SOHU.COM INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. THE COMPANY AND BASIS OF PRESENTATION

Sohu.com Inc. (the Company or Sohu) is a leading online media, search and mobile value-added services company providing comprehensive online products and services to consumers and businesses in the People's Republic of China (the PRC or China). The Company, a Delaware corporation, commenced operations in 1996.

The Company and its variable interest entities (or VIEs) primarily offer content, brand advertising, sponsored search, wireless and online game services through the Company's Internet sites, www.sohu.com, www.sogou.com, www.chinaren.com, www.17173.com, www.focus.cn, www.goodfeel.com.cn and www.go2map.com. The Company markets its products and services to consumers and businesses primarily in the PRC.

The accompanying unaudited condensed consolidated interim financial statements reflect all normal recurring adjustments which, in the opinion of management, are necessary for a fair statement of the results for the interim periods presented. Results for the three and nine months ended September 30, 2006 are not necessarily indicative of the results expected for the full fiscal year or for any future period.

These financial statements have been prepared in accordance with generally accepted accounting principles in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

These financial statements should be read in conjunction with the consolidated financial statements and related notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2005.

Discontinuance of E-commerce Operation

The Company discontinued its e-commerce platform of physical consumer goods on June 20, 2006, in order to focus on profitable segments. As a result of the discontinuation of this business, the e-commerce business is accounted for as a discontinued operation. Accordingly, the Company's statements of operations separate the discontinued operation for all periods presented. For the three and nine months ended September 30, 2006, revenues from e-commerce operation amounted to \$262,000 and \$1.1 million, respectively, as compared to \$879,000 and \$3.0 million during the three and nine months ended September 30, 2005. For the three and nine months ended September 30, 2006, net loss from e-commerce operation amounted to \$27,000 and \$784,000, respectively, as compared to \$432,000 and \$928,000 during the three and nine months ended September 30, 2005.

As of the date the Company discontinued its e-commerce operation, the Company had performed a specific review on all the assets related to e-commerce segment, and provided full provisions for doubtful receivables and the entire inventory balances. As the fixed assets previously used by the e-commerce operation could generally be used by other segments, the Company did not dispose significant fixed assets nor provide impairment on the fixed assets.

Accounting Policies on Share-based Payments Effective from January 1, 2006

Effective from January 1, 2006, the Company adopted SFAS 123(R), which requires all share-based awards to employees and

Table of Contents

directors, including grants of employee stock options and restricted stock units, to be recognized in the financial statements based on their grant date fair values. The valuation provisions of SFAS 123(R) apply to new awards, to awards granted before the adoption of SFAS 123(R) whose related requisite services had not been provided, and to awards which were subsequently modified or cancelled. In March 2005, the Securities and Exchange Commission (or SEC) issued Staff Accounting Bulletin No. 107 (or SAB 107) regarding the SEC's interpretation of SFAS 123(R) and the valuation of share-based payments for public companies. The Company has applied the provisions of SAB 107 in its adoption of SFAS 123(R). Prior to January 1, 2006, the Company accounted for share-based payments in accordance with APB No. 25, Accounting for Stock Issued to Employees (or APB 25), and complied with the disclosure provisions of SFAS No. 123, Accounting for Stock-Based Compensation (or SFAS 123). In general, compensation cost under APB 25 was recognized based on the difference, if any, between the estimated fair value of the common stock and the amount an employee must pay to acquire the stock, as determined on the date the option is granted. Pro forma information was disclosed to illustrate the effects on net income and net income per share as if the Company had applied the fair value recognition provisions of SFAS 123 to stock-based employee compensation for the reporting periods.

Under SFAS 123(R), the Company applied the Black-Scholes valuation model in determining the fair value of options granted to employees and directors. Under the transition provisions of SFAS 123(R), the Company recognizes compensation expense on options granted prior to the adoption of SFAS 123(R) on an accelerated basis over the requisite service period, which is consistent with the methods the Company adopted when preparing pro forma information under SFAS 123. For the three months ended September 30, 2006, the Company granted 405,900 restricted stock units to its employees and directors. Restricted stock units are measured based on the fair market value of the underlying stock on the dates of grant. The Company recognizes the relevant share-based compensation expenses on an accelerated basis over the requisite service period.

Under SFAS 123(R), the number of share-based awards for which the service is not expected to be rendered for the requisite period should be estimated, and the related compensation cost not recorded for that number of awards. For pro forma disclosure under SFAS 123, the effect of forfeitures was accounted for only as the forfeitures occurred. The Company applied the modified prospective transition method, and therefore has not restated prior periods' results.

Reclassification

In January 2006, the Company reclassified software and domain names from other assets to intangible assets for better presentation. To conform with the current period presentation, the relevant amounts as of December 31, 2005 have been reclassified. Such reclassification has increased the net balance of intangible assets and decreased the net balance of other assets as of December 31, 2005 by \$3.0 million.

2. SEGMENT INFORMATION

Based on the criteria established by SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, the Company mainly operated in four principal segments during the nine months ended September 30, 2006: brand advertising, sponsored search, wireless and e-commerce. In June 2006, the Company terminated its e-commerce business. Accordingly, the results of operations for e-commerce have been reclassified as loss from discontinued operation for all periods presented.

In years prior to 2005, the Company had included all of its Website operating cost in cost of revenues of brand advertising. In July 2005, in order to improve measurement of the performance of each segment, the Company began allocating Website operating cost to the cost of revenues of each segment based on actual usage. Accordingly, the Company reclassified the cost of revenues amongst each segment for the previous period presented to conform with the current period classification. The

Table of Contents

Company does not allocate any operating expenses or assets to its brand advertising, sponsored search, wireless and other segments as management does not use this information to measure the performance of the operating segments. Management does not consider share-based compensation for their segment reporting as shown in the tables, as such information does not impact the decisions on resource allocation and segment performance evaluation.

The following tables present summary information by segment (in thousands):

	For the Three Months Ended September 30, 2006				
	Brand	Sponsored		Others*	Total
	Advertising	Search	Wireless	Others*	Total
Revenues	\$ 21,024	\$ 2,852	\$ 8,839	\$ 2,683	\$ 35,398

Share of profits from investment in an associate	44	25	124	67
Others	2	(11)	61	59
	\$ (78)	\$ 358	\$ 565	\$ 96

* During the nine months ended September 30, 2006, the Company had early redeemed its zero coupon convertible senior notes with face value of \$15.0 million at a discount, resulting in a gain of \$793,000.

4. INCOME TAX EXPENSE

The Company is subject to taxes in the United States at 34% or 35%, depending upon taxable income levels. Certain of the Company's subsidiaries are subject to taxes in Hong Kong at 17.5% and certain subsidiaries are subject to taxes in China as disclosed below. The Company's subsidiaries in China are governed by the Income Tax Law of the People's Republic of China concerning Foreign Investment Enterprises and Foreign Enterprises and local income tax laws (the PRC Income Tax Law). Pursuant to the PRC Income Tax Law, wholly-owned foreign enterprises are subject to tax at a statutory rate of 33% (30% state income tax plus 3% local income tax), or 15% for certain technology enterprises, on PRC taxable income. Furthermore, new technology enterprises are exempted from Chinese state corporate income tax for three years, beginning with their first year of operations, and are entitled to a 50% tax reduction, at the rate of 7.5%, for the subsequent three years and 15% thereafter.

Starting from January 1, 2006, most operations of the Company in the PRC have finished their tax exemption periods, and therefore are subject to a 7.5% PRC income tax rate. Total PRC income tax expense for the three and nine months ended September 30, 2006 amounted to \$351,000 and \$1.1 million, respectively, as compared to \$18,000 and \$31,000 for the corresponding three and nine month periods in 2005.

5. NET INCOME PER SHARE

Basic net income per share is computed using the weighted average number of common shares outstanding during the period. Diluted net income per share is computed using the weighted average number of common and, if dilutive, potential common shares outstanding during the period. Potential common shares consist of shares issuable upon the exercise of share-based awards (using the treasury stock method) and zero coupon convertible senior notes.

Table of Contents

The following table presents the calculation of basic and diluted net income per share (in thousands, except per share data):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2006	2005	2006	2005
Numerator:				
Income from continuing operations	\$ 6,628	\$ 8,462	\$ 20,595	\$ 21,772
Loss from discontinued e-commerce operations	(27)	(432)	(784)	(928)
Net income	6,601	8,030	19,811	20,844
Effect of dilutive securities:				
Amortization of offering costs for zero coupon convertible senior notes	124	187	413	561
Net income adjusted for dilutive securities	\$ 6,725	\$ 8,217	\$ 20,224	\$ 21,405
Denominator:				
Weighted average basic common shares outstanding	36,640	36,417	36,783	36,202
Effect of dilutive securities:				
Stock options and restricted stock units	811	1,322	946	1,547
Zero coupon convertible senior notes	1,336	2,011	1,485	2,011
Weighted average diluted common shares outstanding	38,787	39,750	39,214	39,760
Basic income per share from continuing operations	\$ 0.18	\$ 0.23	\$ 0.56	\$ 0.60
Basic loss per share from discontinued e-commerce operations		(0.01)	(0.02)	(0.02)
Basic net income per share	\$ 0.18	\$ 0.22	\$ 0.54	\$ 0.58
Diluted income per share from continuing operations	\$ 0.17	\$ 0.22	\$ 0.54	\$ 0.56
Diluted loss per share from discontinued e-commerce operations		(0.01)	(0.02)	(0.02)
Diluted net income per share	\$ 0.17	\$ 0.21	\$ 0.52	\$ 0.54

6. SHARE-BASED COMPENSATION EXPENSE

The Company's 2000 Stock Incentive Plan, including stock options and restricted stock units, provides for the issuance of up to 9,500,000 shares of common stock. The maximum term of any issued stock right is ten years from the grant date.

The Company has reserved 9,500,000 shares of new common stock for issuance under the Company's 2000 Stock Incentive Plan. As of September 30, 2006, 1,136,446 shares were available for grant under the plan.

In accordance with SFAS 123(R), effective from January 1, 2006, all share-based payments to employees and directors are recognized in the financial statements based on their grant date fair values. The valuation provisions of SFAS 123(R) apply to new awards, to awards granted to employees and directors before the adoption of SFAS 123(R) whose related requisite services had not been provided, and to awards which were subsequently modified or cancelled. In March 2005, the SEC issued SAB 107 regarding the SEC's interpretation of SFAS 123(R) and the valuation of share-based payments for public companies. The Company has applied the provisions of SAB 107 in its adoption of SFAS 123(R).

Under SFAS 123(R), the Company applied the Black-Scholes valuation model in determining the fair value of options granted. Risk free interest rates are decided based on the yield to maturity of US government bonds as at the respective dates of grant of options. Expected life is the number of years that the Company estimates, based primarily on the history, using the plain-vanilla method, that options will be outstanding prior to settlement. Volatility is measured using historical daily price changes of the Company's stock over the respective expected life of the options. Restricted stock units are measured based on fair market value of the underlying stock on the dates of grant. The Company recognizes

compensation expense on all

Table of Contents

share-based awards on an accelerated basis over the vesting period of the underlying awards, generally ranging from one to four years. Forfeiture rate is estimated based on historical forfeiture patterns and adjusted in accordance with our expectation for the future.

Estimates of fair value are not intended to predict actual future events or the value that ultimately will be realized by employees who receive equity awards, and subsequent events are not indicative of the reasonableness of the original estimates of fair value made by the Company under SFAS 123(R).

A summary of option activity under the plan as of September 30, 2006, and changes during the nine month period then ended is presented below:

	Number of Shares (in thousands)	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value (in thousands)
Options				
Outstanding at January 1, 2006	3,586	\$ 14.44	7.99	
Granted				
Exercised	(508)	7.27		
Forfeited or expired	(265)	18.14		
Outstanding at September 30, 2006	2,813	15.38	7.36	\$ 21,187
Vested and expected to vest at September 30, 2006*	2,465	15.09	7.22	\$ 19,589
Exercisable at September 30, 2006	1,663	13.38	6.67	\$ 16,319

* These are options outstanding as of September 30, 2006 that are already vested and expected to vest in the future.

The aggregate intrinsic value in the preceding table represents the total intrinsic value, based on the Company's closing stock price of \$22.02 as of September 30, 2006.

The total intrinsic value of options exercised during the nine month period ended September 30, 2006 was \$8.3 million.

Table of Contents

A summary of restricted stock unit activity under the plan as of September 30, 2006, and changes during the nine month period then ended is presented below:

	Number of Shares	Weighted-Average Grant-Date Fair Value
Restricted Stock Units	(in thousands)	
Unvested at January 1, 2006		\$
Granted	406	23.86
Forfeited	(12)	24.07
Unvested at September 30, 2006	394	23.85
Expected to vest at September 30, 2006	287	23.78

The following table summarizes significant ranges of outstanding and exercisable options as of September 30, 2006:

Range of Exercise Price	Options Outstanding			Options Exercisable	
	as of September 30, 2006			as of September 30, 2006	
	Number Outstanding (in thousands)	Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price	Number Exercisable (in thousands)	Weighted Average Exercise Price
\$0.86 - \$1.18	300	4.86	\$ 0.95	300	\$ 0.95
\$1.37 - \$1.81	31	5.78	1.43	31	1.43
\$2.27	43	6.05	2.27	43	2.27
\$3.846	68	3.18	3.85	68	3.85
\$5.875 - \$7.64	273	5.58	7.13	257	7.10
\$8.39	38	6.28	8.39	25	8.39
\$13 - \$16.84	365	7.59	16.13	177	15.87
\$17 - \$22.86	1,312	8.61	17.92	484	17.87
\$23.17 - \$34.51	383	7.20	28.50	278	29.00
	2,813			1,663	

The effects of application of SFAS 123(R) on the Condensed Consolidated Statements of Operations for the three and nine months ended September 30, 2006 are summarized as follows (in thousands, except per share data):

	For the Three Months Ended September 30, 2006	For the Nine Months Ended September 30, 2006
Decrease in net income from continuing operations	\$ 1,935	\$ 4,937
Decrease in income before income tax expense	1,935	4,937
Decrease in net income	1,935	4,937
Decrease in basic net income per share	0.05	0.13
Decrease in diluted net income per share	0.05	0.12

During the three and nine months ended September 30, 2006, the adoption of SFAS 123(R) did not result in any impact on the cash flows from operating activities, investing activities and financing activities.

Table of Contents

As of September 30, 2006, there was \$4.8 million of total unrecognized compensation cost related to options for which services had not been provided. That cost is expected to be recognized over a weighted average period of 1.0 year. The total fair value of options expensed during the three and nine months ended September 30, 2006 was \$1.1 million and \$4.1 million, respectively.

As of September 30, 2006, there was \$6.2 million of unrecognized compensation cost related to unvested restricted stock units, net of forecasted forfeitures. This amount is expected to be recognized over a weighted average period of 1.3 years. Total fair value of restricted stock units expensed during the three and nine months ended September 30, 2006 was both \$0.8 million.

To the extent actual forfeiture rate is different than the Company has anticipated, the number of share-based awards expected to vest would be different from our expectations.

There were no capitalized share-based compensation costs during the three and nine months ended September 30, 2006 and 2005.

During the three and nine months ended September 30, 2006, total cash received from the exercise of stock options amounted to \$1.3 million and \$3.7 million, respectively.

Pro Forma Information under SFAS 123 for Prior Period

The following table illustrates the effect on net income and income per share if the Company had applied the fair value recognition provisions of SFAS 123, using the Black-Scholes option pricing model, to share-based employee compensation for the three and nine months ended September 30, 2005 (in thousands, except per share data):

	Three Months Ended September 30, 2005	Nine Months Ended September 30, 2005
Net income as reported:	\$ 8,030	\$ 20,844
Add: Share-based compensation expense included in reported net income under APB 25		2
Deduct: Share-based compensation expense determined under fair value based method under SFAS 123	(2,599)	(5,492)
Pro forma net income	\$ 5,431	\$ 15,354
Basic net income per share:		
As reported	\$ 0.22	\$ 0.58
Pro forma	\$ 0.15	\$ 0.42
Diluted net income per share:		
As reported	\$ 0.21	\$ 0.54
Pro forma	\$ 0.14	\$ 0.41

Table of Contents

The fair value of each option granted during the nine months ended September 30, 2005 is estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions:

	Nine Months Ended September 30, 2005
Risk-free interest rate	3.15%
Expected life (in years)	2.82
Expected dividend yield	
Volatility	84%

7. VIEs

FIN 46R Consolidation of Variable Interest Entities requires a VIE to be consolidated by a company if that company is the primary beneficiary of that VIE.

To satisfy PRC laws and regulations, the Company conducts its Internet information, wireless and certain other businesses in the PRC via its VIEs. These VIEs are directly or indirectly owned by Dr. Charles Zhang (or Dr. Zhang), the Company's Chairman, Chief Executive Officer and a major shareholder, and certain employees of the Company. Capital for the VIEs is funded by the Company through loans provided to Dr. Zhang and the employees, and is initially recorded as loans to related parties. These loans are eliminated for accounting purposes with the capital of VIEs during consolidation.

Under contractual agreements with the Company, Dr. Zhang and other Sohu employees who are shareholders of the VIEs are required to transfer their ownership in these entities to the Company, if permitted by PRC laws and regulations, or, if not so permitted, to designees of the Company at any time to repay the loans outstanding. All voting rights of the VIEs are assigned to the Company, and the Company has the right to designate all directors and senior management personnel of the VIEs. Dr. Zhang and the other Sohu employees who are shareholders of the VIEs have pledged their shares in the VIEs as collateral for the loans. As of September 30, 2006, the aggregated amount of these loans was \$9.9 million.

The following is a summary of the VIEs of the Company:

a) **Beijing Sohu**

Beijing Sohu Online Network Information Services, Ltd (or Beijing Sohu) was incorporated in the PRC in 1998 and engages in Internet information and wireless services in the PRC on behalf of the Company. The registered capital of Beijing Sohu is \$242,000. Originally, Dr. Zhang and He Jinmei held 80% and 20% interests in Beijing Sohu, respectively. He Jinmei transferred all of her shares in Beijing Sohu to High Century in June 2005. As a result, Dr. Zhang and High Century hold 80% and 20% interests in Beijing Sohu, respectively.

b) **High Century**

Beijing Century High Tech Investment Co., Ltd. (or High Century) was incorporated in the PRC in 2001 and engages in investment holding in the PRC on behalf of the Company. The registered capital of High Century is \$4,595,000. Dr. Zhang and Li Wei, an employee of the Company, hold 80% and 20% interests in High Century, respectively.

c) **Sohu Entertainment**

Beijing Sohu Entertainment Culture Media Co., Ltd. (or Sohu Entertainment), formerly known as Beijing Hengda Yitong Internet Technology Development Co., Ltd (or Hengda) was incorporated in the PRC in 2002 and engages in Internet access and wireless services in the PRC on behalf of the Company. The registered capital

Table of Contents

of Sohu Entertainment is \$1,210,000. Originally, High Century and Li Wei held 80% and 20% interests in Sohu Entertainment, respectively. In November 2004, to further satisfy PRC regulations, High Century and Li Wei transferred their interests in Sohu Entertainment to Wang Xin and Wang Jianjun, each of whom is an employee of the Company. As a result, Wang Xin and Wang Jianjun hold 80% and 20% interests in Sohu Entertainment, respectively.

d) Sohu Internet

Beijing Sohu Internet Information Service Co., Ltd. (or Sohu Internet) was incorporated in the PRC in 2003 and engages in Internet information, wireless and advertising services in the PRC on behalf of the Company. The original registered capital was \$605,000, and High Century and He Jinmei held 80% and 20% interests in Sohu Internet, respectively. In December 2003, Sohu Entertainment made a \$605,000 investment in Sohu Internet. In April 2005, He Jinmei transferred all her interests in Sohu Internet to High Century, and High Century made a \$1,208,000 additional investment in Sohu Internet. As a result, the registered capital is now \$2,418,000, with High Century and Sohu Entertainment holding 75% and 25% interests, respectively.

e) Goodfeel

Beijing Goodfeel Information Technology Co., Ltd. (or Goodfeel) was incorporated in the PRC in 2001 and engages in value-added telecommunication services in the PRC. The registered capital of Goodfeel is \$1,208,000. In May 2004, High Century and Sohu Internet acquired 73% and 27% interests in Goodfeel, respectively. In July 2004, High Century and Sohu Internet invested \$613,000 and \$473,000 in Goodfeel, respectively, so that High Century owned a 58.1% interest in Goodfeel with the remaining 41.9% interest owned by Sohu Internet. In October 2004, to further satisfy PRC regulations, High Century and Sohu Internet transferred their interests in Goodfeel to Deng Xiufeng and Zhou Jing, each of whom is an employee of the Company. As a result, Deng Xiufeng and Zhou Jing own 58.1% and 41.9% interests in Goodfeel, respectively.

f) Huohu

Beijing Huohu Digital Technology Co., Ltd. (or Huohu) was incorporated in the PRC in 2005. Huohu engages in software and technology development for the games business. The registered capital of Huohu is \$121,000. Beijing Sohu New Era Information Technology Co., Ltd. (or Sohu Era), one of the indirect China-based subsidiaries of the Company, and an employee of Huohu, hold 75% and 25% interests in Huohu, respectively. The Company provided the employee with a non-interest bearing loan of \$32,000 to finance his capital contribution to Huohu. The loan is repayable upon demand by the Company at any time or upon termination of the employment of the employee and can only be repaid through transfer of the employee's shares in Huohu to Sohu Era. Based on the arrangement between Sohu Era and the employee, Sohu Era is the sole and primary beneficiary of Huohu. Accordingly, Huohu is 100% consolidated into the financial statements of the Company.

g) Tu Xing Tian Xia

Beijing Tu Xing Tian Xia Information Consultancy Co., Ltd. (or Tu Xing Tian Xia) was incorporated in the PRC in 1999 and engages in mapping services in the PRC. The registered capital of Tu Xing Tian Xia is \$248,000. In May 2005, in connection with the Company's acquisition of Go2Map, the Company designated High Century and Sohu Internet as its designees to purchase the outstanding registered capital of Tu Xing Tian Xia. As a result, High Century and Sohu Internet own 56.1% and 43.9% interests in Tu Xing Tian Xia, respectively.

Table of Contents

h) Feng Yang Tian Lang

Beijing Feng Yang Tian Lang Advertising Co., Ltd. (or Feng Yang Tian Lang) was incorporated in the PRC in 2005 and engages in advertising services in the PRC. The registered capital of Feng Yang Tian Lang is \$248,000. Sohu Internet and High Century each holds a 50% interest in Feng Yang Tian Lang.

i) Sogou Information

Beijing Sogou Information Services Co., Ltd. (or Sogou Information) was incorporated in the PRC in 2005 and engages in providing Internet information services in the PRC. The registered capital of Sogou Information is \$2,480,000. Zhou Jing and Li Wei, each of whom is an employee of the Company, each owns a 50% interest in Sogou Information.

Pursuant to FIN 46R, Beijing Sohu, High Century, Sohu Entertainment, Sohu Internet, Goodfeel, Huohu, Tu Xing Tian Xia, Feng Yang Tian Lang and Sogou Information are VIEs, of which the Company is the primary beneficiary. Accordingly, the VIEs have been consolidated in the Company's financial statements.

As of September 30, 2006, the above VIEs have aggregate accumulated net profits of approximately \$9.2 million which have been reflected in the consolidated financial statements.

8. RELATED PARTY TRANSACTIONS

The following table summarizes related party transactions during the three and nine months ended September 30, 2006 and 2005, respectively (in thousands):

Name or Description of	Description of	Accounting Captions	Three Months Ended		Nine Months Ended	
			September 30,	September 30,	September 30,	September 30,
Related Party	Transactions		2006	2005	2006	2005
Qingfan, a company controlled by Dr Zhang's brother	Delivery service provided by Qingfan	Cost of revenues	\$	\$ 51	\$ 27	\$ 115
An investee of the Company	Amortization of licensing fee	Product development expenses	17	25	69	75
	Revenue sharing	Cost of revenues	480	326	1,361	906

9. COMMITMENTS AND CONTINGENCIES

The Company's China-based subsidiaries and VIEs, Sohu Era, Sohu Internet, Sogou Information, Beijing Sogou Technology Development Co., Ltd. (or Sogou Technology) and Beijing Sohu New Media Information Technology Co., Ltd. (or Sohu New Media) enjoy tax benefits which are available to new technology enterprises. The effective income tax rate for new technology enterprises registered and operating in Beijing Zhongguancun Science Park is 15%, while the local income tax will be exempted as long as the enterprise holds the status of a new technology enterprise. New technology enterprises are exempted from Chinese state corporate income tax for three years, beginning with their first year of operations, and are entitled to a 50% tax reduction, at the rate of 7.5%, for the subsequent three years. Sohu Era and Sohu Internet were incorporated in 2003 and, providing there is no change in their status as a new technology enterprise or a change in the relevant regulations, are subject to an income tax rate of 0% in 2003 to 2005, 7.5% in 2006 to 2008 and 15% thereafter. Sogou Information was incorporated in 2005, Sogou Technology and Sohu New Media were incorporated in 2006 and, providing there is no change in their status as a new technology enterprise or a change in the relevant regulations, are subject

Table of Contents

to an income tax rate of 0% in 2006 to 2008, 7.5% in 2009 to 2011 and 15% thereafter. To be considered a new technology enterprise under current PRC law, a company must: (i) operate in the high-tech industry (which includes the information technology industry); (ii) be incorporated and operate in Beijing Zhongguancun Science Park; (iii) receive 60% of its revenue from high-tech products or services; and (iv) have at least 20% of its employees involved in technology development. New technology enterprises are subject to annual inspection to determine whether they continue to meet these requirements. If Sohu Era, Sohu Internet, Sogou Information, Sogou Technology and Sohu New Media did not meet the requirements of a new technology enterprise, they could be subject to enterprise income tax in China at rates up to 33%, which could cause a significant reduction in the Company's after-tax income.

The Chinese market in which the Company operates poses certain macro-economic and regulatory risks and uncertainties. These uncertainties extend to the ability of the Company to operate an Internet business, and to conduct brand advertising, sponsored search, wireless and online game services in the PRC. Though the PRC has, since 1978, implemented a wide range of market-oriented economic reforms, continued reforms and progress towards a full market-oriented economy are uncertain. In addition, the telecommunication, information, and media industries remain highly regulated. Restrictions are currently in place and are unclear with respect to which segments of these industries foreign owned entities, like the Company, may operate. The Chinese government may issue from time to time new laws or new interpretations on existing laws to regulate areas such as telecommunication, information and media. Regulatory risks also encompass the interpretation by the tax authorities of current tax laws and regulations, including the applicability of certain preferential tax treatments. The Company's legal structure and scope of operations in China could be subjected to restrictions which could result in severe limits to the Company's ability to conduct business in the PRC.

The Company's sales, purchase and expense transactions are generally denominated in Renminbi (or RMB) and a significant portion of the Company's assets and liabilities are denominated in RMB. The RMB is not freely convertible into foreign currencies. In China, foreign exchange transactions are required by law to be transacted only by authorized financial institutions. Remittances in currencies other than RMB by the Company's subsidiaries in China may require certain supporting documentation in order to effect the remittance.

From time to time, we become subject to legal proceedings and claims in the ordinary course of our business, including claims of alleged infringement of trademarks, copyrights and other intellectual property rights in connection with the content published on our websites. We had provided the amount of loss, if there is information available prior to issuance of the financial statements indicates that it is probable that a liability had been incurred at the date of the financial statements and the amount of loss can be reasonably estimated.

The Company had entered in certain sponsorship agreements, under which the Company is obliged to provide advertising services and Website construction, operation and maintenance services to third parties during the contract periods.

As of September 30, 2006, the Company had future minimum content purchase commitments of \$2.1 million, \$1.3 million and \$0.6 million for the years ended September 30, 2007, 2008 and 2009, respectively. As of September 30, 2006, the Company had made certain deposits into restricted bank accounts as guarantees to meet the requirements under those contracts.

During the nine months ended September 30, 2006, Sohu Internet entered into an agreement and committed to invest \$1.2 million in a newly established China-based investment holding company. After the investment, Sohu Internet will hold 2% of equity interests in the investee.

During the three months ended September 30, 2006, Sohu.com (Hong Kong) Limited (or Sohu Hong Kong) entered into an agreement to invest \$2.8 million in a China based entertainment company. After the investment, Sohu Hong Kong will hold 70% of equity interests in the investee.

10. RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In June 2006, the Financial Accounting Standards Board issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (or FIN 48). FIN 48 prescribes a more likely than not threshold for financial statement recognition and measurement of a

Table of Contents

tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on derecognition of income tax assets and liabilities, classification of current and deferred income tax assets and liabilities, accounting for interest and penalties associated with tax positions, accounting for income taxes in interim periods, and income tax disclosures. This Interpretation is effective as of January 1, 2007. The Company is currently evaluating the impact of FIN 48 on its financial statements.

In June 2006, Emerging Issues Task Force (or EITF) issued No. 06-3, How Sales Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (or EITF 06-3). EITF 06-3 requires disclosure of the presentation of taxes on either a gross or a net basis as an accounting policy decision. The provisions are effective for interim and annual reporting periods beginning after December 15, 2006. The Company is currently evaluating the impact of EITF 06-3 on its financial statements.

In September 2006, the Financial Accounting Standards Board issued FASB Statement No. 157, Fair Value Measurements (or SFAS 157), which defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 applies to other accounting pronouncements that require or permit fair value measurements. SFAS 157 is effective for fiscal years beginning after November 15, 2007. The Company is currently evaluating the impact of SFAS 157 on its financial statements.

In September 2006, the Staff of the SEC issued Staff Accounting Bulletin No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements (or SAB 108). SAB 108 provides guidance on the consideration of the effects of prior year misstatements in quantifying current year misstatements for the purpose of determining whether the current year's financial statements are materially misstated. SAB 108 is effective for fiscal years beginning after November 15, 2006. The Company is currently evaluating the impact of SAB 108 on its financial statements.

Readers are cautioned not to place undue reliance on these forward-looking statements.

OVERVIEW

We are a leading online media, search and mobile value-added services company providing comprehensive online products and services to consumers and businesses in China, through our comprehensive matrices of web properties, consisting of the mass portal and leading online media destination www.sohu.com; interactive search engine www.sogou.com; the leading online alumni club www.chinaren.com; the leading games information portal www.17173.com; one of the top real estate Websites www.focus.cn; the wireless value-added services provider www.goodfeel.com.cn; and a leading online mapping service Website www.go2map.com. We offer our user community very broad choices regarding information, entertainment, communication and wireless. We derive revenues primarily through the sale of brand advertising, sponsored search, wireless and online game services. We also sponsor major events to further enhance our viewership and create a positive branding impact.

We were incorporated in the state of Delaware in August 1996 as Internet Technologies China Incorporated, and launched our original Website, itc.com.cn, in January 1997. During 1997, we developed the Sohu online directory, search engine and related technology infrastructure, and also focused on recruiting personnel, raising capital and aggregating content to attract and retain users. In February 1998, we re-launched our Website under the domain name sohu.com. In September 1999, we re-named our company Sohu.com Inc. Our business operations are conducted primarily through our indirect wholly owned subsidiaries, Beijing ITC, Sohu Era, Sohu Software, Go2Map Software, Sogou Technology and Sohu New Media and our VIEs, Beijing Sohu, High Century, Sohu Entertainment, Sohu Internet, Goodfeel, Huohu, Tu Xing Tian Xia, Feng Yang Tian Lang and Sogou Information.

CRITICAL ACCOUNTING POLICIES AND MANAGEMENT ESTIMATES

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. We believe accounting for brand advertising and sponsored search revenues, accounting for wireless revenues and cost of revenues, gross versus net basis of revenue recognition, determination of functional currencies, allowance for doubtful accounts, valuation allowance against deferred tax assets, assessment of impairment for goodwill and other intangible assets and determination of share-based compensation expense represent critical accounting policies that reflect the more significant judgments and estimates used in the preparation of our consolidated financial statements.

Revenue Recognition

Advertising Revenues

Advertising revenues include revenue from brand advertising and sponsored search services, after deducting agent rebates and applicable business tax. No revenues from advertising-for-advertising barter transactions were recognized.

Table of Contents

Brand advertising contracts establish the fixed price and advertising services to be provided. Pursuant to brand advertising contracts, we provide advertisement placements on various Website channels and in different formats, including but not limited to banners, links, logos, buttons, rich media, content integration and email marketing. Revenue is recognized ratably over the period the advertising is provided and, as such, we consider the services to have been delivered. We treat all elements of advertising contracts as a single unit of accounting for revenue recognition purposes. Based upon our credit assessments of our customers prior to entering into contracts, we determine if collectibility is reasonably assured. In situations where collectibility is not deemed to be reasonably assured, we recognize revenue upon payment from the customer.

Sponsorship contracts may include services similar to those in our advertising contracts, are generally for larger dollar amounts and for a longer period of time, may allow advertisers to sponsor a particular area on our Websites, may include brand affiliation services and/or a larger volume of services, and may require some exclusivity or premiere placements. Sponsorship advertisement revenues are normally recognized on a straight-line basis over the contract period, provided we are meeting our obligations under the contract.

Pursuant to sponsored search contracts, which are normally for relatively small dollar amounts and are with small and medium size enterprises, sponsored search services mainly include priority placements in our search directory, listing in our classified advertisements section and pay-for-click services consisting of displaying the text-based links of our advertisers on our Websites and our Website Alliance network. We normally provide the priority placements services and listing in our classified advertisements section for a fixed fee over the service period of the contracts. Revenues on priority placements and listing in our classified advertisements section are normally recognized on a straight-line basis over the contract period provided we are meeting our obligation under the contract. Pay-for-click services of displaying the text-based links to our advertisers Websites are charged on a cost per click basis, so that an advertiser pays us only when a user clicks on the displayed link. The priority of the display of text-based links is based on the bidding price of different advertisers. Revenues from the pay-for-click services are recognized as the users click on the links.

Material differences could result in the amount and timing of our advertising revenue for any period if management made different judgments or utilized different estimates.

Non-Advertising Revenues

Non-advertising revenues include revenues principally from wireless and online game services.

Wireless revenues are derived from providing short messaging services (or SMS), Wireless Application Protocol (or WAP), multi-media messaging services (or MMS), Ring Back Tone (or RBT), and interactive voice response (or IVR), mainly consisting of news, weather forecast, chatting, entertainment information, music, ring tones, pictures and logo downloads and various other mobile related products provided to mobile phone users. Wireless service fees are charged on a monthly or per message/download basis. Wireless revenues and cost of revenues are recognized in the month in which the service is performed, provided no significant obligations from Sohu remain. We rely on mobile network operators in China to bill mobile phone users for wireless service fees. In order to meet ownership requirements under PRC law which restrict or prohibit wholly foreign owned enterprises from providing Internet information and value-added telecommunication services such as wireless, we rely on Sohu Internet and Goodfeel to contract with the mobile network operators. Generally, (i) within 15 to 90 days after the end of each month, Sohu Internet or Goodfeel receives statements from each of the operators confirming the amount of wireless service charges billed to that operator s mobile phone users and (ii) within 30 to 180 days

Table of Contents

after delivering monthly statements, each operator remits the wireless service fees, net of its service fees, for the month to Sohu Internet or Goodfeel. In order to recognize revenue and be paid for services provided, we rely on billing confirmations from the mobile network operators as to the actual amount of services they have billed to their mobile customers. We are unable to collect certain wireless services fees from an operator in certain circumstances due to technical issues with the operator's network. This is referred to as the failure rate, which can vary from operator to operator. At the end of each reporting period, where an operator has not provided Sohu Internet or Goodfeel with the monthly statements for any month confirming the amount of wireless service charges billed to that operator's mobile phone users for the month, Sohu, using information generated from its own internal system and historical data, makes estimates of the failure rate and collectable wireless service fees and accrues revenue accordingly. The quarterly historical differences in our estimated revenue which was recorded in the financial statements compared to the actual revenue have ranged from an underestimation of \$535,000 (gross margin underestimate of \$326,000) to an overestimation of \$160,000 (gross margin overestimate of \$120,000) since 2002 when wireless revenues began representing a significant portion of our total revenues. We believe we have the ability to make a reasonable estimate. However, differences between the actual failure rate per an operator's statement and our internal records could result in material differences in the amount and timing of our revenue and cost of non-advertising revenue for any period. For the three months ended September 30, 2006, 85% of our estimated wireless revenues were confirmed by the monthly statements received from the mobile network operators.

Our management must determine whether to record our wireless revenues using the gross or net method of reporting. Determining whether revenue should be reported gross or net is based on an assessment of various factors, principally whether Sohu is acting as the principal in offering services to the customer or whether Sohu is acting as an agent in the transaction. To the extent Sohu is acting as a principal in a transaction, Sohu reports as revenue the payments received on a gross basis, and reports as costs of revenue the amounts attributable to services provided by mobile network operators and other vendors. To the extent Sohu is acting as an agent in a transaction, Sohu reports on a net basis reporting as revenue the payments received less commission and other payments to third parties. The determination of whether Sohu is serving as principal or agent in a transaction is judgmental in nature and based on an evaluation of the terms of an arrangement.

Based on our assessment, the majority of our wireless revenues are recorded on a gross basis. We have primary responsibility for fulfillment and acceptability of the wireless services. The content and nature of the wireless services are designed and developed by us (either independently or with third parties) and originate from our Websites, our links located on third parties' Websites, or one of our dedicated phone numbers. The mobile network operators that we contract with to deliver these services to the end customers are not involved in the design or development of the services that are provided by us. The end customer purchases the wireless content, community access or value-added services, such as news, weather forecast, chatting, entertainment information, music, ring tone, picture and logo downloads that Sohu provides. The end customer receives identical services from us regardless of which mobile network operator is used to deliver the message. In addition, we provide customer services to the end customers directly and we could be requested by the mobile network operators to assume the credit risk if the operators are not able to collect fees from the end customers. Sohu has determined that in addition to the indicators of gross reporting, there are also certain indicators of net reporting, including the fact that the mobile network operators set maximum prices that Sohu can charge and that the mobile network operators also have the right to set requirements and procedures associated with using their platform. However, Sohu has determined that the gross revenue reporting indicators are stronger, because Sohu is the primary obligor, adds value to the products, has inventory risk related to content and products, and has reasonable pricing latitude.

To the extent revenues are recorded gross, any commission or other payment to third parties are recorded as costs or expenses so that the net amount (gross revenues, less costs and expenses) flows through to operating income. Accordingly, the impact on operating income is the same whether Sohu records the revenue on a gross or net basis.

Table of Contents***Functional Currency***

Our functional currency is the US Dollar. The functional currency of our subsidiaries and VIEs in China is RMB. An entity's functional currency is the currency of the primary economic environment in which it operates; normally, that is the currency of the environment in which it primarily generates and expends cash. Management's judgment is essential in determination of the functional currency by assessing various indicators, such as cash flows, sales price and market, expenses, financing and inter-company transactions and arrangements. Assets and liabilities of the China subsidiaries and VIEs are translated into US Dollar, our reporting currency, at the exchange rate in effect at the balance sheet date. Foreign currency translation adjustments are not included in determining net income for the period but are accumulated in a separate component of consolidated equity on the balance sheet. The accumulated foreign currency translation adjustment as of September 30, 2006 and December 31, 2005 was a gain of \$4.2 million and \$2.4 million, respectively.

Allowance for Doubtful Accounts Receivables

Our management must make estimates of the collectibility of our accounts receivables. Management specifically analyzes accounts receivables, historical bad debts, customer credit-worthiness, current economic trends and changes in our customer payment terms when evaluating the adequacy of the allowance for doubtful accounts. Our accounts receivable balance was \$27.7 million, net of allowance for doubtful accounts of \$1.8 million as of September 30, 2006. If the financial condition of Sohu's customers or mobile network operators were to deteriorate, resulting in their inability to make payments, or the mobile network operators requested that we assume additional bad debts as a result of the operators inability to collect fees from end customers, additional allowance might be required.

Allowance for Deferred Tax Assets

As of September 30, 2006, the majority of our deferred tax assets are related to net operating losses that would apply to United States income taxes. As substantially all of our income is earned in China, and we do not intend in the foreseeable future to repatriate this income to the United States where it would be taxable, it is more likely than not that deferred tax assets resulting from net operating losses will not be realized. The remaining deferred tax assets are related to China-based subsidiaries and VIEs, resulting from net operating losses and temporary differences between accounting basis and tax basis. We believe that it is more likely than not that the balance will not be realized. We have recorded a full valuation allowance against our gross deferred tax assets in order to reduce our deferred tax assets to the amount that is more likely than not to be realized. If events were to occur in the future that would allow us to realize more of our deferred tax assets than the presently recorded net amount, an adjustment would be made to the deferred tax assets that would increase income for the period when those events occurred.

Impairment on Long-Lived Assets

Our long-lived assets include goodwill, intangible assets, fixed assets and other assets. We test goodwill for impairment at the reporting unit level (operating segment) on an annual basis, and between annual tests when an event occurs or circumstances change that could more likely than not reduce the fair value of goodwill below its carrying value. Application of a goodwill impairment test requires judgment, including the identification of reporting units, assigning assets and liabilities to reporting units, assigning goodwill to reporting units, and determining the fair value of each reporting unit. Significant judgments required to estimate the fair value of reporting units include estimating future cash flows, determining appropriate discount rates and making other assumptions. Changes in these estimates and assumptions could materially affect the determination of fair value for each reporting unit. Any impairment losses recorded in the future could have a material adverse impact on our financial condition and results of operations. As of September 30, 2006, we did not believe that any event or change of circumstances had occurred that would result in material impairment losses in goodwill.

Table of Contents

In respect of our intangible assets, which mainly comprise domain names, trademarks, customer lists and computer software purchased from unrelated third parties, we amortize the costs over their expected future economic lives. Fixed assets comprise computer equipment, office furniture and equipment, vehicles and leasehold improvement, and are depreciated over the estimated useful lives of the assets on a straight-line basis. Other assets mainly include long-term prepayment for content purchases and rental deposits. Management judgment is required in the assessment of the economic lives of intangible assets and useful lives of the fixed assets and other assets. Based on the existence of one or more indicators of impairment, we measure any impairment of intangible assets, fixed assets and other assets based on a projected discounted cash flow method using a discount rate determined by our management to commensurate with the risk inherent in our business model. An impairment charge would be recorded if we determined that the carrying value of intangible assets, fixed assets or other assets may not be recoverable. Our estimates of future cash flows require significant judgment based on our historical results and anticipated results and are subject to many factors. As of September 30, 2006, we were not aware of any indication of impairment of our intangible assets, fixed assets and other assets.

Share-Based Compensation

Effective from January 1, 2006, we adopted SFAS 123(R), which requires all share-based payments to employees and directors, including grants of employee stock options and restricted stock units, to be recognized in the financial statements based on their grant date fair values. The valuation provisions of SFAS 123(R) apply to new awards, to awards granted to employees and directors before the adoption of SFAS 123(R) whose related requisite services had not been provided, and to awards which were subsequently modified or cancelled. In March 2005, the SEC issued SAB 107 regarding the SEC's interpretation of SFAS 123(R) and the valuation of share-based payments for public companies. We have applied the provisions of SAB 107 in its adoption of SFAS 123(R). Prior to SFAS 123(R), we accounted for share-based payments in accordance with APB 25, and complied with the disclosure provisions of SFAS 123. In general, compensation cost under APB 25 was recognized based on the difference, if any, between the estimated fair value of our common stock and the amount an employee must pay to acquire the stock, as determined on the date the option is granted. Pro forma information was disclosed to illustrate the effect on net income and net income per share if we had applied the fair value recognition provisions of SFAS 123 to stock-based employee compensation for the reporting periods.

As of January 1, 2006, we adopted SFAS 123(R) using the modified prospective method. The fair value of the options granted before January 1, 2006 is determined based on the Black-Scholes valuation model, which is consistent with the valuation techniques utilized when we prepared pro forma information under SFAS 123. Restricted stock units are measured based on the fair market values of the underlying stock on the dates of grant. Fair value of the share-based awards is recognized as share-based compensation cost over the requisite service period, net of estimated forfeitures on an accelerated basis under SFAS 123(R).

The determination of the fair value of share-based awards and related share-based compensation expense requires input of subjective assumptions, including but not limited to the valuation model adopted, risk-free interest rate, expected life of the share-based awards, stock price volatility, and expected forfeiture rate. The selection of an appropriate valuation technique or model depends on the substantive characteristics of the instrument being valued. Risk free interest rates are decided based on the yield to maturity of US government bonds as at respective dates of grant of options. Expected life is the number of years that we estimate, based primarily on the history, using plain-vanilla method, that options will be outstanding prior to settlement. Volatility is measured using historical daily price changes of our stock over the respective expected life of the option. Forfeiture rate is estimated based on historical forfeiture pattern and adjusted in accordance with our expectation for the future.

Our input assumptions were based on historical experience, with consideration to developing expectations about the future. The assumptions used in calculating the fair value of share-based awards and related share-based compensation represent

Table of Contents

management's best estimations, but these estimates involve inherent uncertainties and the application of management judgment. As a result, if factors change or we utilize different assumptions, our share-based compensation expense could be materially different for any period.

RESULTS OF OPERATIONS

FOR THE THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2006 AND 2005

Demonstrating our full dedication to our core business of online advertising, on June 20, 2006, we discontinued our unprofitable e-commerce business. As a result of the discontinuation of this business, the e-commerce business is accounted for as a discontinued operation. Accordingly, our income statement separates the discontinued operation for all periods presented.

REVENUES

Total revenues were \$35.4 million and \$99.9 million for the three and nine months ended September 30, 2006, respectively, as compared to \$27.4 million and \$74.9 million for the corresponding periods in 2005.

Advertising Revenues

Advertising revenues are derived principally from brand advertising and sponsored search.

Advertising revenues were \$23.9 million and \$66.8 million, or 67% of total revenues for both the three and nine months ended September 30, 2006, as compared to \$18.8 million and \$50.6 million, or 69% and 68% of total revenues for the corresponding periods in 2005. For the three and nine months ended September 30, 2006, advertising revenues consisted of revenues from brand advertising of \$21.0 million and \$57.0 million, and revenues from sponsored search of \$2.9 million and \$9.8 million. For the three and nine months ended September 30, 2005, advertising revenues consisted of revenues from brand advertising of \$15.6 million and \$41.6 million, and revenues from sponsored search of \$3.2 million and \$9.0 million.

Brand advertising. Brand advertising revenues increased by \$5.4 million to \$21.0 million for the three months ended September 30, 2006 and increased by \$15.4 million to \$57.0 million for the nine months ended September 30, 2006 as compared to the corresponding three and nine month periods in 2005. The increase of \$5.4 million for the three months ended September 30, 2006 from the corresponding period in 2005 consisted of: (i) a \$7.9 million increase from advertisers who advertised with us during the three months ended September 30, 2006 but did not advertise on our Website channels during the three months ended September 30, 2005; (ii) a \$3.0 million increase in revenues from the advertisers who advertised with us in the three months ended September 30, 2005 and continued to do so in the three months ended September 30, 2006; and were offset by (iii) a \$5.5 million decrease in revenues as some of the advertisers who advertised with us during the three months ended September 30, 2005 did not advertise on our Website during the three months ended September 30, 2006. The increase of \$15.4 million for the nine months ended September 30, 2006 from the corresponding period in 2005 consisted of: (i) a \$13.8 million increase from advertisers who advertised with us during the nine months ended September 30, 2006 but did not advertise on our Website during the nine months ended September 30, 2005; (ii) a \$13.7 million increase in revenues from the advertisers who advertised with us in the nine months ended September 30, 2005 and continued to do so in the nine months ended September 30, 2006; and were offset by (iii) a \$12.1 million decrease in revenues as some of the advertisers who advertised with us during the nine months ended September 30, 2005 did not advertise on our Website during the nine months ended September 30, 2006. No single customer accounted for more than 10% of total brand advertising revenues for each of the three and nine months ended September 30, 2006 and 2005. As of September 30, 2006 and 2005, we had \$1.0 million and \$0.8 million of receipt in advance from advertisers, respectively. We have not recorded any revenue from advertising-for-advertising barter transactions.

Table of Contents

For the three and nine months ended September 30, 2006, we recorded brand advertising revenues of \$0 and approximately \$40,000, respectively, from Fujian Tian Qing Digital Co., Ltd. (or Fujian Tian Qing), formerly known as NetDragon Websoft Inc., in connection with its advertisements on our 17173.com Website. For the three and nine months ended September 30, 2005, we recorded brand advertising revenues of approximately \$145,000 and \$541,000, respectively. Those advertising services are provided pursuant to a three-year advertising framework agreement expiring in November 2006. Fujian Tian Qing was the previous owner of 17173.com Website prior to our acquisition of 17173.com.

We expect brand advertising revenues to be flattish in the fourth quarter of 2006 as compared to the third quarter of 2006.

Sponsored search. Sponsored search services revenues decreased by \$0.3 million to \$2.9 million for the three months ended September 30, 2006 and increased by \$0.8 million to \$9.8 million for the nine months ended September 30, 2006, as compared to the corresponding three and nine month periods in 2005. Sponsored search services primarily include priority placements in our search directory and listing in our classified advertisement section, in addition to pay-for-click services of displaying the text-based links of our advertisers on our Websites and our Website Alliance network. We normally provide priority placement services and listings in our classified advertisement section for a fixed fee over a period. Pay-for-click services displaying the text-based links to our advertiser's Websites charged on a cost-per-click basis, so that an advertiser pays us only when a user clicks on the displayed link on our Websites or on our Website Alliance network. The priority of the display of text-based links is based on the bidding price of different advertisers. For the three and nine months ended September 30, 2006, revenues from priority placement services and our classified advertisement section amounted to \$2.1 million and \$7.1 million, representing a 15% decrease over the corresponding three month period in 2005 and a 2% increase over the corresponding nine month period in 2005, respectively. Decrease of revenues from priority placement services and classified advertisement section was mainly because of the decrease on traffic on the Sohu Search (old search engine). For the three and nine months ended September 30, 2006, revenues from pay-for-click services amounted to \$0.8 million and \$2.7 million, respectively, representing a 8% and 33% increase from the corresponding periods of 2005. Revenues from pay-for-click services accounted for approximately 30% of the total sponsored search revenues for both the three and nine month periods ended September 30, 2006 as compared to 23% for the corresponding periods in 2005. The increase in revenues from pay-for-click services mainly resulted from an increase in the number of sponsored links, and an increase in the clicks of the sponsored links due to increased traffic and expansion of Website Alliance network.

We expect sponsored search revenues to be flattish in the fourth quarter of 2006 as compared to the third quarter of 2006.

Non-advertising Revenues

Non-advertising revenues are derived principally from wireless and other services.

Non-advertising revenues were \$11.5 million and \$33.1 million or 33% of total revenues for both the three and nine months ended September 30, 2006, as compared to \$8.6 million and \$24.3 million, or 31% and 32% of total revenues for the corresponding three and nine month periods in 2005. For the three and nine months ended September 30, 2006, non-advertising revenues consisted of wireless revenues of \$8.8 million and \$25.9 million, and from other services of \$2.7 million and \$7.2 million, respectively. For the three and nine months ended September 30, 2005, non-advertising revenues consisted of revenues from wireless of \$6.8 million and \$19.1 million, and from other services of \$1.8 million and \$5.2 million, respectively.

Table of Contents

Wireless. Our wireless revenues include SMS, WAP, MMS, RBT and IVR services. Our wireless services include news, weather forecast, chatting, entertainment information, music, ring tones, pictures and logo downloads and various other related products provided to mobile phone users. Most of our services are charged on a monthly or per message/download basis. For the nine months ended September 30, 2006, we normally charge monthly fees ranging from \$0.062 to \$3.779 and per message/download fees ranging from approximately \$0.006 to \$0.504.

For the three months ended September 30, 2006, our wireless revenues increased by \$2.0 million to \$8.8 million as compared to \$6.8 million for the three months ended September 30, 2005, primarily due to an increase of \$0.9 million in SMS revenues and \$1.1 million in WAP, MMS, RBT and IVR revenues. For the nine months ended September 30, 2006, our wireless revenues increased by \$6.8 million to \$25.9 million as compared to \$19.1 million for the nine months ended September 30, 2005, primarily due to an increase of \$4.3 million in SMS revenues and \$3.3 million in WAP, MMS and RBT revenues. This increase was partially offset by a decrease of \$0.8 million in IVR revenues. The increase in SMS revenues was primarily due to further cooperation with mobile network operators, and the increase in WAP and RBT revenues was the result of our product enhancement and improvement of our ranking in Monternet. The increase in MMS revenues resulted from the resumption of our MMS revenues services by China Mobile Communications Corporation (or CMCC) beginning on August 1, 2005. The decrease in IVR revenues was mainly due to our limited marketing activities for this product.

In early July 2006, the two major mobile network operators in China, CMCC and Unicom Corporation Limited (or Unicom), introduced new policies on wireless value-added services, including double reminders for new monthly subscriptions, billing reminders to existing monthly subscribers and conversion of per message-based SMS subscription to monthly subscriptions. Due to vigilance in managing our wireless business, and identifying new revenue sources, our wireless revenues for the three months ended September 30, 2006 only decreased slightly as compared to the second quarter despite those new policies. In October 2006, Ministry of Information Industry (or MII) issued further guidelines regulating the wireless value-added services industry. Based on current trend, it appears that the mobile network operators and regulator may continue to tighten or change the operation policies. Without any additional measure or changes in policies and regulations, we expect wireless revenue to decrease in the fourth quarter of 2006 as compared to third quarter of 2006. In the long run, we believe the industry's overall development will benefit from those regulations.

Others. Our other services consist primarily of online game services and design of Website for third parties. On May 31, 2005, we completed the acquisition of Go2Map. We have included in revenues the sales of software and applications service provider (or ASP) services of \$423,000 and \$673,000 for the three and nine months ended September 30, 2006 related to Go2Map, as compared to \$380,000 for the three months ended September 30, 2005 and \$581,000 for the period from May 31, 2005, the acquisition date of Go2Map, to September 30, 2005.

COSTS AND EXPENSES

Cost of Revenues

Total cost of revenues were \$12.4 million and \$34.6 million for the three and nine months ended September 30, 2006, respectively, as compared to \$8.9 million and \$22.9 million for the corresponding three and nine month periods in 2005.

Cost of Advertising Revenues

Cost of advertising revenues increased by \$2.5 million to \$7.4 million for the three months ended September 30, 2006 as compared to the corresponding period in 2005, and increased by \$7.4 million to \$19.7 million for the nine months ended September 30, 2006 as compared to the corresponding period in 2005.

Table of Contents

Brand advertising. Cost of brand advertising revenues includes personnel costs and personnel overheads relating to our editorial center, content purchases, payments to our business partners, relevant depreciation of servers and computer equipment and bandwidth leasing costs. Cost of brand advertising revenues was \$6.2 million and \$16.1 million for the three and nine months ended September 30, 2006, respectively, as compared to \$4.1 million and \$10.3 million for the corresponding three and nine month periods in 2005. The increase of \$2.1 million for the three months ended September 30, 2006 from the corresponding period in 2005 consisted of a \$718,000 increase in content purchases, a \$543,000 increase in personnel expense, a \$403,000 expense of share-based compensation due to the adoption of SFAS 123(R), a \$379,000 increase in office and depreciation expense and other costs, a \$346,000 increase in bandwidth leasing costs due to our expanded business, which amounts were offset by a \$289,000 decrease in payments to our business partners. The increase of \$5.8 million for the nine months ended September 30, 2006 from the corresponding period in 2005 consisted of a \$1.6 million increase in content purchases, a \$1.3 million increase in personnel expense, a \$1.1 million increase in bandwidth leasing costs, a \$1.0 million expense of share-based compensation due to the adoption of SFAS 123(R), a \$637,000 increase in depreciation expense and other costs and a \$163,000 increase in payments to our business partners. Our brand advertising gross margin for the three and nine months ended September 30, 2006 was 71% and 72%, respectively, as compared to 74% and 75% for the corresponding periods in 2005, respectively. Our brand advertising gross margin decreased for the three and nine months ended September 30, 2006 mainly because of the required expensing of share-based compensation cost due to the adoption of SFAS 123(R) starting from January 1, 2006, and more spending on content purchases, personal costs and bandwidth leasing costs.

Sponsored search. Cost of sponsored search revenues consisted primarily of payments to our Website Alliance, data collection costs, personnel costs, relevant depreciation of servers and computer equipment and bandwidth leasing costs. Cost of sponsored search revenues was \$1.2 million and \$3.6 million for the three and nine months ended September 30, 2006, respectively, as compared to \$813,000 and \$2.0 million for the corresponding three and nine month periods in 2005. The increase of \$408,000 in cost of sponsored search revenues for the three months ended September 30, 2006 as compared to the corresponding period in 2005 resulted from an increase of \$333,000 in relevant depreciation and bandwidth leasing costs, an increase of \$34,000 in payment to Website Alliances, the expensing of share-based compensation cost of \$24,000 due to the adoption of SFAS 123(R) and an increase of \$17,000 in other expenses. The increase of \$1.6 million in cost of sponsored search revenues for the nine months ended September 30, 2006 as compared to the corresponding period in 2005 resulted from an increase of \$813,000 in relevant depreciation and bandwidth leasing costs, an increase of \$400,000 in payment to Website Alliances, an increase of salary and benefits expense of \$190,000, the expensing of share-based compensation cost of \$68,000 due to the adoption of SFAS 123(R) and an increase of \$129,000 in other expenses. Our sponsored search gross margin for the three and nine months ended September 30, 2006 was 57% and 64%, respectively, as compared to 74% and 78% for the corresponding periods in 2005, respectively. The decrease of gross margin for the three and nine months ended September 30, 2006 mainly due to increase in server depreciation and bandwidth leasing costs as a result of the increase in traffic.

Cost of Non-advertising Revenues

Cost of non-advertising revenues were \$5.0 million and \$14.9 million for the three and nine months ended September 30, 2006, respectively, as compared to \$4.0 million and \$10.5 million for the corresponding three and nine month periods in 2005.

Wireless. Cost of wireless revenues increased by \$0.7 million to \$4.1 million for the three months ended September 30, 2006, and increased by \$3.9 million to \$12.4 million for the nine months ended September 30, 2006, as compared to the corresponding three and nine month periods in 2005. Cost of wireless revenues mainly consists of collection and wireless transmission charges paid to mobile network operators, expenses related to complaints based on allegations for the breach of certain provisions of agreements with mobile network operations, fees or royalties paid to third party content providers for

Table of Contents

services and content associated with our wireless services, relevant depreciation of servers and computer equipment and bandwidth leasing costs. Our wireless gross margins were 54% and 52% for the three and nine months ended September 30, 2006, respectively, as compared to 50% and 55% for the corresponding periods in 2005. Wireless gross margin for the three months ended September 30, 2006 increased, compared to the corresponding period in 2005, primarily due to the increase of mix of higher margin revenues and an increase in gross margin of certain SMS products. Wireless gross margin for the nine months ended September 30, 2006 decreased, compared to the corresponding period in 2005, primarily because of the reduced price ceiling set by a mobile network operator on SMS fees and increased wireless content expenses.

Others. Cost of revenues for other services, was \$910,000 and \$2.5 million for the three and nine months ended September 30, 2006, respectively, as compared to \$626,000 and \$2.0 million for the corresponding three and nine month periods in 2005. Cost of revenues for other services mainly consists of payments to game developers. Following the acquisition of Go2Map, cost of other revenues also includes personnel and other expenses in connection with sale of software business and provision of ASP services. For the three and nine months ended September 30, 2006, the cost of sales of software and provision of ASP services was \$172,000 and \$348,000, respectively, as compared to \$109,000 for the three months ended September 30, 2005 and \$152,000 for the period from May 31, 2005, the acquisition date of Go2Map, to September 30, 2005.

Product Development Expenses

Product development expenses increased by \$1.6 million to \$5.0 million for the three months ended September 30, 2006, and increased by \$3.7 million to \$13.9 million for the nine months ended September 30, 2006, as compared to the corresponding three and nine month periods in 2005. The increase for the three months ended September 30, 2006 from the corresponding period in 2005 was due to a \$766,000 increase in personnel expenses resulting from an increase in headcount and salary increment and \$495,000 of the required expensing of share-based compensation cost under SFAS 123(R), and a increase in other expenses of \$339,000. The increase for the nine months ended September 30, 2006 from corresponding period in 2005 was primarily due to a \$2.3 million increase in personnel expenses resulted from an increase in headcount and salary increment and \$1.4 million of the required expensing of share-based compensation cost under SFAS 123(R).

Sales and Marketing Expenses

Sales and marketing expenses increased by \$2.9 million to \$7.2 million for the three months ended September 30, 2006, and increased by \$7.8 million to \$20.6 million for the nine months ended September 30, 2006, as compared to the corresponding three and nine month periods in 2005. The increase for the three months ended September 30, 2006 from the corresponding period in 2005 was primarily due to a \$1.3 million increase in advertising and promotion expense, which included the relevant expenses associated with our exclusive Olympic sponsorship in the Internet Content Services category and our exclusive rights to provide 2006 FIFA World Cup online video content, a \$797,000 increase in personnel expenses resulted from an increase in headcount and salary increment, a \$445,000 of the required expensing of share-based compensation cost under SFAS 123(R), a \$184,000 increase in depreciation and facilities expenses, and a \$174,000 increase in other expenses. The increase for the nine months ended September 30, 2006 from corresponding period in 2005 primarily consisted of a \$3.4 million increase in advertising and promotion which included the relevant expenses associated with our exclusive Olympic sponsorship in the Internet Content Services category and our exclusive portal rights to provide 2006 FIFA World Cup online video content, a \$2.0 million increase in personnel expenses resulted from an increase in headcount and salary increment, a \$1.2 million of the required expensing of share-based compensation cost under SFAS 123(R), a \$638,000 increase in depreciation and facilities expenses, a \$369,000 increase in traveling and entertainment expenses, and a \$193,000 increase in other expenses.

Table of Contents

General and Administrative Expenses

General and administrative expenses increased by \$1.3 million to \$4.1 million for the three months ended September 30, 2006, and increased by \$2.7 million to \$10.4 million for the nine months ended September 30, 2006, as compared to the corresponding three and nine month periods in 2005. The increase for the three months ended September 30, 2006 from corresponding period in 2005 was primarily due to a \$563,000 of the required expensing of share-based compensation cost under SFAS 123(R), a \$417,000 increase in personnel expenses and a \$320,000 increase in other expenses. The increase for the nine months ended September 30, 2006 from corresponding period in 2005 was primarily due to a \$1.3 million increase in personnel expenses, \$1.3 million of the required expensing of share-based compensation cost under SFAS 123(R) and a \$100,000 increase in other expenses.

Amortization of Intangible Assets

Amortization of intangible assets were \$509,000 and \$1.5 million for the three and nine months ended September 30, 2006, respectively, as compared to \$509,000 and \$1.4 million for the three and nine months ended September 30, 2005, which were related to the acquisitions of the 17173.com, Focus.cn, Goodfeel and Go2Map.

Operating Profit

As a result of the foregoing, our operating profit decreased by \$1.3 million to \$6.1 million for the three months ended September 30, 2006, and decreased by \$1.1 million to \$18.9 million for the nine months ended September 30, 2006, as compared to the corresponding three and nine month periods in 2005. The operating profit for the three and nine months ended September 30, 2006 included \$1.9 million and \$4.9 million, respectively, for share-based compensation expense recorded under SFAS 123(R). The operating profit for the three and nine months ended September 30, 2005 included \$0 and \$2,000, respectively, for share-based compensation expense recorded under APB 25.

Other (Expenses) Income

For the three months ended September 30, 2006, other expenses of \$78,000 mainly consisted of amortization of the offering cost of our zero coupon convertible senior note issued in July 2003. For the nine months ended September 30, 2006, other income of \$565,000 mainly consisted of \$793,000 of gain from early redemption of zero coupon convertible senior notes. For the three months ended September 30, 2005, other income of \$358,000 mainly consisted of the reversal of certain taxes previously accrued of \$531,000, which was offset by \$187,000 amortization of the offering costs attributable to our zero coupon convertible senior notes issued in July 2003. For the nine months ended September 30, 2005, other income of \$96,000 mainly consisted of \$531,000 reversal of certain taxes previously accrued, which was offset by \$561,000 amortization of the offering costs of our zero coupon convertible senior notes issued in July 2003.

Interest Income

Interest income includes net interest income and foreign currency exchange gains. For the three and nine months ended September 30, 2006, interest income was \$951,000 and \$2.3 million, respectively, as compared to \$617,000 and \$1.7 million for the three and nine months ended September 30, 2005, respectively. The increase was mainly due to increase in market interest rates and RMB appreciation.

Table of Contents

Income Tax Expense

For the three and nine months ended September 30, 2006, income tax expense was \$351,000 and \$1.1 million. For the three months ended September 30, 2005, we had an income tax benefit of \$81,000, which was primarily due to a reversal of income tax charge previously made. For the nine months ended September 30, 2005, income tax expense was \$31,000. The increase was because some of our major operating subsidiaries and VIEs are now subject to an applicable income tax rate of 7.5% starting from January 1, 2006.

Most of our income is earned by our China-based subsidiaries and VIEs. Our China-based subsidiaries and VIEs, Sohu Era, Sohu Internet, Sogou Information, Sogou Technology and Sohu New Media enjoy tax benefits which are available to new technology enterprises beginning with their first year of operations. Sohu Era and Sohu Internet are exempted from income tax for the years ended December 31, 2003, 2004 and 2005, are subject to a 7.5% tax rate for the years ending December 31, 2006, 2007 and 2008, and are subject to a 15% tax rate for each year thereafter. Sogou Information, Sogou Technology and Sohu New Media are exempted from income tax for the years ended December 31, 2006, 2007 and 2008, are subject to a 7.5% tax rate for the years ending December 31, 2009, 2010 and 2011, and are subject to a 15% tax rate for each year thereafter.

Income earned in the United States, where Sohu.com Inc. is incorporated, is subject to taxation at 34% or 35%. For the foreseeable future, we anticipate the major source of income earned in the United States and subject to United States taxation to be interest income. If dividends are paid by our China or other non-U.S. subsidiaries to Sohu.com Inc., the dividends would be taxed at Sohu.com Inc.'s rate of taxation which is 34% or 35% (as reduced by any applicable deemed-paid foreign tax credits for foreign income taxes paid by such subsidiaries). For the foreseeable future, we do not intend for the China or other non-U.S. subsidiaries to pay dividends to Sohu.com Inc.

Income from Continuing Operations

For the three and nine months ended September 30, 2006, income from continuing operations was \$6.6 million and \$20.6 million, as compared to \$8.5 million and \$21.8 million for the three and nine months ended September 30, 2005.

Loss from Discontinued E-commerce Operations

In June 2006, we discontinued our e-commerce business. For the three and nine months ended September 30, 2006, loss from discontinued e-commerce operations was \$27,000 and \$784,000, as compared to \$432,000 and \$928,000 for the three and nine months ended September 30, 2005. As of the date we discontinued our e-commerce operation, we had performed a specific review on all the assets related to e-commerce segment. During the nine months ended September 30, 2006, we provided an additional allowance for doubtful receivables amounting to \$84,000, and allowance on all inventory balances amounting to \$21,000. All these provisions were made when we discontinued the business in June 2006. As the fixed assets previously used by the e-commerce operation could generally be used by other segments, we did not dispose significant fixed assets nor provide impairment on the fixed assets.

Net Income

As a result of the foregoing, we had net income of \$6.6 million and \$19.8 million for the three and nine months ended September 30, 2006, as compared to net income of \$8.0 million and \$20.8 million for the three and nine months ended September 30, 2005. The net income for the three and nine months ended September 30, 2006 included \$1.9 million and \$4.9 million of share-based compensation expense recorded under SFAS 123(R). The net income for the three and nine months ended September 30, 2005 included \$0 and \$2,000 of share-based compensation expense recorded under APB 25.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES**

We have financed our operations and capital expenditures principally through private sales of equity securities, the initial public offering of our common stock, a private placement of zero coupon convertible senior notes, and cash provided by operations. From inception through September 30, 2006, we have raised net proceeds of \$39.2 million through the sale of preferred stock in private placements, \$52.4 million from the sale of common stock in our initial public offering and \$87.4 million through the sale of zero coupon convertible senior notes.

We completed a private placement on July 14, 2003 of \$90.0 million principal amount of zero coupon convertible senior notes due July 2023, which resulted in net proceeds to Sohu of approximately \$87.4 million after deduction of the initial purchaser's discount and our offering expenses. The notes do not pay any interest, have a zero yield to maturity, and are convertible into Sohu's common stock at a conversion price of \$44.76 per share, subject to adjustment for dividends, distributions, and upon the occurrence of certain other events. Each \$1,000 principal of the notes is initially convertible into 22.3414 shares of Sohu's common stock. Each holder of the notes will have the right, at the holder's option, to require Sohu to repurchase all or any portion of the principal amount of the holder's notes on July 14 in 2007, 2013 and 2018 at a price equal to 100% of the outstanding principal amount. Sohu may also redeem all or a portion of the notes for cash at any time on or after July 14, 2008 at 100% of the principal amount of the notes if the closing price of Sohu's common stock for each of the 30 consecutive trading days prior to such time was at least 130% of the conversion price or at such time at least 90% of the initial aggregate principal amount of the notes has been converted, repurchased or redeemed. In addition, upon a change of control event, each holder of the notes may require Sohu to repurchase some or all of its notes at a repurchase price equal to 100% of the principal amount of the notes. During the nine months ended September 30, 2006, we have early redeemed a portion of our zero coupon convertible senior notes from the market at a discount for \$15,000,000 in aggregate face value. As of September 30, 2006, total face value of outstanding zero coupon convertible senior notes was \$59,780,000, which was classified as a current liability, as it was probable that note holders would exercise their options to require us to repurchase the outstanding balance on July 14, 2007.

In summary, our cash flows were (in thousands):

	Nine Months Ended	
	September 30,	
	2006	2005
Net cash provided by operating activities	\$ 22,285	18,732
Net cash used in investing activities	(11,830)	(13,491)
Net cash used in financing activities	(25,374)	(11,085)
Effect of exchange rate change on cash and cash equivalents	1,847	1,936
Net decrease in cash and cash equivalents	(13,072)	(3,908)
Cash and cash equivalents at beginning of period	119,091	122,384
Cash and cash equivalents at end of period	\$ 106,019	118,476

Table of Contents

For the nine months ended September 30, 2006, net cash provided by operating activities was \$22.3 million, and was primarily attributable to our net income of \$19.8 million, depreciation and amortization of \$7.2 million, share-based compensation of \$4.9 million, provision for allowance for doubtful accounts of \$1.1 million, which were offset by gains on early redemption of zero coupon convertible senior notes of \$793,000 and net changes in current assets and liabilities of \$10.2 million. For the nine months ended September 30, 2005, net cash provided by operating activities was \$18.7 million, and was primarily attributable to our net income of \$20.8 million, depreciation and amortization of \$6.7 million, and provision for allowance for doubtful accounts of \$821,000, which were offset by net changes in current assets and liabilities of \$9.9 million.

For the nine months ended September 30, 2006, net cash used in investing activities was \$11.8 million, and was primarily attributable to \$7.8 million used in purchasing fixed assets and other assets, \$3.8 million increase of restricted cash and \$306,000 contingent payment for an acquisition. For the nine months ended September 30, 2005, net cash used in investing activities was \$13.5 million, and was primarily attributable to \$10.3 million in cash used in connection with acquisition of Go2Map and \$7.9 million in cash used to acquire fixed assets and other assets, which was partially offset by \$4.7 million received as a result of the maturities of marketable debt securities.

For the nine months ended September 30, 2006, net cash used in financing activities was \$25.4 million, and was primarily attributable to \$15.0 million used in repurchase of common stock, \$14.1 million used in early redemption of zero coupon convertible senior notes and was partially offset by \$3.7 million cash collection from issuance of common stock upon the exercise of options granted under our stock incentive plan. For the nine months ended September 30, 2005, net cash used in financing activities was \$11.1 million, and was primarily attributable to \$13.8 million used for the repurchase of our common stock. This amount was partially offset by \$2.8 million received from the issuance of common stock upon the exercise of options granted under our stock incentive plan.

As of September 30, 2006, we had cash and cash equivalents of \$106.0 million, and investments in marketable debt securities of \$13.9 million, totaling approximately \$119.9 million as compared to \$133.1 million as of December 31, 2005.

We believe that current total cash balance will be sufficient to meet anticipated working capital needs (net cash used in operating activities), potential required repurchase of zero coupon convertible senior notes if the note holders exercise their options, commitments and capital expenditures for at least the next twelve months. We may, however, require additional cash resources due to changed business conditions or other future developments, including any investments or acquisitions we may decide to pursue.

RISK FACTORS

Risks Related to Our Business

We are a relatively young company subject to the risks associated with operating in a new and evolving market.

As a relatively young company in the new and rapidly evolving PRC Internet market, we face numerous risks and uncertainties. Some of these risks relate to our ability to:

continue to attract a larger audience to our matrices of Web properties and proprietary search engines by expanding the type and technical sophistication of the content and services we offer;

maintain our current, and develop new, strategic relationships to increase our revenue streams as well as product and service offerings;

Table of Contents

increase the revenues derived from our fee-based services and products we offer online;

build our sponsored search, wireless, and online games businesses successfully; and

attract and retain qualified personnel.

Our operating results are likely to fluctuate significantly and may differ from market expectations.

Our annual and quarterly operating results have varied significantly in the past, and may vary significantly in the future, due to a number of factors which could have an adverse impact on our business, such as our reliance on advertisers in certain industries for brand advertising revenues, our reliance on certain key third party distributors for sponsored search revenues and our reliance on mobile network operators for our wireless revenues. The Chinese Internet industry is in an early stage of development and we are unsure if it will continue to grow or at what rate it will grow, and we are subject to government regulations that may change at any time with or without notice. Fluctuations in the industries of our key advertisers may affect our brand advertising revenues materially, because they may cut their spending on online marketing if there is any downturn in their industries. We rely on certain third party distributors to sell our sponsored search products. If we lose any of our key distributors, our business may be materially affected. We rely on mobile network operators for, among other things, billing of and collection of wireless service fees from mobile phone users. If our arrangements with the operators were to be terminated, altered or not renewed, or if the operators did not provide continuous or adequate service, our wireless revenues could be reduced significantly.

As a result, we believe that year-to-year and quarter-to-quarter comparisons of our operating results are not a good indication of our future performance. In addition, we have experienced very high growth rates in certain business lines in the past and there may be expectations that these growth rates will continue. In the past, our operating results have sometimes fallen below the expectations of public market analysts and investors, and they may do so again in the future. In this event, the trading price of our common stock may fall.

We face intense competition which could reduce our market share and adversely affect our financial performance.

There are many companies that distribute online content and services targeting Chinese users. We compete with distributors of content and services over the Internet, including Web directories, search engines, content sites, Internet service providers and sites maintained by government and educational institutions. These sites compete with us for visitor traffic, advertising dollars, wireless services, online game users and potential partners. The Internet market in China is relatively new and rapidly evolving. Competition is intense and is expected to increase significantly in the future because there are no substantial barriers to entry in our market.

We have many competitors in the PRC Internet market, including Sina, Netease, Tencent, Baidu, Tom Online, KongZhong, Linktone, Shanda, Google and Yahoo! China. In addition, there are a number of existing or new PRC Internet portals, including those controlled or sponsored by PRC government entities. These private and government sponsored competitors may have certain competitive advantages over us in terms of:

substantially greater financial and technical resources;

more extensive and well developed marketing and sales networks;

better access to original content and information;

greater global brand recognition among consumers; and

larger customer bases.

Table of Contents

We compete with other portals in China primarily on the following basis:

attractiveness of products;

brand recognition;

volume of traffic and users;

quality of our Websites and content;

strategic relationships;

quality of our services;

effectiveness of sales and marketing efforts;

talented staff; and

price.

Our existing competitors may in the future achieve greater market acceptance and gain additional market share. It is also possible that new competitors may emerge and acquire significant market share. In particular, our search engine faces intense competition from software and other Internet products and services incorporating search and retrieval capabilities, such as Baidu, Google and Yahoo! China. In addition, operators of leading Websites or Internet service providers, including Yahoo!, Microsoft/MSN and America Online, currently offer, and could expand, their online products and services targeting China. Such entities may cooperate with other organisations, such as telecommunication operators in China to accelerate their entry into, and to enhance their competitiveness in, the Chinese market. For example, on September 19, 2006, China Telecom Corporation (or China Telecom) and Microsoft announced an agreement pursuant to which Microsoft will provide Windows Live search service to 25 million users of China Telecom. We believe the rapid increase in China's online population will draw more attention from these multinational players to the PRC Internet market. We also compete with traditional forms of media, such as newspapers, magazines, radio and television, for advertisers and advertising revenues.

If we fail to successfully develop and introduce new products and services, our competitive position and ability to generate revenues could be harmed.

We are continuously developing new products and services for our users. The planned timing or introduction of new products and services is subject to risks and uncertainties. Actual timing may differ materially from original plans. Unexpected technical, operational, distribution or other problems could delay or prevent the introduction of one or more of our new products or services. Moreover, we cannot be sure that any of our new products and services will achieve widespread market acceptance or generate incremental revenue.

Our business depends on a strong brand, thus we will not be able to attract users, customers and clients of our products and offerings if we do not maintain and develop our brands.

It is critical for us to maintain and develop our brands so as to effectively expand our user base and our revenues. We believe that the importance of brand recognition will increase as the number of Internet users in China grows. In order to attract and

Table of Contents

retain Internet users, advertisers, wireless, and online games customers, we may need to substantially increase our expenditures for creating and maintaining brand loyalty. Accordingly, our revenues will need to increase at least proportionately, in order for us to maintain our current levels of profitability.

Our success in promoting and enhancing our brands, as well as our ability to remain competitive, will also depend on our success in offering high quality content, features and functionality. If we fail to promote our brands successfully or if visitors to our Websites or advertisers do not perceive our content and services to be of high quality, we may not be able to continue growing our business and attracting visitors, advertisers, wireless, and online game customers.

Our failure to keep up with rapid technology changes may severely affect our future success.

The Internet industry is undergoing rapid technological changes. Our future success will depend on our ability to respond to rapidly evolving technologies, adapt our services to changing industry standards and improve the performance and reliability of our services. If we fail to adapt to such changes, our business may be adversely affected. For example, with the evolution of Web 2.0, Internet users may shift to new modes of information sharing, such as blogs. Moreover we have used peer-to-peer steaming technology on video content to promote our online video. Our competitors may develop their own peer-to-peer steaming technology or update their existing technology to exceed us. With the development of search engine technologies, Internet users may choose to access information, news and content through search engines rather than portals. In addition, with the development of 2.5G and even 3G technology, the focus of wireless applications has been transferred from text message services to multi-media message services, wireless games, wireless downloads and other applications. Accordingly, we will need to adapt our business to cope with the changes and support these new services to be successful. In addition, the online games industry is evolving rapidly, so we will need to anticipate new technologies and games and evaluate their possible market acceptance. We may be unable to recover our game development costs if new technologies render our online games less attractive to users.

We depend on online advertising for a significant portion of our revenues, but the online advertisement market includes many uncertainties, which could cause our advertising revenues to decline.

We derive a significant portion of our revenues, and expect to derive a significant portion of our revenues for the foreseeable future, from the sale of advertising on our Websites. Advertising revenues represented approximately 67% and 68% of our total revenues for the nine months ended September 30, 2006 and September 30, 2005, respectively. For the nine months ended September 30, 2006 and September 30, 2005, our five largest advertisers accounted for approximately 15% and 14% of our total brand advertising revenues, respectively. The growth of our advertising revenues relies on increased revenue from the sale of advertising spaces on our Websites, which may be affected by many of the following risk factors:

The online advertising market is new and rapidly evolving, particularly in China. As a result, many of our current and potential advertising clients have limited experience using the Internet for advertising purposes and historically have not devoted a significant portion of their advertising budget to Internet-based advertising.

Changes in government policy could restrict or curtail our online advertising services. For example, since July 2006, the PRC government has enacted a series of regulations that restrict online medical advertising. As a result of these regulations, we may lose some of our existing medical advertising clients.

Advertising clients that have invested substantial resources in other methods of conducting business may be reluctant to adopt a new strategy that may limit or compete with their existing efforts.

The acceptance of the Internet as a medium for advertising depends on the development of a measurement standard. No standards have been widely accepted for the measurement of the effectiveness of online advertising. Industry-wide standards may not develop sufficiently to support the Internet as an effective advertising medium. If these standards do not develop, advertisers may choose not to advertise on the Internet in general or through our portals or search engines.

Table of Contents

In addition, our ability to generate and maintain significant online advertising revenues will also depend upon:

the development of a large base of users possessing demographic characteristics attractive to advertising clients;

the acceptance of online advertisement as an effective way for business marketing by advertising clients;

the effectiveness of our advertising delivery, tracking and reporting systems; and

the resistance pressure on online advertising prices and limitations on inventory.

The expansion of Internet advertisement blocking software may result in a decrease of advertising revenues.

The development of Web software that blocks Internet advertisements before they appear on a user's screen may hinder the growth of online advertising. The expansion of advertisement blocking on the Internet may decrease our revenues because when an advertisement is blocked, it is not downloaded from our advertisement server. As a result, such advertisements will not be tracked as a delivered advertisement. In addition, advertisers may choose not to advertise on the Internet or on our Websites because of the use by third parties of Internet advertisement blocking software.

Our failure to retain key distributors or attract additional distributors for our sponsored search customers could have an adverse impact on our business.

Sponsored search is at an early stage of development in China and is not as widely accepted by or available to businesses in China as in the United States. As a result, we rely heavily on our nationwide distribution network of third-party distributors for our sales to, and collection of payment from, our sponsored search customers. If our distributors do not provide quality services to our customers or otherwise breach their contracts with them, we may lose customers. We do not have long-term agreements with any of our distributors, including our key distributors, and cannot assure that we will continue to maintain favorable relationships with them.

We rely on our Website Alliance members for a significant portion of our sponsored search revenues. If we fail to retain existing Website Alliance members or attract additional members, our revenues and growth may be adversely affected.

By posting bid listing links on their Websites, we share with our Website Alliance members the revenues generated from clicks by users. For the quarter ended September 30, 2006, the total revenues generated from Website Alliance accounted for approximately 75% of our total bid listing revenues. We consider our Website Alliance critical to the future growth of our sponsored search revenues. If our Website Alliance members decide to use a competitor's or their own Internet search services, or if we fail to attract additional Websites to join our Website Alliance, our sponsored search revenues may decline.

We rely on wireless services for a significant portion of our revenues. Wireless revenues have decreased in prior periods and may decrease further in the future.

We derive a significant portion of our revenues from wireless services. We have derived our wireless revenues in prior periods from providing SMS, WAP, MMS, RBT and IVR, mainly consisting of news, weather forecast, chatting, entertainment information, music, ring tones, pictures and logo downloads and various other mobile related products to mobile phone users and Personal Handy-phone System (or PHS) users. For the nine months ended September 30, 2006 and September 30, 2005, wireless revenues represented approximately 26% and 25%, respectively, of our total revenues.

Table of Contents

Wireless revenues decreased in certain prior periods. Wireless revenues may decrease in the future due to the possibilities that:

Our consumers may not understand our services or the fees they are being charged, may not be satisfied with our services and/or may not use our services on a regular basis;

Consumers may cancel their services at any time without notice;

Revenues from new wireless services such as WAP, MMS, RBT and IVR may not continue to grow significantly and become a significant portion of our total wireless revenues;

Competitors, including mobile network operators, may launch competing or better products than ours at any time;

There are limited barriers to entry to the wireless services sector;

Changes in the billing practices or operational rules and procedures of any of the four mobile network operators, namely CMCC, Unicom, China Netcom Communication Corporation (or CNC) and China Telecom on whom we rely for service delivery and fee collection, could have a material impact on our wireless revenues. For instance, in July 2006, two major mobile network operators, CMCC and Unicom, introduced new policies on wireless value-added service including extension of trial period, double reminders for new monthly subscriptions, billing reminders to existing monthly subscribers and conversion of per message-based SMS subscriptions. In October 2006, the MII issued a guideline to regulate wireless value-added services, which reiterated policies carried on by major mobile network operators, including double confirmation, billing reminder and etc. We believe that our wireless revenues would be negatively affected by the implementation of these policies in the near term;

Changes in government policy could restrict or curtail the services which we provide. The MII has proposed requiring all handset users (including pre-paid mobile phone users) to register using their real names. If this requirement is implemented, it may cause the decrease of new customers, and in turn, reducing our wireless revenues;

Mobile network operators may impose penalties on wireless service providers, or SPs, for violating certain operating policies relating to the provision of wireless services. We have received several penalty notices from mobile network operators, claiming our breach of cooperation contracts and imposing both service suspension sanctions for a period of not more than a year and/or monetary penalties. There is no guarantee that we will not be subject to similar, or more severe penalties from mobile network operators in the future, which could significantly impair our wireless business;

We may enter into cooperation agreements with the mobile network operators, on terms that are not favorable to us since we have limited bargaining power to negotiate contract terms. In addition, mobile network operators may unilaterally revise their agreement at any time. As a result of such contract terms, we could be easily found in breach of our agreement with an operator and could be subject to penalties; and

Mobile network operators may not enter new agreements or renew existing agreements with SPs with respect to wireless services. However, those mobile network operators will continue work with us to provide services and monthly statements. New or renewed agreements with mobile network operators could change in a way that would be unfavorable to us, or such agreements may not be entered into at all.

Table of Contents

We rely on contracts with the mobile network operators in a number of ways with respect to our wireless services, including billing of, and collection from, mobile phone users of wireless service fees. If our arrangements with mobile network operators were to be terminated, altered or not renewed, or if such operators did not provide continuous or adequate service, our revenues could be reduced.

Our wireless services depend mainly on the cooperation of mobile network operators such as CMCC, Unicom, CNC, China Telecom and their respective subsidiaries. We rely on mobile network operators in the following ways:

we use mobile network operators' networks and gateways to provide wireless services;

we use and rely on mobile network operators' billing systems to charge our subscribers through the subscribers' mobile phone bills;

we rely on mobile network operators' collection proxy services to collect payments from subscribers; and

we rely on mobile network operators' infrastructure to further develop our wireless services.

We face significant risks with respect to our arrangements with mobile network operators, such as the following, which could adversely affect our wireless revenues:

Mobile network operators have changed their operating rules and may make further changes at any time. Such previous or any future changes could result in our being required to pay penalties for breaching or being alleged to have breached certain provisions of our agreements with the mobile network operators under new or revised operation rules, or having our service discontinued with or without notice. Changes in these operating rules could also have a material impact on our wireless revenues;

We provide wireless services through our Website and record the delivery of the service in our internal systems. However, in order to recognize revenues and receive payment for services provided, we rely on billing confirmations from mobile network operators as to the actual amount of services they have billed to their mobile customers. We are unable to collect wireless service fees from an operator in certain circumstances due to technical issues with the operator's network. We refer to these failures as an operator's failure rate, which can vary from operator to operator. An operator's failure rate can vary from month to month, ranging from 0% to 98% and may change at any time without notice. If an operator encounters technical problems, increases in the failure rate for that operator could occur;

The service fees we pay for using an operator's infrastructure are set based on the negotiation of annual contracts. Our negotiation leverage is limited and if an operator increases its service fees, or does not comply with the terms of our contract, our gross margin and profitability could be materially reduced. It is possible that some subsidiaries of the mobile network operators may consider increasing their service fees;

We are required to follow the operators' guidance in setting up wireless service fees. We also rely on the mobile network operators to collect the fees on our behalf which they have billed to our mobile customers. If an operator requires us to reduce the wireless service fees charged to mobile customers, disallows us from billing of certain inactive customers, refuses to pay us, or, limits the amount of wireless service fees which can be billed or requires us to comply with any new billing rules, our wireless revenues could be adversely affected;

Table of Contents

An operator's refusal to allow us to supply certain services could disrupt our wireless services. For example, for the period from September 1, 2004 to July 31, 2005, our MMS services were temporarily suspended by CMCC, based on allegations that Beijing Sohu breached certain provisions of its agreement with a CMCC subsidiary;

An operator could launch competing services at any time and could work with content providers directly so that SPs' abilities to diversify their products might be limited. For example, in July 2006, CMCC introduced M.Music, an integrated music service platform which CMCC works directly with music record companies to provide downloads of various songs and music. If mobile network operators were unwilling to work with us, we would not be able to find substitute partners; and

CMCC set up rules for ranking of WAP service providers on its Monternet browser, which has a significant impact on WAP revenues. CMCC may change the rules at any time to affect the rank of the top five listings. As a result, the growth of our WAP revenues was lower than expected and we may lose our existing ranking because of lower visit rates.

Many of our current and potential wireless customers have only limited experience using the Internet for subscription purposes, and may not be willing to fully embrace the products and services we offer, which would adversely affect our future revenues and business expansion.

The wireless market is new and rapidly evolving in China. Many of our current and potential wireless customers have limited experience using the Internet for subscription services. The growth in our wireless revenues depends upon user acceptance of our existing and new services, such as our wireless dating, e-mail, news, sports and jokes content, mobile alumni club and other products. Because these services are new and untested, we do not have a clear understanding of consumer behavior, making it difficult to predict future growth or usage. Customers may not be willing to fully embrace the products and services we offer.

Our investment in online games business may not be successful.

We have invested and may invest further in our online games business. Online games is currently one of the fastest growing online services in the PRC. We currently rely on licenses from third party game companies. Our licenses of Knight Online and Blade Online will expire in November 2006 and September 2007, respectively. In the event that a license expires and we wish to renew such license, the licensor may only agree to renew such license upon an increase in the license fee that we pay to such licensor. In addition, our business might be significantly affected if there are any changes in the PRC laws or regulations in relation to these businesses. For example, the PRC government has issued a new law to implement restrictions and further regulation on the online games industry. Based on these rules, online games companies are required to install an anti-fatigue system, which discourages the game participants from playing games for more than five hours per day. In addition, the PRC government is planning to make a compulsory requirement for online game users to register their real names and provide ID numbers when playing games. Also, upon the requirement of the real name registration for online game users, the government will implement a rating system for online games. For those online games rated as not suitable for child under 18, such child will be not able to access the game if a real name registration is in place. As a result, our revenues from online games may be adversely affected. We may not succeed in these markets despite our investment of time and funds. If we fail to achieve a significant market position, we will fail to realize our anticipated returns on these investments.

Table of Contents

Our strategy of acquiring complementary assets, technologies and businesses may fail and result in equity or earnings dilution.

As a component of our growth strategy, we have acquired and intend to actively identify and acquire assets, technologies and businesses that are complementary to our existing portal business. Our acquisitions could result in the use of substantial amounts of cash, potentially dilutive issuances of equity securities, significant impairment losses related to goodwill or amortization expenses related to intangible assets and exposure to undisclosed or potential liabilities of acquired companies. Moreover, the resources expended in identifying and consummating acquisitions may be significant. Furthermore, any acquisition we decide to pursue may be subject to the approval of the relevant PRC governmental authorities, as well as any applicable PRC rules and regulations. Considering the fast changing legal environment, our acquisition may be subject to government's further scrutiny and the acquisition structures we used to adopt may be found to be inappropriate.

The acquisition and integration of Goodfeel and Go2Map create certain risks and uncertainties.

We completed the acquisitions of Goodfeel in May 2004, and the acquisition of all of the outstanding capital stock of Go2Map Inc., and all of the registered share capital of Tu Xing Tian Xia, a company incorporated in the PRC which was an affiliate of Go2Map Inc (collectively Go2Map) in May 2005. As a result of these acquisitions, we continue to spend considerable time and effort in integrating into our company the employees, organization, customers and operations of Goodfeel and Go2Map. Also, there can be no assurance that we will succeed in realizing the anticipated economic benefits of the acquisitions, including increased brand advertising, sponsored search and wireless revenues. During the nine months ended September 30, 2006, Go2Map was operating at a loss. In addition, we might be required to obtain additional licenses or approvals from relevant government authorities based on the application laws and regulations and might incur additional costs and expenses in obtaining any such licenses and approvals.

We may be required to record a charge to earnings if we must reassess our goodwill or amortizable intangible assets arising from acquisitions.

We are required under generally accepted accounting principles to review our amortizable intangible assets for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. Goodwill is required to be tested for impairment at least annually. Factors that may be considered a change in circumstances indicating that the carrying value of our amortizable intangible assets may not be recoverable include a decline in stock price and market capitalization, and slower growth rates in our industry. We may be required to record a charge to earnings in our financial statements during the period in which any impairment of our goodwill or amortizable intangible assets is determined. As of September 30, 2006, our goodwill and amortizable intangible assets arising from acquisitions were approximately \$59 million.

Changes in accounting rules for share-based compensation may adversely affect our operating results, our stock price and our competitiveness in the employee marketplace.

Our performance is largely dependent on talented and highly skilled individuals. Our future success depends on our continuing ability to identify, develop, motivate and retain highly skilled personnel for all areas of our organization. We have a history of using employee stock options and restricted stock units to align employees' interest with the interests of our shareholders and encourage quality employees to join us and retain our quality employees by providing competitive compensation packages. On January 1, 2006, we adopted SFAS 123(R) which requires the measurement and recognition of compensation expense for all share-based compensation based on estimated fair values. As a result, our operating results contain a charge for share-based compensation expense related to employee stock options and restricted stock units. The recognition of share-based compensation in our statement of operations would have a negative effect on our reported results and earnings per share, which could in turn negatively affect our stock price. On the other hand, if we alter our employee stock incentive plan to minimize the share-based compensation expenses, it may limit our ability to continue to use share-based awards as a tool to attract and retain our employees, and it may adversely affect our operations.

Table of Contents

Our failure to manage growth and diversify our business could harm us.

We have experienced dramatic growth in personnel since our inception and we expect to continue to hire additional personnel in selected areas. This growth requires significant time and resource commitments from us and our senior management. If we are unable to effectively manage a large and geographically dispersed group of employees or anticipate our future growth, our business could be adversely affected.

Additionally, our business relies on our financial reporting and data systems (including our systems for billing users of our fee-based services), which have grown increasingly complex in the recent past due to acquisitions and the diversification and complexity of our business. Our ability to operate our business efficiently depends on these systems and if we are unable to adapt to these changes, our business could be adversely affected.

If we fail to establish and maintain relationships with content and technology providers and infrastructure providers, we may not be able to attract and retain users.

We rely on a number of third party relationships to attract traffic and provide content in order to make our Websites more attractive to users and advertisers. Most of our arrangements with content providers are short-term and may be terminated at the convenience of the other party. Some content providers have increased the fees they charge us for their content. This trend could increase our costs and operating expenses and could adversely affect our ability to obtain content at an economically acceptable cost. We have also entered into exclusive agreements with some of our premier content providers. If we are not able to renew our exclusive deals or premier content become exclusive to our competitors, our attractiveness to users will be severely impaired. Except for the exclusive content, much of the third party content provided to our Websites is also available from other sources or may be provided to other Internet companies. If other Internet companies present the same or similar content in a superior manner, it would adversely affect our visitor traffic.

Our business also depends significantly on relationships with leading technology and infrastructure providers and the licenses that the technology providers have granted to us. Our competitors may establish the same relationships as we have, which may adversely affect us. We may not be able to maintain these relationships or replace them on commercially attractive terms.

We depend on key personnel and our business may be severely disrupted if we lose the services of our key executives and employees.

Our future success is heavily dependent upon the continued service of our key executives, particularly Dr. Charles Zhang, who is the founder, Chief Executive Officer, Chairman of the Board, and a major shareholder of our company and a direct and indirect majority shareholder of Beijing Sohu, High Century, Sohu Internet, Tu Xing Tian Xia and Feng Yang Tian Lang. We rely on his expertise in our business operations, and on his personal relationships with the relevant regulatory authorities, our customers and suppliers. If one or more of our key executives and employees are unable or unwilling to continue in their present positions, we may not be able to replace them easily and our business may be severely disrupted. In addition, if any of our key executives or employees joins a competitor or forms a competing company, we may lose customers and suppliers and incur additional expenses to recruit and train personnel. Each of our executive officers has entered into an employment agreement and a confidentiality, non-competition and non-solicitation agreement with us. However, the degree of protection afforded to an employer pursuant to confidentiality and non-competition undertakings governed by PRC law may be more limited when compared to the degree of protection afforded under the laws of other jurisdictions. We do not maintain key-man life insurance for any of our key executives.

Table of Contents

We also rely on a number of key technology staff for the operation of Sohu. Given the competitive nature of the industry, the risk of key technology staff leaving Sohu is high and could have a disruptive impact on our operations.

Rapid growth and a rapidly changing operating environment strain our limited resources.

We have limited operational, administrative and financial resources, which may be inadequate to sustain the growth we want to achieve. As the demands of our audience and the needs of our customers change and as the number of our users and volume of online advertising, and wireless activities increase, we will need to increase our investment in our network infrastructure, facilities and other areas of operations. If we are unable to manage our growth and expansion effectively, the quality of our services could deteriorate and our business may suffer. Our future success will depend on, among other things, our ability to:

adapt our services and maintain and improve the quality of our services;

protect our Website from hackers and unauthorized access;

continue training, motivating and retaining our existing employees and attract and integrate new employees; and

develop and improve our operational, financial, accounting and other internal systems and controls.

Risks Related to China's Telecommunications Infrastructure

The telecommunications infrastructure in China, which is not as well developed as in the United States, may limit our growth.

The telecommunications infrastructure in China is not well developed. Our growth will depend on the PRC government and state-owned enterprises establishing and maintaining a reliable Internet and telecommunications infrastructure to reach a broader base of Internet users in China. The Internet infrastructure, standards, protocols and complementary products, services and facilities necessary to support the demands associated with continued growth may not be developed on a timely basis or at all by the PRC government and state-owned enterprises.

We depend on ChinaNet, China Netcom and China Telecom for telecommunications services, and any interruption in these services may result in severe disruptions to our business.

Although private Internet service providers exist in China, almost all access to the Internet is maintained through ChinaNet, currently owned by China Netcom and China Telecom, under the administrative control and regulatory supervision of the MII. In addition, local networks connect to the Internet through a government-owned international gateway. This international gateway is the only channel through which a domestic Chinese user can connect to the international Internet network. We rely on this infrastructure and China Netcom and China Telecom to provide data communications capacity primarily through local telecommunications lines. Although the government has announced aggressive plans to develop the national information infrastructure, this infrastructure may not be developed and the Internet infrastructure in China may not be able to support the continued growth of Internet usage. In addition, we will have no access to alternative networks and services, on a timely basis if at all, in the event of any infrastructure disruption or failure.

Table of Contents

We have signed Bandwidth Provision and Server Hosting Agreements with China Netcom and China Telecom. Under these agreements, we established two main service provision centers to maintain most of our servers in Beijing. However, as there are limited telecommunication infrastructure service providers, we may not be able to lease additional bandwidth on acceptable terms, on a timely basis, or at all. If we are not able to lease additional bandwidth, the development of our business can be affected.

The high cost of Internet access may limit the growth of the Internet in China and impede our growth.

Access to the Internet in China remains relatively expensive, and may make it less likely for users to access and transact business over the Internet. Unfavorable rate developments could further decrease our visitor traffic and our ability to derive revenues from transactions over the Internet.

To the extent we are unable to scale our systems to meet the increasing PRC Internet population, we will be unable to expand our user base and increase our attractiveness to advertisers and merchants.

As Web page volume and traffic increase in China, we may not be able to scale our systems proportionately. To the extent we do not successfully address our capacity constraints, our operations may be severely disrupted, and we may not be able to expand our user base and increase our attractiveness to advertisers and merchants.

Unexpected network interruptions caused by system failures may result in reduced visitor traffic, reduced revenue and harm to our reputation.

Our Website operations are dependent upon Web browsers, Internet service providers, content providers and other Website operators in China, which have experienced significant system failures and system outages in the past. Our users have in the past experienced difficulties due to system failures unrelated to our systems and services. Any system failure or inadequacy that causes interruptions in the availability of our services, or increases the response time of our services, as a result of increased traffic or otherwise, could reduce our user satisfaction, future traffic and our attractiveness to users and advertisers.

Our operations are vulnerable to natural disasters and other events, as we only have limited backup systems and do not maintain any backup servers outside of China.

We have limited backup systems and have experienced system failures and electrical outages from time to time in the past, which have disrupted our operations. Most of our servers and routers are currently hosted in a single location within the premises of Beijing Telecom Administration (or BTA). Our disaster recovery plan cannot fully ensure safety in the event of damage from fire, floods, typhoons, earthquakes, power loss, telecommunications failures, break-ins and similar events. If any of the foregoing occurs, we may experience a complete system shutdown. We do not carry any business interruption insurance. To improve the performance and to prevent disruption of our services, we may have to make substantial investments to deploy additional servers or one or more copies of our Websites to mirror our online resources.

Although we carry property insurance with low coverage limits, our coverage may not be adequate to compensate us for all losses, particularly with respect to loss of business and reputation, that may occur.

Our network operations may be vulnerable to hacking, viruses and other disruptions, which may make our products and services less attractive and reliable.

Internet usage could decline if any well-publicized compromise of security occurs. Hacking involves efforts to gain unauthorized access to information or systems or to cause intentional malfunctions or loss or corruption of data, software,

Table of Contents

hardware or other computer equipment. Hackers, if successful, could misappropriate proprietary information or cause disruptions in our service. We may be required to expend capital and other resources to protect our Website against hackers. We cannot assure you that any measure we may take will be effective. In addition, the inadvertent transmission of computer viruses could expose us to a material risk of loss or litigation and possible liability, as well as materially damage our reputation and decrease our user traffic.

Risks Related to China's Regulatory Environment

If our current ownership structure is found to be in violation of current or future PRC laws, rules or regulations regarding the legality of foreign investment in the PRC Internet sector, we could be subject to severe penalties.

We conduct our Internet and value-added telecommunication operations solely in the PRC through our indirect wholly owned subsidiaries, Beijing ITC, Sohu Era, Sohu Software, Go2Map Software, Sogou Technology and Sohu New Media (or collectively PRC subsidiaries), and VIEs, Beijing Sohu, High Century, Sohu Entertainment, Sohu Internet, Goodfeel, Huohu, Tu Xing Tian Xia, Feng Yang Tian Lang and Sogou Information (or collectively VIEs). We are a Delaware corporation, while Sohu Hong Kong, our indirect wholly owned subsidiary and the parent company of Beijing ITC, Sohu Era, Sohu Software and Sohu New Media, is a Hong Kong corporation and a foreign person under PRC law. In order to meet ownership requirements under PRC law which restrict or prohibit wholly foreign owned enterprises, or WFOEs, from operating in certain industries such as Internet information, wireless, Internet access, and certain other industries, our VIEs are companies incorporated in the PRC and owned by Dr. Zhang and certain other employees of Sohu, rather than by Sohu.

The PRC began several years ago to regulate its Internet sector by making pronouncements or enacting regulations regarding the legality of foreign investment in the PRC Internet sector and the existence and enforcement of content restrictions on the Internet. We believe that our current ownership structure complies with all existing PRC laws, rules and regulations. There are, however, substantial uncertainties regarding the interpretation of current PRC Internet laws and regulations. The PRC government may issue new interpretations of the regulations regarding supervision of the Information industry from time to time. In July 2006, the MII issued a notice to strengthen management of foreign investment in and operation of value-added telecommunication services. The notice emphasizes that foreign investors who wish to engage in value-added telecommunication services must strictly follow the relevant rules and regulations on foreign investment in telecommunication sectors. The notice also prohibits domestic telecommunication services providers from leasing, transferring or selling telecommunications business operating licenses to any foreign investor in any form, or providing any resources, sites or facilities to any foreign investor for their illegal operation of a telecommunications business in China. According to the notice, either the holder of a value-added telecommunication service license or its shareholders must directly own the domain names and trademarks used by such license holders in their daily operations. The notice further requires each license holder to have the necessary facilities, including servers, for its approved business operations and to maintain such facilities in the regions covered by its license. Value-added services license holders are required to evaluate the compliance with the requirements set forth in the notice. We anticipate that we may need to modify certain aspects of our business structure in order to further comply with these requirements. In addition, new PRC Internet and foreign exchange laws and regulations were recently adopted. Accordingly, it is possible that the PRC government may ultimately take a view contrary to ours.

In addition, under the agreement reached in November 1999 between the PRC and the United States concerning the United States' support of China's entry into the World Trade Organization, or WTO, foreign investment in PRC Internet services are to be liberalized to allow for 30% foreign ownership in key telecommunication services, including PRC Internet ventures, for the first year after China's entry into the WTO, 49% in the second year and 50% thereafter. China officially entered the WTO on December 11, 2001. However, the implementation of China's WTO accession agreements is still subject to various conditions.

Accordingly, it is possible that the relevant PRC authorities could, at any time, assert that any portion or all of the Sohu PRC subsidiaries' and Sohu VIEs' existing or future ownership structure and businesses violate existing or future PRC laws, regulations or policies. It is also possible that the new laws or regulations governing the PRC Internet sector that have been adopted or may be adopted in the future will prohibit or restrict foreign investment in, or other aspects of, any of our PRC subsidiaries' and VIEs' current or proposed businesses and operations. In addition, any such new laws and regulations may be retroactively applied to us and our PRC subsidiaries and VIEs.

If we or any of our PRC subsidiaries and VIEs were found to be in violation of any existing or future PRC laws or regulations, the relevant PRC authorities would have broad discretion in dealing with such violation, including, without limitation, the following:

levying fines;

Table of Contents

confiscating our income;

revoking our licenses;

shutting down our servers and/or blocking our Websites;

requiring us to restructure its ownership structure or operations; and

requiring us to discontinue any portion or all of its Internet and value-added telecommunication businesses.

We may rely on dividends and other distributions on equity paid by Sohu.com Limited, our wholly owned subsidiary, to fund any cash requirements we may have. We may not be able to obtain cash from distributions to the extent such distributions are restricted by PRC law or future debt covenants. For any dividend received by Sohu.com Inc., it would be subject to US tax at 34% to 35%.

We are a holding company with no operating assets other than investments in Chinese operating entities, including Beijing ITC, Sohu Era, Sohu Software, Go2Map Software, Sogou Technology and Sohu New Media, through an intermediate holding company, Sohu.com Limited, our wholly-owned subsidiary in the Cayman Islands, and our VIEs, Beijing Sohu, High Century, Sohu Entertainment, Sohu Internet, Goodfeel, Huohu, Tu Xing Tian Xia, Feng Yang Tian Lang and Sogou Information. We may need to rely on dividends and other distributions on equity paid by Sohu.com Limited for our cash requirements in excess of any cash raised from investors and retained by us. If Beijing ITC, Sohu Era, Sohu Software, Go2Map Software, Sogou Technology and Sohu New Media incur debt on their own behalf in the future, the instruments governing the debt may restrict Beijing ITC's, Sohu Era's, Sohu Software's, Go2Map Software's, Sogou Technology's and Sohu New Media's ability to pay dividends or make other distributions to us. In addition, PRC legal restrictions permit payment of dividends by Beijing ITC, Sohu Era, Sohu Software, Go2Map Software, Sogou Technology and Sohu New Media only out of their net income, if any, determined in accordance with PRC accounting standards and regulations. Under PRC law, Beijing ITC, Sohu Era, Sohu Software, Go2Map Software, Sogou Technology and Sohu New Media are also required to set aside 10% of their net income each year to fund certain reserve funds until these reserves equal 50% of the amount of paid-in capital. These reserves are not distributable as cash dividends. Furthermore, dividends received by Sohu.com Inc. would be subject to taxation at United States tax rates of 34% or 35%. We do not expect any dividends or other distributions on equity from Sohu.com Limited in the foreseeable future.

We may be unable to collect long-term loans to officers and employees or exercise management influence associated with Beijing Sohu, High Century, Sohu Entertainment, Goodfeel, Huohu and Sogou Information.

As of September 30, 2006, Sohu had outstanding long-term loans of \$9.9 million to Dr. Zhang, Sohu's chief executive officer and a major Sohu shareholder, and certain of our employees. The long-term loans are used to finance investments in Beijing Sohu, which is owned 80% by Dr. Zhang and 20% by High Century; High Century, which is owned 80% by Dr. Zhang and 20% by an employee; Sohu Entertainment, which is owned by two of our employees; Goodfeel, which is owned by two of our employees; Huohu, which is owned 75% by Sohu Era and 25% by an employee; and Sogou Information, which is owned by two of our employees. Beijing Sohu, High Century, Sohu Entertainment, Goodfeel, Huohu and Sogou Information are used to facilitate our participation in telecommunications, Internet content and certain other businesses in China where foreign ownership is either prohibited or restricted.

Table of Contents

The agreements contain provisions that, subject to PRC law, (i) the loans can only be repaid to us by transferring the shares of Beijing Sohu, High Century, Sohu Entertainment, Goodfeel, Huohu or Sogou Information to us; (ii) the shares of Beijing Sohu, High Century, Sohu Entertainment, Goodfeel, Huohu or Sogou Information cannot be transferred without our approval; and (iii) we have the right to appoint all directors and senior management personnel of Beijing Sohu, High Century, Sohu Entertainment, Goodfeel, Huohu and Sogou Information. Dr. Zhang and the other employee borrowers have pledged all of their shares in Beijing Sohu, High Century, Sohu Entertainment, Goodfeel, Huohu and Sogou Information as collateral for the loans and the loans bear no interest and are due on demand after November 2003 in the case of High Century; after November 2005 in the case of Huohu; after August 12, 2006 in the case of Sogou Information; after October 2006 in the case of Goodfeel; after November 3, 2006 in the case of Sohu Entertainment and the earlier of a demand or 2010 in the case of Beijing Sohu; or, in any case, at such time as Dr. Zhang or the other employee borrowers, as the case may be, is not an employee of Sohu. Sohu does not intend to request repayment of the loans as long as PRC regulations prohibit it from directly investing in businesses being undertaken by the VIEs.

Because these loans can only be repaid by the borrowers transferring the shares of the various entities, our ability to ultimately realize the effective return of the amounts advanced under these loans will depend on the profitability of Beijing Sohu, High Century, Sohu Entertainment, Goodfeel, Huohu and Sogou Information which is uncertain.

Furthermore, because of uncertainties associated with the PRC law, ultimate enforcement of the loan agreements is uncertain. Accordingly, we may never be able to collect these loans or exercise influence over Beijing Sohu, High Century, Sohu Entertainment, Goodfeel, Huohu and Sogou Information.

We depend upon contractual arrangements with Beijing Sohu, High Century, Sohu Entertainment, Sohu Internet, Goodfeel, Huohu, Tu Xing Tian Xia, Feng Yang Tian Lang and Sogou Information for the success of our business and these arrangements may not be as effective in providing operational control as direct ownership of these businesses and may be difficult to enforce.

Because we conduct our Internet operations only in the PRC, and are restricted or prohibited by the PRC government from owning Internet content or telecommunication operations in the PRC, we are dependent on Beijing Sohu, High Century, Sohu Entertainment, Sohu Internet, Goodfeel, Huohu, Tu Xing Tian Xia, Feng Yang Tian Lang and Sogou Information in which we have no direct ownership interest, to provide those services through contractual agreements between the parties. These arrangements may not be as effective in providing control over our Internet content or telecommunications operations as direct ownership of these businesses. For example, some of our subsidiaries and VIEs could fail to take actions required for our business, such as entering into content development contracts with potential content suppliers or failing to maintain the necessary permit for the content servers. If Beijing Sohu, High Century, Sohu Entertainment, Sohu Internet, Goodfeel, Huohu, Tu Xing Tian Xia, Feng Yang Tian Lang and/or Sogou Information fail to perform its obligations under these agreements, we may have to rely on legal remedies under PRC law. We cannot assure you that such remedies under PRC law would be effective or sufficient.

Dr. Zhang, our chief executive officer and a major shareholder of our company, is also the direct and indirect majority shareholder of Beijing Sohu, High Century, Sohu Internet, Tu Xing Tian Xia and Feng Yang Tian Lang. As a result, our contractual relationships with those companies could be viewed as entrenching his management position or transferring certain value to him, especially if any conflict with him arises.

Table of Contents

If we are found to be in violation of current or future PRC laws, rules or regulations regarding Internet-related services and telecom-related activities, we could be subject to severe penalties.

The PRC has enacted regulations applying to Internet-related services and telecom-related activities. While many aspects of these regulations remain unclear, they purport to limit and require licensing of various aspects of the provision of Internet information and content, online advertising and value-added telecommunication services. In addition, the PRC may promulgate new laws, rules or regulations at any time. If these current or future laws, rules or regulations regarding Internet-related activities, are interpreted to be inconsistent with our ownership structure and/or our business operations, our business will be severely impaired and we could be subject to severe penalties. In addition, we may be required to apply for a new license or new qualification, or transfer from an old type of license to a new type of license at any time as a result of the requirements of newly promulgated laws or new regulations. From the promulgation of such requirement to the final issuance of the license or qualification, there might be a long pending period. Although the issuance of the new license will finally trace back to the date when filing such application, we may be held liable for operating without proper license and may be fined for the operation during the application period.

We may not be able to collect payments of our wireless fees if the PRC government determines that our existing ownership structure does not comply with PRC laws, rules or regulations.

As discussed above, the PRC began several years ago to regulate its Internet sector by making pronouncements or enacting regulations regarding the legality of foreign investment in the PRC Internet sector. We believe that our current ownership structure complies with all existing PRC laws, rules and regulations. There are, however, substantial uncertainties regarding the interpretation of current PRC Internet laws and regulations. It is possible that the PRC government's view will ultimately be contrary to ours. If the PRC government were to take a contrary view, we might not be able to collect payments of our wireless fees, which we receive from Sohu Internet and Goodfeel, which in turn collect the fees from mobile network operators.

Even if we are in compliance with PRC governmental regulations relating to licensing and foreign investment prohibitions, the PRC government may prevent us from distributing, and we may be subject to liability for, content that it believes is inappropriate.

The PRC has enacted regulations governing Internet access and the distribution of news and other information. In the past, the PRC government has stopped the distribution of information over the Internet that it believes to violate PRC law, including content that is obscene, incites violence, endangers national security, is contrary to the national interest or is defamatory. In addition, we may not publish certain news items, such as news relating to national security, without permission from the PRC government. Furthermore, the Ministry of Public Security has the authority to cause any local Internet service provider to block any Website maintained outside the PRC at its sole discretion. Even if we comply with PRC governmental regulations relating to licensing and foreign investment prohibitions, if the PRC government were to take any action to limit or prohibit the distribution of information through our network or to limit or regulate any current or future content or services available to users on our network, our business would be harmed.

We are also subject to potential liabilities for content on our Websites that is deemed inappropriate and for any unlawful actions of our subscribers and other users of our systems under regulations promulgated by the MII, such potential liabilities including but not limited to imposition of fines, or, even shut-down of the Website.

Furthermore, we are required to delete content that clearly violates the laws of the PRC and report content that we suspect may violate PRC law. We may have difficulty determining the type of content that may result in liability for us and, if we are wrong, we may be prevented from operating our Websites.

Table of Contents

We may not have exclusive rights over the marks that are crucial to our business, including but not limited to Sohu.com , Sogou , 17173 , Focus.cn , Goodfeel and Go2Map .

We have applied for the registration of our key marks in the PRC, including but not limited to Sohu.com, Sogou, 17173, Focus.cn, Goodfeel and Go2Map, so as to establish and protect our exclusive rights to the marks. We have succeeded in registering the marks Sohu.com , Focus.cn and Go2Map in the PRC under certain classes. The applications for the registration of the other marks or some marks under other classes are still under examination by the Trademark Office of PRC. Completion of the registrations is subject to the Trademark Office of PRC's determination that there are no prior rights in the PRC. Any rejection of these applications could adversely affect our rights to these marks.

Unauthorized use of our intellectual property by third parties, and the expenses incurred in protecting our intellectual property rights, may adversely affect our business.

We regard our copyrights, service marks, trademarks, trade secrets and other intellectual property as critical to our success. Unauthorized use of our intellectual property by third parties may adversely affect our business and reputation. We rely on trademark and copyright law, trade secret protection and confidentiality agreements with our employees, customers, business partners and others to protect our intellectual property rights. Despite our precautions, it may be possible for third parties to obtain and use our intellectual property without authorization. Furthermore, the validity, enforceability and scope of protection of intellectual property in Internet-related industries are uncertain and still evolving. In particular, the laws of the PRC and certain other countries are uncertain or do not protect intellectual property rights to the same extent as do the laws of the United States. Moreover, litigation may be necessary in the future to enforce our intellectual property rights, to protect our trade secrets or to determine the validity and scope of the proprietary rights of others. Future litigation could result in substantial costs and diversion of resources.

We may be subject to intellectual property infringement claims, which may force us to incur substantial legal expenses and, if determined adversely against us, materially disrupt our business.

We cannot be certain that our products, services and intellectual property used in our normal course of business do not or will not infringe valid patents, copyrights or other intellectual property rights held by third parties. We have in the past been, are currently, and may in the future be, subject to claims and legal proceedings relating to the intellectual property of others in the ordinary course of our business. In particular, if we are found to have violated the intellectual property rights of others, we may be enjoined from using such intellectual property, may be ordered to pay a fine and may incur licensing fees or be forced to develop alternatives. We may incur substantial expenses in defending against these third party infringement claims, regardless of their merit. Successful infringement claims against us may result in substantial monetary liability or may materially disrupt the conduct of our business by restricting or prohibiting our use of the intellectual property in question. In addition, we provide search engine facilities capable of locating and accessing links to download MP3 music, movies, images and other multimedia files and/or other content hosted on third party Websites, which may be protected by law. In a recent judgment in China, which has not come into effect yet, a court has found that one of the industry participants infringed the rights of copyright owners for its MP3 search services and ordered it to pay compensation. This judgment has increased our exposure to copyright infringement and therefore, we may face increasing amounts of claims or lawsuits relating to our MP3 services.

We may be subject to, and may expend significant resources in defending against claims based on the content and services we provide over all of our Websites.

As our services may be used to download and distribute information to others, there is a risk that claims may be made against us for defamation, negligence, copyright or trademark infringement or other claims based on the nature and content of such

Table of Contents

information. Furthermore, we could be subject to claims for the online activities of our visitors and incur significant costs in their defense. In the past, claims based on the nature and content of information that was posted online by visitors have been made in the United States against companies that provide online services. We do not carry any liability insurance against such risks.

We could be exposed to liability for the selection of listings that may be accessible through our Websites or through content and materials that our visitors may post in classifieds, message boards, chat rooms or other interactive services. If any information provided through our services contains errors, third parties may make claims against us for losses incurred in reliance on the information. We also offer Web-based e-mail and subscription services, which exposes us to potential liabilities or claims resulting from:

unsolicited e-mail;

lost or misdirected messages;

illegal or fraudulent use of e-mail; or

interruptions or delays in e-mail service.

Investigating and defending any such claims may be expensive, even if they do not result in liability.

Activities of Internet content providers are or will be subject to additional PRC regulations, which have not yet been put into effect. Our operations may not be consistent with these new regulations when put into effect, and, as a result, we could be subject to severe penalties.

The MII has stated that the activities of Internet content providers are subject to regulation by various PRC government authorities, depending on the specific activities conducted by the Internet content provider. Various government authorities have stated publicly that they are in the process of preparing new laws and regulations that will govern these activities. The areas of regulation currently include online advertising, online news reporting, online publishing, online securities trading, the provision of industry-specific (e.g., drug-related) information over the Internet and foreign investment in value-added telecommunication services. Other aspects of our online operations may be subject to regulations in the future.

Our operations may not be consistent with these new regulations when put into effect and, as a result, we may be subject to severe penalties as discussed above.

Regulation and censorship of information distribution in China may adversely affect our business.

China has enacted regulations governing Internet access and the distribution of news and other information. Furthermore, the Propaganda Department of the Chinese Communist Party has been given the responsibility to censor news published in China to ensure, supervise and control a particular political ideology. In addition, the MII has published implementing regulations that subject online information providers to potential liability for contents included in their portals and the actions of subscribers and others using their systems, including liability for violation of PRC laws prohibiting the distribution of content deemed to be socially destabilizing. Furthermore, the MII may implement a requirement that users of blogs register under their real names. If such a regulation is implemented, our business may be negatively affected due to a decrease in the number of blog users. Furthermore, because many PRC laws, regulations and legal requirements with regard to the Internet are relatively new and untested, their interpretation and enforcement may involve significant uncertainty. In addition, the PRC legal system is a civil law system in which decided legal cases have limited binding force as legal precedents. As a result, in many cases a Website operator may have difficulties determining the type of content that may subject it to liability.

Table of Contents

Periodically, the Ministry of Public Security has stopped the distribution over the Internet of information which it believes to be socially destabilizing. The Ministry of Public Security has the authority to cause any local Internet service provider to block any Website maintained outside China at its sole discretion. If the PRC government were to take action to limit or eliminate the distribution of information through our portal or to limit or regulate current or future applications available to users of our portal, our business would be adversely affected.

The State Secrecy Bureau, which is directly responsible for the protection of state secrets of all PRC government and Chinese Communist Party organizations, is authorized to block any Website it deems to be leaking state secrets or failing to meet the relevant regulations relating to the protection of state secrets in the distribution of online information. Under the applicable regulations, we may be held liable for any content transmitted on our portal. Furthermore, where the transmitted content clearly violates the laws of the PRC, we will be required to delete it. Moreover, if we consider transmitted content suspicious, we are required to report such content. We must also undergo computer security inspections, and if we fail to implement the relevant safeguards against security breaches, we may be shut down. In addition, under recently adopted regulations, Internet companies which provide bulletin board systems, chat rooms or similar services, such as our company, must apply for the approval of the State Secrecy Bureau. As the implementing rules of these new regulations have not been issued, we do not know how or when we will be expected to comply, or how our business will be affected by the application of these regulations.

Political and economic policies of the PRC government could affect our business.

All of our business, operating assets, fixed assets and operations are located in China and all of our revenues are derived from our operations in China. Accordingly, our business may be adversely affected by changes in political, economic or social conditions in China, adjustments in PRC government policies or changes in laws and regulations.

The economy of China differs from the economies of most countries belonging to the Organization for Economic Cooperation and Development in a number of respects, including:

structure;

level of government involvement;

level of development;

level of capital reinvestment;

growth rate;

control of foreign exchange; and

methods of allocating resources.

Since 1949, China has been primarily a planned economy subject to a system of macroeconomic management. Although the PRC government still owns a significant portion of the productive assets in China, economic reform policies since the late 1970s have emphasized decentralization, autonomous enterprises and the utilization of market mechanisms. We cannot predict what effects the economic reform and macroeconomic measures adopted by the PRC government may have on our business or results of operations.

Table of Contents***The PRC legal system embodies uncertainties which could limit the legal protections available to us and you, or could lead to penalties on us.***

The PRC legal system is a civil law system based on written statutes. Unlike common law systems, it is a system in which decided legal cases have little precedential value. In 1979, the PRC government began to promulgate a comprehensive system of laws and regulations governing economic matters in general. Our PRC operating subsidiaries, Beijing ITC and Sohu Era, are wholly-foreign owned enterprises, or WFOEs, which are enterprises incorporated in mainland China and wholly-owned by our indirect subsidiary, Sohu Hong Kong. Beijing ITC and Sohu Era are subject to laws and regulations applicable to foreign investment in mainland China. In addition, all of our subsidiaries and VIEs are incorporated in China and subject to all applicable Chinese laws and regulation. Because of the relatively short period for enacting such a comprehensive legal system, it is possible that the laws, regulations and legal requirements are relatively recent, and their interpretation and enforcement involve uncertainties. These uncertainties could limit the legal protections available to us and other foreign investors, including you, and may lead to penalties imposed on us because of the different understanding between the relevant authority and us. For example, according to current tax laws and regulation, we are responsible to pay business tax on a Self-examination and Self-application basis. However, since there is no clear guidance as to the applicability of those preferential treatments, we may be found in violation of the interpretation of local tax authorities with regard to the scope of taxable services and the percentage of tax rate and therefore might be subject to penalties, including but not limited to monetary penalties. In addition, we cannot predict the effect of future developments in the PRC legal system, particularly with regard to the Internet, including the promulgation of new laws, changes to existing laws or the interpretation or enforcement thereof, or the preemption of local regulations by national laws.

It may be difficult to enforce any civil judgments against us or our board of directors or officers, because most of our operating and/or fixed assets are located outside of the United States.

Although we are incorporated in the State of Delaware, most of our operating and fixed assets are located in the PRC. As a result, it may be difficult for investors to enforce judgments outside the United States obtained in actions brought against us in the United States, including actions predicated upon the civil liability provisions of the federal securities laws of the United States or of the securities laws of any state of the United States. In addition, certain of our directors and officers (principally based in the PRC) and all or a substantial portion of their assets are located outside the United States. As a result, it may not be possible for investors to effect service of process within the United States upon those directors and officers, or to enforce against them or us judgments obtained in United States courts, including judgments predicated upon the civil liability provisions of the federal securities laws of the United States or of the securities laws of any state of the United States. We have been advised by our PRC counsel that, in their opinion, there is doubt as to the enforceability in the PRC, in original actions or in actions for enforcement of judgments of United States courts, of civil liabilities predicated solely upon the federal securities laws of the United States or the securities laws of any state of the United States.

If tax benefits presently available to certain of our subsidiaries and VIEs located in China were not available, the income tax rate on most of our profits in China could increase to 33%.

Presently, PRC law requires that a company, in order to be considered a new technology enterprise : (i) operate in the high-tech industry (which includes the Internet industry); (ii) be incorporated and operating in High and New Technology Development Zones, including Beijing Zhongguancun Science Park; (iii) receive 60% of its revenue from high-tech products or services; and (iv) have at least 20% of its employees involved in technology development. Each year new technology enterprises are subject to annual inspection to determine whether they continue to meet these requirements.

Table of Contents

Subject to the approval of the relevant tax authorities, the effective income tax rate for new technology enterprises registered and operating in Beijing Zhongguancun Science Park is 15%, while the local income tax will be exempted as long as the enterprise holds the new technology enterprise status. New technology enterprises are exempted from Chinese state corporate income tax for three years, beginning with their first year of operations, and are entitled to a 50% tax reduction at the rate of 7.5% for the subsequent three years. Currently, our China-based subsidiaries and VIEs, Sohu Era, Sohu Internet, Sogou Information, Sogou Technology and Sohu New Media enjoy tax benefits which are available to new technology enterprises. Providing there is no change in the new technology enterprise status or change in relevant regulations, Sohu Era and Sohu Internet will be subject to an applicable tax rate of 7.5% in 2008 and 15% thereafter, while Sogou Information, Sogou Technology and Sohu New Media will be subject to applicable tax rate of 0% in 2006 to 2008, 7.5% in 2009 to 2011 and 15% thereafter.

For these tax benefits to no longer be available, there would need to be a change in governmental policy or the governmental regulations concerning requirements necessary to be deemed a new technology enterprise, or we would have to be unable to meet the existing new technology enterprise requirements. If we did not meet the requirements of a new technology enterprise, we may be subject to enterprise income tax in China at rates up to 33%, which could cause a significant reduction in our after-tax income.

Our subsidiaries and VIEs in China are subject to restrictions on paying dividends or making other payments to our overseas entities.

We are a holding company and do not have any assets or conduct any business operations in China other than our investments in our Chinese subsidiaries and VIEs. As a result, we depend on dividend payments from our subsidiaries in China after they receive payments from our VIEs under various services and other arrangements. It is possible that our Chinese subsidiaries will not continue to receive the payments in accordance with our contracts with our VIEs. To the extent that the VIEs have undistributed after tax net income, we must pay tax on behalf of our employees who hold interests in the VIEs when the VIEs distribute dividends in the future. The current dividend tax rate is 20%. In addition, under PRC law, our subsidiaries are only allowed to pay dividends to us out of their accumulated profits, if any, as determined in accordance with PRC accounting standards and regulations. Moreover, our Chinese subsidiaries are required to set aside at least 10% of their respective accumulated profits, if any, up to 50% of their registered capital to fund certain mandated reserve funds that are not payable or distributable as cash dividends.

The PRC government also imposes controls on the convertibility of RMB into foreign currencies and, in certain cases, the remittance of currencies out of China. We may experience difficulties in completing the administrative procedures necessary to obtain and remit foreign currencies. If we or any of our subsidiaries are unable to receive all of the revenues from our operations through these contractual or dividend arrangements, we may be unable to effectively finance our operations or pay dividends on our shares.

Restrictions on currency exchange may limit our ability to utilize our revenues effectively.

Substantially all of our revenues and operating expenses are denominated in RMB. The RMB is currently freely convertible under the current account, which includes dividends, trade and service related foreign exchange transactions, but not under the capital account, which includes foreign direct investment.

Currently, Beijing ITC or Sohu Era may purchase foreign exchange for settlement of current account transactions, including payment of dividends, without the approval of the State Administration for Foreign Exchange (or SAFE). Beijing ITC or Sohu Era may also retain foreign exchange in its current account (subject to a ceiling approved by the SAFE) to satisfy foreign exchange liabilities or to pay dividends. However, the relevant PRC governmental authorities may limit or eliminate our ability to purchase and retain foreign currencies in the future.

Table of Contents

Since a significant amount of our future revenues will be in the form of RMB, the existing and any future restrictions on currency exchange may limit our ability to utilize revenue generated in RMB to fund our business activities outside China, if any, or expenditures denominated in foreign currencies.

Foreign exchange transactions under the capital account are still subject to limitations and require approvals from the SAFE. This could affect Beijing ITC's or Sohu Era's ability to obtain foreign exchange through debt or equity financing, including by means of loans or capital contributions from us.

We may suffer currency exchange losses if the RMB depreciates relative to the US Dollar.

Our reporting currency is the US Dollar. However, substantially all of our revenues are denominated in RMB. In July 2005, China reformed its exchange rate regime by establishing a managed floating exchange rate regime based on market supply and demand with reference to a basket of currencies. RMB is no longer be pegged to the US dollars and the exchange rate will have some flexibility. Hence, considering the floating exchange rate regime, if the RMB depreciates relative to the US Dollar, our revenues as expressed in our US Dollar financial statements will decline in value. In addition, there are very limited hedging transactions available in China to reduce our exposure to exchange rate fluctuations. While we may decide to enter into hedging transactions in the future, the availability and effectiveness of these hedges may be limited and we may not be able to successfully hedge our exposure, if at all. In addition, our currency exchange losses may be magnified by PRC exchange control regulations that restrict our ability to convert RMB into US Dollars.

The market price of our common stock has been and will likely continue to be volatile. The price of our common stock may fluctuate significantly, which may make it difficult for stockholders to sell shares of our common stock when desired or at attractive prices.

The market price of our common stock has been volatile and is likely to continue to be so. The initial public offering price of our common stock in July 2000 was \$13.00 per share. The trading price of our common stock subsequently dropped to a low of \$0.52 per share on April 9, 2001. During 2004, the trading price of our common stock ranged from a low of \$13.56 per share to a high of \$40.15 per share. During 2005, the trading price of our common stock ranged from a low of \$14.66 per share to a high of \$23.74 per share and during the nine months ended September 30, 2006, the trading price of our common stock ranged from a low of \$18.20 per share to a high of \$29.43 per share. On October 31, 2006, the closing price of our common stock was \$22.84 per share.

In addition, the Nasdaq Stock Market's National Market has from time to time experienced significant price and volume fluctuations that have affected the market prices for the securities of technology companies, and particularly Internet-related companies.

The price for our common stock may fluctuate in response to a number of events and factors, such as quarterly variations in operating results, announcements of technological innovations or new products and media properties by us or our competitors, changes in financial estimates and recommendations by securities analysts, the operating and stock price performance of other companies that investors may deem comparable to us, and news reports relating to trends in our markets or general economic conditions. Additionally, volatility or a lack of positive performance in our stock price may adversely affect our ability to retain key employees, all of whom have been granted stock options or other stock awards.

Table of Contents

We issued \$90.0 million of zero coupon convertible senior notes due July 2023 which we may not be able to repay in cash and could result in dilution of our earnings per share.

In July 2003, we issued \$90 million aggregate principal amount of zero coupon convertible senior notes due July 2023. The notes are convertible into our common stock at a conversion price of \$44.76 per share, subject to adjustment upon the occurrence of specified events, which would result in the issuance of an aggregate of approximately two million shares. Therefore, each \$1,000 principal amount of the notes will initially be convertible into 22.3414 shares of our common stock. Each holder of the notes will have the right, at the holder's option, to require Sohu to repurchase all or any portion of the principal amount of the holder's notes on July 14 in 2007, 2013 and 2018 at a price equal to 100% of the outstanding principal amount. We had early redeemed our zero coupon convertible senior notes with face value of \$30,220,000 from the market in 2005 and 2006. As of September 30, 2006, the face value of outstanding zero coupon convertible senior notes was \$59.8 million. All of the outstanding notes were classified as current liability as of September 30, 2006. We may also be required to repurchase all of the outstanding notes following a fundamental change of Sohu, such as a change of control, prior to maturity. We will continue to repurchase the outstanding notes on an ongoing and opportunistic basis. However, we may not have enough cash on hand or the ability to access cash to pay the notes if presented for redemption on a fundamental change, on a redemption date referred to above or at maturity. In addition, the redemption or purchase of our notes with shares of our common stock or the conversion of the notes into our common stock could result in a reduction of our earnings per share.

We are controlled by a small group of our existing stockholders, whose interests may differ from other stockholders.

Our chief executive officer, Dr. Zhang, beneficially owns approximately 23.4% of the outstanding shares of our common stock and is our largest stockholder. Our chief executive officer, together with our other executive officers and members of our Board of Directors, beneficially own approximately 26.6% of the outstanding shares of our common stock. Accordingly these stockholders acting together will have significant influence in determining the outcome of any corporate transaction or other matter submitted to the stockholders for approval, including mergers, consolidations, the sale of all or substantially all of our assets, election of directors and other significant corporate actions. They will also have significant influence in preventing or causing a change in control. In addition, without the consent of these stockholders, we may be prevented from entering into transactions that could be beneficial to us. The interests of these stockholders may differ from the interests of the other stockholders.

Anti-takeover provisions of the Delaware General Corporation Law, our certificate of incorporation and Sohu's Stockholder Rights Plan could delay or deter a change in control.

Some provisions of our certificate of incorporation and by-laws, as well as various provisions of the Delaware General Corporation Law, may make it more difficult to acquire our company or effect a change in control of our company, even if an acquisition or change in control would be in the interest of our stockholders or if an acquisition or change in control would provide our stockholders with a premium for their shares over then current market prices. For example, our certificate of incorporation provides for the division of the board of directors into two classes with staggered two-year terms and provides that stockholders have no right to take action by written consent and may not call special meetings of stockholders, each of which may make it more difficult for a third party to gain control of our board in connection with, or obtain any necessary stockholder approval for, a proposed acquisition or change in control.

In addition, we have adopted a stockholder rights plan under the terms of which, in general, if a person or group acquires more than 20% of the outstanding shares of common stock, all other Sohu stockholders would have the right to purchase securities from Sohu at a substantial discount to those securities' fair market value, thus causing substantial dilution to the holdings of the person or group which acquires more than 20%. The stockholder rights plan may inhibit a change in control and, therefore, could adversely affect the stockholders' ability to realize a premium over the then-prevailing market price for the common stock in connection with such a transaction.

Table of Contents

The power of our Board of Directors to designate and issue shares of preferred stock could have an adverse effect on holders of our common stock.

Our certificate of incorporation authorizes our board of directors to designate and issue one or more series of preferred stock, having rights and preferences as the board may determine, and any such designations and issuances could have an adverse effect on the rights of holders of common stock.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISKS

FOREIGN CURRENCY EXCHANGE RATE RISK

While our reporting currency is the US dollar, to date the majority of our revenues and costs are denominated in RMB and a significant portion of our assets and liabilities are denominated in RMB. As a result, we are exposed to foreign exchange risk as our revenues and results of operations may be affected by fluctuations in the exchange rate between US Dollar and RMB. If the RMB depreciates against the US Dollar, the value of our RMB revenues and assets as expressed in our US Dollar financial statements will decline. We do not hold any derivative or other financial instruments that expose us to substantial market risk. See Risk Factors We may suffer currency exchange losses if the RMB depreciates relative to the US Dollar.

The RMB is currently freely convertible under the current account, which includes dividends, trade and service-related foreign exchange transactions, but not under the capital account, which includes foreign direct investment. In addition, commencing on July 21, 2005, China reformed its exchange rate regime by changing to a managed floating exchange rate regime based on market supply and demand with reference to a basket of currencies. Under the managed floating exchange rate regime, the RMB is no longer pegged to the US Dollar. The exchange rate of the RMB against the US Dollar was adjusted to RMB 8.11 per US Dollar as of July 21, 2005, representing an appreciation of about 2%. The People's Bank of China will announce the closing prices of foreign currencies such as the US Dollar traded against the RMB in the inter-bank foreign exchange market after the closing of the market on each business day, and will make such prices the central parity for trading against the RMB on the following business day. To date, we have not entered into any hedging transactions in an effort to reduce our exposure to foreign currency exchange risk. While we may decide to enter into hedging transactions in the future, the effectiveness of these hedges may be limited and we may not be able to successfully hedge our exposure. Accordingly, we may incur economic losses in the future due to foreign exchange rate fluctuations, which could have a negative impact on our financial condition and results of operations.

Table of Contents

The following table provides information, by maturity date, regarding our foreign currency sensitive financial instruments, which consist of cash and cash equivalents, restricted cash, receivables, investments in marketable debt securities, payables and zero coupon convertible senior notes as of September 30, 2006:

	Expected Maturity Date						Total recorded Value	Fair value
	Before September 30,							
	2007	2008	2009	2010	2011	Thereafter		
On-balance sheet financial instruments								
(in US\$ 000)	2007	2008	2009	2010	2011	Thereafter	Total recorded Value	Fair value
Cash and cash equivalents								
in US\$	39,213						39,213	39,213
in RMB	66,603						66,603	66,603
in HK\$	203						203	203
Sub-total	106,019						106,019	106,019
Restricted cash
