**PIK** Payment In Kind.

- (1) Senior floating-rate interests often require prepayments from excess cash flows or permit the borrower to repay at its election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, it is anticipated that the senior floating-rate interests will have an expected average life of approximately two to three years. The stated interest rate represents the weighted average interest rate of all contracts within the senior loan facility. Senior Loans typically have rates of interest which are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate, plus a premium. These base lending rates are primarily the London-Interbank Offered Rate ( LIBOR ), and secondarily the prime rate offered by one or more major United States banks (the Prime Rate ) and the certificate of deposit ( CD ) rate or other base lending rates used by commercial lenders.
- (2) Unfunded loan commitments. The Trust may enter into certain agreements all or a portion of which may be unfunded. The Trust is obligated to fund these commitments at the Borrower s discretion.
- (3) Security valued at fair value using methods determined in good faith by or at the direction of the Trustees of the Trust.
- (4) Defaulted security. Currently the issuer is in default with respect to interest payments.
- (5) Security exempt from registration under Rule 144A of the Securities Act of 1933.
