**Item 1.01 Entry into a Material Definitive Agreement.**

On November 23, 2005, Advanced Energy Industries, Inc. (the Company ) entered into an Asset Purchase Agreement (the Agreement ) to sell substantially all of its assets related to its IKOR product line (the IKOR Products ) to iWatt, Inc., a California corporation ( iWatt ). The IKOR Products consist principally of power supply components, modules and systems utilized in computing, office automation and communications products. Pursuant to the Agreement, in consideration for the assets related to the IKOR Products, iWatt agreed to assume specified liabilities of the Company and to pay the Company approximately \$10.4 million in cash, with \$1.0 million to be held in escrow to satisfy any potential indemnity claims by iWatt. The Agreement contains customary representations, warranties, and covenants, including a non-competition covenant that precludes the Company from engaging in a business that engages or participates in the design, development, manufacture, marketing or sale of products that would compete with the IKOR Products for a period of three years following the closing, and a non-solicitation covenant that restricts the Company from hiring employees of iWatt.

The amount and type of consideration payable pursuant to the Agreement were determined on the basis of arm's length negotiations between the Company and iWatt, and neither the Company nor any of its affiliates has any material relationship to iWatt or any of its shareholders other than in respect of the Agreement and the transactions contemplated thereby.
