Financial Information

Management's Discussion and Analysis of Financial Condition and Results of Operations

Introduction

Morgan Stanley, a financial holding company, is a global financial services firm that maintains significant market positions in each of its business segments Institutional Securities, Wealth Management and Investment Management. Morgan Stanley, through its subsidiaries and affiliates, provides a wide variety of products and services to a large and diversified group of clients and customers, including corporations, governments, financial institutions and individuals. Unless the context otherwise requires, the terms Morgan Stanley, Firm, us, we, or our mean Morgan Stanley Parent Company) together with its consolidated subsidiaries.

A description of the clients and principal products and services of each of our business segments is as follows:

Institutional Securities provides investment banking, sales and trading, lending and other services to corporations, governments, financial institutions, and high to ultra-high net worth clients. Investment banking services consist of capital raising and financial advisory services, including services relating to the underwriting of debt, equity and other securities, as well as advice on mergers and acquisitions, restructurings, real estate and project finance. Sales and trading services include sales, financing and market-making activities in equity and fixed income products, including prime brokerage services, global macro, credit and commodities products. Lending services include originating and/or purchasing corporate loans, commercial and residential mortgage lending, asset-backed lending, financing extended to equities and commodities customers, and loans to municipalities. Other services include investment and research activities.

Wealth Management provides a comprehensive array of financial services and solutions to individual investors and small to medium-sized businesses/institutions covering

brokerage and investment advisory services, financial and wealth planning services, annuity and insurance products, credit and other lending products, banking and retirement plan services.

Investment Management provides a broad range of investment strategies and products that span geographies, asset classes, and public and private markets to a diverse group of clients across institutional and intermediary channels. Strategies and products include equity, fixed income, liquidity and alternative/other products. Institutional clients include defined benefit/defined contribution plans, foundations, endowments, government entities, sovereign wealth funds, insurance companies, third-party fund sponsors and corporations. Individual clients are serviced through intermediaries, including affiliated and non-affiliated distributors.

The results of operations in the past have been, and in the future may continue to be, materially affected by competition; risk factors; and legislative, legal and regulatory developments; as well as other factors. These factors also may have an adverse impact on our ability to achieve our strategic objectives. Additionally, the discussion of our results of operations herein may contain forward-looking statements. These statements, which reflect management's beliefs and expectations, are subject to risks and uncertainties that may cause actual results to differ materially. For a

Edgar Filing: MORGAN STANLEY - Form 10-Q

discussion of the risks and uncertainties that may affect our future results, see Forward-Looking Statements immediately preceding Part I, Item 1, Business Competition and Business Supervision and Regulation in Part I, Item 1 Risk Factors in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2016 (the 2016 Form 10-K) and Liquidity and Capital Resources Regulatory Requirements herein.

Management's Discussion and Analysis

Executive Summary

Overview of Financial Results

Consolidated Results

Net Revenues

(\$ in millions)

Net Income Applicable to Morgan Stanley

(\$ in millions)

Earnings per Common Share¹

1. For the calculation of basic and diluted earnings per common share, see Note 15 to the consolidated financial statements.

We reported net revenues of \$9,503 million in the three months ended June 30, 2017 (current quarter, or 2Q 2017), compared with \$8,909 million in the three months ended June 30, 2016 (prior year quarter, or 2Q 2016). For the current quarter, net income applicable to Morgan Stanley was \$1,757 million, or \$0.87 per diluted common share, compared with \$1,582 million, or \$0.75 per diluted common share, in the prior year quarter.

We reported net revenues of \$19,248 million in the six months ended June 30, 2017 (current year period, or YTD 2017), compared with \$16,701 million in the six months ended June 30, 2016 (prior year period, or YTD 2016). For the current year period, net income applicable to Morgan Stanley was \$3,687 million, or \$1.87 per diluted common share, compared with income of \$2,716 million, or \$1.30 per diluted common share in the prior year period.

Non-interest Expenses

(\$ in millions)

Compensation and benefits expenses of \$4,252 million in the current quarter and \$8,718 million in the current year period increased 6% and 13%, respectively, from \$4,015 million in the prior year quarter and \$7,698 million in the prior year period, primarily due to increases in incentive compensation driven mainly by higher revenues and

Table of Contents

Management's Discussion and Analysis

the fair value of investments to which certain deferred compensation plans are referenced.

Non-compensation expenses were \$2,609 million in the current quarter and \$5,080 million in the current year period compared with \$2,411 million in the prior year quarter and \$4,782 million in the prior year period, representing an 8% and a 6% increase, respectively. These increases were primarily as a result of higher Brokerage, clearing and exchange fees expense and other volume-driven expenses and a provision related to a United Kingdom (U.K.) indirect tax (i.e. value-added tax or VAT) matter. In addition to these drivers, non-compensation expenses increased in the current year period due to higher litigation costs. For further discussion of the U.K. VAT matter, see Institutional Securities Investments, Other Revenues, Non-interest Expenses and Other Items Other Items herein.

Expense Efficiency Ratio

The expense efficiency ratio was 72.2% in the current quarter and 71.7% in the current year period. The expense efficiency ratio was 72.1% in the prior year quarter and 74.7% in the prior year period (see Selected Non-Generally Accepted Accounting Principles (Non-GAAP) Financial Information herein).

Return on Average Common Equity

The annualized return on average common equity (ROE) was 9.1% in the current quarter and 9.9% in the current year period. The annualized ROE was 8.3% in the prior year quarter and 7.2% in the prior year period (see Selected Non-Generally Accepted Accounting Principles (Non-GAAP) Financial Information herein).

Business Segment Results

Net Revenues by Segment^{1, 2}

(\$ in millions)

Table of Contents

Management's Discussion and Analysis

Net Income Applicable to Morgan Stanley by Segment^{2, 3}

(\$ in millions)

1. The total amount of Net Revenues by Segment also includes intersegment eliminations of \$(75) million and \$(63) million in the current quarter and prior year quarter, respectively, and \$(149) million and \$(130) million in the current year period and prior year period, respectively.
2. The percentages on the sides of the charts represent the contribution of each business segment to the total. Amounts do not necessarily total to 100% due to intersegment eliminations, where applicable.
3. The total amount of Net Income Applicable to Morgan Stanley by Segment also includes intersegment eliminations of \$2 million in the current year period.

Institutional Securities net revenues of \$4,762 million in the current quarter and \$9,914 million in the current year period increased 4% from the prior year quarter and increased 20% from the prior year period. The current quarter results primarily reflected higher revenues from underwriting and strength in equity sales and trading. The current year period results primarily reflected higher revenues from fixed income sales and trading and underwriting.

Wealth Management net revenues of \$4,151 million in the current quarter and \$8,209 million in the current year period increased 9% from the prior year quarter and increased 10% from the prior year period. The current quarter and the current year period results reflected growth in asset management fee revenues and Net interest income. In addition to these drivers, the current year period results reflected higher transactional revenues.

Investment Management net revenues of \$665 million in the current quarter and \$1,274 million in the current year period increased 14% from the prior year quarter and increased 20% from the prior year period. The current quarter results primarily reflected higher investment gains and carried interest and growth in asset management fee revenues. Current year period results primarily reflected investment gains compared with losses in the prior year period and positive carried interest in the current year period.

Net Revenues by Region¹

(\$ in millions)

EMEA Europe, Middle East and Africa

1. For a discussion of how the geographic breakdown for net revenues is determined, see Note 21 to the consolidated financial statements in Item 8 of the 2016 Form 10-K.

5. Book value per common share equals common shareholders' equity divided by common shares outstanding.

Selected Non-Generally Accepted Accounting Principles (Non-GAAP) Financial Information

We prepare our consolidated financial statements using accounting principles generally accepted in the United States of America (U.S. GAAP). From time to time, we may disclose certain non-GAAP financial measures in this document, or in the course of our earnings releases, earnings and other conference calls, financial presentations, Definitive Proxy Statement and otherwise. A non-GAAP financial measure excludes, or includes, amounts from the most directly comparable measure calculated and presented in accordance with U.S. GAAP. We consider the non-GAAP financial measures we disclose to be useful to us, investors and analysts by providing further transparency about, or an alternate means of assessing, our financial condition, operating results, prospective regulatory capital requirements, or capital adequacy. These measures are not in accordance with, or a substitute for, U.S. GAAP and may be different from or inconsistent with non-GAAP financial measures used by other companies. Whenever we refer to a non-GAAP financial measure, we will also generally define it or present the most directly comparable financial measure calculated and presented in accordance with U.S. GAAP, along with a reconciliation of the differences between the U.S. GAAP financial measure and the non-GAAP financial measure.

The principal non-GAAP financial measures presented in this document are set forth below.

Non-GAAP Financial Measures by Business Segment

Management's Discussion and Analysis

Reconciliations from U.S. GAAP to Non-GAAP Consolidated Financial Measures

	Three Months Ended June 30,		Six Months Ended June 30,	
<i>\$ in millions, except per share data</i>	2017	2016	2017	2016
Net income applicable to Morgan Stanley				
U.S. GAAP	\$ 1,757	\$ 1,582	\$ 3,687	\$ 2,716
Impact of discrete tax provision ³	4		18	
Net income applicable to Morgan Stanley, excluding discrete tax provision non-GAAP	\$ 1,761	\$ 1,582	\$ 3,705	\$ 2,716
Earnings per diluted common share				
U.S. GAAP	\$ 0.87	\$ 0.75	\$ 1.87	\$ 1.30
Impact of discrete tax provision ³			0.01	
Earnings per diluted common share, excluding discrete tax provision non-GAAP	\$ 0.87	\$ 0.75	\$ 1.88	\$ 1.30
Effective income tax rate				
U.S. GAAP	32.0%	33.5%	30.5%	33.4%
Impact of discrete tax provision ³	(0.1)%		(0.4)%	
Effective income tax rate from continuing operations, excluding discrete tax provision non-GAAP	31.9%	33.5%	30.1%	33.4%

1. Pre-tax profit margin represents income from continuing operations before income taxes as a percentage of net revenues.
2. Average common equity for each business segment is determined at the beginning of each year using our Required Capital framework, an internal capital adequacy measure (see Liquidity and Capital Resources Regulatory Requirements Attribution of Average Common Equity According to the Required Capital Framework herein) and will remain fixed throughout the year until the next annual reset. Each business segment's return on average common equity equals annualized net income applicable to Morgan Stanley less an allocation of preferred dividends as a percentage of average common equity for that segment. Consolidated return on average common equity equals annualized consolidated net income applicable to Morgan Stanley less preferred dividends as a percentage of average common equity.
- 3.

Beginning in 2017, with the adoption of the accounting update *Improvements to Employee Share-Based Payment Accounting*, the income tax consequences related to share-based payments are required to be recognized in Provision for income taxes in the consolidated income statements upon the conversion of employee share-based awards, which primarily occur in the first quarter of each year. The impact of the income tax consequences upon conversion of the awards may be either a benefit or a provision and is treated as a discrete item. The non-GAAP financial measures for net income applicable to Morgan Stanley, earnings per diluted common share and effective income tax rate above exclude discrete tax provisions other than income tax consequences arising from conversion activity as we anticipate conversion activity each quarter. See Note 2 to the consolidated financial statements for information on the adoption of the accounting update *Improvements to Employee Share-Based Payment Accounting*. For further information on the discrete tax provision, see Supplemental Financial Information and Disclosures Income Tax Matters herein.

Consolidated Non-GAAP Financial Measures

Unadjusted	9.1%	8.3%	9.9%	7.2%
Excluding DVA	9.0%	8.3%	9.8%	7.2%
Excluding DVA and discrete tax provision (benefit)	9.0%	8.3%	9.8%	7.2%
Average tangible common equity^{1, 2, 3, 6}				
Unadjusted	\$ 60.7	\$ 59.5	\$ 60.2	\$ 59.1
Excluding DVA	61.3	59.6	60.8	59.2
Excluding DVA and discrete tax provision (benefit)	61.3	59.6	60.8	59.2
Return on average tangible common equity^{1, 2, 5}				
Unadjusted	10.4%	9.6%	11.4%	8.4%
Excluding DVA	10.3%	9.6%	11.3%	8.4%
Excluding DVA and discrete tax provision (benefit)	10.4%	9.6%	11.3%	8.4%
Expense efficiency ratio⁷	72.2%	72.1%	71.7%	74.7%

	At June 30, 2017	At December 31, 2016
Tangible book value per common share ⁶	\$ 33.24	\$ 31.98

DVA Debt valuation adjustment represents the change in the fair value resulting from fluctuations in our credit spreads and other credit factors related to liabilities carried at fair value under the fair value option, primarily certain Long-term and Short-term borrowings.

1. When excluding DVA, it is only excluded from the denominator. When excluding the discrete tax provision (benefit), both the numerator and denominator are adjusted to exclude that item.
2. Beginning in 2017, with the adoption of the accounting update *Improvements to Employee Share-Based Payment Accounting*, the income tax consequences related to share-based payments are required to be recognized in Provision for income taxes in the consolidated income statements upon the conversion of employee share-based awards, which primarily occur in the first quarter of each year. The impact of the income tax consequences upon conversion of the awards may be either a benefit or a provision and is treated as a discrete item. When excluding discrete tax provision (benefit) from average common equity, return on average common equity, average tangible common equity and return on average tangible common equity above only discrete tax provisions (benefits) other than income tax consequences arising from conversion activity are excluded as we anticipate conversion activity each quarter. See Note 2 to the consolidated financial statements for information on the adoption of the accounting update *Improvements to Employee Share-Based Payment Accounting*.
3. The impact of DVA on average common equity and average tangible common equity was approximately \$(612) million and \$(106) million in the current quarter and prior year quarter, respectively. The impact of DVA on average common equity and average tangible common equity was approximately \$(599) million and \$(128) million in the current year period and prior year period, respectively.
4. The calculation used in determining the Firm's ROE Target is return on average common equity excluding DVA and discrete tax items as set forth above.
5. Return on average common equity equals annualized consolidated net income applicable to Morgan Stanley less preferred dividends as a percentage of average common equity. Return on average tangible common equity equals annualized net income applicable to Morgan Stanley less preferred dividends as a percentage of average tangible common equity.

Table of Contents

Management's Discussion and Analysis

6. For a discussion of tangible common equity, see *Liquidity and Capital Resources* *Tangible Equity* herein. Tangible book value per common share equals tangible common equity divided by common shares outstanding.

7. The expense efficiency ratio represents total non-interest expenses as a percentage of net revenues.

Return on Equity Target

We have an ROE Target of 9% to 11% to be achieved by 2017. Our ROE Target and the related strategies and goals are forward-looking statements that may be materially affected by many factors, including, among other things: macroeconomic and market conditions; legislative and regulatory developments; industry trading and investment banking volumes; equity market levels; interest rate environment; legal expenses and the ability to reduce expenses in general; capital levels; and discrete tax items. For further information on our ROE Target and related assumptions, see *Management's Discussion and Analysis of Financial Condition and Results of Operations* *Executive Summary* *Return on Equity Target* in Part II, Item 7 of the 2016 Form 10-K.

Business Segments

Substantially all of our operating revenues and operating expenses are directly attributable to the business segments. Certain revenues and expenses have been allocated to each business segment, generally in proportion to its respective net revenues, non-interest expenses or other relevant measures.

As a result of treating certain intersegment transactions as transactions with external parties, we include an Intersegment Eliminations category to reconcile the business segment results to our consolidated results.

Net Revenues, Compensation Expense and Income Taxes

For discussions of our net revenues, see *Management's Discussion and Analysis of Financial Condition and Results of Operations* *Business Segments* *Net Revenues* and *Management's Discussion and Analysis of Financial Condition and Results of Operations* *Business Segments* *Net Revenues by Segment* in Part II, Item 7 of the 2016 Form 10-K. For a discussion of our compensation expense, see *Management's Discussion and Analysis of Financial Condition and Results of Operations* *Business Segments* *Compensation Expense* in Part II, Item 7 of the 2016 Form 10-K. Investment Banking Volumes

<i>\$ in billions</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2017 ¹	2016 ¹	2017 ¹	2016 ¹
Completed mergers and acquisitions ²	\$ 205	\$ 241	\$ 356	\$ 538
Equity and equity-related offerings ³	20	14	30	21
Fixed income offerings ⁴	67	62	142	113

1. Source: Thomson Reuters, data at July 12, 2017. Completed mergers and acquisitions volumes are based on full credit to each of the advisors in a transaction. Equity and equity-related offerings and fixed income offerings are based on full credit for single book managers and equal credit for joint book managers. Transaction volumes may

not be indicative of net revenues in a given period. In addition, transaction volumes for prior periods may vary from amounts previously reported due to the subsequent withdrawal or change in the value of a transaction.

2. Amounts include transactions of \$100 million or more.

3. Amounts include Rule 144A issuances and registered public offerings of common stock and convertible securities and rights offerings.

4. Amounts include non-convertible preferred stock, mortgage-backed and asset-backed securities, and taxable municipal debt. Amounts include publicly registered and Rule 144A issuances. Amounts exclude leveraged loans and self-led issuances.

Investment banking revenues are composed of fees from advisory services and revenues from the underwriting of securities offerings and syndication of loans, net of syndication expenses.

Investment banking revenues of \$1,413 million in the current quarter and \$2,830 million in the current year period increased 28% and 35% from the comparable prior year periods. The increase in the current quarter primarily reflected higher underwriting revenues. The increase in the current year period was due to higher underwriting revenues, partially offset by lower advisory revenues.

Advisory revenues were relatively unchanged in the current quarter and decreased in the current year period reflecting the lower volumes of completed merger, acquisition and restructuring transactions (see Investment Banking Volumes table), offset by the positive impact of higher fee realizations.

Equity underwriting revenues increased in the current quarter and current year period as a result of higher global market volumes in both follow-on and initial public offerings (see Investment Banking Volumes table). In the current year period, equity underwriting revenues also increased as a result of higher fee realizations. Fixed income underwriting revenues increased in the current quarter and current year period primarily due to higher non-investment grade loan fees and bond fees.

Sales and Trading Activities Equity and Fixed Income

Following is a description of the sales and trading activities within our equities and fixed income businesses as well as how their results impact the income statement line items, followed by a presentation and explanation of results.

Equities Financing. We provide financing and prime brokerage services to our clients active in the equity markets through a variety of products including margin lending, securities lending and swaps. Results from this business are largely driven by the difference between financing income earned and financing costs incurred, which are reflected in Net interest for securities and equity lending products and in Trading revenues for derivative products.

Equities Execution services. We make markets for our clients in equity-related securities and derivative products, including providing liquidity and hedging products. A significant portion of the results for this business is generated by commissions and fees from executing and clearing client transactions on major stock and derivative exchanges as well as from over-the-counter (OTC) transactions. Market-making also generates gains and losses on inventory, which are reflected in Trading revenues.

Fixed income Within fixed income we make markets in order to facilitate client activity as part of the following products and services.

Global macro products. We make markets for our clients in interest rate, foreign exchange and emerging market products, including exchange-traded and OTC securities, loans and derivative instruments. The results of this market-making activity are primarily driven by gains and losses from buying and selling positions to stand ready for and satisfy client demand, and are recorded in Trading revenues.

Credit products. We make markets in credit-sensitive products, such as corporate bonds and mortgage securities and other securitized products, and related derivative instruments. The values of positions in this business are sensitive to changes in credit spreads and interest rates, which result in gains and losses reflected in Trading revenues. Due to the amount and type of the interest-bearing securities and loans making up this business, a significant portion of the results is also reflected in Net interest revenues.

Commodities products and Other. We make markets in various commodity products related primarily to electricity, natural gas, oil, and precious metals, with the results primarily reflected in Trading revenues. Other activities include the results from the centralized management of our fixed income derivative counterparty exposures, which are primarily recorded in Trading revenues.

2. Funding costs are allocated to the businesses based on funding usage and are included in Net interest.

Table of Contents

Management's Discussion and Analysis

We manage each of the sales and trading businesses based on its aggregate net revenues, which are comprised of the consolidated income statement line items quantified in the previous table. Trading revenues are affected by a variety of market dynamics, including volumes, bid-offer spreads, and inventory prices, as well as impacts from hedging activity, which are interrelated. We provide qualitative commentary in the discussion of results that follow on the key drivers of period over period variances, as the quantitative impact of the various market dynamics typically cannot be disaggregated.

For additional information on total Trading revenues, see the table "Trading Revenues by Product Type" in Note 4 to the consolidated financial statements.

Sales and Trading Net Revenues during the Current Quarter

Equity

Equity sales and trading net revenues of \$2,155 million in the current quarter were relatively unchanged from the prior year quarter, reflecting higher results in execution services, offset by lower results in our financing business.

Financing revenues decreased 2% from the prior year quarter as Net interest revenues declined from higher net interest costs, reflecting increased liquidity requirements and an increased proportion of lower spread transactions, partially offset by higher client activity in equity swaps reflected in Trading.

Execution services increased 3% from the prior year quarter primarily reflecting higher revenues from derivative products and improved commissions and fees driven by increased client activity, partially offset by higher net interest costs.

Fixed Income

Fixed income net revenues of \$1,239 million in the current quarter were 4% lower than the prior year quarter, driven by a decrease in Net interest revenues across all three product areas, partially offset by an increase in Trading revenues.

Credit products decreased due to a lower level of interest realized in securitized products and tighter bid-offer spreads in the current quarter.

Global macro products decreased due to higher interest costs in the current quarter which resulted from interest rate products inventory management. This was partially offset by improved performance in foreign exchange and emerging markets trading activity principally due to specific market events.

Commodities products and Other increased due to the absence of losses from counterparty risk management incurred in the prior year quarter, partially offset by a decrease in Commodities structured transactions.

Sales and Trading Net Revenues during the Current Year Period

Equity

Equity sales and trading net revenues of \$4,171 million in the current year period were relatively unchanged from the prior year period, reflecting lower results in our financing business, offset by higher results in execution services.

Financing revenues decreased 10% from the prior year period as Net interest revenues declined from higher net interest costs, reflecting increased liquidity requirements and an increased proportion of lower spread transactions, partially offset by higher client activity in equity swaps reflected in Trading.

Execution services increased 8% from the prior year period primarily reflecting improved results in Trading revenues compared with the prior year period when increased volatility resulted in inventory losses.

Fixed Income

Fixed income net revenues of \$2,953 million in the current year period were 36% higher than the prior year period, driven by an increase in Trading revenues, partially offset by a decline in Net interest revenues.

Credit products increased due to the absence of inventory losses driven by a widening spread environment in the prior year period. This was partially offset by a lower level of interest realized in securitized products in the current year period.

Global macro products increased due to a more favorable environment across products compared with the prior year period when results were impacted by inventory losses. This was partially offset by higher interest costs in the current year period which resulted from interest rate products inventory management.

Commodities products and Other increased due to improved energy trading and the absence of losses from counterparty risk management incurred in the prior year period.

Table of Contents

Management's Discussion and Analysis

Investments, Other Revenues, Non-interest Expenses and Other Items

Investments

Net investment gains of \$37 million in the current quarter decreased from the prior year quarter primarily as a result of lower gains on equities business related investments.

Net investment gains of \$103 million in the current year period decreased from the prior year period primarily reflecting lower gains on business related investments, partially offset by gains on investments associated with our compensation plans compared with losses in the prior year period.

Other

Other revenues of \$126 million in the current quarter were relatively unchanged from the prior year quarter. Other revenues of \$299 million in the current year period increased from the prior year period primarily reflecting mark-to-market gains on loans held for sale in the current year period compared with mark-to-market losses in the prior year period and a decrease in the provision on loans held for investment.

Non-interest Expenses

Non-interest expenses of \$3,319 million in the current quarter increased from the comparable prior year period primarily reflecting a 3% increase in Compensation and benefits expenses and a 14% increase in Non-compensation expenses. Non-interest expenses of \$6,741 million in the current year period reflect an 18% increase in Compensation and benefits expenses and a 12% increase in Non-compensation expenses.

Compensation and benefits expenses increased in the current quarter and current year period primarily due to increases in discretionary incentive compensation driven mainly by higher revenues and the fair value of investments to which certain deferred compensation plans are referenced.

Non-compensation expenses increased in the current quarter and current year period primarily due to higher Brokerage, clearing and exchange fees expense and other volume-driven expenses and a provision related to the U.K. VAT matter (see Other Items below). In addition to these drivers, non-compensation expenses increased in the current year period due to higher litigation costs.

Other Items

The Firm self-identified an issue regarding VAT on intercompany services provided by certain overseas affiliates to our U.K. Group. The Firm is reviewing the reporting of U.K. VAT as additional support service centers were added to our operations over the years, and the focus and nature of their intended services shifted among geographic locations. During the current quarter, we have recorded a provision of \$86 million that incorporates potential additional VAT, interest and penalties for this exposure. We are actively working with Her Majesty's Revenue and Customs to resolve this matter. The provision reflected is based on currently available information and analyses, and our review of this

matter is continuing.

1. Effective July 1, 2016, the Institutional Securities and Wealth Management business segments entered into an agreement, whereby Institutional Securities assumed management of Wealth Management's fixed income client-driven trading activities and employees. Institutional Securities now pays fees to Wealth Management based on distribution activity (collectively, the Fixed Income Integration). Prior periods have not been recast for this new intersegment agreement due to immateriality.

Management's Discussion and Analysis

Transactional Revenues

<i>\$ in millions</i>	Three Months Ended June 30,		% Change
	2017	2016	
Investment banking	\$ 135	\$ 123	10%
Trading	207	252	(18)%
Commissions and fees	424	423	%
Total	\$ 766	\$ 798	(4)%

<i>\$ in millions</i>	Six Months Ended June 30,		% Change
	2017	2016	
Investment banking	\$ 280	\$ 244	15%
Trading	445	446	%
Commissions and fees	864	835	3%
Total	\$ 1,589	\$ 1,525	4%

Net Revenues

Transactional Revenues

Transactional revenues of \$766 million in the current quarter decreased 4% from the prior year quarter primarily reflecting lower Trading revenues, partially offset by higher Investment banking revenues.

Transactional revenues of \$1,589 million in the current year period increased 4% from the prior year period primarily reflecting higher revenues in Investment banking and Commissions and fees.

Investment banking revenues increased in the current quarter primarily due to higher revenues from structured products and equity syndicate activities, partially offset by lower fixed income revenues as a result of the Fixed Income Integration and lower preferred stock underwriting activity. The increase in the current year period was due to higher revenues from structured products and equity syndicate activities, partially offset by lower preferred stock underwriting activity.

Trading revenues decreased in the current quarter primarily due to the Fixed Income Integration, partially offset by gains related to investments associated with certain employee deferred compensation plans. Trading revenues in the current year period were relatively unchanged as lower revenues related to the Fixed Income Integration were largely offset by gains related to investments associated with certain employee deferred compensation plans.

Commissions and fees were relatively unchanged in the current quarter. Commissions and fees increased in the current year period primarily due to the Fixed Income Integration and to higher equities activity, partially offset by lower annuity product revenues.

Asset Management

Asset management, distribution and administration fees of \$2,302 million in the current quarter and \$4,486 million in the current year period increased 11% from the prior year quarter and increased 8% from the prior year period. The increase in each respective period is primarily due to market appreciation and net positive flows, partially offset by lower average client fee rates. See Fee-Based Client Assets Activity and Average Fee Rate by Account Type herein.

Net Interest

Net interest of \$1,009 million in the current quarter and \$2,003 million in the current year period increased 22% and 21%, respectively, from the comparable prior year periods primarily due to higher interest rates and higher loan balances, partially offset by lower investment portfolio balances.

Other

Other revenues of \$73 million in the current quarter and \$129 million in the current year period decreased 28% and 19%, respectively, from the comparable prior year periods, due to lower realized gains from the available for sale (AFS) securities portfolio.

Non-interest Expenses

Non-interest expenses of \$3,094 million in the current quarter and \$6,179 million in the current year period increased 5% and 6%, respectively, from the comparable prior year periods.

Compensation and benefits expenses in the current quarter and current year period increased primarily due to higher revenues and increases in the fair value of investments to which certain deferred compensation plans are referenced.

Non-compensation expenses were relatively unchanged in the current quarter. Non-compensation expenses decreased in the current year period primarily due to lower litigation and information processing costs, partially offset by higher deposit insurance expenses.

bps Basis points

1. Certain data enhancements made in the first quarter of 2017 resulted in a modification to the Fee Rate calculations. Prior periods have been restated to reflect the revised calculations.
2. Includes non-custody account values reflecting prior quarter-end balances due to a lag in the reporting of asset values by third-party custodians.
3. A shift in client assets of approximately \$66 billion in the fourth quarter of 2016 from separately managed accounts to unified managed accounts resulted in a lower average fee rate for those platforms but did not impact the average fee rate for total fee-based client assets.

Net Revenues

Investments

Investments gains of \$125 million in the current quarter compared with Investment gains of \$50 million in the prior quarter reflected higher realized gains and higher carried interest in Infrastructure and Private Equity investments.

Investments gains of \$223 million in the current year period reflected gains and positive carried interest in all Alternative/Other products. Investments losses in the prior year period reflected losses and the reversal of previously accrued carried interest in certain Private Equity and Real Estate investments.

Asset Management, Distribution and Administration Fees

Asset management, distribution and administration fees of \$539 million increased 4% in the current quarter compared to the prior year quarter primarily as a result of higher average assets under management or supervision (AUM) in Equity and Fixed income products, with higher performance fees, partially offset by lower fee rates in Liquidity products and Alternative/Other products.

Asset management, distribution and administration fees of \$1,056 million were relatively unchanged in the current year period, reflecting higher average AUM in Equity and Fixed income products, essentially offset by lower fee rates in Alternative/Other products.

See AUM and Average Fee Rate by Asset Class herein.

Non-interest Expenses

Non-interest expenses of \$523 million in the current quarter and \$1,029 million in the current year period increased 12% and 15% from the comparable periods primarily due to higher Compensation and benefit expenses.

Compensation and benefits expenses increased in the current quarter and current year period principally due to an increase in deferred compensation associated with carried interest.

Edgar Filing: MORGAN STANLEY - Form 10-Q

Non-compensation expenses increased in the current quarter and current year period primarily due to higher brokerage, clearing and exchange fees, partially offset by lower professional service fees.

Table of Contents**Management's Discussion and Analysis****Supplemental Financial Information and Disclosures****U.S. Bank Subsidiaries**

We provide loans to a variety of customers, from large corporate and institutional clients to high net worth individuals, primarily through our U.S. bank subsidiaries, Morgan Stanley Bank, N.A. (MSBNA) and Morgan Stanley Private Bank, National Association (MSPBNA) (collectively, U.S. Bank Subsidiaries). The lending activities in the Institutional Securities business segment primarily include loans or lending commitments to corporate clients. The lending activities in the Wealth Management business segment primarily include securities-based lending that allows clients to borrow money against the value of qualifying securities and also include residential real estate loans. We expect our lending activities to continue to grow through further market penetration of the Wealth Management business segment's client base. For a further discussion of our credit risks, see Quantitative and Qualitative Disclosures about Market Risk Risk Management Credit Risk. For further discussion about loans and lending commitments, see Notes 7 and 11 to the consolidated financial statements.

HTM Held to maturity

1. Other loans primarily include tailored lending.

AFS Investment securities in our U.S. Bank Subsidiaries decreased as of June 30, 2017 as compared with December 31, 2016 primarily as a result of sales of securities to fund changes in our liquidity profile including deposit outflows, growth in loans and growth in HTM securities.

Income Tax Matters**Effective Tax Rate**

	Three Months Ended June 30,		Six Months Ended June 30,	
	2017	2016	2017	2016
From continuing operations	32.0%	33.5%	30.5%	33.4%

The effective tax rate for the current year period includes net discrete tax benefits of \$110 million, primarily resulting from a \$128 million recurring-type benefit in the current year period associated with the adoption of new accounting guidance related to employee share-based payments. See Note 2 to the consolidated financial statements for information on the adoption of the accounting update *Improvements to Employee Share-Based Payment Accounting*.

Accounting Development Updates

The Financial Accounting Standards Board issued accounting updates that apply to us but are not yet effective for the Firm.

Accounting updates not listed below were assessed and determined to be either not applicable or are not expected to have a significant impact on our consolidated financial statements.

The following accounting updates are currently being evaluated to determine the potential impact of adoption:

Revenue from Contracts with Customers. This accounting update aims to clarify the principles of revenue recognition, to develop a common revenue recognition standard across all industries for U.S. GAAP and to provide enhanced disclosures for users of the financial statements. The core principle of this guidance is that an entity should recognize revenues to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. We will adopt the guidance on January 1, 2018 and expect to apply the modified retrospective method of adoption.

We expect this accounting update to potentially change the timing and presentation of certain revenues, as well as the timing and presentation of certain related costs for Investment banking fees and Asset management, distribution and administration fees. Subject to the resolution of certain industry interpretations, these changes are not expected to be significant.

The recognition of performance fees from fund management activities in the form of carried interest that are subject to reversal is expected to remain essentially unchanged. We expect to apply the equity method of accounting to such carried interest, thus excluding them from the scope of this standard.

Table of Contents

Management's Discussion and Analysis

We will continue to assess the impact of the new standard as we progress through the implementation process and as industry interpretations are resolved; therefore, additional impacts may be identified prior to adoption.

Leases. This accounting update requires lessees to recognize on the balance sheet all leases with terms exceeding one year, which results in the recognition of a right of use asset and corresponding lease liability, including for those leases that we currently classify as operating leases. The right of use asset and lease liability will initially be measured using the present value of the remaining rental payments. The accounting for leases where we are the lessor is largely unchanged. This update is effective as of January 1, 2019.

Financial Instruments Credit Losses. This accounting update impacts the impairment model for certain financial assets measured at amortized cost such as loans held for investment and HTM securities. The amendments in this update will accelerate the recognition of credit losses by replacing the incurred loss impairment methodology with a current expected credit loss (CECL) methodology that requires an estimate of expected credit losses over the entire life of the financial asset. Additionally, although the CECL methodology will not apply to AFS debt securities, the update will require establishment of an allowance to reflect impairment of these securities, thereby eliminating the concept of a permanent write-down. This update is effective as of January 1, 2020.

Critical Accounting Policies

Our consolidated financial statements are prepared in accordance with U.S. GAAP, which requires us to make estimates and assumptions (see Note 1 to the consolidated financial statements). We believe that of our significant accounting policies (see Note 2 to the consolidated financial statements in Item 8 of the 2016 Form 10-K and Note 2 to the consolidated financial statements), the fair value, goodwill and intangible assets, legal and regulatory contingencies and income taxes policies involve a higher degree of judgment and complexity. For a further discussion about our critical accounting policies, see Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies in Part II, Item 7 of the 2016 Form 10-K.

Liquidity and Capital Resources

Senior management establishes liquidity and capital policies. Through various risk and control committees, senior management reviews business performance relative to these policies, monitors the availability of alternative sources of financing, and oversees the liquidity, interest rate and currency sensitivity of our asset and liability position. The Treasury Department, Firm Risk Committee, Asset and Liability Management Committee, and other committees and control groups assist in evaluating, monitoring and controlling the impact that our business activities have on our consolidated balance sheets, liquidity and capital structure. Liquidity and capital matters are reported regularly to the Board of Directors (the Board) and the Board's Risk Committee.

The Balance Sheet

We monitor and evaluate the composition and size of our balance sheet on a regular basis. Our balance sheet management process includes quarterly planning, business-specific thresholds, monitoring of business-specific usage versus key performance metrics and new business impact assessments.

We establish balance sheet thresholds at the consolidated and business segment levels. We monitor balance sheet utilization and review variances resulting from business activity or market fluctuations. On a regular basis, we review current performance versus established thresholds and assess the need to re-allocate our balance sheet based on business unit needs. We also monitor key metrics, including asset and liability size and capital usage.

Total Assets by Business Segment

<i>\$ in millions</i>	At June 30, 2017

Other assets ²	45,941	13,868	1,614	61,423
Total assets	\$ 629,149	\$ 181,135	\$ 4,665	\$ 814,949

1. Cash and cash equivalents include cash and due from banks and interest bearing deposits with banks.

2. Other assets primarily includes Cash deposited with clearing organizations or segregated under federal and other regulations or requirements; Other investments; Premises, equipment and software costs; Goodwill; Intangible assets and deferred tax assets.

A substantial portion of total assets consists of liquid marketable securities and short-term receivables arising principally from sales and trading activities in the Institutional Securities business segment. Total assets increased to \$841.0 billion at June 30, 2017 from \$814.9 billion at December 31, 2016, primarily driven by an increase in trading inventory within Institutional Securities. The increase reflects higher market values for corporate equities compared with December 31, 2016, along with increased trading activity across fixed income products including U.S. government and agency securities and Other sovereign government obligations.

Securities Repurchase Agreements and Securities Lending

Securities borrowed or securities purchased under agreements to resell and securities loaned or securities sold under agreements to repurchase are treated as collateralized financings (see Note 2 to the consolidated financial statements in the 2016 Form 10-K and Note 6 to the consolidated financial statements).

Collateralized Financing Transactions

<i>\$ in millions</i>	At June 30, 2017	At December 31, 2016
Securities purchased under agreements to resell and Securities borrowed ¹	\$ 224,130	\$ 227,191

Securities received as collateral ²	\$ 14,408	\$ 13,737

<i>\$ in millions</i>	Daily Average Balance	
	Three Months Ended	
	June 30, 2017	December 31, 2016
Securities purchased under agreements to resell and Securities borrowed ¹	\$ 220,045	\$ 224,355
Securities sold under agreements to repurchase and Securities loaned ¹	\$ 72,040	\$ 68,908

1. Differences between period end balances and average balances were not significant.

2. Included in Trading assets in the consolidated balance sheets.

Customer Securities Financing

The customer receivable portion of the securities financing transactions primarily includes customer margin loans, collateralized by customer-owned securities, which are segregated in accordance with regulatory requirements. The customer payable portion of the securities financing transactions primarily includes payables to our prime brokerage customers. Our risk exposure on these transactions is mitigated by collateral maintenance policies that limit our credit exposure to customers and liquidity reserves held against this risk exposure.

Liquidity Risk Management Framework

The primary goal of our Liquidity Risk Management Framework is to ensure that we have access to adequate funding across a wide range of market conditions and time horizons. The framework is designed to enable us to fulfill our financial obligations and support the execution of our business strategies.

The core components of our Liquidity Risk Management Framework are the Required Liquidity Framework, Liquidity Stress Tests and the Global Liquidity Reserve (GLR), which support our target liquidity profile. For further discussion about the Firm's Required Liquidity Framework and Liquidity Stress Tests, see Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Liquidity Risk Management Framework in Part II, Item 7 of the 2016 Form 10-K.

At June 30, 2017 and December 31, 2016, we maintained sufficient liquidity to meet current and contingent funding obligations as modeled in our Liquidity Stress Tests.

Global Liquidity Reserve

We maintain sufficient global liquidity reserves pursuant to our Required Liquidity Framework. For further discussion of our GLR, see Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Liquidity Risk Management Framework Global Liquidity Reserve in Part II, Item 7 of the 2016 Form 10-K.

Table of Contents**Management's Discussion and Analysis****GLR by Type of Investment**

	At June 30, 2017	At December 31, 2016
<i>\$ in millions</i>		
Cash deposits with banks	\$ 10,057	\$ 8,679
Cash deposits with central banks	29,427	30,568
Unencumbered highly liquid securities:		
U.S. government obligations	71,336	78,615
U.S. agency and agency mortgage-backed securities	52,967	46,360
Non-U.S. sovereign obligations ¹	21,290	30,884
Other investment grade securities	3,219	7,191
Total	\$ 188,296	\$ 202,297

1. Non-U.S. sovereign obligations are primarily composed of unencumbered German, French, Dutch, U.K. and Japanese government obligations.

GLR Managed by Bank and Non-Bank Legal Entities

	At June 30, 2017	At December 31, 2016	Daily Average Balance Three Months Ended June 30, 2017
<i>\$ in millions</i>			
Bank legal entities			
Domestic	\$ 62,897	\$ 74,411	\$ 65,976
Foreign	4,145	4,238	3,949
Total Bank legal entities	67,042	78,649	69,925
Non-Bank legal entities			
Domestic:			
Parent Company	48,987	66,514	56,070
Non-Parent Company	32,953	18,801	31,557
Total Domestic	81,940	85,315	87,627
Foreign	39,314	38,333	42,620
Total Non-Bank legal entities	121,254	123,648	130,247
Total	\$ 188,296	\$ 202,297	\$ 200,172

The reduction in total GLR as of June 30, 2017 compared with December 31, 2016, reflecting the decrease in our AFS Investment securities, was primarily related to the reduction in our deposits balance and growth in loans.

Regulatory Liquidity Framework

Liquidity Coverage Ratio

The Basel Committee on Banking Supervision's (Basel Committee) Liquidity Coverage Ratio (LCR) standard is designed to ensure that banking organizations have sufficient high-quality liquid assets (HQLA) to cover net cash outflows arising from significant stress over 30 calendar days. The standard's objective is to promote the short-term resilience of the liquidity risk profile of banking organizations. We and our U.S. Bank Subsidiaries are subject to the LCR requirements issued by U.S. banking regulators (U.S. LCR), which are based on the Basel Committee's LCR, including a requirement to calculate each entity's U.S. LCR on each business day.

HQLA by Type of Asset

<i>\$ in millions</i>	At June 30, 2017	At December 31, 2016
Cash ¹	\$ 29,608	\$ 30,569
Securities ²	138,666	129,524
Total³	\$ 168,274	\$ 160,093

1. Cash on deposit with central banks.

2. Primarily includes U.S. Treasuries; U.S. agency mortgage-backed securities; sovereign bonds; investment-grade corporate bonds; and publicly traded common equities.

3. Excludes excess HQLA held at U.S. Bank Subsidiaries.

The regulatory definition of HQLA is substantially the same as our GLR. Differences include cash placed at institutions other than central banks, which is included in our GLR but considered an inflow for LCR purposes, and certain unencumbered investment grade corporate bonds and publicly traded common equities, which are includable in HQLA but do not meet the definition of GLR.

We and our U.S. Bank Subsidiaries are required to maintain a minimum of 100% of the fully phased-in U.S. LCR. We and our U.S. Bank Subsidiaries are compliant with the minimum required U.S. LCR based on current interpretations.

Net Stable Funding Ratio

The objective of the Net Stable Funding Ratio (NSFR) is to reduce funding risk over a one-year horizon by requiring banking organizations to fund their activities with sufficiently stable sources of funding in order to mitigate the risk of future funding stress.

The Basel Committee finalized the NSFR framework in 2014. In May 2016, the U.S. banking regulators issued a proposal to implement the NSFR in the U.S. If adopted as proposed, the requirements would apply to us and our U.S. Bank Subsidiaries beginning January 1, 2018. We continue to evaluate the potential impact of the proposal, which is subject to further rulemaking procedures following the closing of the public comment period in August 2016. Our preliminary estimates, based on the current proposal, indicate that actions will be necessary to meet the requirement, which we expect to accomplish by the effective date of the final rule. For an additional discussion of NSFR, see Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Liquidity Framework—Net Stable Funding Ratio in Part II, Item 7 of the 2016 Form 10-K.

Table of Contents**Management's Discussion and Analysis****Funding Management**

We manage our funding in a manner that reduces the risk of disruption to our operations. We pursue a strategy of diversification of secured and unsecured funding sources (by product, investor and region) and attempt to ensure that the tenor of our liabilities equals or exceeds the expected holding period of the assets being financed.

We fund our balance sheet on a global basis through diverse sources. These sources may include our equity capital, long-term borrowings, securities sold under agreements to repurchase (repurchase agreements), securities lending, deposits, letters of credit and lines of credit. We have active financing programs for both standard and structured products targeting global investors and currencies.

Secured Financing

For a discussion of our secured financing activities, see Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Funding Management Secured Financing in Part II, Item 7 of the 2016 Form 10-K.

At June 30, 2017 and December 31, 2016, the weighted average maturity of our secured financing of less liquid assets was greater than 120 days.

Unsecured Financing

For a discussion of our unsecured financing activities, see Management's Discussion and Analysis of Financing Condition and Results of Operations Liquidity and Capital Resources Funding Management Unsecured Financing in Part II, Item 7 of the 2016 Form 10-K and see Note 4 to the consolidated financial statements.

Deposits

<i>\$ in millions</i>	At June 30, 2017	At December 31, 2016
Deposits	\$ 144,913	\$ 155,863

The majority of deposits in our U.S. Bank Subsidiaries are sourced from our retail brokerage accounts and are considered to have stable, low-cost funding characteristics. Available funding sources to our U.S. Bank Subsidiaries include demand deposit accounts, money market deposit accounts, time deposits, repurchase agreements, federal funds purchased and Federal Home Loan Bank advances. The reduction in Deposits as of June 30, 2017 compared with December 31, 2016 was primarily due to client deployment of cash into the markets and typical seasonal client tax payments.

Short-Term Borrowings

<i>\$ in millions</i>	At	At
-----------------------	-----------	----

	June 30, 2017	December 31, 2016
Short-term borrowings	\$ 916	\$ 941

Our unsecured short-term borrowings primarily consist of structured notes, bank loans and bank notes with original maturities of 12 months or less.

Long-Term Borrowings

We believe that accessing debt investors through multiple distribution channels helps provide consistent access to the unsecured markets. In addition, the issuance of long-term borrowings allows us to reduce reliance on short-term credit sensitive instruments. Long-term borrowings are generally managed to achieve staggered maturities, thereby mitigating refinancing risk, and to maximize investor diversification through sales to global institutional and retail clients across regions, currencies and product types. Availability and cost of financing to us can vary depending on market conditions, the volume of certain trading and lending activities, our credit ratings and the overall availability of credit.

We may engage in various transactions in the credit markets (including, for example, debt retirements) that we believe are in our investors' best interests.

Long-term Borrowings by Maturity at June 30, 2017

<i>\$ in millions</i>	Parent Company	Subsidiaries	Total
2017	\$ 8,742	\$ 4,079	\$ 12,821
2018	18,532	2,044	20,576
2019	21,738	1,567	23,305
2020	19,238	1,860	21,098

Approximate net increase in long-term borrowings June 30, 2017 through July 28, 2017			\$ 7,518
Includes:			
Senior debt issuance on July 24, 2017			7,000

For further information on long-term borrowings, see Note 10 to the consolidated financial statements.

Table of Contents**Management's Discussion and Analysis****Credit Ratings**

We rely on external sources to finance a significant portion of our daily operations. The cost and availability of financing generally are impacted by our credit ratings, among other things. In addition, our credit ratings can have an impact on certain trading revenues, particularly in those businesses where longer-term counterparty performance is a key consideration, such as OTC derivative transactions, including credit derivatives and interest rate swaps. Rating agencies consider company-specific factors; other industry factors such as regulatory or legislative changes and the macroeconomic environment, among other things.

Our credit ratings do not include any uplift from perceived government support from any rating agency given the significant progress of the U.S. financial reform legislation and regulations. Some rating agencies have stated that they currently incorporate various degrees of credit rating uplift from non-governmental third-party sources of potential support.

Parent Company and MSBNA's Senior Unsecured Ratings at July 28, 2017

	Parent Company		
	Short-term Debt	Long-term Debt	Rating Outlook
DBRS, Inc.	R-1 (middle)	A (high)	Stable
Fitch Ratings, Inc.	F1	A	Stable
Moody's Investors Service, Inc.	P-2	A3	Stable
Rating and Investment Information, Inc.	a-1	A-	Stable
Standard & Poor's Global Ratings	A-2	BBB+	Stable

	Morgan Stanley Bank, N.A.		
	Short-term Debt	Long-term Debt	Rating Outlook
Fitch Ratings, Inc.	F1	A+	Stable
Moody's Investors Service, Inc.	P-1	A1	Stable
Standard & Poor's Global Ratings	A-1	A+	Stable

In connection with certain OTC trading agreements and certain other agreements where we are a liquidity provider to certain financing vehicles associated with the Institutional Securities business segment, we may be required to provide additional collateral, immediately settle any outstanding liability balances with certain counterparties or pledge additional collateral to certain exchanges and clearing organizations in the event of a future credit rating downgrade irrespective of whether we are in a net asset or net liability position.

The additional collateral or termination payments that may be called in the event of a future credit rating downgrade vary by contract and can be based on ratings by either or both of Moody's Investors Service, Inc. (Moody's) and Standard & Poor's Global Ratings (S&P). The following table shows

the future potential collateral amounts and termination payments that could be called or required by counterparties or exchanges and clearing organizations in the event of one-notch or two-notch downgrade scenarios, from the lowest of Moody's or S&P ratings, based on the relevant contractual downgrade triggers.

Incremental Collateral or Terminating Payments upon Potential Future Rating Downgrade

	At	At
<i>\$ in millions</i>	June 30, 2017	December 31, 2016
One-notch downgrade	\$ 950	\$ 1,292
Two-notch downgrade	720	875

While certain aspects of a credit rating downgrade are quantifiable pursuant to contractual provisions, the impact it would have on our business and results of operations in future periods is inherently uncertain and would depend on a number of interrelated factors, including, among others, the magnitude of the downgrade, the rating relative to peers, the rating assigned by the relevant agency pre-downgrade, individual client behavior and future mitigating actions we might take. The liquidity impact of additional collateral requirements is included in our Liquidity Stress Tests.

Capital Management

We view capital as an important source of financial strength and actively manage our consolidated capital position based upon, among other things, business opportunities, risks, capital availability and rates of return together with internal capital policies, regulatory requirements and rating agency guidelines and, therefore, in the future may expand or contract our capital base to address the changing needs of our businesses. We attempt to maintain total capital, on a consolidated basis, at least equal to the sum of our operating subsidiaries' required equity.

Common Stock

We repurchased approximately \$500 million of our outstanding common stock as part of our share repurchase program during the current quarter and \$1,250 million during the current year period. We repurchased approximately \$625 million during the prior year quarter and \$1,250 million in the prior year period (see Note 14 to the consolidated financial statements).

For a description of our share repurchase program, see [Unregistered Sales of Equity Securities and Use of Proceeds](#).

For a description of our 2017 capital plan, see [Liquidity and Capital Resources](#), [Regulatory Requirements](#), [Capital Plans and Stress Tests](#).

Table of Contents**Management's Discussion and Analysis****Preferred Stock**

On June 15, 2017, we announced that the Board declared quarterly dividends for preferred stock shareholders of record on June 30, 2017 that were paid on July 17, 2017.

For additional information on preferred stock, see Note 14 to the consolidated financial statements.

Tangible Equity

<i>\$ in millions</i>	At June 30, 2017	At December 31, 2016	Monthly Average Balance Three Months Ended June 30, 2017

1. Morgan Stanley tangible shareholders' equity and tangible common equity are non-GAAP financial measures.

Regulatory Requirements***Regulatory Capital Framework***

We are a financial holding company under the Bank Holding Company Act of 1956, as amended (the "BHC Act"), and are subject to the regulation and oversight of the Board of Governors of the Federal Reserve System (the "Federal Reserve"). The Federal Reserve establishes capital requirements for us, including well-capitalized standards, and evaluates our compliance with such capital requirements. The Office of the Comptroller of the Currency ("OCC") establishes similar capital requirements and standards for our U.S. Bank Subsidiaries. The regulatory capital requirements are largely based on the Basel III capital standards established by the Basel Committee and also implement certain provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act").

The Basel Committee has recently published revisions to certain standards in its capital framework, and is actively considering potential revisions to other capital standards, that, if adopted by the U.S. banking agencies, could substantially change the U.S. regulatory capital framework. For additional discussion of regulatory capital framework,

see Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Regulatory Requirements Regulatory Capital Framework in Part II, Item 7 of the 2016 Form 10-K.

Regulatory Capital Requirements

We are required to maintain minimum risk-based and leverage capital ratios under the regulatory capital requirements. A summary of the calculations of regulatory capital, risk-weighted assets (RWAs) and transition provisions follows.

Regulatory Capital. Minimum risk-based capital ratio requirements apply to Common Equity Tier 1 capital, Tier 1 capital and Total capital (which includes Tier 2 capital). Certain adjustments to and deductions from capital are required for purposes of determining these ratios, such as goodwill, intangible assets, certain deferred tax assets, other amounts in Accumulated other comprehensive income (loss) (AOCI) and investments in the capital instruments of unconsolidated financial institutions. Certain of these adjustments and deductions are also subject to transitional provisions.

In addition to the minimum risk-based capital ratio requirements, on a fully phased-in basis by 2019, we will be subject to:

A greater than 2.5% Common Equity Tier 1 capital conservation buffer;

The Common Equity Tier 1 global systemically important bank (G-SIB) capital surcharge, currently at 3%; and

Up to a 2.5% Common Equity Tier 1 countercyclical capital buffer (CCyB), currently set by U.S. banking regulators at zero (collectively, the buffers).

In 2017, the phase-in amount for each of the buffers is 50% of the fully phased-in buffer requirement. Failure to maintain the buffers would result in restrictions on our ability to make capital distributions, including the payment of dividends and the repurchase of stock, and to pay discretionary bonuses to executive officers. For a further discussion of the G-SIB capital surcharge, see Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Regulatory Requirements G-SIB Capital Surcharge in Part II, Item 7 of the 2016 Form 10-K.

See Total Loss-Absorbing Capacity, Long-Term Debt and Clean Holding Company Requirements herein for additional capital requirements effective January 1, 2019.

Risk-Weighted Assets. RWAs reflect both our on- and off-balance sheet risk as well as capital charges attributable to the risk of loss arising from the following:

Credit risk: The failure of a borrower, counterparty or issuer to meet its financial obligations to us;

Table of Contents**Management's Discussion and Analysis**

Market risk: Adverse changes in the level of one or more market prices, rates, indices, implied volatilities, correlations or other market factors, such as market liquidity; and

Operational risk: Inadequate or failed processes or systems, human factors or from external events (*e.g.*, fraud, theft, legal and compliance risks, cyber attacks or damage to physical assets).

For a further discussion of our market, credit and operational risks, see Quantitative and Qualitative Disclosures about Market Risk.

Our binding risk-based capital ratios for regulatory purposes are the lower of the capital ratios computed under (i) the standardized approaches for calculating credit risk and market risk RWAs (the Standardized Approach) and (ii) the applicable advanced approaches for calculating credit risk, market risk and operational risk RWAs (the Advanced Approach). The credit risk RWA calculations between the two approaches differ in that the Standardized Approach requires calculation of RWAs using prescribed risk weights, whereas the Advanced Approach utilizes models to calculate exposure amounts and risk weights. At June 30, 2017, our binding ratios are based on the Advanced Approach transitional rules.

The methods for calculating each of our risk-based capital ratios will change through January 1, 2022 as aspects of the capital rules are phased in. These changes may result in differences in our reported capital ratios from one reporting period to the next that are independent of changes to our capital base, asset composition, off-balance sheet exposures or risk profile.

Minimum Risk-Based Capital Ratios: Transitional Provisions

1. These ratios assume the requirements for the G-SIB capital surcharge (3.0%) and CCyB (zero) remain at current levels. See Total Loss-Absorbing Capacity, Long-Term Debt and Clean Holding Company Requirements herein for additional capital requirements effective January 1, 2019.

Tier 1 leverage ratio ²	8.4%	N/A	8.2%	N/A
N/A Not Applicable				

1. Adjusted average assets represent the denominator of the Tier 1 leverage ratio and are composed of the average daily balance of consolidated on-balance sheet assets under U.S. GAAP during the calendar quarter ended June 30, 2017 and December 31, 2016 adjusted for disallowed goodwill, transitional intangible assets, certain deferred tax assets, certain investments in the capital instruments of unconsolidated financial institutions and other adjustments.

2. The minimum Tier 1 leverage ratio requirement is 4.0%.

The fully phased-in pro forma estimates in the previous tables are based on our current understanding of the capital rules and other factors, which may be subject to change as we receive additional clarification and implementation guidance from the Federal Reserve and as the interpretation of the regulations evolves over time. These fully phased-in pro forma estimates are non-GAAP financial measures because they were not yet effective at June 30, 2017. These preliminary estimates are subject to risks and uncertainties that may cause actual results to differ materially and should not be taken as a projection of what our capital, capital ratios, RWAs, earnings or other results will actually be at future dates. For a discussion of risks and uncertainties that may affect our future results, see **Risk Factors** in Part I, Item 1A of the 2016 Form 10-K.

Table of Contents

Management's Discussion and Analysis

Well-Capitalized Minimum Regulatory Capital Ratios for U.S. Bank Subsidiaries

	At June 30, 2017
Common Equity Tier 1 risk-based capital ratio	6.5%
Tier 1 risk-based capital ratio	8.0%
Total risk-based capital ratio	10.0%
Tier 1 leverage ratio	5.0%

For us to remain a financial holding company, our U.S. Bank Subsidiaries must qualify as well-capitalized by maintaining the minimum ratio requirements set forth in the previous table. The Federal Reserve has not yet revised the well-capitalized standard for financial holding companies to reflect the higher capital standards required for us under the capital rules. Assuming that the Federal Reserve would apply the same or very similar well-capitalized standards to financial holding companies, each of our risk-based capital ratios and Tier 1 leverage ratio at June 30, 2017 would have exceeded the revised well-capitalized standard. The Federal Reserve may require us to maintain risk- and leverage-based capital ratios substantially in excess of mandated minimum levels, depending upon general economic conditions and a financial holding company's particular condition, risk profile and growth plans.

VaR Value-at-Risk

N/A Not Applicable

1. The RWAs for each category in the table reflect both on- and off-balance sheet exposures, where appropriate.
2. Amount reflects assets not in a defined category, non-material portfolios of exposures and unsettled transactions, as applicable.
3. Amount reflects a reduction in the internal loss data related to litigation utilized in the operational risk capital model.

Regulatory stressed VaR increased \$14,279 million in the current year period under both the Standardized and the Advanced approaches. These increases were primarily driven by increases in trading inventory across the equities, global macro, and credit businesses within Institutional Securities, in response to client demand.

Table of Contents**Management's Discussion and Analysis****Supplementary Leverage Ratio**

We and our U.S. Bank Subsidiaries are required to publicly disclose our supplementary leverage ratios, which will become effective as a capital standard on January 1, 2018. By January 1, 2018, we must also maintain a Tier 1 supplementary leverage capital buffer of at least 2% in addition to the 3% minimum supplementary leverage ratio (for a total of at least 5%), in order to avoid limitations on capital distributions, including dividends and stock repurchases, and discretionary bonus payments to executive officers. In addition, beginning in 2018, our U.S. Bank Subsidiaries must maintain a supplementary leverage ratio of 6% to be considered well-capitalized.

Pro Forma Supplementary Leverage Exposure and Ratio

<i>\$ in millions</i>	At June 30, 2017		At December 31, 2016	
	Transitional basis	Fully phased-in ¹	Transitional basis	Fully phased-in ¹
Average total assets ²	\$ 837,875	\$ 837,875	\$ 820,536	\$ 820,536
Adjustments ^{3, 4}	241,726	241,203	242,113	240,999
Pro forma supplementary leverage exposure	\$ 1,079,601	\$ 1,079,078	\$ 1,062,649	\$ 1,061,535
Pro forma supplementary leverage ratio	6.5%	6.5%	6.4%	6.2%

1. Estimated amounts utilize fully phased-in Tier 1 capital and take into consideration the Tier 1 capital deduction that would be applicable in 2018 after the phase-in period has ended.
2. Computed as the average daily balance of consolidated total assets under U.S. GAAP during the calendar quarter ended June 30, 2017 and December 31, 2016.
3. Computed as the arithmetic mean of the month-end balances over the calendar quarter ended June 30, 2017 and December 31, 2016.
4. Adjustments are to: (i) incorporate derivative exposures, including adding the related potential future exposure (including for derivatives cleared for clients), grossing up cash collateral netting where qualifying criteria are not met and adding the effective notional principal amount of sold credit protection offset by qualifying purchased credit protection; (ii) reflect the counterparty credit risk for repo-style transactions; (iii) add the credit equivalent amount for off-balance sheet exposures; and (iv) apply other adjustments to Tier 1 capital, including disallowed goodwill, transitional intangible assets, certain deferred tax assets and certain investments in the capital instruments of unconsolidated financial institutions.

Pro forma fully phased-in supplementary leverage exposure and ratio are based on our current understanding of rules and other factors.

U.S. Subsidiary Banks Pro Forma Supplementary Leverage Ratios on a Transitional Basis

	At June 30, 2017	At December 31, 2016
MSBNA	8.8%	7.7%
MSPBNA	9.9%	10.2%

The pro forma supplementary leverage exposures and pro forma supplementary leverage ratios, both on transitional and fully phased-in bases, are non-GAAP financial measures because they have not yet become effective. Our estimates are subject to risks and uncertainties that may cause actual results to differ materially from estimates based on these regulations. Further, these expectations should not be taken as projections of what our supplementary leverage ratios, earnings, assets or exposures will actually be at future dates. For a

discussion of risks and uncertainties that may affect our future results, see **Risk Factors** in Part I, Item 1A of the 2016 Form 10-K.

Total Loss-Absorbing Capacity, Long-Term Debt and Clean Holding Company Requirements

On December 15, 2016, the Federal Reserve adopted a final rule for top-tier bank holding companies of U.S. G-SIBs (covered BHCs), including the Parent Company, that establishes external total loss-absorbing capacity (TLAC), long-term debt (LTD) and clean holding company requirements. The final rule contains various definitions and restrictions, such as requiring eligible LTD to be issued by the covered BHC and be unsecured, have a maturity of one year or more from the date of issuance and not have certain derivative-linked features typically associated with certain types of structured notes. We expect to be in compliance with all requirements of the rule by January 1, 2019, the date that compliance is required.

For a further discussion of TLAC and LTD requirements, see **Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Regulatory Requirements Total Loss-Absorbing Capacity, Long-Term Debt and Clean Holding Company Requirements** in Part II, Item 7 of the 2016 Form 10-K. For discussions about the interaction between the single point of entry resolution strategy and the TLAC and LTD requirements, see **Business Supervision and Regulation Financial Holding Company Resolution and Recovery Planning** in Part I, Item 1 and **Risk Factors Legal, Regulatory and Compliance Risk** in Part I, Item 1A of the 2016 Form 10-K.

Capital Plans and Stress Tests

Pursuant to the Dodd-Frank Act, the Federal Reserve has adopted capital planning and stress test requirements for large bank holding companies, including us, which form part of the Federal Reserve's annual Comprehensive Capital Analysis and Review (CCAR) framework.

We submitted our 2017 capital plan and company-run stress test results to the Federal Reserve on April 5, 2017. On June 22, 2017, the Federal Reserve published summary results of the Dodd-Frank Act supervisory stress tests of each large bank holding company, including us. On June 28, 2017, the Federal Reserve published summary results of CCAR and announced that they did not object to our 2017 Capital Plan (Capital Plan). The Capital Plan includes the repurchase of up to \$5.0 billion of outstanding common stock for the period beginning July 1, 2017 through June 30, 2018, an increase from \$3.5 billion in the 2016 Capital Plan. Additionally, the Capital Plan includes an increase in our quarterly common

Table of Contents

Management's Discussion and Analysis

stock dividend to \$0.25 per share from \$0.20 per share, beginning with the common stock dividend declared on July 19, 2017. We disclosed a summary of the results of our company-run stress tests on June 23, 2017 on our Investor Relations website. In addition, we must submit the results of our mid-cycle company-run stress test to the Federal Reserve by October 5, 2017 and disclose a summary of the results between October 5, 2017 and November 4, 2017.

The Dodd-Frank Act also requires each of our U.S. Bank Subsidiaries to conduct an annual stress test. MSBNA and MSPBNA submitted their 2017 annual company-run stress tests to the OCC on April 5, 2017 and published a summary of their stress test results on June 23, 2017 on our Investor Relations website.

For a further discussion of our capital plans and stress tests, see Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Requirements—Capital Plans and Stress Tests in Part II, Item 7 of the 2016 Form 10-K.

Attribution of Average Common Equity According to the Required Capital Framework

Our required capital (Required Capital) estimation is based on the Required Capital framework, an internal capital adequacy measure. Common equity attribution to the business segments is based on capital usage calculated by the Required Capital framework, as well as each business segment's relative contribution to our total Required Capital. Required Capital is assessed for each business segment and further attributed to product lines. This process is intended to align capital with the risks in each business segment in order to allow senior management to evaluate returns on a risk-adjusted basis.

The Required Capital framework is a risk-based and leverage use-of-capital measure, which is compared with our regulatory capital to ensure that we maintain an amount of going concern capital after absorbing potential losses from stress events, where applicable, at a point in time. We define the difference between our total average common equity and the sum of the average common equity amounts allocated to our business segments as Parent Company equity. We generally hold Parent Company equity for prospective regulatory requirements, organic growth, acquisitions and other capital needs.

Common equity estimation and attribution to the business segments are based on our pro forma fully phased-in regulatory capital estimates, including supplementary leverage, and incorporates our internal stress tests. The amount of capital allocated to the business segments is set at the beginning of each year and remains fixed throughout the year until the next

annual reset. Differences between available and Required Capital are attributed to Parent Company equity during the year.

The Required Capital framework is expected to evolve over time in response to changes in the business and regulatory environment. We will continue to evaluate the framework with respect to the impact of future regulatory requirements, as appropriate.

1. Average common equity is a non-GAAP financial measure.

Regulatory Developments

Resolution and Recovery Planning

Pursuant to the Dodd-Frank Act, we are required to submit to the Federal Reserve and the Federal Deposit Insurance Corporation (FDIC) an annual resolution plan that describes our strategy for a rapid and orderly resolution under the U.S. Bankruptcy Code in the event of our material financial distress or failure.

Our preferred resolution strategy, which is set out in our 2017 resolution plan, is a single point of entry strategy. We submitted our full 2017 resolution plan on June 30, 2017. We previously submitted a status report in respect of certain shortcomings identified in our 2015 resolution plan on September 30, 2016. As indicated in our 2017 resolution plan and anticipated in our 2016 status report, the Parent Company has amended and restated its support agreement with its material subsidiaries. Under the amended and restated support agreement, upon the occurrence of a resolution scenario, the Parent Company would be obligated to contribute or loan on a subordinated basis all of its material assets, other than shares in subsidiaries of the Parent Company and certain intercompany receivables, to provide capital and liquidity, as applicable, to our material subsidiaries. The obligations of the Parent Company under the amended and restated support agreement are secured on a senior basis by the assets of the Parent Company (other than shares in subsidiaries of the Parent Company). As a result, claims of our material subsidiaries against the assets of the Parent Company (other than shares in subsidiaries of the

Table of Contents

Management's Discussion and Analysis

Parent Company) are effectively senior to unsecured obligations of the Parent Company.

In September 2016, the OCC issued final guidelines that establish enforceable standards for recovery planning by national banks and certain other institutions with total consolidated assets of \$50 billion or more, calculated on a rolling four-quarter average basis, including MSBNA and MSPBNA. The guidelines were effective on January 1, 2017; MSBNA must be in compliance by January 1, 2018 and MSPBNA must be in compliance by October 1, 2018.

For more information about resolution and recovery planning requirements and our activities in these areas, including the implications of such activities in a resolution scenario, see *Business Supervision and Regulation Financial Holding Company Resolution and Recovery Planning* in Part I, Item 1, *Risk Factors Legal, Regulatory and Compliance Risk* in Part I, Item 1A and *Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Regulatory Developments Resolution and Recovery Planning* in Part II, Item 7 of the 2016 Form 10-K.

Legacy Covered Funds under the Volcker Rule

The Volcker Rule prohibits banking entities, including us and our affiliates, from engaging in certain proprietary trading activities, as defined in the Volcker Rule, subject to exemptions for underwriting, market-making-related activities, risk-mitigating hedging and certain other activities. The Volcker Rule also prohibits certain investments and relationships by banking entities with covered funds, with a number of exemptions and exclusions. In June 2017, we received approval from the Federal Reserve of our application for a five-year extension of the transition period to conform investments in certain legacy Volcker covered funds that are also illiquid funds. The approval covers essentially all of our non-conforming investments in, and relationships with, legacy covered funds subject to the Volcker Rule.

For more information about Volcker Rule requirements and our activities in these areas, including the conformance periods applicable to certain covered funds and our application for a statutory extension, see *Business Supervision and Regulation Financial Holding Company Activities Restrictions under the Volcker Rule* in Part I, Item 1 and *Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Regulatory Developments Legacy Covered Funds under the Volcker Rule* in Part II, Item 7 of the 2016 Form 10-K.

U.S. Department of Labor Conflict of Interest Rule

The U.S. Department of Labor's final Conflict of Interest Rule went into effect on June 9, 2017, with certain aspects subject to phased-in compliance, and full compliance required by January 1, 2018. The U.S. Department of Labor is undertaking an examination of the rule which may result in changes to the rule or related exemptions or a change in the January 1, 2018 full compliance date. For a discussion of the U.S. Department of Labor Conflict of Interest Rule, see *Business Supervision and Regulation Institutional Securities and Wealth Management* in Part I, Item 1 of the 2016 Form 10-K.

U.K. Referendum

Following the U.K. electorate vote to leave the European Union, the U.K. invoked Article 50 of the Lisbon Treaty on March 29, 2017. For further discussion of U.K. referendum's potential impact on our operations, see *Risk*

Factors International Risk in Part I, Item 1A of the 2016 Form 10-K. For further information regarding our exposure to the U.K., see also Quantitative and Qualitative Disclosures about Market Risk Risk Management Credit Risk Country Risk Exposure.

Off-Balance Sheet Arrangements

We enter into various off-balance sheet arrangements, including through unconsolidated special purpose entities (SPEs) and lending-related financial instruments (e.g., guarantees and commitments), primarily in connection with the Institutional Securities and Investment Management business segments.

We utilize SPEs primarily in connection with securitization activities. For information on our securitization activities, see Note 12 to the consolidated financial statements.

For information on our commitments, obligations under certain guarantee arrangements and indemnities, see Note 11 to the consolidated financial statements. For further information on our lending commitments, see Quantitative and Qualitative Disclosures about Market Risk Risk Management Credit Risk Lending Activities.

Effects of Inflation and Changes in Interest and Foreign Exchange Rates

For a discussion of the effects of inflation and changes in interest and foreign exchange rates on our business and financial results and strategies to mitigate potential exposures, see Management s Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Effects of Inflation and Changes in Interest and Foreign Exchange Rates in Part II, Item 7 of the 2016 Form 10-K.

Table of Contents**Quantitative and Qualitative Disclosures about Market Risk****Risk Management**

Management believes effective risk management is vital to the success of our business activities. For a discussion of our risk management functions, see **Quantitative and Qualitative Disclosures about Market Risk Risk Management** in Part II, Item 7A of the 2016 Form 10-K.

Market Risk

Market risk refers to the risk that a change in the level of one or more market prices, rates, indices, implied volatilities (the price volatility of the underlying instrument imputed from option prices), correlations or other market factors, such as market liquidity, will result in losses for a position or portfolio. Generally, we incur market risk as a result of trading, investing and client facilitation activities, principally within the Institutional Securities business segment where the substantial majority of our Value-at-Risk (VaR) for market risk exposures is generated. In addition, we incur market risk within the Wealth Management and Investment Management business segments. The Wealth Management business segment primarily incurs non-trading market risk from lending and deposit-taking activities. The Investment Management business segment primarily incurs non-trading market risk from capital investments in real estate funds and investments in private equity vehicles. For a further discussion of market risk, see **Quantitative and Qualitative Disclosures about Market Risk Risk Management Market Risk** in Part II, Item 7A of the 2016 Form 10-K.

VaR

We use the statistical technique known as VaR as one of the tools used to measure, monitor and review the market risk exposures of our trading portfolios. The Market Risk Department calculates and distributes daily VaR-based risk measures to various levels of management.

VaR Methodology, Assumptions and Limitations. For information regarding our VaR methodology, assumptions and limitations, see **Quantitative and Qualitative Disclosures about Market Risk Risk Management Market Risk Sales and Trading and Related Activities VaR Methodology, Assumptions and Limitations** in Part II, Item 7A of the 2016 Form 10-K.

We utilize the same VaR model for risk management purposes as well as for regulatory capital calculations. Our VaR model has been approved by our regulators for use in regulatory calculations.

The portfolio of positions used for our VaR for risk management purposes (**Management VaR**) differs from that used for regulatory capital requirements (**Regulatory VaR**).

Management VaR contains certain positions that are excluded from Regulatory VaR. Examples include counterparty credit valuation adjustment (**CVA**) and related hedges, as well as loans that are carried at fair value and associated hedges.

The following table presents the Management VaR for the Trading portfolio, on a period-end, quarterly average and quarterly high and low basis. To further enhance the transparency of the traded market risk, the Credit Portfolio VaR has been disclosed as a separate category from the Primary Risk Categories. The Credit Portfolio includes counterparty CVA and related hedges, as well as loans that are carried at fair value and associated hedges.

N/A Not Applicable

1. Diversification benefit equals the difference between the total Management VaR and the sum of the component VaRs. This benefit arises because the simulated one-day losses for each of the components occur on different days; similar diversification benefits also are taken into account within each component.
2. The high and low VaR values for the total Management VaR and each of the component VaRs might have occurred on different days during the quarter, and therefore, the diversification benefit is not an applicable measure.

Table of Contents**Risk Disclosures**

The average total Management VaR for the three months ended June 30, 2017 (current quarter) was \$51 million compared with \$44 million for the three months ended March 31, 2017 (last quarter). The average Management VaR for the Primary Risk Categories for the current quarter was \$46 million compared with \$39 million for the last quarter. These increases were primarily driven by increases in trading inventory across the equities, global macro, and credit businesses within Institutional Securities, in response to client demand.

Distribution of VaR Statistics and Net Revenues for the Current Quarter. One method of evaluating the reasonableness of our VaR model as a measure of our potential volatility of net revenues is to compare VaR with actual trading revenues. Assuming no intraday trading, for a 95%/one-day VaR, the expected number of times that trading losses should exceed VaR during the year is 13, and, in general, if trading losses were to exceed VaR more than 21 times in a year, the adequacy of the VaR model would be questioned. We evaluate the reasonableness of our VaR model by comparing the potential declines in portfolio values generated by the model with actual trading results for the Firm, as well as individual business units. For days where losses exceed the VaR statistic, we examine the drivers of trading losses to evaluate the VaR model's accuracy relative to realized trading results.

The distribution of VaR Statistics and Net Revenues is presented in the following histograms for the Total Trading populations.

Total Trading. As shown in the 95%/One-Day Management VaR table on the preceding page, the average 95%/one-day total Management VaR for the current quarter was \$51 million. The following histogram presents the distribution of the daily 95%/one-day total Management VaR for the current quarter, which was in a range between \$40 million and \$60 million for approximately 95% of trading days during the current quarter.

The following histogram shows the distribution for the current quarter of daily net trading revenues, including profits and losses from Interest rate and credit spread, Equity price, Foreign exchange rate, Commodity price, and Credit Portfolio positions and intraday trading activities, for our Trading businesses. Daily net trading revenues also include intraday trading activities but exclude certain items not captured in the VaR model, such as fees, commissions and net interest income. Daily net trading revenues differ from the definition of revenues required for Regulatory VaR backtesting, which further excludes intraday trading. During the current quarter, we experienced net trading losses on one day, which was not in excess of the 95%/one-day Total Management VaR.

Non-Trading Risks

We believe that sensitivity analysis is an appropriate representation of our non-trading risks. Reflected below is this analysis covering substantially all of the non-trading risk in our portfolio.

Counterparty Exposure Related to Our Own Credit Spread. The credit spread risk sensitivity of the counterparty exposure related to our own credit spread corresponded to an increase in value of approximately \$6 million for each 1 basis point widening in our credit spread level at both June 30, 2017 and March 31, 2017.

Funding Liabilities. The credit spread risk sensitivity of our mark-to-market funding liabilities corresponded to an increase in value of approximately \$26 million and \$19 million for each 1 basis point widening in our credit spread level at June 30, 2017 and March 31, 2017, respectively.

Interest Rate Risk Sensitivity. The following table presents an analysis of selected instantaneous upward and downward parallel interest rate shocks on net interest income over the next 12 months for our U.S. Bank Subsidiaries. These shocks

Table of Contents**Risk Disclosures**

are applied to our 12-month forecast for our U.S. Bank Subsidiaries, which incorporates market expectations of interest rates and our forecasted business activity, including our deposit deployment strategy and asset-liability management hedges.

U.S. Bank Subsidiaries Net Interest Income Sensitivity Analysis

<i>\$ in millions</i>	At June 30, 2017	At March 31, 2017
Basis point change		
+200	\$ 716	\$ 537
+100	413	332
-100	(577)	(569)

We do not manage to any single rate scenario but rather manage net interest income in our U.S. Bank Subsidiaries to optimize across a range of possible outcomes. The sensitivity analysis assumes that we take no action in response to these scenarios, assumes there are no changes in other macroeconomic variables normally correlated with changes in interest rates, and includes subjective assumptions regarding customer and market re-pricing behavior and other factors. The increase in positive sensitivity to interest rates arising in the +200 and +100 basis points scenarios between March 31, 2017 and June 30, 2017 is related to overall changes in our asset-liability positioning, primarily lower holdings of fixed-rate AFS Investment securities.

Investments. We have exposure to public and private companies through direct investments, as well as through funds that invest in these assets. These investments are predominantly equity positions with long investment horizons, a portion of which are for business facilitation purposes. The market risk related to these investments is measured by estimating the potential reduction in net income associated with a 10% decline in investment values and related impact on performance fees.

Investments Sensitivity, Including Related Performance Fees

<i>\$ in millions</i>	10% Sensitivity	
	At June 30, 2017	At March 31, 2017
Investments related to Investment Management activities	\$ 326	\$ 337
Other investments:		
Mitsubishi UFJ Morgan Stanley Securities Co., Ltd.	171	171
Other Firm investments	151	151

Equity Market Sensitivity. In the Wealth Management and Investment Management business segments, certain fee-based revenue streams are driven by the value of clients' equity holdings. The overall level of revenues for these streams also depends on multiple additional factors that include, but are not limited to, the level and duration of the equity market increase or decline, price volatility, the geographic and

industry mix of client assets, the rate and magnitude of client investments and redemptions, and the impact of such market increase or decline and price volatility on client behavior. Therefore, overall revenues do not correlate completely with changes in the equity markets.

Credit Risk

Credit risk refers to the risk of loss arising when a borrower, counterparty or issuer does not meet its financial obligations to us. We primarily incur credit risk exposure to institutions and individuals through our Institutional Securities and Wealth Management business segments. For a further discussion of our credit risks, see Quantitative and Qualitative Disclosures about Market Risk Risk Management Credit Risk in Part II, Item 7A of the 2016 Form 10-K. Also, see Notes 7 and 11 to the consolidated financial statements for additional information about our loans and lending commitments, respectively.

Lending Activities

We provide loans and lending commitments to a variety of customers, from large corporate and institutional clients to high net worth individuals. In addition, we purchase loans in the secondary market. In the consolidated balance sheets, these loans and lending commitments are carried at either fair value with changes in fair value recorded in earnings; held for investment, which are recorded at amortized cost; or held for sale, which are recorded at the lower of cost or fair value. Loans held for investment and loans held for sale are classified in Loans, and loans held at fair value are classified in Trading assets in the consolidated balance sheets. See Notes 3, 7 and 11 to the consolidated financial statements for further information.

Total loans and lending commitments^{2,3,4}	\$ 132,643	\$ 68,726	\$ 23	\$ 201,392

1. Loans in Investment Management are entered into in conjunction with certain investment advisory activities.
2. Amounts exclude \$27.7 billion and \$24.4 billion related to margin loans and \$4.2 billion and \$4.7 billion related to employee loans at June 30, 2017 and December 31, 2016, respectively. See Notes 6 and 7 to the consolidated financial statements for further information.
3. Lending commitments represent the notional amount of legally binding obligations to provide funding to clients for all lending transactions. Since commitments associated with these business activities may expire unused or may not be utilized to full capacity, they do not necessarily reflect the actual future cash funding requirements.
4. For syndications led by us, the lending commitments accepted by the borrower but not yet closed are net of the amounts agreed to by counterparties that will participate in the syndication. For syndications that we participate in and do not lead, lending commitments accepted by the borrower but not yet closed include only the amount that we expect will be allocated from the lead syndicate bank. Due to the nature of our obligations under the commitments, these amounts include certain commitments participated to third parties.

Our credit exposure from our loans and lending commitments is measured in accordance with our internal risk management standards. Risk factors considered in determining the aggregate allowance for loan and commitment losses include the borrower's financial strength, seniority of the loan, collateral type, volatility of collateral value, debt cushion, loan-to-value ratio, debt service ratio, covenants and counterparty type. Qualitative and environmental factors such as economic and business conditions, nature and volume of the portfolio and lending terms, and volume and severity of past due loans may also be considered.

At June 30, 2017 and December 31, 2016, the allowance for loan losses related to loans that were accounted for as held for

investment was \$306 million and \$274 million, respectively, and the allowance for commitment losses related to lending commitments that were accounted for as held for investment was \$186 million and \$190 million, respectively. The aggregate allowance for loan and commitment losses increased during the current year period primarily due to updates to model parameters used in determining the inherent allowance. See Note 7 to the consolidated financial statements for further information.

Institutional Securities Lending Activities. In connection with certain Institutional Securities business segment activities, we provide loans and lending commitments to a diverse group of corporate and other institutional clients. These activities include originating and purchasing corporate loans, commercial and residential mortgage lending, asset-backed lending, financing extended to equities and commodities customers, and loans to municipalities. These loans and lending commitments may have varying terms; may be senior or subordinated; may be secured or unsecured; are generally contingent upon representations, warranties and contractual conditions applicable to the borrower; and may be syndicated, traded or hedged by us.

We also participate in securitization activities whereby we extend short-term or long-term funding to clients through loans and lending commitments that are secured by the assets of the borrower and generally provide for over-collateralization, including commercial real estate loans, loans secured by loan pools, commercial company loans, and secured lines of revolving credit. Credit risk with respect to these loans and lending commitments arises from the failure of a borrower to perform according to the terms of the loan agreement or a decline in the underlying collateral value. See Note 12 to the consolidated financial statements for information about our securitization activities. In addition, a collateral management group monitors collateral levels against requirements and oversees the administration of the collateral function. See Note 6 to the consolidated financial statements for additional information about our collateralized transactions.

Institutional Securities loans and lending commitments are mainly related to relationship-based and event-driven lending to select corporate clients. Relationship-based loans and lending commitments are used for general corporate purposes, working capital and liquidity purposes by our investment banking clients and typically consist of revolving lines of credit, letter of credit facilities and term loans. In connection with the relationship-based lending activities, we had hedges (which included single-name, sector and index hedges) with a notional amount of \$15.2 billion and \$20.2 billion at June 30, 2017 and December 31, 2016,

Table of Contents**Risk Disclosures**

respectively. Event-driven loans and lending commitments are associated with a particular event or transaction, such as to support client merger, acquisition, recapitalization and project finance activities. Event-driven loans and lending commitments typically consist of revolving lines of credit, term loans and bridge loans.

Table of Contents**Risk Disclosures**

Institutional Securities Lending Exposures Related to the Energy Industry. At June 30, 2017, Institutional Securities loans and lending commitments related to the energy industry were \$11.6 billion, of which approximately 67% are accounted for as held for investment and 33% are accounted for as either held for sale or at fair value. Additionally, approximately 56% of the total energy industry loans and lending commitments were to investment grade counterparties.

At June 30, 2017, the energy industry portfolio included \$1.1 billion in loans and \$2.1 billion in lending commitments to Oil and Gas Exploration and Production (E&P) companies. The E&P loans were to non-investment grade counterparties, which are generally subject to periodic borrowing base reassessments based on the value of the underlying oil and gas reserves pledged as collateral. In limited situations, we may extend the period related to borrowing base reassessments typically in conjunction with taking certain risk mitigating actions with the borrower. Approximately 52% of the E&P lending commitments were to investment grade counterparties. To the extent oil and natural gas prices remain at quarter-end levels, or deteriorate further, we may incur additional lending losses.

Institutional Securities Margin Lending. In addition to the activities noted above, Institutional Securities provides margin lending, which allows the client to borrow against the value of qualifying securities. At June 30, 2017 and December 31, 2016, the amounts related to margin lending were \$15.4 billion and \$11.9 billion, respectively, which were classified within Customer and other receivables in the consolidated balance sheets.

Wealth Management Lending Activities. The principal Wealth Management lending activities include securities-based lending and residential real estate loans.

Securities-based lending provided to our retail clients is primarily conducted through our Portfolio Loan Account (PLA) and Liquidity Access Line (LAL) platforms, which had an outstanding loan balance of \$31.6 billion and \$29.7 billion at June 30, 2017 and December 31, 2016, respectively. For more information about our securities-based lending and residential real estate loans, see Quantitative and Qualitative Disclosures about Market Risk Risk Management Credit Risk Lending Activities in Part II, Item 7A of the 2016 Form 10-K.

For the current quarter, loans and lending commitments associated with the Wealth Management business segment lending activities increased by approximately 6%, mainly due to growth in securities-based lending and other loans.

1. Granted in conjunction with programs established by us to retain and recruit certain employees. These loans are full recourse and generally require periodic payments. At June 30, 2017, these loans have repayment terms ranging from 1 to 20 years. We establish an allowance for loan amounts to terminated employees that we do not consider recoverable, which is recorded in Compensation and benefits expense.

Credit Exposure Derivatives

We incur credit risk as a dealer in OTC derivatives. Credit risk with respect to derivative instruments arises from the possibility that a counterparty may fail to perform according to the terms of the contract. In connection with our OTC derivative activities, we generally enter into master netting agreements and collateral arrangements with counterparties. These agreements provide us with the ability to demand

Table of Contents**Risk Disclosures**

collateral, as well as to liquidate collateral and offset receivables and payables covered under the same master netting agreement in the event of counterparty default.

We manage our trading positions by employing a variety of risk mitigation strategies. These strategies include diversification of risk exposures and hedging. Hedging activities consist of the purchase or sale of positions in related securities and financial instruments, including a variety of derivative products (e.g., futures, forwards, swaps and options). For credit exposure information on our OTC derivative products, see Note 4 to the consolidated financial statements. For a discussion of our credit exposure and related credit derivative contracts, see Quantitative and Qualitative Disclosures about Market Risk Risk Management Credit Risk Credit Exposure Derivatives in Part II, Item 7A of the 2016 Form 10-K.

Table of Contents

Risk Disclosures

Country Risk Exposure

Country risk exposure is the risk that events in, or that affect, a foreign country (any country other than the U.S.) might adversely affect us. We actively manage country risk exposure through a comprehensive risk management framework that combines credit and market fundamentals and allows us to effectively identify, monitor and limit country risk. Country risk exposure before and after hedging is monitored and managed. For a further discussion of our country risk exposure see, [Quantitative and Qualitative Disclosures about Market Risk Risk Management Country Risk Exposure](#) in Part II, Item 7A of the 2016 Form 10-K.

Our sovereign exposures consist of financial instruments entered into with sovereign and local governments. Our non-sovereign exposures consist of exposures to primarily corporations and financial institutions. The following table shows our 10 largest non-U.S. country risk net exposures at June 30, 2017. Index credit derivatives are included in the country risk exposure table. Each reference entity within an index is allocated to that reference entity's country of risk. Index exposures are allocated to the underlying reference entities in proportion to the notional weighting of each reference entity in the index, adjusted for any fair value receivable/payable for that reference entity. Where credit risk crosses multiple jurisdictions, for example, a CDS purchased from an issuer in a specific country that references bonds issued by an entity in a different country, the fair value of the CDS is reflected in the Net Counterparty Exposure column based on the country of the CDS issuer. Further, the notional amount of the CDS adjusted for the fair value of the receivable/payable is reflected in the Net Inventory column based on the country of the underlying reference entity.

1. At June 30, 2017, we had exposure to these countries for overnight deposits with banks of approximately \$14.6 billion.
2. Net inventory represents exposure to both long and short single-name and index positions (*i.e.*, bonds and equities at fair value and CDS based on a notional amount assuming zero recovery adjusted for any fair value receivable or payable). As a market maker, we may transact in these CDS positions to facilitate client trading. At June 30, 2017, gross purchased protection, gross written protection, and net exposures related to single-name and index credit derivatives for those countries shown in the previous table were \$(55.7) billion, \$53.5 billion and \$(2.2) billion, respectively.
3. Net counterparty exposure (*i.e.*, repurchase transactions, securities lending and OTC derivatives) takes into consideration legally enforceable master netting agreements and collateral.
4. At June 30, 2017, the benefit of collateral received against counterparty credit exposure was \$7.9 billion in the U.K. with 96% of collateral consisting of cash and government obligations of the U.K., the U.S. and France, and \$9.3 billion in Germany, with 95% of collateral consisting of cash and government obligations of France, Belgium and Germany. The benefit of collateral received against counterparty credit exposure in the other countries totaled approximately \$7.2 billion, with collateral primarily consisting of cash and government obligations of Japan. These amounts do not include collateral received on secured financing transactions.
5. Amounts represent CDS hedges (purchased and sold) on net counterparty exposure and lending executed by trading desks responsible for hedging counterparty and lending credit risk exposures for us. Amounts are based on the CDS notional amount assuming zero recovery adjusted for any fair value receivable or payable. For a further description of the contractual terms for purchased credit protection and whether they may limit the effectiveness of our hedges, see [Credit Exposure Derivatives](#) herein.

Table of Contents

Risk Disclosures

Country Risk Exposures Related to the United Kingdom. At June 30, 2017, our country risk exposures in the U.K. included net exposures of \$17,728 million as shown in the previous table, and overnight deposits of \$6,657 million. The \$16,446 million of exposures to non-sovereigns were diversified across both names and sectors. Of this exposure \$14,162 million was to investment grade counterparties, with the largest single component (\$5,334 million) to exchanges and clearing houses.

Country Risk Exposures Related to Brazil. At June 30, 2017, our country risk exposures in Brazil included net exposures of \$5,208 million as shown in the previous table. Our sovereign net exposures in Brazil were principally in the form of local currency government bonds held onshore to support client activity. The \$1,132 million of exposures to non-sovereigns were diversified across both names and sectors.

Operational Risk

Operational risk refers to the risk of loss, or of damage to our reputation, resulting from inadequate or failed processes or systems, human factors or from external events (*e.g.*, fraud, theft, legal and compliance risks, cyber attacks or damage to physical assets). We may incur operational risk across the full scope of our business activities, including revenue-generating activities (*e.g.*, sales and trading) and support and control groups (*e.g.*, information technology and trade processing). For a further discussion about our operational risk, see Quantitative and Qualitative Disclosures about Market Risk Risk Management Operational Risk in Part II, Item 7A of the 2016 Form 10-K.

Model Risk

Model risk refers to the potential for adverse consequences from decisions based on incorrect or misused model outputs. Model risk can lead to financial loss, poor business and strategic decision making, or damage to the Firm's reputation. The risk inherent in a model is a function of the materiality,

complexity and uncertainty around inputs and assumptions. Model risk is generated from the use of models impacting financial statements, regulatory filings, capital adequacy assessments and the formulation of business strategies. For a further discussion about our model risk, see Quantitative and Qualitative Disclosures about Market Risk Risk Management Model Risk in Part II, Item 7A of the 2016 Form 10-K.

Liquidity Risk

Liquidity risk refers to the risk that we will be unable to finance our operations due to a loss of access to the capital markets or difficulty in liquidating our assets. Liquidity risk also encompasses our ability (or perceived ability) to meet our financial obligations without experiencing significant business disruption or reputational damage that may threaten our viability as a going concern. For a further discussion about our liquidity risk, see Quantitative and Qualitative Disclosures about Market Risk Risk Management Liquidity Risk in Part II, Item 7A of the 2016 Form 10-K and Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources in Part I, Item 2.

Legal and Compliance Risk

Legal and compliance risk includes the risk of legal or regulatory sanctions, material financial loss, including fines, penalties, judgments, damages and/or settlements, or loss to reputation that we may suffer as a result of failure to

Edgar Filing: MORGAN STANLEY - Form 10-Q

comply with laws, regulations, rules, related self-regulatory organization standards and codes of conduct applicable to our business activities. This risk also includes contractual and commercial risk, such as the risk that a counterparty's performance obligations will be unenforceable. It also includes compliance with anti-money laundering and terrorist financing rules and regulations. For a further discussion about our legal and compliance risk, see [Quantitative and Qualitative Disclosures about Market Risk](#), [Risk Management](#), [Legal and Compliance Risk](#) in Part II, Item 7A of the 2016 Form 10-K.

June 2017 Form 10-Q

Controls and Procedures

Under the supervision and with the participation of the Firm's management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of the Firm's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act)). Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

No change in the Firm's internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) occurred during the period covered by this report that materially affected, or is reasonably likely to materially affect, the Firm's internal control over financial reporting.

Table of Contents

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Morgan Stanley:

We have reviewed the accompanying condensed consolidated balance sheet of Morgan Stanley and subsidiaries (the Firm) as of June 30, 2017, and the related condensed consolidated income statements and comprehensive income statements for the three-month and six-month periods ended June 30, 2017 and 2016, and the cash flow statements and statements of changes in total equity for the six-month periods ended June 30, 2017 and 2016. These interim condensed consolidated financial statements are the responsibility of the management of the Firm.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding

the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed interim consolidated financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Firm as of December 31, 2016, and the consolidated income statement, comprehensive income statement, cash flow statement and statement of changes in total equity for the year then ended (not presented herein) included in the Firm's Annual Report on Form 10-K; and in our report dated February 27, 2017, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2016 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

1. The cumulative adjustment relates to the adoption of the following accounting updates on January 1, 2017: *Improvements to Employee Share-Based Payment Accounting*, for which the Firm recorded a cumulative catch-up adjustment to reflect its election to account for forfeitures as they occur (see Note 2 for further information); and *Intra-Entity Transfers of Assets Other Than Inventory*, for which the Firm recorded a cumulative catch-up adjustment to reflect the tax impact from an intercompany sale of assets.
2. Debt valuation adjustment (DVA) represents the change in the fair value resulting from fluctuations in the Firm's credit spreads and other credit factors related to liabilities carried at fair value under the fair value option, primarily related to certain Long-term and Short-term borrowings. In accordance with the early adoption of a provision of the

Edgar Filing: MORGAN STANLEY - Form 10-Q

accounting update *Recognition and Measurement of Financial Assets and Financial Liabilities*, a cumulative catch-up adjustment was recorded as of January 1, 2016 to move the cumulative unrealized DVA amount, net of noncontrolling interests and tax, related to outstanding liabilities under the fair value option election from Retained earnings into Accumulated other comprehensive income (loss) (AOCI). See Note 2 to the consolidated financial statements in the Firm's Annual Report on Form 10-K for the year ended December 31, 2016 (the 2016 Form 10-K) and Note 14 for further information.

3. In accordance with the accounting update *Amendments to the Consolidation Analysis*, a net adjustment was recorded as of January 1, 2016 to both consolidate and deconsolidate certain entities under the new guidance. See Note 2 to the consolidated financial statements in the 2016 Form 10-K for further information.

Notes to Consolidated Financial Statements

(Unaudited)

1. Introduction and Basis of Presentation

The Firm

Morgan Stanley, a financial holding company, is a global financial services firm that maintains significant market positions in each of its business segments Institutional Securities, Wealth Management and Investment Management. Morgan Stanley, through its subsidiaries and affiliates, provides a wide variety of products and services to a large and diversified group of clients and customers, including corporations, governments, financial institutions and individuals. Unless the context otherwise requires, the terms Morgan Stanley or the Firm mean Morgan Stanley (the Parent Company) together with its consolidated subsidiaries.

A description of the clients and principal products and services of each of the Firm s business segments is as follows:

Institutional Securities provides investment banking, sales and trading, lending and other services to corporations, governments, financial institutions, and high to ultra-high net worth clients. Investment banking services consist of capital raising and financial advisory services, including services relating to the underwriting of debt, equity and other securities, as well as advice on mergers and acquisitions, restructurings, real estate and project finance. Sales and trading services include sales, financing and market-making activities in equity and fixed income products, including prime brokerage services, global macro, credit and commodities products. Lending services include originating and/or purchasing corporate loans, commercial and residential mortgage lending, asset-backed lending, financing extended to equities and commodities customers, and loans to municipalities. Other services include investment and research activities.

Wealth Management provides a comprehensive array of financial services and solutions to individual investors and small to medium-sized businesses/institutions covering brokerage and investment advisory services, financial and wealth planning services, annuity and insurance products, credit and other lending products, banking and retirement plan services.

Investment Management provides a broad range of investment strategies and products that span geographies, asset classes, and public and private markets to a diverse group of clients across institutional and intermediary channels. Strategies and products include equity, fixed income, liquidity and alternative/other products. Institutional clients include defined benefit/defined contribution plans, founda-

tions, endowments, government entities, sovereign wealth funds, insurance companies, third-party fund sponsors and corporations. Individual clients are serviced through intermediaries, including affiliated and non-affiliated distributors.

Basis of Financial Information

The unaudited consolidated financial statements (consolidated financial statements) are prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP), which require the Firm to make estimates and assumptions regarding the valuations of certain financial instruments, the valuation of goodwill and intangible assets, compensation, deferred tax assets, the outcome of legal and tax matters, allowance for credit losses and other matters that affect its consolidated financial statements and related disclosures. The Firm believes that

the estimates utilized in the preparation of its consolidated financial statements are prudent and reasonable. Actual results could differ materially from these estimates. Intercompany balances and transactions have been eliminated. Certain reclassifications have been made to prior periods to conform to the current presentation.

The accompanying consolidated financial statements should be read in conjunction with the Firm's consolidated financial statements and notes thereto included in the 2016 Form 10-K. Certain footnote disclosures included in the 2016 Form 10-K have been condensed or omitted from these consolidated financial statements as they are not required for interim reporting under U.S. GAAP. The consolidated financial statements reflect all adjustments of a normal, recurring nature that are, in the opinion of management, necessary for the fair presentation of the results for the interim period. The results of operations for interim periods are not necessarily indicative of results for the entire year.

Consolidation

The consolidated financial statements include the accounts of the Firm, its wholly owned subsidiaries and other entities in which the Firm has a controlling financial interest, including certain variable interest entities (VIE) (see Note 12). For consolidated subsidiaries that are less than wholly owned, the third-party holdings of equity interests are referred to as noncontrolling interests. The net income attributable to noncontrolling interests for such subsidiaries is presented as Net income applicable to noncontrolling interests in the consolidated income statements. The portion of shareholders' equity that is attributable to noncontrolling interests for such subsidiaries is presented as noncontrolling interests, a component of total equity, in the consolidated balance sheets.

Table of Contents

Notes to Consolidated Financial Statements

(Unaudited)

For a discussion of the Firm's involvement with VIEs and its significant regulated U.S. and international subsidiaries, see Notes 1 and 2 to the consolidated financial statements in the 2016 Form 10-K.

2. Significant Accounting Policies

For a detailed discussion about the Firm's significant accounting policies, see Note 2 to the consolidated financial statements in the 2016 Form 10-K.

During the six months ended June 30, 2017 (current year period), other than the following, there were no significant updates made to the Firm's significant accounting policies.

Accounting Standards Adopted

The Firm adopted the following accounting update on January 1, 2017.

Improvements to Employee Share-Based Payment Accounting. This accounting update simplifies the accounting for employee share-based payments, including the recognition of forfeitures, the classification of income tax consequences, and the classification within the consolidated cash flow statements.

Beginning in 2017, the income tax consequences related to share-based payments are required to be recognized in Provision for income taxes in the consolidated income

statements upon the conversion of employee share-based awards instead of additional paid-in capital. The impact of the income tax consequences upon conversion of the awards may be either a benefit or a provision. Conversion of employee share-based awards to Firm shares will primarily occur in the first quarter of each year. The impact of recognizing excess tax benefits upon conversion of awards in the quarter in which the accounting update was adopted (three months ended March 31, 2017) was a \$112 million benefit to Provision for income taxes. The classification of cash flows from excess tax benefits was moved from the financing section to the operating section of the consolidated cash flow statements, and was applied on a retrospective basis.

In addition, this accounting update permits an entity to elect whether to continue to estimate the total forfeitures, or to account for forfeitures on an actual basis as they occur. The Firm has elected to account for forfeitures on an actual basis as they occur. This change is required to be applied using a modified retrospective approach, and upon adoption, the Firm recorded a cumulative catch-up adjustment, decreasing Retained earnings by approximately \$30 million net of tax, increasing Additional paid-in capital by approximately \$45 million and increasing deferred tax assets by approximately \$15 million.

AFS Available for sale

1. At June 30, 2017, the Firm transferred from Level 2 to Level 1 \$1.3 billion and \$1.8 billion of Trading assets-Other sovereign government obligations and Trading liabilities-Other sovereign government obligations, respectively, due to increased market activity in these instruments.
2. At June 30, 2017, loans held at fair value consisted of \$6,775 million of corporate loans, \$662 million of residential real estate loans and \$1,788 million of wholesale real estate loans. At December 31, 2016, loans held at fair value consisted of \$7,217 million of corporate loans, \$966 million of residential real estate loans and \$519 million of wholesale real estate loans.
3. For trading purposes, the Firm holds or sells short equity securities issued by entities in diverse industries and of varying sizes.
4. For positions with the same counterparty that cross over the levels of the fair value hierarchy, both counterparty netting and cash collateral netting are included in the column titled Netting. For contracts with the same counterparty, counterparty netting among positions classified within the same level is included within that shared level. For further information on derivative instruments and hedging activities, see Note 4.
- 5.

Amounts exclude certain investments that are measured at fair value using the net asset value (NAV) per share, which are not classified in the fair value hierarchy. For additional disclosure about such investments, see Fair Value of Investments Measured at NAV herein.

6. Amounts exclude the unsettled fair value on long futures contracts of \$852 million at June 30, 2017 and \$784 million at December 31, 2016 included in Customer and other receivables in the consolidated balance sheets and unsettled fair value of short futures contracts of \$425 million at June 30, 2017 and \$174 million at December 31, 2016 in Customer and other payables in the consolidated balance sheets. These contracts are primarily: classified as Level 1 in the fair value hierarchy, actively traded, and valued based on quoted prices from the exchange.

Table of Contents**Notes to Consolidated Financial Statements****(Unaudited)**

For a description of the valuation techniques applied to the Firm's major categories of assets and liabilities measured at fair value on a recurring basis, see Note 3 to the consolidated financial statements in the 2016 Form 10-K. During the current quarter there were no significant updates made to the Firm's valuation techniques.

Changes in Level 3 Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following tables present additional information about Level 3 assets and liabilities measured at fair value on a recurring basis for the three months ended June 30, 2017 (current quarter), the three months ended June 30, 2016 (prior year quarter), the current year period and the six months ended June 30, 2016 (prior year period). Level 3 instruments may be hedged with instruments classified in Level 1 and Level 2. As a result, the realized and unrealized gains (losses) for assets and liabilities within the Level 3 category presented in the following tables do not reflect the related realized and unrealized gains (losses) on hedging instruments that have been classified by the Firm within the Level 1 and/or Level 2 categories.

Additionally, both observable and unobservable inputs may be used to determine the fair value of positions that the Firm has classified within the Level 3 category. As a result, the unrealized gains (losses) during the period for assets and liabilities within the Level 3 category presented in the following tables herein may include changes in fair value during the period that were attributable to both observable and unobservable inputs. Total realized and unrealized gains (losses) are primarily included in Trading revenues in the consolidated income statements.

Notes to Consolidated Financial Statements

(Unaudited)

Significant Unobservable Inputs Used in Recurring and Nonrecurring Level 3 Fair Value Measurements

The following disclosures provide information on the valuation techniques, significant unobservable inputs, and their ranges and averages for each major category of assets and liabilities measured at fair value on a recurring and nonrecurring basis with a significant Level 3 balance. The level of aggregation and breadth of products cause the range of inputs to be wide and not evenly distributed across the inventory. Further, the range of unobservable inputs may differ across firms in the financial services industry because of diversity in the types of products included in each firm's inventory. For qualitative information on the sensitivity of the fair value measurements to changes in the significant unobservable inputs, see Note 3 to the consolidated financial statements in the 2016 Form 10-K. There are no predictable relationships between multiple significant unobservable inputs attributable to a given valuation technique. A single amount is disclosed when there is no significant difference between the minimum, maximum and average (weighted average or simple average / median).

N/A Not Applicable

N/M Not Meaningful

1. Amounts represent weighted averages except where simple averages and the median of the inputs are provided when more relevant.
2. Credit valuation adjustment (CVA) and funding valuation adjustments (FVA) are included in the balance but excluded from the Valuation Technique(s) and Significant Unobservable Inputs in the previous table. CVA is a Level 3 input when the underlying counterparty credit curve is unobservable. FVA is a Level 3 input in its entirety given the lack of observability of funding spreads in the principal market.
3. Includes derivative contracts with multiple risks (*i.e.*, hybrid products).

Table of Contents**Notes to Consolidated Financial Statements****(Unaudited)**

For a description of the Firm's significant unobservable inputs for all major categories of assets and liabilities, see Note 3 to the consolidated financial statements in the 2016 Form 10-K. During the current quarter there were no significant updates made to the Firm's significant unobservable inputs.

Fair Value of Investments Measured at NAV

For a description of the Firm's investments in private equity funds, real estate funds and hedge funds measured at fair value based on NAV, see Note 3 to the consolidated financial statements in the 2016 Form 10-K.

Investments in Certain Funds Measured at NAV per Share

<i>\$ in millions</i>	At June 30, 2017		At December 31, 2016	
	Fair Value	Commitment	Fair Value	Commitment
Private equity funds	\$ 1,588	\$ 388	\$ 1,566	\$ 335
Real estate funds	1,050	157	1,103	136
Hedge funds	115	18	147	4
Total	\$ 2,753	\$ 563	\$ 2,816	\$ 475

Nonredeemable Funds by Contractual Maturity

<i>\$ in millions</i>	Fair Value at June 30, 2017	
	Private Equity	Real Estate
Less than 5 years	\$ 297	\$ 80
5-10 years	745	644
Over 10 years	546	326
Total	\$ 1,588	\$ 1,050

Restrictions

Investments in hedge funds may be subject to initial period lock-up or gate provisions. A lock-up provision is a provision that provides that during a certain initial period an investor may not make a withdrawal from the fund. A gate provision restricts the amount of redemption that an investor can demand on any redemption date.

Hedge Funds Redemption Frequency

Quarterly	Fair Value At June 30, 2017
Every six months	57%
	%

Greater than six months	21%
Subject to lock-up provisions ¹	22%
Percentage of hedge fund investments that cannot be redeemed due to a gate provision ²	23%

1. Remaining restriction period for these investments was primarily over three years.
2. Gate provision has been imposed by the hedge fund manager primarily for indefinite periods.
The redemption notice periods for hedge funds were primarily greater than six months.

Fair Value Option

The Firm elected the fair value option for certain eligible instruments that are risk managed on a fair value basis to mitigate income statement volatility caused by measurement basis differences between the elected instruments and their associated risk management transactions or to eliminate complexities of applying certain accounting models.

Edgar Filing: MORGAN STANLEY - Form 10-Q

1. Gains (losses) in all periods are mainly attributable to changes in foreign currency rates or interest rates or movements in the reference price or index for short-term and long-term borrowings before the impact of related hedges.

The amounts in the previous table are included within Net revenues and do not reflect any gains or losses on related hedging instruments. In addition to the amounts in the

Table of Contents**Notes to Consolidated Financial Statements****(Unaudited)**

previous table, as discussed in Note 2 to the consolidated financial statements in the 2016 Form 10-K, instruments within Trading assets or Trading liabilities are measured at fair value.

Gains (Losses) Due to Changes in Instrument-Specific Credit Risk

<i>\$ in millions</i>	June 30, 2017	December 31, 2016
Cumulative pre-tax DVA gain (loss) recognized in AOCI	\$ (1,191)	\$ (921)
OCI Other comprehensive income (loss)		

1. Unrealized DVA gains (losses) are recorded in OCI and when such gains (losses) are realized they are recorded in Trading revenues. See Note 2 to the consolidated financial statements in the 2016 Form 10-K and Note 14 for further information.
2. Loans and other debt instrument-specific credit gains (losses) were determined by excluding the non-credit components of gains and losses, such as those due to changes in interest rates.
3. Gains (losses) on lending commitments were generally determined based on the difference between estimated expected client yields and contractual yields at each respective period-end.

Short-Term and Long-Term Borrowings Measured at Fair Value on a Recurring Basis

<i>\$ in millions</i>	At June 30, 2017	At December 31, 2016
Business Unit Responsible for Risk Management		
Equity	\$ 23,605	\$ 21,066
Interest rates	18,502	16,051
Foreign exchange	760	1,114
Credit	709	647
Commodities	232	264
Total	\$ 43,808	\$ 39,142
Net Difference of Contractual Principal Amount Over Fair Value		

<i>\$ in millions</i>	At June 30, 2017	At December 31, 2016
Loans and other debt ¹	\$ 12,986	\$ 13,495
Loans 90 or more days past due and/or on nonaccrual status ¹	11,337	11,502
Short-term and long-term borrowings ²	621	720

1. The majority of the difference between principal and fair value amounts for loans and other debt relates to distressed debt positions purchased at amounts well below par.

2. Short-term and long-term borrowings do not include structured notes where the repayment of the initial principal amount fluctuates based on changes in a reference price or index.

Fair Value Loans on Nonaccrual Status

<i>\$ in millions</i>	At June 30, 2017	At December 31, 2016
Nonaccrual loans	\$ 1,326	\$ 1,536
Nonaccrual loans 90 or more days past due	\$ 796	\$ 787

The previous tables exclude non-recourse debt from consolidated VIEs, liabilities related to failed sales of financial assets, pledged commodities and other liabilities that have specified assets attributable to them.

- Gains and losses for Loans and Other assets Other investments are classified in Other revenues. For other items, gains and losses are recorded in Other revenues if the item is held for sale, otherwise Other expenses.
- Non-recurring changes in the fair value of loans and lending commitments were calculated as follows: for the held for investment category, based on the value of the underlying collateral; and for the held for sale category, based on recently executed transactions, market price quotations, valuation models that incorporate market observable inputs where possible, such as comparable loan or debt prices and credit default swap spread levels adjusted for any basis difference between cash and derivative instruments, or default recovery analysis where such transactions and quotations are unobservable.
- Losses related to Other assets Other investments were determined using techniques that included discounted cash flow models, methodologies that incorporate multiples of certain comparable companies and recently executed transactions.
- Losses related to Other assets Premises, equipment and software costs were determined using techniques that included a default recovery analysis and recently executed transactions.

OTC Over the-counter

1. Effective in the first quarter of 2017, the Chicago Mercantile Exchange (CME) amended its rulebook for cleared OTC derivatives, resulting in the characterization of variation margin transfers as settlement payments as opposed to cash posted as collateral. In the quarter of adoption, the cleared OTC gross derivative assets and liabilities, and related counterparty and cash collateral netting amounts in total decreased by approximately \$13 billion and \$20 billion, respectively.
2. Notional amounts include gross notionals related to open long and short futures contracts of \$2,765 billion and \$732 billion, respectively. The unsettled fair value on these futures contracts (excluded from this table) of \$852 million and \$425 million is included in Customer and other receivables and Customer and other payables, respectively, in the consolidated balance sheets.
3. Amounts relate to master netting agreements and collateral agreements that have been determined by the Firm to be legally enforceable in the event of default but where certain other criteria are not met in accordance with applicable offsetting accounting guidance.

Table of Contents**Notes to Consolidated Financial Statements****(Unaudited)**

4. Amounts include transactions that are either not subject to master netting agreements or collateral agreements or are subject to such agreements but the Firm has not determined the agreements to be legally enforceable as follows: \$3.3 billion of derivative assets and \$3.5 billion of derivative liabilities at June 30, 2017 and \$3.7 billion of derivative assets and \$3.5 billion of derivative liabilities at December 31, 2016.

5. Notional amounts include gross notionals related to open long and short futures contracts of \$2,088 billion and \$332 billion, respectively. The unsettled fair value on these futures contracts (excluded from this table) of \$784 million and \$174 million is included in Customer and other receivables and Customer and other payables, respectively, in the consolidated balance sheets.

For information related to offsetting of certain collateralized transactions, see Note 6. For a discussion of the Firm's derivative instruments and hedging activities, see Note 4 to the consolidated financial statements in the 2016 Form 10-K.

1. Dividend income is included within equity security and index contracts.

The previous table summarizes gains and losses included in Trading revenues in the consolidated income statements from trading activities. These activities include revenues related to derivative and non-derivative financial instruments. The Firm generally utilizes financial instruments across a variety of product types in connection with its market-making and related risk management strategies. Accordingly, the trading revenues presented in the previous table are not representative of the manner in which the Firm manages its business activities and are prepared in a manner similar to the presentation of trading revenues for regulatory reporting purposes.

Total	\$ 96,326	\$ (67,898)	\$ 28,428	\$ 18,135

1. Fair values shown represent the Firm's net exposure to counterparties related to its OTC derivative products.
2. Obligor credit ratings are determined internally by the Credit Risk Management Department.
3. Amounts represent the netting of receivable balances with payable balances for the same counterparty across maturity categories. Receivable and payable balances with the same counterparty in the same maturity category are netted within such maturity category, where appropriate. Cash collateral received is netted on a counterparty basis, provided legal right of offset exists.
4. Fair value is shown net of collateral received (primarily cash and U.S. government and agency securities).

Credit Risk-Related Contingencies

In connection with certain OTC trading agreements, the Firm may be required to provide additional collateral or immediately settle any outstanding liability balances with certain counterparties in the event of a credit rating downgrade of the Firm.

The following table presents the aggregate fair value of certain derivative contracts that contain credit risk-related contingent features that are in a net liability position for which the Firm has posted collateral in the normal course of business.

Net Derivative Liabilities and Collateral Posted

<i>\$ in millions</i>	At June 30, 2017	At December 31, 2016
Net derivative liabilities with credit risk-related contingent features	\$ 19,335	\$ 22,939
Collateral posted	14,672	17,040

The additional collateral or termination payments that may be called in the event of a future credit rating downgrade vary by contract and can be based on ratings by either or both of Moody's Investors Service, Inc. (Moody's) and Standard & Poor's Global Ratings (S&P). The following table shows the future potential collateral amounts and termination payments that could be called or required by counterparties or exchange and clearing organizations in the event of one-notch or two-notch downgrade scenarios based on the relevant contractual downgrade triggers.

Incremental Collateral or Termination Payments upon Potential Future Ratings Downgrade

<i>\$ in millions</i>	At June 30, 2017 ¹	
One-notch downgrade	\$	1,042
Two-notch downgrade		401

1. Amounts include \$1,187 million related to bilateral arrangements between the Firm and other parties where upon the downgrade of one party, the downgraded party must deliver collateral to the other party. These bilateral downgrade arrangements are used by the Firm to manage the risk of counterparty downgrades.

Credit Derivatives and Other Credit Contracts

The Firm enters into credit derivatives, principally through credit default swaps, under which it receives or provides protection against the risk of default on a set of debt obligations issued by a specified reference entity or entities. A majority of the Firm's counterparties for these derivatives are banks, broker-dealers, and insurance and other financial institutions.

For further information on credit derivatives and other credit contracts, see Note 4 to the consolidated financial statements in the 2016 Form 10-K.

1. Fair value amounts are shown on a gross basis prior to cash collateral or counterparty netting.
2. In order to provide an indication of the current payment status or performance risk of the CDS, a breakdown of CDS based on the Firm's internal credit ratings by investment grade and non-investment grade is provided. Internal credit ratings serve as the Credit Risk Management Department's assessment of credit risk and the basis for a comprehensive credit limits framework used to control credit risk. The Firm uses quantitative models and judgment to estimate the various risk parameters related to each obligor.

Table of Contents**Notes to Consolidated Financial Statements****(Unaudited)****5. Investment Securities**

The following tables present information about the Firm's AFS securities, which are carried at fair value, and HTM securities, which are carried at amortized cost. The net unrealized gains or losses on AFS securities are reported on an after-tax basis as a component of AOCI.

Table of Contents**Notes to Consolidated Financial Statements****(Unaudited)**

As discussed in Note 2 to the consolidated financial statements in the 2016 Form 10-K, AFS and HTM securities with a current fair value less than their amortized cost are analyzed as part of the Firm's ongoing assessment of temporarily versus other-than-temporarily impaired at the individual security level.

The Firm believes there are no securities in an unrealized loss position that are other-than-temporarily-impaired at June 30, 2017 and December 31, 2016 for the reasons discussed herein.

For AFS debt securities, the Firm does not intend to sell the securities and is not likely to be required to sell the securities prior to recovery of amortized cost basis. For AFS and HTM debt securities, the securities have not experienced credit losses as the net unrealized losses reported in the previous table are primarily due to higher interest rates since those securities were purchased.

Additionally, the Firm does not expect to experience a credit loss based on consideration of the relevant information (as discussed in Note 2 to the consolidated financial statements in the 2016 Form 10-K), including for U.S. government and agency securities, the existence of an explicit and implicit guarantee provided by the U.S. government. The risk of credit loss on securities in an unrealized loss position is considered minimal because the Firm's U.S. government and agency securities, as well as asset-backed securities (ABS), commercial mortgage-backed securities (CMBS) and collateralized loan obligations (CLOs), are highly rated and because corporate bonds are all investment grade.

For AFS equity securities, the Firm has the intent and ability to hold these securities for a period of time sufficient to allow for any anticipated recovery in market value.

See Note 12 for additional information on securities issued by VIEs, including U.S. agency mortgage-backed securities, non-agency CMBS, auto loan ABS, CLO and FFELP student loan ABS.

6. Collateralized Transactions

The Firm enters into securities purchased under agreements to resell, securities sold under agreements to repurchase, securities borrowed and securities loaned transactions to, among other things, acquire securities to cover short positions and settle other securities obligations, to accommodate customers' needs and to finance its inventory positions. For further discussion of the Firm's collateralized transactions, see Note 6 to the consolidated financial statements in the 2016 Form 10-K.

Carrying value of loans pledged (gross of allowance for loan losses) ¹	3,876	
Total	\$ 45,929	\$ 41,358

1. Counterparties do not have the right to sell or repledge the collateral.

The Firm pledges its trading assets and loans to collateralize securities sold under agreements to repurchase, securities loaned, other secured financings and derivatives. Counterparties may or may not have the right to sell or repledge the collateral.

Pledged financial instruments that can be sold or repledged by the secured party are identified as Trading assets (pledged to various parties) in the consolidated balance sheets. Pledged financial instruments that cannot be sold or repledged by the secured party are shown in the previous table.

Collateral Received

The Firm receives collateral in the form of securities in connection with securities purchased under agreements to resell, securities borrowed, derivative transactions, customer margin loans and securities-based lending. In many cases, the Firm is permitted to sell or repledge these securities held as collateral and use the securities to secure securities sold under agreements to repurchase, to enter into securities lending and derivative transactions or for delivery to counterparties to cover short positions.

The Firm also receives securities as collateral in connection with certain securities-for-securities transactions. In instances where the Firm is the lender and permitted to sell or repledge these securities, it reports the fair value of the collateral received and the related obligation to return the collateral included in Trading assets and Trading liabilities, respectively, in its consolidated balance sheets.

	At June 30, 2017	At December 31, 2016
<i>\$ in millions</i>		
Net customer receivables representing margin loans	\$ 27,744	\$ 24,359

The Firm engages in margin lending to clients that allows the client to borrow against the value of qualifying securities. Margin loans are included within Customer and other receivables in the consolidated balance sheets. Under these agreements and transactions, the Firm receives collateral, including U.S. government and agency securities, other sovereign government obligations, corporate and other debt, and corporate equities. Customer receivables generated from margin lending activities are collateralized by customer-owned securities held by the Firm. The Firm monitors required margin levels and established credit terms daily and, pursuant to such guidelines, requires customers to deposit additional collateral, or reduce positions, when necessary.

For a further discussion of the Firm's margin lending activities, see Note 6 to the consolidated financial statements in the 2016 Form 10-K.

The Firm has additional secured liabilities. For a further discussion of other secured financings, see Note 10.

Cash and Securities Deposited with Clearing Organizations or Segregated

	At June 30, 2017	At December 31, 2016

Other assets - Cash deposited with clearing organizations or segregated under federal and other regulations or requirements	30,171	33,979
Total	\$ 50,522	\$ 57,735

1. Securities segregated under federal regulations for the Firm's U.S. broker-dealers are sourced from Securities purchased under agreements to resell and Trading assets in the consolidated balance sheets.

7. Loans and Allowance for Credit Losses**Loans**

The Firm's loans held for investment are recorded at amortized cost, and its loans held for sale are recorded at the lower of cost or fair value in the consolidated balance sheets. For a further description of these loans, refer to Note 7 to the consolidated financial statements in the 2016 Form 10-K. See Note 3 for further information regarding Loans and lending commitments held at fair value.
