**Notes to Consolidated Financial Statements**

**(Dollars in thousands, except per share data)**

**1. Basis of Presentation**

Triumph Group, Inc. ("Triumph") is a Delaware corporation which, through its operating subsidiaries, is engaged in aviation products and services.

The accompanying consolidated financial statements include the accounts of Triumph and its subsidiaries (collectively, the "Company"). Intercompany accounts and transactions have been eliminated from the consolidated financial statements.

**2. Summary of Significant Accounting Policies**

*Organization*

Triumph designs, engineers, manufactures or repairs and overhauls aircraft components and industrial gas turbine components and accessories for commercial airlines, air cargo carriers and original equipment manufacturers of aircraft and aircraft components and power generation equipment on a worldwide basis. The Company is organized into three groups, which are aggregated for reporting purposes, based on the products and services that it provides.

The Company's revenue is generated from the design, engineering, manufacturing, repair, overhaul and distribution of aircraft components, such as mechanical and electromechanical control systems, aircraft and engine accessories, structural components, auxiliary power units, commonly referred to as APUs, avionics and aircraft instruments. The Company's repair and overhaul revenues are derived from services on auxiliary power units, aircraft accessories, including constant-speed drives, cabin compressors, starters and generators, and pneumatic drive units for both commercial airlines and original equipment manufacturers ("OEMs"). Further, the Company provides precision machining services primarily to various OEMs for other sub-assembly components manufactured from refractory and other metals for the aviation and aerospace industry. The structural components revenues are derived from stretch forming, die forming, milling, bonding, machining, welding and assembly and fabrication on aircraft wings, fuselages and skins for aircraft produced by OEMs such as Boeing and Bombardier. The Company also manufactures metallic and composite bonded honeycomb assemblies for fuselage, wings and flight control surface parts for airlines and other aircraft operators. The flight controls and instrumentation revenues are derived from designing and engineering of mechanical and electromechanical controls, such as hydraulic systems, main engine gearbox assemblies and mechanical cable for OEMs and commercial airlines. The Company also performs repair and overhaul services, and supplies spare parts, for various types of cockpit instruments and gauges for a broad range of commercial airlines on a worldwide basis. In addition, the Company repairs and overhauls industrial gas turbine components, primarily for power generation equipment operators and applies high temperature coatings for both internal and external customers.

Repair services generally involve the replacement of parts and/or the remanufacture of parts, which is similar to the original manufacture of the part. The processes that the Company performs related to repair and overhaul services are essentially the repair of wear parts or replacement of parts that are beyond economic repair. The repair service generally involves remanufacturing a complete part or a component of a part.

*Concentration of Credit Risk*

Accounts Receivable are recorded net of an allowance for doubtful accounts. The Company performs ongoing credit evaluations of its customers and generally does not require collateral. The

## Edgar Filing: TRIUMPH GROUP INC / - Form 10-K/A

Company records the allowance for doubtful accounts based on prior experience and for specific collectibility matters when they arise. The Company writes off balances against the reserve when collectibility is deemed remote.

The Company's trade accounts receivable are exposed to credit risk; however, the risk is limited due to the diversity of the customer base and the customer base's wide geographical area. Trade accounts receivable from The Boeing Company ("Boeing") represented approximately 16% of total accounts receivable as of March 31, 2004 and 2003. The Company had no other significant concentrations of credit risk. Boeing represented approximately 22%, 16% and 15% of net sales in fiscal 2004, 2003 and 2002, respectively. No other single customer accounted for more than 10% of the Company's net sales; however, the loss of any significant customer, including Boeing, could have a material adverse effect on the Company and its operating subsidiaries.

During fiscal years 2004, 2003 and 2002, the Company had foreign sales of \$135,189, \$122,194 and \$132,213, respectively. The Company reports as foreign sales those sales with delivery points outside of the United States.

### *Use of Estimates*

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

### *Derivatives and Hedging Activities*

In June 1998, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities." The statement requires the Company to recognize all derivatives on the balance sheet at fair value. Changes in the fair value of derivative financial instruments are either recognized periodically in income or stockholder's equity (other comprehensive income), depending on whether the derivative is being used to hedge changes in fair value or cash flows. The ineffective portion of a derivatives change in fair value, if any, will be immediately recognized in earnings. The adoption of SFAS No. 133 on April 1, 2001 resulted in the cumulative effect of an accounting change being recognized as a charge of \$1,934 (net of \$1,185 of income tax benefit) in other comprehensive income.

### *Use of Derivative Financial Instruments*

The Company periodically uses derivative financial instruments principally to manage the risk that changes in interest rates will affect the amount of its future interest payments. The Company had entered into an interest rate swap contract which effectively converted a portion of its floating-rate debt to a fixed-rate basis through November 2002. Under the interest rate swap contract, the Company paid amounts equal to the specified fixed-rate interest (6.56%) multiplied by the notional principal amount (\$100,000), and received a floating-rate interest (30-day LIBOR) multiplied by the same notional principal amount. The net effect of the spread between the floating rate and the fixed rate is reflected as an adjustment to interest expense in the period incurred. No other cash payments were to be made unless the contract was terminated prior to maturity, in which case the amount paid or received in settlement was established by agreement at the time of termination and should represent the market

quotation, at current rates of interest, of the remaining obligations to exchange payments under the terms of the contract. The Company accounted for its interest rate swap contract as a cash flow hedge which was highly effective. The Company's interest rate swap terminated in November 2002. The Company did not experience any ineffectiveness with its interest rate swap and, accordingly, did not recognize any gains or losses in its earnings.

*Property and Equipment*

Property and equipment are recorded at cost and depreciated over the estimated useful lives of the related assets by the straight-line method. Buildings and improvements are depreciated over a period of 15 to 39<sup>1</sup>/<sub>2</sub> years, and machinery and equipment are depreciated over a period of 7 to 15 years (except for furniture, fixtures and computer equipment which are depreciated over a period of 3 to 10 years).

*Goodwill and Intangible Assets*

In June 2001, the FASB approved the issuance of SFAS No. 141, "Business Combinations" ("SFAS No. 141") and SFAS No. 142, "Goodwill and Other Intangible Assets" ("SFAS No. 142"). SFAS No. 141 applies to all business combinations completed after June 30, 2001 and requires the use of the purchase method of accounting. SFAS No. 141 also establishes new criteria for determining whether intangible assets should be recognized separately from goodwill. SFAS No. 142 provides that goodwill and intangible assets with indefinite lives will not be amortized but rather will be tested for impairment on an annual basis. The Company has three reporting units based upon the review and resource allocation performed by the Chief Operating Decision Maker as described in SFAS No. 131, "Disclosures about Segments of an Enterprise and Related Information." The Company allocates goodwill to its three reporting units based upon the benefits that each acquisition adds to each reporting unit. The Company tests its goodwill for impairment annually during the fourth quarter of its fiscal year. The Company has determined based on its tests that no impairment of its goodwill exists as of March 31, 2004.

Intangible assets cost and accumulated amortization at March 31, 2004 were \$49,609 and \$22,095, respectively. Intangible assets cost and accumulated amortization at March 31, 2003 were \$48,619 and \$17,564, respectively. Intangible assets consist of two major classes: (i) product rights and licenses, which at March 31, 2004 had a weighted-average life of 11.3 years, and (ii) non-compete agreements and other, which at March 31, 2004 had a weighted-average life of 12.4 years. Gross cost and accumulated amortization of product rights and licenses at March 31, 2004 were \$37,108 and \$14,143 respectively, and at March 31, 2003 were \$37,108 and \$10,680, respectively. Gross cost and accumulated amortization of noncompete agreements and other at March 31, 2004 were \$12,501 and \$7,952, respectively, and at March 31, 2003 were \$11,511 and \$6,884, respectively. Amortization expense for the fiscal years ended March 31, 2004, 2003, and 2002 was \$4,531, \$4,292 and \$4,544, respectively. Amortization expense for the five fiscal years succeeding March 31, 2004 by year is expected to be as follows: 2005: \$4,258; 2006: \$4,151; 2007: \$4,055; 2008: \$3,972; 2009: \$3,825.

*Revenue Recognition*

Revenues are recorded when completed products or repaired parts are shipped. Reserves for contract losses are accrued when estimated costs to complete exceed expected future revenues. The Company's policy with respect to sales returns and allowances generally provides that the customer may not return products or be given allowances, except at the Company's option. Accruals for sales returns, other allowances, and estimated warranty costs are provided at the time of shipment based upon past experience.

*Shipping and Handling Costs*

The cost of shipping and handling products is included in cost of products sold.

*Pre-production Design and Development Costs*

The Company expenses as incurred design and development costs related to long-term supply arrangements unless such costs are contractually recoverable. At March 31, 2001, the Company had capitalized \$5,044 of contractually recoverable design and development costs which were charged to expense in fiscal 2002 because the program was deemed unlikely to go into production. In the second quarter of fiscal 2002, the Company became aware that the program had been cancelled. Upon learning of the cancellation of the program, the Company evaluated its position relative to any potential recovery of its costs and determined that there was no opportunity for recovery and accordingly, wrote-off the design and development costs that had been capitalized related to the program.

*Research and Development Expense*

Research and development expense was approximately \$7,434, \$2,061 and \$577 for the years ended March 31, 2004, 2003 and 2002, respectively.

*Foreign Currency Translation*

The financial statements of the Company's French subsidiaries are measured using the local currency as the functional currency. Assets and liabilities of these subsidiaries are translated at the rates of exchange at the balance sheet date. Income and expense items are translated at average monthly rates of exchange. The resultant translation adjustments are included in accumulated other comprehensive income. At March 31, 2004 and 2003, accumulated comprehensive income resulting from foreign currency translation was \$1,408 and \$543, respectively. Gains and losses arising from foreign currency transactions of these subsidiaries are included in net earnings.

*New Accounting Pronouncements*

In January 2003, the FASB issued Interpretation No. 46, "Consolidation of Variable Interest Entities, an Interpretation of Accounting Research Bulletin No. 51." This interpretation clarifies the application of Accounting Research Bulletin No. 51, "Consolidated Financial Statements," and requires consolidation of variable interest entities by their primary beneficiaries if certain conditions are met. This interpretation applies to variable interest entities created or obtained after January 31, 2003. For variable interest entities created or obtained before February 1, 2003 and for variable interests in special-purpose entities the adoption of this standard was effective as of December 31, 2003. For all

## Edgar Filing: TRIUMPH GROUP INC / - Form 10-K/A

other variable interest entities adoption of this standard was effective as of March 31, 2004. Adoption of this standard did not have a material impact on the Company's consolidated financial statements.

### *Stock-Based Compensation*

In December 2002, the FASB issued SFAS No. 148, "Accounting for Stock-Based Compensation Transition and Disclosure," which amends SFAS No. 123, "Accounting for Stock-Based Compensation," to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. The Company uses the accounting method under Accounting Principles Board ("APB") Opinion No. 25 ("APB 25") and related interpretations in accounting for its employee stock options. Under APB 25, when the exercise price of the Company's employee stock options equals the market price of the underlying stock on the date of grant, no compensation expense is recognized.

Pro forma disclosure regarding net income and earnings per share has been determined as if the Company had accounted for its employee stock options under the fair value method. The fair value of the Company's stock options was estimated at the date of grant using a Black-Scholes option pricing model with the following weighted-average assumptions: risk-free interest rate of 3.7% for 2004, 4.8% for 2003 and 5.0% for 2002; no dividends; a volatility factor of the expected market price of the Company's Common stock of .39, .37 and .34 for 2004, 2003 and 2002, respectively, and a weighted-average expected life of the options of 6 years.

For purposes of pro forma disclosures, the weighted average fair value of the options (\$14.24 for the 2004 issuance, \$19.69 for the 2003 issuance and \$16.30 for the 2002 issuance) is amortized to expense over the options' assumed vesting period. The following pro forma information has been prepared assuming the Company accounted for its stock options under the fair value method:

In April 2002, the Company acquired certain assets of Ozone Industries, Inc. ("Ozone Assets"), which are being operated by the Company's subsidiary, HTD Aerospace, Inc. In July 2002, the Company acquired substantially all of the assets of Aerocell Structures, Inc. ("Aerocell Assets"), which are being operated by the Company's subsidiary, Triumph Airborne Structures, Inc. In August 2002, the Company acquired substantially all of the assets of Furst Aircraft and Instrument ("Furst") which are being operated by the Company's subsidiary, Furst Aircraft, Inc. In January 2003, the Company acquired substantially all of the assets of Boeing's Spokane Fabrication Operation which are being operated by the Company's subsidiary, Triumph Composite Systems, Inc. (collectively, the "2003 Acquisitions"). The Company acquired the Ozone Assets to expand its product line offerings in hydraulic control systems, the Aerocell Assets to expand its capabilities and customer base in repair of flight control surfaces, Furst to expand its capabilities and customer base in instrument repair, and Triumph Composite Systems to expand its product line offerings of structural components to include stressed floor panels. The Ozone Assets are used in conjunction with the design, development, testing and manufacturing of aircraft hydraulic systems and components for the defense and commercial aircraft markets. These proprietary products include nose wheel steering assemblies and hydraulic quick disconnect couplings. The Aerocell Assets are used in the repair and overhaul of airframe components, bonded components and structural assemblies for all commercial air fleets. Furst operates within the business jet market as a certified instrument repair, overhaul and re-certification facility and has capabilities on more than 1,500 components and represents most major manufacturers. In addition, Furst provides avionics installation services, rotables, loaners, engineering, 24-hour AOG support, inventory and parts management and field services. Triumph Composite Systems, Inc.'s facility is dedicated to the production of aircraft parts made of composite and thermoplastic materials. Triumph Composite Systems, Inc.'s primary products include floor panels, air control systems ducts and non-structural composite flight deck components. As part of the transaction, the Company and Boeing have entered into an eight-year single-source supply agreement for the products currently produced at Triumph Composite Systems. The combined purchase price of the 2003 Acquisitions was \$69,483. This amount includes cash paid at the closings, direct costs of the transactions and deferred payments. The excess of the combined purchase price over the preliminary estimated fair value of the combined net

assets acquired of \$9,669 was recorded as goodwill, all of which is tax-deductible. The purchase price has not been finalized in one of the acquisitions due to an amount held in escrow relating to certain elements of the purchase price that are subject to change pursuant to agreement on a closing balance sheet. The disposition of the escrow funds are not expected to materially affect purchase accounting. The Ozone acquisition agreement provided for a purchase price adjustment based upon a final agreed upon value for the net assets acquired, as of the closing date. During fiscal 2004, the Company finalized with the seller the fair value of the net assets acquired and received a refund from the seller in the amount of \$210.

In November 2002, the Company acquired the remaining four percent of the stock of its subsidiary, Triumph Controls, Inc. for a cash purchase price of \$4,060. The amount of the purchase price in excess of the carrying value of the minority interest liability of \$3,425 was recorded as goodwill.

In August 2001, the Company acquired substantially all of the assets of EMCO Fluid Systems, Inc., which was renamed EFS Aerospace, Inc. ("EFS"). The Company acquired EFS to expand its product line offerings in hydraulic control systems. EFS, located in Valencia, California, designs, produces, assembles and tests both hydraulic and pneumatic valves and actuators for the aviation and aerospace industries. The purchase price of approximately \$35,061 includes the assumption of debt and certain liabilities and direct costs of the transaction. The excess of the purchase price over the estimated fair value of the net assets acquired of \$24,293 was recorded as goodwill, all of which is tax-deductible. The EFS acquisition agreement had provided for a \$5,000 contingent subordinated promissory note. In March 2003, the Company renegotiated the \$5,000 contingent subordinated promissory note to a \$2,500 non-contingent subordinated promissory note. During fiscal 2004, the Company re-evaluated its allocation of fair value to the assets acquired and assigned \$640 to contracted backlog, with a life of 37 months, and \$300 to proprietary designs, with a life of 30 years and reduced goodwill by the corresponding amount.

These acquisitions have been accounted for under the purchase method and, accordingly, are included in the consolidated financial statements from their dates of acquisition. These acquisitions were funded by the Company's long-term borrowings in place at the date of each respective acquisition.

The pro forma effect of the EFS acquisition for the fiscal year ended March 31, 2002 was not material.

The pro forma effects of the acquisition of Boeing's Spokane Fabrication Operation assets are not included in the above pro forma amounts because the required information is not available. The

Spokane Fabrication Operation was a cost center of Boeing, which did not have separate financial statements.

	March 31,	
	2004	2003
Senior notes	\$ 150,000	\$ 150,000
Revolving credit facility	66,621	32,462

Less current portion	4,884	7,831
	<u>\$ 220,963</u>	<u>\$ 191,692</u>

In December 2002, the Company issued two classes of Senior Notes: \$80,000 of Class A notes and \$70,000 of Class B notes. The Class A notes carry a fixed rate of interest of 6.06% and mature on December 2, 2012. The Class B notes carry a fixed rate of interest of 5.59% and mature in seven annual installments of \$10,000 starting on December 2, 2006 through December 2, 2012. The proceeds of the Senior Notes were used to pay down the Company's revolving credit facility ("Credit Facility"). Effective March 31, 2004, the Company amended the Senior Notes to change certain terms and covenants. The interest rate may increase up to an additional 0.63% if certain conditions arise.

In conjunction with the issuance of the Senior Notes, the Company amended its Credit Facility to reduce the credit limit from \$350,000 to \$250,000, extend the expiration date thereof from June 13, 2004 to December 13, 2006 and amend certain terms and covenants. In July 2003, the Company increased its Credit Facility to \$265,000 from \$250,000. Effective March 31, 2004, the Company amended the Credit Facility to change certain terms and covenants. The Credit Facility bears interest at either LIBOR plus between 1.0% and 2.375% or the prime rate (or the Federal Funds rate plus 0.5% if greater) or an overnight interest rate at the option of the Company. The variation in the interest rate is based upon the Company's ratio of total indebtedness to earnings before interest, taxes, depreciation and amortization. In addition, the Company is required to pay a commitment fee of between 0.2% and 0.475% on the unused portion of the Credit Facility. The Company may allocate up to \$15,000 of the available Credit Facility for the issuance of letters of credit of which \$9,283 and \$6,551 was used at March 31, 2004 and 2003, respectively. At March 31, 2004 and 2003, the effective interest rate on borrowings under the Credit Facility was 3.10% and 2.68%, respectively. At March 31, 2004, \$189,096 of additional borrowings were available under the Credit Facility.

In conjunction with the EFS acquisition, the Company assumed \$10,000 of seller financing with an interest rate of 6% with principal payments due through the maturity date of October 2005 and \$1,067 of other debt. In October 2001, the Company retired substantially all of the then outstanding balance of the other debt of EFS. In March 2003, the Company renegotiated the \$5,000 contingent subordinated promissory note to a \$2,500 non-contingent subordinated promissory note payable in two annual installments of \$1,250 on each of October 12, 2003 and 2004.

On August 23, 2001, the Company entered into a loan agreement with the Illinois Development Finance Authority related to the Illinois Development Finance Authority Economic Development Bonds, series of 2001 (the "Bonds"). The proceeds of the Bonds of \$7,500 were used to fund the purchase of the Company's TriWestern Metals new electro-galvanizing production line. The Bonds were

due to mature on August 1, 2016 and were secured by the equipment. The Bonds bear interest at a variable rate based on LIBOR, which at March 31, 2002 was 3.5%. In November 2002, the Company retired all of the outstanding Bonds totaling \$7,500, plus accrued interest. The retirement of the Bonds was funded by borrowings under the Company's Credit Facility.

In November 2002, the Company retired all of the 10.5% subordinated promissory notes and all of the 10.5% junior subordinated promissory notes, totaling \$11,854. The retirement of these notes were funded by borrowings under the Company's Credit Facility. With regard to these notes, the Company, at its sole discretion, was permitted to pay interest by issuance of additional 10.5% notes and elected to do so for \$634 and \$1,057 for the years ended March 31, 2003 and 2002, respectively.

The indentures under the debt agreements described above contain restrictions and covenants which include limitations on the Company's ability to incur additional indebtedness, issue stock options or warrants, make certain restricted payments and acquisitions, create liens, enter into transactions with affiliates, sell substantial portions of its assets and pay cash dividends. Additional covenants require compliance with financial tests, including leverage, interest coverage ratio, and maintenance of minimum net worth.

The fair value of the Company's Credit Facility, senior notes and the industrial revenue bonds approximate their carrying values. The fair value of the subordinated promissory notes, based on a discounted cash flow method, was approximately \$3,848 and \$9,566 at March 31, 2004 and 2003, respectively.

Maturities of long-term debt are as follows: 2005 \$4,884; 2006 \$1,739; 2007 \$77,362; 2008 \$10,406; 2009 \$10,413; thereafter, \$121,043 through 2012.

In addition, the Company granted the underwriters of its public offering a 30-day option to purchase additional shares to cover over-allotments. In April 2001, the underwriters exercised the over-allotment option and the Company sold an additional 450,000 shares of its Common stock. The net proceeds from the sales totaled \$122,406 and were used to repay long-term debt.

On January 3, 2001, the Company granted to its two top executive officers a total of 27,000 shares of its Common stock, valued at \$1,043 at issuance, which vests over three years and is included in capital in excess of par value.

During fiscal 2002, 1,500,000 shares of Class D common stock were converted to shares of the Company's

Common stock. During fiscal 2003, the remaining 1,848,535 shares of Class D common stock outstanding were converted to common stock.

## 8. Earnings Per Share

The following is a reconciliation between the weighted average common shares outstanding used in the calculation of basic and diluted earnings per share:

	Year ended March 31,		
	2004	2003	2002
	(thousands)		
Weighted average common shares outstanding basic	15,842	15,833	15,784
Net effect of dilutive stock options	76	91	134
Weighted average common shares outstanding diluted	15,918	15,924	15,918

Options to purchase 462,100 shares of Common stock, at prices ranging from \$38.35 per share to \$44.91 per share, were outstanding during fiscal 2004. These options were not included in the computation of diluted earnings per share because the exercise price was greater than the average market price of the Common stock during the twelve months ended March 31, 2004 and, therefore, the effect would be antidilutive.

fair value to the assets of EFS. As a result, the Company assigned \$940 to intangible assets, adjusted its deferred taxes and reduced goodwill by \$734.

During fiscal 2003, the Company re-evaluated its allocation of fair value to the assets, adjusted its deferred taxes and reduced a note payable to the seller (see Note 6) for EFS resulting in a reduction of goodwill by \$4,756. Also during fiscal 2003, the Company re-evaluated its allocation of fair value to the assets of select subsidiaries acquired during fiscal 2001 and reduced goodwill by \$971.

### 13. Commitments and Contingencies

Certain of the Company's business operations and facilities are subject to a number of federal, state and local environmental laws and regulations. The Company is indemnified for environmental liabilities related to assets purchased from IKON Office Solutions, Inc. (formerly Alco Standard Corporation) which existed prior to the acquisition of the assets in July 1993. In the opinion of management, there are no significant environmental concerns which would have a material effect on the financial condition or operating results of the Company which are not covered by such indemnification.

The Company is involved in certain litigation matters arising out of its normal business activities. In the opinion of management, the ultimate resolution of such litigation will not have a material effect on the financial condition or operating results of the Company.

### 14. Collective Bargaining Agreements

Approximately 14% of the Company's labor force is covered under collective bargaining agreements. These collective bargaining agreements expire over the next several years including one operating location that will expire in the next 12 months, and one operating location which expired and is currently in administrative proceedings. The collective bargaining agreement, which expired, represents approximately 2% of the Company's labor force.

**16. Discontinued Operations**

In March of 2003, the Company designated its Metals businesses ("Metals") as discontinued operations and attempted to sell these businesses in fiscal 2004. While the Company did not complete the sale in fiscal year 2004, it is continuing to pursue the sale of these businesses or the underlying assets. Current discussions are underway with several potential buyers. The businesses that comprise the discontinued operations manufacture, machine, process and distribute metal products to customers in the computer, container and office furniture industries, primarily within North America, in addition to providing structural steel erection services. The Company had historically stated that it would retain Metals due to its positive cash flows which were used to fund the growth of its aviation businesses. However, the Company decided to focus on its core capabilities in aviation and sell Metals. For business segment reporting, Metals was previously reported as a separate segment. Revenues from the Metals businesses were \$44,989, \$42,560 and \$47,427 for the years ended March 31, 2004, 2003 and 2002, respectively. The (loss) income from discontinued operations for the years ended March 31, 2004, 2003 and 2002 was \$(1,188), net of income tax benefit of \$(654), \$(859), net of income tax benefit of \$(474), and \$320, net of income taxes of \$145, respectively. Interest (expense) income of \$(528), \$354 and \$43 was allocated to Metals for the years ended March 31, 2004, 2003 and 2002, respectively, based upon the actual borrowings of the operations. Such amounts are included in the (loss) income from discontinued operations of those years.

The components of assets held for sale and liabilities related to the assets held for sale of the discontinued operations in the consolidated balance sheet are as follows:

	March 31,
