

DEERE & CO
Form 10-Q
August 30, 2012

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended July 31, 2012

Commission file no: 1-4121

DEERE & COMPANY

(Exact name of registrant as specified in its charter)

Delaware
(State of incorporation)

36-2382580
(IRS employer identification no.)

One John Deere Place

Moline, Illinois 61265

(Address of principal executive offices)

Telephone Number: **(309) 765-8000**

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Edgar Filing: DEERE & CO - Form 10-Q

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer
Non-Accelerated Filer
(Do not check if a smaller reporting company)

Accelerated Filer
Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

At July 31, 2012, 391,667,085 shares of common stock, \$1 par value, of the registrant were outstanding.

See Condensed Notes to Interim Consolidated Financial Statements.

Condensed Notes to Interim Consolidated Financial Statements (Unaudited)

(1) The information in the notes and related commentary are presented in a format which includes data grouped as follows:

Equipment Operations - Includes the Company's agriculture and turf operations and construction and forestry operations with financial services reflected on the equity basis.

Financial Services - Includes the Company's financial services operations.

Consolidated - Represents the consolidation of the equipment operations and financial services. References to Deere & Company or the Company refer to the entire enterprise.

Variable Interest Entities

The Company is the primary beneficiary of and consolidates a supplier that is a variable interest entity (VIE). The Company has both the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE. No additional support beyond what was previously contractually required has been provided during any periods presented. The VIE produces blended fertilizer and other lawn care products for the agriculture and turf segment.

The assets and liabilities of this supplier VIE consisted of the following in millions of dollars:

	July 31 2012	October 31 2011	July 31 2011
Cash and cash equivalents	\$ 29	\$ 11	\$ 7
Intercompany receivables	13	14	14
Inventories	45	30	36
Property and equipment - net	3	3	4
Other assets	5	3	7
Total assets	\$ 95	\$ 61	\$ 68
Short-term borrowings	\$ 3		
Accounts payable and accrued expenses	81	\$ 56	\$ 64
Total liabilities	\$ 84	\$ 56	\$ 64

The VIE is financed through its own accounts payable and short-term borrowings. The assets of the VIE can only be used to settle the obligations of the VIE. The creditors of the VIE do not have recourse to the general credit of the Company.

See Note 11 for VIEs related to securitization of financing receivables.

(2) The consolidated financial statements of Deere & Company and consolidated subsidiaries have been prepared by the Company, without audit, pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the U.S. have been condensed or omitted as permitted by such rules and regulations. All adjustments, consisting of normal recurring adjustments, have been included. Management believes that the disclosures are adequate to present fairly the financial position, results of operations and cash flows at the dates and for the periods presented. It is suggested that these interim financial statements be read in conjunction with the financial statements and the notes thereto appearing in the Company's latest annual report on Form 10-K. Results for interim periods are not necessarily indicative of those to be expected for the fiscal year.

The preparation of financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the reported amounts and related disclosures. Actual results could differ from those estimates.

Cash Flow Information

All cash flows from the changes in trade accounts and notes receivable are classified as operating activities in the Statement of Consolidated Cash Flows as these receivables arise from sales to the Company's customers. Cash flows from financing receivables that are related to sales to the Company's customers are also included in operating activities. The remaining financing receivables are related to the financing of equipment sold by independent dealers and are included in investing activities.

The Company had the following non-cash operating and investing activities that were not included in the Statement of Consolidated Cash Flows. The Company transferred inventory to equipment on operating leases of approximately \$341 million and \$291 million in the first nine months of 2012 and 2011, respectively. The Company also had accounts payable related to purchases of property and equipment of approximately \$53 million and \$41 million at July 31, 2012 and 2011, respectively.

(3) New accounting standards adopted in the first nine months of 2012 were as follows:

In the first quarter of 2012, the Company adopted the remaining provisions of Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) No. 2010-06, Improving Disclosures about Fair Value Measurements, which amends Accounting Standards Codification (ASC) 820, Fair Value Measurements and Disclosures. This ASU requires disclosures of transfers into and out of Levels 1 and 2, more detailed roll forward reconciliations of Level 3 recurring fair value measurements on a gross basis, fair value information by class of assets and liabilities, and descriptions of valuation techniques and inputs for Level 2 and Level 3 measurements. The effective date was the second quarter of fiscal year 2010 except for the roll forward reconciliations, which were required in the first quarter of fiscal year 2012. The adoption in 2010 and the adoption in the first quarter of 2012 did not have a material effect on the Company's consolidated financial statements.

In the second quarter of 2012, the Company adopted FASB ASU No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs, which amends ASC 820, Fair Value Measurement. This ASU requires the categorization by level for items that are required to be disclosed at fair value, information about transfers between Level 1 and Level 2 and additional disclosure for Level 3 measurements. In addition, the ASU provides guidance on measuring the fair value of financial instruments managed within a portfolio and the application of premiums and discounts on fair value measurements. The adoption did not have a material effect on the Company's consolidated financial statements.

New accounting standards to be adopted are as follows:

In June 2011, the FASB issued ASU No. 2011-05, Presentation of Comprehensive Income, which amends ASC 220, Comprehensive Income. This ASU requires the presentation of total comprehensive income, total net income and the components of net income and comprehensive income either in a single continuous statement or in two separate but consecutive statements. The requirements do not change how earnings per share is calculated or presented. The effective date will be the first quarter of fiscal year 2013 and must be applied retrospectively. The adoption will not have a material effect on the Company's consolidated financial statements.

In September 2011, the FASB issued ASU No. 2011-08, Testing Goodwill for Impairment, which amends ASC 350, Intangibles – Goodwill and Other. This ASU gives an entity the option to first assess qualitative factors to determine if goodwill is impaired. The entity may first determine based on qualitative factors if it is more likely than not that the fair value of a reporting unit is less than its carrying amount, including goodwill. If that assessment indicates no impairment, the first and second steps of the previous quantitative goodwill impairment test are not required. The effective date will be the first quarter of fiscal year 2013 with early adoption permitted. The adoption will not have a material effect on the Company's consolidated financial statements.

In December 2011, the FASB issued ASU No. 2011-11, Disclosures about Offsetting Assets and Liabilities, which amends ASC 210, Balance Sheet. This ASU requires entities to disclose gross and net information about both instruments and transactions eligible for offset in the statement of financial position and those subject to an agreement similar to a master netting arrangement. This would include derivatives and other financial securities arrangements. The effective date will be the first quarter of fiscal year 2014 and must be applied retrospectively. The adoption will not have a material effect on the Company's consolidated financial statements.

In July 2012, the FASB issued ASU No. 2012-02, Testing Indefinite-Lived Intangible Assets for Impairment, which amends ASC 350, Intangibles – Goodwill and Other. This ASU gives an entity the option to first assess qualitative factors to determine if indefinite-lived intangible assets are impaired. The entity may first determine based on qualitative factors if it is more likely than not that the fair value of indefinite-lived intangible assets are less than their carrying amount. If that assessment indicates no impairment, the quantitative impairment test is not required. The effective date will be the first quarter of fiscal year 2013 with early adoption permitted. The adoption will not have a material effect on the Company's consolidated financial statements.

(4) Comprehensive income, which includes all changes in total stockholders' equity during the period except transactions with stockholders, was as follows in millions of dollars:

	Three Months Ended		Nine Months Ended	
	July 31		July 31	
	2012	2011	2012	2011
Net income	\$ 790.2	\$ 714.8	\$ 2,382.7	\$ 2,135.8
Other comprehensive income (loss), net of tax:				
Retirement benefits adjustment	52.7	69.3	234.4	171.6
Cumulative translation adjustment	(191.8)	(46.2)	(371.6)	197.9
Unrealized gain (loss) on derivatives	(3.6)	3.6	(5.4)	13.2
Unrealized gain (loss) on investments	2.2	3.0	5.6	(.4)
Comprehensive income	\$ 649.7	\$ 744.5	\$ 2,245.7	\$ 2,518.1

For the third quarter of 2012 and 2011, the table above includes noncontrolling interests' comprehensive income of \$2.0 million and \$2.3 million, which consists of net income of \$2.2 million and \$2.5 million and cumulative translation adjustments of \$(.2) million and \$(.2) million, respectively. For the first nine months of 2012 and 2011, the table includes noncontrolling interests' comprehensive income of \$5.2 million and \$5.5 million, which consists of net income of \$5.6 million and \$5.5 million and cumulative translation adjustments of \$(.4) million and none, respectively.

Edgar Filing: DEERE & CO - Form 10-Q

(5) Dividends declared and paid on a per share basis were as follows:

	Three Months Ended July 31		Nine Months Ended July 31	
	2012	2011	2012	2011
Dividends declared	\$.46	\$.41	\$ 1.33	\$ 1.11
Dividends paid	\$.46	\$.35	\$ 1.28	\$ 1.00

(6) A reconciliation of basic and diluted net income attributable to Deere & Company per share in millions, except per share amounts, follows:

	Three Months Ended July 31		Nine Months Ended July 31	
	2012	2011	2012	2011
Net income attributable to Deere & Company	\$ 788.0	\$ 712.3	\$ 2,377.1	\$ 2,130.3
Less income allocable to participating securities	.2	.3	.7	.8
Income allocable to common stock	\$ 787.8	\$ 712.0	\$ 2,376.4	\$ 2,129.5
Average shares outstanding	394.7	417.4	399.6	419.9
Basic per share	\$ 2.00	\$ 1.71	\$ 5.95	\$ 5.07
Average shares outstanding	394.7	417.4	399.6	419.9
Effect of dilutive share-based compensation	4.1	4.6	4.4	5.3
Total potential shares outstanding	398.8	422.0	404.0	425.2
Diluted per share	\$ 1.98	\$ 1.69	\$ 5.88	\$ 5.01

During the third quarter and first nine months of 2012, 6.4 million shares related to share-based compensation were excluded from the above diluted per share computation because the incremental shares under the treasury stock method would have been antidilutive. During the third quarter of 2011, 3.9 million shares were excluded. During the first nine months of 2011, no shares were excluded.

(7) The Company has several defined benefit pension plans and defined benefit postretirement health care and life insurance plans covering its U.S. employees and employees in certain foreign countries.

The worldwide components of net periodic pension cost consisted of the following in millions of dollars:

	Three Months Ended July 31		Nine Months Ended July 31	
	2012	2011	2012	2011
Service cost	\$ 55	\$ 50	\$ 164	\$ 149
Interest cost	116	124	349	372
Expected return on plan assets	(197)	(199)	(590)	(597)

Edgar Filing: DEERE & CO - Form 10-Q

Amortization of actuarial loss	49	39	149	112
Amortization of prior service cost	10	10	31	31
Settlements/curtailments	1	1	3	1
Net cost	\$ 34	\$ 25	\$ 106	\$ 68

10

The worldwide components of net periodic postretirement benefits cost (health care and life insurance) consisted of the following in millions of dollars:

	Three Months Ended July 31		Nine Months Ended July 31	
	2012	2011	2012	2011
Service cost	\$ 12	\$ 11	\$ 35	\$ 33
Interest cost	70	81	210	244
Expected return on plan assets	(25)	(28)	(75)	(85)
Amortization of actuarial loss	45	68	105	203
Amortization of prior service credit	(3)	(4)	(11)	(11)
Net cost	\$ 99	\$ 128	\$ 264	\$ 384

For fiscal year 2012, the participants in one of the Company's postretirement health care plans became almost all inactive as described by the applicable accounting standards due to additional retirements. As a result, the net actuarial loss for this plan in the table above is now being amortized over the longer period for the average remaining life expectancy of the inactive participants rather than the average remaining service period of the active participants. The amortization of actuarial loss also decreased due to lower expected costs from the prescription drug plan to provide group benefits under Medicare Part D as an alternative to collecting the retiree drug subsidy.

During the first nine months of 2012, the Company contributed approximately \$408 million to its pension plans and \$29 million to its other postretirement benefit plans. The Company presently anticipates contributing an additional \$26 million to its pension plans and \$10 million to its other postretirement benefit plans in the remainder of fiscal year 2012. These contributions include payments from Company funds to either increase plan assets or make direct payments to plan participants.

(8) The Company's unrecognized tax benefits at July 31, 2012 were \$185 million, compared to \$199 million at October 31, 2011. The liability at July 31, 2012 consisted of approximately \$47 million, which would affect the effective tax rate if it was recognized. The remaining liability was related to tax positions for which there are offsetting tax receivables, or the uncertainty was only related to timing. The changes in the unrecognized tax benefits in the first nine months of 2012 were not significant. The Company expects that any reasonably possible change in the amounts of unrecognized tax benefits in the next twelve months would not be significant.

Edgar Filing: DEERE & CO - Form 10-Q

(9) Worldwide net sales and revenues, operating profit and identifiable assets by segment in millions of dollars follow:

	Three Months Ended July 31			Nine Months Ended July 31		
	2012	2011	% Change	2012	2011	% Change
Net sales and revenues:						
Agriculture and turf	\$ 7,271	\$ 6,371	+14	\$ 19,730	\$ 17,740	+11
Construction and forestry	1,659	1,351	+23	4,724	3,823	+24
Total net sales	8,930	7,722	+16	24,454	21,563	+13
Financial services	565	550	+3	1,602	1,548	+3
Other revenues	95	100	-5	309	290	+7
Total net sales and revenues	\$ 9,590	\$ 8,372	+15	\$ 26,365	\$ 23,401	+13
Operating profit: *						
Agriculture and turf	\$ 1,014	\$ 859	+18	\$ 2,991	\$ 2,579	+16
Construction and forestry	113	110	+3	356	304	+17
Financial services	170	194	-12	520	529	-2
Total operating profit	1,297	1,163	+12	3,867	3,412	+13
Reconciling items **	(82)	(81)	+1	(256)	(241)	+6
Income taxes	(427)	(370)	+15	(1,234)	(1,041)	+19
Net income attributable to Deere & Company	\$ 788	\$ 712	+11	\$ 2,377	\$ 2,130	+12
Intersegment sales and revenues:						
Agriculture and turf net sales	\$ 18	\$ 26	-31	\$ 64	\$ 71	-10
Construction and forestry net sales		4		1	15	-93
Financial services	53	57	-7	172	164	+5
Equipment operations outside the U.S. and Canada:						
Net sales	\$ 3,371	\$ 3,364		\$ 9,505	\$ 8,860	+7
Operating profit	156	300	-48	558	848	-34
Identifiable assets:						
Agriculture and turf				\$ 10,639	\$ 9,178	+16
Construction and forestry				3,184	2,915	+9
Financial services				32,941	29,795	+11
Corporate				6,435	6,319	+2
Total assets				\$ 53,199	\$ 48,207	+10

* Operating profit is income from continuing operations before corporate expenses, certain external interest expense, certain foreign exchange gains and losses and income taxes. Operating profit of the financial services segment includes the effect of interest expense and foreign exchange gains and losses.

** Reconciling items are primarily corporate expenses, certain external interest expense, certain foreign exchange gains and losses and net income attributable to noncontrolling interests.

Edgar Filing: DEERE & CO - Form 10-Q

(10) Past due balances of financing receivables represent the total balance held (principal plus accrued interest) with any payment amounts 30 days or more past the contractual payment due date. Non-performing financing receivables represent loans for which the Company has ceased accruing finance income. These receivables are generally 120 days delinquent and the estimated uncollectible amount, after charging the dealer's withholding account, has been written off to the allowance for credit losses. Finance income for non-performing receivables is recognized on a cash basis. Accrual of finance income is resumed when the receivable becomes contractually current and collections are reasonably assured.

An age analysis of past due and non-performing financing receivables in millions of dollars follows:

	July 31, 2012			
	30-59 Days Past Due	60-89 Days Past Due	90 Days or Greater Past Due *	Total Past Due

Financing receivables are considered impaired when it is probable the Company will be unable to collect all amounts due according to the contractual terms. Receivables reviewed for impairment generally include those that are either past due, or have provided bankruptcy notification, or require significant collection efforts. Receivables that are impaired are generally classified as non-performing.

Edgar Filing: DEERE & CO - Form 10-Q

An analysis of the impaired financing receivables in millions of dollars follows:

	Recorded Investment	Unpaid Principal Balance	Specific Allowance	Average Recorded Investment
<u>July 31, 2012 *</u>

* Finance income recognized was not material.

** Primarily retail notes.

A troubled debt restructuring is generally the modification of debt in which a creditor grants a concession it would not otherwise consider to a debtor that is experiencing financial difficulties. These modifications may include a reduction of the stated interest rate, an extension of the maturity dates, a reduction of the face amount or maturity amount of the debt, or a reduction of accrued interest. During the first nine months of 2012, the Company identified 120 financing receivable contracts, primarily retail notes, as troubled debt restructurings with aggregate balances of \$4 million pre-modification and \$4 million post-modification. During the first nine months of 2011, there were 155 financing receivable contracts, primarily retail notes, with \$9 million pre-modification and \$8 million post-modification balances. During these same periods, there were no significant troubled debt restructurings that subsequently defaulted and were written off. At July 31, 2012, the Company had no commitments to lend additional funds to borrowers whose accounts were modified in troubled debt restructurings.

(11) Securitization of financing receivables:

The Company, as a part of its overall funding strategy, periodically transfers certain financing receivables (retail notes) into variable interest entities (VIEs) that are special purpose entities (SPEs), or a non-VIE banking operation, as part of its asset-backed securities programs (securitizations). The structure of these transactions is such that the transfer of the retail notes does not meet the criteria of sales of receivables, and is, therefore, accounted for as a secured borrowing. SPEs utilized in securitizations of retail notes differ from other entities included in the Company's consolidated statements because the assets they hold are legally isolated. Use of the assets held by the SPEs or the non-VIE is restricted by terms of the documents governing the securitization transactions.

In securitizations of retail notes related to secured borrowings, the retail notes are transferred to certain SPEs or to a non-VIE banking operation, which in turn issue debt to investors. The resulting secured borrowings are recorded as Short-term securitization borrowings on the balance sheet. The securitized retail notes are recorded as Financing receivables securitized net on the balance sheet. The total restricted assets on the balance sheet related to these securitizations include the financing receivables securitized less an allowance for credit losses, and other assets primarily representing restricted cash. For those securitizations in which retail notes are transferred into SPEs, the SPEs supporting the secured borrowings are consolidated unless the Company does not have both the power to direct the activities that most significantly impact the SPEs economic performance and the obligation to absorb losses or the right to receive benefits that could potentially be significant to the SPEs. No additional support to these SPEs beyond what was previously contractually required has been provided during the reporting periods.

In certain securitizations, the Company consolidates the SPEs since it has both the power to direct the activities that most significantly impact the SPEs economic performance through its role as servicer of all the receivables held by the SPEs, and the obligation through variable interests in the SPEs to absorb losses or receive benefits that could potentially be significant to the SPEs. The restricted assets (retail notes securitized, allowance for credit losses and other assets) of the consolidated SPEs totaled \$1,666 million, \$1,523 million and \$1,746 million at July 31, 2012, October 31, 2011 and July 31, 2011, respectively. The liabilities (short-term securitization borrowings and accrued interest) of these SPEs totaled \$1,530 million, \$1,395 million and \$1,622 million at July 31, 2012, October 31, 2011 and July 31, 2011, respectively. The credit holders of these SPEs do not have legal recourse to the Company's general credit.

In certain securitizations, the Company transfers retail notes to a non-VIE bank operation, which is not consolidated since the Company does not have a controlling interest in the entity. The Company's carrying values and interests related to the securitizations with the unconsolidated non-VIE were restricted assets (retail notes securitized, allowance for credit losses and other assets) of \$376 million, \$369 million and \$205 million at July 31, 2012, October 31, 2011 and July 31, 2011, respectively. The liabilities (short-term securitization borrowings and accrued interest) were \$354 million, \$346 million and \$190 million at July 31, 2012, October 31, 2011 and July 31, 2011, respectively.

In certain securitizations, the Company transfers retail notes into bank-sponsored, multi-seller, commercial paper conduits, which are SPEs that are not consolidated. The Company does not service a significant portion of the conduits' receivables, and, therefore, does not have the power to direct the activities that most significantly impact the conduits' economic performance. These conduits provide a funding source to the Company (as well as other transferors into the conduit) as they fund the retail notes through the issuance of commercial paper. The Company's carrying values and variable interests related to these conduits were restricted assets (retail notes securitized, allowance for credit losses and other assets) of \$1,213 million, \$1,109 million and \$613 million at July 31, 2012, October 31, 2011 and July 31, 2011, respectively. The liabilities (short-term securitization borrowings and accrued interest) related to these conduits were \$1,145 million, \$1,038 million and \$570 million at July 31, 2012, October 31, 2011 and July 31, 2011, respectively.

Edgar Filing: DEERE & CO - Form 10-Q

The Company's carrying amount of the liabilities to the unconsolidated conduits, compared to the maximum exposure to loss related to these conduits, which would only be incurred in the event of a complete loss on the restricted assets, was as follows in millions of dollars:

	July 31, 2012
Carrying value of liabilities	\$ 1,145
Maximum exposure to loss	1,213

The total assets of unconsolidated VIEs related to securitizations were approximately \$33 billion at July 31, 2012.

The components of consolidated restricted assets related to secured borrowings in securitization transactions follow in millions of dollars:

	July 31 2012	October 31 2011	July 31 2011
Financing receivables securitized (retail notes)	\$ 3,179	\$ 2,923	\$ 2,505
Allowance for credit losses	(15)	(18)	(24)
Other assets	91	96	83
Total restricted securitized assets	\$ 3,255	\$ 3,001	\$ 2,564

The components of consolidated secured borrowings and other liabilities related to securitizations follow in millions of dollars:

	July 31 2012	October 31 2011	July 31 2011
Short-term securitization borrowings	\$ 3,028	\$ 2,777	\$ 2,381
Accrued interest on borrowings	1	2	1
Total liabilities related to restricted securitized assets	\$ 3,029	\$ 2,779	\$ 2,382

The secured borrowings related to these restricted securitized retail notes are obligations that are payable as the retail notes are liquidated. Repayment of the secured borrowings depends primarily on cash flows generated by the restricted assets. Due to the Company's short-term credit rating, cash collections from these restricted assets are not required to be placed into a restricted collection account until immediately prior to the time payment is required to the secured creditors. At July 31, 2012, the maximum remaining term of all restricted securitized retail notes was approximately seven years.

(12) Most inventories owned by Deere & Company and its U.S. equipment subsidiaries are valued at cost, on the last-in, first-out (LIFO) method. If all of the Company's inventories had been valued on a first-in, first-out (FIFO) method, estimated inventories by major classification in millions of dollars would have been as follows:

	July 31 2012	October 31 2011	July 31 2011
Raw materials and supplies	\$ 1,876	\$ 1,626	\$ 1,628
Work-in-process	639	647	567

Edgar Filing: DEERE & CO - Form 10-Q

Finished goods and parts		4,673		3,584		3,954
Total FIFO value		7,188		5,857		6,149
Less adjustment to LIFO value		1,321		1,486		1,461
Inventories	\$	5,867	\$	4,371	\$	4,688

Edgar Filing: DEERE & CO - Form 10-Q

(13) The changes in amounts of goodwill by operating segments were as follows in millions of dollars:

	Agriculture and Turf	Construction and Forestry	Total
Balance October 31, 2010:			
Goodwill	\$ 705	\$ 610	\$ 1,315
Less accumulated impairment losses	316		316
Goodwill-net	389	610	999
Translation adjustments	6	20	26
Other	(2)		(2)
Balance July 31, 2011:			
Goodwill	709	630	1,339
Less accumulated impairment losses	316		316
Goodwill-net	\$ 393	\$ 630	\$ 1,023
Balance October 31, 2011:			
Goodwill	\$ 701	\$ 615	\$ 1,316
Less accumulated impairment losses	316		316
Goodwill-net	385	615	1,000

Balance July 31, 2012			
Goodwill	682	568	1,250
Less accumulated impairment losses	316		316
Goodwill-net	\$ 366	\$ 568	\$ 934

The components of other intangible assets were as follows in millions of dollars:

* Weighted-averages

** Accumulated amortization at July 31, 2012 and 2011 for customer lists and relationships totaled \$56 million and \$52 million and technology, patents, trademarks and other totaled \$45 million and \$34 million, respectively.

The amortization of other intangible assets in the third quarter and the first nine months of 2012 was \$5 million and \$14 million and for 2011 was \$6 million and \$15 million, respectively. The estimated amortization expense for the next five years is as follows in millions of dollars: remainder of 2012 - \$5, 2013 - \$16, 2014 - \$14, 2015 - \$13 and 2016 - \$12.

(14) Commitments and contingencies:

The Company generally determines its total warranty liability by applying historical claims rate experience to the estimated amount of equipment that has been sold and is still under warranty based on dealer inventories and retail sales. The historical claims rate is primarily determined by a review of five-year claims costs and current quality developments.

The premiums for extended warranties are primarily recognized in income in proportion to the costs expected to be incurred over the contract period. These unamortized warranty premiums (deferred revenue) included in the following table totaled \$268 million and \$220 million at July 31, 2012 and 2011, respectively.

A reconciliation of the changes in the warranty liability in millions of dollars follows:

	Three Months Ended July 31				Nine Months Ended July 31			
	2012		2011		2012		2011	
Beginning of period balance	\$	943	\$	860	\$	892	\$	762
Payments		(153)		(140)		(409)		(413)
Amortization of premiums received		(26)		(23)		(77)		(69)
Accruals for warranties		170		153		470		502
Premiums received		48		30		118		86
Foreign exchange		(13)		(7)		(25)		5
End of period balance	\$	969	\$	873	\$	969	\$	873

At July 31, 2012, the Company had approximately \$239 million of guarantees issued primarily to banks outside the U.S. and Canada related to third-party receivables for the retail financing of John Deere equipment. The Company may recover a portion of any required payments incurred under these agreements from repossession of the equipment collateralizing the receivables. At July 31, 2012, the Company had an accrued liability of approximately \$8 million under these agreements. The maximum remaining term of the receivables guaranteed at July 31, 2012 was approximately five years.

At July 31, 2012, the Company had commitments of approximately \$584 million for the construction and acquisition of property and equipment. Also, at July 31, 2012, the Company had pledged assets of \$121 million, primarily as collateral for borrowings. See Note 11 for additional restricted assets associated with borrowings related to securitizations.

The Company also had other miscellaneous contingent liabilities totaling approximately \$50 million at July 31, 2012, for which it believed the probability of payment was substantially remote. The accrued liability for these contingencies was not material at July 31, 2012.

The Company is subject to various unresolved legal actions which arise in the normal course of its business, the most prevalent of which relate to product liability (including asbestos related liability), retail credit, software licensing, patent, trademark and environmental matters. The Company believes the reasonably possible range of losses for these unresolved legal actions in addition to the amounts accrued would not have a material effect on its consolidated financial statements.

Edgar Filing: DEERE & CO - Form 10-Q

(15) The fair values of financial instruments that do not approximate the carrying values in millions of dollars follow:

	July 31, 2012		October 31, 2011		July 31, 2011	
	Carrying Value	Fair Value *	Carrying Value	Fair Value	Carrying Value	Fair Value

Short-term securitization borrowings	3,028	3,038	2,777	2,789	2,381	2,394
Long-term borrowings due within one year:						
Equipment operations	\$ 322	\$ 317	\$ 244	\$ 233	\$ 96	\$ 97
Financial services	4,491	4,552	5,249	5,331	4,941	5,027
Total	\$ 4,813	\$ 4,869	\$ 5,493	\$ 5,564	\$ 5,037	\$ 5,124
Long-term borrowings:						
Equipment operations	\$ 5,357	\$ 6,288	\$ 3,167	\$ 3,771	\$ 3,372	\$ 3,789
Financial services	15,800	16,110	13,793	14,154	12,521	12,903
Total	\$ 21,157	\$ 22,398	\$ 16,960	\$ 17,925	\$ 15,893	\$ 16,692

* Fair value measurements above were Level 3 for all financing receivables and Level 2 for all borrowings.

Fair values of financing receivables that were issued long-term were based on the discounted values of their related cash flows at interest rates currently being offered by the Company for similar financing receivables. The fair values of the remaining financing receivables approximated the carrying amounts.

Fair values of long-term borrowings and short-term securitization borrowings were based on current market quotes for identical or similar borrowings and credit risk, or on the discounted values of their related cash flows at current market interest rates. Certain long-term borrowings have been swapped to current variable interest rates. The carrying values of these long-term borrowings included adjustments related to fair value hedges.

Edgar Filing: DEERE & CO - Form 10-Q

Assets and liabilities measured at fair value on a recurring basis in millions of dollars follow:

	July 31 2012*	October 31 2011*	July 31 2011*
Marketable securities			
U.S. government debt securities	\$ 1,288	\$ 576	\$ 270

Cross-currency interest rate contracts	23	2	1
Total assets ***	\$ 2,232	\$ 1,272	\$ 865
Accounts payable and accrued expenses			
Derivatives:			
Interest rate contracts	\$ 70	\$ 61	\$ 12
Foreign exchange contracts	52	100	86
Cross-currency interest rate contracts	87	7	10
Total liabilities	\$ 209	\$ 168	\$ 108

* All measurements above were Level 2 measurements except for Level 1 measurements of U.S. government debt securities of \$1,241 million, \$540 million and \$238 million at July 31, 2012, October 31, 2011 and July 31, 2011, respectively. There were no transfers between Level 1 and Level 2 during the first nine months of 2012 or 2011.

** Primarily issued by U.S. government sponsored enterprises.

*** Excluded from this table are the Company's cash and cash equivalents, which are carried at cost that approximates fair value. The cash and cash equivalents consist primarily of money market funds.

The contractual maturities of debt securities at July 31, 2012 in millions of dollars are shown below. Actual maturities may differ from those scheduled as a result of prepayments by the issuers. Because of the potential for prepayment on mortgage-backed securities, they are not categorized by contractual maturity.

	Amortized Cost	Fair Value
Due in one year or less	\$ 716	\$ 716
Due after one through five years	563	568
Due after five through 10 years	72	79
Due after 10 years	59	67
Residential mortgage-backed securities	109	116
Debt securities	\$ 1,519	\$ 1,546

Edgar Filing: DEERE & CO - Form 10-Q

Fair value, nonrecurring, Level 3 measurements in millions of dollars follow:

	Fair Value *			Losses Nine Months Ended	
	July 31 2012	October 31 2011	July 31 2011	2012	2011
Financing receivables	\$ 1	\$ 5	\$ 3		

* Does not include cost to sell.

Level 1 measurements consist of quoted prices in active markets for identical assets or liabilities. Level 2 measurements include significant other observable inputs such as quoted prices for similar assets or liabilities in active markets; identical assets or liabilities in inactive markets; observable inputs such as interest rates and yield curves; and other market-corroborated inputs. Level 3 measurements include significant unobservable inputs.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company uses various methods including market and income approaches. The Company utilizes valuation models and techniques that maximize the use of observable inputs. The models are industry-standard models that consider various assumptions including time values and yield curves as well as other economic measures. These valuation techniques are consistently applied.

The following is a description of the valuation methodologies the Company uses to measure certain financial instruments on the balance sheet at fair value:

Marketable Securities The portfolio of investments is primarily valued on a market approach (matrix pricing) in which all significant inputs are observable or can be derived from or corroborated by observable market data such as interest rates, yield curves, volatilities, credit risk and prepayment speeds.

Derivatives The Company's derivative financial instruments consist of interest rate swaps and caps, foreign currency forwards and swaps and cross-currency interest rate swaps. The portfolio is valued based on an income approach (discounted cash flow) using market observable inputs, including swap curves and both forward and spot exchange rates for currencies.

Financing Receivables Specific reserve impairments are based on the fair value of the collateral, which is measured using a market approach (appraisal values or realizable values). Inputs include a selection of realizable values.

(16) It is the Company's policy that derivative transactions are executed only to manage exposures arising in the normal course of business and not for the purpose of creating speculative positions or trading. The Company's financial services operations manage the relationship of the types and amounts of their funding sources to their receivable and lease portfolio in an effort to diminish risk due to interest rate and foreign currency fluctuations, while responding to favorable financing opportunities. The Company also has foreign currency exposures at some of its foreign and domestic operations related to buying, selling and financing in currencies other than the functional currencies.

All derivatives are recorded at fair value on the balance sheet. Each derivative is designated as a cash flow hedge, a fair value hedge, or remains undesignated. All designated hedges are formally documented as to the relationship with the hedged item as well as the risk-management strategy. Both at inception and on an ongoing basis the hedging instrument is assessed as to its effectiveness. If and when a derivative is determined not to be highly effective as a hedge, or the underlying hedged transaction is no longer likely to occur, or the hedge designation is removed, or the derivative is terminated, hedge accounting is discontinued. Any past or future changes in the derivative's fair value, which will not be effective as an offset to the income effects of the item being hedged, are recognized currently in the income statement.

Certain of the Company's derivative agreements contain credit support provisions that may require the Company to post collateral based on reductions in credit ratings. The aggregate fair value of all derivatives with credit-risk-related contingent features that were in a liability position at July 31, 2012, October 31, 2011 and July 31, 2011, was \$26 million, \$23 million and \$5 million, respectively. The Company, due to its credit rating and amounts of net liability position, has not posted any collateral. If the credit-risk-related contingent features were triggered, the Company would be required to post full collateral for this liability position, prior to considering applicable netting provisions.

Derivative instruments are subject to significant concentrations of credit risk to the banking sector. The Company manages individual counterparty exposure by setting limits that consider the credit rating of the counterparty and the size of other financial commitments and exposures between the Company and the counterparty banks. All interest rate derivatives are transacted under International Swaps and Derivatives Association (ISDA) documentation. Some of these agreements include credit support provisions. Each master agreement permits the net settlement of amounts owed in the event of default. The maximum amount of loss that the Company would incur if counterparties to derivative instruments fail to meet their obligations, not considering collateral received or netting arrangements, was \$686 million, \$485 million and \$406 million as of July 31, 2012, October 31, 2011 and July 31, 2011, respectively. The amount of collateral received at July 31, 2012, October 31, 2011 and July 31, 2011 to offset this potential maximum loss was \$152 million, \$25 million and \$33 million, respectively. The netting provisions of the agreements would reduce the maximum amount of loss the Company would incur if the counterparties to derivative instruments fail to meet their obligations by an additional \$89 million, \$59 million and \$13 million as of July 31, 2012, October 31, 2011 and July 31, 2011, respectively. None of the concentrations of risk with any individual counterparty was considered significant in any periods presented.

Cash flow hedges

Certain interest rate and cross-currency interest rate contracts (swaps) were designated as hedges of future cash flows from borrowings. The total notional amounts of the receive-variable/pay-fixed interest rate contracts at July 31, 2012, October 31, 2011 and July 31, 2011 were \$2,350 million, \$1,350 million and \$350 million, respectively. The notional amounts of cross-currency interest rate contracts were \$923 million, \$853 million and \$853 million, respectively. The effective portions of the fair value gains or losses on these cash flow hedges were recorded in other comprehensive income (OCI) and subsequently reclassified into interest expense or other operating expenses (foreign exchange) in the same periods during which the hedged transactions affected earnings. These amounts offset the effects of interest rate or foreign currency exchange rate changes on the related borrowings. Any ineffective portions of the gains or losses on all interest rate contracts designated as hedges were recognized currently in interest expense or other operating expenses (foreign exchange) and were not material during any periods presented. The cash flows from these contracts were recorded in operating activities in the consolidated statement of cash flows.

The amount of loss recorded in OCI at July 31, 2012 that is expected to be reclassified to interest expense or other operating expenses in the next twelve months if interest rates or exchange rates remain unchanged is approximately \$9 million after-tax. These contracts mature in up to 74 months. There were no gains or losses reclassified from OCI to earnings based on the probability that the original forecasted transaction would not occur.

Fair value hedges

Certain interest rate contracts (swaps) were designated as fair value hedges of borrowings. The total notional amounts of these receive-fixed/pay-variable interest rate contracts at July 31, 2012, October 31, 2011 and July 31, 2011 were \$7,738 million, \$7,730 million and \$7,283 million, respectively. The effective portions of the fair value gains or losses on these contracts were offset by fair value gains or losses on the hedged items (fixed-rate borrowings). Any ineffective portions of the gains or losses were recognized currently in interest expense. The ineffective portions were gains of \$3 million and \$3 million during the third quarter of 2012 and 2011, respectively, and losses of \$5 million and \$2 million during the first nine months of 2012 and 2011, respectively. The cash flows from these contracts were recorded in operating activities in the consolidated statement of cash flows.

The gains (losses) on these contracts and the underlying borrowings recorded in interest expense were as follows in millions of dollars:

	Three Months Ended July 31		Nine Months Ended July 31	
	2012	2011	2012	2011
Interest rate contracts *	\$ 124	\$ 103	\$ 201	\$ (37)
Borrowings **	(121)	(100)	(206)	35

* Includes changes in fair values of interest rate contracts excluding net accrued interest income of \$38 million and \$42 million during the third quarter of 2012 and 2011 and \$117 million and \$129 million during the first nine months of 2012 and 2011, respectively.

** Includes adjustments for fair values of hedged borrowings excluding accrued interest expense of \$70 million and \$69 million during the third quarter of 2012 and 2011 and \$214 million and \$207 million during the first nine months of 2012 and 2011, respectively.

Derivatives not designated as hedging instruments

The Company has certain interest rate contracts (swaps and caps), foreign exchange contracts (forwards and swaps) and cross-currency interest rate contracts (swaps), which were not formally designated as hedges. These derivatives were held as economic hedges for underlying interest rate or foreign currency exposures primarily for certain borrowings and purchases or sales of inventory. The total notional amounts of these interest rate swaps at July 31, 2012, October 31, 2011 and July 31, 2011 were \$3,665 million, \$3,216 million and \$2,765 million, the foreign exchange contracts were \$3,699 million, \$3,058 million and \$3,362 million and the cross-currency interest rate contracts were \$77 million, \$52 million and \$49 million, respectively. At July 31, 2012, October 31, 2011 and July 31, 2011, there were also \$1,590 million, \$1,402 million and \$1,052 million, respectively, of interest rate caps purchased and the same amounts sold at the same capped interest rate to facilitate borrowings through securitization of retail notes. The fair value gains or losses from the interest rate contracts were recognized currently in interest expense and the gains or losses from foreign exchange contracts in cost of sales or other operating expenses, generally offsetting over time the expenses on the exposures being hedged. The cash flows from these non-designated contracts were recorded in operating activities in the consolidated statement of cash flows.

* Includes interest and foreign exchange gains (losses) from cross-currency interest rate contracts.

** The amount is not significant.

(17) In the first nine months of 2012, the Company granted stock options to employees for the purchase of 2.6 million shares of common stock at an exercise price of \$74.24 per share and a binomial lattice model fair value of \$22.51 per share at the grant date. At July 31, 2012, options for 18.2 million shares were outstanding with a weighted average exercise price of \$55.88 per share. The Company also granted 259 thousand restricted stock awards to employees and nonemployee directors in the first nine months of 2012, of which 115 thousand are subject to service based only conditions, 72 thousand are subject to performance/service based conditions and 72 thousand are subject to market/service based conditions. The fair value of the service based only units at the grant date was a weighted-average \$74.85 per unit based on the market price of a share of underlying common stock. The fair value of the performance/service based units at the grant date was \$70.14 per unit based on the market price of a share of underlying common stock excluding dividends. The fair value of the market/service based units at the grant date was \$92.85 per unit based on a lattice valuation model excluding dividends. At July 31, 2012, the Company was authorized to grant an additional 13.7 million shares related to stock option and restricted stock awards.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

RESULTS OF OPERATIONS

Overview

Organization

The Company's equipment operations generate revenues and cash primarily from the sale of equipment to John Deere dealers and distributors. The equipment operations manufacture and distribute a full line of agricultural equipment; a variety of commercial, consumer and landscapes equipment and products; and a broad range of equipment for construction and forestry. The Company's financial services primarily provide credit services, which mainly finance sales and leases of equipment by John Deere dealers and trade receivables purchased from the equipment operations. In addition, financial services offer certain crop risk mitigation products and extended equipment warranties. The information in the following discussion is presented in a format that includes information grouped as consolidated, equipment operations and financial services. The Company also views its operations as consisting of two geographic areas, the U.S. and Canada, and outside the U.S. and Canada. The Company's operating segments consist of agriculture and turf, construction and forestry, and financial services.

Trends and Economic Conditions

Industry sales of agricultural machinery in the U.S. and Canada are forecast to increase by more than 10 percent for 2012. Industry sales in the European Union (EU)27 nations of Western and Central Europe are forecast to be about the same as last year. Sales in the Commonwealth of Independent States are expected to increase strongly in 2012, while industry sales in Asia are projected to decrease moderately for the fiscal year. South American industry sales are projected to decrease 5 to 10 percent. Industry sales of turf and utility equipment in the U.S. and Canada are expected to be about the same to 5 percent higher in 2012. The Company's agriculture and turf segment sales increased 14 percent for the third quarter and 11 percent for the first nine months of 2012. These sales are forecast to increase by about 13 percent for fiscal year 2012. While construction equipment markets in the U.S. continue to show a strong recovery, the Company has experienced slower than expected sales in some international markets. World forestry markets are projected to be about the same in comparison to 2011. The Company's construction and forestry sales increased 23 percent in the third quarter and 24 percent for the first nine months of 2012. These sales are forecast to rise by about 17 percent for 2012. Net income attributable to Deere & Company for the Company's financial services operations is forecast to be approximately \$450 million in 2012, somewhat lower than the prior year.

Items of concern include the uncertainty of the global economic recovery, the impact of sovereign and state debt, capital market disruptions, the availability of credit for the Company's customers and suppliers, the effectiveness of governmental actions in respect to monetary policies, general economic conditions and financial regulatory reform. The widespread drought affecting the mid-section of the U.S. and significant volatility in the price of many commodities could also impact the Company's results. The availability of certain components that could impact the Company's ability to meet production schedules continues to be monitored. Designing and producing products with engines that continue to meet high performance standards and increasingly stringent emissions regulations is one of the Company's major priorities.

Edgar Filing: DEERE & CO - Form 10-Q

Weakening in certain international markets, short-term manufacturing inefficiencies resulting from the introduction of new products and dryness in several key markets have impacted near term results. However, the new products and increased focus on improved execution position the Company well to capitalize on favorable global agricultural trends over the long term.

2012 Compared with 2011

Net income attributable to Deere & Company for the third quarter was \$788.0 million, or \$1.98 per share, compared with \$712.3 million, or \$1.69 per share, for the same period last year. For the first nine months, net income attributable to Deere & Company was \$2,377 million, or \$5.88 per share, compared with \$2,130 million, or \$5.01 per share, last year.

Worldwide net sales and revenues increased 15 percent to \$9,590 million for the third quarter of 2012, compared with \$8,372 million a year ago, and increased 13 percent to \$26,365 million for the first nine months, compared with \$23,401 million a year ago. Net sales of the equipment operations were \$8,930 million for the third quarter and \$24,454 million for the first nine months, compared with \$7,722 million and \$21,563 million for the respective periods last year. Net sales of the worldwide equipment operations increased 16 percent for the third quarter and 13 percent for the first nine months. Sales included price realization of 5 percent for the third quarter and 4 percent year to date and an unfavorable foreign currency translation effect of 5 percent for the third quarter and 3 percent for the first nine months. Equipment net sales in the U.S. and Canada increased 28 percent for the current quarter and 18 percent year to date. Outside the U.S. and Canada, net sales were essentially the same for the third quarter and increased 7 percent for the first nine months with unfavorable foreign currency translation effects of 11 percent and 6 percent for these periods.

The Company's equipment operations reported operating profit of \$1,127 million for the third quarter and \$3,347 million for the first nine months, compared with \$969 million and \$2,883 million for the same periods last year. The improvement for both periods was primarily due to the impact of price realization and higher shipment volumes. These factors were partially offset by higher production costs and raw material costs, unfavorable effects of foreign currency exchange, as well as increased research and development expenses. The increase in production costs primarily related to new products and engine emission requirements. Net income of the Company's equipment operations was \$678 million for the third quarter and \$2,040 million for the first nine months, compared with \$584 million and \$1,777 million for the respective periods last year. The same operating factors mentioned above affected quarterly and nine-month results.

Financial services reported net income attributable to Deere & Company of \$110.4 million for the third quarter and \$338.6 million for the first nine months, compared with \$125.6 million and \$348.9 million for the same periods last year. Results were lower for both periods primarily due to increased selling, administrative and general expenses, narrower financing spreads and higher reserves for crop insurance claims. These factors were partially offset by growth in the credit portfolio and a lower provision for credit losses.

Business Segment Results

- **Agriculture and Turf.** Agriculture and turf sales increased 14 percent for the third quarter and 11 percent for the first nine months this year largely due to higher shipment volumes and price realization, partially offset by the unfavorable effects of currency translation. Operating profit was \$1,014 million for the quarter and \$2,991 million year to date, compared with \$859 million and \$2,579 million, respectively, last year. The results increased in both periods primarily driven by the impact of price realization and higher shipment volumes. These factors were partially offset by increased production and raw material costs, unfavorable effects of foreign currency exchange and higher research and development expenses. The increase in production costs primarily related to new products and engine emission requirements.

- **Construction and Forestry.** Construction and forestry sales increased 23 percent for the third quarter and 24 percent for the first nine months this year, mainly due to higher shipment volumes and price realization. Operating profit was \$113 million for the quarter and \$356 million for nine months, compared with \$110 million and \$304 million for the same periods last year. Results improved for both periods primarily due to the impact of price realization and higher shipment volumes. These factors were partially offset by increased production and raw material costs, as well as higher research and development expenses and selling, administrative and general expenses. The increased production costs primarily related to new products and engine emission requirements.
- **Financial Services.** The financial services segment had an operating profit of \$170 million for the third quarter and \$520 million for the first nine months, compared with \$194 million and \$529 million in the same periods last year. Operating profit for both periods was lower primarily due to increased selling, administrative and general expenses, narrower financing spreads and higher reserves for crop insurance claims. These factors were partially offset by growth in the credit portfolio and a lower provision for credit losses. Total revenues of the financial services operations, including intercompany revenues, increased 2 percent to \$618 million in the current quarter from \$607 million in the third quarter of 2011 and increased 4 percent in the first nine months to \$1,773 million this year, compared to \$1,712 million last year. The average balance of receivables and leases financed was 9 percent higher in the third quarter and 8 percent higher in the first nine months of 2012, compared with the same periods last year. Interest expense was approximately the same for the third quarter and 2 percent lower in the first nine months as a result of lower average interest rates, largely offset by higher average borrowings. The financial services operations consolidated ratio of earnings to fixed charges was 2.21 to 1 for the third quarter this year, compared with 2.38 to 1 in the same period last year. The ratio was 2.18 to 1 for the first nine months this year and last year.

The cost of sales to net sales ratios for the third quarter and first nine months of 2012 were 75.7 percent and 74.3 percent, respectively, compared to 75.0 percent and 74.2 percent in the same periods last year. Both periods increased primarily due to higher production costs, increased raw material costs and unfavorable effects of foreign currency exchange, partially offset by improved price realization. The higher ratios were partially offset by lower postretirement health care benefits cost related to the decreases in amortization of net actuarial losses (see Note 7).

Finance and interest income increased in the first nine months of this year due to growth in the credit portfolio, partially offset by lower average financing rates. Other income increased in the first nine months this year primarily as a result of higher crop insurance revenues. Research and development costs increased in the third quarter and first nine months primarily due to increased spending in support of new products and more stringent emission requirements. Selling, administrative and general expenses were higher in both periods primarily due to growth. Interest expense increased in the third quarter due to higher average borrowings, partially offset by lower average borrowing rates. Other operating expenses increased in the first nine months primarily due to higher reserves for crop insurance claims and costs.

Market Conditions and Outlook

Company equipment sales are projected to increase by about 13 percent for fiscal year 2012 and the fourth quarter, compared with the same periods a year ago. Included is an unfavorable currency translation impact of about 3 percent for the year and about 4 percent for the fourth quarter. For the fiscal year, net income attributable to Deere & Company is anticipated to be approximately \$3,100 million.

- **Agriculture and Turf.** Worldwide sales of the Company's agriculture and turf segment are forecast to increase by about 13 percent for fiscal year 2012, including a negative currency translation impact of about 4 percent. Industry sales for agricultural machinery in the U.S. and Canada are forecast to increase more than 10 percent for 2012. Fiscal year industry sales in the EU27 are now forecast to be about the same as last year as strength in the northern European market offsets weakness in the South. Sales in the Commonwealth of Independent States are expected to increase strongly in 2012. Industry sales in Asia are projected to decrease moderately for the fiscal year due to softening in India and China. In South America, industry sales are projected to decrease 5 to 10 percent as a result of uncertainty in Argentina and drought conditions earlier in the year in parts of the region. As a result of dry weather, global grain supplies are expected to further tighten. This supports higher commodity prices and should result in robust field activity in the 2013 crop year in markets throughout the world. U.S. and Canada industry sales of turf and utility equipment are expected to be about the same to 5 percent higher for 2012, reflecting the drought conditions in the U.S.
- **Construction and Forestry.** The Company's worldwide sales of construction and forestry equipment are forecast to increase by about 17 percent for 2012. While construction equipment sales in the U.S. continue to show strong recovery, the Company has experienced slower than expected sales activity in some international markets. World forestry markets are projected to be about the same in comparison to 2011.
- **Financial Services.** Fiscal year 2012 net income attributable to Deere & Company for the financial services operations is expected to be approximately \$450 million, somewhat lower than the prior year. The forecast decline is primarily due to an anticipated increase in selling, administrative and general expenses, narrower financing spreads and higher reserves for crop insurance claims, partially offset by growth in the credit portfolio.

Safe Harbor Statement

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995: Statements under Overview, Market Conditions & Outlook, and other forward-looking statements herein that relate to future events, expectations, trends and operating periods involve certain factors that are subject to change, and important risks and uncertainties that could cause actual results to differ materially. Some of these risks and uncertainties could affect particular lines of business, while others could affect all of the Company's businesses.

The Company's agricultural equipment business is subject to a number of uncertainties including the many interrelated factors that affect farmers confidence. These factors include worldwide economic conditions, demand for agricultural products, world grain stocks, weather conditions (including its effects on timely planting and harvesting), soil conditions, harvest yields, prices for commodities and livestock, crop and livestock production expenses, availability of transport for crops, the growth of non-food uses for some crops (including ethanol and biodiesel production), real estate values, available acreage for farming, the land ownership policies of various governments, changes in government farm programs and policies (including those in Argentina, Brazil, China, the European Union, India, Russia and the U.S.), international reaction to such programs, changes in and effects of crop insurance programs, global trade agreements, animal diseases and their effects on poultry, beef and pork consumption and prices, crop pests and diseases, and the level of farm product exports (including concerns about genetically modified organisms).

Factors affecting the outlook for the Company's turf and utility equipment include general economic conditions, consumer confidence, weather conditions, customer profitability, consumer borrowing patterns, consumer purchasing preferences, housing starts, infrastructure investment, spending by municipalities and golf courses, and consumable input costs.

General economic conditions, consumer spending patterns, real estate and housing prices, the number of housing starts and interest rates are especially important to sales of the Company's construction and forestry equipment. The levels of public and non-residential construction also impact the results of the Company's construction and forestry segment. Prices for pulp, paper, lumber and structural panels are important to sales of forestry equipment.

All of the Company's businesses and its reported results are affected by general economic conditions in the global markets in which the Company operates, especially material changes in economic activity in these markets; customer confidence in general economic conditions; foreign currency exchange rates and their volatility, especially fluctuations in the value of the U.S. dollar; interest rates; and inflation and deflation rates. General economic conditions can affect demand for the Company's equipment as well.

Customer and Company operations and results could be affected by changes in weather patterns (including the effects of drought conditions in parts of the U.S. and dryer than normal conditions in certain other markets); the political and social stability of the global markets in which the Company operates; the effects of, or response to, terrorism and security threats; wars and other conflicts and the threat thereof; and the spread of major epidemics.

Significant changes in market liquidity conditions and any failure to comply with financial covenants in credit agreements could impact access to funding and funding costs, which could reduce the Company's earnings and cash flows. Financial market conditions could also negatively impact customer access to capital for purchases of the Company's products and customer confidence and purchase decisions; borrowing and repayment practices; and the number and size of customer loan delinquencies and defaults. The sovereign debt crisis, in Europe or elsewhere, could negatively impact currencies, global financial markets, social and political stability, funding sources and costs, asset and obligation values, customers, suppliers, and Company operations and results. State debt crises also could negatively impact customers, suppliers, demand for equipment, and Company operations and results. The Company's investment management activities could be impaired by changes in the equity and bond markets, which would negatively affect earnings.

Additional factors that could materially affect the Company's operations, access to capital, expenses and results include changes in and the impact of governmental trade, banking, monetary and fiscal policies, including financial regulatory reform and its effects on the consumer finance industry, derivatives, funding costs and other areas, and governmental programs in particular jurisdictions or for the benefit of certain industries or sectors (including protectionist policies and trade and licensing restrictions that could disrupt international commerce); actions by the U.S. Federal Reserve Board and other central banks; actions by the U.S. Securities and Exchange Commission (SEC), the U.S. Commodity Futures Trading Commission and other financial regulators; actions by environmental, health and safety regulatory agencies, including those related to engine emissions (in particular Interim Tier 4, Final Tier 4 and Stage IIIb non-road diesel emission requirements), carbon and other greenhouse gas emissions, noise and the risk of climate change; changes in labor regulations; changes to accounting standards; changes in tax rates, estimates, and regulations; compliance with U.S. and foreign laws when expanding to new markets; and actions by other regulatory bodies including changes in laws and regulations affecting the sectors in which the Company operates. Customer and Company operations and results also could be affected by changes to GPS radio frequency bands or their permitted uses.

Other factors that could materially affect results include production, design and technological innovations and difficulties, including capacity and supply constraints and prices; the availability and prices of strategically sourced materials, components and whole goods; delays or disruptions in the Company's supply chain or the loss of liquidity by suppliers; start-up of new plants and new products; the success of new product initiatives and customer acceptance of new products; changes in customer product preferences and sales mix whether as a result of changes in equipment design to meet government regulations or for other reasons; oil and energy prices and supplies; the availability and cost of freight; actions of competitors in the various industries in which the Company competes, particularly price discounting; dealer practices especially as to levels of new and used field inventories; labor relations; acquisitions and divestitures of businesses, the integration of new businesses; the implementation of organizational changes; difficulties related to the conversion and implementation of enterprise resource planning systems that disrupt business, negatively impact supply or distribution relationships or create higher than expected costs; security breaches and other disruptions to the Company's information technology infrastructure; changes in Company declared dividends and common stock issuances and repurchases.

Company results are also affected by changes in the level and funding of employee retirement benefits, changes in market values of investment assets and the level of interest rates, which impact retirement benefit costs, and significant changes in health care costs including those which may result from governmental action.

The liquidity and ongoing profitability of John Deere Capital Corporation (Capital Corporation) and other credit subsidiaries depend largely on timely access to capital to meet future cash flow requirements and fund operations and the costs associated with engaging in diversified funding activities and to fund purchases of the Company's products. If market uncertainty increases and general economic conditions worsen, funding could be unavailable or insufficient. Additionally, customer confidence levels may result in declines in credit applications and increases in delinquencies and default rates, which could materially impact write-offs and provisions for credit losses.

The Company's outlook is based upon assumptions relating to the factors described above, which are sometimes based upon estimates and data prepared by government agencies. Such estimates and data are often revised. The Company, except as required by law, undertakes no obligation to update or revise its outlook, whether as a result of new developments or otherwise. Further information concerning the Company and its businesses, including factors that potentially could materially affect the Company's financial results, is included in the Company's other filings with the SEC (including, but not limited to, the factors discussed in Item 1A. Risk Factors of the Company's most recent annual report on Form 10-K and quarterly reports on Form 10-Q).

Critical Accounting Policies

See the Company's critical accounting policies discussed in the Management's Discussion and Analysis of the most recent annual report filed on Form 10-K. There have been no material changes to these policies.

CAPITAL RESOURCES AND LIQUIDITY

The discussion of capital resources and liquidity has been organized to review separately, where appropriate, the Company's consolidated totals, equipment operations and financial services operations.

Consolidated

Negative cash flows from consolidated operating activities in the first nine months of 2012 were \$1,135 million. This resulted primarily from a seasonal increase in trade receivables and inventories along with an increase in overall demand and a decrease in the retirement benefit liability. These items were partially offset by net income adjusted for non-cash provisions, an increase in accounts payable and accrued expenses and a change in accrued income taxes payable/receivable. Cash outflows from investing activities were \$2,415 million in the first nine months of this year, primarily due to the cost of receivables (excluding receivables related to sales) and the cost of leased equipment exceeding the collections of these receivables

and proceeds from sales of leased equipment by \$886 million, purchases of property and equipment of \$808 million, and purchases of marketable securities exceeding sales and maturities of marketable securities by \$757 million. Cash inflows from financing activities were \$3,354 million in the first nine months of 2012, primarily due to an increase in borrowings of \$5,095 million, which were partially offset by repurchases of common stock of \$1,225 million and dividends paid of \$516 million. Cash and cash equivalents decreased \$250 million during the first nine months this year.

Positive cash flows from consolidated operating activities in the first nine months of 2011 were \$636 million. This resulted primarily from net income adjusted for non-cash provisions, an increase in accounts payable and accrued expenses, an increase in the net retirement benefits liability and a change in accrued income taxes payable/receivable. These items were partially offset by a seasonal increase in inventories and trade receivables along with an increase in overall demand. Cash outflows from investing activities were \$1,067 million in the first nine months of last year, primarily due to the cost of receivables (excluding receivables related to sales) and the cost of leased equipment exceeding the collections of these receivables and proceeds from sales of leased equipment by \$844 million, purchases of property and equipment of \$682 million, and purchases of marketable securities exceeding sales and maturities of marketable securities by \$232 million. The investing cash outflows were partially offset by proceeds from sales of businesses of \$894 million. Cash inflows from financing activities were \$245 million in the first nine months of 2011, primarily due to an increase in borrowings of \$1,564 million and proceeds from issuance of common stock of \$166 million (resulting from the exercise of stock options), which were partially offset by repurchases of common stock of \$1,093 million and dividends paid of \$422 million. Cash and cash equivalents decreased \$172 million during the first nine months of 2011.

Given the continued uncertainty in the global economy, there has been a reduction in liquidity in some global markets that continues to affect the funding activities of the Company. However, the Company has access to most global markets at a reasonable cost and expects to have sufficient sources of global funding and liquidity to meet its funding needs. The Company's exposures to receivables from customers in European countries experiencing economic strains are not significant. Sources of liquidity for the Company include cash and cash equivalents, marketable securities, funds from operations, the issuance of commercial paper and term debt, the securitization of retail notes (both public and private markets) and committed and uncommitted bank lines of credit. The Company's commercial paper outstanding at July 31, 2012, October 31, 2011 and July 31, 2011 was \$2,152 million, \$1,279 million and \$2,830 million, respectively, while the total cash and cash equivalents and marketable securities position was \$4,943 million, \$4,435 million and \$4,078 million, respectively. The total cash and cash equivalents and marketable securities held by foreign subsidiaries, in which earnings are considered indefinitely reinvested, was approximately \$780 million, \$720 million and \$725 million at July 31, 2012, October 31, 2011 and July 31, 2011, respectively.

Lines of Credit. The Company has access to bank lines of credit with various banks throughout the world. Worldwide lines of credit totaled \$5,076 million at July 31, 2012, \$2,848 million of which were unused. For the purpose of computing unused credit lines, commercial paper and short-term bank borrowings, excluding secured borrowings and the current portion of long-term borrowings, were considered to constitute utilization. Included in the total credit lines at July 31, 2012 was a long-term credit facility agreement of \$2,750 million, expiring in April 2015, and a long-term credit facility agreement of \$1,500 million, expiring in April 2017. The credit agreements require Capital Corporation to maintain its consolidated ratio of earnings to fixed charges at not less than 1.05 to 1 for each fiscal quarter and the ratio of senior debt, excluding securitization indebtedness, to capital base (total subordinated debt and stockholders' equity excluding accumulated other comprehensive income (loss)) at not more than 11 to 1 at the end of any fiscal quarter. The credit agreements also require the equipment operations to maintain a ratio of total debt to total capital (total debt and stockholders' equity excluding accumulated other comprehensive income (loss)) of 65 percent or less at the end of each fiscal quarter. Under this provision, the Company's excess equity capacity and retained earnings balance free of restriction at July 31, 2012 was \$7,831 million. Alternatively under this provision, the equipment operations had the capacity to incur additional debt of \$14,544 million at July 31, 2012. All of these requirements of the credit agreements have been met during the periods included in the consolidated financial statements.

Debt Ratings. To access public debt capital markets, the Company relies on credit rating agencies to assign short-term and long-term credit ratings to the Company's securities as an indicator of credit quality for fixed income investors. A security rating is not a recommendation by the rating agency to buy, sell or hold Company securities. A credit rating agency may change or withdraw Company ratings based on its assessment of the Company's current and future ability to meet interest and principal repayment obligations. Each agency's rating should be evaluated independently of any other rating. Lower credit ratings generally result in higher borrowing costs, including costs of derivative transactions, and reduced access to debt capital markets. The senior long-term and short-term debt ratings and outlook currently assigned to unsecured Company securities by the rating agencies engaged by the Company are as follows:

	<u>Senior Long-Term</u>	<u>Short-Term</u>	<u>Outlook</u>
Moody's Investors Service, Inc.	A2	Prime-1	Stable
Standard & Poor's	A	A-1	Stable

Trade accounts and notes receivable primarily arise from sales of goods to independent dealers. Trade receivables increased \$1,278 million during the first nine months of 2012 primarily due to a seasonal increase and higher overall demand, partially offset by foreign currency translation. These receivables increased \$728 million, compared to a year ago, primarily due to the improvement in demand, partially offset by foreign currency translation. The ratios of worldwide trade accounts and notes receivable to the last 12 months' net sales were 14 percent at July 31, 2012, compared to 11 percent at October 31, 2011 and 14 percent at July 31, 2011. Agriculture and turf trade receivables increased \$680 million and construction and forestry trade receivables increased \$48 million, compared to a year ago. The percentage of total worldwide trade receivables outstanding for periods exceeding 12 months was 1 percent at July 31, 2012 and 3 percent at October 31, 2011 and July 31, 2011.

Deere & Company's stockholders' equity was \$7,396 million at July 31, 2012, compared with \$6,800 million at October 31, 2011 and \$7,528 million at July 31, 2011. The increase of \$596 million during the first nine months of 2012 resulted primarily from net income attributable to Deere & Company of \$2,377 million, a change in the retirement benefits adjustment of \$234 million and an increase in common stock of \$68 million, which were partially offset by an increase in treasury stock of \$1,183 million, dividends declared of \$530 million and a change in the cumulative translation adjustment of \$371 million.

Equipment Operations

The Company's equipment businesses are capital intensive and are subject to seasonal variations in financing requirements for inventories and certain receivables from dealers. The equipment operations sell a significant portion of their trade receivables to financial services. To the extent necessary, funds provided from operations are supplemented by external financing sources.

Positive cash flows from operating activities, including intercompany cash flows, in the first nine months of 2012 were \$1,088 million. This resulted primarily from net income adjusted for non-cash provisions, an increase in accounts payable and accrued expenses and a change in accrued income taxes payable/receivable. Partially offsetting these positive operating cash flows were cash outflows from an increase in inventories and trade receivables due to a seasonal increase and higher overall demand and a decrease in the retirement benefit adjustment. Cash and cash equivalents decreased \$273 million in the first nine months this year.

Positive cash flows from operating activities, including intercompany cash flows, in the first nine months of 2011 were \$1,735 million. This resulted primarily from net income adjusted for non-cash provisions, an increase in accounts payable and accrued expenses, an increase in the

Edgar Filing: DEERE & CO - Form 10-Q

net retirement benefits liability and a change in accrued income taxes payable/receivable. Partially offsetting these positive operating cash flows were cash outflows from an increase in inventories due to a seasonal increase and higher overall demand. Cash and cash equivalents decreased \$181 million in the first nine months last year.

Trade receivables held by the equipment operations increased \$62 million during the first nine months and \$94 million from a year ago. The equipment operations sell a significant portion of their trade receivables to financial services. See the previous consolidated discussion of trade receivables.

Inventories increased by \$1,497 million during the first nine months, primarily due to a seasonal increase and higher production to meet increased overall demand, partially offset by foreign currency translation. Inventories increased \$1,180 million, compared to a year ago, due to higher production to meet increased demand, partially offset by foreign currency translation. Most of these inventories are valued on the last-in, first-out (LIFO) method. The ratios of inventories on a first-in, first-out (FIFO) basis, which approximates current cost, to the last 12 months cost of sales were 30 percent at July 31, 2012, compared to 27 percent at October 31, 2011 and 29 percent at July 31, 2011.

Total interest-bearing debt of the equipment operations was \$6,310 million at July 31, 2012, compared with \$3,696 million at the end of fiscal year 2011 and \$3,852 million at July 31, 2011. The ratios of debt to total capital (total interest-bearing debt and stockholders' equity) were 46 percent, 35 percent and 34 percent at July 31, 2012, October 31, 2011 and July 31, 2011, respectively.

Property and equipment cash expenditures for the equipment operations in the first nine months of 2012 were \$806 million, compared with \$680 million in the same period last year. Capital expenditures for the equipment operations in 2012 are expected to be approximately \$1,300 million.

During the first nine months of 2012, the equipment operations issued \$1,000 million of 2.60% Notes due in June 2022 and \$1,250 million of 3.90% Notes due in June 2042.

Financial Services

The financial services operations rely on their ability to raise substantial amounts of funds to finance their receivable and lease portfolios. Their primary sources of funds for this purpose are a combination of commercial paper, term debt, securitization of retail notes and equity capital.

During the first nine months of 2012, the aggregate cash provided by operating and financing activities was used primarily to increase receivables and leases. Cash flows provided by operating activities, including intercompany cash flows, were \$539 million in the first nine months. Cash provided by financing activities totaled \$3,021 million in the first nine months, resulting primarily from an increase in external borrowings of \$2,334 million and an increase in payables to the equipment operations of \$698 million, partially offset by dividends paid of \$44 million. Cash used by investing activities totaled \$3,568 million in the first nine months, primarily due to an increase in trade and wholesale receivables of \$2,118 million and the cost of receivables (excluding trade and wholesale) and the cost of leased equipment exceeding collections of these receivables and proceeds from sales of leased equipment by \$1,487 million. Cash and cash equivalents increased \$23 million in the first nine months this year.

During the first nine months of 2011, the aggregate cash provided by operating and financing activities was used primarily to increase receivables and leases. Cash flows provided by operating activities, including intercompany cash flows, were \$762 million in the first nine months of 2011. Cash provided by financing activities totaled \$1,794 million in the first nine months last year, resulting primarily from an increase in external borrowings of \$1,173 million and a decrease in receivables from the equipment operations of \$845 million, primarily due to the liquidation of intercompany notes receivable from the wind energy business that was owned and sold by the equipment operations, partially

Edgar Filing: DEERE & CO - Form 10-Q

offset by dividends paid of \$264 million. Cash used by investing activities totaled \$2,545 million in the first nine months of 2011, primarily due to the cost of receivables (excluding trade and wholesale) and the cost of leased equipment exceeding collections of these receivables and proceeds from sales of leased equipment by \$1,286 million and an increase in trade and wholesale receivables of \$1,154 million. Cash and cash equivalents increased \$8 million in the first nine months last year.

Receivables and leases held by the financial services operations consist of retail notes originated in connection with retail sales of new and used equipment by dealers of John Deere products, retail notes from non-Deere equipment customers, trade receivables, wholesale notes, revolving charge accounts, operating loans, insured international export financing generally involving John Deere products and financing and operating leases. Receivables and leases increased \$2,698 million during the first nine months of 2012 and \$2,998 million during the past 12 months. Total acquisitions of receivables and leases, excluding trade receivables and wholesale notes, were 7 percent higher in the first nine months of 2012, compared with the same period last year. Acquisition volumes of operating leases, financing leases, retail notes and revolving charge accounts were all higher in the first nine months of 2012, while volumes of operating loans were lower, compared to the same period last year. Trade receivables and wholesale notes also increased, compared to October 31, 2011 and July 31, 2011. Total receivables and leases administered by the financial services operations, which include receivables administered but not owned, amounted to \$30,589 million at July 31, 2012, compared with \$27,918 million at October 31, 2011 and \$27,627 million at July 31, 2011. At July 31, 2012, the unpaid balance of all receivables administered but not owned, was \$119 million, compared with \$146 million at October 31, 2011 and \$155 million at July 31, 2011.

Total external interest-bearing debt of the financial services operations was \$24,916 million at July 31, 2012, compared with \$22,894 million at the end of fiscal year 2011 and \$22,349 million at July 31, 2011. Total external borrowings increased during the first nine months of 2012 and the past 12 months, generally corresponding with the level of the receivable and lease portfolio, the level of cash and cash equivalents, the change in receivables/payables owed to the equipment operations and the level of equity. The financial services operations ratio of interest-bearing debt to stockholder's equity was 7.6 to 1 at July 31, 2012, compared with 7.5 to 1 at October 31, 2011 and 7.5 to 1 at July 31, 2011.

The Capital Corporation has a revolving credit agreement to utilize bank conduit facilities to securitize retail notes (see Note 11). At July 31, 2012, this facility had a total capacity, or financing limit, of up to \$2,750 million of secured financings at any time. After a three-year revolving period, unless the banks and Capital Corporation agree to renew, Capital Corporation would liquidate the secured borrowings over time as payments on the retail notes are collected. At July 31, 2012, \$1,499 million of short-term securitization borrowings was outstanding under the agreement.

In the first nine months of 2012, the financial services operations issued \$1,744 million and retired \$1,493 million of retail note securitization borrowings. During the first nine months of 2012, the financial services operations also issued \$5,882 million and retired \$4,397 million of long-term borrowings. The long-term debt retirements included \$1,500 million of 7% Notes due in March 2012. The remaining issuances and retirements were primarily medium-term notes.

Dividend and Other Events

The Company's Board of Directors at its meeting on August 29, 2012 declared a quarterly dividend of \$.46 per share payable November 1, 2012, to stockholders of record on September 28, 2012.

In August 2012, the Company's financial services operations entered into a retail note securitization transaction resulting in securitization borrowings of approximately \$1.0 billion.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Edgar Filing: DEERE & CO - Form 10-Q

See the Company's most recent annual report filed on Form 10-K (Part II, Item 7A). There has been no material change in this information.

Item 4. CONTROLS AND PROCEDURES

The Company's principal executive officer and its principal financial officer have concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the Act)) were effective as of July 31, 2012, based on the evaluation of these controls and procedures required by Rule 13a-15(b) or 15d-15(b) of the Act. During the third quarter, there were no changes that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

See Note 14 to the Interim Financial Statements.

Item 1A. Risk Factors

See the Company's most recent annual report filed on Form 10-K (Part I, Item 1A). There has been no material change in this information. The risks described in the annual report on Form 10-K and the "Safe Harbor Statement" in this report, are not the only risks faced by the Company. Additional risks and uncertainties not currently known or that are currently judged to be immaterial may also materially affect the Company's business, financial condition or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The Company's purchases of its common stock during the third quarter of 2012 were as follows:

Period	Total Number of Shares Purchased (thousands)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1) (thousands)	Maximum Number of Shares that May Yet Be Purchased under the Plans or Programs (1) (millions)
May 1 to				
May 31	1,790	\$ 77.40	1,790	40.9
Jun 1 to				
Jun 30	2,542	73.95	2,542	38.5
Jul 1 to				
Jul 31	1,972	77.29	1,972	36.5
Total	6,304		6,304	

Edgar Filing: DEERE & CO - Form 10-Q

(1) During the third quarter of 2012, the Company had a share repurchase plan that was announced in May 2008 to purchase up to \$5,000 million of shares of the Company's common stock. The maximum number of shares above that may yet be purchased under this plan is based on the end of third quarter closing share price of \$78.10 per share. At the end of the third quarter of 2012, \$2,851 million of common stock remain to be purchased under this plan.

Item 3. Defaults Upon Senior Securities
