Form 10-Q
May 02, 2012

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2012

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-11840

THE ALLSTATE CORPORATION

(Exact name of registrant as specified in its charter)

Delaware

36-3871531

Edgar Filing: ALLSTATE CORP - Form 10-Q

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

2775 Sanders Road, Northbrook, Illinois 60062
(Address of principal executive offices) (Zip Code)

(847) 402-5000

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of April 18, 2012, the registrant had 491,360,562 common shares, \$.01 par value, outstanding.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. General

Basis of presentation

The accompanying condensed consolidated financial statements include the accounts of The Allstate Corporation and its wholly owned subsidiaries, primarily Allstate Insurance Company (AIC), a property-liability insurance company with various property-liability and life and investment subsidiaries, including Allstate Life Insurance Company (ALIC) (collectively referred to as the Company or Allstate).

The condensed consolidated financial statements and notes as of March 31, 2012 and for the three-month periods ended March 31, 2012 and 2011 are unaudited. The condensed consolidated financial statements reflect all adjustments (consisting only of normal recurring accruals), which are, in the opinion of management, necessary for the fair presentation of the financial position, results of operations and cash flows for the interim periods. These condensed consolidated financial statements and notes should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011. The results of operations for the interim periods should not be considered indicative of results to be expected for the full year.

To conform to the current year presentation, certain amounts in the prior year condensed consolidated financial statements and notes have been reclassified.

Adopted accounting standards

Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts

In October 2010, the FASB issued guidance modifying the definition of the types of costs incurred by insurance entities that can be capitalized in the acquisition of new and renewal insurance contracts. The guidance specifies that the costs must be directly related to the successful acquisition of insurance contracts. The guidance also specifies that advertising costs should be included as deferred acquisition costs (DAC) only when the direct-response advertising accounting criteria are met. The Company adopted the new guidance on a retrospective basis as of January 1, 2012. The cumulative effect of the adoption to shareholders' equity as of January 1, 2011 was a decrease of \$399 million, net of taxes. The impacts of the retrospective adjustments on previously issued financial statements are summarized in the following table.

(\$ in millions, except per share data)

Edgar Filing: ALLSTATE CORP - Form 10-Q

	Previously Reported	As Adjusted
Three months ended March 31, 2011		
Amortization of DAC	\$ 1,051	\$ 984
Operating costs and expenses	838	900
Loss on disposition of operations	(23)	(20)
Income tax expense	215	218
Net income	519	524
Net income per share - Basic	0.98	0.99
Net income per share - Diluted	0.97	0.98
As of December 31, 2011		
DAC	4,443	3,871
Deferred income taxes	520	722
Reserve for life-contingent contract benefits	14,449	14,406
Other liabilities and accrued expenses	5,929	5,978
Retained income	32,321	31,909
Unrealized adjustment to DAC, DSI and insurance reserves	(504)	(467)
Unrealized foreign currency translation adjustments	57	56

In future periods, operating costs and expenses will increase since a lower amount of acquisition costs will be capitalized, which will be partially offset by a decrease in amortization of DAC due to the retrospective reduction of the DAC balance. The effect of the adoption on net income and related per share amounts for interim periods after

adoption is not determinable since calculations under the historic DAC accounting policy were not continued after adoption.

Criteria for Determining Effective Control for Repurchase Agreements

In April 2011, the FASB issued guidance modifying the assessment criteria of effective control for repurchase agreements. The new guidance removes the criteria requiring an entity to have the ability to repurchase or redeem financial assets on substantially the agreed terms and the collateral maintenance guidance related to that criteria. The guidance is to be applied prospectively to transactions or modifications of existing transactions that occur during reporting periods beginning on or after December 15, 2011. The adoption of this guidance as of January 1, 2012 had no impact on the Company's results of operations or financial position.

Amendments to Fair Value Measurement and Disclosure Requirements

In May 2011, the FASB issued guidance that clarifies the application of existing fair value measurement and disclosure requirements and amends certain fair value measurement principles, requirements and disclosures. Changes were made to improve consistency in global application. The guidance is to be applied prospectively for reporting periods beginning after December 15, 2011. The adoption of this guidance as of January 1, 2012 had no impact on the Company's results of operations or financial position.

Presentation of Comprehensive Income

In June and December 2011, the FASB issued guidance amending the presentation of comprehensive income and its components. Under the new guidance, a reporting entity has the option to present comprehensive income in a single continuous statement or in two separate but consecutive statements. The Company adopted the new guidance in the first quarter of 2012. The new guidance affects presentation only and therefore had no impact on the Company's results of operations or financial position.

Intangibles Goodwill and Other

In September 2011, the FASB issued guidance providing the option to first assess qualitative factors, such as macroeconomic conditions and industry and market considerations, to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If impairment is indicated by the qualitative assessment, then it is necessary to perform the two-step goodwill impairment test. If the option is not elected, the guidance requiring the two-step goodwill impairment test is unchanged. The adoption of this guidance as of January 1, 2012 had no impact on the Company's results of operations or financial position.

Pending accounting standard

Disclosures about Offsetting Assets and Liabilities for Financial Instruments and Derivative Instruments

In December 2011, the FASB issued guidance requiring expanded disclosures, including both gross and net information, for financial instruments and derivative instruments that are either offset in the reporting entity's financial statements or those that are subject to an enforceable master netting arrangement or similar agreement. The guidance is effective for reporting periods beginning on or after January 1, 2013 and is to be applied retrospectively. The new guidance affects disclosures only and will have no impact on the Company's results of operations or financial position.

2. Earnings per share

Basic earnings per share is computed using the weighted average number of common shares outstanding, including unvested participating restricted stock units. Diluted earnings per share is computed using the weighted average number of common and dilutive potential common shares outstanding. For the Company, dilutive potential common shares consist of outstanding stock options and unvested non-participating restricted stock units and performance stock awards.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The computation of basic and diluted earnings per share for the three months ended March 31 is presented in the following table.

(\$ in millions, except per share data)	2012	2011
Numerator:		
Net income	\$ 766	\$ 524
Denominator:		
Weighted average common shares outstanding	498.7	531.0
Effect of dilutive potential common shares:		
Stock options	2.0	2.2
Restricted stock units and performance stock awards (non-participating)	0.8	0.4
Weighted average common and dilutive potential common shares outstanding	501.5	533.6
Earnings per share - Basic	\$ 1.54	\$ 0.99
Earnings per share - Diluted	\$ 1.53	\$ 0.98

The effect of dilutive potential common shares does not include the effect of options with an anti-dilutive effect on earnings per share because their exercise prices exceed the average market price of Allstate common shares during the period or for which the unrecognized compensation cost would have an anti-dilutive effect. Options to purchase 28.5 million and 30.4 million Allstate common shares, with exercise prices ranging from \$25.91 to \$62.84 and \$27.36 to \$62.84, were outstanding for the three-month periods ended March 31, 2012 and 2011, respectively, but were not included in the computation of diluted earnings per share in those periods.

3. Supplemental Cash Flow Information

Non-cash modifications of certain mortgage loans, fixed income securities, limited partnership interests and other investments, as well as mergers completed with equity securities, totaled \$22 million and \$53 million for the three months ended March 31, 2012 and 2011, respectively. Non-cash financing activities include \$39 million related to the issuance of Allstate shares for vested restricted stock units for the three months ended March 31, 2012.

Liabilities for collateral received in conjunction with the Company's securities lending program and over-the-counter (OTC) derivatives are reported in other liabilities and accrued expenses or other investments. The accompanying cash flows are included in cash flows from operating activities in the Condensed Consolidated Statements of Cash Flows along with the activities resulting from management of the proceeds, which for the three months ended March 31 are as follows:

(\$ in millions)	2012	2011
Net change in proceeds managed		
Net change in short-term investments	\$ (210)	\$ (351)
Operating cash flow used	(210)	(351)
Net change in cash	(2)	(3)
Net change in proceeds managed	\$ (212)	\$ (354)
Net change in liabilities		
Liabilities for collateral, beginning of year	\$ (462)	\$ (484)

Edgar Filing: ALLSTATE CORP - Form 10-Q

Liabilities for collateral, end of period		(674)		(838)
Operating cash flow provided	\$	212	\$	354

4. Investments**Fair values**

The amortized cost, gross unrealized gains and losses and fair value for fixed income securities are as follows:

(\$ in millions)	Amortized cost	Gross unrealized Gains	Losses	Fair value
March 31, 2012				
U.S. government and agencies	\$ 5,259	\$ 287	\$ (5)	\$ 5,541
Municipal	12,970	864	(220)	13,614
Corporate	43,819	2,760	(248)	46,331
Foreign government	1,794	196	(1)	1,989
Residential mortgage-backed securities (RMBS)	3,959	126	(357)	3,728
Commercial mortgage-backed securities (CMBS)	1,864	63	(174)	1,753
Asset-backed securities (ABS)	4,372	108	(238)	4,242
Redeemable preferred stock	23	2	--	25
Total fixed income securities	\$ 74,060	\$ 4,406	\$ (1,243)	\$ 77,223
December 31, 2011				
U.S. government and agencies	\$ 5,966	\$ 349	\$ --	\$ 6,315
Municipal	13,634	863	(256)	14,241
Corporate	41,217	2,743	(379)	43,581
Foreign government	1,866	216	(1)	2,081
RMBS	4,532	110	(521)	4,121
CMBS	1,962	48	(226)	1,784
ABS	4,180	73	(287)	3,966
Redeemable preferred stock	22	2	--	24
Total fixed income securities	\$ 73,379	\$ 4,404	\$ (1,670)	\$ 76,113

Scheduled maturities

The scheduled maturities for fixed income securities are as follows as of March 31, 2012:

(\$ in millions)	Amortized cost	Fair value
Due in one year or less	\$ 4,031	\$ 4,081
Due after one year through five years	20,971	21,893
Due after five years through ten years	23,172	24,703
Due after ten years	17,555	18,576
	65,729	69,253
RMBS and ABS	8,331	7,970
Total	\$ 74,060	\$ 77,223

Edgar Filing: ALLSTATE CORP - Form 10-Q

Actual maturities may differ from those scheduled as a result of prepayments by the issuers. Because of the potential for prepayment on RMBS and ABS, they are not categorized by contractual maturity. CMBS are categorized by contractual maturity because they generally are not subject to prepayment risk.

Net investment income

Net investment income for the three months ended March 31 is as follows:

(\$ in millions)	2012	2011
Fixed income securities	\$ 806	\$ 900
Equity securities	21	19
Mortgage loans	93	89
Limited partnership interests (1)	109	10
Short-term investments	1	2
Other	30	11
Investment income, before expense	1,060	1,031
Investment expense	(49)	(49)
Net investment income	\$ 1,011	\$ 982

(1) Income from limited partnership interests accounted for under the equity method of accounting (EMA) is reported in net investment income in 2012 and realized capital gains and losses in 2011.

Realized capital gains and losses

Realized capital gains and losses by asset type for the three months ended March 31 are as follows:

(\$ in millions)	2012	2011
Fixed income securities	\$ (29)	\$ (27)
Equity securities	159	122
Mortgage loans	(1)	(6)
Limited partnership interests (1)	10	68
Derivatives	21	(67)
Other	8	6
Realized capital gains and losses	\$ 168	\$ 96

(1) Income from EMA limited partnerships is reported in net investment income in 2012 and realized capital gains and losses in 2011.

Realized capital gains and losses by transaction type for the three months ended March 31 are as follows:

(\$ in millions)	2012	2011
Impairment write-downs	\$ (39)	\$ (114)
Change in intent write-downs	(44)	(69)
	(83)	(183)

Edgar Filing: ALLSTATE CORP - Form 10-Q

Net other-than-temporary impairment losses
recognized in earnings

Sales	229	283
Valuation of derivative instruments	11	22
Settlements of derivative instruments	11	(89)
EMA limited partnership income	--	63
Realized capital gains and losses	\$ 168	\$ 96

Gross gains of \$115 million and \$211 million and gross losses of \$90 million and \$88 million were realized on sales of fixed income securities during the three months ended March 31, 2012 and 2011, respectively.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Other-than-temporary impairment losses by asset type for the three months ended March 31 are as follows:

Other	2	--	2	(1)	--	(1)
Other-than-temporary impairment losses	\$ (87)	\$ 4	\$ (83)	\$ (156)	\$ (27)	\$ (183)

The total amount of other-than-temporary impairment losses included in accumulated other comprehensive income at the time of impairment for fixed income securities, which were not included in earnings, are presented in the following table. The amount excludes \$225 million and \$172 million as of March 31, 2012 and December 31, 2011, respectively, of net unrealized gains related to changes in valuation of the fixed income securities subsequent to the impairment measurement date.

(\$ in millions)	March 31, 2012	December 31, 2011
Municipal	\$ (11)	\$ (11)
Corporate	(35)	(35)
RMBS	(292)	(353)
CMBS	(20)	(19)
ABS	(21)	(21)
Total	\$ (379)	\$ (439)

Rollforwards of the cumulative credit losses recognized in earnings for fixed income securities held as of the end of the period are as follows:

(\$ in millions)	Three months ended March 31	
	2012	2011
Beginning balance	\$ (944)	\$ (1,046)
Additional credit loss for securities previously other-than-temporarily impaired	(20)	(59)
Additional credit loss for securities not previously other-than-temporarily impaired	(9)	(27)
Reduction in credit loss for securities disposed or collected	146	153
Reduction in credit loss for securities the Company has made the decision to sell or more likely than not will be required to sell	7	15

Edgar Filing: ALLSTATE CORP - Form 10-Q

Change in credit loss due to accretion of increase in cash flows		--		1
Ending balance	\$	(820)	\$	(963)

The Company uses its best estimate of future cash flows expected to be collected from the fixed income security, discounted at the security's original or current effective rate, as appropriate, to calculate a recovery value and determine whether a credit loss exists. The determination of cash flow estimates is inherently subjective and methodologies may vary depending on facts and circumstances specific to the security. All reasonably available information relevant to the collectability of the security, including past events, current conditions, and reasonable and supportable assumptions and forecasts, are considered when developing the estimate of cash flows expected to be collected. That information generally includes, but is not limited to, the remaining payment terms of the security, prepayment speeds, foreign exchange rates, the financial condition and future earnings potential of the issue or

issuer, expected defaults, expected recoveries, the value of underlying collateral, vintage, geographic concentration, available reserves or escrows, current subordination levels, third party guarantees and other credit enhancements. Other information, such as industry analyst reports and forecasts, sector credit ratings, financial condition of the bond insurer for insured fixed income securities, and other market data relevant to the realizability of contractual cash flows, may also be considered. The estimated fair value of collateral will be used to estimate recovery value if the Company determines that the security is dependent on the liquidation of collateral for ultimate settlement. If the estimated recovery value is less than the amortized cost of the security, a credit loss exists and an other-than-temporary impairment for the difference between the estimated recovery value and amortized cost is recorded in earnings. The portion of the unrealized loss related to factors other than credit remains classified in accumulated other comprehensive income. If the Company determines that the fixed income security does not have sufficient cash flow or other information to estimate a recovery value for the security, the Company may conclude that the entire decline in fair value is deemed to be credit related and the loss is recorded in earnings.

Unrealized net capital gains and losses

Unrealized net capital gains and losses included in accumulated other comprehensive income are as follows:

(\$ in millions)	Fair value	Gross unrealized Gains	Losses	Unrealized net gains (losses)
March 31, 2012				
Fixed income securities	\$ 77,223	\$ 4,406	\$ (1,243)	\$ 3,163
Equity securities	3,847	464	(47)	417
Short-term investments	1,886	--	--	--
Derivative instruments (1)	(16)	2	(23)	(21)
EMA limited partnerships (2)				1
Unrealized net capital gains and losses, pre-tax				3,560
Amounts recognized for:				
Insurance reserves (3)				(443)
DAC and DSI (4)				(230)
Amounts recognized				(673)
Deferred income taxes				(1,013)
Unrealized net capital gains and losses, after-tax				\$ 1,874

(1) Included in the fair value of derivative instruments are \$(10) million classified as assets and \$6 million classified as liabilities.

(2) Unrealized net capital gains and losses for limited partnership interests represent the Company's share of EMA limited partnerships' other comprehensive income. Fair value and gross gains and losses are not applicable.

(3) The insurance reserves adjustment represents the amount by which the reserve balance would increase if the net unrealized gains in the applicable product portfolios were realized and reinvested at current lower interest rates, resulting in a premium deficiency. Although the Company evaluates premium deficiencies on the combined performance of life insurance and immediate annuities with life contingencies, the adjustment primarily relates to structured settlement annuities with life contingencies, in addition to annuity buy-outs and certain payout annuities with life contingencies.

(4) The DAC and DSI adjustment balance represents the amount by which the amortization of DAC and DSI would increase or decrease if the unrealized gains or losses in the respective product portfolios were realized.

December 31, 2011	Fair value	Gross unrealized Gains	Losses	Unrealized net gains (losses)
Fixed income securities	\$ 76,113	\$ 4,404	\$ (1,670)	\$ 2,734
Equity securities	4,363	369	(209)	160

Edgar Filing: ALLSTATE CORP - Form 10-Q

Short-term investments	1,291	--	--	--
Derivative instruments (1)	(12)	3	(20)	(17)
EMA limited partnerships				2
Unrealized net capital gains and losses, pre-tax				2,879
Amounts recognized for:				
Insurance reserves				(594)
DAC and DSI				(124)
Amounts recognized				(718)
Deferred income taxes				(761)
Unrealized net capital gains and losses, after-tax			\$	1,400

(1) Included in the fair value of derivative instruments are \$(5) million classified as assets and \$7 million classified as liabilities.

Change in unrealized net capital gains and losses

The change in unrealized net capital gains and losses for the three months ended March 31, 2012 is as follows:

(\$ in millions)	
Fixed income securities	\$ 429
Equity securities	257
Derivative instruments	(4)
EMA limited partnerships	(1)
Total	681
Amounts recognized for:	
Insurance reserves	151
DAC and DSI	(106)
Amounts recognized	45
Deferred income taxes	(252)
Increase in unrealized net capital gains and losses	\$ 474

Portfolio monitoring

The Company has a comprehensive portfolio monitoring process to identify and evaluate each fixed income and equity security whose carrying value may be other-than-temporarily impaired.

For each fixed income security in an unrealized loss position, the Company assesses whether management with the appropriate authority has made the decision to sell or whether it is more likely than not the Company will be required to sell the security before recovery of the amortized cost basis for reasons such as liquidity, contractual or regulatory purposes. If a security meets either of these criteria, the security's decline in fair value is considered other than temporary and is recorded in earnings.

If the Company has not made the decision to sell the fixed income security and it is not more likely than not the Company will be required to sell the fixed income security before recovery of its amortized cost basis, the Company evaluates whether it expects to receive cash flows sufficient to recover the entire amortized cost basis of the security. The Company calculates the estimated recovery value by discounting the best estimate of future cash flows at the security's original or current effective rate, as appropriate, and compares this to the amortized cost of the security. If the Company does not expect to receive cash flows sufficient to recover the entire amortized cost basis of the fixed income security, the credit loss component of the impairment is recorded in earnings, with the remaining amount of the unrealized loss related to other factors recognized in other comprehensive income.

For equity securities, the Company considers various factors, including whether it has the intent and ability to hold the equity security for a period of time sufficient to recover its cost basis. Where the Company lacks the intent and ability to hold to recovery, or believes the recovery period is extended, the equity security's decline in fair value is considered other than temporary and is recorded in earnings. For equity securities managed by a third party, the Company has contractually retained its decision making authority as it pertains to selling equity securities that are in an unrealized loss position.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The Company's portfolio monitoring process includes a quarterly review of all securities to identify instances where the fair value of a security compared to its amortized cost (for fixed income securities) or cost (for equity securities) is below established thresholds. The process also includes the monitoring of other impairment indicators such as ratings, ratings downgrades and payment defaults. The securities identified, in addition to other securities for which the Company may have a concern, are evaluated for potential other-than-temporary impairment using all reasonably available information relevant to the collectability or recovery of the security. Inherent in the Company's evaluation of other-than-temporary impairment for these fixed income and equity securities are assumptions and estimates about the financial condition and future earnings potential of the issue or issuer. Some of the factors that may be considered in evaluating whether a decline in fair value is other than temporary are: 1) the financial condition, near-term and long-term prospects of the issue or issuer, including relevant industry specific market conditions and trends, geographic location and implications of rating agency actions and offering prices; 2) the specific reasons that a security is in an unrealized loss position, including overall market conditions which could affect liquidity; and 3) the length of time and extent to which the fair value has been less than amortized cost or cost.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The following table summarizes the gross unrealized losses and fair value of fixed income and equity securities by the length of time that individual securities have been in a continuous unrealized loss position.

(\$ in millions)	Number of issues	Less than 12 months		Number of issues	12 months or more		Total unrealized losses

Total fixed income securities	809	\$ 5,431	\$ (202)	879	\$ 5,851	\$ (1,468)	\$ (1,670)

As of March 31, 2012, \$505 million of unrealized losses are related to securities with an unrealized loss position less than 20% of amortized cost or cost, the degree of which suggests that these securities do not pose a high risk of being other-than-temporarily impaired. Of the \$505 million, \$325 million are related to unrealized losses on investment grade fixed income securities. Investment grade is defined as a security having a rating of Aaa, Aa, A or Baa from Moody's, a rating of AAA, AA, A or BBB from Standard & Poor's (S&P), Fitch, Dominion or Realpoint, a rating of aaa, aa, a or bbb from A.M. Best, or a comparable internal rating if an externally provided rating is not available. Unrealized losses on investment grade securities are principally related to widening credit spreads or rising interest rates since the time of initial purchase.

As of March 31, 2012, the remaining \$785 million of unrealized losses are related to securities in unrealized loss positions greater than or equal to 20% of amortized cost or cost. Investment grade fixed income securities comprising \$241 million of these unrealized losses were evaluated

Edgar Filing: ALLSTATE CORP - Form 10-Q

based on factors such as expected cash flows and the financial condition and near-term and long-term prospects of the issue or issuer and were determined to have adequate resources to fulfill contractual obligations. Of the \$785 million, \$528 million are related to below investment grade fixed income securities and \$16 million are related to equity securities. Of these amounts, \$409 million of the below investment grade fixed income securities had been in an unrealized loss position greater than or equal to 20% of amortized cost for a period of twelve or more consecutive months as of March 31, 2012. Unrealized losses on below investment grade securities are principally related to RMBS, CMBS and ABS and were

the result of wider credit spreads resulting from higher risk premiums since the time of initial purchase, largely due to macroeconomic conditions and credit market deterioration, including the impact of lower real estate valuations.

RMBS, CMBS and ABS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities positions in the respective securitization trusts, security specific expectations of cash flows, and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of (i) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns, (ii) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread, and (iii) for RMBS and ABS in an unrealized loss position, credit enhancements from reliable bond insurers, where applicable. Municipal bonds in an unrealized loss position were evaluated based on the quality of the underlying securities. Unrealized losses on equity securities are primarily related to temporary equity market fluctuations of securities that are expected to recover.

As of March 31, 2012, the Company has not made the decision to sell and it is not more likely than not the Company will be required to sell fixed income securities with unrealized losses before recovery of the amortized cost basis. As of March 31, 2012, the Company had the intent and ability to hold equity securities with unrealized losses for a period of time sufficient for them to recover.

Limited partnerships

As of March 31, 2012 and December 31, 2011, the carrying value of equity method limited partnerships totaled \$3.36 billion and \$3.13 billion, respectively. The Company recognizes an impairment loss for equity method limited partnerships when evidence demonstrates that the loss is other than temporary. Evidence of a loss in value that is other than temporary may include the absence of an ability to recover the carrying amount of the investment or the inability of the investee to sustain a level of earnings that would justify the carrying amount of the investment. The Company had no write-downs related to equity method limited partnerships for the three months ended March 31, 2012 and 2011.

As of March 31, 2012 and December 31, 2011, the carrying value for cost method limited partnerships was \$1.28 billion and \$1.57 billion, respectively. To determine if an other-than-temporary impairment has occurred, the Company evaluates whether an impairment indicator has occurred in the period that may have a significant adverse effect on the carrying value of the investment. Impairment indicators may include: significantly reduced valuations of the investments held by the limited partnerships; actual recent cash flows received being significantly less than expected cash flows; reduced valuations based on financing completed at a lower value; completed sale of a material underlying investment at a price significantly lower than expected; or any other adverse events since the last financial statements received that might affect the fair value of the investee's capital. Additionally, the Company's portfolio monitoring process includes a quarterly review of all cost method limited partnerships to identify instances where the net asset value is below established thresholds for certain periods of time, as well as investments that are performing below expectations, for further impairment consideration. If a cost method limited partnership is other-than-temporarily impaired, the carrying value is written down to fair value, generally estimated to be equivalent to the reported net asset value of the underlying funds. The Company had write-downs related to cost method limited partnerships for the three months ended March 31, 2012 and 2011 of \$2 million and \$1 million, respectively.

Mortgage loans

Mortgage loans are evaluated for impairment on a specific loan basis through a quarterly credit monitoring process and review of key credit quality indicators. Mortgage loans are considered impaired when it is probable that the Company will not collect the contractual principal and interest. Valuation allowances are established for impaired loans to reduce the carrying value to the fair value of the collateral less costs to sell

Edgar Filing: ALLSTATE CORP - Form 10-Q

or the present value of the loan's expected future repayment cash flows discounted at the loan's original effective interest rate. Impaired mortgage loans may not have a valuation allowance when the fair value of the collateral less costs to sell is higher than the carrying value. Mortgage loan valuation allowances are charged off when there is no reasonable expectation of recovery. The impairment evaluation is non-statistical in respect to the aggregate portfolio but considers facts and circumstances attributable to each loan. It is not considered probable that additional impairment losses, beyond those identified on a specific loan basis, have been incurred as of March 31, 2012.

Accrual of income is suspended for mortgage loans that are in default or when full and timely collection of principal and interest payments is not probable. Cash receipts on mortgage loans on nonaccrual status are generally recorded as a reduction of carrying value.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Debt service coverage ratio is considered a key credit quality indicator when mortgage loans are evaluated for impairment. Debt service coverage ratio represents the amount of estimated cash flows from the property available to the borrower to meet principal and interest payment obligations. Debt service coverage ratio estimates are updated annually or more frequently if conditions are warranted based on the Company's credit monitoring process.

The following table reflects the carrying value of non-impaired fixed rate and variable rate mortgage loans summarized by debt service coverage ratio distribution:

(\$ in millions)	March 31, 2012			December 31, 2011		
	Fixed rate mortgage loans	Variable rate mortgage loans	Total	Fixed rate mortgage loans	Variable rate mortgage loans	Total
Debt service coverage ratio distribution						
Below 1.0	\$ 289	\$ --	\$ 289	\$ 345	\$ --	\$ 345
1.0 - 1.25	1,536	44	1,580	1,527	44	1,571
1.26 - 1.50	1,660	23	1,683	1,573	24	1,597
Above 1.50	3,220	168	3,388	3,214	168	3,382
Total non-impaired mortgage loans	\$ 6,705	\$ 235	\$ 6,940	\$ 6,659	\$ 236	\$ 6,895

Mortgage loans with a debt service coverage ratio below 1.0 that are not considered impaired primarily relate to instances where the borrower has the financial capacity to fund the revenue shortfalls from the properties for the foreseeable term, the decrease in cash flows from the properties is considered temporary, or there are other risk mitigating circumstances such as additional collateral, escrow balances or borrower guarantees.

The net carrying value of impaired mortgage loans is as follows:

(\$ in millions)	March 31, 2012	December 31, 2011
Impaired mortgage loans with a valuation allowance	\$ 227	\$ 244
Impaired mortgage loans without a valuation allowance	--	--
Total impaired mortgage loans	\$ 227	\$ 244
Valuation allowance on impaired mortgage loans	\$ 60	\$ 63

The average balance of impaired loans was \$236 million and \$180 million for the three months ended March 31, 2012 and 2011, respectively.

The rollforward of the valuation allowance on impaired mortgage loans for the three months ended March 31 is as follows:

(\$ in millions)	2012	2011
Beginning balance	\$ 63	\$ 84
Net increase in valuation allowance	3	6
Charge offs	(6)	(13)

Edgar Filing: ALLSTATE CORP - Form 10-Q

Ending balance \$ 60 \$ 77

The carrying value of past due mortgage loans is as follows:

(\$ in millions)	March 31, 2012	December 31, 2011
Less than 90 days past due	\$ --	\$ --
90 days or greater past due	68	43
Total past due	68	43
Current loans	7,099	7,096
Total mortgage loans	\$ 7,167	\$ 7,139

5. Fair Value of Assets and Liabilities

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Assets and liabilities recorded on the Condensed Consolidated Statements of Financial Position at fair value are categorized in the fair value hierarchy based on the observability of inputs to the valuation techniques as follows:

Level 1: Assets and liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market that the Company can access.

Level 2: Assets and liabilities whose values are based on the following:

- (a) Quoted prices for similar assets or liabilities in active markets;
- (b) Quoted prices for identical or similar assets or liabilities in markets that are not active; or
- (c) Valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Level 3: Assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Unobservable inputs reflect the Company's estimates of the assumptions that market participants would use in valuing the assets and liabilities.

The availability of observable inputs varies by instrument. In situations where fair value is based on internally developed pricing models or inputs that are unobservable in the market, the determination of fair value requires more judgment. The degree of judgment exercised by the Company in determining fair value is typically greatest for instruments categorized in Level 3. In many instances, valuation inputs used to measure fair value fall into different levels of the fair value hierarchy. The category level in the fair value hierarchy is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company uses prices and inputs that are current as of the measurement date, including during periods of market disruption. In periods of market disruption, the ability to observe prices and inputs may be reduced for many instruments.

The Company is responsible for the determination of fair value and the supporting assumptions and methodologies. The Company gains assurance on the overall reasonableness and consistent application of valuation methodologies and inputs and compliance with accounting standards through the execution of various processes and controls designed to provide assurance that our assets and liabilities are appropriately valued. For fair values received from third parties or internally estimated, the Company's processes are designed to provide assurance that the valuation methodologies and inputs are appropriate and consistently applied, the assumptions are reasonable and consistent with the objective of determining fair value, and the fair values are accurately recorded. For example, on a continuing basis, the Company assesses the reasonableness of individual fair values that have stale security prices or that exceed certain thresholds as compared to previous fair values received from valuation service providers or brokers or derived from internal models. The Company performs procedures to understand and assess the methodologies, processes and controls of valuation service providers. In addition, the Company may validate the reasonableness of fair values by comparing information obtained from valuation service providers or brokers to other third party valuation sources for selected

Edgar Filing: ALLSTATE CORP - Form 10-Q

securities. The Company performs ongoing price validation procedures such as back-testing of actual sales, which corroborate the various inputs used in internal models to market observable data. When fair value determinations are expected to be more variable, the Company validates them through reviews by members of management who have relevant expertise and who are independent of those charged with executing investment transactions.

The Company has two types of situations where investments are classified as Level 3 in the fair value hierarchy. The first is where quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The second situation where the Company classifies securities in Level 3 is where specific inputs significant to the fair value estimation models are not market observable. This primarily occurs in the Company's use of broker quotes to value certain securities where the inputs have not been corroborated to be market observable, and the use of valuation models that use significant non-market observable inputs.

Certain assets are not carried at fair value on a recurring basis, including investments such as mortgage loans, limited partnership interests, bank loans and policy loans. Accordingly, such investments are only included in the fair value hierarchy disclosure when the investment is subject to remeasurement at fair value after initial recognition and the resulting remeasurement is reflected in the condensed consolidated financial statements. In addition, derivatives embedded in fixed income securities are not disclosed in the hierarchy as free-standing derivatives since they are presented with the host contracts in fixed income securities.

In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Summary of significant valuation techniques for assets and liabilities measured at fair value on a recurring basis

Level 1 measurements

- Fixed income securities: Comprise U.S. Treasuries. Valuation is based on unadjusted quoted prices for identical assets in active markets that the Company can access.
- Equity securities: Comprise actively traded, exchange-listed U.S. and international equity securities. Valuation is based on unadjusted quoted prices for identical assets in active markets that the Company can access.
- Short-term: Comprise actively traded money market funds that have daily quoted net asset values for identical assets that the Company can access.
- Separate account assets: Comprise actively traded mutual funds that have daily quoted net asset values for identical assets that the Company can access. Net asset values for the actively traded mutual funds in which the separate account assets are invested are obtained daily from the fund managers.

Level 2 measurements

- Fixed income securities:

U.S. government and agencies: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

Municipal: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

Corporate, including privately placed: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Also included are privately placed securities valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer.

Foreign government: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

RMBS and ABS: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Certain ABS are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable.

CMBS: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, collateral performance and credit spreads.

Redeemable preferred stock: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

- Equity securities: The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not active.

- Short-term: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. For certain short-term investments, amortized cost is used as the best estimate of fair value.

- Other investments: Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active.

OTC derivatives, including interest rate swaps, foreign currency swaps, foreign exchange forward contracts, certain options and certain credit default swaps, are valued using models that rely on inputs such as interest rate yield curves, currency rates, and counterparty credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Level 3 measurements

- Fixed income securities:

Municipal: ARS primarily backed by student loans that have become illiquid due to failures in the auction market are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses significant non-market observable inputs, including estimates of future coupon rates if auction failures continue, the anticipated date liquidity will return to the market and illiquidity premium. Also included are municipal bonds that are not rated by third party credit rating agencies but are rated by the National Association of Insurance Commissioners (NAIC). The primary inputs to the valuation of these municipal bonds include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads.

Corporate, including privately placed: Primarily valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Also included are equity-indexed notes which are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses significant non-market observable inputs, such as volatility. Other inputs include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate the credit quality and industry sector of the issuer.

RMBS, CMBS and ABS: Valued based on non-binding broker quotes received from brokers who are familiar with the investments and where the inputs have not been corroborated to be market observable.

- Equity securities: The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements.
- Other investments: Certain OTC derivatives, such as interest rate caps and floors, certain credit default swaps and certain options (including swaptions), are valued using models that are widely accepted in the financial services industry. These are categorized as Level 3 as a result of the significance of non-market observable inputs such as volatility. Other primary inputs include interest rate yield curves and credit spreads.
- Contractholder funds: Derivatives embedded in certain life and annuity contracts are valued internally using models widely accepted in the financial services industry that determine a single best estimate of fair value for the embedded derivatives within a block of contractholder liabilities. The models primarily use stochastically determined cash flows based on the contractual elements of embedded derivatives, projected option cost and applicable market data, such as interest rate yield curves and equity index volatility assumptions. These are categorized as Level 3 as a result of the significance of non-market observable inputs.

Assets and liabilities measured at fair value on a non-recurring basis

Mortgage loans written-down to fair value in connection with recognizing impairments are valued based on the fair value of the underlying collateral less costs to sell. Limited partnership interests written-down to fair value in connection with recognizing other-than-temporary impairments are valued using net asset values.

The following table summarizes the Company's assets and liabilities measured at fair value on a recurring and non-recurring basis as of March 31, 2012:

(\$ in millions)	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Counterparty and cash collateral netting	Balance as of March 31, 2012
Assets					
Fixed income securities:					
U.S. government and agencies	\$ 3,764	\$ 1,777	\$ --		\$ 5,541
Municipal	--	12,347	1,267		13,614

Total fixed income securities	3,764	70,377	3,082		77,223
Equity securities	2,984	750	113		3,847
Short-term investments	150	1,736	--		1,886
Other investments:					
Free-standing derivatives	--	374	2	\$ (103)	273
Separate account assets	7,355	--	--		7,355
Other assets	1	--	1		2
Total recurring basis assets	14,254	73,237	3,198	(103)	90,586
Non-recurring basis (1)	--	--	11		11
Total assets at fair value	\$ 14,254	\$ 73,237	\$ 3,209	\$ (103)	\$ 90,597
% of total assets at fair value	15.7 %	80.8 %	3.6 %	(0.1) %	100.0 %
Liabilities					
Contractholder funds:					
Derivatives embedded in life and annuity contracts	\$ --	\$ --	\$ (730)		\$ (730)
Other liabilities:					
Free-standing derivatives	--	(160)	(72)	\$ 65	(167)
Total liabilities at fair value	\$ --	\$ (160)	\$ (802)	\$ 65	\$ (897)
% of total liabilities at fair value	-- %	17.8 %	89.4 %	(7.2) %	100.0 %

(1) Includes \$8 million of mortgage loans and \$3 million of limited partnership interests written-down to fair value in connection with recognizing other-than-temporary impairments.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The following table summarizes quantitative information about the significant unobservable inputs used in Level 3 fair value measurements as of March 31, 2012.

(\$ in millions)	Fair value	Valuation technique	Unobservable input	Range	Weighted average
ARS backed by student loans	\$ 685	Discounted cash flow model	Anticipated date liquidity will return to the market	18 - 60 months	30 - 42 months
Derivatives embedded in life and annuity contracts Equity-indexed and forward starting options	\$ (591)	Stochastic cash flow model	Projected option cost	1.50 - 3.50%	3.35%

If the anticipated date liquidity will return to the market is sooner (later), it would result in a higher (lower) fair value. If the projected option cost increased (decreased), it would result in a higher (lower) liability fair value.

As of March 31, 2012, Level 3 fair value measurements include \$1.73 billion of fixed income securities valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable and \$461 million of municipal fixed income securities that are not rated by third party credit rating agencies. The Company does not develop the unobservable inputs used in measuring fair value; therefore, these are not included in the table above. However, an increase (decrease) in credit spreads for fixed income securities valued based on non-binding broker quotes would result in a lower (higher) fair value, and an increase (decrease) in the credit rating of municipal bonds that are not rated by third party credit rating agencies would result in a higher (lower) fair value.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The following table summarizes the Company's assets and liabilities measured at fair value on a recurring and non-recurring basis as of December 31, 2011:

(\$ in millions)	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Counterparty and cash collateral netting	Balance as of December 31, 2011

(2) Comprises \$9 million of assets and \$80 million of liabilities.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Transfers between level categorizations may occur due to changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads. Transfers between level categorizations may also occur due to changes in the valuation source. For example, in situations where a fair value quote is not provided by the Company's independent third-party valuation service provider and as a result the price is stale or has been replaced with a broker quote whose inputs have not been corroborated to be market observable, the security is transferred into Level 3. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred. Therefore, for all transfers into Level 3, all realized and changes in unrealized gains and losses in the quarter of transfer are reflected in the Level 3 rollforward table.

There were no transfers between Level 1 and Level 2 during the three months ended March 31, 2012 or 2011.

During the three months ended March 31, 2011, certain CMBS and ABS were transferred into Level 2 from Level 3 as a result of increased liquidity in the market and a sustained increase in the market activity for these assets. When transferring these securities into Level 2, the Company did not change the source of fair value estimates or modify the estimates received from independent third-party valuation service providers or the internal valuation approach. Accordingly, for securities included within this group, there was no change in fair value in conjunction with the transfer resulting in a realized or unrealized gain or loss.

Transfers into Level 3 during the three months ended March 31, 2012 and 2011 included situations where a fair value quote was not provided by the Company's independent third-party valuation service provider and as a result the price was stale or had been replaced with a broker quote where the inputs have not been corroborated to be market observable resulting in the security being classified as Level 3. Transfers out of Level 3 during the three months ended March 31, 2012 and 2011 included situations where a broker quote was used in the prior period and a fair value quote became available from the Company's independent third-party valuation service provider in the current period. A quote utilizing the new pricing source was not available as of the prior period, and any gains or losses related to the change in valuation source for individual securities were not significant.

The following table provides the change in unrealized gains and losses included in net income during the three months ended March 31 for Level 3 assets and liabilities held as of March 31.

(\$ in millions)	2012	2011
Assets		
Fixed income securities:		
Municipal	\$ (1)	\$ (11)
Corporate	3	9
RMBS	--	(40)
CMBS	(1)	(16)
ABS	13	2
Total fixed income securities	14	(56)
Equity securities	--	(10)
Other investments:		
Free-standing derivatives, net	15	3
Total recurring Level 3 assets	\$ 29	\$ (63)
Liabilities		
Contractholder funds:		
Derivatives embedded in life and annuity contracts	\$ (25)	\$ 8
Total recurring Level 3 liabilities	\$ (25)	\$ 8

The amounts in the table above represent gains and losses included in net income for the period of time that the asset or liability was determined to be in Level 3. These gains and losses total \$4 million for the three months ended March 31, 2012 and are reported as follows: \$24 million in realized capital gains and losses, \$5 million in net investment income, \$(56) million in interest credited to contractholder funds and \$31 million in life and annuity contract benefits. These gains and losses total \$(55) million for the three months ended March 31, 2011 and are reported as follows: \$(69) million in realized capital gains and losses, \$6 million in net investment income, \$(37) million in interest credited to contractholder funds and \$45 million in life and annuity contract benefits.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Presented below are the carrying values and fair value estimates of financial instruments not carried at fair value.

Financial assets

(\$ in millions)	March 31, 2012		December 31, 2011	
	Carrying value	Fair value	Carrying value	Fair value
Mortgage loans	\$ 7,167	\$ 7,439	\$ 7,139	\$ 7,350
Cost method limited partnerships	1,278	1,534	1,569	1,838
Bank loans	399	395	339	328

The fair value of mortgage loans is based on discounted contractual cash flows or, if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral. The fair value of cost method limited partnerships is determined using reported net asset values of the underlying funds. The fair value of bank loans, which are reported in other investments, is based on broker quotes from brokers familiar with the loans and current market conditions. The fair value measurements for mortgage loans, cost method limited partnerships and bank loans are categorized as Level 3.

Financial liabilities

(\$ in millions)	March 31, 2012		December 31, 2011	
	Carrying value	Fair value	Carrying value	Fair value
Contractholder funds on investment contracts	\$ 29,505	\$ 30,475	\$ 30,192	\$ 30,499
Long-term debt	6,058	6,688	5,908	6,312
Liability for collateral	674	674	462	462

The fair value of contractholder funds on investment contracts is based on the terms of the underlying contracts utilizing prevailing market rates for similar contracts adjusted for the Company's own credit risk. Deferred annuities included in contractholder funds are valued using discounted cash flow models which incorporate market value margins, which are based on the cost of holding economic capital, and the Company's own credit risk. Immediate annuities without life contingencies and fixed rate funding agreements are valued at the present value of future benefits using market implied interest rates which include the Company's own credit risk. The fair value measurements for contractholder funds on investment contracts are categorized as Level 3.

The fair value of long-term debt is based on market observable data (such as the fair value of the debt when traded as an asset) or, in certain cases, is determined using discounted cash flow calculations based on current interest rates for instruments with comparable terms and considers the Company's own credit risk. The liability for collateral is valued at carrying value due to its short-term nature. The fair value measurements for long-term debt and liability for collateral are categorized as Level 2.

6. Derivative Financial Instruments

Edgar Filing: ALLSTATE CORP - Form 10-Q

The Company uses derivatives to manage risks with certain assets and liabilities arising from the potential adverse impacts from changes in risk-free interest rates, negative equity market valuations, increases in credit spreads and foreign currency fluctuations, and for asset replication. The Company does not use derivatives for speculative purposes.

Property-Liability uses interest rate swaps, swaptions, futures and options to manage the interest rate risks of existing investments and to reduce exposure to rising or falling interest rates. Portfolio duration management is a risk management strategy that is principally employed by Property-Liability wherein financial futures and interest rate swaps are utilized to change the duration of the portfolio in order to offset the economic effect that interest rates would otherwise have on the fair value of its fixed income securities. Equity index futures and options are used by Property-Liability to offset valuation losses in the equity portfolio during periods of declining equity market values. Credit default swaps are typically used to mitigate the credit risk within the Property-Liability fixed income portfolio. Property-Liability uses futures to hedge the market risk related to deferred compensation liability contracts and forward contracts to hedge foreign currency risk associated with holding foreign currency denominated investments and foreign operations.

Asset-liability management is a risk management strategy that is principally employed by Allstate Financial to balance the respective interest-rate sensitivities of its assets and liabilities. Depending upon the attributes of the assets acquired and liabilities issued, derivative instruments such as interest rate swaps, caps, floors, swaptions and futures are utilized to change the interest rate characteristics of existing assets and liabilities to ensure the relationship is maintained within specified ranges and to reduce exposure to rising or falling interest rates. Allstate Financial uses financial futures and interest rate swaps to hedge anticipated asset purchases and liability issuances and futures and options for hedging the equity exposure contained in its equity indexed life and annuity product contracts that offer equity returns to contractholders. In addition, Allstate Financial uses interest rate swaps to hedge interest rate risk inherent in funding agreements. Allstate Financial uses foreign currency swaps primarily to reduce the foreign currency risk associated with issuing foreign currency denominated funding agreements and holding foreign currency denominated investments. Credit default swaps are also typically used to mitigate the credit risk within the Allstate Financial fixed income portfolio.

Asset replication refers to the synthetic creation of assets through the use of derivatives and primarily investment grade host bonds to replicate securities that are either unavailable in the cash markets or more economical to acquire in synthetic form. The Company replicates fixed income securities using a combination of a credit default swap and one or more highly rated fixed income securities to synthetically replicate the economic characteristics of one or more cash market securities.

The Company also has derivatives embedded in non-derivative host contracts that are required to be separated from the host contracts and accounted for at fair value. The Company's primary embedded derivatives are equity options in life and annuity product contracts, which provide equity returns to contractholders; equity-indexed notes containing equity call options, which provide a coupon payout that is determined using one or more equity-based indices; credit default swaps in synthetic collateralized debt obligations, which provide enhanced coupon rates as a result of selling credit protection; and conversion options in fixed income securities, which provide the Company with the right to convert the instrument into a predetermined number of shares of common stock.

When derivatives meet specific criteria, they may be designated as accounting hedges and accounted for as fair value, cash flow, foreign currency fair value or foreign currency cash flow hedges. Allstate Financial designates certain of its interest rate and foreign currency swap contracts and certain investment risk transfer reinsurance agreements as fair value hedges when the hedging instrument is highly effective in offsetting the risk of changes in the fair value of the hedged item. Allstate Financial designates certain of its foreign currency swap contracts as cash flow hedges when the hedging instrument is highly effective in offsetting the exposure of variations in cash flows for the hedged risk that could affect net income. Amounts are reclassified to net investment income or realized capital gains and losses as the hedged item affects net income.

The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are generally not representative of the potential for gain or loss on these agreements. However, the notional amounts specified in credit default swaps where the Company has sold credit protection represent the maximum amount of potential loss, assuming no recoveries.

Fair value, which is equal to the carrying value, is the estimated amount that the Company would receive or pay to terminate the derivative contracts at the reporting date. The carrying value amounts for OTC derivatives are further adjusted for the effects, if any, of legally enforceable master netting agreements and are presented on a net basis, by counterparty agreement, in the Condensed Consolidated Statements of Financial Position. For certain exchange traded derivatives, the exchange requires margin deposits as well as daily cash settlements of margin accounts. As of March 31, 2012, the Company pledged \$15 million of securities in the form of margin deposits.

For those derivatives which qualify for fair value hedge accounting, net income includes the changes in the fair value of both the derivative instrument and the hedged risk, and therefore reflects any hedging ineffectiveness. For cash flow hedges, gains and losses are amortized from accumulated other comprehensive income and are reported in net income in the same period the forecasted transactions being hedged impact net income. For embedded derivatives in fixed income securities, net income includes the change in fair value of the embedded derivative and accretion income related to the host instrument.

Non-hedge accounting is generally used for portfolio level hedging strategies where the terms of the individual hedged items do not meet the strict homogeneity requirements to permit the application of hedge accounting. For non-hedge derivatives, net income includes changes in fair value and accrued periodic settlements, when applicable. With the exception of non-hedge derivatives used for asset replication and non-hedge embedded

Edgar Filing: ALLSTATE CORP - Form 10-Q

derivatives, all of the Company's derivatives are evaluated for their ongoing effectiveness as either accounting hedge or non-hedge derivative financial instruments on at least a quarterly basis.

The following table provides a summary of the volume and fair value positions of derivative instruments as well as their reporting location in the Condensed Consolidated Statement of Financial Position as of March 31, 2012.

(\$ in millions, except number of contracts)

	Balance sheet location	Asset derivatives

Total	\$ 6	\$ (34)	\$ 41	(21)

The Company manages its exposure to credit risk by utilizing highly rated counterparties, establishing risk control limits, executing legally enforceable master netting agreements (MNAs) and obtaining collateral where appropriate. The Company uses MNAs for OTC derivative transactions that permit either party to net payments due for transactions and collateral is either pledged or obtained when certain predetermined exposure limits are exceeded. As of March 31, 2012, counterparties pledged \$61 million in cash and securities to the Company, and the

Edgar Filing: ALLSTATE CORP - Form 10-Q

Company pledged \$77 million in cash and securities to counterparties which includes \$27 million of collateral posted under MNAs for contracts containing credit-risk-contingent provisions that are in a liability position and \$50 million of collateral posted under MNAs for contracts without credit-risk-contingent liabilities. The Company has not incurred any losses on derivative financial instruments due to counterparty nonperformance. Other derivatives, including futures and certain option contracts, are traded on organized exchanges which require margin deposits and guarantee the execution of trades, thereby mitigating any potential credit risk.

Counterparty credit exposure represents the Company's potential loss if all of the counterparties concurrently fail to perform under the contractual terms of the contracts and all collateral, if any, becomes worthless. This

Edgar Filing: ALLSTATE CORP - Form 10-Q

exposure is measured by the fair value of OTC derivative contracts with a positive fair value at the reporting date reduced by the effect, if any, of legally enforceable master netting agreements.

The following table summarizes the counterparty credit exposure by counterparty credit rating as it relates to the Company's OTC derivatives.

(\$ in millions)	March 31, 2012				December 31, 2011			
	Number of counterparties	Notional amount (2)	Credit exposure (2)	Exposure, net of collateral (2)	Number of counterparties	Notional amount (2)	Credit exposure (2)	Exposure, net of collateral (2)
Rating (1)								
AA-	2	\$ 50	\$ 1	--	1	\$ 25	\$ 1	1
A+	4	2,952	21	2	4	3,026	26	5
A	3	3,141	19	3	3	5,307	15	1
A-	2	3,910	29	5	2	3,815	25	--
BBB+	1	5	40	40	2	57	41	41
Total	12	\$ 10,058	\$ 110	50	12	\$ 12,230	\$ 108	48

(1) Rating is the lower of S&P or Moody's ratings.

(2) Only OTC derivatives with a net positive fair value are included for each counterparty.

Market risk is the risk that the Company will incur losses due to adverse changes in market rates and prices. Market risk exists for all of the derivative financial instruments the Company currently holds, as these instruments may become less valuable due to adverse changes in market conditions. To limit this risk, the Company's senior management has established risk control limits. In addition, changes in fair value of the derivative financial instruments that the Company uses for risk management purposes are generally offset by the change in the fair value or cash flows of the hedged risk component of the related assets, liabilities or forecasted transactions.

Certain of the Company's derivative instruments contain credit-risk-contingent termination events, cross-default provisions and credit support annex agreements. Credit-risk-contingent termination events allow the counterparties to terminate the derivative on certain dates if AIC's, ALIC's or Allstate Life Insurance Company of New York's (ALNY) financial strength credit ratings by Moody's or S&P fall below a certain level or in the event AIC, ALIC or ALNY are no longer rated by both Moody's and S&P. Credit-risk-contingent cross-default provisions allow the counterparties to terminate the derivative instruments if the Company defaults by pre-determined threshold amounts on certain debt instruments. Credit-risk-contingent credit support annex agreements specify the amount of collateral the Company must post to counterparties based on AIC's, ALIC's or ALNY's financial strength credit ratings by Moody's or S&P, or in the event AIC, ALIC or ALNY are no longer rated by both Moody's and S&P.

The following summarizes the fair value of derivative instruments with termination, cross-default or collateral credit-risk-contingent features that are in a liability position, as well as the fair value of assets and collateral that are netted against the liability in accordance with provisions within legally enforceable MNAs.

Edgar Filing: ALLSTATE CORP - Form 10-Q

(\$ in millions)		March 31, 2012	December 31, 2011
Gross liability fair value of contracts containing credit-risk-contingent features	\$	92 \$	153
Gross asset fair value of contracts containing credit-risk-contingent features and subject to MNAs		(61)	(69)
Collateral posted under MNAs for contracts containing credit-risk-contingent features		(27)	(76)
Maximum amount of additional exposure for contracts with credit-risk-contingent features if all features were triggered concurrently	\$	4 \$	8

Credit derivatives - selling protection

Free-standing credit default swaps (CDS) are utilized for selling credit protection against a specified credit event. A credit default swap is a derivative instrument, representing an agreement between two parties to exchange the credit risk of a specified entity (or a group of entities), or an index based on the credit risk of a group of entities (all commonly referred to as the reference entity or a portfolio of reference entities), in return for a periodic premium. In selling protection, CDS are used to replicate fixed income securities and to complement the cash market when credit exposure to certain issuers is not available or when the derivative alternative is less expensive than the cash market alternative. CDS typically have a five-year term.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The following table shows the CDS notional amounts by credit rating and fair value of protection sold as of March 31, 2012:

(\$ in millions)	Notional amount					Total	Fair value
	AAA	AA	A	BBB	BB and lower		
Single name							
Investment grade corporate debt	\$ 5	\$ 90	\$ 108	\$ 155	\$ 25	\$ 383	\$ 1

Total	\$ 5	\$ 115	\$ 208	\$ 155	\$ 90	\$ 573	\$ (51)

The following table shows the CDS notional amounts by credit rating and fair value of protection sold as of December 31, 2011:

(\$ in millions)	Notional amount				Total	Fair value
	AA	A	BBB	BB and lower		
Single name						
Investment grade corporate debt	\$ 90	\$ 88	\$ 160	\$ 30	\$ 368	\$ (7)
High yield debt	--	--	--	2	2	--
Municipal	135	--	--	--	135	(12)
Subtotal	225	88	160	32	505	(19)
Baskets						
Tranche						
Investment grade corporate debt	--	--	--	65	65	(29)
First-to-default						
Municipal	--	100	--	--	100	(33)
Subtotal	--	100	--	65	165	(62)
Total	\$ 225	\$ 188	\$ 160	\$ 97	\$ 670	\$ (81)

In selling protection with CDS, the Company sells credit protection on an identified single name, a basket of names in a first-to-default (FTD) structure or a specific tranche of a basket, or credit derivative index (CDX) that is generally investment grade, and in return receives periodic premiums through expiration or termination of the agreement. With single name CDS, this premium or credit spread generally corresponds to the difference between the yield on the reference entity's public fixed maturity cash instruments and swap rates at the time the agreement is executed. With a FTD basket or a tranche of a basket, because of the additional credit risk inherent in a basket of named reference entities, the premium generally corresponds to a high proportion of the sum of the credit spreads of the names in the basket and the correlation between the names. CDX index is utilized to take a position on multiple (generally 125) reference entities. Credit events are typically defined as bankruptcy, failure to pay, or restructuring, depending on the nature of the reference entities. If a credit event occurs, the Company settles with the counterparty, either through physical settlement or cash settlement. In a physical settlement, a reference asset is delivered by the buyer of protection to the Company, in exchange for cash payment at par, whereas in a cash settlement, the Company pays the difference between par and the prescribed value of the reference asset. When a credit event occurs in a single name or FTD basket (for FTD, the first credit event occurring for any one name in the basket), the contract terminates at the time of settlement. When a credit event occurs in a tranche of a basket, there is no immediate impact to the Company until cumulative losses in the basket exceed the contractual subordination. To date, realized losses have not exceeded the subordination. For CDX index, the reference entity's name incurring the credit event is removed from the index while the contract continues until expiration. The maximum payout on a

CDS is the contract notional amount. A physical settlement may afford the Company with recovery rights as the new owner of the asset.

The Company monitors risk associated with credit derivatives through individual name credit limits at both a credit derivative and a combined cash instrument/credit derivative level. The ratings of individual names for which protection has been sold are also monitored.

In addition to the CDS described above, the Company's synthetic collateralized debt obligations contain embedded credit default swaps which sell protection on a basket of reference entities. The synthetic collateralized debt obligations are fully funded; therefore, the Company is not obligated to contribute additional funds when credit events occur related to the reference entities named in the embedded credit default swaps. The Company's maximum amount at risk equals the amount of its aggregate initial investment in the synthetic collateralized debt obligations.

7. Reserve for Property-Liability Insurance Claims and Claims Expense

The Company establishes reserves for claims and claims expense on reported and unreported claims of insured losses. The Company's reserving process takes into account known facts and interpretations of circumstances and factors including the Company's experience with similar cases, actual claims paid, historical trends involving claim payment patterns and pending levels of unpaid claims, loss management programs, product mix and contractual terms, changes in law and regulation, judicial decisions, and economic conditions. In the normal course of business, the Company may also supplement its claims processes by utilizing third party adjusters, appraisers, engineers, inspectors, and other professionals and information sources to assess and settle catastrophe and non-catastrophe related claims. The effects of inflation are implicitly considered in the reserving process.

Because reserves are estimates of unpaid portions of losses that have occurred, including incurred but not reported losses, the establishment of appropriate reserves, including reserves for catastrophes, is an inherently uncertain and complex process. The ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. The highest degree of uncertainty is associated with reserves for losses incurred in the current reporting period as it contains the greatest proportion of losses that have not been reported or settled. The Company regularly updates its reserve estimates as new information becomes available and as events unfold that may affect the resolution of unsettled claims. Changes in prior year reserve estimates, which may be material, are reported in property-liability insurance claims and claims expense in the Condensed Consolidated Statements of Operations in the period such changes are determined.

Management believes that the reserve for property-liability insurance claims and claims expense, net of reinsurance recoverables, is appropriately established in the aggregate and adequate to cover the ultimate net cost of reported and unreported claims arising from losses which had occurred by the date of the Condensed Consolidated Statements of Financial Position based on available facts, technology, laws and regulations.

8. Reinsurance

Property-liability insurance premiums earned and life and annuity premiums and contract charges for the three months ended March 31 have been reduced by the reinsurance ceded amounts shown in the following table:

Edgar Filing: ALLSTATE CORP - Form 10-Q

(\$ in millions)		2012		2011
Property-liability insurance premiums earned	\$	271	\$	270
Life and annuity premiums and contract charges		172		193

Property-liability insurance claims and claims expense, life and annuity contract benefits and interest credited to contractholder funds for the three months ended March 31 have been reduced by the reinsurance ceded amounts shown in the following table.

(\$ in millions)		2012		2011
Property-liability insurance claims and claims expense	\$	68	\$	137
Life and annuity contract benefits		66		84
Interest credited to contractholder funds		7		8

9. Company Restructuring

The Company undertakes various programs to reduce expenses. These programs generally involve a reduction in staffing levels, and in certain cases, office closures. Restructuring and related charges include employee termination and relocation benefits, and post-exit rent expenses in connection with these programs, and non-cash

charges resulting from pension benefit payments made to agents in connection with the 1999 reorganization of Allstate's multiple agency programs to a single exclusive agency program. The expenses related to these activities are included in the Condensed Consolidated Statements of Operations as restructuring and related charges, and totaled \$6 million and \$9 million during the three months ended March 31, 2012 and 2011, respectively.

The following table presents changes in the restructuring liability during the three months ended March 31, 2012.

(\$ in millions)		Employee costs		Exit costs		Total liability
Balance as of December 31, 2011	\$	5	\$	5	\$	10
Expense incurred		1		--		1
Payments applied against liability		(5)		(2)		(7)
Balance as of March 31, 2012	\$	1	\$	3	\$	4

The payments applied against the liability for employee costs primarily reflect severance costs, and the payments for exit costs generally consist of post-exit rent expenses and contract termination penalties. As of March 31, 2012, the cumulative amount incurred to date for active programs totaled \$75 million for employee costs and \$46 million for exit costs.

10. Guarantees and Contingent Liabilities

State facility assessments

The Company is required to participate in assigned risk plans, reinsurance facilities and joint underwriting associations in various states that provide insurance coverage to individuals or entities that otherwise are unable to purchase such coverage from private insurers. Underwriting results related to these arrangements, which tend to be adverse, have been immaterial to the Company's results of operations. Because of the Company's participation, it may be exposed to losses that surpass the capitalization of these facilities and/or assessments from these facilities.

Shared markets

As a condition of maintaining its licenses to write personal property and casualty insurance in various states, the Company is required to participate in assigned risk plans, reinsurance facilities and joint underwriting associations that provide various types of insurance coverage to individuals or entities that otherwise are unable to purchase such coverage from private insurers. Underwriting results related to these arrangements, which tend to be adverse, have been immaterial to the Company's results of operations.

Guarantees

Edgar Filing: ALLSTATE CORP - Form 10-Q

The Company owns certain fixed income securities that obligate the Company to exchange credit risk or to forfeit principal due, depending on the nature or occurrence of specified credit events for the reference entities. In the event all such specified credit events were to occur, the Company's maximum amount at risk on these fixed income securities, as measured by the amount of the aggregate initial investment, was \$28 million as of March 31, 2012. The obligations associated with these fixed income securities expire at various dates on or before March 11, 2018.

Related to the disposal through reinsurance of substantially all of Allstate Financial's variable annuity business to Prudential in 2006, the Company and its consolidated subsidiaries, ALIC and ALNY, have agreed to indemnify Prudential for certain pre-closing contingent liabilities (including extra-contractual liabilities of ALIC and ALNY and liabilities specifically excluded from the transaction) that ALIC and ALNY have agreed to retain. In addition, the Company, ALIC and ALNY will each indemnify Prudential for certain post-closing liabilities that may arise from the acts of ALIC, ALNY and their agents, including in connection with ALIC's and ALNY's provision of transition services. The reinsurance agreements contain no limitations or indemnifications with regard to insurance risk transfer, and transferred all of the future risks and responsibilities for performance on the underlying variable annuity contracts to Prudential, including those related to benefit guarantees. Management does not believe this agreement will have a material effect on results of operations, cash flows or financial position of the Company.

The Company provides residual value guarantees on Company leased automobiles. If all outstanding leases were terminated effective March 31, 2012, the Company's maximum obligation pursuant to these guarantees, assuming the automobiles have no residual value, would be \$9 million as of March 31, 2012. The remaining term of

each residual value guarantee is equal to the term of the underlying lease that ranges from less than one year to three years. Historically, the Company has not made any material payments pursuant to these guarantees.

In the normal course of business, the Company provides standard indemnifications to contractual counterparties in connection with numerous transactions, including acquisitions and divestitures. The types of indemnifications typically provided include indemnifications for breaches of representations and warranties, taxes and certain other liabilities, such as third party lawsuits. The indemnification clauses are often standard contractual terms and are entered into in the normal course of business based on an assessment that the risk of loss would be remote. The terms of the indemnifications vary in duration and nature. In many cases, the maximum obligation is not explicitly stated and the contingencies triggering the obligation to indemnify have not occurred and are not expected to occur. Consequently, the maximum amount of the obligation under such indemnifications is not determinable. Historically, the Company has not made any material payments pursuant to these obligations.

The aggregate liability balance related to all guarantees was not material as of March 31, 2012.

Regulation and Compliance

The Company is subject to changing social, economic and regulatory conditions. From time to time, regulatory authorities or legislative bodies seek to influence and restrict premium rates, require premium refunds to policyholders, require reinstatement of terminated policies, restrict the ability of insurers to cancel or non-renew policies, require insurers to continue to write new policies or limit their ability to write new policies, limit insurers' ability to change coverage terms or to impose underwriting standards, impose additional regulations regarding agent and broker compensation, regulate the nature of and amount of investments, and otherwise expand overall regulation of insurance products and the insurance industry. The Company has established procedures and policies to facilitate compliance with laws and regulations, to foster prudent business operations, and to support financial reporting. The Company routinely reviews its practices to validate compliance with laws and regulations and with internal procedures and policies. As a result of these reviews, from time to time the Company may decide to modify some of its procedures and policies. Such modifications, and the reviews that led to them, may be accompanied by payments being made and costs being incurred. The ultimate changes and eventual effects of these actions on the Company's business, if any, are uncertain.

Legal and regulatory proceedings and inquiries

The Company and certain subsidiaries are involved in a number of lawsuits, regulatory inquiries, and other legal proceedings arising out of various aspects of its business.

Background

These matters raise difficult and complicated factual and legal issues and are subject to many uncertainties and complexities, including the underlying facts of each matter; novel legal issues; variations between jurisdictions in which matters are being litigated, heard, or investigated; differences in applicable laws and judicial interpretations; the length of time before many of these matters might be resolved by settlement, through litigation, or otherwise; the fact that some of the lawsuits are putative class actions in which a class has not been certified and in which the purported class may not be clearly defined; the fact that some of the lawsuits involve multi-state class actions in which the applicable law(s) for the claims at issue is in dispute and therefore unclear; and the current challenging legal environment faced by large corporations and

insurance companies.

The outcome of these matters may be affected by decisions, verdicts, and settlements, and the timing of such decisions, verdicts, and settlements, in other individual and class action lawsuits that involve the Company, other insurers, or other entities and by other legal, governmental, and regulatory actions that involve the Company, other insurers, or other entities. The outcome may also be affected by future state or federal legislation, the timing or substance of which cannot be predicted.

In the lawsuits, plaintiffs seek a variety of remedies which may include equitable relief in the form of injunctive and other remedies and monetary relief in the form of contractual and extra-contractual damages. In some cases, the monetary damages sought may include punitive or treble damages. Often specific information about the relief sought, such as the amount of damages, is not available because plaintiffs have not requested specific relief in their pleadings. When specific monetary demands are made, they are often set just below a state court jurisdictional limit in order to seek the maximum amount available in state court, regardless of the specifics of the case, while still avoiding the risk of removal to federal court. In Allstate's experience, monetary demands in pleadings bear little relation to the ultimate loss, if any, to the Company.

In connection with regulatory examinations and proceedings, government authorities may seek various forms of relief, including penalties, restitution, and changes in business practices. The Company may not be advised of the nature and extent of relief sought until the final stages of the examination or proceeding.

Accrual and disclosure policy

The Company reviews its lawsuits, regulatory inquiries, and other legal proceedings on an ongoing basis and follows appropriate accounting guidance when making accrual and disclosure decisions. The Company establishes accruals for such matters at management's best estimate when the Company assesses that it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. The Company does not establish accruals for such matters when the Company does not believe both that it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. The Company's assessment of whether a loss is reasonably possible or probable is based on its assessment of the ultimate outcome of the matter following all appeals. The Company does not include potential recoveries in its estimates of reasonably possible or probable losses. Legal fees are expensed as incurred.

The Company continues to monitor its lawsuits, regulatory inquiries, and other legal proceedings for further developments that would make the loss contingency both probable and estimable, and accordingly accruable, or that could affect the amount of accruals that have been previously established. There may continue to be exposure to loss in excess of any amount accrued. Disclosure of the nature and amount of an accrual is made when there have been sufficient legal and factual developments such that the Company's ability to resolve the matter would not be impaired by the disclosure of the amount of accrual.

When the Company assesses it is reasonably possible or probable that a loss has been incurred, it discloses the matter. When it is possible to estimate the reasonably possible loss or range of loss above the amount accrued, if any, for the matters disclosed, that estimate is aggregated and disclosed. Disclosure is not required when an estimate of the reasonably possible loss or range of loss cannot be made.

For certain of the matters described below in the *Claims related proceedings* and *Other proceedings* subsections, the Company is able to estimate the reasonably possible loss or range of loss above the amount accrued, if any. In determining whether it is possible to estimate the reasonably possible loss or range of loss, the Company reviews and evaluates the disclosed matters, in conjunction with counsel, in light of potentially relevant factual and legal developments.

These developments may include information learned through the discovery process, rulings on dispositive motions, settlement discussions, information obtained from other sources, experience from managing these and other matters, and other rulings by courts, arbitrators or others. When the Company possesses sufficient appropriate information to develop an estimate of the reasonably possible loss or range of loss above the amount accrued, if any, that estimate is aggregated and disclosed below. There may be other disclosed matters for which a loss is probable or reasonably possible but such an estimate is not possible. Disclosure of the estimate of the reasonably possible loss or range of loss above the amount accrued, if any, for any individual matter would only be considered when there have been sufficient legal and factual developments such that the Company's ability to resolve the matter would not be impaired by the disclosure of the individual estimate.

As of March 31, 2012, the Company estimates that the aggregate range of reasonably possible loss in excess of the amount accrued, if any, for the disclosed matters where such an estimate is possible is zero to \$855 million, pre-tax. This disclosure is not an indication of expected loss, if any. Under accounting guidance, an event is *reasonably possible* if the chance of the future event or events occurring is more than remote but less than likely and an event is *remote* if the chance of the future event or events occurring is slight. This estimate is based upon currently available information and is subject to significant judgment and a variety of assumptions, and known and unknown uncertainties. The matters

Edgar Filing: ALLSTATE CORP - Form 10-Q

underlying the estimate will change from time to time, and actual results may vary significantly from the current estimate. The estimate does not include matters or losses for which an estimate is not possible. Therefore, this estimate represents an estimate of possible loss only for certain matters meeting these criteria. It does not represent the Company's maximum possible loss exposure. Information is provided below regarding the nature of all of the disclosed matters and, where specified, the amount, if any, of plaintiff claims associated with these loss contingencies.

Due to the complexity and scope of the matters disclosed in the Claims related proceedings and Other proceedings subsections below and the many uncertainties that exist, the ultimate outcome of these matters cannot be predicted. In the event of an unfavorable outcome in one or more of these matters, the ultimate liability may be

in excess of amounts currently accrued, if any, and may be material to the Company's operating results or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters described below, as they are resolved over time, is not likely to have a material effect on the financial position of the Company.

Claims related proceedings

Allstate is vigorously defending a lawsuit filed in the aftermath of Hurricane Katrina and currently pending in the United States District Court for the Eastern District of Louisiana (District Court). This matter was filed by the Louisiana Attorney General against Allstate and every other homeowner insurer doing business in the State of Louisiana, on behalf of the State of Louisiana, as assignee, and on behalf of certain Road Home fund recipients. Although this lawsuit was originally filed as a class action, the Louisiana Attorney General moved to dismiss the class in 2011 and the motion was granted. In this matter the State alleged that the insurers failed to pay all damages owed under their policies. The claims currently pending in this matter are for breach of contract and for declaratory relief on the alleged underpayment of claims by the insurers. All other claims, including extra-contractual claims, have been dismissed. The Company had moved to dismiss the complaint on the grounds that the State had no standing to bring the lawsuit as an assignee of insureds because of anti-assignment language in the underlying insurance policies. Now, however, due to a ruling by the Louisiana Supreme Court, the Company will not pursue a motion to dismiss, but will preserve the anti-assignment issue in a defense.

The State has not yet identified the specific details by property supporting its allegations of breach of contract or the alleged deficiencies in adjusting those claims. There are many potential individual claims at issue in this matter, each of which will require individual analysis and a number of which may be subject to individual defenses, including release, accord and satisfaction, prescription, waiver, and estoppel. There has been no discovery in connection with this matter. The Company has now filed a motion seeking to force the State to provide more specificity as to its claims in this matter. The Company believes that its adjusting practices in connection with Katrina homeowners claims were sound and in accordance with industry standards and state law. There remain significant questions of Louisiana law that have yet to be decided. In the Company's judgment, given the issues discussed above, a loss is not probable.

Allstate is vigorously defending a class action lawsuit in Montana state court challenging aspects of its claim handling practices in Montana. The plaintiff alleges that the Company adjusts claims made by individuals who do not have attorneys in a manner that unfairly resulted in lower payments compared to claimants who were represented by attorneys. In January 2012, the court certified a class of Montana claimants who were not represented by attorneys with respect to the resolution of auto accident claims. The court certified the class to cover an indefinite period that commences in the mid-1990's. The certified claims include claims for declaratory judgment, injunctive relief and punitive damages in an unspecified amount. Injunctive relief may include a claim process by which unrepresented claimants could request that their claims be readjusted. No compensatory damages are sought on behalf of the class. To date no discovery has occurred related to the potential value of the class members' claims. The Company has asserted various defenses with respect to the plaintiff's claims which have not been finally resolved. The proposed injunctive relief claim process would be subject to defenses and offsets ordinarily associated with the adjustment of claims. Any differences in amounts paid to class members compared to what class members might be paid under a different process would be speculative and subject to individual variation and determination dependent upon the individual circumstances presented by each class claimant. In the Company's judgment a loss is not probable.

Allstate has been vigorously defending a lawsuit in regards to certain claims employees involving worker classification issues. This lawsuit is a certified class action challenging a state wage and hour law. In this case, plaintiffs sought actual damages in an amount to be proven at trial, liquidated damages in an amount equal to an unspecified percentage of the aggregate underpayment of wages to be proven at trial, as well as attorneys' fees and costs. Plaintiffs have not made a settlement demand nor have they alleged the amount of damages with any specificity. The case was bifurcated between liability and damages and is currently focused only on liability issues. No discovery has taken place regarding plaintiffs' alleged damages. In December 2009, the liability phase of the case was tried, and, on July 6, 2010, the court issued its decision finding in favor of Allstate on all claims. The plaintiffs have appealed the decision in favor of Allstate to the first level appellate court. Oral argument on the appeal is scheduled to be heard by that court on May 2, 2012. After concluding the current appeal, the parties may seek a subsequent

Edgar Filing: ALLSTATE CORP - Form 10-Q

appeal to the Illinois Supreme Court. Only liability issues are being addressed on appeal and no damages may be awarded at this stage of the proceedings. In the event the trial court's order were to be overturned, however, the parties would need to conduct damages discovery, and a trial on damages would have to take place, before any damages could be awarded. In the Company's judgment a loss is not probable.

Other proceedings

The Company is defending certain matters relating to the Company's agency program reorganization announced in 1999. Although these cases have been pending for many years, they currently are in the early stages of litigation because of appellate court proceedings and threshold procedural issues.

- These matters include a lawsuit filed in 2001 by the U.S. Equal Employment Opportunity Commission (EEOC) alleging retaliation under federal civil rights laws (EEOC I) and a class action filed in 2001 by former employee agents alleging retaliation and age discrimination under the Age Discrimination in Employment Act (ADEA), breach of contract and ERISA violations (Romero I). In 2004, in the consolidated EEOC I and Romero I litigation, the trial court issued a memorandum and order that, among other things, certified classes of agents, including a mandatory class of agents who had signed a release, for purposes of effecting the court's declaratory judgment that the release was voidable at the option of the release signer. The court also ordered that an agent who voided the release must return to Allstate any and all benefits received by the [agent] in exchange for signing the release. The court also stated that, on the undisputed facts of record, there is no basis for claims of age discrimination. The EEOC and plaintiffs asked the court to clarify and/or reconsider its memorandum and order and in January 2007, the judge denied their request. In June 2007, the court reversed its prior ruling that the release was voidable and granted the Company's motions for summary judgment, ruling that the asserted claims were barred by the release signed by most plaintiffs. Plaintiffs filed a notice of appeal with the U.S. Court of Appeals for the Third Circuit (Third Circuit). In July 2009, the Third Circuit vacated the trial court's entry of summary judgment in the Company's favor and remanded the cases to the trial court for additional discovery, including additional discovery related to the validity of the release and waiver. In its opinion, the Third Circuit held that if the release and waiver is held to be valid, then all of the claims in Romero I and EEOC I are barred. Thus, if the waiver and release is upheld, then only the claims in Romero I asserted by the small group of employee agents who did not sign the release and waiver would remain for adjudication. In January 2010, following the remand, the cases were assigned to a new judge for further proceedings in the trial court. Plaintiffs filed their Second Amended Complaint on July 28, 2010. Plaintiffs seek broad but unspecified make whole relief, including back pay, compensatory and punitive damages, liquidated damages, lost investment capital, attorneys' fees and costs, and equitable relief, including reinstatement to employee agent status with all attendant benefits for up to approximately 6,500 former employee agents. Despite the length of time that these matters have been pending, to date only limited discovery has occurred related to the damages claimed by individual plaintiffs, and no damages discovery has occurred related to the claims of the putative class. Nor have plaintiffs provided any calculations of the putative class's alleged back pay or the alleged liquidated, compensatory or punitive damages, instead asserting that such calculations will be provided at a later stage during expert discovery. Damage claims are subject to reduction by amounts and benefits received by plaintiffs and putative class members subsequent to their employment termination. Little to no discovery has occurred with respect to amounts earned or received by plaintiffs and putative class members in mitigation of their alleged losses. Alleged damage amounts and lost benefits of the approximately 6,500 putative class members also are subject to individual variation and determination dependent upon retirement dates, participation in employee benefit programs, and years of service. Discovery limited to the validity of the waiver and release is in process. At present, no class is certified. Summary judgment proceedings on the validity of the waiver and release are expected to occur in the second half of 2012.

- A putative nationwide class action has also been filed by former employee agents alleging various violations of ERISA, including a worker classification issue (Romero II). These plaintiffs are challenging certain amendments to the Agents Pension Plan and are seeking to have exclusive agent independent contractors treated as employees for benefit purposes. Romero II was dismissed with prejudice by the trial court, was the subject of further proceedings on appeal, and was reversed and remanded to the trial court in 2005. In June 2007, the court granted the Company's motion to dismiss the case. Plaintiffs filed a notice of appeal with the Third Circuit. In July 2009, the Third Circuit vacated the district court's dismissal of the case and remanded the case to the trial court for additional discovery, and directed that the case be reassigned to another trial court judge. In its opinion, the Third Circuit held that if the release and waiver is held to be valid, then one of plaintiffs' three claims asserted in Romero II is barred. The Third Circuit directed the district court to consider on remand whether the other two claims asserted in Romero II are barred by the release and waiver. In January 2010, following the remand, the case was assigned to a new judge (the same judge for the Romero I and EEOC I cases) for further

proceedings in the trial court. On April 23, 2010, plaintiffs filed their First Amended Complaint. Plaintiffs seek broad but unspecified make whole or other equitable relief, including losses of income and benefits as a result of their decision to retire from the Company between November 1, 1999 and December 31, 2000. They also seek repeal of the challenged amendments to the Agents Pension Plan with all attendant benefits revised and recalculated for thousands of former employee agents, and attorney's fees and costs. Despite the length of time that this matter has been pending, to date only limited discovery has occurred related to the damages claimed by individual plaintiffs, and no damages discovery has occurred related to the claims of the putative class. Nor have plaintiffs provided any calculations of the putative class's alleged losses, instead asserting that such calculations will be provided at a later stage during expert discovery. Damage claims are subject to reduction by amounts and benefits received by plaintiffs and putative class members subsequent to their employment termination. Little to no discovery has occurred with respect to amounts earned or received by plaintiffs and putative class members in mitigation of their alleged losses. Alleged damage amounts and lost benefits of the putative class members also are subject to individual variation and determination dependent upon retirement dates, participation in employee benefit programs, and years of service. As in *Romero I* and *EEOC I*, discovery at this time is limited to issues relating to the validity of the waiver and release. Class certification has not been decided. Summary judgment proceedings on the validity of the waiver and release are expected to occur in the second half of 2012.

In these agency program reorganization matters, the threshold issue of the validity and scope of the waiver and release is yet to be decided and, if decided in favor of the Company, would preclude any damages being awarded in *Romero I* and *EEOC I* and may also preclude damages from being awarded in *Romero II*. In the Company's judgment a loss is not probable. Allstate has been vigorously defending these lawsuits and other matters related to its agency program reorganization.

Asbestos and environmental

Allstate's reserves for asbestos claims were \$1.05 billion and \$1.08 billion, net of reinsurance recoverables of \$519 million and \$529 million, as of March 31, 2012 and December 31, 2011, respectively. Reserves for environmental claims were \$183 million and \$185 million, net of reinsurance recoverables of \$40 million and \$40 million, as of March 31, 2012 and December 31, 2011, respectively. Approximately 58% and 59% of the total net asbestos and environmental reserves as of March 31, 2012 and December 31, 2011, respectively, were for incurred but not reported estimated losses.

Management believes its net loss reserves for asbestos, environmental and other discontinued lines exposures are appropriately established based on available facts, technology, laws and regulations. However, establishing net loss reserves for asbestos, environmental and other discontinued lines claims is subject to uncertainties that are much greater than those presented by other types of claims. The ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimate. Among the complications are lack of historical data, long reporting delays, uncertainty as to the number and identity of insureds with potential exposure and unresolved legal issues regarding policy coverage; unresolved legal issues regarding the determination, availability and timing of exhaustion of policy limits; plaintiffs' evolving and expanding theories of liability; availability and collectability of recoveries from reinsurance; retrospectively determined premiums and other contractual agreements; estimates of the extent and timing of any contractual liability; the impact of bankruptcy protection sought by various asbestos producers and other asbestos defendants; and other uncertainties. There are also complex legal issues concerning the interpretation of various insurance policy provisions and whether those losses are covered, or were ever intended to be covered, and could be recoverable through retrospectively determined premium, reinsurance or other contractual agreements. Courts have reached different and sometimes inconsistent conclusions as to when losses are deemed to have occurred and which policies provide coverage; what types of losses are covered; whether there is an insurer obligation to defend; how policy limits are determined; how policy exclusions and conditions are applied and interpreted; and whether clean-up costs represent insured property damage. Management believes these issues are not likely to be resolved in the near future, and the ultimate costs may vary materially from the amounts currently recorded resulting in material changes in loss reserves. In addition, while the Company believes that improved actuarial techniques and databases have assisted in its ability to estimate asbestos, environmental, and other discontinued lines net loss reserves, these refinements may subsequently prove to be inadequate indicators of the extent of probable losses. Due to the uncertainties and factors described above, management believes it is not practicable to develop a meaningful range for any such additional net loss reserves that may be required.

11. Components of Net Periodic Pension and Postretirement Benefit Costs

The components of net periodic cost for the Company's pension and postretirement benefit plans for the three months ended March 31 are as follows:

(\$ in millions)	2012	2011
Pension benefits		
Service cost	\$ 38	\$ 38
Interest cost	74	81
Expected return on plan assets	(98)	(92)
Amortization of:		
Net actuarial loss	44	38
Settlement loss	10	9
Net periodic pension cost	\$ 68	\$ 74
Postretirement benefits		
Service cost	\$ 3	\$ 3
Interest cost	9	9
Amortization of:		
Prior service credit	(6)	(6)
Net actuarial gain	(5)	(7)
Net periodic postretirement cost (credit)	\$ 1	\$ (1)

12. Business Segments

Summarized revenue data for each of the Company's reportable segments for the three months ended March 31 are as follows:

(\$ in millions)	2012	2011
Revenues		
<i>Property-Liability</i>		
Property-liability insurance premiums		
Standard auto	\$ 4,269	\$ 4,088
Non-standard auto	183	211
Total auto	4,452	4,299
Homeowners	1,572	1,539
Other personal lines	606	611
Allstate Protection	6,630	6,449
Discontinued Lines and Coverages	--	(1)
Total property-liability insurance premiums	6,630	6,448
Net investment income	313	284
Realized capital gains and losses	189	57
Total Property-Liability	7,132	6,789
<i>Allstate Financial</i>		
Life and annuity premiums and contract charges		
Traditional life insurance	113	108
Immediate annuities with life contingencies	12	43
Accident and health insurance	162	161
Total life and annuity premiums	287	312
Interest-sensitive life insurance	260	248
Fixed annuities	6	9
Total contract charges	266	257
Total life and annuity premiums and contract charges	553	569
Net investment income	687	684
Realized capital gains and losses	(21)	39
Total Allstate Financial	1,219	1,292
<i>Corporate and Other</i>		
Service fees	1	2
Net investment income	11	14
Realized capital gains and losses	--	--
Total Corporate and Other before reclassification of service fees	12	16
Reclassification of service fees (1)	(1)	(2)
Total Corporate and Other	11	14
Consolidated revenues	\$ 8,362	\$ 8,095

(1) For presentation in the Condensed Consolidated Statements of Operations, service fees of the Corporate and Other segment are reclassified to operating costs and expenses.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Summarized financial performance data for each of the Company's reportable segments for the three months ended March 31 are as follows:

(\$ in millions)	2012	2011
Net income		
<i>Property-Liability</i>		
Underwriting income (loss)		
Allstate Protection	\$ 526	\$ 334

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

The Allstate Corporation

Northbrook, IL 60062

We have reviewed the accompanying condensed consolidated statement of financial position of The Allstate Corporation and subsidiaries (the Company) as of March 31, 2012, and the related condensed consolidated statements of operations, comprehensive income and cash flows for the three-month periods ended March 31, 2012 and 2011. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statement of financial position of The Allstate Corporation and subsidiaries as of December 31, 2011, and the related consolidated statements of operations, comprehensive income, shareholders' equity, and cash flows for the year then ended prior to the retrospective adjustment for the Company's adoption of a change in accounting for costs associated with acquiring or renewing insurance contracts (not presented herein); and in our report dated February 22, 2012, which report includes an explanatory paragraph relating to a change in the Company's recognition and presentation for other-than-temporary impairments of debt securities in 2009, we expressed an unqualified opinion on those consolidated financial statements. We also audited the adjustments described in Note 1 that were applied to retrospectively adjust the December 31, 2011 consolidated statement of financial position of the Company (not presented herein). In our opinion, such adjustments are appropriate and have been properly applied to the previously issued consolidated statement of financial position in deriving the accompanying retrospectively adjusted condensed consolidated statement of financial position as of December 31, 2011.

/s/ Deloitte & Touche LLP

Chicago, Illinois

May 2, 2012

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE THREE-MONTH PERIODS ENDED MARCH 31, 2012 AND 2011

OVERVIEW

The following discussion highlights significant factors influencing the consolidated financial position and results of operations of The Allstate Corporation (referred to in this document as we, our, us, the Company or Allstate). It should be read in conjunction with the condensed consolidated financial statements and notes thereto found under Part I. Item 1. contained herein, and with the discussion, analysis, consolidated financial statements and notes thereto in Part I. Item 1. and Part II. Item 7. and Item 8. of The Allstate Corporation Annual Report on Form 10-K for 2011. Further analysis of our insurance segments is provided in the Property-Liability Operations (which includes the Allstate Protection and the Discontinued Lines and Coverages segments) and in the Allstate Financial Segment sections of Management's Discussion and Analysis (MD&A). The segments are consistent with the way in which we use financial information to evaluate business performance and to determine the allocation of resources.

Allstate is focused on the following priorities:

- maintain auto profitability;
- raise returns in homeowners and annuity businesses;
- grow insurance premiums; and
- proactively manage investments and capital.

HIGHLIGHTS

- Consolidated net income was \$766 million in the first quarter of 2012 compared to \$524 million in the first quarter of 2011. Net income per diluted share was \$1.53 in the first quarter of 2012 compared to \$0.98 in the first quarter of 2011.
- Property-Liability net income was \$695 million in the first quarter of 2012 compared to \$468 million in the first quarter of 2011.
- The Property-Liability combined ratio was 92.1 in the first quarter of 2012 compared to 94.9 in the first quarter of 2011.
- Allstate Financial net income was \$112 million in the first quarter of 2012 compared to \$102 million in the first quarter of 2011.
- Total revenues were \$8.36 billion in the first quarter of 2012 compared to \$8.10 billion in the first quarter of 2011.
- Property-Liability premiums earned totaled \$6.63 billion in the first quarter of 2012, an increase of 2.8% from \$6.45 billion in the first quarter of 2011.

Edgar Filing: ALLSTATE CORP - Form 10-Q

- Net realized capital gains were \$168 million in the first quarter of 2012 compared to \$96 million in the first quarter of 2011.
- Investments totaled \$97.01 billion as of March 31, 2012, an increase of 1.5% from \$95.62 billion as of December 31, 2011. Net investment income in the first quarter of 2012 was \$1.01 billion, an increase of 3.0% from \$982 million in the first quarter of 2011.
- Book value per diluted share (ratio of shareholders' equity to total shares outstanding and dilutive potential shares outstanding) was \$38.57 as of March 31, 2012, an increase of 8.0% from \$35.72 as of March 31, 2011 and an increase of 6.6% from \$36.18 as of December 31, 2011.
- For the twelve months ended March 31, 2012, return on the average of beginning and ending period shareholders' equity was 5.4%, a decrease of 1.9 points from 7.3% for the twelve months ended March 31, 2011.
- As of March 31, 2012, shareholders' equity was \$19.18 billion. This total included \$2.65 billion in deployable invested assets at the parent holding company level.
- New deferred policy acquisition costs (DAC) accounting guidance was adopted on a retrospective basis as of January 1, 2012 (see Note 1 of the condensed consolidated financial statements). Accordingly, all prior period balances have been adjusted. The DAC and shareholders' equity balances were reduced by \$572 million and \$376 million, respectively, when compared to the previously reported December 31, 2011 balances. Impacted income statement line items include amortization of DAC, operating costs and expenses, gain/loss on disposition of operations, and income tax expense. Impacted balance sheet line items include DAC, deferred income taxes, reserve for life-contingent contract benefits, other liabilities and accrued expenses, retained income, unrealized net capital gains and losses, and unrealized foreign currency translation adjustments.

PROPERTY-LIABILITY HIGHLIGHTS

- Premiums written, an operating measure that is defined and reconciled to premiums earned in the Property-Liability Operations section of the MD&A, increased 4.0% to \$6.46 billion in the first quarter of 2012 from \$6.22 billion in the first quarter of 2011 and increased 0.6% from \$6.43 billion in the fourth quarter of 2011.

Allstate brand standard auto premiums written decreased 1.2% to \$3.94 billion in the first quarter of 2012 from \$3.98 billion in the first quarter of 2011.

Allstate brand homeowners premiums written increased 2.7% to \$1.26 billion in the first quarter of 2012 from \$1.23 billion in the first quarter of 2011.

Encompass brand premiums written increased 1.6% to \$249 million in the first quarter of 2012 from \$245 million in the first quarter of 2011.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Esurance brand premiums written were \$262 million in the first quarter of 2012.

- Premium operating measures and statistics contributing to overall Allstate brand standard auto premiums written decrease were the following:

2.2% decrease in policies in force (PIF) as of March 31, 2012 compared to March 31, 2011

1.8% increase in the six month policy term average gross premium before reinsurance to \$447 in the first quarter of 2012 from \$439 in the first quarter of 2011

0.2 point decrease in the six month renewal ratio to 88.7% in the first quarter of 2012 compared to 88.9% in the first quarter of 2011

Edgar Filing: ALLSTATE CORP - Form 10-Q

10.8% decrease in new issued applications in the first quarter of 2012 compared to the first quarter of 2011

- Premium operating measures and statistics contributing to overall Allstate brand homeowners premiums written increase were the following:

5.6% decrease in PIF as of March 31, 2012 compared to March 31, 2011

9.2% increase in the twelve month policy term average gross premium before reinsurance to \$1,065 in the first quarter of 2012 from \$975 in the first quarter of 2011

0.9 point decrease in the twelve month renewal ratio to 87.4% in the first quarter of 2012 compared to 88.3% in the first quarter of 2011

11.4% decrease in new issued applications in the first quarter of 2012 compared to the first quarter of 2011

\$3 million decrease in catastrophe reinsurance costs to \$121 million in the first quarter of 2012 from \$124 million in the first quarter of 2011

- Factors comprising the Allstate brand standard auto loss ratio decrease of 0.7 points to 69.6 in the first quarter of 2011 from 70.3 in the first quarter of 2011 were the following:

4.1% decrease in standard auto claim frequency (rate of claim occurrence per policy in force) for property damage in the first quarter of 2012 compared to the first quarter of 2011

2.1% decrease in standard auto claim frequency for bodily injury in the first quarter of 2012 compared to the first quarter of 2011

4.6% increase in auto paid claim severities (average cost per claim) for property damage in the first quarter of 2012 compared to the first quarter of 2011

1.2% increase in auto paid claim severities for bodily injury in the first quarter of 2012 compared to the first quarter of 2011

- Factors comprising the Allstate brand homeowners loss ratio, which includes catastrophes, decrease of 11.4 points to 56.5 in the first quarter of 2012 from 67.9 in the first quarter of 2011 were the following:

5.1 point decrease in the effect of catastrophe losses to 12.6 points in the first quarter of 2012 compared to 17.7 points in the first quarter of 2011

4.8% decrease in homeowner claim frequency, excluding catastrophes, in the first quarter of 2012 compared to the first quarter of 2011

0.4% decrease in paid claim severity, excluding catastrophes, in the first quarter of 2012 compared to the first quarter of 2011

- Factors comprising the \$74 million decrease in catastrophe losses to \$259 million in the first quarter of 2012 compared to \$333 million in the first quarter of 2011 were the following:

15 events with losses of \$420 million in the first quarter of 2012 compared to 16 events with losses of \$367 million in the first quarter of 2011

\$161 million favorable prior year reserve reestimates in the first quarter of 2012 compared to \$34 million favorable reserve reestimates in the first quarter of 2011

Edgar Filing: ALLSTATE CORP - Form 10-Q

- Factors comprising the \$204 million of favorable prior year reserve reestimates in the first quarter of 2012 compared to \$41 million favorable in the first quarter of 2011 included:

prior year reserve reestimates related to auto, homeowners and other personal lines in the first quarter of 2012 contributed \$48 million favorable, \$119 million favorable and \$40 million favorable, respectively, compared to prior year reserve reestimates in the first quarter of 2011 of \$19 million favorable, \$38 million favorable and \$13 million unfavorable, respectively

prior year reestimates in the first quarter of 2012 and 2011 are largely attributable to prior year catastrophes

- Property-Liability underwriting income was \$523 million in the first quarter of 2012 compared to \$328 million in the first quarter of 2011. Underwriting income (loss), a measure not based on accounting principles generally accepted in the United States of America (GAAP), is defined below.
- Property-Liability investments as of March 31, 2012 were \$36.73 billion, an increase of 2.0% from \$36.00 billion as of December 31, 2011. Net investment income was \$313 million in the first quarter of 2012, an increase of 10.2% from \$284 million in the first quarter of 2011.
- Net realized capital gains were \$189 million in the first quarter of 2012 compared to \$57 million in the first quarter of 2011.

PROPERTY-LIABILITY OPERATIONS

Overview Our Property-Liability operations consist of two reporting segments: Allstate Protection and Discontinued Lines and Coverages. Allstate Protection comprises three brands: Allstate, Encompass and Esurance. Allstate Protection is principally engaged in the sale of personal property and casualty insurance, primarily private passenger auto and homeowners insurance, to individuals in the United States and Canada. Discontinued Lines and Coverages includes results from insurance coverage that we no longer write and results for certain commercial and other businesses in run-off. These segments are consistent with the groupings of financial information that management uses to evaluate performance and to determine the allocation of resources.

Underwriting income (loss), a measure that is not based on GAAP and is reconciled to net income (loss) below, is calculated as premiums earned, less claims and claims expense (losses), amortization of DAC, operating costs and expenses and restructuring and related charges, as determined using GAAP. We use this measure in our evaluation of results of operations to analyze the profitability of the Property-Liability insurance operations separately from investment results. It is also an integral component of incentive compensation. It is useful for investors to evaluate the components of income separately and in the aggregate when reviewing performance. Net income (loss) is the GAAP measure most directly comparable to underwriting income (loss). Underwriting income (loss) should not be considered as a substitute for net income and does not reflect the overall profitability of the business.

The table below includes GAAP operating ratios we use to measure our profitability. We believe that they enhance an investor's understanding of our profitability. They are calculated as follows:

- Claims and claims expense (loss) ratio - the ratio of claims and claims expense to premiums earned. Loss ratios include the impact of catastrophe losses.
- Expense ratio - the ratio of amortization of DAC, operating costs and expenses, and restructuring and related charges to premiums earned.
- Combined ratio - the ratio of claims and claims expense, amortization of DAC, operating costs and expenses, and restructuring and related charges to premiums earned. The combined ratio is the sum of the loss ratio and the expense ratio. The difference between 100% and the combined ratio represents underwriting income (loss) as a percentage of premiums earned, or underwriting margin.

We have also calculated the following impacts of specific items on the GAAP operating ratios because of the volatility of these items between fiscal periods.

- Effect of catastrophe losses on combined ratio - the percentage of catastrophe losses included in claims and claims expense to premiums earned. This ratio includes prior year reserve reestimates of catastrophe losses.
- Effect of prior year reserve reestimates on combined ratio - the percentage of prior year reserve reestimates included in claims and claims expense to premiums earned. This ratio includes prior year reserve reestimates of catastrophe losses.
- Effect of business combination expenses and the amortization of purchased intangible assets on combined and expense ratio - the percentage of business combination expenses and the amortization of purchased intangible assets to premiums earned.
- Effect of restructuring and related charges on combined ratio - the percentage of restructuring and related charges to premiums earned.
- Effect of Discontinued Lines and Coverages on combined ratio - the ratio of claims and claims expense and operating costs and expenses in the Discontinued Lines and Coverages segment to Property-Liability premiums earned. The sum of the effect of Discontinued Lines and Coverages on the combined ratio and the Allstate Protection combined ratio is equal to the Property-Liability combined ratio.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Summarized financial data, a reconciliation of underwriting income to net income, and GAAP operating ratios for our Property-Liability operations are presented in the following table.

(\$ in millions, except ratios)	Three months ended	
	March 31,	
	2012	2011
Premiums written	\$ 6,463	\$ 6,215
Revenues		
Premiums earned	\$ 6,630	\$ 6,448
Net investment income	313	284
Realized capital gains and losses	189	57
Total revenues	7,132	6,789
Costs and expenses		
Claims and claims expense	(4,339)	(4,476)
Amortization of DAC	(878)	(864)
Operating costs and expenses	(884)	(769)
Restructuring and related charges	(6)	(11)
Total costs and expenses	(6,107)	(6,120)
Income tax expense	(330)	(201)
Net income	\$ 695	\$ 468
Underwriting income	\$ 523	\$ 328
Net investment income	313	284
Income tax expense on operations	(265)	(182)
Realized capital gains and losses, after-tax	124	38
Net income	\$ 695	\$ 468
Catastrophe losses (1)	\$ 259	\$ 333
GAAP operating ratios		
Claims and claims expense ratio	65.4	69.4
Expense ratio	26.7	25.5
Combined ratio	92.1	94.9
Effect of catastrophe losses on combined ratio (1)	3.9	5.2
Effect of prior year reserve reestimates on combined ratio (1)	(3.1)	(0.7)
Effect of business combination expenses and the amortization of purchased intangible assets on combined ratio	0.7	--
Effect of restructuring and related charges on combined ratio	0.1	0.2
Effect of Discontinued Lines and Coverages on combined ratio	--	0.1

(1) Prior year reserve reestimates included in catastrophe losses totaled \$161 million favorable in the three months ended March 31, 2012 compared to \$34 million favorable in the three months ended March 31, 2011.

Premiums written, an operating measure, is the amount of premiums charged for policies issued during a fiscal period. **Premiums earned** is a GAAP measure. Premiums are considered earned and are included in the financial results on a pro-rata basis over the policy period. The portion of premiums written applicable to the unexpired terms of the policies is recorded as unearned premiums on our Condensed Consolidated Statements of Financial Position.

Edgar Filing: ALLSTATE CORP - Form 10-Q

A reconciliation of premiums written to premiums earned is shown in the following table.

(\$ in millions)	Three months ended

Total	\$ 5,951	\$ 5,971	\$ 249	\$ 245	\$ 262	\$ 6,462	\$ 6,216	

(1) Other personal lines include commercial, condominium, renters, involuntary auto and other personal lines.

(2) Esurance brand business was acquired on October 7, 2011.

Premiums earned by brand are shown in the following table.

Edgar Filing: ALLSTATE CORP - Form 10-Q

(\$ in millions)

	Three months ended March 31,							
	Allstate brand		Encompass brand		Esurance brand		Allstate Protection	
	2012	2011	2012	2011	2012	2011	2012	2011
Standard auto	\$ 3,897	\$ 3,928	\$ 151	\$ 160	\$ 221	\$ 221	\$ 4,269	\$ 4,088
Non-standard auto	183	210	--	1	--	--	183	211
Homeowners	1,480	1,448	92	91	--	--	1,572	1,539
Other personal lines	583	588	23	23	--	--	606	611
Total	\$ 6,143	\$ 6,174	\$ 266	\$ 275	\$ 221	\$ 221	\$ 6,630	\$ 6,449

Premium operating measures and statistics that are used to analyze the business are calculated and described below. Measures and statistics presented exclude Allstate Canada and specialty auto.

- PIF: Policy counts are based on items rather than customers. A multi-car customer would generate multiple item (policy) counts, even if all cars were insured under one policy.
- Average premium-gross written: Gross premiums written divided by issued item count. Gross premiums written include the impacts from discounts and surcharges, and exclude the impacts from mid-term premium adjustments, ceded reinsurance premiums, and premium refund accruals. Allstate brand average gross premiums represent the appropriate policy term for each line, which is 6 months for standard and non-standard auto and 12 months for homeowners. Encompass brand average gross premiums represent the appropriate policy term for each line, which is 12 months for standard auto and homeowners and 6 months for non-standard

auto. Esurance brand average gross premiums represent the appropriate policy term, which is 6 months for standard auto.

- **Renewal ratio:** Renewal policies issued during the period, based on contract effective dates, divided by the total policies issued 6 months prior for standard and non-standard auto (12 months prior for Encompass brand standard auto) or 12 months prior for homeowners.
- **New issued applications:** Item counts of automobiles or homeowners insurance applications for insurance policies that were issued during the period. Does not include automobiles that are added by existing customers.

Standard auto premiums written totaled \$4.34 billion in the first quarter of 2012, an increase of 5.2% from \$4.13 billion in the first quarter of 2011.

<u>Standard Auto</u> Three months ended March 31,	Allstate brand		Encompass brand		Esurance brand
	2012	2011	2012	2011	2012
PIF (thousands)	17,080	17,456	676	676	849
Average premium-gross written (1)	\$ 447	\$ 439	\$ 923	\$ 953	\$ 508
Renewal ratio (%) (1)	88.7	88.9	71.8	71.2	78.5
Approved rate changes (2):					
# of states	10	13	2	3	6
Countrywide (%) (3)	0.5	1.1	0.1	0.6	1.3
State specific (%) (4) (5)	5.8	4.1 (6)	3.2	5.0	4.8

- (1) Policy term is six months for Allstate and Esurance brands and twelve months for Encompass brand.
- (2) Rate changes that are indicated based on loss trend analysis to achieve a targeted return will continue to be pursued. Rate changes do not include rating plan enhancements, including the introduction of discounts and surcharges, that result in no change in the overall rate level in the state. These rate changes do not reflect initial rates filed for insurance subsidiaries initially writing business in a state. Rate changes exclude Allstate Canada and specialty auto.
- (3) Represents the impact in the states where rate changes were approved during the three months ended March 31, 2012 and 2011, respectively, as a percentage of total countrywide prior year-end premiums written.
- (4) Represents the impact in the states where rate changes were approved during the three months ended March 31, 2012 and 2011, respectively, as a percentage of its respective total prior year-end premiums written in those states.
- (5) Based on historical premiums written in those states, rate changes approved for standard auto totaled \$89 million and \$176 million in the three months ended March 31, 2012 and 2011, respectively.
- (6) First quarter 2011 includes the impact of Florida rate increases averaging 10.9% and New York rate increases averaging 12.0%.

Allstate brand standard auto premiums written totaled \$3.94 billion in the first quarter of 2012, a decrease of 1.2% from \$3.98 billion in the first quarter of 2011 and an increase of 3.3% from \$3.81 billion in the fourth quarter of 2011. Contributing to the Allstate brand standard auto premiums written decrease in the first quarter of 2012 compared to the first quarter of 2011 were the following:

decrease in PIF of 2.2% as of March 31, 2012 compared to March 31, 2011 due to fewer new issued applications and fewer policies available to renew. Excluding Florida and New York, PIF decreased 0.5% as of March 31, 2012 compared to March 31, 2011.

10.8% decrease in new issued applications on a countrywide basis to 463 thousand in the first quarter of 2012 from 519 thousand in the first quarter of 2011. Excluding Florida and New York (impacted by actions to improve profitability), new issued applications on a countrywide basis decreased 8.2% to 412 thousand in the first quarter of 2012 from 449 thousand in the first quarter of 2011. New issued applications increased in 10 states in the first quarter of 2012 compared to the first quarter of 2011.

Edgar Filing: ALLSTATE CORP - Form 10-Q

increase in average gross premium in the first quarter of 2012 compared to the first quarter of 2011.

0.2 point decrease in the renewal ratio in the first quarter of 2012 compared to the first quarter of 2011. In the first quarter of 2012, 34 states are showing favorable comparisons to prior year.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Non-standard auto premiums written totaled \$189 million in the first quarter of 2012, a decrease of 10.4% from \$211 million in the first quarter of 2011.

<u>Non-Standard Auto</u>	Allstate brand	
	2012	2011
Three months ended March 31,		
PIF (thousands)	570	627
Average premium-gross written (6 months)	\$ 598	\$ 621
Renewal ratio (%) (6 months)	69.1	70.4
Approved rate changes:		
# of states	4	3
Countrywide (%)	0.2	3.6
State specific (%) (1)	1.4	18.4

(1) Based on historical premiums written in those states, rate changes approved for non-standard auto totaled \$1 million and \$30 million in the three months ended March 31, 2012 and 2011, respectively.

Allstate brand non-standard auto premiums written totaled \$189 million in the first quarter of 2012, a decrease of 10.0% from \$210 million in the first quarter of 2011. Contributing to the Allstate brand non-standard auto premiums written decrease in the first quarter of 2012 compared to the first quarter of 2011 were the following:

decrease in PIF as of March 31, 2012 compared to March 31, 2011 due to a decline in the number of policies available to renew and a lower retention rate

1.3% increase in new issued applications to 79 thousand in the first quarter of 2012 from 78 thousand in the first quarter of 2011

decrease in average gross premium in the first quarter of 2012 compared to the first quarter of 2011

1.3 point decrease in the renewal ratio in the first quarter of 2012 compared to the first quarter of 2011

Homeowners premiums written totaled \$1.34 billion in the first quarter of 2012, an increase of 3.0% from \$1.30 billion in the first quarter of 2011. Excluding the cost of catastrophe reinsurance, premiums written increased 2.5% in the first quarter of 2012 compared to the first quarter of 2011.

<u>Homeowners</u>	Allstate brand		Encompass brand	
	2012	2011	2012	2011
Three months ended March 31,				
PIF (thousands) (1)	6,259	6,631	309	310

Other personal lines		89		(8)
Underwriting income	\$	526	\$	334
Underwriting income (loss) by brand				
Allstate brand	\$	586	\$	335
Encompass brand		1		(1)
Esurance brand		(61)		--
Underwriting income	\$	526	\$	334

Allstate Protection experienced underwriting income of \$526 million in the first quarter of 2012 compared to \$334 million in the first quarter of 2011, primarily due to an increase in homeowners underwriting income and underwriting income for other personal lines compared to an underwriting loss in the prior year, partially offset by a decrease in standard auto underwriting income. Homeowners underwriting income increased \$178 million to \$306 million in the first quarter of 2012 from \$128 million in the first quarter of 2011 primarily due to decreases in catastrophe losses and average earned premiums increasing faster than loss costs, partially offset by higher expenses. Other personal lines

Edgar Filing: ALLSTATE CORP - Form 10-Q

underwriting income was \$89 million in the first quarter of 2012 compared to an underwriting loss of \$8 million in the first quarter of 2011 primarily due to favorable reserve reestimates and decreases in catastrophe losses. Standard auto underwriting income decreased \$74 million to \$115 million in the first quarter of 2012 from \$189 million in the first quarter of 2011 primarily due to the inclusion of Esurance brand s underwriting loss of \$61 million in the first quarter of 2012, higher expenses, and increases in catastrophe losses, partially offset by favorable reserve reestimates.

Catastrophe losses in the first quarter of 2012 were \$259 million as detailed in the table below. This compares to catastrophe losses in the first quarter of 2011 of \$333 million.

We define a catastrophe as an event that produces pre-tax losses before reinsurance in excess of \$1 million and involves multiple first party policyholders, or an event that produces a number of claims in excess of a preset, per-event threshold of average claims in a specific area, occurring within a certain amount of time following the event. Catastrophes are caused by various natural events including high winds, winter storms, tornadoes, hailstorms, wildfires, tropical storms, hurricanes, earthquakes and volcanoes. We are also exposed to man-made catastrophic events, such as certain types of terrorism or industrial accidents. The nature and level of catastrophes in any period cannot be reliably predicted.

Catastrophe losses related to events that occurred by the size of the event are shown in the following table.

(\$ in millions)	Number of events	Three months ended March 31, 2012			Average catastrophe loss per event	
		Claims and claims expense	Combined ratio impact			
Size of catastrophe						
\$101 million to \$250 million	1	6.7%	\$ 161	62.2%	2.5	\$ 161
\$50 million to \$100 million	1	6.7	94	36.3	1.4	94
Less than \$50 million	13	86.6	165	63.7	2.5	13
Total	15	100.0%	420	162.2	6.4	28
Prior year reserve reestimates			(161)	(62.2)	(2.5)	
Total catastrophe losses			\$ 259	100.0%	3.9	

Catastrophe losses incurred by the type of event are shown in the following table.

(\$ in millions)	Three months ended March 31,			
	2012	Number of events	2011	Number of events
Tornadoes	\$ 207	3	\$ 19	1
Wind/Hail	202	10	176	10
Wildfires	3	1	5	2
Other events	8	1	167	3
Prior year reserve reestimates	(161)		(34)	
Total catastrophe losses	\$ 259	15	\$ 333	16

Catastrophe losses, including prior year reserve reestimates, excluding hurricanes named or numbered by the National Weather Service, fires following earthquakes and earthquakes totaled \$284 million in the first quarter of 2012 and is the result of severe weather experienced.

Combined ratio Loss ratios are a measure of profitability. Loss ratios by product, and expense and combined ratios by brand, are shown in the following table. These ratios are defined in the Property-Liability Operations section of the MD&A.

	Three months ended March 31,						Effect of business combination expenses and the amortization of purchased intangible assets on combined ratio
	Ratio (1)		Effect of catastrophe losses on combined ratio		Effect of prior year reserve reestimates on combined ratio		
	2012	2011	2012	2011	2012	2011	
Allstate brand loss ratio:							
Standard auto	69.6	70.3	1.2	0.5	(1.2)	(0.4)	
Non-standard auto	67.2	64.8	--	--	--	(3.3)	
Homeowners	56.5	67.9	12.6	17.7	(7.9)	(2.7)	
Other personal lines	53.9	67.3	2.9	7.0	(6.7)	2.6	
Total Allstate brand loss ratio	64.9	69.2	4.1	5.1	(3.3)	(0.8)	
Allstate brand expense ratio	25.6	25.4	--	--	--	--	0.1
Allstate brand combined ratio	90.5	94.6	4.1	5.1	(3.3)	(0.8)	0.1
Encompass brand loss ratio:							
Standard auto	78.1	75.7	0.7	--	0.7	3.1	
Non-standard auto	--	100.0	--	--	--	--	
Homeowners	55.4	65.9	6.5	16.5	(2.2)	1.1	
Other personal lines	87.0	65.2	--	8.7	(4.3)	(8.7)	
Total Encompass brand loss ratio	71.0	71.7	2.6	6.2	(0.8)	1.5	
Encompass brand expense ratio	28.6	28.7	--	--	--	--	--
Encompass brand combined ratio	99.6	100.4	2.6	6.2	(0.8)	1.5	--
Esurance brand loss ratio:							
Standard auto	72.8	--	0.4	--	--	--	
Total Esurance brand loss ratio	72.8	--	0.4	--	--	--	
Esurance brand expense ratio	54.8	--	--	--	--	--	18.1
Esurance brand combined ratio	127.6	--	0.4	--	--	--	18.1
Allstate Protection loss ratio	65.4	69.3	3.9	5.2	(3.1)	(0.7)	
Allstate Protection expense ratio	26.7	25.5	--	--	--	--	0.7
Allstate Protection combined ratio	92.1	94.8	3.9	5.2	(3.1)	(0.7)	0.7

(1) Ratios are calculated using the premiums earned for the respective line of business.

Standard auto loss ratio for the Allstate brand decreased 0.7 points in the first quarter of 2012 compared to the first quarter of 2011 primarily due to favorable reserve reestimates, partially offset by higher catastrophe losses. Excluding the impact of catastrophe losses, the Allstate brand standard auto loss ratio improved 1.4 points in the first quarter of 2012 compared to the first quarter of 2011. Florida and New York results have shown improvement with loss ratios, including prior year reserve reestimates, of 71.3 and 65.2, respectively, in the first quarter of 2012 compared to 77.3 and 80.1, respectively, in

the first quarter of 2011. Although the combined impact of these two states on countrywide results has declined, we continue to pursue profitability management actions, including rate increases, underwriting restrictions, increased claims staffing and review, and continued advocacy for legislative reform. In the first quarter of 2012, claim frequencies in the bodily injury and physical damage coverages have decreased compared to the first quarter of 2011. Bodily injury and physical damage coverages severity results in the first quarter of 2012 increased in line with historical Consumer Price Index trends.

Homeowners loss ratio for the Allstate brand decreased 11.4 points to 56.5 in the first quarter of 2012 from 67.9 in the first quarter of 2011 due to lower catastrophe losses and average earned premiums increasing faster than loss costs.

Expense ratio for Allstate Protection increased 1.2 points in the first quarter of 2012 compared to the first quarter of 2011 primarily due to additional marketing costs and the amortization of purchased intangible assets related to Esurance in the current year period, partially offset by a non-recurring litigation accrual recorded in the prior year period. Other costs and expenses include Esurance advertising expense in the first quarter of 2012 which had a 20.4 point impact on the Esurance brand expense ratio and a 0.7 point impact on the Allstate Protection expense ratio.

The impact of specific costs and expenses on the expense ratio are included in the following table.

	Three months ended March 31,							
	Allstate brand		Encompass brand		Esurance brand	Allstate Protection		
	2012	2011	2012	2011	2012	2012	2011	
Amortization of DAC	13.1	13.2	17.3	17.5	2.3	12.9	13.4	
Other costs and expenses	12.3	12.0	11.3	11.4	34.4	13.0	11.9	
Business combination expenses and amortization of purchased intangible assets	0.1	--	--	--	18.1	0.7	--	
Restructuring and related charges	0.1	0.2	--	(0.2)	--	0.1	0.2	
Total expense ratio	25.6	25.4	28.6	28.7	54.8	26.7	25.5	

Reserve reestimates The tables below show Allstate Protection net reserves representing the estimated cost of outstanding claims as they were recorded at the beginning of years 2012 and 2011, and the effect of reestimates in each year.

(\$ in millions)	January 1 reserves	
	2012	2011
Auto	\$ 11,404	\$ 11,034
Homeowners	2,439	2,442
Other personal lines	2,237	2,141
Total Allstate Protection	\$ 16,080	\$ 15,617

(\$ in millions, except ratios)	Three months ended March 31,			
	2012		2011	
	Reserve reestimate (1) (2)	Effect on combined ratio (2)	Reserve reestimate (1) (2)	Effect on combined ratio (2)
Auto	\$ (48)	(0.7)	\$ (19)	(0.3)
Homeowners	(119)	(1.8)	(38)	(0.6)
Other personal lines	(40)	(0.6)	13	0.2
Total Allstate Protection (3)	\$ (207)	(3.1)	\$ (44)	(0.7)
Allstate brand	\$ (205)	(3.1)	\$ (48)	(0.8)
Encompass brand	(2)	--	4	0.1
Esurance brand	--	--	--	--
Total Allstate Protection (3)	\$ (207)	(3.1)	\$ (44)	(0.7)

(1) Favorable reserve reestimates are shown in parentheses.

(2) Discontinued Lines and Coverages segment reserve reestimates in the three months ended March 31, 2012 and 2011 totaled \$3 million unfavorable. There was no effect on the combined ratio in the three months ended March 31, 2012 and 2011.

(3) Reserve reestimates included in catastrophe losses totaled \$161 million favorable in the three months ended March 31, 2012 compared to \$34 million favorable in the three months ended March 31, 2011.

DISCONTINUED LINES AND COVERAGES SEGMENT

Overview The Discontinued Lines and Coverages segment includes results from insurance coverage that we no longer write and results for certain commercial and other businesses in run-off. Our exposure to asbestos, environmental and other discontinued lines claims is reported in this segment. We have assigned management of this segment to a designated group of professionals with expertise in claims handling, policy coverage interpretation, exposure identification and reinsurance collection. As part of its responsibilities, this group is also regularly engaged in policy buybacks, settlements and reinsurance assumed and ceded commutations.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Summarized underwriting results are presented in the following table.

	Three months ended	
	March 31,	
(\$ in millions)	2012	2011
Premiums written	\$ 1	\$ (1)
Premiums earned	\$ --	\$ (1)
Claims and claims expense	(3)	(4)
Operating costs and expenses	--	(1)
Underwriting loss	\$ (3)	\$ (6)

PROPERTY-LIABILITY INVESTMENT RESULTS

Net investment income increased 10.2% or \$29 million to \$313 million in the first quarter of 2012 from \$284 million in the first quarter of 2011. The increase resulted from income from limited partnerships and higher average investment balances, partially offset by lower fixed income yields.

Net realized capital gains and losses are presented in the following table.

(\$ in millions)	Three months ended	
	March 31,	
	2012	2011
Impairment write-downs	\$ (19)	\$ (64)
Change in intent write-downs	(28)	(27)
Net other-than-temporary impairment losses recognized in earnings	(47)	(91)
Sales	237	172
Valuation of derivative instruments	3	26
Settlements of derivative instruments	(4)	(95)
EMA limited partnership income (1)	--	45
Realized capital gains and losses, pre-tax	189	57
Income tax expense	(65)	(19)
Realized capital gains and losses, after-tax	\$ 124	\$ 38

(1) Income from limited partnerships accounted for under the equity method of accounting (EMA) is reported in net investment income in 2012 and realized capital gains and losses in 2011.

For a further discussion of net realized capital gains and losses, see the Investments section of the MD&A.

ALLSTATE FINANCIAL HIGHLIGHTS

- Net income was \$112 million in the first quarter of 2012 compared to \$102 million in the first quarter of 2011.
- Premiums and contract charges on underwritten products, including traditional life, interest-sensitive life and accident and health insurance, totaled \$535 million in the first quarter of 2012, an increase of 3.5% from \$517 million in the first quarter of 2011.
- Investments totaled \$57.62 billion as of March 31, 2012, reflecting an increase in carrying value of \$247 million from \$57.37 billion as of December 31, 2011. Net investment income increased to \$687 million in the first quarter of 2012 from \$684 million in the first quarter of 2011.
- Net realized capital losses totaled \$21 million in the first quarter of 2012 compared to net realized capital gains of \$39 million in the first quarter of 2011.
- Contractholder funds totaled \$41.60 billion as of March 31, 2012, reflecting a decrease of \$729 million from \$42.33 billion as of December 31, 2011 and \$5.23 billion from \$46.83 billion as of March 31, 2011.

ALLSTATE FINANCIAL SEGMENT

Net income		
Life insurance	\$ 57	
Accident and health insurance	17	

Edgar Filing: ALLSTATE CORP - Form 10-Q

Annuities and institutional products		38
Net income	\$	112

Net income was \$112 million in the first quarter of 2012 compared to \$102 million in the first quarter of 2011. The \$10 million increase was primarily due to decreased interest credited to contractholder funds, gain on disposition in the current year compared to a loss in the prior year related to the Allstate Bank dissolution, and lower amortization of DAC, partially offset by net realized capital losses in the current year compared to net realized capital gains in the prior year.

Analysis of revenues Total revenues decreased 5.7% or \$73 million in the first quarter of 2012 compared to the first quarter of 2011 due to net realized capital losses in the current year compared to net realized capital gains in the prior year and lower premiums and contract charges.

Life and annuity premiums and contract charges Premiums represent revenues generated from traditional life insurance, immediate annuities with life contingencies, and accident and health insurance products that have significant mortality or morbidity risk. Contract charges are revenues generated from interest-sensitive and variable life insurance and fixed annuities for which deposits are classified as contractholder funds or separate account liabilities. Contract charges are assessed against the contractholder account values for maintenance, administration, cost of insurance and surrender prior to contractually specified dates.

The following table summarizes life and annuity premiums and contract charges by product.

(\$ in millions)	Three months ended	
	March 31,	
	2012	2011
Underwritten products		
Traditional life insurance premiums	\$ 113	\$ 108
Accident and health insurance premiums	162	161
Interest-sensitive life insurance contract charges	260	248
Subtotal	535	517
Annuities		
Immediate annuities with life contingencies premiums	12	43
Other fixed annuity contract charges	6	9
Subtotal	18	52
Life and annuity premiums and contract charges (1)	\$ 553	\$ 569

(1) Contract charges related to the cost of insurance totaled \$170 million and \$162 million for the first quarter of 2012 and 2011, respectively.

Total premiums and contract charges decreased 2.8% in the first quarter of 2012 compared to the first quarter of 2011 primarily due to lower sales of immediate annuities with life contingencies, partially offset by higher contract charges on interest-sensitive life insurance products primarily resulting from the aging of our policyholders and increased traditional life insurance premiums. Sales of immediate annuities with life contingencies fluctuate with changes in our pricing competitiveness relative to other insurers. Increased traditional life insurance premiums were due to lower reinsurance premiums ceded and higher sales through Allstate agencies, partially offset by lower renewal premiums.

Contractholder funds represent interest-bearing liabilities arising from the sale of individual and institutional products, such as interest-sensitive life insurance, fixed annuities, funding agreements and bank deposits. The balance of contractholder funds is equal to the cumulative deposits received and interest credited to the contractholder less cumulative contract maturities, benefits, surrenders, withdrawals and contract charges for mortality or administrative expenses. The following table shows the changes in contractholder funds.

(\$ in millions)	Three months ended	
	March 31,	
	2012	2011
Contractholder funds, beginning balance	\$ 42,332	\$ 48,195
Deposits		
Fixed annuities	153	164
Interest-sensitive life insurance	332	330
Bank deposits	--	212
Total deposits	485	706
Interest credited	379	410
Maturities, benefits, withdrawals and other adjustments		
Maturities of and interest payments on institutional products	(1)	(487)
Benefits	(357)	(372)
Surrenders and partial withdrawals	(943)	(1,019)
Bank withdrawals	--	(274)
Contract charges	(264)	(251)
Net transfers from separate accounts	2	3
Fair value hedge adjustments for institutional products	--	(34)
Other adjustments (1)	(30)	(43)
Total maturities, benefits, withdrawals and other adjustments	(1,593)	(2,477)
Contractholder funds, ending balance	\$ 41,603	\$ 46,834

(1) The table above illustrates the changes in contractholder funds, which are presented gross of reinsurance recoverables on the Condensed Consolidated Statements of Financial Position. The table above is intended to supplement our discussion and analysis of revenues, which are presented net of reinsurance on the Condensed Consolidated Statements of Operations. As a result, the net change in contractholder funds associated with products reinsured to third parties is reflected as a component of the other adjustments line.

Contractholder funds decreased 1.7% and 2.8% in the first quarter of 2012 and 2011, respectively. Average contractholder funds decreased 11.7% in the first quarter of 2012 compared to the same period of 2011.

Contractholder deposits decreased 31.3% in the first quarter of 2012 compared to the same period of 2011 primarily due to the absence of Allstate Bank deposits in the current year period. In September 2011, Allstate Bank stopped opening new customer accounts and all funds were returned to Allstate Bank account holders prior to December 31, 2011.

Maturities of and interest payments on institutional products decreased to \$1 million in the first quarter of 2012 from \$487 million in the first quarter of 2011, reflecting the continuing decline in these obligations.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Surrenders and partial withdrawals on deferred fixed annuities and interest-sensitive life insurance products decreased 7.5% to \$943 million in the first quarter of 2012 from \$1.02 billion in the same period of 2011. The annualized surrender and partial withdrawal rate on deferred fixed annuities and interest-sensitive life insurance products, based on the beginning of year contractholder funds, was 10.7% in the first quarter of 2012 compared to 10.4% in the same period of 2011.

Net investment income increased 0.4% or \$3 million to \$687 million in the first quarter of 2012 from \$684 million in the same period of 2011 primarily due to income from limited partnerships and the termination of interest rate swaps in the first quarter of 2011, partially offset by lower yields on fixed income securities.

Net realized capital gains and losses are presented in the following table.

(\$ in millions)	Three months ended March 31,	
	2012	2011
Impairment write-downs	\$ (20)	\$ (50)
Change in intent write-downs	(16)	(42)
Net other-than-temporary impairment losses recognized in earnings	(36)	(92)
Sales	(8)	111
Valuation of derivative instruments	8	(4)
Settlements of derivative instruments	15	6
EMA limited partnership income (1)	--	18
Realized capital gains and losses, pre-tax	(21)	39
Income tax benefit (expense)	7	(14)
Realized capital gains and losses, after-tax	\$ (14)	\$ 25

(1) Income from EMA limited partnerships is reported in net investment income in 2012 and realized capital gains and losses in 2011.

For further discussion of realized capital gains and losses, see the Investments section of the MD&A.

Analysis of costs and expenses Total costs and expenses decreased 5.5% or \$62 million in the first quarter of 2012 compared to the same period of 2011 primarily due to lower interest credited to contractholder funds and amortization of DAC.

Life and annuity contract benefits decreased 3.3% or \$15 million in the first quarter of 2012 compared to the same period of 2011 primarily due to lower contract benefits on immediate annuities with life contingencies, reflecting the decrease in premiums on these products, partially offset by higher mortality experience on life insurance.

We analyze our mortality and morbidity results using the difference between premiums and contract charges earned for the cost of insurance and life and annuity contract benefits excluding the portion related to the implied interest on immediate annuities with life contingencies (benefit spread). This implied interest totaled \$134 million and \$135 million in the first quarter of 2012 and 2011, respectively.

The benefit spread by product group is disclosed in the following table.

(\$ in millions)	Three months ended March 31,	
	2012	2011
Life insurance	\$ 91	\$ 93
Accident and health insurance	73	74

Edgar Filing: ALLSTATE CORP - Form 10-Q

Annuities		(12)		(12)
Total benefit spread	\$	152	\$	155

Benefit spread decreased 1.9% or \$3 million in the first quarter of 2012 compared to the same period of 2011 primarily due to higher mortality experience on life insurance, partially offset by higher cost of insurance contract charges on interest-sensitive life insurance.

Interest credited to contractholder funds decreased 9.6% or \$40 million in the first quarter of 2012 compared to the same period of 2011 primarily due to lower average contractholder funds and lower interest crediting rates on deferred fixed annuities, immediate fixed annuities and interest-sensitive life insurance. Valuation changes on derivatives embedded in equity-indexed annuity contracts that are not hedged increased interest credited to contractholder funds by \$10 million in the first quarter of 2012 compared to a \$12 million decrease in the first quarter of 2011. Amortization of deferred sales inducement costs was \$1 million in the first quarter of 2012 compared to \$10 million in the same period of 2011.

Edgar Filing: ALLSTATE CORP - Form 10-Q

In order to analyze the impact of net investment income and interest credited to contractholders on net income, we monitor the difference between net investment income and the sum of interest credited to contractholder funds and the implied interest on immediate annuities with life contingencies, which is included as a component of life and annuity contract benefits on the Condensed Consolidated Statements of Operations (investment spread).

The investment spread by product group is shown in the following table.

(\$ in millions)	Three months ended			
	March 31,			
	2012		2011	
Annuities and institutional products	\$	87	\$	48
Life insurance		18		11
Accident and health insurance		6		5
Allstate Bank products		--		8
Net investment income on investments supporting capital		64		59
Total investment spread	\$	175	\$	131

Investment spread increased 33.6% or \$44 million in the first quarter of 2012 compared to the same period of 2011 due to income from limited partnerships, lower crediting rates and the termination of interest rate swaps in first quarter 2011, partially offset by an unfavorable change in the valuation of derivatives embedded in equity-indexed annuity contracts, lower yields on fixed income securities and the continued managed reduction in our spread based business in force.

To further analyze investment spreads, the following table summarizes the weighted average investment yield on assets supporting product liabilities and capital, interest crediting rates and investment spreads for the three months ended March 31.

	Weighted average investment yield				Weighted average interest crediting rate				Weighted average investment spreads			
	2012		2011		2012		2011		2012		2011	
Interest-sensitive life insurance	5.4	%	5.4	%	4.1	%	4.2	%	1.3	%	1.2	%
Deferred fixed annuities and institutional products	4.5		4.5		3.2		3.3		1.3		1.2	
Immediate fixed annuities with and without life contingencies	7.8		6.2		6.1		6.2		1.7		--	
Investments supporting capital, traditional life and other products	3.9		3.7		n/a		n/a		n/a		n/a	

The following table summarizes our product liabilities and indicates the account value of those contracts and policies in which an investment spread is generated.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Amortization of DAC decreased 15.8% or \$19 million in the first quarter of 2012 compared to the same period of 2011. The components of amortization of DAC are summarized in the following table.

(\$ in millions)	Three months ended	
	March 31,	
	2012	2011
Amortization of DAC before amortization relating to realized capital gains and losses, valuation changes on embedded derivatives that are not hedged and changes in assumptions	\$ 86	\$ 83
Amortization relating to realized capital gains and losses (1) and valuation changes on embedded derivatives that are not hedged	15	30
Amortization acceleration for changes in assumptions (DAC unlocking)	--	7
Total amortization of DAC	\$ 101	\$ 120

(1) The impact of realized capital gains and losses on amortization of DAC is dependent upon the relationship between the assets that give rise to the gain or loss and the product liability supported by the assets. Fluctuations result from changes in the impact of realized capital gains and losses on actual and expected gross profits.

The decrease of \$19 million in the first quarter of 2012 compared to the same period of 2011 was primarily due to decreased amortization relating to realized capital gains and losses and the absence of DAC unlocking in the current year period. In 2012, we plan to complete our annual comprehensive DAC review in the third quarter.

Our annual 2011 comprehensive review of the profitability of our products to determine DAC balances for our interest-sensitive life, fixed annuities and other investment contracts which covers assumptions for investment returns, including capital gains and losses, interest crediting rates to policyholders, the effect of any hedges, persistency, mortality and expenses in all product lines took place in first quarter 2011. The review resulted in an acceleration of DAC amortization (charge to income) of \$7 million in the first quarter of 2011. Amortization acceleration of \$12 million related to interest-sensitive life insurance and was primarily due to an increase in projected expenses. Amortization deceleration of \$5 million related to equity-indexed annuities and was primarily due to an increase in projected investment margins.

Operating costs and expenses increased 7.6% or \$10 million in the first quarter of 2012 compared to the same period of 2011. The following table summarizes operating costs and expenses.

(\$ in millions)	Three months ended	
	March 31,	
	2012	2011
Non-deferrable commissions	\$ 25	\$ 28
General and administrative expenses	102	89
Taxes and licenses	15	15
Total operating costs and expenses	\$ 142	\$ 132
Restructuring and related charges	\$ --	\$ (2)

Edgar Filing: ALLSTATE CORP - Form 10-Q

Non-deferrable commissions decreased \$3 million in the first quarter of 2012 compared to the same period of 2011 primarily due to lower sales commissions on immediate annuities and certain life insurance products. General and administrative expenses increased 14.6% or \$13 million in the first quarter of 2012 compared to the same period of 2011 primarily due to increased marketing costs and reduced insurance department assessments in the prior year period.

Gain on disposition of \$3 million in the first quarter of 2012 relates to the amortization of the deferred gain from the Prudential reinsurance agreement. Loss on disposition of \$20 million in the first quarter of 2011 included \$25 million related to the dissolution of Allstate Bank. In 2011, after receiving regulatory approval to dissolve, Allstate Bank ceased operations. In the first quarter of 2012, the bank received the order that it had requested from the Federal Deposit Insurance Company terminating its deposit insurance effective June 30, 2012. We expect to cancel the bank's charter and deregister The Allstate Corporation as a savings and loan holding company by June

30, 2012.

INVESTMENTS HIGHLIGHTS

- Investments totaled \$97.01 billion as of March 31, 2012, an increase of 1.5% from \$95.62 billion as of December 31, 2011.
- Unrealized net capital gains totaled \$3.56 billion as of March 31, 2012, increasing from \$2.88 billion as of December 31, 2011.
- Net investment income was \$1.01 billion in the first quarter of 2012, an increase of 3.0% from \$982 million in the first quarter of 2011.
- Net realized capital gains were \$168 million in the first quarter of 2012 compared to \$96 million in the first quarter of 2011.

INVESTMENTS

The composition of the investment portfolios as of March 31, 2012 is presented in the table below.

(\$ in millions)	Property-Liability (5)		Allstate Financial (5)		Corporate and Other (5)		Total	
		Percent to total		Percent to total		Percent to total		Percent to total
Fixed income securities								
(1)	\$ 28,906	78.7%	\$ 46,269	80.3%	\$ 2,048	76.9%	\$ 77,223	79.6%
Equity securities (2)	3,636	9.9	211	0.4	--	--	3,847	4.0
Mortgage loans	494	1.3	6,673	11.6	--	--	7,167	7.4
Limited partnership interests (3)	2,889	7.9	1,729	3.0	19	0.7	4,637	4.8
Short-term (4)	608	1.7	681	1.2	597	22.4	1,886	1.9
Other	192	0.5	2,057	3.5	--	--	2,249	2.3
Total	\$ 36,725	100.0%	\$ 57,620	100.0%	\$ 2,664	100.0%	\$ 97,009	100.0%

(1) Fixed income securities are carried at fair value. Amortized cost basis for these securities was \$28.09 billion, \$43.97 billion and \$2.00 billion for Property-Liability, Allstate Financial and Corporate and Other, respectively.

(2) Equity securities are carried at fair value. Cost basis for these securities was \$3.27 billion and \$160 million for Property-Liability and Allstate Financial, respectively.

(3) We have commitments to invest in additional limited partnership interests totaling \$1.20 billion and \$723 million for Property-Liability and Allstate Financial, respectively.

(4) Short-term investments are carried at fair value. Amortized cost basis for these investments was \$608 million, \$681 million and \$597 million for Property-Liability, Allstate Financial and Corporate and Other, respectively.

Edgar Filing: ALLSTATE CORP - Form 10-Q

(5) Balances reflect the elimination of related party investments between segments.

Total investments increased to \$97.01 billion as of March 31, 2012, from \$95.62 billion as of December 31, 2011, primarily due to higher valuations of fixed income and equity securities and an increase of \$213 million in collateral from securities lending activities, partially offset by net reductions in contractholder funds. Valuations of fixed income securities are typically driven by a combination of changes in relevant risk-free interest rates and credit spreads over the period. Risk-free interest rates are typically referenced as the yield on U.S. Treasury securities, whereas credit spread is the additional yield on fixed income securities above the risk-free rate that market participants require to compensate them for assuming credit, liquidity and/or prepayment risks. The increase in valuation of fixed income securities for the three months ended March 31, 2012 was due to tightening credit spreads, partially offset by increasing risk-free interest rates.

The Property-Liability investment portfolio increased to \$36.73 billion as of March 31, 2012, from \$36.00 billion as of December 31, 2011, primarily due to the higher valuations of equity and fixed income securities, positive operating cash flows and increased collateral from securities lending activities, partially offset by dividends paid by Allstate Insurance Company (AIC) to its parent, The Allstate Corporation (the Corporation).

The Allstate Financial investment portfolio increased to \$57.62 billion as of March 31, 2012, from \$57.37 billion as of December 31, 2011, primarily due to higher valuations of fixed income securities, partially offset by net reductions in contractholder funds of \$729 million.

The Corporate and Other investment portfolio increased to \$2.66 billion as of March 31, 2012, from \$2.25 billion as of December 31, 2011, primarily due to dividends of \$450 million paid by AIC to the Corporation and the

Edgar Filing: ALLSTATE CORP - Form 10-Q

proceeds of \$500 million of senior notes issued in January 2012, partially offset by repayment of \$350 million of debt, share repurchases, dividends paid to shareholders and interest paid on debt.

Fixed income securities by type are listed in the table below.

(\$ in millions)		Fair value as of March 31, 2012	Percent to total investments		Fair value as of December 31, 2011	Percent to total investments
U.S. government and agencies	\$	5,541	5.7%	\$	6,315	6.6%

Total fixed income securities	\$	77,223	79.6%	\$	76,113	79.6%

As of March 31, 2012, 90.6% of the consolidated fixed income securities portfolio was rated investment grade, which is defined as a security having a rating of Aaa, Aa, A or Baa from Moody's, a rating of AAA, AA, A or BBB from Standard & Poor's (S&P), Fitch, Dominion, or Realpoint, a rating of aaa, aa, a or bbb from A.M. Best, or a comparable internal rating if an externally provided rating is not available. All of our fixed income securities are rated by third party credit rating agencies, the National Association of Insurance Commissioners, and/or internally rated. Our initial investment decisions and ongoing monitoring procedures for fixed income securities are based on a thorough due diligence process which includes, but is not limited to, an assessment of the credit quality, sector, structure, and liquidity risks of each issue.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Edgar Filing: ALLSTATE CORP - Form 10-Q

Municipal bonds, including tax exempt, taxable and ARS securities, totaled \$13.61 billion as of March 31, 2012 with an unrealized net capital gain of \$644 million. The municipal bond portfolio includes general obligations of state and local issuers, revenue bonds and pre-refunded bonds, which are bonds for which an irrevocable trust has been established to fund the remaining payments of principal and interest.

Corporate bonds, including publicly traded and privately placed, totaled \$46.33 billion as of March 31, 2012 with an unrealized net capital gain of \$2.51 billion. Privately placed securities primarily consist of corporate issued senior debt securities that are directly negotiated with the borrower or are in unregistered form.

RMBS, CMBS and ABS are structured securities that are primarily collateralized by residential and commercial real estate loans and other consumer or corporate borrowings. The cash flows from the underlying collateral paid to the securitization trust are generally applied in a pre-determined order and are designed so that each security issued by the trust, typically referred to as a class, qualifies for a specific original rating. For example, the senior portion or top of the capital structure, or rating class, which would originally qualify for a rating of Aaa typically has priority in receiving principal repayments on the underlying collateral and retains this priority until the class is paid in full. In a sequential structure, underlying collateral principal repayments are directed to the most senior rated Aaa class in the structure until paid in full, after which principal repayments are directed to the next most senior Aaa class in the structure until it is paid in full. Senior Aaa classes generally share any losses from the underlying collateral on a pro-rata basis after losses are absorbed by classes with lower original ratings. The payment priority and class subordination included in these securities serves as credit enhancement for holders of the senior or top portions of the structures. These securities continue to retain the payment priority features that existed at the origination of the securitization trust. Other forms of credit enhancement may include structural features embedded in the securitization trust, such as overcollateralization, excess spread and bond insurance. The underlying collateral can have fixed interest rates, variable interest rates (such as adjustable rate mortgages) or may contain features of both fixed and variable rate mortgages.

RMBS, including U.S. Agency, Prime, Alt-A and Subprime, totaled \$3.73 billion, with 60.6% rated investment grade, as of March 31, 2012. The RMBS portfolio is subject to interest rate risk, but unlike other fixed income securities, is additionally subject to significant prepayment risk from the underlying residential mortgage loans. The credit risk associated with the U.S. Agency portfolio is mitigated because they were issued by or have underlying collateral guaranteed by U.S. government agencies. The unrealized net capital loss of \$231 million as of March 31, 2012 was the result of wider credit spreads than at initial purchase on the non-U.S. Agency portion of our RMBS portfolio, largely due to higher risk premiums caused by macroeconomic conditions and credit market deterioration, including the impact of lower residential real estate valuations, which show signs of stabilization or recovery in certain geographic areas but remain under stress in other geographic areas. The following table shows our RMBS portfolio as of March 31, 2012 based upon vintage year of the issuance of the securities.

(\$ in millions)	U.S. Agency		Prime		Alt-A		Subprime		Total RMBS	
	Fair value	Unrealized gain/(loss)	Fair value	Unrealized gain/(loss)	Fair value	Unrealized gain/(loss)	Fair value	Unrealized gain/(loss)	Fair value	Unrealized gain/(loss)

Total	\$ 1,624	\$ 79	\$ 888	\$ 5	\$ 516	\$ (56)	\$ 700	\$ (259)	\$ 3,728	\$ (231)

Prime are collateralized by residential mortgage loans issued to prime borrowers. Alt-A includes securities collateralized by residential mortgage loans issued to borrowers who do not qualify for prime financing terms due to high loan-to-value ratios or limited supporting documentation, but have stronger credit profiles than subprime borrowers. Subprime includes securities collateralized by residential mortgage loans issued to borrowers that cannot qualify for Prime or Alt-A financing terms due in part to weak or limited credit history. It also includes

Edgar Filing: ALLSTATE CORP - Form 10-Q

securities that are collateralized by certain second lien mortgages regardless of the borrower's credit history. The Subprime portfolio consisted of \$528 million and \$172 million of first lien and second lien securities, respectively.

CMBS totaled \$1.75 billion, with 88.6% rated investment grade, as of March 31, 2012. The *CMBS* portfolio is subject to credit risk, but unlike certain other structured securities, is generally not subject to prepayment risk due to protections within the underlying commercial mortgage loans. Of the *CMBS* investments, 93.0% are traditional

Edgar Filing: ALLSTATE CORP - Form 10-Q

conduit transactions collateralized by commercial mortgage loans, broadly diversified across property types and geographical area. The remainder consists of non-traditional CMBS such as small balance transactions, large loan pools and single borrower transactions.

The following table shows our CMBS portfolio as of March 31, 2012 based upon vintage year of the underlying collateral.

(\$ in millions)	Fair value	Unrealized gain/(loss)
2011	\$ 5	\$ --
2010	25	2
2007	282	(8)
2006	544	(90)
2005	248	(29)
Pre-2005	649	14
Total	\$ 1,753	\$ (111)
CMBS		

The unrealized net capital loss of \$111 million as of March 31, 2012 on our CMBS portfolio was the result of wider credit spreads than at initial purchase in our 2005-2007 vintage year CMBS. This is largely due to the macroeconomic conditions and credit market deterioration, including the impact of lower commercial real estate valuations, which show signs of stabilization or recovery in certain geographic areas but remain under stress in other geographic areas.

ABS, including CDO and Consumer and other ABS, totaled \$4.24 billion, with 93.2% rated investment grade, as of March 31, 2012. Credit risk is managed by monitoring the performance of the underlying collateral. Many of the securities in the ABS portfolio have credit enhancement with features such as overcollateralization, subordinated structures, reserve funds, guarantees and/or insurance. The unrealized net capital loss of \$130 million as of March 31, 2012 on our ABS portfolio was the result of wider credit spreads than at initial purchase.

CDO totaled \$1.67 billion, with 83.6% rated investment grade, as of March 31, 2012. CDO consist primarily of obligations collateralized by high yield and investment grade corporate credits including \$1.37 billion of cash flow collateralized loan obligations (CLO) with unrealized losses of \$78 million. Cash flow CLO are structures collateralized primarily by below investment grade senior secured corporate loans. The underlying collateral is actively managed by external managers that monitor the collateral's performance and is well diversified across industries and among issuers. The remaining \$303 million of securities consisted of synthetic CDO, trust preferred CDO, project finance CDO, market value CDO, collateralized bond obligations and other CLO with unrealized losses of \$103 million.

Consumer and other ABS totaled \$2.57 billion, with 99.4% rated investment grade, as of March 31, 2012. Consumer and other ABS consists of \$680 million of consumer auto and \$1.89 billion of other ABS with unrealized gains of \$5 million and \$46 million, respectively.

Mortgage loans Our mortgage loan portfolio, which is primarily held in the Allstate Financial portfolio, totaled \$7.17 billion as of March 31, 2012, compared to \$7.14 billion as of December 31, 2011, and primarily comprises loans secured by first mortgages on developed commercial real estate. Key considerations used to manage our exposure include property type and geographic diversification.

Edgar Filing: ALLSTATE CORP - Form 10-Q

For further detail on our mortgage loan portfolio, see Note 4 of the condensed consolidated financial statements.

Limited partnership interests consist of investments in private equity/debt funds, real estate funds, hedge funds and tax credit funds. The limited partnership interests portfolio is well diversified across a number of characteristics including fund managers, vintage years, strategies, geography (including international), and company/property types. The following table presents information about our limited partnership interests as of March 31, 2012.

(\$ in millions)	Private equity/debt funds	Real estate funds	Hedge funds	Tax credit funds	Total
Cost method of accounting (Cost)	\$ 862	\$ 385	\$ 24	\$ 7	1,278
Equity method of accounting (EMA)	1,133	845	767	614	3,359
Total	\$ 1,995	\$ 1,230	\$ 791	\$ 621	4,637
Number of managers	93	45	13	10	
Number of individual funds	154	92	63	19	
Largest exposure to single fund	\$ 49	\$ 184	\$ 80	\$ 58	

The following table shows the results from our limited partnership interests by fund type and accounting classification for the three months ended March 31.

(\$ in millions)	2012				2011			
	Cost	EMA (2)	Total income	Impairment write-downs (1)	Cost	EMA (2)	Total income	Impairment write-downs (1)
Private equity/debt funds	\$ 12	\$ 60	\$ 72	\$ (1)	\$ 9	\$ 19	\$ 28	\$ (1)
Real estate funds	1	30	31	(1)	1	8	9	--
Hedge funds	--	10	10	--	--	36	36	--
Tax credit funds	--	(4)	(4)	--	--	--	--	--
Total	\$ 13	\$ 96	\$ 109	\$ (2)	\$ 10	\$ 63	\$ 73	\$ (1)

(1) Impairment write-downs related to cost method limited partnerships were \$2 million and \$1 million in the three months ended March 31, 2012 and 2011, respectively. There were no impairment write-downs related to EMA limited partnerships in the three months ended March 31, 2012 and 2011.

(2) Income from EMA limited partnerships is reported in net investment income in 2012 and realized capital gains and losses in 2011.

Limited partnership interests, excluding impairment write-downs, produced income of \$109 million in the three months ended March 31, 2012 compared to \$73 million in the three months ended March 31, 2011. Income on EMA limited partnerships is recognized on a delay due to the availability of the related financial statements. The recognition of income on hedge funds is primarily on a one-month delay and the income recognition on private equity/debt funds, real estate funds and tax credit funds are generally on a three-month delay. Income on cost method limited partnerships is recognized only upon receipt of amounts distributed by the partnerships.

Unrealized net capital gains totaled \$3.56 billion as of March 31, 2012 compared to \$2.88 billion as of December 31, 2011. The increase from December 31, 2011 for fixed income securities was due to tightening credit spreads, partially offset by increasing risk-free interest rates. The improvement since December 31, 2011 for equity securities was primarily due to higher equity valuations. The following table presents unrealized net capital gains and losses.

(\$ in millions)

	March 31, 2012		December 31, 2011	
U.S. government and agencies	\$	282	\$	349
Municipal		644		607
Corporate		2,512		2,364

CMBS		(111)		(178)
ABS		(130)		(214)
Redeemable preferred stock		2		2
Fixed income securities (1)		3,163		2,734
Equity securities		417		160
EMA limited partnerships		1		2
Derivatives		(21)		(17)
Unrealized net capital gains and losses, pre-tax	\$	3,560	\$	2,879

(1) Unrealized net capital gains and losses for fixed income securities as of March 31, 2012 and December 31, 2011 comprise \$(154) million and \$(267) million, respectively, related to unrealized net capital losses on fixed income securities with other-than-temporary impairment and \$3.32 billion and \$3.00 billion, respectively, related to other unrealized net capital gains and losses.

The unrealized net capital gains for the fixed income portfolio totaled \$3.16 billion and comprised \$4.40 billion of gross unrealized gains and \$1.24 billion of gross unrealized losses as of March 31, 2012. This is compared to unrealized net capital gains for the fixed income portfolio totaling \$2.73 billion, comprised \$4.40 billion of gross unrealized gains and \$1.67 billion of gross unrealized losses as of December 31, 2011.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Gross unrealized gains and losses as of March 31, 2012 on fixed income securities by type and sector are provided in the table below.

(\$ in millions)	Gross unrealized				Fair value	Amortized cost as a percent of par value (2)	Fair value as a percent of par value (2)
	Par value (1)	Amortized cost	Gains	Losses

(1) Included in par value are zero-coupon securities that are generally purchased at a deep discount to the par value that is received at maturity. These primarily included corporate, U.S. government and agencies, municipal and foreign government zero-coupon securities with par value of \$488 million, \$948 million, \$3.13 billion and \$382 million, respectively.

(2) Excluding the impact of zero-coupon securities, the percentage of amortized cost to par value would be 100.5% for corporates, 101.3% for U.S. government and agencies, 101.5% for municipals and 103.8% for foreign governments. Similarly, excluding the impact of zero-coupon securities, the percentage of fair value to par value would be 106.2% for corporates, 104.2% for U.S. government and agencies, 106.7% for municipals and 111.6% for foreign governments.

The banking, utilities, financial services and capital goods sectors had the highest concentration of gross unrealized losses in our corporate fixed income securities portfolio as of March 31, 2012. In general, credit spreads remain wider than at initial purchase for most of the securities with gross unrealized losses in these categories.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The unrealized net capital gain for the equity portfolio totaled \$417 million and comprised \$464 million of gross unrealized gains and \$47 million of gross unrealized losses as of March 31, 2012. This is compared to an unrealized net capital gain for the equity portfolio totaling \$160 million, comprised of \$369 million of gross unrealized gains and \$209 million of gross unrealized losses as of December 31, 2011.

We have a comprehensive portfolio monitoring process to identify and evaluate each fixed income and equity security that may be other-than-temporarily impaired. The process includes a quarterly review of all securities to identify instances where the fair value of a security compared to its amortized cost (for fixed income securities) or cost (for equity securities) is below established thresholds. The process also includes the monitoring of other impairment indicators such as ratings, ratings downgrades and payment defaults. The securities identified, in addition to other securities for which we may have a concern, are evaluated based on facts and circumstances for inclusion on our watch-list. All investments in an unrealized loss position as of March 31, 2012 were included in our portfolio monitoring process for determining whether declines in value were other than temporary.

The extent and duration of a decline in fair value for fixed income securities have become less indicative of actual credit deterioration with respect to an issue or issuer. While we continue to use declines in fair value and the

Edgar Filing: ALLSTATE CORP - Form 10-Q

length of time a security is in an unrealized loss position as indicators of potential credit deterioration, our determination of whether a security's decline in fair value is other than temporary has placed greater emphasis on our analysis of the underlying credit and collateral and related estimates of future cash flows.

The following table summarizes the fair value and gross unrealized losses of fixed income securities by type and investment grade classification as of March 31, 2012.

(\$ in millions)	Investment grade		Below investment grade		Total	
	Fair value	Unrealized losses	Fair value	Unrealized losses	Fair value	Unrealized losses
U.S. government and agencies	\$ 996	\$ (5)	\$ --	\$ --	\$ 996	\$ (5)
Municipal	1,595	(128)	442	(92)	2,037	(220)

Foreign government	79	(1)	--	--	79	(1)
RMBS	238	(28)	997	(329)	1,235	(357)
CMBS	507	(69)	182	(105)	689	(174)
ABS	1,512	(153)	214	(85)	1,726	(238)
Total	\$ 8,334	\$ (566)	\$ 3,157	\$ (677)	\$ 11,491	\$ (1,243)

We have experienced declines in the fair values of fixed income securities primarily due to wider credit spreads resulting from higher risk premiums since the time of initial purchase, largely due to macroeconomic conditions and credit market deterioration, including the impact of lower real estate valuations, which show signs of stabilization or recovery in certain geographic areas but remain under stress in other geographic areas. Consistent with their ratings, our portfolio monitoring process indicates that investment grade securities have a low risk of default. Securities rated below investment grade, comprising securities with a rating of Ba, B and Caa or lower, have a higher risk of default. As of March 31, 2012, 35% of our below investment grade gross unrealized losses related to Subprime RMBS.

Fair values for our structured securities are obtained from third-party valuation service providers and are subject to review as disclosed in our Application of Critical Accounting Estimates. In accordance with GAAP, when fair value is less than the amortized cost of a security and we have not made the decision to sell the security and it is not more likely than not we will be required to sell the security before recovery of its amortized cost basis, we evaluate if we expect to receive cash flows sufficient to recover the entire amortized cost basis of the security. We calculate the estimated recovery value by discounting our best estimate of future cash flows at the security's original or current effective rate, as appropriate, and compare this to the amortized cost of the security. If we do not expect to receive cash flows sufficient to recover the entire amortized cost basis of the security, the credit loss component of the impairment is recorded in earnings, with the remaining amount of the unrealized loss related to other factors (non-credit-related) recognized in other comprehensive income.

The non-credit-related unrealized losses for our structured securities, including our below investment grade Subprime, are heavily influenced by risk factors other than those related to our best estimate of future cash flows. The difference between these securities' original or current effective rates and the yields implied by their fair value indicates that a higher risk premium is included in the valuation of these securities than existed at initial issue or purchase. This risk premium represents the return that a market participant requires as compensation to assume the risk associated with the uncertainties regarding the future performance of the underlying collateral. The risk premium is comprised of: default risk, which reflects the probability of default and the uncertainty related to collection of contractual principal and interest; liquidity risk, which reflects the risk associated with exiting the investment in an illiquid market, both in terms of timeliness and cost; and volatility risk, which reflects the potential valuation volatility during an investor's holding period. Other factors reflected in the risk premium include the costs associated with underwriting, monitoring and holding these types of complex securities. Certain aspects of the default risk are included in the development of our best estimate of future cash flows, as appropriate. Other aspects of the risk premium are considered to be temporary in nature and are expected to reverse over the remaining lives of the securities as future cash flows are received.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Other-than-temporary impairment assessment for below investment grade Subprime RMBS

As of March 31, 2012, the fair value of our below investment grade Subprime securities with gross unrealized losses totaled \$512 million, a decrease of 12.6% compared to \$586 million as of December 31, 2011, primarily due to sales. As of March 31, 2012, gross unrealized losses for our below investment grade Subprime portfolio totaled \$240 million, an improvement of 28.1% compared to \$334 million as of December 31, 2011, due to sales, impairment write-downs,

increased valuations and principal collections, partially offset by the downgrade of certain securities to below investment grade. For our below investment grade Subprime with gross unrealized gains totaling \$6 million, we have recognized cumulative write-downs in earnings totaling \$84 million as of March 31, 2012.

The credit loss evaluation for Subprime securities with gross unrealized losses is performed in two phases. The first phase estimates the future cash flows of the entire securitization trust from which our security was issued. A critical part of this estimate involves forecasting default rates and loss severities of the residential mortgage loans that collateralize the securitization trust. The factors that affect the default rates and loss severities include, but are not limited to, historical collateral performance, collateral type, transaction vintage year, geographic concentrations, borrower credit quality, origination practices of the transaction sponsor, and practices of the mortgage loan servicers. Current loan-to-value ratios of underlying collateral are not consistently available and accordingly they are not a primary factor in our impairment evaluation. While our projections are developed internally and customized to our specific holdings, they are informed by and benchmarked against credit opinions obtained from third parties, such as industry analysts, nationally recognized credit rating agencies and an RMBS loss modeling advisory service. The default rate and loss severity forecasts result in an estimate of trust-level projected additional collateral loss.

We then analyze the actual cumulative collateral losses incurred to date by the securitization trust, our projected additional collateral losses expected to be incurred and the position of the class of securities we own in the securitization trust relative to the trust's other classes to determine whether any of the collateral losses will be applied to our class. If our class has remaining credit enhancement sufficient to withstand the projected additional collateral losses, no collateral losses will be realized by our class and we expect to collect all contractual principal and interest of the security we own. Remaining credit enhancement is measured in terms of (i) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security we own and (ii) the expected impact of other structural features embedded in the securitization trust beneficial to our class, such as overcollateralization and excess spread.

For securities where there is insufficient remaining credit enhancement for the class of securities we own, a recovery value is calculated based on our best estimate of future cash flows specific to that security. This estimate is based on the contractual principal payments and current interest payments of the securities we own, adjusted for actual cumulative collateral losses incurred to date and the projected additional collateral losses expected to be incurred. This estimate also takes into consideration additional secondary sources of credit support, such as reliable bond insurance. For securities without secondary sources of credit support or for which the secondary sources do not fully offset the actual and projected additional collateral losses applied to them, a credit loss is recorded in earnings to the extent amortized cost exceeds recovery value.

72.8%, 23.1% and 4.1% of the fair value of our below investment grade Subprime securities with gross unrealized losses were issued with Aaa, Aa and A original ratings and capital structure classifications, respectively. As described previously, Subprime securities with higher original ratings typically have priority in receiving the principal repayments on the underlying collateral compared to those with lower original ratings. While the projected cash flow assumptions for our below investment grade Subprime securities with gross unrealized losses have deteriorated since the securities were originated, as reflected by their current credit ratings, these securities continue to retain the payment priority features that existed at the origination of the securitization trust.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The following tables show trust-level, class-level and security-specific detailed information for our below investment grade Subprime securities with gross unrealized losses that are not reliably insured, by credit rating.

Edgar Filing: ALLSTATE CORP - Form 10-Q

(1) Weighted average actual cumulative collateral losses incurred to date as of period end are based on the actual principal losses incurred as a percentage of the remaining principal amount of the loans in the trust. The weighting calculation is based on the par value of each security. Actual losses on the securities we hold are less than the losses on the underlying collateral as presented in this table. Actual cumulative realized principal losses on the below investment grade Subprime securities we own, as reported by the trust servicers, were \$22 million as of March 31, 2012.

(2) Weighted average projected additional collateral losses to be incurred as of period end are based on our projections of future losses to be incurred by the trust, taking into consideration the actual cumulative collateral losses incurred to date, as a percentage of the remaining principal amount of the loans in the trust. Our projections are developed internally and customized to our specific holdings and are informed by and benchmarked against credit opinions obtained from third parties, such as industry analysts, nationally recognized credit rating agencies and an RMBS loss modeling advisory service. Projected additional collateral losses to be incurred are compared to average remaining credit enhancement for each security. For securities where the projected additional collateral losses exceed remaining credit enhancement, a recovery value is calculated to determine whether impairment losses should be recorded in earnings. The weighting calculation is based on the par value of each security.

(3) Weighted average remaining credit enhancement as of period end is based on structural subordination and the expected impact of other structural features existing in the securitization trust beneficial to our class and reflects our projection of future principal losses that can occur

as a percentage of the remaining principal amount of the loans in the trust before the class of the security we own will incur its first dollar of principal loss. The weighting calculation is based on the par value of each security.

(4) As of March 31, 2012, \$80 million of unrealized losses on securities with other-than-temporary impairments recognized in earnings and \$73 million of unrealized losses on securities without other-than-temporary impairments recognized in earnings have been greater than or equal to 20% of those securities amortized cost for a period of more than 24 consecutive months. As of December 31, 2011, \$122 million of unrealized losses on securities with other-than-temporary impairments recognized in earnings and \$104 million of unrealized losses on securities without other-than-temporary impairments recognized in earnings have been greater than or equal to 20% of those securities amortized cost for a period of more than 24 consecutive months.

The above tables include information only about below investment grade Subprime securities with gross unrealized losses that are not reliably insured as of each period presented. As such, the par value and composition of securities included can vary significantly from period to period due to changes in variables such as credit ratings, principal payments, sales, purchases and realized principal losses.

As of March 31, 2012, our Subprime securities that are reliably insured include nine below investment grade Subprime securities with a total fair value of \$86 million and aggregate gross unrealized losses of \$34 million, all of which are rated B. These securities are insured by one bond insurer rated B that we estimate has sufficient claims paying capacity to service its obligations on these securities. The securitization trusts from which our securities were issued are currently receiving contractual payments from the bond insurer and considering the combination of expected future payments from the bond insurer and cash flows available from the underlying collateral, we expect the trust to have adequate cash flows to make all contractual payments due to the class of securities we own. As a result, our security-specific estimates of future cash flows indicate that these securities estimated recovery values equal or exceed their amortized cost. Accordingly, no other-than-temporary impairments have been recognized on these securities. As of December 31, 2011, our Subprime securities that are reliably insured included nine below investment grade Subprime securities with a total fair value of \$87 million and aggregate gross unrealized losses of \$36 million.

As of March 31, 2012, our below investment grade Subprime securities with gross unrealized losses that are not reliably insured and without other-than-temporary impairments recorded in earnings had incurred actual cumulative collateral losses of 6.4%. Our impairment evaluation forecasts more severe assumptions than the trusts are actually experiencing, including a projected weighted average underlying default rate of 49.7% and a projected weighted average loss severity of 68.6%, which resulted in projected additional collateral losses of 33.9%. As the average remaining credit enhancement for these securities of 44.3% exceeds the projected additional collateral losses of 33.9%, these securities have not been impaired.

As of March 31, 2012, our below investment grade Subprime securities with gross unrealized losses that are not reliably insured and with other-than-temporary impairments recorded in earnings had incurred actual cumulative collateral losses of 17.1%. Our impairment evaluation forecasts more severe assumptions than the trusts are actually experiencing, including a projected weighted average underlying default rate of 55.5% and a projected weighted average loss severity of 73.2%, which resulted in projected additional collateral losses of 39.9%. As the average remaining credit enhancement for these securities of 18.0% is insufficient to withstand the projected additional collateral losses, we have recognized cumulative write-downs in earnings on the securities as reflected in the table above using our calculated recovery value at the time of impairment. The current average recovery value of these securities as a percentage of par was 68.6% and exceeded these securities current average amortized cost as a percentage of par of 66.1%, which demonstrates our conclusion that the nature of the remaining unrealized loss on these securities is temporary and will reverse over time. The comparison indicates that recovery value exceeds amortized cost based on a comprehensive evaluation of financial, economic and capital markets assumptions developed for this reporting period.

We believe the unrealized losses on our Subprime securities, including those over 24 months, result from the current risk premium on these securities, which should continue to reverse over the securities remaining lives. We expect to receive our estimated share of contractual principal and interest collections used to determine the securities recovery value. As of March 31, 2012, we do not have the intent to sell and it is not more likely than not we will be required to sell these securities before the recovery of their amortized cost basis. We believe that our

Edgar Filing: ALLSTATE CORP - Form 10-Q

valuation and impairment processes are comprehensive, employ the most current views about collateral and securitization trust financial positions, and demonstrate our recorded impairments and that the remaining unrealized losses on these positions are temporary.

Net investment income The following table presents net investment income.

(\$ in millions)	Three months ended	
	March 31,	
	2012	2011
Fixed income securities	\$ 806	\$ 900
Equity securities	21	19
Mortgage loans	93	89
Limited partnership interests (1)	109	10
Short-term investments	1	2
Other	30	11
Investment income, before expense	1,060	1,031
Investment expense	(49)	(49)
Net investment income	\$ 1,011	\$ 982

(1) Income from EMA limited partnerships is reported in net investment income in 2012 and realized capital gains and losses in 2011.

Net investment income increased 3.0% or \$29 million in the first quarter of 2012 compared to the first quarter of 2011 primarily due to income from limited partnerships and the termination of interest rate swaps in the first quarter of 2011, partially offset by lower average investment balances and lower fixed income yields.

Realized capital gains and losses The following table presents the components of realized capital gains and losses and the related tax effect.

(\$ in millions)	Three months ended	
	March 31,	
	2012	2011
Impairment write-downs	\$ (39)	\$ (114)
Change in intent write-downs	(44)	(69)
Net other-than-temporary impairment losses recognized in earnings	(83)	(183)
Sales	229	283
Valuation of derivative instruments	11	22
Settlements of derivative instruments	11	(89)
EMA limited partnership income (1)	--	63
Realized capital gains and losses, pre-tax	168	96
Income tax expense	(58)	(33)
Realized capital gains and losses, after-tax	\$ 110	\$ 63

(1) Income from EMA limited partnerships is reported in net investment income in 2012 and realized capital gains and losses in 2011.

Impairment write-downs are presented in the following table.

(\$ in millions)	Three months ended	
	March 31,	
	2012	2011
Fixed income securities	\$ (29)	\$ (86)
Equity securities	(7)	(20)
Mortgage loans	(3)	(6)
Limited partnership interests	(2)	(1)
Other investments	2	(1)
Impairment write-downs	\$ (39)	\$ (114)

Impairment write-downs for the three months ended March 31, 2012 were primarily driven by corporate fixed income securities impacted by issuer specific circumstances and RMBS, which experienced deterioration in expected cash flows. Impairment write-downs on below investment grade RMBS and CMBS for the three months ended March 31, 2012 were \$10 million and \$3 million, respectively. Equity securities were written down primarily

due to the length of time and extent to which fair value was below cost, considering our assessment of the financial condition and near-term and long-term prospects of the issuer, including relevant industry conditions and trends.

Change in intent write-downs are presented in the following table.

(\$ in millions)	Three months ended	
	March 31,	
	2012	2011
Fixed income securities	\$ (35)	\$ (69)
Equity securities	(9)	--
Change in intent write-downs	\$ (44)	\$ (69)

The change in intent write-downs in the three months ended March 31, 2012 were primarily a result of ongoing comprehensive reviews of our portfolios resulting in write-downs of individually identified investments, primarily RMBS, equity securities and corporate fixed income securities.

Sales generated \$229 million of net realized gains for the three months ended March 31, 2012 primarily due to \$175 million of net gains on sales of equity securities and \$35 million of net gains on sales of fixed income securities.

Valuation and settlements of derivative instruments net realized capital gains totaling \$22 million for the three months ended March 31, 2012 included \$11 million of gains on the valuation of derivative instruments and \$11 million of gains on the settlement of derivative instruments. The net realized capital gains on derivative instruments for the three months ended March 31, 2012 primarily included gains on credit default swaps due to the tightening of credit spreads on the underlying credit names. As a component of our approach to managing interest rate risk, realized gains and losses on certain derivative instruments are most appropriately considered in conjunction with the unrealized gains and losses on the fixed income portfolio. This approach mitigates the impacts of general interest rate changes to our overall financial condition.

CAPITAL RESOURCES AND LIQUIDITY HIGHLIGHTS

- Shareholders' equity as of March 31, 2012 was \$19.18 billion, an increase of 4.8% from \$18.30 billion as of December 31, 2011.
- On January 3, 2012 and April 2, 2012, we paid a quarterly shareholder dividend of \$0.21 and \$0.22, respectively.
- During the first quarter of 2012, we repurchased 9.8 million common shares for \$300 million. As of March 31, 2012, our current \$1.00 billion share repurchase program had \$594 million remaining and is expected to be completed by March 31, 2013.

Edgar Filing: ALLSTATE CORP - Form 10-Q

- On January 11, 2012, we issued \$500 million of 5.20% Senior Notes due 2042.

- On April 27, 2012, we entered into a new \$1 billion, 5-year primary credit facility replacing the \$1 billion facility expiring on May 8, 2012.

- On April 30, 2012, we filed a universal shelf registration statement with the Securities and Exchange Commission that can be utilized to issue an unspecified amount of various types of securities.

CAPITAL RESOURCES AND LIQUIDITY

Capital resources consist of shareholders' equity and debt, representing funds deployed or available to be deployed to support business operations or for general corporate purposes. The following table summarizes our capital resources.

(\$ in millions)	March 31, 2012	December 31, 2011
Common stock, retained income and other shareholders' equity items	\$ 18,650	\$ 18,269
Accumulated other comprehensive income	532	29
Total shareholders' equity	19,182	18,298
Debt	6,058	5,908
Total capital resources	\$ 25,240	\$ 24,206
Ratio of debt to shareholders' equity	31.6%	32.3%
Ratio of debt to capital resources	24.0%	24.4%

Shareholders' equity increased in the first quarter of 2012, primarily due to net income and increased unrealized net capital gains on investments, partially offset by share repurchases and dividends paid to shareholders.

Debt On January 11, 2012, we issued \$500 million of 5.20% Senior Notes due 2042, utilizing the registration statement filed with the Securities and Exchange Commission on May 8, 2009. The proceeds of this issuance were used for general corporate purposes, including the repayment of \$350 million of 6.125% Senior Notes on February 15, 2012. The next debt maturity is on June 15, 2013 when \$250 million of 7.50% Debentures are due.

Share repurchases During the first quarter of 2012, we repurchased 9.8 million common shares for \$300 million. As of March 31, 2012, \$594 million remained on our \$1.00 billion share repurchase program that we commenced in November 2011, and is expected to be completed by March 31, 2013.

Financial ratings and strength Our ratings are influenced by many factors including our operating and financial performance, asset quality, liquidity, asset/liability management, overall portfolio mix, financial leverage (i.e., debt), exposure to risks such as catastrophes and the current level of operating leverage. On January 26, 2012, A.M. Best affirmed The Allstate Corporation's debt and commercial paper ratings of a- and AMB-1, respectively, and our insurance entities financial strength ratings of A+ for AIC and Allstate Life Insurance Company (ALIC). The outlook for AIC is stable and ALIC was revised to stable from negative. In April 2012, S&P affirmed The Allstate Corporation's debt and commercial paper ratings of A- and A-2, respectively, AIC's financial strength ratings of AA- and ALIC's financial strength rating of A+. The outlook for all S&P ratings remained negative. There have been no changes to our debt, commercial paper and insurance financial strength ratings from Moody's since December 31, 2011. In the future, if our financial position is less than rating agency expectations including those related to capitalization at the parent company, AIC or ALIC, we could be exposed to a downgrade in our ratings of one notch or more which we do not view as being material to our business model or strategies.

ALIC, AIC and The Allstate Corporation are party to the Amended and Restated Intercompany Liquidity Agreement (Liquidity Agreement) which allows for short-term advances of funds to be made between parties for liquidity and other general corporate purposes. The Liquidity Agreement does not establish a commitment to advance funds on the part of any party. ALIC and AIC each serve as a lender and borrower and

Edgar Filing: ALLSTATE CORP - Form 10-Q

the Corporation serves only as a lender. AIC also has a capital support agreement with ALIC. Under the capital support agreement, AIC is committed to provide capital to ALIC to maintain an adequate capital level. The maximum amount of potential funding under each of these agreements is \$1.00 billion.

In addition to the Liquidity Agreement, the Corporation also has an intercompany loan agreement with certain of its subsidiaries, which include, but are not limited to, AIC and ALIC. The amount of intercompany loans available to the Corporation's subsidiaries is at the discretion of the Corporation. The maximum amount of loans the Corporation will have outstanding to all its eligible subsidiaries at any given point in time is limited to \$1.00 billion. The Corporation may use commercial paper borrowings, bank lines of credit and securities lending to fund intercompany borrowings.

Liquidity sources and uses We actively manage our financial position and liquidity levels in light of changing market, economic, and business conditions. Liquidity is managed at both the entity and enterprise level across the Company, and is assessed on both base and stressed level liquidity needs. We believe we have sufficient liquidity to meet these needs. Additionally, we have existing intercompany agreements in place that facilitate liquidity management across the Company to enhance flexibility.

Parent company capital capacity At the parent holding company level, we have deployable invested assets totaling \$2.65 billion as of March 31, 2012. These assets include investments that are generally saleable within one quarter totaling \$2.30 billion. This provides funds for the parent company's relatively low fixed charges and other corporate purposes.

In the first quarter of 2012, dividends totaling \$900 million were paid by AIC. These dividends comprised \$450 million in cash paid to its ultimate parent, the Corporation, and the transfer of ownership (valued at \$450 million) to Allstate Insurance Holdings, LLC of three insurance companies that were formerly subsidiaries of AIC (Allstate Indemnity Company, Allstate Fire and Casualty Insurance Company and Allstate Property and Casualty Insurance Company).

The Corporation has access to additional borrowing to support liquidity as follows:

- A commercial paper facility with a borrowing limit of \$1.00 billion to cover short-term cash needs. As of March 31, 2012, there were no balances outstanding and therefore the remaining borrowing capacity was \$1.00 billion; however, the outstanding balance can fluctuate daily.
- Our new primary credit facility is available for short-term liquidity requirements and backs our commercial paper facility. Our \$1.00 billion unsecured revolving credit facility has an initial term of five years expiring in April 2017. The facility is fully subscribed among 12 lenders with the largest commitment being \$115 million. We have the option to extend the expiration by one year at the first and second anniversary of the facility, upon approval of existing or replacement lenders. The commitments of the lenders are several and no lender is responsible for any other lender's commitment if such lender fails to make a loan under the facility. This facility contains an increase provision that would allow up to an additional \$500 million of borrowing. This facility has a financial covenant requiring that we not exceed a 37.5% debt to capitalization ratio as defined in the agreement. This ratio as defined in the prior credit facility as of March 31, 2012 was 20.3%. Although the right to borrow under the facility is not subject to a minimum rating requirement, the costs of maintaining the facility and borrowing under it are based on the ratings of our senior unsecured, unguaranteed long-term debt. There were no short-term borrowings under our prior credit facility during the first three months of 2012. The total amount outstanding at any point in time under the combination of the commercial paper program and the credit facility cannot exceed the amount that can be borrowed under the credit facility.
- A universal shelf registration statement was filed with the Securities and Exchange Commission on April 30, 2012. We can use this shelf registration to issue an unspecified amount of debt securities, common stock (including 407 million shares of treasury stock as of March 31, 2012), preferred stock, depositary shares, warrants, stock purchase contracts, stock purchase units and securities of trust subsidiaries. The specific terms of any securities we issue under this registration statement will be provided in the applicable prospectus supplements.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Liquidity exposure Contractholder funds as of March 31, 2012 were \$41.60 billion. The following table summarizes contractholder funds by their contractual withdrawal provisions as of March 31, 2012.

(\$ in millions)		Percent to total
Not subject to discretionary withdrawal	\$ 6,122	14.7%
Subject to discretionary withdrawal with adjustments:		
Specified surrender charges (1)	15,613	37.5
Market value adjustments (2)	6,142	14.8
Subject to discretionary withdrawal without adjustments (3)	13,726	33.0
Total contractholder funds (4)	\$ 41,603	100.0%

(1) Includes \$8.48 billion of liabilities with a contractual surrender charge of less than 5% of the account balance.

(2) \$5.05 billion of the contracts with market value adjusted surrenders have a 30-45 day period at the end of their initial and subsequent interest rate guarantee periods (which are typically 5 or 6 years) during which there is no surrender charge or market value adjustment.

(3) 72% of these contracts have a minimum interest crediting rate guarantee of 3% or higher.

(4) Includes \$1.09 billion of contractholder funds on variable annuities reinsured to The Prudential Insurance Company of America, a subsidiary of Prudential Financial Inc., in 2006.

While we are able to quantify remaining scheduled maturities for our institutional products, anticipating retail product surrenders is less precise. Retail life and annuity products may be surrendered by customers for a variety of reasons. Reasons unique to individual customers include a current or unexpected need for cash or a change in life insurance coverage needs. Other key factors that may impact the likelihood of customer surrender include the level of the contract surrender charge, the length of time the contract has been in force, distribution channel, market interest rates, equity market conditions and potential tax implications. In addition, the propensity for retail life insurance policies to lapse is lower than it is for fixed annuities because of the need for the insured to be re-underwritten upon policy replacement. Surrenders and partial withdrawals for our retail annuities decreased 7.6% in the first three months of 2012 compared to 2011. The annualized surrender and partial withdrawal rate on deferred annuities and interest-sensitive life insurance products, based on the beginning of year contractholder funds, was 10.7% and 10.4% for the first three months of 2012 and 2011, respectively. Allstate Financial strives to promptly pay customers who request cash surrenders; however, statutory regulations generally provide up to six months in most states to fulfill surrender requests.

Our institutional products are primarily funding agreements sold to unaffiliated trusts used to back medium-term notes. As of March 31, 2012, total institutional products outstanding were \$1.88 billion, with scheduled maturities of \$40 million in June of 2012 and \$1.75 billion and \$85 million in 2013 and 2016, respectively.

Our asset-liability management practices limit the differences between the cash flows generated by our investment portfolio and the expected cash flow requirements of our life insurance, annuity and institutional product obligations.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The following table summarizes consolidated cash flow activities by segment for the first three months ended March 31.

(\$ in millions)	Property-Liability (1)		Allstate Financial (1)		Corporate and Other (1)		Consolidated	
	2012	2011	2012	2011	2012	2011	2012	2011
Net cash provided by (used in):								
Operating activities	\$ 386	\$ 315	\$ 287	\$ 385	\$ 134	\$ 26	\$ 807	\$ 726
Investing activities	75	(211)	413	1,318	(409)	178	79	1,285
Financing activities	(1)	(3)	(827)	(1,526)	(257)	(403)	(1,085)	(1,932)
Net (decrease) increase in consolidated cash						\$ (199)	\$ 79	

(1) Business unit cash flows reflect the elimination of intersegment dividends, contributions and borrowings.

Property-Liability Higher cash provided by operating activities in the first three months of 2012 compared to the first three months of 2011 was primarily due to lower claim payments.

Cash provided by investing activities in the first three months of 2012 compared to cash used in investing activities in the first three months of 2011 was primarily due to decreased purchases of fixed income securities, partially offset by decreased sales of fixed income securities.

Allstate Financial Lower cash provided by operating cash flows in the first three months of 2012 compared to the first three months of 2011 was primarily due to higher contract benefits paid.

Lower cash provided by investing activities in the first three months of 2012 compared to the first three months of 2011 was impacted by lower sales of fixed income securities.

Lower cash used in financing activities in the first three months of 2012 compared to the first three months of 2011 was primarily due to decreased maturities of institutional products, the absence of Allstate Bank activity in the current year and lower surrenders and partial withdrawals on fixed annuities.

Corporate and Other Fluctuations in the Corporate and Other operating cash flows were primarily due to the timing of intercompany settlements. Investing activities primarily relate to investments in the parent company portfolio. Financing cash flows of the Corporate and Other segment reflect actions such as fluctuations in short-term debt, repayment of debt, proceeds from the issuance of debt, dividends to shareholders of The Allstate Corporation and share repurchases; therefore, financing cash flows are affected when we increase or decrease the level of these activities.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. We maintain disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934. Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based upon this evaluation, the principal executive officer and the principal financial officer concluded that our disclosure controls and procedures are effective in providing reasonable assurance that material information required to be disclosed in our reports filed with or submitted to the Securities and Exchange Commission under the Securities Exchange Act is made known to management, including the principal executive officer and the principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting. During the fiscal quarter ended March 31, 2012, there have been no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION**Item 1. Legal Proceedings**

Information required for Part II, Item 1 is incorporated by reference to the discussion under the heading "Regulation and Compliance" and under the heading "Legal and regulatory proceedings and inquiries" in Note 10 of the condensed consolidated financial statements in Part I, Item 1 of this Form 10-Q.

Item 1A. Risk Factors

This document contains forward-looking statements that anticipate results based on our estimates, assumptions and plans that are subject to uncertainty. These statements are made subject to the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995. We assume no obligation to update any forward-looking statements as a result of new information or future events or developments.

These forward-looking statements do not relate strictly to historical or current facts and may be identified by their use of words like "plans," "seeks," "expects," "will," "should," "anticipates," "estimates," "intends," "believes," "likely," "targets" and other words with similar meanings. These statements address, among other things, our strategy for growth, catastrophe exposure management, product development, investment results, regulatory approvals, market position, expenses, financial results, litigation and reserves. We believe that these statements are based on reasonable estimates, assumptions and plans. However, if the estimates, assumptions or plans underlying the forward-looking statements prove inaccurate or if other risks or uncertainties arise, actual results could differ materially from those communicated in these forward-looking statements. Risk factors which could cause actual results to differ materially from those suggested by such forward-looking statements include but are not limited to those discussed or identified in this document, in our public filings with the Securities and Exchange Commission, and those incorporated by reference in Part I, Item 1A of The Allstate Corporation Annual Report on Form 10-K for 2011.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

<u>Period</u>	Total number of shares (or units) purchased (1)	Average price paid per share (or unit)	Total number of shares (or units) purchased as part of publicly announced plans or programs (2)	Maximum number (or approximate dollar value) of shares (or units) that may yet be purchased under the plans or programs (3)
January 1, 2012 - January 31, 2012	2,967,700	\$ 28.8557	2,967,700	\$ 808 million
February 1, 2012 - February 29, 2012	3,549,073	\$ 31.0632	3,241,100	\$ 708 million
March 1, 2012 - March 31, 2012	3,551,575	\$ 32.0869	3,546,932	\$ 594 million
Total	10,068,348	\$ 30.7737	9,755,732	

Edgar Filing: ALLSTATE CORP - Form 10-Q

(1) In accordance with the terms of its equity compensation plans, Allstate acquired the following shares in connection with stock option exercises by employees and/or directors. The stock was received in payment of the exercise price of the options and in satisfaction of withholding taxes due upon exercise or vesting.

January: none

February: 307,973

March: 4,643

(2) Repurchases under our programs are, from time to time, executed under the terms of a pre-set trading plan meeting the requirements of Rule 10b5-1(c) of the Securities Exchange Act of 1934.

(3) On November 8, 2011, we announced the approval of a new share repurchase program for \$1.00 billion. This program is expected to be completed by March 31, 2013.

Item 5. Other Information

On April 27, 2012, the Registrant, Allstate Insurance Company, and Allstate Life Insurance Company (the Borrowers) entered into a credit agreement with the lenders party thereto; Wells Fargo Bank, National Association, as Syndication Agent; Citibank, N.A. and Bank of America, N.A., as Documentation Agents; and JPMorgan Chase Bank, N.A., as Administrative Agent (the Credit Agreement). The Credit Agreement is a new \$1.00 billion unsecured revolving credit facility with an initial term of five years expiring in April 2017 with two one year extensions that can be exercised in the first and second year of the facility upon approval of existing or replacement lenders. The term extensions only bind the lenders who vote to approve the extensions, but the Borrowers have the option to add additional lenders if the facility is not fully subscribed for the additional terms. The Credit Agreement also contains an increase provision that would make up to an additional \$500 million available for borrowing. The facility is fully subscribed among 12 lenders with the largest commitment being \$115 million. The commitments of the lenders are several and no lender is responsible for any other lender's commitment if such lender fails to make a loan under the facility. The Credit Agreement includes a financial covenant requiring that the Registrant's debt to capitalization ratio as defined in the Credit Agreement not to exceed 37.5%. Although the right to borrow under the facility is not subject to a minimum rating requirement, the costs of maintaining the facility and borrowing under it are based on the ratings of the Registrant's senior unsecured, unguaranteed long-term debt. The Credit Agreement has been filed herewith as Exhibit 10.6, and the description set forth above is qualified in its entirety by the full terms and conditions of the Credit Agreement.

The Credit Agreement replaced a \$1.00 billion unsecured five-year revolving credit facility dated May 8, 2007 among the Borrowers; the agents and lenders party thereto; and JPMorgan Chase Bank, N.A., as Administrative Agent (the 2007 Credit Agreement). The 2007 Credit Agreement was terminated on April 27, 2012. The Registrant had the option to terminate the 2007 Credit Agreement early, and no material termination penalties were incurred.

Allstate Insurance Company is a wholly owned subsidiary of the Registrant, and Allstate Life Insurance Company is a wholly owned subsidiary of Allstate Insurance Company.

This information would otherwise have been reported during the second fiscal quarter of 2012 on a current report on Form 8-K under the headings Item 1.01 Entry into a Material Definitive Agreement and Item 1.02 Termination of a Material Definitive Agreement.

Item 6. Exhibits

(a) Exhibits

An Exhibit Index has been filed as part of this report on page E-1.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
