry, although there can be no assurance that any research reports about us will be published;

increases in market interest rates that lead purchasers of our shares to demand a higher yield;

changes in market valuations of similar companies;

adverse market reaction to any increased indebtedness we incur in the future;

additions or departures of key management personnel;

actions by institutional stockholders;

speculation in the press or investment community; and

general market and economic conditions.

Broad market fluctuations could harm the market price of our common stock.

The stock market has experienced extreme price and volume fluctuations that have affected the market price of many companies in industries similar or related to ours and that have been unrelated to these companies' operating performances. These broad market fluctuations could reduce the market price of our common stock. Furthermore, our operating results and prospects may be below the expectations of public market analysts and investors or may be lower than those of companies with comparable market capitalizations, which could harm the market price of our common stock.

Shares of our common stock eligible for future sale may harm our stock price.

We cannot predict the effect, if any, of future sales of shares of our common stock, or the availability of shares for future sales, on the market price of our common stock. Sales of substantial amounts of these shares of common stock, or the perception that these sales could occur, may harm prevailing market prices for our common stock. As of February 10, 2004, there are:

24,841,146 shares of outstanding common stock;

outstanding options to purchase 55,000 shares of our common stock at a weighted average exercise price of \$14.82 per share; and

an additional 943,505 shares of our common stock available for future awards under our stock incentive plans.

A total of 943,505 shares of our common stock, or 1% of our current total authorized shares, are reserved for future awards and grants under our stock incentive plans. We recently filed a registration statement on Form S-8 under the Securities Act covering the 1.0 million shares of our common stock reserved for issuance under the 2003 Stock Incentive Plan and/or subject to outstanding options under that stock incentive plan. Shares of our common stock issued upon exercise of options under the Form S-8 will be available for sale in the public market, subject to Rule 144 volume limitations applicable to affiliates and subject to the contractual restrictions described above.

Table of Contents

We recently issued 13,110,000 shares of common stock in our initial public offering. All of those shares are eligible for immediate resale by their holders. Similarly, all of the shares sold, from time to time, in this offering will be eligible for immediate resale by their holders.

If any or all of the above holders sell a large number of securities in the public market, the sale could reduce the market price of our common stock and could impede our ability to raise future capital through a sale of additional equity securities.

Changes in yields may harm the market price of our stock.

Our earnings are derived primarily from the expected positive spread between the yield on our assets and the cost of our borrowings. This spread will not necessarily be larger in high interest rate environments than in low interest rate environments and may also be negative. In addition, during periods of high interest rates, our net income, and therefore the amount of any distributions on our common stock, might be less attractive compared to alternative investments of equal or lower risk. Each of these factors could harm the market price of our common stock.

Terrorist attacks and other acts of violence or war may affect any market for our common stock, the industry in which we operate, our operations and our profitability.

Terrorist attacks may harm our results of operations and your investment. We cannot assure you that there will not be further terrorist attacks against the United States or U.S. businesses. These attacks or armed conflicts may impact the property underlying our mortgage-backed securities directly or indirectly, by undermining economic conditions in the United States. Losses resulting from terrorist events are generally uninsurable.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains certain forward-looking statements. Forward looking statements are those which are not historical in nature. They can often be identified by their inclusion of words such as will, anticipate, estimate, should, expect, believe, intend and similar expressions. Any projection of revenues, earnings or losses, capital expenditures, distributions, capital structure or other financial terms is a forward-looking statement.

Our forward-looking statements are based upon our management's beliefs, assumptions and expectations of our future operations and economic performance, taking into account the information currently available to us. Forward-looking statements involve risks and uncertainties, some of which are not currently known to us, that might cause our actual results, performance or financial condition to be materially different from the expectations of future results, performance or financial condition we express or imply in any forward-looking statements. Some of the important factors that could cause our actual results, performance or financial condition to differ materially from expectations are:

our limited operating history and Seneca's lack of experience in managing a REIT;

your inability to review the assets that we will acquire with the net proceeds of this offering;

interest rate mismatches between our mortgage-backed securities and our borrowings used to fund such purchases;

changes in interest rates and mortgage prepayment rates;

effects of interest rate caps on our adjustable-rate mortgage-backed securities;

the degree to which our hedging strategies may or may not protect us from interest rate volatility;

potential impacts of our leveraging policies on our net income and cash available for distribution;

our ability to invest up to 10% of our investment portfolio in lower-credit quality mortgage-backed securities which carry an increased likelihood of default or rating downgrade relative to investment-grade securities;

our board's ability to change our operating policies and strategies without notice to you or stockholder approval;

Seneca's motivation to recommend riskier investments in an effort to maximize its incentive compensation under the management agreement;

potential conflicts of interest arising out of our relationship with Seneca, on the one hand, and Seneca's relation with other third parties, on the other hand; and

the other important factors described in this prospectus, including under the captions Risk Factors, Management's Discussion and Analysis of Financial Condition and Results of Operations, and Quantitative and Qualitative Disclosures about Market Risk.

We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. In light of these risks, uncertainties and assumptions, the events described by our forward-looking events might not occur. We qualify any and all of our forward-looking statements by these cautionary factors. Please keep this cautionary note in mind as you read this prospectus.

This prospectus contains market data, industry statistics and other data that have been obtained from, or compiled from, information made available by third parties. We have not independently verified their data.

Table of Contents**USE OF PROCEEDS**

We will not receive any proceeds from the sale of the shares of our common stock offered by this prospectus. The proceeds from the offering are solely for the account of the selling stockholders.

MARKET PRICE OF AND DISTRIBUTIONS ON OUR COMMON STOCK**Market Information**

Prior to our IPO, our common stock was not listed or quoted on any national exchange or market system. However, certain of our stockholders privately sold shares of our common stock using the PORTAL system. Commencing December 19, 2003, our common stock has been listed on the NYSE under the symbol LUM. The following table sets forth the high and low sale prices for our common stock as reported on the PORTAL Market of which we are aware (for dates prior to December 19, 2003) and as reported on the NYSE (for dates on or after December 19, 2003) for each quarterly period since June 11, 2003, the date of our private placement:

	<u>Common Stock</u>	
	<u>High</u>	<u>Low</u>
2003		
Second Quarter (from June 11, 2003)	\$ 15.35	\$ 15.00
Third Quarter	\$ 15.60	\$ 15.00
Fourth Quarter	\$ 15.00	\$ 13.00
2004		
First Quarter (through February 12, 2004)	\$ 15.35	\$ 13.77

As of February 10, 2004, we had 24,841,146 shares of our common stock issued and outstanding which were held by 15 holders of record. The 15 holders of record include Cede & Co., which holds shares as nominee for The Depository Trust Company, which itself holds shares on behalf of hundreds of beneficial owners of our common stock. Our common stock was sold privately from time to time prior to our IPO, and certain of those trades were reported on the PORTAL Market; however, the information above regarding PORTAL Market prices may not be complete since we have access only to information regarding trades that were reported by our underwriters and not trades that may have been reported by other broker-dealers. Moreover, broker-dealers are not obligated to report all trades to PORTAL.

Distribution Policy

The following table sets forth, for the periods indicated, the cash distributions declared per share of our common stock since June 11, 2003, the date of our private placement:

	<u>Cash Distributions Declared Per Share</u>
2003	
Second Quarter (from June 11, 2003)	\$
Third Quarter	\$ 0.50

Fourth Quarter	\$	0.45
----------------	----	------

Our distributions declared to date are not necessarily indicative of distributions that we will declare in the future. We expect that future distributions will be based on our REIT taxable net income in future periods, which we cannot predict with any certainty. All distribution declarations are made at the discretion of our board of directors.

On October 1, 2003, we declared a cash distribution of \$0.50 per share to our stockholders of record on October 21, 2003. We paid the distribution on November 17, 2003. All of the distribution is a taxable dividend, and none of the distribution is a return of capital. The distribution was funded with cash flow from our ongoing operations, including principal payments and interest payments on our mortgage-backed securities. As of September 30, 2003, interest receivable was \$5.6 million and principal receivable was \$3.6 million; total principal payments received in the three months ended September 30, 2003 were \$96.7 million.

On November 24, 2003, our board of directors declared a cash distribution of \$0.45 per share for the fourth quarter of 2003, paid on January 28, 2004 to stockholders of record on December 11, 2003. Purchasers of common stock in this offering will not receive the distribution. This cash distribution was funded with cash flow from our ongoing operations.

Table of Contents

The aggregate amount of our fourth quarter distribution paid on January 28, 2004 was \$5.3 million. As allowed by the tax code for a REIT's fourth quarter distribution, our January 28, 2004 distribution was deemed to be a dividend made by us on December 31, 2003 to the extent of our 2003 undistributed earnings and profits (as determined under the tax code), even though it was paid in 2004. Any amount of the distribution in excess of our previously undistributed 2003 earnings and profits should, for federal income tax purposes, be treated as a distribution in 2004. We refer to any such excess as the carry-over amount. In that case, our REIT-related distribution requirement for 2004 would be reduced by the carry-over amount. Any reduction to our 2004 REIT-related distribution requirement could cause our total 2004 distributions to stockholders, including the investors in this offering, to be lower than they otherwise might have been. In the event that our (tax) earnings and profits for the year 2004 are less than the carry-over amount, the carry-over amount would, to that extent, be treated for federal income tax purposes first as a tax-free return of capital in 2004 (to the extent of an investor's tax basis in our shares), and then as producing gain, rather than a dividend. Because our 2004 (tax) earnings and profits cannot be predicted at this time, we cannot determine whether any carry-over amount will be treated as a dividend, a return of capital or as producing gain for federal income tax purposes.

We intend to distribute all or substantially all of our REIT taxable net income (which does not ordinarily equate to net income as calculated in accordance with GAAP) to our stockholders in each year. We intend to make regular quarterly distributions to our stockholders to be paid out of funds readily available for such distributions. Our distribution policy is subject to revision at the discretion of our board of directors without notice to you or stockholder approval. We have not established a minimum distribution level and our ability to make distributions may be harmed for the reasons described under the caption Risk Factors. All distributions will be made by us at the discretion of our board of directors and will depend on our earnings and financial condition, maintenance of REIT status, applicable provisions of the Maryland general corporation law, or MGCL, and such other factors as our board of directors deems relevant.

In order to avoid corporate income and excise tax and to maintain our qualification as a REIT under the Internal Revenue Code, we must make distributions to our stockholders each year in an amount at least equal to:

90% of our REIT taxable net income;

plus 90% of the excess of net income from foreclosure property over the tax imposed on such income by the Internal Revenue Code;

minus any excess non-cash income.

In general, our distributions will be applied toward these requirements only if paid in the taxable year to which they relate, or in the following taxable year if the distributions are declared before we timely file our tax return for that year, the distributions are paid on or before the first regular distribution payment following the declaration and we elect on our tax return to have a specified dollar amount of such distributions treated as if paid in the prior year. Distributions declared by us in October, November or December of one taxable year and payable to a stockholder of record on a specific date in such a month are treated as both paid by us and received by the stockholder during such taxable year, provided that the distribution is actually paid by us by January 31 of the following taxable year.

We anticipate that distributions generally will be taxable as ordinary income to our stockholders, although a portion of such distributions may be designated by us as capital gain or may constitute a return of capital. We will furnish annually to each of our stockholders a statement setting forth distributions paid during the preceding year and their characterization as ordinary income, return of capital or capital gains.

We will seek to borrow between eight and 12 times the amount of our equity, and as of December 31, 2003 we had established 17 borrowing agreements with various investment banking firms and other lenders, 12 of which were in

use on December 31, 2003.

In the future, our board of directors may elect to adopt a dividend reinvestment plan.

Table of Contents**DILUTION**

Our net tangible book value as of December 31, 2003 was approximately \$282.5 million, or \$11.38 per share of our common stock. If you invest in our common stock, your interest will be diluted to the extent of the difference between the price you pay per share of our common stock and the net tangible book value per share of our common stock at the time of your purchase. Net tangible book value per share is calculated by subtracting our total liabilities from our total tangible assets, which is total assets less intangible assets, and dividing this amount by the number of shares of our common stock issued and outstanding. The sale of shares of common stock in this offering by the selling stockholders will not affect our net tangible book value because we will not receive any proceeds from their sale of our common stock. Based on our net tangible book value as of December 31, 2003, investors in this offering will experience immediate and substantial dilution to the extent that their purchase price per share exceeds \$11.38. The following table illustrates this per share dilution based on an assumed purchase price of \$15.02 per share, which was the February 9, 2004 closing price of our common stock on the NYSE:

Assumed purchase price per share		\$ 15.02
Net tangible book value per share as of September 30, 2003	\$ 11.38	
Increase per share attributable to new investors	<u>0.00</u>	
Net tangible book value per share		<u>11.38</u>
Dilution per share to new investors		<u>\$ 3.64</u>

The foregoing discussion and table are based upon 24,814,000 shares actually issued and outstanding as of December 31, 2003. As of that date, there were also 55,000 options outstanding at a weighted-average exercise price of \$14.82 per share and there were a total of 945,000 shares available for future awards under our stock incentive plans. Subsequent to December 31, 2003 we issued the following shares and options:

we issued 25,651 shares of our common stock issued to Seneca as the equity component of its management fee for the fourth quarter of 2003;

we issued 1,283 shares of our common stock issued to Mr. Zyda under our 2003 Stock Incentive Plan as the equity component of his contractual fourth quarter 2003 incentive bonus; and

we granted 212 shares of our common stock to our controller under our 2003 Stock Incentive Plan as an incentive bonus.

Table of Contents

BUSINESS

General

We were formed in April 2003 to invest primarily in U.S. agency and other highly-rated, single-family, adjustable-rate, hybrid adjustable-rate, and fixed-rate mortgage-backed securities, which we acquire in the secondary market. Our strategy is to acquire mortgage-related assets, finance these purchases in the capital markets and use leverage in order to provide an attractive return on stockholders' equity. Through this strategy, we seek to earn income, which is generated from the spread between the yield on our earning assets and our costs, including the interest cost of the funds we borrow.

We commenced operations in June 2003, following the completion of a private placement of our common stock, in which we raised net proceeds of approximately \$159.7 million. On December 18, 2003, we completed the initial public offering of our shares of common stock and began trading on the New York Stock Exchange, or NYSE, under the trading symbol LUM on December 19, 2003. The initial public offering raised approximately \$170.4 million in gross proceeds. We estimate that at December 31, 2003 substantially all of the net offering proceeds had been used to purchase mortgage-backed securities.

Our investment portfolio primarily consists of adjustable-rate and hybrid adjustable-rate mortgage-backed securities:

Adjustable-rate mortgage-backed securities have interest rates that reset periodically, typically every six months or on an annual basis.

Hybrid adjustable-rate mortgage-backed securities have interest rates that are fixed for the first few years of the loan typically three, five, seven or 10 years and thereafter their interest rates reset periodically similar to adjustable-rate mortgage-backed securities.

As of September 30, 2003, approximately 12.3% of our investment portfolio was comprised of adjustable-rate mortgage-backed securities and approximately 84.3% was comprised of hybrid adjustable-rate mortgage-backed securities. As of September 30, 2003, the mortgages underlying our hybrid adjustable-rate mortgage-backed securities have fixed interest rates for an average of 49 months, and the average final maturities of those mortgages is 30 years. These mortgages are also subject to interest rate caps that limit the amount that the applicable interest rate can increase during any year, known as an annual cap, and through the maturity of the applicable security, known as a lifetime cap. As of September 30, 2003, the mortgages underlying our hybrid adjustable-rate mortgage-backed securities had average annual caps of 2.44% and average lifetime caps of 9.99%. As of September 30, 2003, all of the assets in our investment portfolio consisted of Category I investments, as defined under our current asset acquisition policy. Within this category, 67% of the securities in our investment portfolio were guaranteed by Fannie Mae, Freddie Mac or the Government National Mortgage Administration (commonly called Ginnie Mae) and the remaining 33% had AAA ratings from at least one nationally-recognized statistical rating agency. At September 30, 2003, the weighted average effective duration of the securities in our overall investment portfolio, assuming constant prepayment rates to the balloon or reset date, or the CPB duration, was 1.7 years. CPB attempts to predict the percentage of principal that will prepay over the next 12 months based on historical principal paydowns, assuming that the hybrid adjustable-rate mortgage-backed securities prepay in full at their next reset date.

Mortgage assets held at December 31, 2003 were approximately \$2.2 billion. As of December 31, 2003, approximately 8.6% of our investment portfolio was comprised of adjustable-rate mortgage-backed securities and approximately 88.9% was comprised of hybrid adjustable-rate mortgage-backed securities. In addition, as of December 31, 2003, 63.2% of the mortgage-backed securities in our investment portfolio were guaranteed by Fannie Mae, Freddie Mac or the Government National Mortgage Administration, or Ginnie Mae, and the remaining 36.7%

had AAA credit ratings from at least one nationally-recognized statistical rating agency. As of December 31, 2003, all of the mortgage-backed securities in our portfolio were purchased at a premium and the portfolio had an average amortized cost of 102.2.

As of December 31, 2003, the weighted-average effective duration of the securities in our overall investment portfolio, assuming constant prepayment rates to the balloon or reset date, or the CPB duration, was 1.75 years. CPB is similar to CPR except that it also assumes that the hybrid adjustable-rate mortgage-backed securities prepay in full at their next reset date.

We have acquired and will seek to acquire additional assets that will produce competitive returns, taking into consideration the amount and nature of the anticipated returns from the investment, our ability to pledge the investment for secured, collateralized borrowings and the costs associated with financing, managing, securitizing and reserving for these investments.

In general, our goal is to acquire various types of mortgage-backed securities and generate income based on the difference between the yield on our earning assets and our costs, including the cost of our borrowings. A common indicator of movements on long-term interest rates is the 10-year U.S. Treasury bond, and a common indicator of short-term interest rates is the three-month LIBOR, or London Interbank Offered Rate. Since the date of our initial private placement, long-term interest rates have risen and

Table of Contents

short-term interest rates have remained relatively stable, causing overall spreads to widen. Between June 30, 2003 and September 30, 2003 the yield on the 10-year U.S. Treasury bond increased 42 basis points from 3.52% to 3.94%, compared to a four basis point increase in the three-month LIBOR yield from 1.12% to 1.16%. During this period, the market value of our portfolio of mortgage-backed securities experienced a decline and, as a result, the net unrealized loss associated with our portfolio increased \$13.6 million for the period from June 30, 2003 through September 30, 2003 but our interest income and interest expense associated with those securities remained relatively stable. As of December 31, 2003, the net unrealized loss associated with our portfolio was \$26.3 million.

As of December 31, 2003 we had established 17 borrowing agreements with various investment banking firms and other lenders, 12 of which were in use on December 31, 2003. These borrowing arrangements facilitated our purchase of our initial portfolio of securities and provide us with sufficient borrowing capacity to fully leverage the net proceeds of this offering. We generally seek to utilize leverage of eight to 12 times the amount of our equity to produce an attractive rate of return on stockholders' equity. We actively manage the adjustment periods and the selection of the interest rate indices of our borrowings against the adjustment periods and the selection of indices on our mortgage-related assets in order to manage our liquidity and interest rate related risks. At September 30, 2003, we had outstanding approximately \$1.5 billion of repurchase agreements with a weighted average current borrowing rate of 1.20%, \$6.9 million of which matures within 30 days, \$324.3 million of which matures within 90 and 180 days and \$1.1 billion of which matures in greater than 180 days. At December 31, 2003, we had an outstanding amount of \$1.7 billion of repurchase agreements with a weighted-average current borrowing rate of 1.19%. At December 31, 2003, the repurchase agreements were secured by mortgage-backed securities with an estimated fair value of \$1.8 billion. We may choose to engage in various hedging activities designed to match more closely the terms of our assets and liabilities.

We expect to qualify and will elect to be taxed as a REIT under the Internal Revenue Code and, thus, will not generally be subject to federal taxes on our income to the extent that we distribute substantially all of our net income to our stockholders.

Investment Strategy

Our strategy is to invest primarily in U.S. agency and other highly-rated single-family adjustable-rate and fixed-rate mortgage-backed securities. We acquire these investments in the secondary market and seek to acquire assets that will produce competitive returns after considering the amount and nature of the anticipated returns from the investment, our ability to pledge the investment for secured, collateralized borrowings and the costs associated with financing, managing, securitizing and reserving for these investments. We do not construct our overall investment portfolio in order to express a directional expectation for interest rates or mortgage prepayment rates. Future interest rates and mortgage prepayment rates are very difficult to predict and, as a result, we seek to acquire mortgage-backed securities which we believe provide acceptable returns over a broad range of interest rate and prepayment scenarios. When evaluating the purchase of mortgage-backed securities, we analyze whether the purchase will permit us to continue to satisfy the minimum 55% portfolio whole-pool requirement, with which we must comply to maintain our REIT status. We also assess the relative value of the mortgage-backed security and how well it would fit into our existing portfolio of mortgage-backed securities. Many aspects of a mortgage-backed security, and the dynamic interaction of its characteristics with those of our portfolio, can influence our perception of what that security is worth and the amount of premium we would be willing to pay to own the specific security. The characteristics of each potential investment we analyze generally include, but are not limited to, the following:

origination year the underwriting year for the mortgages comprising the mortgage-backed security. This characteristic helps to determine how seasoned the mortgage-backed security is and can influence our expectations for the investment's future cash flows. In the current low interest rate environment, mortgages that were originated several years ago (when interest rates were higher) tend to have been refinanced. Those

borrowers who did not refinance their homes during the period of lower interest rates may be relatively less likely (than more recent borrowers) to refinance during the remaining life of their mortgages. Therefore, the expected cash flows from a potential investment with an earlier origination year could exhibit less sensitivity to changes in interest rates.

originator the financial services entity that underwrote the mortgages comprising the mortgage-backed security. Originators do not have homogeneous underwriting standards. The particular underwriting standards utilized by an originator tend to influence the characteristics of the borrowers in its mortgage loan pools which, in turn, can influence the pool's prepayment rates and other cash flows. When analyzing a pool of mortgages, it can be useful to review the historical cash flows exhibited by the originator's prior mortgage loan pools. For example, we may limit the premium we would be willing to pay for a security if the originator has a history of early refinancings. The quality of the originator's underwriting standards and the terms it offers borrowers can also be important to our purchase decisions. These variables potentially include the originator's required loan documentation, FICO scores, loan-to-value ratios, prepayment penalties, cap rates, and assumability terms. Any of these variables might influence our expectations regarding the timing of cash flows from an originator's mortgage-backed securities and, thus, their attractiveness for our portfolio.

Table of Contents

coupon the weighted-average mortgage coupon of the mortgage-backed security. Higher coupons are initially attractive because they can generate more interest income for us than lower-coupon mortgage-backed securities. However, the sustainability of cash flows from higher-coupon pools is less predictable because, all else being equal, higher-coupon mortgages have a greater probability of being refinanced than lower-coupon mortgages. We generally analyze a mortgage-backed security's coupon in comparison to current market rates to form an expectation regarding how sustainable the interest income from the investment will be.

margin the spread between an adjustable-rate mortgage's market index and the interest rate that the borrower must pay to service the mortgage. Similar to higher coupons, higher margins are attractive because they can generate more interest income for us than lower-margin mortgage-backed securities. However, higher-margin mortgage pools may be more prone to experience faster refinancing rates because high-margin borrowers are relatively more likely to find opportunities to refinance into mortgages with lower spreads to the index. As a result, the sustainability of the yield from an investment in a high-margin mortgage pool is less certain and the premium we would be willing to pay on such an investment, all else being equal, is less.

periodic cap the amount by which the interest rate on an adjustable-rate mortgage can adjust during a specified period, usually six or 12 months. In rapidly rising interest rate environments, higher periodic caps are more attractive because they reduce the risk of the adjustable-rate mortgage coupon not being able to reset fully upwards to the current market rate. Conversely, in rapidly falling interest rate environments, lower periodic caps increase the probability that the mortgage's coupon will reset to a level that remains above the current market rate.

lifetime cap the maximum interest rate that a specific adjustable-rate mortgage can have during its lifetime. The lifetime cap of a mortgage is often correlated with market interest rates at the time of origination. An adjustable-rate mortgage originated in a low interest rate environment frequently will have a lower lifetime cap than a comparably structured mortgage originated in a high interest rate environment. If interest rates rise sufficiently, an adjustable-rate mortgage with a lifetime cap can effectively behave like a fixed-rate mortgage because the coupon of the adjustable-rate mortgage cannot adjust above the lifetime cap, and will thus remain effectively fixed at that level until rates fall. Higher lifetime caps tend to make particularly structured hybrid or adjustable-rate mortgage pools more attractive investment candidates.

time-to-reset the number of months before the current coupon of the hybrid or adjustable-rate mortgage will reset. Time-to-reset is an important consideration as we structure the timing of interest rate adjustments on the mortgage-backed securities in our portfolio relative to changes in our borrowing costs.

loan-to-value the ratio between the original loan amount and the value of the collateral securing the mortgage loan. We consider this factor less important in a decision to purchase agency-backed mortgage securities but it can be an important factor when purchasing non-agency securities. This factor also influences the subordination levels required by the national rating agencies to receive AAA rated status.

geographic dispersion the degree to which the properties underlying the pooled mortgage loans are geographically dispersed. We prefer greater geographic dispersion because we wish to limit our exposure to specific states or regions (which might be experiencing relatively greater economic difficulties) to create a more stable portfolio.

price and prepayment expectations the expected yield of the mortgage-backed security under various assumptions about future economic conditions. A mortgage-backed security's ultimate yield is determined by its price and its actual prepayment levels. We generally form expectations, based on the above factors, regarding how the mortgage pool's prepayment levels will change over time, including in response to possible changes in prevailing interest rates and other economic conditions, so as to determine whether its offered price creates a yield that is attractive and fits well with the expected structure of our portfolio and our borrowing costs under those scenarios.

We generally consider these factors when evaluating an investment's relative value and the impact it would likely have on our overall portfolio. We do not assign a particular weight to any factor because the relative importance of the various factors varies, depending upon the characteristics we seek for our portfolio and our borrowing cost structure.

For a description of our asset acquisition policy, see *Our Operating Policies and Investment Policies* Asset Acquisition Policy. We do not currently originate mortgage loans or provide other types of financing to the owners of real estate and we do not service any mortgage loans. However, in the future, we may elect to originate mortgage loans or other types of financing, and we may elect to service mortgage loans and other types of financing.

Financing Strategy

We expect to finance the acquisition of our mortgage-backed securities with short-term borrowings and term loans with a term of less than one year and, to a lesser extent, equity capital. After analyzing the then-applicable interest rate yield curves, we

Table of Contents

may finance with long-term borrowings from time to time. The amount of borrowing we employ depends on, among other factors, the amount of our equity capital. We expect to use leverage to attempt to increase potential returns to our stockholders. Pursuant to our capital and leverage policy, we seek to strike a balance between the under-utilization of leverage, which reduces potential returns to our stockholders, and the over-utilization of leverage, which increases risk by reducing our ability to meet our obligations to creditors during adverse market conditions.

We expect to borrow at short-term rates using repurchase agreements. Repurchase agreements are generally short-term in nature. We intend to actively manage the adjustment periods and the selection of the interest rate indices of our borrowings against the adjustment periods and the selection of indices on our mortgage-backed securities in order to limit our liquidity and interest rate related risks. We generally seek to diversify our exposure by entering into repurchase agreements with multiple lenders. In addition, we expect to enter into repurchase agreements only with institutions we believe are financially sound and which meet credit standards approved by our board of directors.

Industry Trends

We believe fundamental changes are occurring in the U.S. mortgage market, resulting in the shifting of investment capital and mortgage-related assets out of traditional lending and savings institutions and into new forms of mortgage banking and mortgage investment firms, including those that qualify as REITs under the Internal Revenue Code. We believe that traditional mortgage investment companies, such as banks, thrifts and insurance companies, provide less attractive investment structures for investing in mortgage-related assets because of the costs associated with regulation, infrastructure and corporate level taxation. As a REIT, we can generally pass through earnings to our stockholders without incurring an entity-level federal income tax, thereby allowing us to make higher distributions than institutions with similar investments that are subject to federal income tax on their earnings.

Additionally, with the development of highly competitive national mortgage markets (which we believe is partly due to the expansion of government sponsored enterprises such as Fannie Mae, Freddie Mac and Ginnie Mae), local and regional mortgage originators have lost market share to more efficient mortgage originators who compete nationally. The growth of the secondary mortgage market, including new securitization techniques, has also resulted in financing structures that can be utilized efficiently to fund leveraged mortgage portfolios and better manage interest rate risk.

The U.S. residential mortgage market has experienced considerable growth over the past 10 years, with total outstanding U.S. residential mortgage debt growing from approximately \$3.0 trillion in 1992 to approximately \$6.9 trillion as of June 30, 2003, according to the Federal Reserve. According to the same source, the total amount of U.S. residential mortgage debt securitized into mortgage-backed securities has grown from approximately \$1.4 trillion in 1992 to approximately \$4.0 trillion as of June 30, 2003, approximately \$3.2 trillion of which was agency-backed and therefore generally consistent with our investment guidelines. As of June 30, 2003, approximately \$45.0 billion of the available mortgage-backed securities was held by REITs.

Competition

When we invest in mortgage-backed securities and other investment assets, we compete with a variety of institutional investors, including other REITs, insurance companies, mutual funds, hedge funds, pension funds, investment banking firms, banks and other financial institutions that invest in the same types of assets. Many of these investors have greater financial resources and access to lower costs of capital than we do. The existence of these competitive entities, as well as the possibility of additional entities forming in the future, may increase the competition for the acquisition of mortgage-backed securities, resulting in higher prices and lower yields on assets.

Website Access to our Periodic SEC Reports

The Internet address of our corporate website is www.luminentcapital.com. We intend to make our periodic SEC reports (on Forms 10-K and 10-Q) and current reports (on Form 8-K), as well as the beneficial ownership reports filed by our directors, officers and 10% stockholders (on Forms 3, 4 and 5) available free of charge through our website as soon as reasonably practicable after they are filed electronically with the SEC. We may from time to time provide important disclosures to investors by posting them in the investor relations section of our website, as allowed by SEC rules. The information on our website is not a part of this prospectus.

Materials we file with the SEC may be read and copied at the SEC's Public Reference Room at 450 Fifth Street, N.W., Washington, D.C. 20549. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet website at www.sec.gov that will contain our reports, proxy and information statements, and other information regarding our company that we will file electronically with the SEC.

Table of Contents

Founders

Our company was founded in April 2003 by Gail P. Seneca, who serves as our chief executive officer and chairperson of our board of directors. In addition, Seneca Capital Management LLC indirectly participated in founding and organizing Luminent and, therefore, may be considered a promoter under the federal securities laws.

Employees

As of December 31, 2003, we had two full-time employees, Christopher Zyda, who is our senior vice president and chief financial officer, and a full-time Controller. As described above, Seneca manages our day-to-day operations pursuant to a management agreement, subject to the direction and oversight of our board of directors.

Facilities

Our principal offices are located at 909 Montgomery Street, Suite 500, San Francisco, California 94133. We utilize approximately 1,500 square feet of space provided by Seneca at this location.

Legal Proceedings

We are not a party to any material legal proceedings.

OUR OPERATING POLICIES AND INVESTMENT POLICIES

Our Operating Policies and Programs

Our board has established the following four primary operating policies to implement our business strategies:

asset acquisition policy;

capital/liquidity and leverage policies;

credit risk management policy; and

asset/liability management policy.

Asset Acquisition Policy

Our asset acquisition policy provides guidelines for acquiring investments in order to maintain compliance with our overall investment strategy. In particular, we acquire a portfolio of investments that can be grouped into specific categories. Each category and our respective investment guidelines are as follows:

Category I At least 75% of our total assets will generally be residential mortgage-related securities and short-term investments. Assets in this category are rated within one of the two highest rating categories by at least one nationally-recognized statistical rating organization, or if not rated, will be obligations guaranteed by federal agencies or federally chartered agencies, such as Fannie Mae, Freddie Mac or Ginnie Mae.

Category II At least 90% of our total assets will consist of Category I investments plus mortgage-related securities that are unrated or are rated at least investment grade by at least one nationally-recognized statistical rating organization.

Category III No more than 10% of our total assets may be of a type not meeting any of the above criteria. Among the types of assets generally assigned to this category are mortgage-related securities rated below investment grade and leveraged mortgage derivative securities, or shares of other REITs, or other investments.

We expect to acquire only those mortgage-related assets which we believe our manager has the necessary expertise to evaluate and manage, which we can readily finance, and which are consistent with our overall investment strategy and our asset acquisition policy. Generally, we expect to hold our mortgage-backed securities until maturity. Therefore, we generally do not seek to acquire assets with investment returns that are attractive only in a limited range of scenarios. Future interest rates and mortgage prepayment rates are very difficult to predict and, as a result, we seek to acquire mortgage-backed securities which we believe provide acceptable returns over a broad range of interest rate and prepayment scenarios.

We expect most of our acquisitions to consist of adjustable-rate mortgage-backed securities, hybrid adjustable-rate mortgage-backed securities and fixed-rate mortgage-backed securities. We anticipate that our investments in fixed-rate mortgage-backed securities will be focused in shorter-term mortgages, including balloon mortgages. We may, however, purchase longer-term fixed-rate mortgage-backed securities if we view the potential net returns as attractive or if the acquisition of such assets serves to reduce or diversify the overall risk profile of our portfolio.

The following table sets forth the material terms of the assets in our investment portfolio as of September 30, 2003:

Average

Asset	% of Portfolio	Average Coupon	Months to Reset	Average Annual Caps	Average Lifetime Caps	Average Final Maturity
Adjustable-Rate Mortgage-Backed Securities	12.3%	3.91%	9	1.50%	9.65%	July 2033
Balloon Mortgage-Backed Securities	3.4%	3.93%	N/A	N/A	N/A	January 2008
Fixed-Rate Mortgage-Backed Securities	0.0%	N/A	N/A	N/A	N/A	N/A
Hybrid Adjustable-Rate Mortgage-Backed Securities	84.3%	4.04%	49	2.44%	9.99%	June 2033
Total/Average	100.0%	4.02%	44	2.32%	9.60%	August 2032

The weighted average annualized constant prepayment rate, or CPR, of the mortgage-backed securities in our investment portfolio for the three months ended December 31, 2003 was 23%. CPR attempts to predict the percentage of principal that will prepay over the next 12 months based on historical principal paydowns.

We seek to acquire assets that will enable us to be exempt from the Investment Company Act.

Table of Contents

Capital/Liquidity and Leverage Policies

We employ a leverage strategy to increase our investment assets by borrowing against existing mortgage-backed securities and using the proceeds to acquire additional mortgage-backed securities. We generally seek to borrow between eight to 12 times the amount of our equity, although our borrowings may vary from time to time depending on market conditions and other factors deemed relevant by our manager and our board of directors. We believe that this leaves an adequate capital base to protect against interest rate environments in which our borrowing costs might exceed our interest income from mortgage-backed securities.

Depending on the different cost of borrowing funds at different maturities, we expect to vary the maturities of our borrowed funds to attempt to produce lower borrowing costs. In general, our borrowings are short-term. We actively manage, on an aggregate basis, both the interest-rate indices and interest-rate adjustment periods of our borrowings against the interest-rate indices and interest-rate adjustment periods related to our mortgage-backed securities.

We expect to continue to finance our mortgage-backed securities primarily at short-term borrowing rates through repurchase agreements and, to a lesser extent, our equity capital. We anticipate that, upon repayment of each borrowing under a repurchase agreement, we will use the collateral immediately for borrowing under a new repurchase agreement. In the future we may also employ borrowings under lines of credit, term loans and other collateralized financings that we may establish with approved institutional lenders and we may employ long-term borrowings.

As of December 31, 2003, we had entered into 17 borrowing agreements with various investment banking firms and other lenders, 12 of which were in use on September 30, 2003. A repurchase agreement, although structured as a sale and repurchase obligation, acts as a financing under which we effectively pledge our mortgage-backed securities as collateral to secure a short-term loan. Generally, the other party to the agreement makes the loan in an amount equal to a percentage of the market value of the pledged collateral. At the maturity of the repurchase agreement, we are required to repay the loan and correspondingly receive back our collateral. While used as collateral, the mortgage-backed securities continue to pay principal and interest to us. In the event of our insolvency or bankruptcy, certain repurchase agreements may qualify for special treatment under the U.S. Federal Bankruptcy Code, the effect of which, among other things, would be to allow the creditor under the agreement to avoid the automatic stay provisions of the U.S. Federal Bankruptcy Code and to foreclose on the collateral agreement without delay. In the event of the insolvency or bankruptcy of the lender during the term of a repurchase agreement, the lender may be permitted, under applicable insolvency laws, to repudiate the contract, and our claim against the lender for damages may be treated simply as an unsecured creditor. In addition, if the lender is a broker or dealer subject to the Securities Investor Protection Act of 1970, or an insured depository institution subject to the Federal Deposit Insurance Act, our ability to exercise our rights to recover our securities under a repurchase agreement or to be compensated for any damages resulting from the lender's insolvency may be further limited by those statutes. These claims would be subject to significant delay and, if and when received, may be substantially less than the damages we actually incur. As a result, we expect to enter into collateralized borrowings only with institutions that we believe are financially sound and which are rated investment grade by at least one nationally-recognized statistical rating organization.

Substantially all of our borrowing agreements require us to deposit additional collateral in the event the market value of existing collateral declines, which may require us to sell assets to reduce our borrowings. We have designed our liquidity management policy to maintain an adequate capital base sufficient to provide required liquidity to respond to the effects under our borrowing arrangements of interest rate movements and changes in the market value of our mortgage-backed securities, as described above. However, a major disruption in the repurchase or other market that we rely on for short-term borrowings would harm our results of operations unless we were able to arrange alternative sources of financing on comparable terms.

Credit Risk Management Policy

We expect to review credit risk associated with each of our potential investments. In addition, we may diversify our portfolio of mortgage-backed securities to avoid undue geographic, insurer, industry and certain other types of concentration risk. We may reduce risk from sellers and servicers by obtaining representations and warranties. Our manager monitors the overall portfolio risk in order to determine appropriate levels of provision for losses we may experience.

We generally determine, at the time of purchase, whether or not a mortgage-related asset complies with our credit risk management policy guidelines, based upon the most recent information utilized by us. Such compliance is not expected to be affected by events subsequent to such purchase, such as changes in characterization, value or rating of any specific mortgage-related assets or economic conditions or events generally affecting any mortgage-related assets of the type held by us.

Asset/Liability Management Policy

Interest Rate Risk Management. To the extent consistent with our election to qualify as a REIT, we expect to follow an interest rate risk management program intended to protect our portfolio of mortgage-backed securities and related debt against the

Table of Contents

effects of major interest rate changes. Specifically, our interest rate management program is formulated with the intent to offset, to some extent, the potential adverse effects resulting from rate adjustment limitations on our mortgage-backed securities and the differences between interest rate adjustment indices and interest rate adjustment periods of our adjustable-rate mortgage-backed securities and related borrowings.

Our interest rate risk management program encompasses a number of procedures, including the following:

monitoring and adjusting, if necessary, the interest rate sensitivity of our mortgage-backed securities compared with the interest rate sensitivities of our borrowings;

attempting to structure our borrowing agreements to have a range of different maturities and interest rate adjustment periods (although substantially all will be less than one year); and

actively managing, on an aggregate basis, the interest rate indices, interest rate adjustment periods, and gross reset margins of the mortgages underlying our mortgage-backed securities compared to the interest rate indices and adjustment periods of our borrowings.

As a result, we expect to be able to adjust the average maturity/adjustment period of our borrowings on an ongoing basis by changing the mix of maturities and interest rate adjustment periods as borrowings mature or are renewed. Through the use of these procedures, we attempt to reduce the risk of differences between interest rate adjustment periods of the mortgages underlying our adjustable-rate mortgage-backed assets and our related borrowings.

Depending on market conditions and the cost of the transactions, we may conduct hedging activities in connection with our portfolio management. If and when we engage in hedging activities, we intend to do so in a manner consistent with our election to qualify as a REIT. The goal of any hedging strategy we may adopt would be to lessen the effects of interest rate changes and to enable us to earn net interest income in periods of generally rising, as well as declining or static, interest rates. Specifically, if we implement a hedging program, it would likely be formulated with the intent to offset some of the potential adverse effects of changes in interest rate levels relative to the interest rates on the mortgage-backed securities held in our investment portfolio, as well as differences between the interest rate adjustment indices and maturity or reset periods related to our mortgage-backed securities and our borrowings.

Under the REIT rules of the Internal Revenue Code, some hedging activities produce income which is not qualifying income for purposes of the REIT gross income tests or create assets which are not qualifying assets for purposes of the REIT assets test. As a result, we may have to terminate certain hedging activities before the benefits of such activities are realized. In the case of excess hedging income, we would be required to pay a penalty tax for failure to satisfy certain REIT income tests under the Internal Revenue Code if the excess is due to reasonable cause and not willful neglect. In the case of having excess value in relation to mortgage-related assets, the penalty would result in our disqualification as a REIT. In addition, asset/liability management involves transaction costs that increase dramatically as the period covered by hedging protection increases and that may increase during periods of fluctuating interest rates.

Prepayment Risk Management. We also seek to lessen the effects of prepayment of mortgage loans underlying our securities at a faster or slower rate than anticipated. We expect to accomplish this by using a variety of techniques which include, without limitation, structuring a diversified portfolio with a variety of prepayment characteristics, investing in mortgage-backed securities, based on mortgage loans with prepayment prohibitions and penalties, investing in certain mortgage security structures that have prepayment protections, and purchasing mortgage-backed securities at a premium and at a discount. We intend to monitor prepayment risk through the periodic review of the impact of a variety of prepayment scenarios on our revenues, net earnings, distribution, cash flow and net balance sheet market value.

We believe that we have developed cost-effective asset/liability management policies to mitigate prepayment risks. However, no strategy can completely insulate us from prepayment risks. Further, as noted above, certain of the U.S. federal income tax requirements that we must satisfy to qualify as a REIT limit our ability to fully hedge our prepayment risks. Therefore, we could be prevented from effectively hedging our interest rate and prepayment risks.

Description of Mortgage-Related Assets

Mortgage-Backed Securities

Pass-Through Certificates. We expect principally to invest in pass-through certificates, which are securities representing interests in pools of mortgage loans secured by residential real property in which payments of both interest and principal on the securities are generally made monthly. In effect, these securities pass through the monthly payments made by the individual borrowers on the mortgage loans that underlie the securities, net of fees paid to the issuer or guarantor of the securities. Pass-

Table of Contents

through certificates can be divided into various categories based on the characteristics of the underlying mortgages, such as the term or whether the interest rate is fixed or variable.

A key feature of most mortgage loans is the ability of the borrower to repay principal earlier than scheduled. This is called a prepayment. Prepayments can arise due to sale of the underlying property, refinancing, foreclosure, or other events. Prepayments result in a return of principal to pass-through certificate holders. This may result in a lower or higher rate of return upon reinvestment of principal. This is generally referred to as prepayment uncertainty. If a security purchased at a premium pre-pays at a higher than expected rate, then the value of the premium would be eroded at a faster than expected rate. Similarly, if a discount mortgage pre-pays at a lower than expected rate, the amortization towards par would be accumulated at a slower than expected rate. The possibility of these undesirable effects is sometimes referred to as prepayment risk.

In general, but not always, declining interest rates tend to increase prepayments, and rising interest rates tend to slow prepayments. Like other fixed-income securities, when interest rates rise, the value of mortgage-backed securities generally decline. The rate of prepayments on underlying mortgages will affect the price and volatility of mortgage-backed securities and may have the effect of shortening or extending the effective maturity of the security beyond what was anticipated at the time of purchase. If interest rates rise, our holdings of mortgage-backed securities may experience reduced returns if the borrowers of the underlying mortgages pay off their mortgages later than anticipated. This is generally referred to as extension risk.

Payment of limited amounts of principal and interest on some mortgage pass-through securities, although not the market value of the securities themselves, may be guaranteed by the full faith and credit of the federal government, including securities backed by Ginnie Mae, or by agencies or instrumentalities of the federal government, including Fannie Mae or Freddie Mac. Mortgage-backed securities created by non-governmental issuers, including commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers and other secondary market issuers, may be supported by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance and letters of credit, which may be issued by governmental entities, private insurers or the mortgage poolers.

The mortgage loans underlying pass-through certificates can generally be classified in the following four categories:

Adjustable-Rate Mortgages. Adjustable-rate mortgages, or ARMs, are those for which the borrower pays an interest rate that varies over the term of the loan. The interest rate usually resets based on market interest rates, although the adjustment of such an interest rate may be subject to certain limitations. Traditionally, interest rate resets occur at regular set intervals (for example, once per year). We will refer to such ARMs as traditional ARMs. Because the interest rates on ARMs fluctuate based on market conditions, ARMs tend to have interest rates that do not deviate from current market rates by a large amount. This in turn can mean that ARMs have less price sensitivity to interest rates. This may be attractive to some mortgage investors.

Fixed-Rate Mortgages. Fixed-rate mortgages are those where the borrower pays an interest rate that is constant throughout the term of the loan. Traditionally, most fixed-rate mortgages have an original term of 30 years. However, shorter terms (also referred to as final maturity dates) have become common in recent years. Because the interest rate on the loan never changes, even when market interest rates change, over time there can be a divergence between the interest rate on the loan and current market interest rates. This in turn can make a fixed-rate mortgage's price sensitive to market fluctuations in interest rates. In general, the longer the remaining term on the mortgage loan, the greater the price sensitivity. One way to attempt to lower the price sensitivity of a portfolio of fixed-rate mortgages is to buy those with shorter remaining terms or maturities.

Hybrid Adjustable-Rate Mortgages. A recent development in the mortgage market has been the popularity of ARMs that do not reset at regular intervals. Many of these ARMs have a fixed-rate for the first few years of the loan typically three, five, seven or 10 years and thereafter reset periodically like a traditional ARM. Effectively such mortgages are hybrids, combining the features of a pure fixed-rate mortgage and a traditional ARM. Hybrid ARMs have a price sensitivity to interest rates similar to that of a fixed-rate mortgage during the period when the interest rate is fixed and similar to that of an ARM when the interest rate is in its periodic reset stage. However, because many hybrid ARMs are structured with a relatively short initial time span during which the interest rate is fixed, even during that segment of its existence, the price sensitivity may be low. The ability of hybrid ARMs to exhibit low price sensitivity to interest rates can be attractive to some mortgage investors.

Balloon Maturity Mortgages. Balloon maturity mortgages are a type of fixed-rate mortgage. Thus, they have a static interest rate for the life of the loan. However the term of the loan is usually quite short and is less than the amortization schedule of the loan. Typically, this term or maturity is less than seven years. When the mortgage matures, the investor receives all of his principal back. This is effectively a price reset of the invested principal to par. As the balloon maturity mortgage approaches its maturity date, the price sensitivity of the mortgage declines. In fact, the price sensitivity for an agency balloon mortgage with a set maturity is actually lower than that for an agency hybrid ARM with the same time to

Table of Contents

interest rate reset. The ability of a balloon mortgage to have low price sensitivity to interest rates can be attractive for some mortgage investors.

Collateralized Mortgage Obligations. Collateralized mortgage obligations, or CMOs, are a type of mortgage-backed security. Interest and principal on a CMO are paid, in most cases, on a monthly basis. CMOs may be collateralized by whole mortgage loans, but are more typically collateralized by portfolios of mortgage pass-through securities guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae. CMOs are structured into multiple classes, or tranches, with each class bearing a different stated maturity. Monthly payments of principal, including prepayments, are first returned to investors holding the shortest maturity class; investors holding the longer maturity classes receive principal only after the first class has been retired.

Generally, fixed-rate mortgages are used to collateralize CMOs. However, the CMO tranches need not all have fixed-rate coupons. Some CMO tranches have floating rate coupons that adjust based on market interest rates, subject to some limitations. Such tranches, often called CMO floaters, can have relatively low price sensitivity. As is the case with traditional ARMs, hybrid ARMs and balloons, this low price sensitivity may be attractive to some mortgage investors.

Mortgage Derivative Securities. Although we do not have any intention to do so in the near term, we may acquire mortgage derivative securities in an amount not to exceed 10% of our total assets. Mortgage derivative securities allow the holder to receive interest only, principal only, or interest and principal in amounts that are disproportionate to those payable on the underlying mortgage loans. Payments on mortgage derivative securities can be highly sensitive to the rate of prepayments on the underlying mortgage loans. In the event of faster or slower than anticipated prepayments on these mortgage loans, the rates of return on interests in mortgage derivative securities representing the right to receive interest only or a disproportionately large amount of interest, or interest only derivatives, would be likely to decline or increase, respectively. Conversely, the rates of return on mortgage derivative securities representing the right to receive principal only or a disproportionate amount of principal, or principal only derivatives, would be likely to increase or decrease in the event of faster or slower prepayment speeds, respectively.

We may also invest in inverse floaters, a class of CMOs with a coupon rate that resets in the opposite direction from the market rate of interest to which it is indexed, including LIBOR or the 11th District Cost of Funds Index, or COFI. Any rise in the index rate, which can be caused by an increase in interest rates, causes a drop in the coupon rate of an inverse floater while any drop in the index rate causes an increase in the coupon of an inverse floater. An inverse floater may behave like a leveraged security since its interest rate usually varies by a magnitude much greater than the magnitude of the index rate of interest. The leverage-like characteristics inherent in inverse floaters are associated with greater volatility in their market prices.

We may also invest in other mortgage derivative securities that may be developed in the future.

Subordinated Interests. We may also acquire subordinated interests, which are classes of mortgage-backed securities that are junior to other classes of the same series of mortgage-backed securities in the right to receive payments from the underlying mortgage loans. The subordination may be for all payment failures on the mortgage loans securing or underlying such series of mortgage securities. The subordination will not be limited to those resulting from particular types of risks, including those resulting from war, earthquake or flood, or the bankruptcy of a borrower. The subordination may be for the entire amount of the series of mortgage-related securities or may be limited in amount.

Mortgage Loans

We may acquire and accumulate mortgage loans (i.e., fixed-rate, ARMs, hybrid and balloon mortgage loans) as part of our investment strategy until a sufficient quantity has been accumulated for securitization into high-quality

mortgage-backed securities in order to enhance their value and liquidity. Pursuant to our asset acquisition policies, the aggregate amount of any mortgage loans that we acquire and do not immediately securitize, together with our investments in other mortgage-related assets that are not Category I or Category II assets, will not constitute more than 10% of our total assets at any time. All mortgage loans, if any, will be acquired with the intention of securitizing them into high-credit quality mortgage securities. Despite our intentions, however, we may not be successful in securitizing these mortgage loans. To meet our investment criteria, mortgage loans acquired by us will generally conform to the underwriting guidelines established by Fannie Mae, Freddie Mac, Ginnie Mae or other credit insurers. Applicable banking laws generally require that an appraisal be obtained in connection with the original issuance of mortgage loans by the lending institution. We do not intend to obtain additional appraisals at the time of acquiring any mortgage loans.

Mortgage loans may be originated by or purchased from various suppliers of mortgage-related assets throughout the United States, including savings and loans associations, banks, mortgage bankers and other mortgage lenders. We may acquire mortgage loans directly from originators and from entities holding mortgage loans originated by others. Our board of directors has not established any limits upon the geographic concentration of mortgage loans that we may acquire. However, our asset acquisition policy will limit the amount and/or type of mortgage loans we may acquire.

Table of Contents

Other Investments

We may acquire other investments that include equity and debt securities issued primarily by other mortgage-related finance companies, interests in mortgage-related collateralized bond obligations, other subordinated interests in pools of mortgage-related assets, commercial mortgage loans and securities, and residential mortgage loans other than high-credit quality mortgage loans. These investments are generally considered Category III investments under our asset acquisition policy and shall be limited to 10% of our total assets.

We also intend to operate in a manner that will not subject us to regulation under the Investment Company Act. Our board of directors has the authority to modify or waive our current operating policies and our strategies without prior notice to you and without stockholder approval.

Policies With Respect to Other Financing and Investment Activities

If our board of directors determines that additional funding is required, we may raise such funds through additional equity offerings, debt financing, retention of cash flow (subject to provisions in the Internal Revenue Code concerning taxability of undistributed REIT taxable net income) or a combination of these methods.

In the event that our board of directors determines to raise additional equity capital, it has the authority, without stockholder approval, to issue additional common stock or preferred stock in any manner and on such terms and for such consideration it deems appropriate.

Borrowings may be in the form of bank borrowings, secured or unsecured, and publicly or privately placed debt instruments, purchase money obligations to the sellers of assets, long-term, tax-exempt bonds or other publicly or privately placed debt instruments, financing from banks, institutional investors or other lenders, securitizations, including CBOs, any of which indebtedness may be unsecured or may be secured by mortgages or other interests in the assets. Such indebtedness may entail recourse to all or any part of our assets or may be limited to the particular assets to which the indebtedness relates.

We have authority to offer our common stock or other equity or debt securities in exchange for property and to repurchase or otherwise reacquire our shares or any other securities and may engage in such activities in the future.

Subject to the percentage of ownership limitations and gross income and asset tests necessary for REIT qualification, we may invest in securities of other REITs, other entities engaged in real estate activities or securities of other issuers, including for the purpose of exercising control over such entities.

We may engage in the purchase and sale of investments. We do not underwrite the securities of other issuers.

Our board of directors may change any of these policies without prior notice to and without a vote of our stockholders.

Table of Contents**SELECTED FINANCIAL DATA**

The following summary financial data are derived from audited financial statements as of April 25, 2003 (inception) and June 30, 2003 and for the period from April 26, 2003 through June 30, 2003, and unaudited financial statements as of September 30, 2003 (as restated), for the period April 26, 2003 through September 30, 2003 (as restated) and for the three months ended September 30, 2003 (as restated). The selected financial data should be read in conjunction with the more detailed information contained in the financial statements and notes thereto and

Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this prospectus. See Note 10 to the financial statements for a discussion of the restatement of the financial information below.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion of our financial condition and results of operations should be read in conjunction with the financial statements and the notes to those statements included elsewhere in this prospectus.

General

We use our equity capital and borrowed funds to seek to generate income based on the difference between the yield on our mortgage-related assets and the cost of our borrowings. We intend to elect to be taxed as a REIT under the Internal Revenue Code. We will not generally be subject to federal taxes on our income to the extent that we distribute our taxable income to our stockholders and maintain our qualification as a REIT.

Critical Accounting Policies

Our financial statements are prepared in accordance with accounting principles generally accepted in the United States, which are known as GAAP. These accounting principles require us to make some complex and subjective decisions and assessments. Our most critical accounting policies involve decisions and assessments which could significantly affect our reported assets and liabilities, as well as our reported revenues and expenses. We believe that all of the decisions and assessments upon which our financial statements are based were reasonable at the time made based upon information available to us at that time. Management has identified our most critical accounting policies to be the following:

Classifications of Investment Securities

Our investments in mortgage-backed securities are classified as available-for-sale securities, as discussed in Note 2 to the financial statements. Although all of our mortgage-backed securities are carried on the balance sheet at fair value, the classification of the securities as available-for-sale results in changes in fair value being recorded as adjustments to accumulated other comprehensive loss, which is a component of stockholders' equity, rather than immediately through earnings. If available-for-sale securities were classified as trading securities, there could be substantially greater volatility in earnings from period-to-period.

Valuations of Mortgage-backed Securities

As noted above, all investment securities are carried on the balance sheet at fair value. Our mortgage-backed securities have fair values determined by management with reference to price estimates provided by dealers in the securities and independent pricing services. Because the price estimates may vary to some degree between sources, management must make certain judgments and assumptions about the appropriate price to use to calculate the fair values for financial reporting purposes. Different judgments and assumptions could result in different presentations of value.

When the fair value of an available-for-sale security is less than amortized cost, management considers whether there is an other-than-temporary impairment in the value of the security (for example, whether the security will be sold prior to the recovery of fair value). If, in management's judgment, an other-than-temporary impairment exists, the cost basis of the security is written down to the then-current fair value, and the unrealized loss is transferred from accumulated other comprehensive loss as an immediate reduction of current earnings (as if the loss had been realized in the period of impairment). The determination of other-than-temporary impairment is a subjective process, and different judgments and assumptions could affect the timing of loss realization.

Interest Income Recognition

Interest income on our mortgage-backed securities is accrued based on the actual coupon rate and the outstanding principal amount of the underlying mortgages. Premiums and discounts are amortized or accreted into interest income over the lives of the securities using the effective yield method adjusted for the effects of estimated prepayments based on Statement of Financial Accounting Standards, or SFAS, No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases* an amendment of FASB Statements No. 13, 60, and 65 and a rescission of FASB Statement No. 17. If our estimate of prepayments is incorrect, we may be required to make an adjustment to the amortization or accretion of premiums and discounts that would have an impact on future income.

Accounting for Derivative Financial Instruments and Hedging Activities

As of September 30, 2003, we did not hold any derivative financial instruments. Our policies permit us to enter into interest rate swaps, caps and floors, Euro dollar futures and other derivative transactions to help us reduce our interest rate and prepayment risks. Subsequent to September 30, 2003, we engaged in short sales of Euro dollar futures contracts in order to hedge the impact of changes in interest rates on our liability costs. Between November 21, 2003 and December 16, 2003 we sold short 1,725 Euro dollar

Table of Contents

futures contracts, which expire in March 2004, June 2004 and September 2004, with a notional amount totaling \$1,725.0 million. This position and any other similar positions that we may enter into will be accounted for at fair value based on SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted. Estimating the fair value of derivatives involves significant judgments by management.

Accounting for Stock Compensation

As of September 30, 2003, we had 50,000 outstanding stock options, and had issued no other forms of stock compensation. We intend to issue stock options in the future. There were no stock options outstanding at June 30, 2003. We may issue options and other stock-based compensation to Luminent employees and directors, and to Seneca employees. We intend to account for stock options issued to our own employees and directors using the fair value based methodology prescribed by SFAS No. 123, *Accounting for Stock-Based Compensation*. Stock options issued to Seneca employees will be recognized as expense over the vesting period based on their fair value. Estimating the fair value of stock options involves significant judgments by management.

Off-Balance Sheet Arrangements

Since inception, we have not maintained any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. Further, we have not guaranteed any obligations of unconsolidated entities nor do we have any commitment or intent to provide additional funding to any such entities. Accordingly, we are not materially exposed to any market, credit, liquidity or financing risk that could arise if we had engaged in such relationships.

Management Incentive Compensation Expense

As discussed in Note 2 and Note 7 to the financial statements, the management agreement provides for the payment of incentive compensation to Seneca if our financial performance exceeds certain benchmarks. Incentive compensation is calculated on a cumulative, quarterly basis for GAAP purposes and on a stand-alone quarterly basis with an annual cumulative reconciliation calculation for incentive compensation payment purposes. During each quarter of the fiscal year, we will calculate the incentive compensation expense quarterly, on a cumulative basis, making any necessary adjustments for any expensed amounts that were recognized in previous quarters. As a result, if we experience poor quarterly performance in a particular quarter and this causes the cumulative incentive compensation expense for the current quarter to be lower than the cumulative incentive compensation for the prior quarter, we will record a negative incentive compensation expense in the current quarter. Although Seneca was entitled to receive incentive compensation under the management agreement for the period from June 30, 2003 through September 30, 2003, because of the net loss we reported for the period, Seneca voluntarily waived, on a one-time basis, its right to incentive compensation for the period. We recorded the incentive fee expense to Seneca at the gross amount based on the terms of the management agreement for the quarter ended September 30, 2003 and recorded the waived incentive fee as a contribution of capital by Seneca as of September 30, 2003.

For the first, second and third quarters of each fiscal year, incentive compensation payments actually paid to Seneca are calculated based upon the net income and relevant performance thresholds solely for the applicable quarter, and a cumulative calculation is performed at the end of the fiscal year. As a result, during the first three quarters of each fiscal year there will be differences between incentive compensation expense, for GAAP purposes, and the incentive compensation amounts actually paid to Seneca. Any differences between these amounts will be reflected on the balance sheet as a receivable due from or payable due to Seneca. In addition, when each annual cumulative incentive compensation calculation and reconciliation is performed, Seneca may be required to return cash incentive compensation payments earlier received or shares of common stock earlier granted, as applicable, to it as

part of its incentive compensation payments for the first three quarters of the fiscal year.

The cash portion of the incentive compensation is accrued and expensed during the period for which it is calculated and paid. We account for the restricted stock portion of the incentive compensation in accordance with SFAS No. 123, *Accounting for Stock-based Compensation*, and related interpretations, and EITF 96-18, *Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services*.

Fifty percent of Seneca's incentive compensation will be paid in the form of our restricted common stock. This restricted stock will be paid or issued to Seneca on a quarterly basis pursuant to the terms of the management agreement. The number of shares of restricted stock issued to Seneca will be based on the fair market value of the shares at the time of issuance, less a discount determined by our board of directors to account for the transfer restrictions during the vesting period. During periods of lower stock prices, we will issue more restricted common stock to Seneca under the management agreement to pay for the same amount of incentive compensation earned in periods that had higher stock prices. Over the vesting period, any additional shares issued would have a dilutive effect on book value and earnings per share.

Table of Contents

On the date of each restricted stock payment or issuance to Seneca under the management agreement, the fair market value of the common stock shall be recorded in the stockholders' equity section of our balance sheet as common stock and additional paid-in capital. The corresponding portion of any restricted stock payment that is not expensed will be reflected in the stockholders' equity section of our balance sheet as deferred manager compensation. Each quarter's incentive compensation restricted stock payment or issuance to Seneca will be divided into three tranches. The first tranche will vest over a one-year period and be expensed over a five-quarter period, beginning in the quarter in which it was earned. The second tranche will vest over a two-year period and be expensed over a nine-quarter period beginning in the quarter in which it was earned. The third tranche will vest over a three-year period and be expensed over a thirteen-quarter period beginning in the quarter in which it was earned. As a result of this vesting schedule for the restricted stock issued to Seneca, we will incur incentive compensation expense in each of the periods following the issuance of the restricted stock over a three-year period. We will continue to incur incentive compensation expense related to each restricted stock payment, even in subsequent periods in which Seneca did not earn incentive compensation under the management agreement.

As the price of our common stock changes in future periods, the fair value of the unvested portions of shares paid to Seneca pursuant to the management agreement shall be marked-to-market, with corresponding entries on the balance sheet. The net effect of any mark-to-market adjustments to the value of the unvested portions of the restricted stock shall be expensed in future periods, on a ratable basis, according to the remaining vesting schedules of each respective tranche of restricted common stock. Accordingly, incentive compensation expense related to the portion of the incentive compensation paid to Seneca in each restricted stock payment or issuance may be higher or lower from one reporting period to the next, and may vary throughout the vesting period. For example, future incentive compensation expense related to previously issued but unvested restricted stock will be higher during periods of increasing stock prices, and lower during periods of decreasing stock prices. In addition, over the vesting period for each restricted stock payment or issuance, our stockholders' equity will increase or decrease based upon the current market price of our stock. As a result, this will have the effect of increasing or decreasing our net worth, the factor used in calculating Seneca's base management fee, and may increase or decrease the amount of base management fees in future periods.

Pursuant to the management agreement, it is possible for Seneca to earn incentive compensation each quarter and, as a result, receive a restricted stock payment each quarter. As Seneca is paid or issued multiple tranches of restricted common stock for incentive compensation, we will experience increasing management fee expense due to the cumulative impact of multiple tranches and vesting schedules of restricted stock payments, and the mark-to-market impact of the unvested portions of these payments. This will be true even in periods where there is little change in our income or stock price.

Restatement of September 30, 2003 Unaudited Financial Statements

Subsequent to our issuance of financial statements as of and for the period ended September 30, 2003, we determined that waived incentive fee expense to Seneca should have been recorded at the gross amount based on the terms of the management agreement for the quarter ended September 30, 2003, and as a contribution of capital to us by Seneca. We had initially accounted for the waived incentive fees as a reduction of incentive fee expense. As a result, the accompanying financial statements have been restated from the amounts previously reported to correct the accounting for the waived incentive fee. A summary of the significant effects of the restatement is as follows:

<u>As of and for the period April 26, 2003 through September 30, 2003</u>		<u>As of and for the three months ended September 30, 2003</u>	
As Previously		As Previously	
<u>Reported</u>	<u>As Restated</u>	<u>Reported</u>	<u>As Restated</u>

As of September 30, 2003:

Additional paid-in capital	\$ 159,716,887	\$ 160,330,134	\$ 159,716,887	\$ 160,330,134
Accumulated deficit	(2,029,401)	(2,642,648)	(2,029,401)	(2,642,648)

For the periods ended

September 30, 2003:

Incentive fee expense to related party		\$ 613,247		\$ 613,247
Net loss	\$ (2,029,401)	(2,642,648)	\$ (2,166,373)	(2,779,620)
Net loss per share	(0.25)	(0.32)	(0.19)	(0.24)

This Management's Discussion and Analysis has been changed to reflect these restated amounts as appropriate.

Financial Condition

All of our assets at September 30, 2003 and June 30, 2003 were acquired with the proceeds of our June 2003 private placement of 11,500,000 shares of our common stock and use of leverage. We received net proceeds after offering costs of approximately \$159.7 million in that offering, which closed on June 11, 2003 and June 19, 2003.

Table of Contents*Mortgage-Backed Securities*

At September 30, 2003, we held \$1.6 billion of mortgage-backed securities at fair value. The stated contractual final maturity of the mortgage loans underlying our portfolio of mortgage-backed securities ranges up to 30 years, however, the expected maturity is subject to change based on the prepayments of the underlying mortgage loans. The following table sets forth the maturity dates, by year, related to the assets that comprise our investment portfolio as of September 30, 2003:

<u>Asset</u>	<u>Average Final Maturity</u>
Adjustable-Rate Mortgage-Backed Securities	2033
Hybrid Adjustable-Rate Mortgage-Backed Securities	2033
Balloon Mortgage-Backed Securities	2008
Fixed-Rate Mortgage-Backed Securities	N/A

At June 30, 2003, we held \$1.7 billion of mortgage-backed securities at fair value. The stated contractual final maturity of the mortgage loans underlying our portfolio of mortgage-backed securities ranges up to 30 years; the expected maturity is subject to change based on the prepayments of the underlying mortgage loans. The following table sets forth the maturity dates, by year, related to the assets that comprise our investment portfolio as of June 30, 2003:

<u>Asset</u>	<u>Average Final Maturity</u>
Adjustable-Rate Mortgage-Backed Securities	2033
Hybrid Adjustable-Rate Mortgage-Backed Securities	2033
Balloon Mortgage-Backed Securities	2008
Fixed-Rate Mortgage-Backed Securities	N/A

The following table summarizes our mortgage-backed securities classified as available-for-sale as of September 30, 2003, which are carried at their fair value:

	<u>Adjustable-Rate Securities</u>	<u>Hybrid Adjustable- Rate Securities</u>	<u>Balloon Maturity Securities</u>	<u>Total Mortgage- Backed Securities</u>
Amortized cost	\$ 201,682,488	\$ 1,365,703,644	\$ 55,957,477	\$ 1,623,343,609

% of total	12.3%	84.3%	3.4%	100.0%

Edgar Filing: LUMINENT MORTGAGE CAPITAL INC - Form 424B3

The following table summarizes our mortgage-backed securities classified as available-for-sale as of June 30, 2003, which are carried at their fair value:

	Adjustable-Rate Securities	Hybrid Adjustable- Rate Securities	Balloon Maturity Securities	Total Mortgage- Backed Securities
Amortized cost	\$ 217,309,546	\$ 1,445,208,490	\$ 56,054,445	\$ 1,718,572,481
Unrealized gains	37,243	192,924		230,167
Unrealized losses	(1,210,577)	(3,354,740)	(281,166)	(4,846,483)
	<hr/>	<hr/>	<hr/>	<hr/>
Fair value	\$ 216,136,212	\$ 1,442,046,674	\$ 55,773,279	\$ 1,713,956,165
	<hr/>	<hr/>	<hr/>	<hr/>
% of total	12.6%	84.1%	3.3%	100.0%

Actual maturities of the mortgage loans underlying our portfolio of mortgage-backed securities are generally shorter than stated contractual maturities. Actual maturities are affected by the contractual lives of the underlying mortgages, periodic payments of principal, and prepayments of principal. The following table summarizes our mortgage-backed securities on September 30, 2003 according to their estimated weighted average life classifications:

Weighted Average Life	Fair Value	Amortized Cost	Weighted Average Coupon
Less than one year	\$ 266,633,320	\$ 270,572,448	4.09%
Greater than one year and less than five years	1,338,462,080	1,352,771,161	4.01%
Greater than five years	<hr/>	<hr/>	<hr/>
Total	\$ 1,605,095,400	\$ 1,623,343,609	4.02%
	<hr/>	<hr/>	<hr/>

Table of Contents

The weighted average life of the mortgage-backed securities at September 30, 2003 in the table above is based upon data provided through a subscription-based financial information service provided by a major investment bank, assuming constant principal prepayment rates to the balloon or reset date for each security. At September 30, 2003, the portfolio was settled and had actual prepayment speed history. The prepayment model considers current yield, forward yield, steepness of the yield curve, current mortgage rates, mortgage rate of the outstanding loan, loan age, margin and volatility. This subscription service was acquired by us during the third quarter.

The following table summarizes our mortgage-backed securities on June 30, 2003 according to their estimated weighted average life classifications:

<u>Weighted Average Life</u>	<u>Fair Value</u>	<u>Amortized Cost</u>	<u>Weighted Average Coupon</u>
Less than one year			
Greater than one year and less than five years	\$ 1,658,182,886	\$ 1,662,518,036	4.04%
Greater than five years	55,773,279	56,054,445	3.93%
	<hr/>	<hr/>	
Total	\$ 1,713,956,165	\$ 1,718,572,481	4.03%
	<hr/>	<hr/>	<hr/>

The weighted average life of the mortgage-backed securities at June 30, 2003 in the table above was estimated using expected prepayment speeds for the pools, since the pools were new issues and did not have historical performance data available. For settled securities as of June 30, 2003, our manager used information and prepayment speeds available on a major financial information service to calculate the weighted average life.

The actual weighted average life of the mortgage-backed securities in our investment portfolio could be longer or shorter than the estimates in the tables above depending on the actual prepayment rates experienced over the life of the applicable securities and is sensitive to changes in both prepayment rates and interest rates. All averages are shown in years. Seneca did not conduct any separate estimate of prepayment rates or weighted average life of the mortgage-backed securities in our investment portfolio.

Equity Securities

Our investment policies allow us to acquire a limited amount of equity securities, including common and preferred shares issued by other real estate investment trusts. At September 30, 2003 or June 30, 2003, however, we did not hold any equity securities.

Unsettled Securities Sales and Purchases

At September 30, 2003, we had unsettled securities sales of \$215.9 million and unsettled securities purchases of \$215.7 million. These securities settled in October 2003 and resulted in a realized gain of \$0.2 million during the quarter.

At June 30, 2003, we had unsettled securities purchases of \$407.8 million.

Other Assets

We had other assets of \$10.0 million at September 30, 2003. Other assets primarily consist of interest receivable of approximately \$5.6 million, principal receivable of approximately \$3.6 million and prepaid insurance of approximately \$347,000. We had other assets of \$5.5 million at June 30, 2003, which consisted primarily of interest receivable of approximately \$5.0 million and prepaid insurance of \$475,020.

Stockholders' Equity

Stockholders' equity at September 30, 2003 and June 30, 2003 was \$139.5 million and \$155.2 million, respectively, and includes \$18.2 million and \$4.6 million, respectively, of unrealized losses on mortgage-backed securities available for sale presented as accumulated other comprehensive loss.

Average stockholders' equity for the quarter ended September 30, 2003 was \$147.3 million. Due to the losses on sales of securities during such quarter, return on average equity was (1.89%) for the quarter ended September 30, 2003.

Our book value at September 30, 2003 was \$139.5 million, or \$11.91 per share, based on 11,704,000 shares outstanding on that date. As of September 30, 2003, excluding the \$18.2 million accumulated other comprehensive loss related to the fair market value adjustment for our mortgage-backed securities, our book value was \$157.7 million, or \$13.47 per share. Management believes that this measure is useful to investors because book value unadjusted for temporary declines in the fair values of securities more

Table of Contents

closely represents the cost basis of our invested assets, net of our leverage, which is the basis for our net interest income and our distributions to stockholders under the tax code governing REIT distributions.

Our book value at November 26, 2003 was \$126.8 million, or \$10.84 per share, based on 11,704,000 shares outstanding on that date. As of November 26, 2003, the accumulated other comprehensive loss related to the fair market value adjustment for our mortgage-backed securities was \$21.7 million. As of November 26, 2003, excluding the \$21.7 million accumulated other comprehensive loss, our book value was \$148.5 million, or \$12.69 per share.

Hedging Instruments

There can be no assurance that our hedging activities will have the desired beneficial impact on our results of operations or financial condition. Moreover, no hedging activity can completely insulate us from the risks associated with changes in interest rates and prepayment rates.

Hedging involves risk and typically involves costs, including transaction costs. The costs of hedging increase dramatically as the period covered by the hedging increases and during periods of rising and volatile interest rates. We may increase our hedging activity and, thus, increase our hedging costs during such periods when interest rates are volatile or rising. We generally intend to hedge as much of the interest rate risk as our manager determines is in the best interest of our stockholders, after consideration of the cost of such hedging transactions and consistent with our desire to maintain our status as a REIT. Our policies do not contain specific requirements as to the percentages or amount of interest rate risk that Seneca, as our manager, is required to hedge.

At September 30, 2003 and June 30, 2003, we had not engaged in any hedging activities.

Subsequent to September 30, 2003, we engaged in short sales of Euro dollar futures contracts in order to hedge the impact of changes in interest rates on our liability costs. Between November 21, 2003 and December 16, 2003 we sold short 1,725 Euro dollar futures contracts, which expire in March 2004, June 2004 and September 2004, with a notional amount totaling \$1,725.0 million. The value of these futures contracts is marked to market daily in our margin account with the custodian. Based upon the daily market value of these futures contracts, we either receive funds into, or wire funds into, our margin account with the custodian to ensure that an appropriate margin account balance is maintained at all times through the expiration of the contracts.

These contracts have been designated as cash flow hedges of our borrowings under repurchase agreements under Statement of Financial Accounting Standards, or SFAS, No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted, and therefore we have applied hedge accounting to these transactions. The futures contracts are valued at fair value with the resulting gain or loss associated with the effective portion of the hedge recognized in accumulated other comprehensive income until the quarter following contract expiration. The gain or loss associated with the ineffective portion will be recognized in earnings in the current quarter when the effectiveness measurement is made.

Under SFAS No. 133 and our hedging policy, at the inception and during the life of a hedging relationship, the hedge must be expected to be highly effective in offsetting changes in the hedged item's fair value or the variability in cash flows attributable to the hedged risk. In applying our policy, we have determined that these contracts are highly effective as follows. We use regression methodology to assess the effectiveness of our hedging strategies. Specifically, at the inception of each new hedge, we assess effectiveness using ordinary least squares regression to evaluate the correlation between the rates consistent with the hedges and the underlying hedged items. A hedge is highly effective if the changes in the fair value of the derivative provide offset of at least 80% and not more than 120% of the changes in fair value or cash flows of the hedged item attributable to the risk being hedged.

Liabilities

We have entered into repurchase agreements to finance some of our acquisitions of mortgage-backed securities. None of the counterparties to these agreements are affiliates of Seneca or us. These agreements are secured by our mortgage-backed securities and bear interest rates that have historically moved in close relationship to LIBOR. As of September 30, 2003 we had established 17 borrowing agreements with various investment banking firms and other lenders, nine of which were in use on September 30, 2003. At June 30, 2003 we had 10 borrowing agreements in use.

At September 30, 2003, we had outstanding approximately \$1.5 billion of repurchase agreements with a weighted average current borrowing rate of 1.20%, \$6.9 million of which matures within 30 days, \$324.3 million of which matures between 90 and 180 days and \$1.1 billion of which matures in greater than 180 days. It is our present intention to seek to renew these repurchase agreements as they mature under the then-applicable borrowing terms of the counterparties to our repurchase agreements. At June 30, 2003, we had outstanding approximately \$1.2 billion of repurchase agreements with a weighted average current borrowing rate of 1.11%, \$1.0 billion of which matures within 30 days and \$135.1 million of which matures within 31 and 90 days. At September

Table of Contents

30, 2003 and June 30, 2003, the repurchase agreements were secured by mortgage-backed securities with an estimated fair value of \$1.5 billion and \$1.2 billion, respectively, and had a weighted average maturity of 254 days and 13 days, respectively.

At September 30, 2003, the repurchase agreements had remaining maturities as summarized below:

	Overnight (1 day or less)	Between 2 and 30 days	Between 31 and 90 days	Greater than 90 days	Total
Agency-backed mortgage-backed securities:					
Amortized cost of securities sold, including accrued interest	\$ 7,154,544			\$ 1,001,370,437	\$ 1,008,524,981
Fair market value of securities sold, including accrued interest	\$ 7,102,565			\$ 990,000,433	\$ 997,102,998
Repurchase agreement liabilities associated with these securities	\$ 6,863,000			\$ 965,019,525	\$ 965,019,525
Average interest rate of repurchase agreement liabilities	1.24%	0.00%	0.00%	1.19%	1.19%
Non-agency-backed mortgage-backed securities:					
Amortized cost of securities sold, including accrued interest				\$ 509,724,746	\$ 509,724,746
Fair market value of securities sold, including accrued interest				\$ 504,366,717	\$ 504,366,717

(1) Equal to the fair value of securities sold, plus accrued interest income, minus repurchase agreement liabilities, plus accrued interest expense.

Table of Contents

We had \$218.7 million of other liabilities at September 30, 2003. Other liabilities consisted of \$215.7 million of unsettled securities purchases, \$0.5 million of accounts payable and accrued expenses, \$0.2 million of a note payable related to our directors' and officers' insurance policy, \$0.3 million of management fee payable and related party liability, and \$2.0 million of accrued interest expense on repurchase agreements. All of the \$215.7 million of unsettled securities purchases are related to to be announced, or TBA, bonds. The entire \$215.7 million balance of unsettled securities purchases was settled in October 2003.

We have a credit line with Bear Stearns, as primary custodian, at an interest rate of federal funds plus 65 basis points, in the amount of \$400 million at September 30, 2003. This credit line does not have a stated termination date. At September 30, 2003, there were no outstanding borrowings against this credit line.

We had \$413.5 million of other liabilities at June 30, 2003. Other liabilities consisted of \$407.8 million of unsettled security purchases, \$4.3 million of margin debt, \$847,783 of accounts payable and accrued expenses, \$363,165 of a note payable related to the Company's directors' and officers' insurance policy, \$156,166 of management fee payable and related party liability, and \$115,770 of accrued interest expense on repurchase agreements. Of the \$407.8 million of unsettled security purchases, \$370.5 million are related to to be announced, or TBA, bonds and the remaining \$37.3 million were related to two securities issued by Fannie Mae. The entire \$407.8 million balance of unsettled security purchases was settled by July 31, 2003. The \$4.3 million of margin debt was provided by Bear Stearns, our primary custodian, at an interest rate of federal funds plus 65 basis points (1.65% on June 30, 2003), as part of a total credit line provided by our custodian in the amount of \$400 million at June 30, 2003.

Results of Operations

Our company was organized on April 25, 2003 and we began substantive operations in mid-June, 2003, after completing a private placement of our common stock. We leveraged the proceeds from the private placement with short-term borrowings under repurchase agreements and other debt arrangements with our custodian bank to invest in a portfolio of mortgage-backed securities. Because of the short period of operations, our financial results for this period are not indicative of the results we expect during full quarterly or annual periods. We earned \$136,972, or \$0.04 per weighted average share (basic and diluted), for the period from April 26 through June 30, 2003.

The quarter ended September 30, 2003 was our first full quarter of operations. During that quarter we continued to leverage the net proceeds from our private placement with short-term borrowings under repurchase agreements in order to invest in mortgage-backed securities. Net loss for the quarter was \$2.8 million, or \$0.24 per weighted average share (basic and diluted).

For the quarter ended September 30, 2003, interest income, net of premium amortization, was \$10.8 million and was primarily earned from investments in mortgage-backed securities. Interest expense on short-term borrowings, primarily repurchase agreements, was \$4.3 million. For the period from April 26, 2003 through June 30, 2003, interest income, net of premium amortization, was \$672,513, and was primarily earned from investments in mortgage-backed securities during the latter half of June; interest expense on short-term borrowings was \$164,687. For the month ended September 30, 2003, the yield on average earning assets, net of amortization of premium was 2.61% and the cost of funds on the average repurchase balance as of September 30, 2003 was 1.20%, resulting in an interest rate spread of 1.41%.

In the month ended October 31, 2003, we earned net interest income of \$2.2 million, and net income of \$1.9 million, or \$0.16 per fully diluted share. For the month ended October 31, 2003, the yield on average earning assets, net of amortization of premium, was 2.84%, and the cost of funds on our average repurchase agreement liabilities at October 31, 2003 was 1.20%, resulting in an interest rate spread of 1.64%.

Net loss on sales of mortgage-backed securities for the quarter ended September 30, 2003 was \$7.8 million. Between June 30, 2003 and mid-August, the U.S. bond markets experienced dramatic price and yield volatility. For example, between June 1, 2003 and September 30, 2003, the 10-year U.S. Treasury yield ranged from a low of 3.11% on June 13, 2003 to a high of 4.60% on September 2, 2003, an increase of approximately 48%. This increase in interest rates caused the overall market value of our portfolio to decrease and our leverage (defined as our total debt divided by stockholders' equity) to increase beyond management's desired range. To reduce leverage, we sold securities in mid-August totaling \$130.7 million and realized a loss of \$2.3 million. In an attempt to protect our portfolio from further increases in interest rates, we sold short \$200 million of TBA mortgage securities. Interest rates subsequently declined, and we closed out this short position in the month of September for a total realized loss of \$5.7 million. There were no gains or losses on sales of securities for the period from April 26 through June 30, 2003.

The unsettled securities sales of \$215.9 million and unsettled securities purchases of \$215.7 million at September 30, 2003 represent three simultaneous purchase and sale transactions recorded during the quarter that resulted in a realized gain on sale of \$0.2 million. These transactions settled in October 2003.

Table of Contents

Operating expenses for the quarter ended September 30, 2003 were \$1,399,126. Base management fees to Seneca under the management agreement, which were \$398,522 for the quarter, are based on a percentage of our average net worth. Average net worth for these purposes is calculated on a monthly basis and equals the difference between the aggregate book value of our consolidated assets prior to accumulated depreciation and other non-cash items, including the fair market value adjustment on mortgage-backed securities, minus the aggregate book value of our consolidated liabilities. Professional services expenses for the quarter of \$123,237 include both legal and accounting services provided to us. We expect relatively higher levels of professional services expenses to continue during our stabilization period as a public company. The insurance expense for the quarter of \$127,617 represents a three-month amortization of prepaid directors and officers insurance. Custody expense of \$46,038 for the three months ended September 30, 2003 includes the services provided by our primary custodian, Bear Stearns. These expenses may vary based on levels of activity within the portfolio.

Other operating expenses were high in proportion to gross interest income and expense and to net interest income for the period from April 26 through June 30, 2003 as compared to expectations for full periods of operations. Professional services expenses of \$223,877 were proportionately high because of the costs of start-up activities involved in forming our company, which are expensed when incurred. Base management fees to Seneca, which were \$84,686 for the period, are based on a percentage of our average net worth. Average net worth for these purposes is calculated on a monthly basis and equals the difference between the aggregate book value of our consolidated assets prior to accumulated depreciation and other non-cash items, including the fair market value adjustment on mortgage-backed securities, minus the aggregate book value of our consolidated liabilities. The base management fees for the period from April 26 through June 30, 2003 were prorated for a portion of the quarter following the completion of the June 2003 private placement. To varying degrees, other operating expenses were also disproportionate to net interest income compared to a normal full period's results.

We did not accrue or pay incentive compensation to Seneca for the quarter ended September 30, 2003 or the period from April 26, 2003 to June 30, 2003. Although Seneca was entitled to receive incentive compensation under the management agreement for the period from June 30, 2003 through September 30, 2003, Seneca waived its right to incentive compensation for this period. Incentive compensation is earned by Seneca when REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) relative to the average net invested assets for the period, as defined in the management agreement, exceeds the threshold return taxable income that would have produced an annualized return on equity equal to the sum of the 10-year U.S. Treasury rate plus 2.0% for the same period. Although we reported a net loss for the period from June 30, 2003 through September 30, 2003 of \$2.8 million, REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) for the same period was \$6.0 million. As a result, REIT taxable net income for incentive compensation purposes was greater than the threshold return taxable income of \$2.9 million and, therefore, an incentive fee of \$613,247 was earned by Seneca under the management agreement. Seneca waived its right to this incentive compensation on a one-time basis only. The waived incentive fee has been accounted for as a capital contribution as of September 30, 2003. The incentive fee was expensed in the quarter ended September 30, 2003. We do not expect Seneca to waive incentive compensation in the future.

REIT taxable net income is calculated according to the requirements of the Internal Revenue Code, rather than GAAP. The following table reconciles GAAP net losses to REIT taxable net income for the periods indicated:

	For the three months ended September 30, 2003	For the period from April 26, 2003 through September 30, 2003
GAAP net loss	\$ (2,779,620)	\$ (2,642,648)

Adjustments to GAAP net loss:		
Addback of organizational costs expensed during the period		162,577
Amortization of organizational costs for tax purposes	(8,130)	(9,846)
Addback of net capital losses in the period	7,830,566	7,830,566
Addback waived incentive fee for the quarter ended September 30, 2003	613,247	613,247
Addback of stock compensation expense for unvested options	1,135	1,135
	<hr/>	<hr/>
Net adjustments to GAAP net loss	8,436,818	8,597,679
	<hr/>	<hr/>
REIT taxable net income	\$ 5,657,198	\$ 5,955,031
	<hr/>	<hr/>

We believe that the presentation of our REIT taxable net income is useful to investors because it is directly related to the distributions we are required to make in order to retain our REIT status and to the calculations of the incentive compensation payable to Seneca (before deducting incentive compensation, net operating losses and certain other items). There are limitations associated with REIT taxable net income. For example, this measure does not reflect net capital losses during the period and, thus, by itself is an incomplete measure of our financial performance over any period. As a result, our REIT taxable net income should be considered in addition to, and not as a substitute for, our GAAP-based net loss as a measure of our financial performance.

Table of Contents

Because of the timing of our initial investment of portfolio assets (investment activities began on June 11, 2003, the first security purchase settled on June 16, 2003, and \$407.8 million of securities had yet to settle as of June 30, 2003), interest income for the period from April 26 through June 30, 2003 was substantially lower than would be expected for a typical full period, both in an absolute sense and also relative to the average net invested assets for the period. However, for incentive compensation purposes, the calculation for threshold return taxable income is based on average net invested assets for the period with no adjustments made to account for such timing differences. As a result, REIT taxable net income (before deducting incentive compensation, net operating losses and certain other items) for the period from April 26, 2003 through June 30, 2003, was \$297,833 and was less than the threshold return taxable income of \$426,368 and, therefore, no incentive fee was earned by Seneca or paid by us.

We did not sell any mortgage-backed securities during the period from April 26 through June 30, 2003. Although we generally intend to hold our investment securities to maturity, Seneca may determine at some time before they mature that it is in our interest to sell them and purchase securities with other characteristics. In that event, our earnings will be affected by realized gains or losses. Because of rising interest rates during the initial investment period, our portfolio of mortgage-backed securities experienced a net decline in fair value during the period. A net unrealized loss of \$4.6 million on our mortgage-backed securities portfolio is included in other comprehensive income (see statement of stockholders equity) for the period.

Because of rising interest rates during the quarter ended September 30, 2003, our portfolio of mortgage-backed securities experienced an additional decline in fair value during the period. An incremental increase in net unrealized loss of \$13.6 million, for a total of \$18.2 million, on our mortgage-backed securities portfolio is included in accumulated other comprehensive loss for the quarter.

Contractual Obligations and Commitments

As of September 30, 2003 and June 30, 2003, we had no long-term contractual obligations or commitments

Liquidity and Capital Resources

Our primary source of funds as of September 30, 2003 and June 30, 2003 consisted of repurchase agreements totaling \$1.5 billion and \$1.2 billion, respectively, with a weighted average current borrowing rate of 1.20% and 1.11%, respectively. We expect to continue to borrow funds in the form of repurchase agreements. At September 30, 2003, we had borrowing arrangements with nine investment banking firms and at June 30, 2003, we had borrowing arrangements with 10 investment banking firms. Increases in short-term interest rates could negatively impact the valuation of our mortgage-related assets, which could limit our borrowing ability or cause our lenders to initiate margin calls. We have a credit line provided by our primary custodian in the amount of \$400 million at an interest rate of federal funds plus 65 basis points. There is no stated maturity on this credit line. At September 30, 2003, there were no outstanding borrowings against this credit line. The \$4.3 million of margin debt on June 30, 2003 was provided by our primary custodian at an interest rate of federal funds plus 65 basis points (1.65% on June 30, 2003), as part of a total credit line provided by the custodian in the amount of \$400 million as of June 30, 2003.

For liquidity, we will also rely on the cash flow from operations, primarily monthly principal and interest payments to be received on our mortgage-backed securities, as well as any primary securities offerings authorized by our board of directors.

On October 1, 2003, we declared a cash distribution of \$0.50 per share to our stockholders of record on October 21, 2003. We paid the distribution on November 17, 2003. All of the distribution is a taxable dividend, and none of the distribution is a return of capital. The distribution was funded with cash flow from our ongoing operations, including principal payments and interest payments on our mortgage-backed securities. As of September 30, 2003,

interest receivable was \$5.6 million and principal receivable was \$3.6 million, and total principal payments received in the three months ended September 30, 2003 were \$96.7 million.

On November 24, 2003, we declared a cash distribution of \$0.45 per share to our stockholders of record on December 11, 2003. We paid the distribution on January 28, 2004. This cash distribution was funded with cash flow from our ongoing operations. The aggregate amount of our fourth quarter distribution paid on January 28, 2004 was \$5.3 million.

We believe that equity capital, combined with the cash flow from operations and the utilization of borrowings, will be sufficient to enable us to meet anticipated liquidity requirements. However, an increase in prepayment rates substantially above our expectations could cause a liquidity shortfall. If our cash resources are at any time insufficient to satisfy our liquidity requirements, we may be required to liquidate mortgage-backed securities or sell debt or additional equity securities. If required, the sale of mortgage-backed securities at prices lower than the carrying value of such assets would result in losses and reduced income.

We may in the future increase our capital resources by making additional offerings of equity and debt securities, including classes of preferred stock, common stock, commercial paper, medium-term notes, collateralized mortgage obligations and senior or

Table of Contents

subordinated notes. All debt securities, other borrowings, and classes of preferred stock will be senior to the common stock in a liquidation of our company. Additional equity offerings may be dilutive to stockholders' equity or reduce the market price of our common stock, or both. We raised net proceeds of approximately \$157.0 million in our IPO. We are unable to estimate the amount, timing or nature of any additional offerings as they will depend upon market conditions and other factors.

Inflation

Virtually all of our assets and liabilities are financial in nature. As a result, interest rates and other factors influence our performance far more so than does inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates. Our financial statements are prepared in accordance with accounting principles generally accepted in the United States and our distributions are determined by our board of directors based primarily by our net income as calculated for tax purposes; in each case, our activities and balance sheet are measured with reference to historical cost and or fair market value without considering inflation.

Table of Contents

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our primary component of market risk is interest rate risk, as described below. While we do not seek to avoid risk completely, we do seek to assume risk that can be quantified from historical experience, to actively manage that risk, to earn sufficient compensation to justify taking those risks and to maintain capital levels consistent with the risk we undertake.

Interest Rate Risk

We are subject to interest rate risk in connection with our investments in both fixed-rate, adjustable-rate and hybrid adjustable-rate mortgage-backed securities and our related debt obligations, which are generally repurchase agreements of limited duration that are periodically refinanced at current market rates.

Effect on Net Interest Income

We fund our investments in some long-term fixed-rate and hybrid adjustable-rate mortgage-backed securities with short-term borrowings under repurchase agreements. During periods of rising interest rates, the borrowing costs associated with those fixed-rate and hybrid-adjustable rate mortgage-backed securities tend to increase while the income earned on such fixed-rate mortgage-backed securities and hybrid adjustable-rate mortgage-backed securities (during the fixed-rate component of such securities) may remain substantially unchanged. This results in a narrowing of the net interest spread between the related assets and borrowings and may even result in losses. We may enter into derivative transactions seeking to mitigate the negative impact of a rising interest rate environment. Hedging techniques will be based, in part, on assumed levels of prepayments of our fixed-rate and hybrid adjustable-rate mortgage-backed securities. If prepayments are slower or faster than assumed, the life of the mortgage-backed securities will be longer or shorter which would reduce the effectiveness of any hedging techniques we may utilize and may result in losses on such transactions. Hedging techniques involving the use of derivative securities are highly complex and may produce volatile returns. Our hedging activity will also be limited by the asset and sources-of-income requirements applicable to us as a REIT.

Extension Risk

We invest in fixed-rate and hybrid adjustable-rate mortgage-backed securities. Hybrid adjustable-rate mortgage-backed securities have interest rates that are fixed for the first few years of the loan typically three, five, seven or 10 years and thereafter their interest rates reset periodically on the same basis as adjustable-rate mortgage-backed securities. As of September 30, 2003, approximately 84.3% of our investment portfolio was comprised of hybrid adjustable-rate mortgage-backed securities. We compute the projected weighted average life of our fixed-rate and hybrid adjustable-rate mortgage-backed securities based on the market's assumptions regarding the rate at which the borrowers will pre-pay the underlying mortgages. In general, when a fixed-rate or hybrid adjustable-rate mortgage-backed security is acquired with borrowings, we may, but are not required to, enter into an interest rate swap agreement or other hedging instrument that effectively fixes our borrowing costs for a period close to the anticipated average life of the fixed-rate portion of the related mortgage-backed security. This strategy is designed to protect us from rising interest rates because the borrowing costs are fixed for the duration of the fixed-rate portion of the related mortgage-backed security. However, if prepayment rates decrease in a rising interest rate environment, the life of the fixed-rate portion of the related mortgage-backed security could extend beyond the term of the swap agreement or other hedging instrument. This situation could negatively impact us as borrowing costs would no longer be fixed after the end of the hedging instrument while the income earned on the fixed-rate or hybrid adjustable-rate mortgage-backed security would remain fixed. This situation may also cause the market value of our fixed-rate and hybrid adjustable-rate mortgage-backed securities to decline with little or no offsetting gain from the related hedging transactions. In extreme situations, we may be forced to sell assets and incur losses to maintain

adequate liquidity.

Adjustable-Rate and Hybrid Adjustable-Rate Mortgage-Backed Security Interest Rate Cap Risk

We also invest in adjustable-rate and hybrid adjustable-rate mortgage-backed securities which are based on mortgages that are typically subject to periodic and lifetime interest rate caps and floors, which limit the amount by which an adjustable-rate or hybrid adjustable-rate mortgage-backed security's interest yield may change during any given period. However, our borrowing costs pursuant to our repurchase agreements will not be subject to similar restrictions. Hence, in a period of increasing interest rates, interest rate costs on our borrowings could increase without limitation by caps, while the interest-rate yields on our adjustable-rate and hybrid adjustable-rate mortgage-backed securities would effectively be limited by caps. This problem will be magnified to the extent we acquire adjustable-rate and hybrid adjustable-rate mortgage-backed securities that are not based on mortgages which are fully-indexed. Further, the underlying mortgages may be subject to periodic payment caps that result in some portion of the interest being deferred and added to the principal outstanding. This could result in our receipt of less cash income on our adjustable-rate and hybrid adjustable-rate mortgage-backed securities than we need in order to pay the interest cost on our related borrowings. These factors could lower our net interest income or cause a net loss during periods of rising interest rates, which would negatively impact our financial condition, cash flows and results of operations.

Table of Contents

Interest Rate Mismatch Risk

We intend to fund a substantial portion of our acquisitions of adjustable-rate and hybrid adjustable-rate mortgage-backed securities with borrowings that have interest rates based on indices and repricing terms similar to, but of somewhat shorter maturities than, the interest rate indices and repricing terms of the mortgage-backed securities. Thus, we anticipate that in most cases the interest rate indices and repricing terms of our mortgage assets and our funding sources will not be identical, thereby creating an interest rate mismatch between assets and liabilities. Therefore, our cost of funds would likely rise or fall more quickly than would our earnings rate on assets. During periods of changing interest rates, such interest rate mismatches could negatively impact our financial condition, cash flows and results of operations.

Prepayment Risk

Prepayment rates for existing mortgage-backed securities generally increase when prevailing interest rates fall below the market rate existing when the underlying mortgages were originated. In addition, prepayment rates on adjustable-rate and hybrid adjustable-rate mortgage-backed securities generally increase when the difference between long-term and short-term interest rates declines or becomes negative. Prepayments of mortgage-backed securities could harm our results of operations in several ways. Some adjustable-rate mortgages underlying our adjustable-rate mortgage-backed securities may bear initial teaser interest rates that are lower than their fully-indexed rates, which refers to the applicable index rates plus a margin. In the event that such an adjustable-rate mortgage is prepaid prior to or soon after the time of adjustment to a fully-indexed rate, the holder of the related mortgage-backed security would have held such security while it was less profitable and lost the opportunity to receive interest at the fully-indexed rate over the expected life of the adjustable-rate mortgage-backed security. Although we currently do not own any adjustable-rate mortgage-backed securities with teaser rates, we may obtain some in the future which would expose us to this prepayment risk. Additionally, we currently own mortgage-backed securities that were purchased at a premium. The prepayment of such mortgage-backed securities at a rate faster than anticipated would result in a write-off of any remaining capitalized premium amount and a consequent reduction of our net interest income by such amount. Finally, in the event that we are unable to acquire new mortgage-backed securities to replace the prepaid mortgage-backed securities, our financial condition, cash flow and results of operations could be harmed.

Effect on Fair Value

Another component of interest rate risk is the effect changes in interest rates will have on the market value of our assets. We face the risk that the market value of our assets will increase or decrease at different rates than that of our liabilities, including our hedging instruments.

We primarily assess our interest rate risk by estimating the duration of our assets and the duration of our liabilities. Duration essentially measures the market price volatility of financial instruments as interest rates change. We generally calculate duration using various financial models and empirical data and different models and methodologies can produce different duration numbers for the same securities.

Table of Contents

The following sensitivity analysis table shows the estimated impact on the fair value of our interest rate-sensitive investments and repurchase agreement liabilities at September 30, 2003, assuming rates instantaneously fall 100 basis points, rise 100 basis points and rise 200 basis points (dollars are in millions):

	Interest Rates Fall 100 Basis Points	Unchanged	Interest Rates Rise 100 Basis Points	Interest Rates Rise 200 Basis Points
Adjustable-Rate Mortgage-Backed Securities				
Fair value	\$ 199.7	\$ 198.0	\$ 197.7	\$ 196.5
Change in fair value	\$ 1.6		\$ (0.4)	\$ (1.6)
Change as a percent of fair value	0.8%		(0.2)%	(0.8)%
Hybrid Adjustable-Rate Mortgage-Backed Securities				
Fair value	\$ 1,375.5	\$ 1,352.2	\$ 1,326.8	\$ 1,299.9
Change in fair value	\$ 23.2		\$ (25.5)	\$ (52.4)
Change as a percent of fair value	1.7%		(1.9)%	(3.9)%
Balloon Mortgage-Backed Securities				
Fair value	\$ 56.9	\$ 54.8	\$ 53.4	\$ 51.5
Change in fair value	\$ 2.0		\$ (1.5)	\$ (3.4)
Change as a percent of fair value	3.7%		(2.7)%	(6.1)%
Total Mortgage-Backed Securities				
Fair value	\$ 1,632.0	\$ 1,605.1	\$ 1,577.8	\$ 1,547.9
Change in fair value	\$ 26.9		\$ (27.3)	\$ (57.3)
Change as a percent of fair value	1.7%		(1.7)%	(3.6)%
Repurchase Agreements (1)				
Fair value	\$ 1,472.9	\$ 1,472.9	\$ 1,472.9	\$ 1,472.9
Change in fair value				
Change as a percent of fair value				

(1) The fair value of the repurchase agreements would not change materially due to the short-term nature of these instruments.

It is important to note that the impact of changing interest rates on fair value can change significantly when interest rates change beyond 100 basis points from current levels. Therefore, the volatility in the fair value of our assets could increase significantly when interest rates change beyond 100 basis points. In addition, other factors impact the fair value of our interest rate-sensitive investments and hedging instruments, such as the shape of the yield curve, market expectations as to future interest rate changes and other market conditions. Accordingly, in the event of changes in actual interest rates, the change in the fair value of our assets would likely differ from that shown above, and such difference might be material and adverse to our stockholders.

Risk Management

To the extent consistent with maintaining our REIT status, we seek to manage our interest rate risk exposure to protect our portfolio of mortgage-backed securities and related debt against the effects of major interest rate changes. We generally seek to manage our interest rate risk by:

monitoring and adjusting, if necessary, the reset index and interest rate related to our mortgage-backed securities and our borrowings;

attempting to structure our borrowing agreements to have a range of different maturities, terms, amortizations and interest rate adjustment periods;

using derivatives, financial futures, swaps, options, caps, floors and forward sales, to adjust the interest rate sensitivity of our mortgage-backed securities and our borrowings; and

actively managing, on an aggregate basis, the interest rate indices, interest rate adjustment periods, and gross reset margins of our mortgage-backed securities and the interest rate indices and adjustment periods of our borrowings.

Table of Contents

CONFLICTS OF INTERESTS; CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

In evaluating mortgage-related assets for investment and in other operating strategies, an undue emphasis by Seneca on the maximization of income at the expense of other criteria, such as preservation of capital, in order to earn higher incentive compensation for Seneca under the management agreement could result in an increased risk to the value of our portfolio. Any changes in our investment and operating policies are required to be approved by our board of directors. See *The Manager* *The Management Agreement*.

Two of our directors and four of our executive officers, including our chairman of the board, chief executive officer and president, are affiliated with Seneca. We, on the one hand, and Seneca and its affiliates, on the other hand, may in the future enter into a number of relationships other than those governed by the management agreement, some of which may give rise to conflicts of interest between us and Seneca or its affiliates. For instance, we have entered into a cost-sharing agreement with Seneca regarding overhead items such as space, utilities and other administrative services. See *The Manager* *The Cost-Sharing Agreement*. In addition, the market in which we seek to purchase mortgage-related assets is characterized by rapid evolution of products and services and, thus, there may in the future be relationships between us and Seneca and its affiliates in addition to those described herein. Under the management agreement, the prior approval of a majority of our independent directors is required for each affiliate transaction between Seneca or its affiliates and us; provided, however, that a majority of the independent directors may approve guidelines for affiliate transactions that would permit most affiliate transactions to be closed without prior board approval in each instance. In addition, Seneca will be required to provide to our board on a quarterly basis a report of such transactions, including evidence sufficient to allow our board of directors to determine whether the terms of such transactions are fair.

Seneca has informed us that it expects to continue to, or may in the future, purchase and manage mortgage-related assets and other real estate-related assets for third-party accounts. In addition, Seneca and its affiliates may from time to time purchase mortgage-related assets for their own account. Seneca and its affiliates will have no obligation to make any particular investment opportunities available to us; provided, however, that if Seneca intends to invest in residential mortgage-backed securities entirely for its own account (as distinct from its clients' accounts), it is required to present the opportunity to us first. As a result, there may be a conflict of interest between the operations of Seneca and its affiliates, on the one hand, and our company, on the other hand, in the acquisition and disposition of mortgage-related assets. We also expect that we may acquire mortgage-related assets from Seneca's affiliates. In addition, we may, but have no current plans to, invest as a co-participant with affiliates of Seneca in investments originated or acquired by such affiliates. If under our guidelines such investments are subject to review by our independent directors, it is anticipated that they will rely primarily on information provided by Seneca. Such conflicts may result in decisions and/or allocations of mortgage-related assets by Seneca that are not in our best interests.

Many investments appropriate for us will also be appropriate for accounts of other clients that Seneca advises. Pursuant to the terms of the management agreement, Seneca will allocate investment and disposition opportunities in accordance with policies and procedures Seneca considers fair and equitable, including, without limitation, such considerations as investment objectives, restrictions and time horizon, availability of cash and the amount of existing holdings. However, situations may arise in which the investment activities of Seneca or the other accounts may disadvantage us, such as the inability of the market to fully absorb orders for the purchase or sale of particular securities placed by Seneca for us and its other accounts at prices and in quantities which would be obtained if the orders were being placed only for us. Seneca may aggregate orders with orders for its other accounts. Such aggregation of orders might not always be to our benefit with regard to the price or quantity executed.

For so long as Seneca is our exclusive manager pursuant to the management agreement, absent approval by a majority of our independent directors, Seneca has agreed not to sponsor any other mortgage REIT that invests primarily in high-quality, residential mortgage-backed securities.

Table of Contents

THE MANAGER

General

Established in 1989, Seneca Capital Management LLC is a registered investment adviser under the Investment Advisers Act. Seneca currently engages in investment management as its sole business and manages fixed-income and equity assets for pension and profit sharing plans, financial institutions such as banking and insurance companies and mutual funds for retail and institutional investors. Seneca's address is 909 Montgomery Street, Suite 500, San Francisco, California 94133.

A majority of the outstanding equity interests of Seneca are owned by Phoenix Investment Partners, Ltd. Phoenix Investment is a wholly-owned subsidiary of The Phoenix Companies, Inc. (NYSE:PNX). Our board of directors consists of seven members, five of whom are unaffiliated with Seneca or Phoenix. Neither this prospectus nor this offering are endorsed or guaranteed in any way by Seneca or Phoenix.

The Management Agreement

Services and Duties of the Manager

We entered into a management agreement with Seneca on June 11, 2003, the initial closing date of our private offering of common stock. Pursuant to the management agreement, Seneca, as our sole manager, generally implements our business strategy, is responsible for our day-to-day operations and performs services and activities relating to our assets and operations in accordance with the terms of the management agreement. Ms. Seneca and Messrs. Gutierrez, Chow and Grande currently perform the duties of Seneca pursuant to the management agreement on behalf of Seneca. However, Seneca may elect to have others undertake some or all of those duties at any time and in its sole discretion. Seneca is primarily involved in three activities:

Asset Management Seneca advises us with respect to, and arranges for and manages the acquisition, financing, management and disposition of, our investments.

Liability Management Seneca evaluates the credit risk and prepayment risk of our investments and arranges appropriate borrowing and hedging strategies.

Capital Management Seneca coordinates our capital raising activities.

Subject at all times to the direction and oversight of our board of directors, Seneca performs the following services and other activities in accordance with the terms of the management agreement and, to the extent directed by our board of directors, performs similar services and other activities for any subsidiary of our company:

serving as our consultant with respect to the formulation of investment criteria and the preparation of policy guidelines by our board of directors;

assisting us in developing criteria for mortgage-related purchase commitments that are consistent with our long-term investment objectives and making available to us Seneca's knowledge and experience with respect to mortgage-related assets;

representing us in connection with the purchase, sale and commitment to purchase or sell mortgage-related assets that meet in all material respects our investment criteria, and managing our portfolio of mortgage-related assets;

advising us and negotiating our agreements with third-party lenders for borrowings by us;

making available to us statistical and economic research and analysis regarding our activities and the services performed for us by Seneca;

monitoring and providing to our board of directors from time to time price information and other data obtained from certain nationally-recognized dealers that maintain markets in mortgage-related assets identified by our board of directors from time to time, and providing data and advice to our board of directors in connection with the identification of such dealers;

investing or reinvesting any of our money in accordance with our policies and procedures;

providing the executive and administrative personnel, office space and services required in rendering services to us, in accordance with and subject to the terms of the management agreement;

Table of Contents

administering our day-to-day operations and performing and supervising the performance of such other administrative functions necessary to our management as may be agreed upon by Seneca and our board of directors, including the collection of our revenues and the payment of our debts and obligations from our accounts, and the maintenance of appropriate computer systems to perform such administrative functions;

advising our board of directors in connection with policy decisions;

evaluating and recommending hedging strategies to our board of directors and, upon approval by our board of directors, engaging in hedging activities on our behalf consistent with our status as a REIT;

supervising our compliance with the REIT provisions of the Internal Revenue Code and our maintenance of our status as a REIT;

qualifying and causing us to qualify to do business in all applicable jurisdictions and obtaining and maintaining all appropriate licenses;

assisting us to retain qualified accountants and tax experts to assist in developing and monitoring appropriate accounting procedures and testing systems and to conduct quarterly compliance reviews as our board of directors may deem necessary or advisable;

assisting us in our compliance with all federal (including the Sarbanes-Oxley Act of 2002), state and local regulatory requirements applicable to us in respect of our business activities, including preparing or causing to be prepared all financial statements required under applicable regulations and contractual undertakings and all reports, documents and filings, if any, required under the Exchange Act or other federal or state laws;

assisting us in our compliance with federal, state and local tax filings and reports and generally enabling us to maintain our status as a REIT, including soliciting stockholders, as defined below, for required information to the extent provided in the REIT provisions of the Internal Revenue Code;

assisting us in our maintenance of an exemption from the Investment Company Act and monitoring our compliance with the requirements for maintaining an exemption from the Investment Company Act;

coordinating and managing the operations of any joint venture or co-investment interests held by us and conducting all matters with the joint venture or co-investment collaborators;

advising us as to our capital structure and capital raising activities;

handling and resolving all claims, disputes or controversies (including all litigation, arbitration, settlement or other proceedings or negotiations) in which we may be involved or to which we may be subject arising out of our day-to-day operations, subject to the approval of our board of directors;

engaging and supervising, on behalf of us and at our expense, the following, without limitation: independent contractors to provide investment banking services, leasing services, mortgage brokerage services, securities brokerage services, other financial services, and such other services as may be deemed by Seneca or our board of directors to be necessary or advisable from time to time; and

so long as Seneca does not incur additional costs or expenses, performing such other services as may be required from time to time for management and other activities relating to our assets as our board of directors shall reasonably request or Seneca shall deem appropriate under the particular circumstances.

Seneca, in its sole discretion, may elect to cause these services to be provided by third parties, including affiliates of Seneca, in certain cases at our expense, provided that the payment to any affiliate of Seneca by us is subject to the approval of our independent directors (or in accordance with a policy adopted by those board members).

Seneca is required to manage our business affairs in general conformity with the policies approved by our board of directors and consistent with our manager's duties under the management agreement. Seneca is required to prepare regular reports for our board of directors that will review our acquisitions of assets, portfolio composition and characteristics, credit quality, performance and compliance with our investment policies and policies that will enable us to maintain our qualification as a REIT and prevent us from being deemed an investment company.

Table of Contents

From time to time, our board of directors will assess whether we should be internally managed. This assessment will be based on a number of factors deemed relevant by our board of directors, including our ability to attract and retain full-time employees and the costs and expenses related to becoming internally managed.

Term

The management agreement was entered into on June 11, 2003 and remains in effect until terminated.

Terminations by us for Cause. Our directors who are not affiliated with Seneca have the right to terminate the management agreement for cause, by a two-thirds vote, at any time. Cause means a reasonable, good faith determination that Seneca was grossly negligent, acted with reckless disregard or engaged in willful misconduct or active fraud while discharging its material duties under the management agreement. The unaffiliated directors determination that cause exists must be based on findings of fact disclosed to Seneca. If their good faith determination that cause exists is based primarily on a finding of criminal activity or active fraud, we may terminate the management agreement immediately. If their good faith determination that cause exists is based primarily on findings other than criminal activity or fraud, we must give Seneca written notice disclosing the findings of the unaffiliated directors and allow Seneca a reasonable opportunity to cure the problem. If after 60 days the unaffiliated directors determine that cause continues to exist, then the unaffiliated directors may terminate the management agreement immediately by a two-thirds vote. We will not have an obligation to pay Seneca a termination fee if we terminate the management agreement for cause; however, we will be obligated to pay Seneca all unpaid costs and expenses reimbursable under the management agreement.

Terminations without Cause. From and after June 11, 2004, Seneca has the right to terminate the management agreement for any reason by giving at least 60 days prior written notice to our board of directors. We will not be obligated to pay Seneca any termination fee in that case (unless Seneca's termination is within 90 days of a change of control, as described below), however, we will be obligated to pay Seneca all unpaid fees and expenses reimbursable under the management agreement.

Similarly, from and after June 11, 2004, our directors who are not affiliated with Seneca have the right to terminate the management agreement without cause, by a two-thirds vote, by giving at least 60 days prior written notice to Seneca. If we terminate the management agreement without cause, we will be required to pay Seneca all unpaid fees and expenses reimbursable under the management agreement plus a termination fee. The termination fee differs, depending upon the circumstances of the termination as follows:

If we terminate the management agreement without cause in connection with a decision to manage our portfolio internally, rather than by an external manager, the amount of the termination fee shall be equal to the amount of the highest annual base fee and the highest annual incentive compensation, for a particular year, earned by Seneca during any of the three years (or on an annualized basis if a lesser period) preceding the effective date of the termination, plus accelerated vesting on the equity component of all incentive compensation.

If we terminate the management agreement without cause for any other reason, the amount of the termination fee shall be equal to two times the amount of the highest annual base fee and the highest annual incentive compensation, for a particular year, earned by Seneca during any of the three years (or on an annualized basis if a lesser period) preceding the effective date of the termination, plus all deferred payments, including accelerated vesting on the equity component of all incentive compensation.

Terminations by Seneca upon a Change of Control. Subject to exceptions specified in the management agreement, Seneca has the right to deliver a notice of termination of the management agreement within 90 days of a change of control. A change of control is deemed to occur on:

the date of (a) any sale, lease, assignment, transfer or other conveyance of all or substantially all of the Company's assets; (b) any consolidation or merger involving our company in which all of the stockholders of our company immediately prior to the transaction, considered collectively, do not immediately following the transaction own shares of the surviving entity constituting at least a majority of the voting power of the surviving entity; (c) any capital reclassification or other recapitalization of our company in which any person or group that owned thirty percent or more of our voting power falls below that threshold or in which any person or group that owned less than thirty percent of our voting power rises above that ceiling; or (d) any liquidation, dissolution or winding up of our company; or

the first date on which fewer than two of our directors are persons whose nomination to the board was supported by Seneca. Currently, the board seats of Ms. Seneca and Mr. Gutierrez are supported by Seneca. Seneca has informed us that it will generally support the nomination of persons employed by, or affiliated with, Seneca. We intend to disclose in our proxy statements regarding the election of directors whether a candidate's nomination is supported by Seneca.

Table of Contents

Any notice of termination by Seneca following a change of control will be effective no less than 60 days after its date of delivery. If Seneca terminates the management agreement following a change of control, we will be required to pay Seneca all unpaid fees and expenses reimbursable under the management agreement, and the same termination fee as would be payable if we terminated the management agreement without cause (namely, two times the highest annual base fee and the highest annual incentive compensation, for a particular year, earned by Seneca during any one of the three years preceding termination, plus all deferred payments, including accelerated vesting on the equity component of all incentive compensation).

Management Compensation and Expenses

The following table presents a summary of certain compensation, fees and other benefits (including reimbursement of certain out-of-pocket expenses paid by Seneca to third parties pursuant to the management agreement) that Seneca may earn or receive from us pursuant to the terms of the management agreement and the cost-sharing agreement.

<u>Type</u>	<u>Description and Method of Computation</u>	<u>Amount</u>
Base management fee	1% per annum of the first \$300 million of our average net worth during each fiscal year, plus 0.8% per annum of our average net worth in excess of \$300 million during such fiscal year, as described in more detail below.	\$ 901,351(1)
Incentive compensation	A specified percentage of our REIT taxable net income, (before deducting incentive compensation, net operating losses and certain other items), in excess of a threshold amount of net income, as described in more detail below.	\$ 1,219,446(2)
Out-of-pocket expense reimbursements	Reimbursement of actual out-of-pocket expenses incurred in connection with our administration on an on-going basis.	Determinable based upon actual out-of-pocket expenses.(3)
Reimbursement of overhead expenses	Reimbursement of actual costs attributable to our use of services rendered by Seneca pursuant to the cost-sharing agreement. Our portion of such costs is allocated to us as determined by Seneca, subject to reasonable approval of a majority of our independent directors.	Determinable based upon actual overhead expenses attributed to us.(4)
Termination fee	Fee payable only upon termination by us without cause or by Seneca upon change of control. Actual amount of fee depends upon the circumstances of the termination.(5)	Determinable based upon amount of management fees actually paid to Seneca during the then three most recent years at time of termination.

(1) Amount represents base management fee for 2003.

(2) Amount represents incentive compensation earned by Seneca during 2003. However, during the quarter ended September 30, 2003, Seneca earned incentive compensation of \$613,247 and voluntarily waived that compensation on a one-time basis due to the net loss we suffered during that same period. The waived incentive fee has been accounted for as a capital contribution as of September 30, 2003 and was expensed in the quarter ended September 30, 2003.

- (3) Aggregate out-of-pocket expenses in the amount of \$1.3 million were paid to Seneca and/or its affiliates under the management agreement from inception through December 31, 2003 and \$15 thousand was payable to Seneca at December 31, 2003.
- (4) Expenses of \$6 thousand were paid to Seneca under the cost-sharing agreement from inception through December 31, 2003.
- (5) If we terminate the management agreement without cause in connection with a decision to manage our portfolio internally, we will be obligated to pay to Seneca a fee equal to the highest amount of management fees incurred in a particular year during the then three most recent years. Alternatively, if we terminate the management agreement without cause for any other reason, we will be obligated to pay Seneca an amount equal to two times the highest amount of management fees incurred in a particular year during the then three most recent years.

Base Management Fee. The base management fee is equal to 1% of the first \$300 million of our average net worth during each fiscal year, plus 0.8% of our average net worth in excess of \$300 million during such fiscal year. Our average net worth will be calculated as the difference between the aggregate amortized book value of the consolidated assets of us and our subsidiaries, before reserves for depreciation or bad debt or other similar non-cash items, less the aggregate book value of our debt, computed by taking the average of such net values at the end of each month during the applicable period. The base management fee will be paid quarterly.

The base management fee is intended to compensate Seneca for its costs in providing management services to us. Seneca is expected to use the proceeds from its base management fee and incentive compensation in part to pay compensation to its officers and employees who have no right to receive cash compensation directly from us, even though some of them also are our officers.

Incentive Compensation. Except as otherwise approved by our board of directors, the management agreement provides that one-half of Seneca's incentive compensation payable quarterly shall be paid in cash and one-half shall be paid in shares of our common stock. The common stock portion of the incentive compensation arising under the management agreement will be subject to a three-year vesting schedule with one third of such stock vesting on each anniversary of the issuance of such stock. The vesting schedule of the common stock may be subject to acceleration in the event of, among other things, a termination by us without cause or in the event of a change of control of Luminent. The number of shares to be received by Seneca will be based on the fair market value of these shares, less a discount determined by our board of directors at the time of issuance to account for transfer restrictions

Table of Contents

during the vesting period. We have agreed to register the resale of these shares of our common stock. We have also granted Seneca the right to include these shares in any registration statements we might file in connection with any future public offerings, subject only to the right of the underwriters of those offerings to reduce the total number of secondary shares included in those offerings (with such reductions to be proportionately allocated among selling stockholders participating in those offerings). Seneca will be entitled to receive incentive compensation for each fiscal quarter (or lesser portion thereof) in an amount equal to the tiered percentage of the difference between our net income (which is our taxable income (including net capital gains, if any, but excluding net capital losses, if any) before deducting incentive compensation, net operating losses arising from prior periods, and items permitted by the Internal Revenue Code when calculating taxable income for a REIT) for such fiscal quarter (or lesser portion thereof), and the threshold return for such fiscal quarter (or lesser portion thereof). The tiered percentage for this calculation is the weighted average of the following percentages based on our average net invested assets for the period: (1) 20% for the first \$400 million of average net invested assets; and (2) 10% of our average net invested assets in excess of \$400 million. Threshold return means the amount of net income for the period that would produce an annualized return on our average net invested assets equal to the 10-year U.S. Treasury rate for such fiscal quarter plus 2.0%. The average net invested assets shall mean for any period the arithmetic average of the aggregate of the net proceeds from offerings of our equity securities (after deducting underwriting discounts and commissions and other costs and expenses related thereto), computed by taking the average of such values at the end of each week during the applicable period. Incentive compensation shall be paid quarterly. However, if at the end of a particular fiscal year or upon any termination of the management agreement the aggregate of the incentive compensation received by Seneca during that fiscal year (or lesser portion thereof) exceeds the tiered percentage of the difference of our net income for that fiscal year (or lesser portion thereof) less the threshold return for such year (or lesser portion thereof), then Seneca will pay us such amount at the time of such reconciliation at the end of the applicable fiscal year. Any such payments by Seneca will not exceed the amount of the incentive compensation previously paid to Seneca under the management agreement for that fiscal year (or lesser portion thereof) and will be made only to the extent of the reconciliation amount for that fiscal year (or lesser portion thereof), half of which shall be in cash and the balance of which shall be in stock. If Seneca is required to return stock as aforesaid, then Seneca will first return the shares of stock that it received last as incentive compensation at the actual price of such shares as of their original issuance in each case.

Expense reimbursements. Seneca may engage its affiliates and other third parties to conduct due diligence with respect to potential investments and to provide certain other services. Under the management agreement, Seneca may be entitled to reimbursement for the fees and expenses of those third parties, some of which may be affiliates of Seneca. Accordingly, a portion of the out-of-pocket expenses may be paid to affiliates of Seneca in such capacities.

We rely on the personnel (other than our chief financial officer) and resources of Seneca to conduct our operations. We reimburse Seneca for Seneca's costs and expenses for the items described below and for the fees and expenses of certain third parties (which may include affiliates of Seneca) engaged to perform professional services (including legal and accounting) for us, and to perform due diligence tasks on assets purchased or considered for purchase by us and to perform certain other activities. Further, we reimburse Seneca for any expenses incurred in contracting with third parties for the master or special servicing of assets we acquire. Accordingly, a portion of the out-of-pocket expenses may be paid to Seneca's affiliates in such capacities. The contracting for such engagements is conducted on commercially reasonable terms. We have also entered into a cost-sharing agreement with Seneca regarding certain overhead items such as space, utilities and other administrative services. Such arrangements may also be made using an income-sharing arrangement such as a joint venture. Expense reimbursement may be made as frequently as monthly.

Subject to the limitations set forth below, we pay all of our operating expenses except those specifically required to be borne by Seneca under the management agreement. The operating expenses required to be borne by Seneca include:

most costs and expenses of its officers and employees;

the costs of any salaries of any of our officers or directors who are affiliated with Seneca;

all internal and overhead expenses of Seneca, except for our pro-rata portion of overhead to the extent that our employees who are not also employed by Seneca use Seneca's facilities, and

fees and expenses of third parties that are engaged by Seneca to perform services for us but for which Seneca is specifically not entitled to reimbursement under the management agreement, except that our board of directors may approve reimbursement to Seneca of our pro rata portion of the salaries, bonuses, health insurance, retirement benefits and similar employment costs for the time spent on our operations and administration other than for the provision of investment advisory services.

The expenses that we pay include (but are not necessarily limited to):

issuance and transaction costs associated with the acquisition, disposition and financing of investments;

Table of Contents

legal, independent accounting and auditing fees and expenses;

the compensation and expenses of our independent directors;

the costs of printing and mailing proxies and reports to stockholders;

costs incurred by employees of Seneca for travel on behalf of us;

costs associated with any computer software or hardware that is used solely for us;

costs to obtain liability insurance to indemnify our directors and officers, Seneca and its employees and directors;

the compensation and expenses of our custodian and transfer agent;

all expenses incurred in connection with due diligence;

the accumulation of mortgage-related assets;

the raising of capital and incurrence of debt;

the acquisition of assets;

interest expenses;

taxes and license fees;

non-cash costs;

litigation;

the base and incentive management fee; and

extraordinary or non-recurring expenses.

Services for which we bear the expenses may be provided to us by affiliates of Seneca if Seneca believes such services are of comparable or superior quality to those provided by third parties and can be provided at comparable cost. Seneca is required under the management agreement to provide an annual report to our board of directors with respect to the engagement of third parties and fees and expenses paid to such third parties, and our board of directors will periodically review such engagements and our expense levels, the division of expenses between Seneca and us and reimbursements of expenses advanced by Seneca.

Seneca is permitted to incur expenses on our behalf that are consistent with a budget that may, in the future, be approved by our board of directors, as amended from time to time, are consistent with the terms of the management agreement or are at the direction of our board. Nevertheless, Seneca must obtain the approval of our board for any expense item exceeding \$100,000 in the aggregate, except as otherwise provided for in our budget. Our board of directors may modify this threshold from time to time in its discretion.

Stock Option Grants

We are not obligated to grant any options to Seneca or any of its employees. However, under our 2003 outside advisors plan we are authorized, from time to time in the discretion of the compensation committee of our board of directors, to grant options to purchase shares of our common stock to Seneca and/or its directors, officers, and key employees.

Conflicts of Interest

We are subject to conflicts of interest involving Seneca and its affiliates because, among other reasons:

the incentive compensation, which is based on our income, may create an incentive for Seneca to recommend investments with greater income potential, which may be relatively more risky, than would be the case if its compensation from us did not include an incentive-based component;

Table of Contents

Seneca and its affiliates are permitted to purchase mortgage-related assets for their own account and to advise accounts of other clients, and many investment opportunities appropriate for us also will be appropriate for these accounts; and

two of our directors and all but one of our executive officers are managers or employees of, or otherwise affiliated with, Seneca.

For a more detailed discussion, see [Conflicts of Interest; Certain Relationships and Related Transactions](#).

The management agreement does not limit or restrict the right of Seneca or any of its affiliates from engaging in any business or rendering services of any kind to any other person, including the purchase of, or rendering advice to others purchasing, mortgage-related assets that meet our policies and criteria. However, Seneca has agreed that for as long as Seneca is our exclusive manager pursuant to the management agreement, it will not sponsor any other mortgage REIT that invests primarily in high-quality, residential mortgage-backed securities, without first obtaining the approval of a majority of our independent directors.

Limits of Responsibility

Pursuant to the management agreement, Seneca has not assumed any responsibility other than to undertake the services called for thereunder and is not responsible for any decision by our board of directors to follow or not to follow its advice or recommendations. Seneca, its managers and employees will not be liable to us, any issuer of mortgage-backed securities, any of our subsidiaries, the independent directors, our stockholders or any subsidiary's stockholders for acts performed in accordance with and pursuant to the management agreement, unless our independent directors have made a reasonable, good faith determination based on findings of fact which are disclosed to Seneca that Seneca was grossly negligent, acted with reckless disregard, or engaged in willful misconduct or active fraud while discharging its material duties under the management agreement. We cannot assure you that we would be able to recover any damages for claims we may have against Seneca. Although certain managers and employees of Seneca are also our officers and directors and, therefore, have fiduciary duties to us and our stockholders in that capacity, Seneca and the managers and employees of Seneca, in their capacities as such, have no fiduciary duties to us.

We have agreed to indemnify Seneca and its directors, officers, employees and affiliates with respect to all expenses, losses, damages, liabilities, demands, charges and claims arising from any acts or omissions of Seneca or its employees made in the performance of Seneca's duties under the management agreement, but excluding acts or omissions for which our independent directors have made a reasonable, good faith determination based on findings of fact which are disclosed to Seneca that Seneca was grossly negligent, acted with reckless disregard, or engaged in willful misconduct or active fraud while discharging its material duties under the management agreement. The management agreement does not limit or restrict the right of Seneca or any of its officers, directors, employees or affiliates from engaging in any business or rendering services of any kind to any other person, including the purchase of, or rendering advice to others purchasing, mortgage-related assets that meet our policies and criteria.

The Cost-Sharing Agreement

We have entered into a cost-sharing agreement with Seneca regarding overhead items such as space, utilities and other administrative services. Pursuant to the cost-sharing agreement, Seneca has agreed to provide, and we have agreed to reimburse Seneca for the costs of, the use of up to 1,500 square feet of space at Seneca's principal offices and utilities, furniture, furnishings and equipment (including computer equipment), telephone, telegraph and fax services, mail services, and other administrative services utilized by our officers and employees that are not affiliated with Seneca. In addition, Seneca has agreed to provide coverage for our officers and employees under Seneca's group insurance, general liability and workers' compensation plans. We are obligated to pay the actual costs attributable to

our use of the services rendered by Seneca under the cost-sharing agreement, which shall be determined by Seneca and which determination is subject to the reasonable approval of a majority of our independent directors. Our independent directors may approve a set of guidelines for the determination and reimbursement of costs to Seneca under the cost-sharing agreement in order to permit such determination and reimbursement to occur without prior approval by our independent directors in each instance. The cost-sharing agreement will terminate upon the termination of the management agreement in accordance with its terms. Expenses of \$6 thousand have been paid to Seneca under the cost-sharing agreement from inception through December 31, 2003.

Employee and Non-Employee Officers

We employ a full-time chief financial officer, Christopher J. Zyda, whose primary responsibilities include monitoring Seneca's performance under the management agreement.

We do not employ any of our officers other than Mr. Zyda. Our other executive officers Ms. Seneca, Mr. Gutierrez, Mr. Chow and Mr. Grande are employees and/or officers of Seneca and are compensated by Seneca. In their capacity as officers of our company, these non-employee officers perform only ministerial functions, such as executing contracts and filing reports with regulatory agencies. In their capacity as officers and employees of Seneca, they are expected to fulfill Seneca's duties to us under the management agreement. (However, we have no control over which persons Seneca assigns to our account.) In their capacity as officers and employees of Seneca, such persons do not have fiduciary obligations to us or our stockholders.

Business Experience of our Directors and Executive Officers

Set forth below is a brief account of the business experience and education of our directors and executive officers.

Gail P. Seneca, Ph.D. Ms. Seneca is our chief executive officer and chairman of our board of directors. Ms. Seneca is also the chief investment officer and managing partner of Seneca Capital Management LLC. Prior to

founding Seneca Capital Management LLC in 1989, Ms. Seneca served as senior vice president of the Asset Management Division of Wells Fargo Bank from 1987 to 1989, where she managed assets in excess of \$10 billion. Before Wells Fargo, Ms. Seneca was a chief investment strategist and head of fixed income for Chase Lincoln First Bank from 1983 to 1987. She began her career in investments in the savings and loan industry. Ms. Seneca attended New York University where she earned B.A., M.A. and Ph.D degrees.

Albert J. Gutierrez, CFA. Mr. Gutierrez is our president and a member of our board of directors. Mr. Gutierrez is also the fixed-income chief investment officer for Seneca, which he joined as a principal in 2002. Prior to joining Seneca, Mr. Gutierrez was employed at American General Investment Management as executive vice president from 2000 to 2001. At American General, Mr. Gutierrez was head of portfolio management, trading and investment systems where he was responsible for approximately \$75 billion in client assets. From 1988 to 2000, Mr. Gutierrez was employed by Conseco Capital Management as a senior vice president in charge of fixed-income research and trading as well as insurance asset portfolio management. Mr. Gutierrez' broad portfolio management experience includes total-rate-of-return mandates in all fixed-income sectors, collateralized debt obligations, and specialized and structured mandates. Prior to joining Conseco Capital Management, Mr. Gutierrez held successive roles on Wall Street in credit research, systems design and trading. Mr. Gutierrez holds a B.S. degree in Economics from the Wharton School, University of Pennsylvania, and is a CFA charter holder.

Table of Contents

Bruce A. Miller, CPA. Mr. Miller is our lead independent director. Mr. Miller is the retired managing partner of the E&Y Kenneth Leventhal Real Estate Group, San Francisco, where he served from 1980 to 1999. Mr. Miller is a certified public accountant and affiliated with the American Institute of Certified Public Accountants. Mr. Miller is the chairman of the board of Limbic Systems, Inc., president of the board of The San Francisco Food Bank and is a director of AMB Institutional Alliance REIT I, Inc., Great Circle Water (Technologies), Inc., California Center for Land Recycling, and Whitney Cressman Limited. Mr. Miller is on the Advisory Board of Hunting Gate Capital, LLC. Mr. Miller earned a B.A. degree from Drexel University and an M.B.A. degree from New York University.

Robert B. Goldstein. Mr. Goldstein is an independent director on our board. Mr. Goldstein is chairman of the board of directors of Bay View Capital Corporation. Mr. Goldstein has served as a director of Bay View Capital Corporation since 2001, and formerly served as its president and chief executive officer. Previously, Mr. Goldstein served as president of the Jefferson Division of Hudson United Bank in Philadelphia since 2000, when Hudson United acquired Jeff Banks Inc., and was president of Jeff Banks Inc. from 1998 to 2000. Mr. Goldstein was chairman and chief executive officer of Regent Bancshares Corp. and Regent National Bank, Philadelphia, Pennsylvania, from 1997 to 1998, and from 1993 to 1996 he served as president and chief executive officer of Lafayette American Bank in Connecticut. Mr. Goldstein holds a B.B.A. degree from Texas Christian University, from which he graduated magna cum laude, and also served for seven years on the faculty of Southern Methodist University's Graduate School of Banking.

John McMahan. Mr. McMahan is an independent director on our board. Mr. McMahan is also chairman of the board of directors of BRE Properties, Inc. Mr. McMahan has served as a director of BRE Properties since 1995. He has been executive director for The Center for Real Estate Enterprise Management since 2000, and managing principal of The McMahan Group, real estate management consultants, since 1996. Previously, Mr. McMahan founded and served as chief executive officer of McMahan Real Estate Advisors from 1980 through 1990. In 1990, Mr. McMahan's firm merged with a subsidiary of Mellon Bank to form Mellon/McMahan Real Estate Advisors Inc., a real estate pension fund advisory firm of which Mr. McMahan was the chief executive officer from 1990 until 1994. Subsequent to the merger, Mellon/McMahan Real Estate Advisors Inc. became the 16th largest real estate pension fund advisor in the U.S. with approximately \$2.2 billion under management. Mr. McMahan taught real estate at the Stanford Graduate School of Business for 17 years and at the Haas School of Business, University of California, Berkeley for five years. Mr. McMahan holds a B.A. degree from the University of Southern California and an M.B.A. degree from Harvard University.

Donald H. Putnam. Mr. Putnam is an independent director on our board. Mr. Putnam is the chief executive officer and a managing director of Putnam Lovell NBF Securities Inc., an investment banking firm that advises the financial services community, which he co-founded in 1987. From 1980 to 1986, Mr. Putnam held various senior positions, at SEI Investments Inc., an investment advisory firm to mutual funds with assets under management of over \$15.0 billion. Prior to joining SEI, Mr. Putnam was a senior consultant at Catallatics Corporation, a financial services company, where he devised new products and strategies for banking clients. From 1973 to 1978, Mr. Putnam held various positions in the trust and investment group of Bankers Trust Company. Mr. Putnam's education includes undergraduate and graduate work at New York University and undergraduate studies in mathematics and literature at Franklin Pierce College.

Joseph E. Whitters, CPA. Mr. Whitters is an independent director on our board. Mr. Whitters joined First Health Group Corp., a managed health care company, as its controller in October 1986 and has served as its vice president, finance since August 1987 and its chief financial officer since March 1988. From 1984 through 1986, he served as controller of United HealthCare Corp. (which subsequently changed its name to UnitedHealth Group, Inc.), a diversified medical services company. From 1983 to 1984, he served as manager of accounting and taxation for Overland Express, a publicly-traded trucking company. From 1980 to 1983, he was a senior manager for tax matters at Peat Marwick, a public accounting firm. Mr. Whitters serves on the board of Omnicell, a public

medication-dispensing technology company and is the chairman of its audit committee. Mr. Whitters holds a B.A. degree in accounting from Luther College in Decorah, Iowa.

Christopher J. Zyda. Mr. Zyda is our senior vice president and chief financial officer. Prior to joining Luminent in August 2003, Mr. Zyda was employed at eBay, Inc. from 2001 to 2003, where he served as vice president, financial planning and analysis. Prior to eBay, Mr. Zyda was employed at Amazon.com, Inc. from 1998 to 2001, where he held the positions of assistant treasurer, then treasurer, and eventually vice president and chief financial officer international. Prior to Amazon.com, Mr. Zyda was employed at The Walt Disney Company from 1989 to 1998, where he held several positions within the corporate treasury group, culminating as director, investments with responsibility for over \$4 billion of investment assets. Mr. Zyda earned a B.A. degree in English Literature from the University of California Los Angeles, and an M.B.A. degree from the Anderson School at UCLA.

Andrew S. Chow, CFA. Mr. Chow is a senior vice president of Luminent. Mr. Chow is also a fixed-income portfolio manager for Seneca, which he joined in 2002. Before joining Seneca, Mr. Chow had been the portfolio manager since 2000 for a convertible securities mutual fund at ING Pilgrim which invested in both investment-grade and high-yield securities. Prior to that time, Mr. Chow was employed for nine years at Conesco Capital Management where he was the portfolio manager for a highly

Table of Contents

ranked convertible securities mutual fund. Additionally, he was responsible for trading and managing a multi-billion dollar matched options book at Conseco. In previous roles at Conseco, Mr. Chow was a fixed-income portfolio manager and a mortgage-backed securities trader. From 1988 to 1991, Mr. Chow was employed at Washington Square Advisors where he was the manager of quantitative research and also had responsibility for trading derivatives and foreign exchange and mortgage-backed securities. Prior to that time, Mr. Chow was a floor trader at the Minneapolis Grain Exchange. Mr. Chow holds a B.A. degree in Economics from the University of California, Berkeley and an M.B.A. degree from Carnegie Mellon. Mr. Chow is also a CFA charter holder.

Troy A. Grande, CFA. Mr. Grande is a senior vice president of Luminent. Mr. Grande is also a fixed-income portfolio manager for Seneca, which he joined in 2002. Before joining Seneca, Mr. Grande held staff and line positions at Fremont General Corporation, where he served as assistant treasurer, director of investments and chief financial officer. In these positions
