

FIRST PACTRUST BANCORP INC
Form 10-Q
May 10, 2006

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(D)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2006

FIRST PACTRUST BANCORP, INC.

(Exact name of registrant as specified in its charter)

000-49806

(Commission File Number)

Maryland

(State of incorporation)

04-3639825

(IRS Employer Identification No.)

610 Bay Boulevard, Chula Vista, California

(Address of Principal Executive Offices)

91910

(ZIP Code)

(619) 691-1519

Edgar Filing: FIRST PACTRUST BANCORP INC - Form 10-Q

(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant is a large accelerated filer; an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12B-2 of the Exchange Act.

Large accelerated Filer Accelerated Filer Non-accelerated Filer
Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act.) Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date.

As of May 8, 2006 the Registrant had 4,408,377 outstanding shares of common stock.

Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995	

This report contains certain forward-looking statements within the meaning of Section 27a of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. First PacTrust Bancorp, Inc. (the Company) and Pacific Trust Bank (the Bank) intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Reform Act of 1995, as amended, and are including this statement for purposes of these safe harbor provisions. Forward-looking statements, which are based on certain assumptions and describe future plans, strategies, and expectations of the Company and the Bank, are generally identifiable by use of the words such as believe, expect, intend, anticipate, estimate, project, or similar expressions. The ability of the Company and the Bank to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors that could have a material adverse effect on the operations and future prospects of the Company, the Bank, and the Bank's wholly owned subsidiaries include, but are not limited to, changes in: interest rates; the economic health of the local real estate market; general economic conditions; legislative/regulatory provisions; monetary and fiscal policies of the U.S. Government, including policies of the U.S. Treasury and the Federal Reserve Board; the quality or composition of the loan and securities portfolios; demand for loan products; deposit flows; competition; demand for financial services in the Bank's market area; and impact of new accounting pronouncements. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements.

FIRST PACTRUST BANCORP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2006

(table amounts in thousands of dollars)

Note 1 Basis of Presentation

The accompanying unaudited consolidated financial statements include the accounts of First PacTrust Bancorp, Inc. (the Company) as of March 31, 2006 and December 31, 2005 and for the three month periods ended March 31, 2006 and March 31, 2005. Significant intercompany accounts and transactions have been eliminated in consolidation.

The accompanying unaudited interim consolidated financial statements have been prepared pursuant to the rules and regulations for reporting on Form 10-Q. Accordingly, certain disclosures required by U.S. generally accepted accounting principles are not included herein. These interim statements should be read in conjunction with the consolidated financial statements and notes included in the Annual Report on Form 10-K filed by the Company with the Securities and Exchange Commission. The December 31, 2005 balance sheet presented herein has been derived from the audited financial statements included in the Annual Report on Form 10-K filed with the Securities and Exchange Commission, but does not include all of the disclosures required by U.S. generally accepted accounting principles.

Interim statements are subject to possible adjustment in connection with the annual audit of the Company for the year ending December 31, 2006. In the opinion of management of the Company, the accompanying unaudited interim consolidated financial statements reflect all of the adjustments (consisting of normal recurring adjustments) necessary for a fair presentation of the consolidated financial position and consolidated results of operations for the periods presented.

The results of operations for the three months ended March 31, 2006 are not necessarily indicative of the results to be expected for the full year.

Note 2 Summary of Significant Accounting Policies

Nature of Operations: The only business of the Company is the ownership of Pacific Trust Bank (the Bank). The Bank is a federally chartered stock savings bank and a member of the Federal Home Loan Bank (FHLB) system, and maintains insurance on deposit accounts with the Savings Association Insurance Fund (SAIF) of the Federal Deposit Insurance Corporation. The Bank is engaged in the business of retail banking, with operations conducted through its main office and eight branches located in San Diego and Riverside counties.

The accounting and reporting policies of the Company are based upon U.S. generally accepted accounting principles and conform to predominant practices within the banking industry.

Use of Estimates in the Preparation of Financial Statements: The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The collectibility of loans, fair value of financial instruments, and status of contingencies are particularly subject to change.

Note 3 Employee Stock Ownership Plan

In connection with its conversion from a federally chartered mutual savings bank to a federally chartered stock savings bank in 2002, the Bank established an Employee Stock Ownership Plan (ESOP) for the benefit of its employees. The Company issued 423,200 shares of common stock to the ESOP in exchange for a ten-year note in the amount of approximately \$5.1 million. The \$5.1 million for the ESOP purchase was borrowed from the Company.

Shares issued to the ESOP are allocated to ESOP participants based on principal repayments made by the ESOP on the loan from the Company. The loan is secured by shares purchased with the loan proceeds and will be repaid by the ESOP with funds from the Company's contributions to the ESOP and earnings on ESOP assets. Principal payments are scheduled to occur over a ten-year period. Dividends on allocated and/or unearned shares first reduces accrued interest and secondly principal.

7.

Note 4 Employee Stock Compensation

Stock Options

SOP Plan: A Stock Option Plan (SOP) provides for issue of options to directors, officers, and employees. The Company adopted the SOP in April of 2003 under the terms of which 529,000 shares of the Company's common stock may be awarded. The options become exercisable in equal installments over a five-year period from the date of grant. The options expire ten years from the date of grant. As of March 31, 2006 the Company has 503,500 options outstanding of which 1,000 were exercised during the three months ended March 31, 2006. No options were granted or forfeited during the three months ended March 31, 2006.

Effective January 1, 2006, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 123R, Share-Based Payment , utilizing the modified prospective approach. Prior to the adoption of SFAS 123(R) the Company accounted for stock option grants in accordance with APB Opinion No. 25, Accounting for Stock Issued to Employees (the intrinsic value method), and accordingly, recognized no compensation expense for stock grants.

Under the modified prospective approach unvested awards, awards that were granted, modified, or settled on or after January 1, 2006 are measured and accounted for in accordance with SFAS 123R. Under the modified prospective approach, compensation cost recognized in the first quarter of fiscal 2006 includes compensation cost for all share based payments granted prior to, but not yet vested as of March 31, 2006, based on the grant-date fair value estimated in accordance with the original provisions of SFAS 123, and compensation cost for all share-based payments granted subsequent to March 31, 2006, based on the grant-date fair value estimated in accordance with the provisions of SFAS 123(R). Prior periods were not restated to reflect the impact of adopting the new standard. For those options currently awarded that will vest after January 1, 2006, (the effective date of SFAS 123R) the Company expects to incur compensation expense in the amount of approximately \$125,000, \$146,000 and \$78,000 for the years ended 2006, 2007 and 2008, respectively.

SFAS 123R requires the recognition of stock based compensation for the number of awards that are ultimately expected to vest. As a result, recognized stock option compensation expense was reduced for estimated forfeitures prior to vesting primarily based on historical annual forfeiture rates of approximately 9%. Estimated forfeitures will be reassessed in subsequent periods and may change based on new facts and circumstances. Prior to January 1, 2006, actual forfeitures were accounted for as they occurred for purposes of required pro forma stock compensation disclosures.

As a result of adopting SFAS 123(R) on March 31, 2006, the Company's income before taxes, net income and diluted earnings per share for the three months ended March 31, 2006, were \$1.7 million, \$1.1 million, and \$0.01 lower, respectively, than if the Company had continued to account for stock-based compensation under APB opinion No.25 for stock option grants.

The Company receives a tax deduction for certain stock option exercises during the period the options are exercised, generally for the excess of the price at which the options are sold over the exercise prices of the options. Prior to adoption of SFAS 123(R), the Company reported all tax benefits resulting from the exercise of stock options as operating cash flows in our condensed consolidated statements of cash flows. In accordance with SFAS 123(R), for the three months ended March 31, 2006, the Company revised the condensed consolidated statements of cash flows presentation to report the tax benefits from the exercise of stock options as financing cash flows. For the three months ended March 31, 2006, \$5,000 of tax benefits were reported as financing cash flows rather than operating cash flows.

Net cash proceeds from the exercise of stock options were \$23,000 for the three months ended March 31, 2006. The actual income tax benefit realized from the stock option exercises is \$5,000 for the same period.

The following table illustrates the effect on operating results and per share information had the Company accounted for stock-based compensation in accordance with SFAS 123(R) for the three months ended March 31, 2005 (in thousands, except per share amounts).

The Company applies Accounting Principles Board (APB) Opinion 25 and related Interpretations in accounting for its stock option plan. Accordingly, no compensation cost had been recognized at the date of grant. Had compensation cost been determined based on the fair value at the grant dates for awards under the plan consistent with the method of Statement of Financial Accounting Standards (SFAS) No. 123, Accounting for Stock-Based Compensation, the Company's net income and earnings per share would have been reduced to the pro forma amounts in the table below. For purposes of pro forma disclosure, the estimated fair value of the options is amortized to expense over the options vesting period.

	March 31, 2005
	Three Months Ended
Net income as reported	\$ 1,149
Pro forma net income	1,126
Earnings per share as reported	
Basic	.27
Diluted	.26
Pro forma earnings per share	
Basic	.27
Diluted	.25

At March 31, 2006, there was \$339,000 of unrecognized compensation cost related to stock option awards which is expected to be recognized over a weighted-average period of 2.8 years.

The following table represents stock option activity for the three months ended March 31, 2006 and March 31, 2005:

	2006		2005	
	Weighted		Weighted	
	Average		Average	
	Shares	Exercise Price	Shares	Exercise Price
Outstanding at beginning of period	504,500	\$ 18.36	488,500	\$ 17.99
Granted			24,000	26.45
Exercised	(1,000)	17.19		
Forfeited or expired				
Outstanding at end of period	503,500	\$ 18.37	512,500	\$ 18.38
Options exercisable at end of period	174,990		77,690	
Weighted-average fair value of options granted during period	\$		\$ 2.47	

The intrinsic value for stock options is calculated based on the exercise price of the underlying awards and the market price of our common stock as of the reporting date. The intrinsic value of options exercised during the first quarter of 2006 and 2005 was \$12,310 and \$0, respectively. At March 31, 2006, the intrinsic value of options that were exercisable and outstanding were \$2.1 million and \$5.9 million, respectively. The Company recorded \$31,277 in stock compensation expense during the three months ended March 31, 2006 to salaries and employee benefits. There were no options granted or modified during the three month period ended March 31, 2006.

The following table represents the shares that were granted and outstanding as of March 31, 2006:

	Jan 25	April 21	May 14
	2005	2004	2004
Date of grant			
Options granted	24,000	101,050	5,000
Estimated fair value of stock options granted	\$ 2.47	\$ 1.58	\$ 2.02
Assumptions used:			
Risk-free interest rate	3.71%	3.52%	3.92%
Expected option life	5 years	5 years	5 years
Expected stock price volatility	5.34%	4.93%	5.71%
Dividend yield	1.87%	2.07%	2.01%

Options outstanding at March 31, 2006 were as follows:

Range of Exercise Prices	Outstanding Weighted			Exercisable	
	Number	Life	Price	Number	Price
\$17 - \$22	479,500	7.28	17.96	170,190	17.68
\$22 - \$27	24,000	8.82	26.45	4,800	26.45
Outstanding at year end	503,500			174,990	

Restricted Stock

RRP Plan: A Recognition and Retention Plan (RRP) provides for the issuance of shares to directors, officers, and employees. Pursuant to its 2003 stock-based incentive plan, the Company awarded 213,800 shares of restricted stock during 2003, 2004 and 2005 of which 12,000 shares were forfeited in 2004. These shares vest over a five year period. Compensation expense for restricted stock awards totaled approximately \$100,000 for three months ended March 31, 2006 and \$181,000 for the three months ended March 31, 2005.

The plans, described in Note 13 of our consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended December 31, 2005 allow for the issuance of restricted stock awards that may not be sold or otherwise transferred until certain restrictions have lapsed. The unearned stock-based compensation related to these awards is being amortized to compensation expense over the period the remaining restrictions lapse (generally one to five years). The share based expense for these awards was determined based on the market price of our stock at the date of grant applied to the total numbers of shares that were anticipated to fully vest and then amortized over the vesting period.

SFAS 123R requires the recognition of stock based compensation for the number of awards that are ultimately expected to vest. As a result, recognized stock compensation expense was reduced for estimated forfeitures prior to vesting primarily based on historical annual forfeiture rates of approximately 6%. Estimated forfeitures will be reassessed in subsequent periods and may change based on new facts and circumstances. Prior to January 1, 2006, actual forfeitures were accounted for as they occurred for purposes of required pro forma stock compensation disclosures.

Note 5 Earnings Per Share

Basic earnings per share were computed by dividing net income by the weighted average number of shares outstanding. Diluted earnings per share were computed by dividing net income by the weighted average number of shares outstanding, adjusted for the dilutive effect of the outstanding stock options and restricted stock awards. Computations for basic and diluted earnings per share are provided below.

	Three Months Ended March 31, 2006	Three Months Ended March 31, 2005
Net income as reported (in thousands)	\$ 1,112	\$ 1,149

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion compares the financial condition of First PacTrust Bancorp, Inc. (the Company), at March 31, 2006 to its financial condition at December 31, 2005 and the results of operations for the three month period ended March 31, 2006 to the same period in 2005. This discussion should be read in conjunction with the interim financial statements and footnotes included herein.

The Company is a community-oriented financial institution deriving substantially all of its revenue from providing banking services to individuals within its market area, primarily San Diego County and portions of Riverside County, CA. The Company's assets consist primarily of loans and investment securities, which are funded by deposits, borrowings and capital. The primary source of revenue is net interest income, the difference between interest income on loans and investments, and interest expense on deposits and borrowed funds. The Company's basic strategy is to maintain and grow net interest income by the retention of its existing customer base and the expansion of its core businesses and branch offices within its current market and surrounding areas. The Company's primary market risk exposure is interest rate risk. Interest rate risk is the exposure of net interest income to changes in interest rates.

Comparison of Financial Condition at March 31, 2006 and December 31, 2005

The Company's total assets increased by \$22.2 million, or 2.9%, to \$777.4 million at March 31, 2006 from \$755.2 million at December 31, 2005. The increase primarily reflected the growth in the balance of loans receivable in the amount of \$19.5 million and a \$2.3 million increase in cash and cash equivalents.

Net loans receivable increased by \$19.5 million, or 2.8%, to \$708.0 million at March 31, 2006 from \$688.5 million at December 31, 2005. The increase in loans resulted primarily from loan originations exceeding repayments during the period. The loan growth primarily consisted of multi family loans increasing \$7.0 million and the Company's new Green account loan product increasing \$6.9 million. The Green account is America's first fully-transactional flexible mortgage account. Growth in this product is expected to continue.

Securities classified as available-for-sale decreased by \$183,000, or 1.3%, to \$13.8 million at March 31, 2006 from \$14.0 million at December 31, 2005. This decrease was primarily due to the change in the market value of agency securities.

Total deposits increased by \$16.8 million, or 3.3%, to \$525.0 million at March 31, 2006 from \$508.2 million at December 31, 2005. The increase primarily reflected growth in money market accounts and savings accounts resulting from increased marketing efforts and competitive pricing during the first quarter. Money market accounts increased \$20.5 million, or 16.6%, to \$144.1 million. Savings accounts increased \$1.2 million, or 2.1%, to \$58.2 million. Certificate of deposits decreased \$4.6 million to \$242.2 million at March 31, 2006 from \$246.8 million at December 31, 2005 primarily due to customers moving funds from certificates of deposits into the Company's rate sensitive indexed money market product.

Federal Home Loan Bank advances increased \$6.2 million, or 3.8%, to \$170.4 million at March 31, 2006 from \$164.2 million at December 31, 2005. This was primarily due to increased FHLB overnight borrowings used to fund the increased loan originations. The Company interchanges the use of deposits and borrowings to fund assets depending on various factors including liquidity and asset/liability management strategies.

Equity increased \$822,000 to \$78.6 million at March 31, 2006 from \$77.8 million at December 31, 2005. The net increase resulted primarily from the net income of \$1.1 million, ESOP shares earned of \$300,000 and stock awards earned of \$100,000. Equity was decreased by the payment of dividends of \$603,000.

Comparison of Operating Results for the Three Months Ended March 31, 2006 and 2005

General. Net income for the three months ended March 31, 2006 was \$1.1 million, reflecting a slight decrease from last year of \$37,000, or 3.2%. The decrease in net income resulted from the fluctuations described below.

Interest income. Interest income increased by \$2.0 million, or 24.4%, to \$10.3 million for the three months ended March 31, 2006 from \$8.3 million for the three months ended March 31, 2005. The primary factor for the increase in interest income was an increase in the average balance of loans receivable of \$63.6 million, or 10.0%, from \$636.2 million for the three months ended March 31, 2005 to \$699.8 million for the quarter ended March 31, 2006. The increase was primarily the result of loan originations exceeding repayments during the period. In addition, the average yield on loans receivable increased 63 basis points from 5.09% for the three months ended March 31, 2005 to 5.72% for the three months ended March 31, 2006.

Interest income on other interest-earning assets increased \$110,000 to \$150,000 for the three months ended March 31, 2006 from \$40,000 for the three months ended March 31, 2005 primarily due to FHLB stock dividends recorded in the first quarter of 2006.

Interest income on securities increased by \$4,000 to \$157,000 for the three months ended March 31, 2006 from \$153,000 for the three months ended March 31, 2005. The average yield on the securities portfolio was 4.39% for the three months ended March 31, 2006 compared to 4.62% for the same period in 2005.

Interest Expense. Interest expense increased \$2.1 million or 60.1%, to \$5.6 million for the three months ended March 31, 2006. Interest expense on deposits increased \$1.5 million, or 61.5%, to \$4.0 million for the three months ended March 31, 2006 from \$2.5 million for the same period in 2005. This resulted from a 100 basis point increase in the Company's cost of funds due to an increase in short term interest rates as well as a \$52.2 million increase in the average balance of deposits from \$445.9 million for the three months ended March 31, 2005 to \$498.1 million for the three months ended March 31, 2006. The average balance of deposits increased as a result of continued competitive pricing and marketing efforts. Interest expense on Federal Home Loan Bank advances increased \$566,000, or 56.9%, to \$1.6 million for the three months ended March 31, 2006 from \$995,000 for the three months ended March 31, 2005 primarily due to a \$21.5 million increase in the average balance of FHLB advances which were used to fund loan demand as well as an increase in the rates paid on the advances. During the period ended March 31, 2006 the average rate paid on FHLB advances increased 99 basis points from the same period ended March 31, 2005.

Net Interest Income. As a result of the factors mentioned above, net interest income before provision for loan losses decreased \$64,000, or 1.3%, to \$4.7 million for the three months ended March 31, 2006 from \$4.8 million for the three months ended March 31, 2005. Due to the continued flattening of the yield curve, the Company's margins have significantly tightened with the net interest spread decreasing 32 basis points to 2.32%, and the net interest margin decreasing 30 basis points to 2.59%.

Provision for Loan Losses. Provisions of \$71,000 and \$80,000 were made for the three months ended March 31, 2006 and 2005 respectively. Although loans increased during the first quarter of 2006 compared to the first quarter of the prior year, the provision decreased by \$9,000 due to continued low levels of charge-offs, adjustments made for current peer ratios as well as changes in other economic factors affecting the loan loss calculation.

Provisions for loan losses were charged to operations at a level required to reflect probable incurred credit losses in the loan portfolio. In evaluating the level of the allowance for loan losses, management considers historical loss experience, the types of loans and the amount of loans in the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral, peer group information, and prevailing economic conditions. Large groups of smaller balance homogenous loans, such as residential real estate, small commercial real estate, and home equity and consumer loans, are evaluated in the aggregate using historical loss factors and peer group data adjusted for current economic conditions. Large balance and/or more complex loans, such as multi-family and commercial real estate loans, and classified loans, are evaluated individually for impairment.

This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available or as future events change. The Company used the same methodology and generally similar assumptions in assessing the allowance for both periods. The allowance for loan losses as a percentage of loans outstanding was .67% at March 31, 2006 and .71% for the same period in 2005. The level of the allowance is based on estimates and the ultimate losses may vary from the estimates.

Management assesses the allowance for loan losses quarterly. While management uses available information to recognize losses on loans future loan loss provisions may be necessary based on changes in economic conditions. In addition, regulatory agencies, as an integral part of their examination process, periodically review the allowance for loan losses and may require the bank to recognize additional provisions based on their judgment of information available to them at the time of their examination. The allowance for loan losses as of March 31, 2006 was maintained at a level that represented management's best estimate of incurred losses in the loan portfolio to the extent they were both probable and reasonably estimable.

Noninterest Income. Noninterest income increased \$28,000, or 5.8% to \$514,000 for the three months ended March 31, 2006 from \$486,000 for the three months ended March 31, 2005 primarily due to increased customer service fees.

Noninterest Expense. Noninterest expense increased \$32,000, or 0.9%, to \$3.4 million for the three months ended March 31, 2006. This increase was primarily the result of a \$78,000 increase in professional fees, a \$14,000 increase in stationary, supplies and postage, and an \$11,000 increase in occupancy and equipment expenses. Additionally, salaries and employee benefits decreased \$65,000 or 3.4%, to \$1.9 million for the three months ended March 31, 2006.

Total professional fees increased \$78,000, or 73.6%, to \$184,000 for the three months ended March 31, 2006 from \$106,000 for the three months ended March 31, 2005 primarily due to increased auditing and legal fees.

Total stationary, supplies, and postage increased \$14,000, or 14.6%, to \$110,000 for the three months ended March 31, 2006 from \$96,000 for the three months ended March 31, 2005.

Other occupancy expenses increased \$11,000 due mainly to an increase in the Company's bond insurance coverage.

Total salaries and employee benefits decreased \$65,000, primarily resulting from the adoption of FAS 123(R) in 2006. Salaries and employee benefits represented 53.9% and 56.3% of total noninterest expense for the three months ended March 31, 2006 and March 31, 2005, respectively.

Income Tax Expense. Income tax expense decreased \$22,000 to \$639,000 for the three months ended March 31, 2006, from \$661,000 for the three months ended March 31, 2005. This decrease was primarily the result of lower pre-tax income, continued tax benefits resulting from a \$4.5 million equity investment in a tax credit fund made in the fourth quarter of 2004 as well as a \$15.0 million BOLI investment made during the first quarter of 2005. The effective tax rate was 36.5% for both periods ending March 31, 2006 and 2005, respectively.

Liquidity and Commitments

The Bank is required to have enough investments that qualify as liquid assets in order to maintain sufficient liquidity to ensure a safe and sound operation. Liquidity may increase or decrease depending upon availability of funds and comparative yields on investments in relation to the return on loans. Historically, the Bank has maintained liquid assets above levels believed to be adequate to meet the requirements of normal operations, including potential deposit outflows. Cash flow projections are regularly reviewed and updated to ensure that adequate liquidity is maintained.

The Bank's liquidity, represented by cash and cash equivalents, is a product of its operating, investing, and financing activities. The Bank's primary sources of funds are deposits, payments and maturities of outstanding loans and investment securities; and other short-term investments and funds provided from operations. While scheduled payments from the amortization of loans and mortgage-backed securities and maturing securities and short-term investments are relatively predictable sources of funds, deposit flows and loan prepayments are greatly influenced by general interest rates, economic conditions, and competition. In addition, the Bank invests excess funds in short-term interest-earning assets, which provide liquidity to meet lending requirements. The Bank also generates cash through borrowings. The Bank utilizes Federal Home Loan Bank advances to leverage its capital base and provide funds for its lending activities and to enhance its interest rate risk management.

Liquidity management is both a daily and long-term function of business management. Any excess liquidity would be invested in federal funds or authorized investments such as mortgage-backed or U.S. Agency securities. On a longer-term basis, the Bank maintains a strategy of investing in various lending products. The Bank uses its sources of funds primarily to meet its ongoing commitments, to pay maturing certificates of deposit and savings withdrawals, to fund loan commitments, and to maintain its portfolio of mortgage-backed securities and investment securities. At March 31, 2006, the total approved loan origination commitments outstanding amounted to \$15.8 million. At the same date, unused lines of credit were \$35.6 million and outstanding letters of credit totaled \$223,000. There were no securities scheduled to mature in one year or less at March 31, 2006. Certificates of deposit scheduled to mature in one year or less at March 31, 2006, totaled \$153.0 million. Although the average cost of deposits has increased throughout 2006, management's policy is to maintain deposit rates at levels that are competitive with other local financial institutions. Based on the competitive rates and on historical experience, management believes that a significant portion of maturing deposits will remain with the Bank. In addition, the Bank had the ability at March 31, 2006 to borrow an additional \$93.8 million from the Federal Home Loan Bank of San Francisco as well as \$1.0 million from Pacific Coast Bankers Bank as a funding source to meet commitments and for liquidity purposes. The Bank has Federal Home Loan Bank advances of \$48.0 million maturing within the next 12 months.

Capital

Consistent with its goals to operate a sound and profitable financial organization, the Bank actively seeks to maintain a well capitalized institution in accordance with regulatory standards. Total equity was \$72.9 million at March 31, 2006, or 9.4% of total assets on that date. As of March 31, 2006, the Bank exceeded all capital requirements of the Office of Thrift

Supervision. The Bank's regulatory capital ratios at March 31, 2006 were as follows: core capital 9.42%; Tier 1 risk-based capital, 14.30%; and total risk-based capital, 15.23%. The regulatory capital requirements to be considered well capitalized are 5.0%, 6.0%, and 10.0%, respectively.

Impact of Inflation

The unaudited consolidated financial statements presented herein have been prepared in accordance with U.S. generally accepted accounting principles. These principles require the measurement of financial position and operating results in terms of historical dollars, without considering changes in the relative purchasing power of money over time due to inflation.

The Company's primary assets and liabilities are monetary in nature. As a result, interest rates have a more significant impact on the Company's performance than the effects of general levels of inflation. Interest rates, however, do not necessarily move in the same direction or with the same magnitude as the price of goods and services, since such prices are affected by inflation. In a period of rapidly rising interest rates, the liquidity and maturities structures of the Company's assets and liabilities are critical to the maintenance of acceptable performance levels.

The principal effect of inflation, as distinct from levels of interest rates, on earnings is in the area of noninterest expense. Such expense items as employee compensation, employee benefits, and occupancy and equipment costs may be subject to increases as a result of inflation. An additional effect of inflation is the possible increase in the dollar value of the collateral securing loans that the Company has made. The Company is unable to determine the extent, if any, to which properties securing our loans have appreciated in dollar value due to inflation.

ITEM 3 - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Bank's interest rate sensitivity is monitored by management through the use of a model that estimates the change in net portfolio value (NPV) over a range of interest rate scenarios. NPV is the present value of expected cash flows from assets, liabilities, and off-balance-sheet contracts. An NPV Ratio, in any interest rate scenario, is defined as the NPV in that scenario divided by the market value of assets in the same scenario. The Sensitivity Measure is the decline in the NPV Ratio, in basis points, caused by a 2% increase or decrease in rates, whichever produces a larger decline. The higher an institution's Sensitivity Measure is, the greater its exposure to interest rate risk is considered to be. The Office of Thrift Supervision (OTS) has incorporated an interest rate risk component into its regulatory capital rule. Under the rule, an institution whose Sensitivity Measure exceeds 200 basis points may be required to deduct an interest rate risk component in calculating its total capital for purposes of the risk-based capital requirement. Increases in interest rates would be expected to have a negative impact on the Bank's operating results. As of December 31, 2005, the latest date for which information is available, the Bank's Sensitivity Measure, as measured by the OTS, resulting from a 2% increase in interest rates was a decrease of 186 basis points and would result in a \$16.5 million decrease in the NPV of the Bank. The Sensitivity Measure is less than the threshold at which the Bank could be required to hold additional risk-based capital under OTS regulations.

The OTS uses certain assumptions in assessing the interest rate risk of savings associations. These assumptions relate to interest rates, loan prepayment rates, deposit decay rates, and the market values of certain assets under differing interest rate scenarios, among others.

As with any method of measuring interest rate risk, certain shortcomings are inherent in the method of analysis used in the forthcoming table. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in different degrees to changes in market interest rates. Also, the interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types may lag behind changes in market rates. Additionally, certain assets, such as adjustable rate mortgage loans, have features which restrict changes in interest rates on a short-term basis and over the life of the asset. Further, if interest rates change, expected rates of prepayments on loans and early withdrawals from certificates could deviate significantly from those assumed in calculating the table.

The following table shows the NPV and projected change in the NPV of the Bank at December 31, 2005, the latest date for which information is available, assuming an instantaneous and sustained change in market rates of interest of 100, 200, and 300 basis points. On December 31, 2005, the yield on the three-month Treasury bill was 3.89%. The net portfolio value analysis was unable to produce results for the minus 300 basis point scenario for the quarter ended December 31, 2005.

Interest Rate Sensitivity of Net Portfolio Value (NPV)

Change in Rates	Net Portfolio Value			NPV as a % of	
	\$ Amount	\$ Change	% Change	PV of Assets	
				NPV Ratio	Change
+ 300 bp	\$ 62,280	(27,572)	(31)%	8.51%	(318)bp
+ 200 bp	73,356	(16,495)	(18)%	9.83%	(186)bp
+ 100 bp	82,539	(7,313)	(8)%	10.89%	(80)bp
0 bp	89,852			11.69%	0bp
- 100 bp	95,214	5,362	6%	12.25%	56bp
- 200 bp	97,113	7,261	8%	12.41%	72bp

The Bank does not maintain any securities for trading purposes. The Bank does not currently engage in trading activities or use derivative instruments in a material amount to control interest rate risk. In addition, interest rate risk is the most significant market risk affecting the Bank. Other types of market risk, such as foreign currency exchange risk and commodity price risk, do not arise in the normal course of the Bank's business activities and operations.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures: An evaluation of the Company's disclosure controls and procedures (as defined in Section 13(a)-15(e) of the Securities Exchange Act of 1934 (the "Act") as of March 31, 2006 was carried out under the supervision and with the participation of the Company's Chief Executive Officer, Principal Financial Officer and other members of the Company's senior management as of the end of the period preceding the filing of this quarterly report. The Company's Chief Executive Officer and Principal Financial Officer concluded that the Company's disclosure controls and procedures as currently in effect are effective in ensuring that the information required to be disclosed by the Company in the reports it files or submits under the Act is (i) accumulated and communicated to the Company's management (including the Chief Executive Officer and Principal Financial Officer) in a timely manner, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

There have been no changes in internal controls over financial reporting (as defined in Rule 13a-15(f) under the Act) that occurred during the quarter ended March 31, 2006 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

The Company does not expect that its disclosure controls and procedures and internal control over financial reporting will prevent all error and fraud. A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control procedure are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any control procedure also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control procedure, misstatements due to error or fraud may occur and not be detected.

We intend to continually review and evaluate the design and effectiveness of our disclosure controls and procedures and to improve our controls and procedures over time and to correct any deficiencies that we may discover in the future. The goal is to ensure that senior management has timely access to all material financial and non-financial information concerning the Company's business. While we believe that the present design of our disclosure controls and procedures is effective to achieve our goal, future events affecting our business may cause us to modify our disclosure controls and procedures.

PART II OTHER INFORMATION

ITEM 1. Legal Proceedings
None

ITEM 1A. Risk Factors

There are no material changes to the risk factors disclosed in the Company's Form 10-K for the year ended December 31, 2005.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS
ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total # of shares Purchased	Average price paid per share	Total # of shares purchased as part of a publicly	Maximum # of shares that may yet be
--------	--------------------------------	---------------------------------	---	---

Edgar Filing: FIRST PACTRUST BANCORP INC - Form 10-Q

		announced program		purchased
01/1/06-01/31/06				87,162
