2Q10

BANCOLOMBIA S.A. (NYSE: CIB; BVC: BCOLOMBIA, PFBCOLOM) REPORTS CONSOLIDATED NET INCOME OF COP 291 BILLION FOR THE SECOND QUARTER OF 2010 (COP 370 PER SHARE - USD 0.77 PER ADR), WHICH REPRESENTS AN INCREASE OF 15% COMPARED TO THE SAME QUARTER LAST YEAR.

- Net loans grew 4.92% compared to 1Q10. There was still a reduction of 2% in net loans with respect to 2Q09; however, the positive trend in credit demand that began to show at the end of 1Q10 became stronger during 2Q10.
- Net Interest Margin recovered in 2Q10 due to the better performance of investment securities and an effective funding strategy. Net interest margin increased 37 basis points (“bp”) during the quarter and ended 2Q10 at 6.45%. This increase is explained by the better performance of investment securities and a funding strategy that decreased the cost of funds from 2.73% in 1Q10 to 2.56% in 2Q10.
- Net income from fees and other services continued to increase consistently during the quarter and totaled COP 396 billion, 5.7% higher than in 1Q10 and 4% higher than in 2Q09. This positive performance is explained by greater income from the Bank’s investment banking and asset management businesses, and by solid levels of credit and debit card fees.
- There was less deterioration of the loan portfolio in 2Q10 vs. 1Q10. The deterioration of the loan portfolio in 2Q10 totaled COP 35 billion, a figure 88% lower than that for 1Q10 and 85% lower than that 2Q09. Loan charge-offs were COP 225 billion, 64% higher than those reported in 1Q10 and 32% lower than those reported in 2Q09. Net provision charges were COP 187 billion in 2Q10.
- The balance sheet remains strong due in part to the solid level of loan loss reserves, which represented 5.6% of total loans and 154% of past due loans at the end of 2Q10. The capital adequacy ratio increased during the past 12 months and ended at 13.37% (Tier 1 of 10.7%), a figure that is considerably higher than the 12.9% (Tier 1 de 10%) reported at the end of 2Q09.
- Solid liquidity position. The ratio of net loans to deposits (including borrowings from domestic development banks) was 95% at the end of 2Q10, and net investment securities totaled COP 9,009 billion, 4.7% higher as compared to 1Q10 and 19.3% as compared to 2Q09.

August 4, 2010. Medellín, Colombia – Today, BANCOLOMBIA S.A. (“Bancolombia” or “the Bank”) announced its earnings results for the second quarter of 2010.

For the quarter ended June 30, 2010 (“2Q10”), Bancolombia reported consolidated net income of COP 291 billion, or COP 370 per share - USD 0.77 per ADR, which represents an increase of 15% as compared to the results for the quarter ended June 30, 2009 (“2Q09”) and a decrease of 15% as compared to the results for the quarter ended March 31, 2010 (“1Q10”). Bancolombia’s annualized return on equity (“ROE”) was 16.7% for 2Q10, and 18.03% for the first semester of 2010.

Bancolombia ended 2Q10 with COP 62,489 billion in assets, 3% higher than at the end of 1Q10 and 1% lower than at the end 2Q09. At the same time, liabilities totaled COP 55,387 billion and decreased 3% as compared to the figure reported in 2Q09.

2Q10

1. BALANCE SHEET

1.1. Assets

As of June 30, 2010, Bancolombia's assets totaled COP 62,489 billion, which represents an increase of 3% compared to 1Q10 and a decrease of 1% compared to 2Q09.

Assets denominated in COP totaled COP 46,278 billion at the end of 2Q10, decreasing 3% compared to 1Q10 and remaining stable compared to 2Q09. Assets denominated in currencies other than COP (mainly American dollars ("USD")) represented 26% of total assets (or USD 8.5 billion) at the end of 2Q10, increasing 23% compared to 1Q10 and 7% compared to 2Q09.

Loans and financial leases, net of provisions, represented 66% of assets at the end of 2Q10, decreasing as compared to the 67% they represented at the end of 2Q09. Net investments were 14% of total assets at the end of the quarter, increasing their participation in assets from 12% at the end of de 2Q09.

1.2. Loan Portfolio

During the second quarter of 2010, there was growth of the loan portfolio in our operation in Colombia. Loans denominated in COP totaled COP 33,574 billion at the end of 2Q10, remained stable compared to 2Q09 but increased 4% compared to 1Q10. On the other hand, loans denominated in USD totaled USD 5,390 million (23% of the loan portfolio), increasing 7% compared to 1Q10 and 3% compared to 2Q09. These USD denominated loans correspond to loans in Colombia (USD 1,250 million or 23% of loans in USD), El Salvador (USD 2,453 million or 46% of loans in USD) and other countries (USD 1,687 million or 31% of loans in USD).

The appreciation of the COP against de USD was of 1% in 2Q10 and has been of 11% since 2Q09. This appreciation of the peso, negatively affected the conversion to COP of loans denominated in USD. Overall, Bancolombia's gross loans totaled COP 43,886 billion at the end of 2Q10 and increased 4.62% compared to the COP 41,946 billion at the end of 1Q10.

In annual terms, gross loans decreased 2% compared to the COP 44,714 billion in loans reported as of the end of 2Q09. This decrease is explained by the contraction of loans in USD resulting from their conversion to COP. When converted to COP, USD denominated loans showed a decrease of 8% in 2Q10 compared to 2Q09. In general, the higher volume of loans denominated in USD during the quarter, reveal an increase in lending activity in our subsidiaries of Panama (off-shore banking), an operation that already begins to reflect the pick-up in economic activity and the greater financing needs of our clients. The recovery of international trade flows played a key role in the increase of loans denominated in USD. Similarly, loans denominated in COP, which constitute the majority of our loan portfolio, didn't show significant growth in annual terms.

Commercial loans denominated in COP ended 2Q10 at COP 20,447 billion and showed a significant increase of 5% with respect to 1Q10. Commercial loans denominated in USD totaled USD 3,683 million at the end of the quarter and increased 10% compared to 1Q10.

Consumer loans also began to show dynamism during the quarter, reaching COP 5,130 billion, a figure 5% higher than that reported at the end of 1Q10. In contrast, consumer loans originated in El Salvador continue to be subdued and don't show significant growth. Overall, consumer loans denominated in USD totaled USD 1,009 million and

decreased 1% with respect to 2Q09, but increased 1% with respect to 1Q10.

2Q10

In 2Q10, mortgage loans expressed in COP grew 48 billion, and reached COP 3,639 billion. Additionally, COP 276 billion in mortgages were securitized in the same period, taking the outstanding balance of securitized mortgages to 2,413 billion at the end of 2Q10. When taking into account securitizations, mortgage loans increased 3% during the quarter and 10% during the past 12 months. The increased dynamism of mortgage lending in Colombia is explained by the lower long-term interest rates, as well as by the Colombian government's interested rate subsidy program, which have produced higher credit demand in this segment. On the other hand, the outstanding mortgage balances denominated in USD from our operation in El Salvador totaled USD 433 million, 1% and 6% lower than the outstanding mortgage balances in USD reported in 1Q10 and 2Q09, respectively.

Financial leases, 91% of which are denominated in COP, remained constant during the quarter and showed a decrease of 1% with respect to 2Q09.

When analyzing the performance of the loan portfolio, it becomes clear that corporate loans were key drivers of the growth of the total loan portfolio during the quarter as they increased 9% with respect to 1Q10. This increase is explained by higher demand for working capital and financing by businesses. On the other hand, retail and SME loans increased 1% in the same period due to greater demand for consumer loans.

Reserves for loan losses remained stable during 2Q10 and totaled COP 2,449 billion, or 5.6% of total loans at the end of the quarter. For further explanation regarding coverage of the loan portfolio and credit quality trends, please see Section 2.4. "Asset Quality, Provision Charges and Balance Sheet Strength" of this report.

### 1.3. Investment Portfolio

As of June 30, 2010, Bancolombia's investment portfolio totaled COP 9,009 billion, increasing 5% compared to 1Q10 and 19% compared to 2Q09. The investment portfolio is mainly composed of debt investment securities, which represented 96% of Bancolombia's total investments and 14% of assets at the end of 2Q10. Investments denominated in USD totaled USD 1,122 million and represented 24% of the investment portfolio. Additionally, the Bank has COP 1,721 billion in TIPS, which represents 19% of the investment portfolio.

4

---

2Q10

## 1.4. Goodwill

As of 2Q10, Bancolombia's goodwill totaled COP 777 billion and decreased 16% compared to the amount reported in 2Q09. This variation is explained by the appreciation of the Colombian peso in the quarter and the amortization of goodwill reported during the past year (it is important to remember that under COL GAAP, goodwill is amortized within a period of 20 years). As of June 30, 2010, Bancolombia's goodwill included USD 403 million related mostly to the acquisition of Banagrícola in 2007 and COP 6 billion related to the acquisition of a participation of Renting Bancolombia by Leasing Bancolombia.

## 1.5. Funding

As of June 30, 2010, Bancolombia's liabilities totaled COP 55,387 billion and increased 3% compared to 1Q10, but decreased 3% compared to 2Q09. During 2Q10, the Bank maintained a solid liquidity position. The ratio of net loans to deposits (including borrowings from domestic development banks) was 95% at the end of 2Q10 and increased compared to the 92% reported in 1Q10 and 2Q09.

Deposits totaled COP 41,039 billion (or 74% of liabilities) at the end of 2Q10 and increased 2% during the quarter. The composition of deposits during 2Q10 showed little change compared to 1Q10; however, the decrease in the proportion of CDs compared to 2Q09 is notable. CDs represented 50% of deposits in 2Q09, but represented only 42% in 2Q10. This decrease is in line with the funding strategy executed by the Bank in the last few quarters, which is aimed at taking advantage of the greater liquidity and low interest rates through increasing savings and checking accounts and decreasing the cost of CDs. As a result of this recomposition of the funding mix, demand deposits went from representing 50% of the Bank's total deposits in 2Q09, to representing 58% as of the end of 2Q10.

## 1.6. Shareholders' Equity and Regulatory Capital

Shareholders' equity at the end of 2Q10 was COP 7,102 billion, increasing 14%, or COP 889, with respect to the COP 6,213 billion reported at the end of 2Q09.

Bancolombia's capital adequacy ratio decreased slightly during the quarter, ending the period at 13.37%, 25 basis points below the 13.62% for 1Q10 but considerably higher than the 12.94% for 2Q09.

Bancolombia's capital adequacy ratio was 437 basis points above the minimum level required by Colombia's regulator, while the basic capital ratio (tier 1) was 10.68% and the tangible capital ratio, which is equal to shareholders' equity minus goodwill and intangible assets divided by tangible assets, was 9.9% at the end of 2Q10.

## 2. INCOME STATEMENT

Net income totaled COP 291 billion in 2Q10 or COP 370 per share – USD 0.77 per ADR, which represents an increase of 15% compared to 2Q09 and a decrease of 15% compared to 1Q10. Bancolombia's ROE was 16.75% for 2Q10, similar to the ROE of 16.54% for 2Q09 but inferior to the 19.4% ROE for 1Q10.

## 2.1. Net Interest Income

Net interest income totaled COP 866 billion in 2Q10, 6% lower than that reported in 2Q09, and 8% higher than the figure for 1Q10. There was a change in the net interest margin for 1T10 with respect to the figure reported in the first quarter of the year due to a reclassification of expenses generated by derivatives, for COP 31 billion, which used to be recorded as part of net income from investments and is now recorded in the line item "derivative financial instruments" under other operating income. This quarterly variation is explained by the recovery in income from investment securities. Notably, as interest income increased and interest expenses decreased in 2Q10, there was a recovery in net interest income that reflects the lower funding cost associated with a better funding mix and the re-pricing of deposits.

During 2Q10, income generated by the investment portfolio totaled COP 126 billion, a figure 8% lower than the COP 138 billion for 2Q09, but 67% higher than the COP 76 billion for 1Q10. During 2Q10, income generated by the investment portfolio increased due to higher bond prices in the secondary markets. These mark-to-market gains were realized primarily in Colombia where interest rates in the secondary bond markets showed downward trends in the second quarter of the year.

## Net Interest Margin

Annualized net interest margin ended 2Q10 at 6.45%, significantly higher than the annualized interest margin of 6.07% (after the reclassification explained in Section 2.1 "Net Interest Income" in this report) in 1Q10. Annualized net interest margin for investments was 3.1% in 2Q10, evidencing a recovery of part of the losses incurred in 1Q10. Additionally, annualized net interest margin for loans, financial leases and overnight funds was 7.1% in 2Q10, remaining stable with respect to 1Q10, although lower than the 7.4% margin reported in 2Q09.

Annualized Interest Margin	2Q09	3Q09	4Q09	1Q10 (*)	2Q10
Loan Interest margin	7.4%	7.0%	7.3%	7.1%	7.1%
Net investments' margin	2.0%	2.3%	11.1%	0.6%	3.1%
Net interest margin	6.7%	6.3%	7.9%	6.1%	6.4%

(\*)There was a change in the net interest margin for 1T10 with respect to the figure reported in the first quarter of the year due to a reclassification of expenses generated by derivatives, for COP 30,727 million, which used to be recorded as part of net income from investments and is now recorded in the line item "derivative financial instruments" under Other Operating Income.

Notably, funding cost continued to decrease during 2Q10. The lower funding cost is the result of the liability re-pricing effort undertaken during the last quarters and the changes in the funding mix composition. The annualized average weighted cost of deposits reached 2.56% in 2Q10, decreasing as compared to the 2.73% and 4.86% for 1Q10 and 2Q09, respectively.

2Q10

Deposits' weighted average cost	2Q09	1Q10	2Q10
Checking accounts	0.62%	0.41%	0.47%
Time deposits	7.33%	4.41%	4.05%
Saving accounts	3.28%	2.08%	2.03%
Total deposits	4.86%	2.73%	2.56%

## 2.2. Fees and Income from Services

During 2Q10, net fees and income from services totaled COP 396 billion, 4% higher than those reported in 2Q09 and 6% higher than those reported in 1Q10. In particular, credit and debit card annual fees, the biggest contributor to total fees (33%), increased 3% compared to 2Q09. On the other hand, fees from collection and payment services decreased 4% with respect to 1Q10, but increased 15% with respect to 2Q09. Fees from fiduciary activities, pension fund management and brokerage, showed important increases during 2Q10, and although the two latter fee categories showed decreases with respect to 2Q09, they are already evidencing a positive change in the trend and are recovering.

Variation with respect to 1Q10 responds to seasonal effects and higher fees generated by the greater value of assets under management. Notably, fees from banking services and other services, which include fees from investment banking, were 17% higher than those for 2Q09 and 19% higher than those for 1Q10. Among the most significant transactions completed by Banca de Inversión Bancolombia (Bancolombia's investment banking unit) are the structuring of a project finance deal for USD 350 million for AEI in Guatemala and the structuring of a syndicated credit for USD 205 million for IDEAL in Panama.

The following table summarizes Bancolombia's participation in the credit card business in Colombia:

2.3. Other Operating Income

Total other operating income was COP 95 billion in 2Q10, 41% lower than in 1Q10, and 372% higher than in 2Q09.

Communication, postage, rent and others (primarily comprising income related to operating leases and commercial discounts) totaled COP 43 billion in 2Q10, 4% higher as compared to 1Q10 and 12% higher as compared to 2Q09.

2Q10

Dividend income, obtained from investments in participations in non-subsiary companies totaled COP 11 billion in 2Q10, 28% lower than in 1Q10 but 174% higher than in 2Q09.

#### 2.4. Asset Quality, Provision Charges and Balance Sheet Strength

The deterioration of the loan portfolio (new past due loans before charge-offs) was COP 35 billion in 2Q10, a figure 88% lower than that presented in 1Q10 (COP 285 billion) and 85% than that presented in 2Q09 (COP 238 billion). This slower pace of deterioration is in line with the seasonal behavior of credit quality, which tends to have peaks at the beginning of the year and then improves. Credit quality continues to be impacted by a persistently high level of unemployment, although in general the pick-up in economic activity contributes to the improvement of loan quality.

Past due loans (those overdue more than 30 days) totaled COP 1,586 billion at the end of 2Q10, which represents 3.6% of total gross loans. The PDL ratio decreased from 4.23% at the end of 1Q10 and 3.9% at the end of 2Q09. Loan charge-offs totaled COP 225 billion in 2Q10, 64% higher than charge-offs for 1Q10 (COP 137 billion).

Provision charges (net of recoveries), totaled COP 187 billion in 2Q10, 31% higher than provision charges for 1Q10 and 46% lower than those for 2Q09.

Bancolombia maintains a strong balance sheet in terms of loan loss reserves. Allowances for loan losses totaled COP 2,449 billion, or 5.6% of total loans at the end of 2Q10, increasing with respect to the 5.2% of loans they represented as of June 30, 2009. Additionally, coverage, measured by the ratio of allowances for loans losses to PDLs (overdue 30 days), was 154% at the end of 2Q10, increasing with respect to the 138% at the end of 1Q10, and the 134% at the end of 2Q09. Likewise, coverage measured by the ratio of allowances for loans losses to loans classified as C, D and E, was 111% at the end of the second quarter of 2010, showing no variation compared to 1Q10.

The following tables present key metrics for asset quality:

(1) "Performing" past due loans are loans upon which Bancolombia continues to recognize income although interest in respect of such loans has not been received. Mortgage loans cease to accumulate interest on the statement of operations when they are more than 60 days past due. For all other loans and financial leasing operations of any type, interest is no longer accumulated after they are more than 30 days past due.

(2) Under Colombian Bank regulations, a loan is past due when it is at least 31 days past the actual due date.

## Operating Expenses

During 2Q10, operating expenses totaled COP 743 billion, increasing 2% compared to 1Q10 and 9% compared to 2Q09.

Personnel expenses (the sum of salaries and employee benefits, bonus plan payments and compensation) totaled COP 314 billion in 2Q10, 1% lower than in 1Q10, but 12% higher than in 2Q09. The increase with respect to 2Q09 is mainly explained by the annual increment in salaries and bonus plan payments related to Bancolombia's variable compensation program in which compensation is determined taking into account the economic value added by the firm.

Administrative and other expenses increased 3% en 2Q10 compared to 1Q10 and 7% compared to 2Q09, totaling COP 356 billion. This variation is explained by higher expenses from the rental and leasing of technology during the year.

Depreciation expense totaled COP 49 billion in 2Q10, increasing 3% compared to 1Q10 and 7% compared to 2Q09. This variation is explained by the growth in the depreciation of assets that are part of the operating lease business of Bancolombia. These assets totaled COP 914 billion en 2Q10, increasing 6% compared to 1Q10 and 15% compared to 2Q09. In particular, COP 20 billion, or 41% of the quarter's depreciation expense, is associated with operating lease.
