Item 2.01 Completion of Acquisition or Disposition of Assets

On October 1, 2014, Neogen Corporation (Company) issued a press release announcing that, effective Sept. 30, it had acquired all the outstanding stock of BioLumix, Inc., an Ann Arbor, Mich.-based manufacturer and marketer of automated systems for the detection of microbial contaminants.

The BioLumix business will be consolidated with Neogen's closely related Soleris® technology, which is widely used for the detection of spoilage organisms in several food industries, as well as the nutraceutical market. The Soleris system was the first in the industry used for the detection of microbial contamination based upon an innovative application of well-accepted classical microbiology. Revenues for BioLumix have fluctuated between \$3-\$5 million in the past few years. The business will be integrated into the Company's Food Safety segment.

A copy of the press release is attached as Exhibit 99.1 to this report. This Form 8-K and the attached exhibit shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, and are not incorporated by reference into any filing of the Registrant, whether made before or after the date of this report, regardless of any general incorporation language in the filing.
