WisdomTree Dynamic Currency Hedged Europe Equity Fund

Investment Objective

The WisdomTree Dynamic Currency Hedged Europe Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Currency Hedged Europe Equity Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.48%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.48%
Fee Waivers	(0.05)% ¹
Total Annual Fund Operating Expenses After Fee Waivers	0.43% ¹

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.43% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 44	\$ 149	\$ 264	\$ 599

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 12% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

Edgar Filing: WisdomTree Trust - Form 497

The Index is a dividend weighted index designed to provide exposure to European equity securities while at the same time dynamically hedging currency exposure to fluctuations between the value of the euro and the U.S. dollar. The Index consists of the equity securities of the dividend-paying companies within the WisdomTree International Equity Index, which defines the dividend-paying universe of companies in the industrialized world, excluding Canada and the United States, that are organized under the laws of a European country, traded in euros,

2 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

and have at least \$1 billion in market capitalization. Countries represented in the Index include Germany, France, the Netherlands, Spain, Belgium, Finland, Italy, Portugal, Austria and Ireland, although this may change from time to time. To be eligible for inclusion in the Index, a company must meet the following criteria: (i) listed for trading on a major stock exchange in one of the aforementioned European countries; (ii) payment of at least \$5 million in cash dividends on shares of common stock in the annual cycle prior to the annual Index screening date; (iii) average daily dollar volume of at least \$100,000 for the three months preceding the Index screening date; and (iv) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date.

Securities are weighted in the Index based on dividends paid over the prior annual cycle. Companies that pay a greater total dollar amount of dividends are more heavily weighted. To derive a company's initial Index weight, (i) multiply the U.S. dollar value of the company's annual gross dividend per share by the number of common shares outstanding for that company (the "Cash Dividend Factor"); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies' Cash Dividend Factors; and (iv) divide the company's Cash Dividend Factor by the sum of all Cash Dividend Factors. The maximum weight of any single security in the Index is capped at 5% and the maximum weight of any one sector and any one country in the Index, is capped at 25%; however, sector, country and security weights may fluctuate above their specified caps in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities. WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the financial sector.

The Index dynamically hedges currency fluctuations in the relative value of the euro against the U.S. dollar, ranging from a 0% to 100% hedge. The Index determines and adjusts the hedge ratio on the euro on a monthly basis using three equally-weighted, quantitative signals: interest rate differentials, momentum, and value. Interest rate differentials are determined by measuring the difference in interest rates, as implied in one month foreign exchange (FX) forwards, between the euro and the U.S. dollar. Momentum is the relative price momentum of the foreign currency as determined by comparing two moving average signals on the historically observed U.S. dollar spot rates over 10 and 240 business day periods. Value is the relative purchasing power of the foreign currency as determined with reference to the foreign currency spot rate over 20 business days as compared to the latest purchasing power parity (PPP) numbers as published by the Office of Economic Cooperation and Development (OECD). This approach is designed to limit losses related to currency as the euro depreciates against the U.S. dollar while participating in gains related to currency when the euro appreciates against the U.S. dollar, thereby seeking to have the Fund benefit from such currency movements while reducing the volatility associated with currency returns.

The Index applies an applicable published currency forward rate to the euro to hedge against fluctuations in the relative value of the euro against the U.S. dollar pursuant to the applicable hedge ratio. The Fund uses forward currency contracts or futures contracts to the extent the euro is hedged.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or

ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

WisdomTree Trust Prospectus 3

Table of Contents

Table of Contents

Market Risk. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

Currency Exchange Rate Risk. The Fund's strategies associated with currency hedging may not be successful. Further, in order to minimize transaction costs, or for other reasons, the Fund's exposure to the non-U.S. currencies may not be hedged to the extent indicated by any or all of the quantitative signals. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in the Fund may also go up or down quickly and unpredictably and investors may lose money.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Derivatives Risk. The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and/or futures contracts. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the futures contracts at any particular time.

Dividend Paying Securities Risk. Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition,

changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

Financial Sector Risk. The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

Foreign Securities Risk. Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and

Table of Contents**Table of Contents**

other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

Geographic Concentration in Europe. Because the Fund invests primarily in the securities of companies in Europe, the Fund's performance is expected to be closely tied to social, political, and economic conditions within Europe and to be more volatile than the performance of more geographically diversified funds. Most developed countries in Western Europe are members of the European Union ("EU"), many are also members of the European Economic and Monetary Union ("EMU"), and most EMU members are part of the euro zone, a group of EMU countries that share the euro as their common currency. Members of the EMU must comply with restrictions on inflation rates, deficits, debt levels, and fiscal and monetary controls. The implementation of any such restrictions or controls, the default of an EU member country on its sovereign debt, significant fluctuations in the euro's exchange rate, or a change in governmental or EU trade regulations could each have a significant impact on the economies of some or all European countries. Further, in June 2016, the United Kingdom voted in a referendum to leave the EU. As a result of the referendum, Standard & Poor's ("S&P") downgraded the United Kingdom's credit rating from "AAA" to "AA" and the EU's credit rating from "AA+" to "AA" in the days that followed the vote. It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for "Brexit" is uncertain. It is also unclear how withdrawal negotiations will be conducted and what the potential consequences may be. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets that could potentially have an adverse effect on the value of the Fund's investments. The Fund currently invests a significant portion of its assets in companies organized in France and Germany, although this may change from time to time.

Geopolitical Risk. Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Hedging Risk. Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. There can be no assurance that the Fund's hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund's equity holdings fall.

Index and Data Risk. The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing

error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Large-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

Table of Contents

Table of Contents

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Fund Performance

The Fund commenced operations on January 7, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. BNY Mellon Asset Management North America Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other

initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

WisdomTree Dynamic Currency Hedged International Equity Fund

Investment Objective

The WisdomTree Dynamic Currency Hedged International Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Currency Hedged International Equity Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.40%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.40%
Fee Waivers	(0.05)% ¹
Total Annual Fund Operating Expenses After Fee Waivers	0.35% ¹

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.35% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 36	\$ 123	\$ 219	\$ 500

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 27% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a dividend weighted index designed to provide exposure to equity securities in the industrialized world, excluding Canada and the United States, that pay regular cash dividends on shares of common stock, while at the same time dynamically hedging currency exposure to fluctuations between the value of the applicable foreign currencies and the U.S. dollar. The Index consists of equity securities of dividend-paying companies. To be eligible for inclusion in the Index, a company must meet the following criteria: (i) incorporation and have their shares

WisdomTree Trust Prospectus 7

Table of Contents**Table of Contents**

listed for trading on one of the major stock exchanges in one of 15 developed European countries (Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, or the United Kingdom), Israel, Japan, Australia, New Zealand, Hong Kong or Singapore; (ii) payment of at least \$5 million in cash dividends on shares of common stock in the annual cycle prior to the annual Index screening date; (iii) market capitalization of at least \$100 million as of the Index screening date; (iv) average daily dollar volume of at least \$100,000 for the three months preceding the Index screening date; and (v) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date.

Securities are weighted in the Index based on dividends paid over the prior annual cycle. Companies that pay a greater total dollar amount of dividends are more heavily weighted. To derive a company's initial Index weight, (i) multiply the U.S. dollar value of the company's annual gross dividend per share by the number of common shares outstanding for that company (the "Cash Dividend Factor"); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies' Cash Dividend Factors; and (iv) divide the company's Cash Dividend Factor by the sum of all Cash Dividend Factors. The maximum weight of any one sector and any one country is capped at 25%; however, sector and country weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil, and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the financial sector.

The Index dynamically hedges currency fluctuations in the relative value of the applicable foreign currencies against the U.S. dollar, ranging from a 0% to 100% hedge. The Index determines and adjusts the hedge ratios on such foreign currencies on a monthly basis using three equally-weighted, quantitative signals: interest rate differentials, momentum, and value. Interest rate differentials are determined by measuring the difference in interest rates, as implied in one month foreign exchange (FX) forwards, between each currency and the U.S. dollar. Momentum is the relative price momentum of the foreign currency as determined by comparing two moving average signals on the historically observed U.S. dollar spot rates over 10 and 240 business day periods. Value is the relative purchasing power of the foreign currency as determined with reference to the foreign currency spot rate over 20 business days as compared to the latest purchasing power parity (PPP) numbers as published by the Office of Economic Cooperation and Development (OECD). This approach is designed to limit losses related to foreign currencies as such currencies depreciate against the U.S. dollar while participating in gains related to foreign currencies when such currencies appreciate against the U.S. dollar, thereby seeking to have the Fund benefit from such currency movements while reducing the volatility associated with currency returns.

The Index applies an applicable published currency forward rate to such foreign currencies to hedge against fluctuations in the relative value of the foreign currencies against the U.S. dollar pursuant to the applicable hedge ratios. The Fund uses forward currency contracts or futures contracts to the extent foreign currencies are hedged. To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

8 WisdomTree Trust Prospectus

Table of Contents

Table of Contents

Market Risk. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

Currency Exchange Rate Risk. The Fund's strategies associated with currency hedging may not be successful. Further, in order to minimize transaction costs, or for other reasons, the Fund's exposure to the non-U.S. currencies may not be hedged to the extent indicated by any or all of the quantitative signals. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in the Fund may also go up or down quickly and unpredictably and investors may lose money.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Derivatives Risk. The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and/or futures contracts. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the futures contracts at any particular time.

Dividend Paying Securities Risk. Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition,

changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

Financial Sector Risk. The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

Foreign Securities Risk. Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and

Table of Contents

Table of Contents

other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in Japan and Europe, particularly the United Kingdom, although this may change from time to time. In June 2016, the United Kingdom voted in a referendum to leave the European Union (“EU”). It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for “Brexit” is uncertain. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets.

Geopolitical Risk. Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.

Hedging Risk. Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. There can be no assurance that the Fund’s hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund’s equity holdings fall.

Index and Data Risk. The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Large-Capitalization Investing Risk. The Fund invests a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

Mid-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Table of Contents

Table of Contents

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Fund Performance

The Fund commenced operations on January 7, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. BNY Mellon Asset Management North America Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

Table of ContentsTable of Contents

WisdomTree Dynamic Currency Hedged International Quality Dividend Growth Fund

Investment Objective

The WisdomTree Dynamic Currency Hedged International Quality Dividend Growth Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Currency Hedged International Quality Dividend Growth Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.58%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Acquired Fund Fees and Expenses	0.38%
Total Annual Fund Operating Expenses	0.96% ¹
Fee Waivers	(0.48)% ²
Total Annual Fund Operating Expenses After Fee Waivers	0.48% ²

The Total Annual Fund Operating Expenses in this fee table may not correlate to the expense ratios in the Fund’s financial highlights and financial statements because the financial highlights and financial statements reflect

- 1 only the operating expenses of the Fund and do not include Acquired Fund Fees and Expenses, which are fees and expenses incurred indirectly by the Fund through its investments in certain underlying investment companies.

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to waive a portion of its Management Fee in an amount equal to the Acquired Fund Fees and Expenses

- 2 attributable to the Fund’s investments in the Underlying Fund, as defined below, as well as an additional 0.10%, through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 49	\$ 258	\$ 484	\$ 1,134

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal period, the Fund’s portfolio turnover rate was 4%

of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares.

Principal Investment Strategies of the Fund

The Fund employs a "passive management" – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index (including indirect investments through the WisdomTree International Quality Dividend Growth Fund (the "Underlying Fund")) whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund's total assets (exclusive of collateral held from securities lending)

12 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

will be invested in component securities of the Index (including indirect investments in the Underlying Fund) and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities. The Underlying Fund tracks the price and yield performance, before fees and expenses, of the WisdomTree International Quality Dividend Growth Index (the “Underlying Fund Index”). The Index and the Underlying Fund Index have identical component securities and employ identical methodologies except that the Underlying Fund Index does not hedge against currency fluctuations. The Underlying Fund, which is also advised by WisdomTree Asset Management, may constitute a substantial portion of the Fund’s assets.

The Index consists of dividend-paying common stocks with growth characteristics of companies in the industrialized world, excluding Canada and the United States, while at the same time dynamically hedging currency exposure to fluctuations between the value of the applicable foreign currencies and the U.S. dollar. The Index is generally comprised of the 300 companies in the WisdomTree International Equity Index with the best combined rank of certain growth and quality factors, specifically long-term earnings growth expectations, return on equity and return on assets. The WisdomTree International Equity Index is a fundamentally weighted index that is comprised of dividend-paying companies that pay regular cash dividends. To be eligible for inclusion in the WisdomTree International Equity Index, a company must be incorporated in and lists its shares for trading on one of the major stock exchanges in one of 15 developed European countries (Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, or the United Kingdom), Israel, Japan, Australia, New Zealand, Hong Kong, or Singapore. Currently a significant portion of the Index is comprised of companies organized in the United Kingdom, although this may change from time to time.

To be eligible for inclusion in the Index, a company must meet the following criteria: (i) payment of at least \$5 million in cash dividends on shares of common stock in the annual cycle prior to the annual Index screening date; (ii) market capitalization of at least \$1 billion as of the annual Index screening date; (iii) an earnings yield that is greater than its dividend yield; (iv) average daily dollar volume of at least \$100,000 for the three months preceding the annual Index screening date; and (v) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date. Eligible companies are ranked according to a rules-based calculation based on the following three factors, weighted as follows: long-term earnings growth expectations (50%), the historical three-year average return on equity (25%), and the historical three-year average return on assets (25%). The top 300 ranked companies are selected for inclusion in the Index.

Securities are weighted in the Index based on dividends paid over the prior annual cycle. Companies that pay a greater total dollar amount of dividends are more heavily weighted. To derive a company’s initial Index weight, (i) multiply the U.S. dollar value of the company’s annual gross dividend per share by the number of common shares outstanding for that company (the “Cash Dividend Factor”); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies’ Cash Dividend Factors; and (iv) divide the company’s Cash Dividend Factor by the sum of all Cash Dividend Factors. The maximum weight of any security in the Index is capped at 5% and the maximum weight of any one sector or country in the Index is capped at 20%; however, security, sector and/or country weights may fluctuate above their specified caps in response to market conditions and/or the application of the volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security’s weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments currently uses Standard & Poor’s Global Industry Classification Standards (“S&P GICS”) to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the consumer discretionary, consumer staples, health care and industrial sectors.

The Index dynamically hedges currency fluctuations in the relative value of the applicable foreign currencies against the U.S. dollar, ranging from a 0% to 100% hedge. The Index determines and adjusts the hedge ratios on such foreign currencies on a monthly basis using three equally-weighted, quantitative signals: interest rate differentials, momentum, and value. Interest rate differentials are determined by measuring the difference in interest rates, as implied in one month foreign exchange (FX) forwards, between each currency and the U.S. dollar. Momentum is the relative price momentum of the foreign currency as determined by comparing two moving average signals on the historically observed U.S. dollar spot rates over 10 and 240 business day periods. Value is the relative purchasing power of the foreign currency as determined with reference to the foreign currency spot rate

WisdomTree Trust Prospectus 13

Table of Contents

Table of Contents

over 20 business days as compared to the latest purchasing power parity (PPP) numbers as published by the Office of Economic Cooperation and Development (OECD). This approach is designed to limit losses related to foreign currencies as such currencies depreciate against the U.S. dollar while participating in gains related to foreign currencies when such currencies appreciate against the U.S. dollar, thereby seeking to have the Fund benefit from such currency movements while reducing the volatility associated with currency returns.

The Index applies an applicable published currency forward rate to such foreign currencies to hedge against fluctuations in the relative value of the foreign currencies against the U.S. dollar pursuant to the applicable hedge ratios. The Fund uses forward currency contracts or futures contracts to the extent foreign currencies are hedged. To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Market Risk. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

Consumer Discretionary Sector Risk. The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

Consumer Staples Sector Risk. The Fund currently invests a significant portion of its assets in the consumer staples sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer staples sector includes, for example, food and drug retail and companies whose primary lines of business are food, beverage and other household items, including agricultural products. This sector can be significantly affected by, among other things, changes in price and availability of underlying commodities,

rising energy prices and global and economic conditions.

Currency Exchange Rate Risk. The Fund's strategies associated with currency hedging may not be successful. Further, in order to minimize transaction costs, or for other reasons, the Fund's exposure to the non-U.S. currencies may not be hedged to the extent indicated by any or all of the quantitative signals. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in the Fund may also go up or down quickly and unpredictably and investors may lose money.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information.

Table of Contents

Table of Contents

Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Derivatives Risk. The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and/or futures contracts. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the futures contracts at any particular time.

Dividend Paying Securities Risk. Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

Foreign Securities Risk. Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in Europe, particularly the United Kingdom, although this may change from time to time. In June 2016, the United Kingdom voted in a referendum to leave the European Union ("EU"). It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for "Brexit" is uncertain. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets.

Geopolitical Risk. Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental

disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Growth Investing Risk. Growth stocks, as a group, may be out of favor with the market and underperform value stocks or the overall equity market. Growth stocks are generally more sensitive to market movements than other types of stocks primarily because their prices are based heavily on the future expectations of the economy and the stock's issuing company.

Health Care Sector Risk. The Fund currently invests a significant portion of its assets in the health care sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The health care sector includes, for example, biotechnology, pharmaceutical, health care facilities, and health care equipment and supply companies. This sector can be significantly affected by, among other things, lapsing patent protection, technological developments that make drugs obsolete, government regulation, price controls, and approvals for drugs.

Table of Contents

Table of Contents

Hedging Risk. Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. There can be no assurance that the Fund's hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund's equity holdings fall.

Index and Data Risk. The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Industrial Sector Risk. The Fund currently invests a significant portion of its assets in the industrial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The industrial sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

Investment in the Underlying Fund Risk. The Fund's investment performance and risks may be directly related to the investment performance and risks of the Underlying Fund.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Large-Capitalization Investing Risk. The Fund invests a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

Mid-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market

as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Fund Performance

The Fund commenced operations on November 3, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the

Table of Contents

Table of Contents

Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.
Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. BNY Mellon Asset Management North America Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2016.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2016.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2016.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

WisdomTree Trust Prospectus 17

Table of ContentsTable of Contents

WisdomTree Dynamic Currency Hedged International SmallCap Equity Fund

Investment Objective

The WisdomTree Dynamic Currency Hedged International SmallCap Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Currency Hedged International SmallCap Equity Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.48%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.48%
Fee Waivers	(0.05)% ¹
Total Annual Fund Operating Expenses After Fee Waivers	0.43% ¹

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.43% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 44	\$ 149	\$ 264	\$ 599

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 75% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of securities in the Index whose risk, return and other characteristics resemble the risk, return, and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a dividend weighted index designed to provide exposure to small-capitalization equity securities in the industrialized world, excluding Canada and the United States, that pay regular cash dividends on shares of common stock, while at the same time dynamically hedging currency exposure to fluctuations between the value of

18 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

foreign currencies and the U.S. dollar. The Index consists of the equity securities of companies that comprise the bottom 25% of the market capitalization of the WisdomTree International Equity Index, as of the annual Index screening date, after the 300 largest companies have been removed. As of September 30, 2017, the Index had a market capitalization range from \$103.7 million to \$4.6 billion, with an average market capitalization of \$1.1 billion. To be eligible for inclusion in the Index, a company must meet the following criteria: (i) incorporation and have their shares listed for trading on one of the major stock exchanges in one of 15 developed European countries (Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, or the United Kingdom), Israel, Japan, Australia, New Zealand, Hong Kong or Singapore; (ii) payment of at least \$5 million in cash dividends on shares of common stock in the annual cycle prior to the annual Index screening date; (iii) market capitalization of at least \$100 million as of the Index screening date; (iv) average daily dollar volume of at least \$100,000 for the three months preceding the Index screening date; and (v) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date.

Securities are weighted in the Index based on dividends paid over the prior annual cycle. Companies that pay a greater total dollar amount of dividends are more heavily weighted. To derive a company's initial Index weight, (i) multiply the U.S. dollar value of the company's annual gross dividend per share by the number of common shares outstanding for that company (the "Cash Dividend Factor"); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies' Cash Dividend Factors; and (iv) divide the company's Cash Dividend Factor by the sum of all Cash Dividend Factors. The maximum weight of any one sector and any one country is capped at 25%; however, sector and country weights may fluctuate above their specified caps in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the consumer discretionary and industrial sectors.

The Index dynamically hedges currency fluctuations in the relative value of the applicable foreign currencies against the U.S. dollar, ranging from a 0% to 100% hedge. The Index determines and adjusts the hedge ratios on such foreign currencies on a monthly basis using three equally-weighted, quantitative signals: interest rate differentials, momentum, and value. Interest rate differentials are determined by measuring the difference in interest rates, as implied in one month foreign exchange (FX) forwards, between each currency and the U.S. dollar. Momentum is the relative price momentum of the foreign currency as determined by comparing two moving average signals on the historically observed U.S. dollar spot rates over 10 and 240 business day periods. Value is the relative purchasing power of the foreign currency as determined with reference to the foreign currency spot rate over 20 business days as compared to the latest purchasing power parity (PPP) numbers as published by the Office of Economic Cooperation and Development (OECD). This approach is designed to limit losses related to foreign currencies as such currencies depreciate against the U.S. dollar while participating in gains related to foreign currencies as such currencies appreciate against the U.S. dollar, thereby seeking to have the Fund benefit from such currency movements while reducing the volatility associated with currency returns.

The Index applies an applicable published currency forward rate to such foreign currencies to hedge against fluctuations in the relative value of the foreign currencies against the U.S. dollar pursuant to the applicable hedge ratios. The Fund uses forward currency contracts or futures contracts to the extent foreign currencies are hedged.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections

WisdomTree Trust Prospectus 19

Table of Contents

Table of Contents

in the Fund’s Prospectus titled “Additional Principal Risk Information About the Funds” and “Additional Non-Principal Risk Information.”

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Market Risk. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund’s NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund’s primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

Consumer Discretionary Sector Risk. The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund’s performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers’ disposable income levels, and propensity to spend.

Currency Exchange Rate Risk. The Fund’s strategies associated with currency hedging may not be successful. Further, in order to minimize transaction costs, or for other reasons, the Fund’s exposure to the non-U.S. currencies may not be hedged to the extent indicated by any or all of the quantitative signals. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in the Fund may also go up or down quickly and unpredictably and investors may lose money.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund’s operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund’s third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Derivatives Risk. The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund’s Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value

of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and/or futures contracts. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the futures contracts at any particular time.

Dividend Paying Securities Risk. Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

Table of Contents

Table of Contents

Foreign Securities Risk. Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in Japan and Europe, particularly the United Kingdom, although this may change from time to time. In June 2016, the United Kingdom voted in a referendum to leave the European Union (“EU”). It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for “Brexit” is uncertain. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets.

Geopolitical Risk. Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.

Hedging Risk. Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. There can be no assurance that the Fund’s hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund’s equity holdings fall.

Index and Data Risk. The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Industrial Sector Risk. The Fund currently invests a significant portion of its assets in the industrial sector, and therefore the Fund’s performance could be negatively impacted by events affecting this sector. The industrial

sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Mid-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of

Table of Contents

Table of Contents

mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Small-Capitalization Investing Risk. The Fund invests primarily in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to adverse economic developments as well as changes in interest rates, government regulation, borrowing costs and earnings.

Fund Performance

The Fund commenced operations on January 7, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. BNY Mellon Asset Management North America Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently,

Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

WisdomTree Trust Prospectus 23

Table of ContentsTable of Contents

WisdomTree Dynamic Currency Hedged Japan Equity Fund

Investment Objective

The WisdomTree Dynamic Currency Hedged Japan Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Currency Hedged Japan Equity Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.48%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.48%
Fee Waivers	(0.05)% ¹
Total Annual Fund Operating Expenses After Fee Waivers	0.43% ¹

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.43% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 44	\$ 149	\$ 264	\$ 599

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 15% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a dividend weighted index designed to provide exposure to Japanese equity securities while at the same time dynamically hedging currency exposure to fluctuations between the value of the Japanese yen and the U.S. dollar. The Index consists of the equity securities of dividend-paying companies within the WisdomTree International Equity Index, which defines the dividend paying universe of companies in the industrialized world, excluding Canada and the United States, that are incorporated in Japan and traded on the Tokyo Stock Exchange.

24 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

To be eligible for inclusion in the Index, a company must meet the following criteria: (i) payment of at least \$5 million in cash dividends on shares of common stock in the annual cycle prior to the annual Index screening date; (ii) market capitalization of at least \$100 million as of the Index screening date; (iii) average daily dollar volume of at least \$100,000 for the three months preceding the Index screening date; and (iv) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date.

Securities are weighted in the Index based on dividends paid over the prior annual cycle. Companies that pay a greater total dollar amount of dividends are more heavily weighted. To derive a company's initial Index weight, (i) multiply the U.S. dollar value of the company's annual gross dividend per share by the number of common shares outstanding for that company (the "Cash Dividend Factor"); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies' Cash Dividend Factors; and (iv) divide the company's Cash Dividend Factor by the sum of all Cash Dividend Factors. The maximum weight of any single security in the Index is capped at 5% and the maximum weight of any one sector in the Index is capped at 25%; however, security and sector weights may fluctuate above their specified caps in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the consumer discretionary, financial and industrial sectors.

The Index dynamically hedges currency fluctuations in the relative value of the Japanese yen against the U.S. dollar, ranging from a 0% to 100% hedge. The Index determines and adjusts the hedge ratio on the Japanese yen on a monthly basis using three equally-weighted, quantitative signals: interest rate differentials, momentum, and value. Interest rate differentials are determined by measuring the difference in interest rates, as implied in one month foreign exchange (FX) forwards, between the Japanese yen and the U.S. dollar. Momentum is the relative price momentum of the foreign currency as determined by comparing two moving average signals on the historically observed U.S. dollar spot rates over 10 and 240 business day periods. Value is the relative purchasing power of the foreign currency as determined with reference to the foreign currency spot rate over 20 business days as compared to the latest purchasing power parity (PPP) numbers as published by the Office of Economic Cooperation and Development (OECD). This approach is designed to limit losses related to currency as the Japanese yen depreciates against the U.S. dollar while participating in gains related to currency when the Japanese yen appreciates against the U.S. dollar, thereby seeking to have the Fund benefit from such currency movements while reducing the volatility associated with currency returns. The Index applies an applicable published currency forward rate to the Japanese yen to hedge against fluctuations in the relative value of the Japanese yen against the U.S. dollar pursuant to the applicable hedge ratio. The Fund uses forward currency contracts or futures contracts to the extent the Japanese yen is hedged.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as its Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk

Information.”

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

WisdomTree Trust Prospectus 25

Table of Contents

Table of Contents

Market Risk. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

Consumer Discretionary Sector Risk. The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

Currency Exchange Rate Risk. The Fund's strategies associated with currency hedging may not be successful. Further, in order to minimize transaction costs, or for other reasons, the Fund's exposure to the non-U.S. currencies may not be hedged to the extent indicated by any or all of the quantitative signals. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in the Fund may also go up or down quickly and unpredictably and investors may lose money.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Derivatives Risk. The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and/or futures contracts. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities,

fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the futures contracts at any particular time.

Dividend Paying Securities Risk. Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

Financial Sector Risk. The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

Table of Contents**Table of Contents**

Foreign Securities Risk. Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

Geographic Concentration in Japan. Because the Fund invests primarily in the securities of companies in Japan, the Fund's performance is expected to be closely tied to social, political, and economic conditions within Japan and to be more volatile than the performance of more geographically diversified funds. The Japanese economy has only recently emerged from a prolonged economic downturn. Since the year 2000, Japan's economic growth rate has remained relatively low. Economic growth is heavily dependent on international trade, government support of the financial services sector and other troubled sectors, and consistent government policy supporting its export market. Slowdowns in the economies of key trading partners such as the United States, China and/or countries in Southeast Asia, including economic, political or social instability in such countries, could also have a negative impact on the Japanese economy as a whole. Currency fluctuations may also adversely impact the Japanese economy and its export market. In the past, the Japanese government has intervened in its currency market to maintain or reduce the value of the yen. Any such intervention could cause the yen's value to fluctuate sharply and unpredictably and could cause losses to investors. In addition, Japan's labor market is adapting to an aging workforce, declining population, and demand for increased labor mobility. These demographic shifts and fundamental structural changes to the labor market may negatively impact Japan's economic competitiveness. These and other factors could have a negative impact on the Fund's performance and increase the volatility of an investment in the Fund.

Geopolitical Risk. Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Hedging Risk. Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. There can be no assurance that the Fund's hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund's equity holdings fall.

Index and Data Risk. The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified

and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Industrial Sector Risk. The Fund currently invests a significant portion of its assets in the industrial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The industrial sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Table of Contents

Table of Contents

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Large-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

Mid-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Fund Performance

The Fund commenced operations on January 7, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. BNY Mellon Asset Management North America Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy

and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

28 WisdomTree Trust Prospectus

Table of Contents

Table of Contents

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

WisdomTree Trust Prospectus 29

Table of ContentsTable of Contents

WisdomTree Emerging Markets Dividend Fund

Investment Objective

The WisdomTree Emerging Markets Dividend Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Emerging Markets Dividend Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.32%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.32%

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 33	\$ 103	\$ 180	\$ 406

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 15% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return, and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a dividend weighted index that consists of emerging market dividend-paying common stocks. The starting universe of the Index consists of equity securities of companies that meet the following eligibility requirements: (i) incorporated (and/or domiciled with respect to China) within one of 17 emerging market nations (Brazil, Chile, China, Czech Republic, Hungary, India, Indonesia, Korea, Malaysia, Mexico, the Philippines, Poland, Russia, South Africa, Taiwan, Thailand, and Turkey); (ii) listed for trading on a major stock exchange in one of the aforementioned emerging market countries (except Chinese companies must have shares listed in Hong Kong); (iii)

payment of at least \$5 million in gross cash dividends on shares of common stock in the annual cycle prior to the annual Index screening date; (iv) market capitalization of at least \$200 million as of the Index screening date; (v) average daily dollar volume of at least \$200,000 for each of the six months preceding the Index

30 WisdomTree Trust Prospectus

Table of Contents
Table of Contents

screening date; and (vi) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date.

Securities are weighted in the Index based on dividends paid over the prior annual cycle. Companies that pay a greater total dollar amount of dividends are more heavily weighted. To derive a company's initial Index weight, (i) multiply the U.S. dollar value of the company's annual gross dividend per share by the number of common shares outstanding for that company (the "Cash Dividend Factor"); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies' Cash Dividend Factors; and (iv) divide the company's Cash Dividend Factor by the sum of all Cash Dividend Factors. At the time of the Index's annual screening date, the maximum weight of any one sector and any one country in the Index is capped at 25%; however, sector and country weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the financial sector.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Market Risk. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

Capital Controls and Sanctions Risk. Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions may, without prior warning, lead to foreign government intervention (including intervention by the U.S. government with respect to foreign governments, economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Capital controls and/or sanctions may also impact the ability of the Fund to buy, sell, transfer,

Table of Contents

Table of Contents

receive, deliver or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of the Fund, and cause the Fund to decline in value.

Cash Redemption Risk. The Fund's investment strategy will require it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds. The Fund may be required to sell or unwind portfolio investments in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used.

Currency Exchange Rate Risk. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Dividend Paying Securities Risk. Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

Emerging Markets Risk. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

Financial Sector Risk. The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

Foreign Securities Risk. Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to

risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund expects to invest a significant portion of its assets in companies incorporated and/or domiciled in Taiwan and China, although this may change from time to time.

Geopolitical Risk. Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Table of Contents

Table of Contents

Index and Data Risk. The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Large-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

Mid-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Fund Performance

The Fund commenced operations on April 7, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund’s return based on net assets and comparing the Fund’s performance to a broad measure of market performance.

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. BNY Mellon Asset Management North America Corporation (“Mellon Capital”) serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in April 2016.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in April 2016.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

WisdomTree Europe Domestic Economy Fund

Investment Objective

The WisdomTree Europe Domestic Economy Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Europe Domestic Economy Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.58%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.58%
Fee Waivers	(0.10)% ¹
Total Annual Fund Operating Expenses After Fee Waivers	0.48% ¹

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.48% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 49	\$ 176	\$ 314	\$ 716

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 12% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of securities in the Index whose risk, return and other characteristics resemble the risk, return, and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index consists of common stocks of European companies that derive more than 50% of their revenue from Europe. The Index is designed with a goal of maximizing exposure to European companies with significant European revenue that may benefit from an economic recovery in Europe and increased buying power by Europeans.

Companies in the Index must be traded in euros and be incorporated and list their shares on the stock exchange in one of the following European countries: Germany, France, the Netherlands, Spain, Belgium, Finland, Italy, Portugal, Austria, and Ireland. To be eligible for inclusion in the Index, a company must meet the following

WisdomTree Trust Prospectus 35

Table of Contents**Table of Contents**

criteria: (i) market capitalization of at least \$1 billion as of the Index screening date; (ii) average daily dollar volume of at least \$200,000 for the three months preceding the Index screening date; and (iii) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date. Companies from the following sectors are not eligible for inclusion in the Index: consumer staples, health care, telecommunications, and utilities.

The Index is a modified market capitalization weighted index designed to increase weight to companies that have the highest positive correlation in equity performance to the European Commission Economic Sentiment Indicator—an indicator of Europe’s economic strength. Securities are weighted in the Index based on a composite weighting of two individual weighting factors: (i) float-adjusted market capitalization (25% of weight); and (ii) a correlation rank factor (75% of weight). To derive the first factor, divide a company’s float-adjusted market capitalization by the total float-adjusted market capitalization of all Index components. “Float-adjusted” means that the share amounts used in calculating the first factor reflect only shares available to investors. Shares held by control groups, public companies and government agencies are excluded. To derive the second factor, each company is ranked, relative to the other Index components, based on its monthly correlation to the European Commission Economic Sentiment Indicator over the last five years. Each company’s correlation rank factor is determined by dividing its rank by the total number of Index components. For ranking purposes, the rank of the company with the highest correlation is equal to the total number of Index components, and the rank of the company with the lowest correlation is 1. Each security’s initial weight is the sum of the float adjusted market capitalization factor multiplied by 0.25 and the correlation rank factor multiplied by 0.75. The maximum weight of any one sector or country in the Index, at the time of the Index’s annual screening date, is capped at 33%; however, sector and country weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security’s weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. (“WisdomTree Investments”), as index provider, currently uses Standard & Poor’s Global Industry Classification Standards (“S&P GICS”) to define companies within a sector. The following sectors are included in the Index: consumer discretionary, energy, financials, industrials, information technology, materials and real estate. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the consumer discretionary, financial and industrial sectors.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as its Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund’s Prospectus titled “Additional Principal Risk Information About the Funds” and “Additional Non-Principal Risk Information.”

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Market Risk. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund’s NAV and market price may fluctuate significantly in response to these and other

factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund’s primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

Table of Contents

Table of Contents

Consumer Discretionary Sector Risk. The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

Currency Exchange Rate Risk. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Financial Sector Risk. The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

Foreign Securities Risk. Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

Geographic Concentration in Europe. Because the Fund invests primarily in the securities of companies in Europe, the Fund's performance is expected to be closely tied to social, political, and economic conditions within Europe and to be more volatile than the performance of more geographically diversified funds. Most developed countries in Western Europe are members of the European Union ("EU"), many are also members of the European Economic and Monetary Union ("EMU"), and most EMU members are part of the euro zone, a group of EMU countries that share the euro as their common currency. Members of the EMU must comply with restrictions on inflation rates, deficits, debt levels, and fiscal and monetary controls. The implementation of any such restrictions or controls, the default of an EU member country on its sovereign debt, significant fluctuations in the euro's exchange rate, or a change in governmental or EU trade regulations could each have a significant impact

on the economies of some or all European countries. Further, in June 2016, the United Kingdom voted in a referendum to leave the EU. As a result of the referendum, Standard & Poor's ("S&P") downgraded the United Kingdom's credit rating from "AAA" to "AA" and the EU's credit rating from "AA+" to "AA" in the days that followed the vote. It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for "Brexit" is uncertain. It is also unclear how withdrawal negotiations will be conducted and what the potential consequences may be. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets that could potentially have an adverse effect on the value of the Fund's investments. The Fund currently invests a significant portion of its assets in companies organized in France, Germany and Italy, although this may change from time to time.

Geopolitical Risk. Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Table of Contents

Table of Contents

Index and Data Risk. The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Industrial Sector Risk. The Fund currently invests a significant portion of its assets in the industrial sector, and therefore the Fund’s performance could be negatively impacted by events affecting this sector. The industrial sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Large-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

Mid-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic

or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Small-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to adverse economic developments as well as changes in interest rates, government regulation, borrowing costs and earnings.

Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All

38 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

returns assume reinvestment of dividends and distributions. If WisdomTree Asset Management had not waived certain fees during certain periods, the Fund's returns would have been lower. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

The Fund's year-to-date total return as of September 30, 2017 was 32.57%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	9.30%	3Q/2016
Lowest Return	(10.47)%	2Q/2016

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2016

	1 Year	Since Inception October 29, 2015
WisdomTree Europe Domestic Economy Fund		
Return Before Taxes Based on NAV	(2.40)%	(2.39)%
Return After Taxes on Distributions	(2.59)%	(2.55)%
Return After Taxes on Distributions and Sale of Fund Shares	(0.57)%	(1.51)%
WisdomTree Europe Domestic Economy Index (Reflects no deduction for fees, expenses or taxes)	(2.21)%	(2.32)%
MSCI EMU Index (Reflects no deduction for fees, expenses or taxes)	1.34%	(2.03)%

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. BNY Mellon Asset Management North America Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in October 2015.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in October 2015.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in October 2015.

WisdomTree Trust Prospectus 39

Table of Contents

Table of Contents

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

Table of ContentsTable of Contents

WisdomTree Global ex-Mexico Equity Fund

Investment Objective

The WisdomTree Global ex-Mexico Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Global ex-Mexico Equity Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.20%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
	1
Total Annual Fund Operating Expenses	0.20%

1 Other Expenses are based on estimated amounts for the current fiscal year.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 20	\$ 64	\$ 113	\$ 255

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal period, the Fund’s portfolio turnover rate was 2% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return, and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a float-adjusted market capitalization weighted index that is comprised of the equity securities of companies in developed countries and emerging markets throughout the world, excluding Mexico, that meet certain size and volume requirements. The starting universe of the Index consists of the largest 2,000 equity securities based on float-adjusted market capitalization that meet the following eligibility requirements:

Edgar Filing: WisdomTree Trust - Form 497

To be eligible for inclusion in the Index as a U.S. constituent, a company must meet the following criteria: (i) incorporated and domiciled in the U.S., (ii) listed on the New York Stock Exchange (NYSE), the NASDAQ Global Select Market, or the NASDAQ Global Market (together, the “three major exchanges”), (iii) float-adjusted market capitalization of at least \$100 million as of the annual Index screening date, and (iv) average daily dollar trading volume of at least \$100,000 for three months preceding the annual Index screening date.

WisdomTree Trust Prospectus 41

Table of Contents**Table of Contents**

To be eligible for inclusion in the Index as a constituent from the remainder of the developed world, a company must meet the following criteria: (i) incorporated and/or domiciled in one of the following countries: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Luxembourg, Netherlands, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, or the United Kingdom, (ii) listed on an exchange in one of the aforementioned countries, (iii) float-adjusted market capitalization of at least \$100 million as of the annual Index screening date, (iv) average daily dollar trading volume of at least \$100,000 for three months preceding the annual Index screening date, and (v) trading of at least 250,000 shares per month for each of the six months preceding the annual Index screening date.

To be eligible for inclusion in the Index as an emerging market constituent, a company must meet the following criteria: (i) incorporated and/or domiciled in one of the following countries: Brazil, Bulgaria, Chile, China, Colombia, Cyprus, Czech Republic, Estonia, Greece, Hungary, Iceland, India, Korea, Latvia, Lithuania, Malta, Peru, Poland, Romania, Slovakia, or Slovenia, (ii) listed on an exchange in one of the aforementioned countries, (iii) float-adjusted market capitalization of at least \$200 million as of the annual Index screening date, (iv) average daily dollar trading volume of at least \$200,000 for each of the six months preceding the annual Index screening date, and (v) trading of at least 250,000 shares per month for each of the six months preceding the annual Index screening date.

These securities are weighted in the Index based on their float-adjusted market capitalization. “Float-adjusted” market capitalization means that the share amounts used in calculating a company’s market capitalization reflect only shares available to investors. The maximum weight of any one sector in the Index, at the time of the Index’s annual screening date, is capped at 25%; however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments, as described below. As of the date of this Prospectus, non-U.S. equity securities comprise at least 40% of the Index, and the Adviser expects that, under normal circumstances, non-U.S. equity securities will comprise at least 40% of the Fund.

In addition, the Index methodology includes volume factor adjustments such that if a component security does not meet certain trading volume thresholds, either (i) the security will be eliminated from inclusion in the Index or (ii) its weight in the Index will be reduced and reallocated pro rata among the other securities, in accordance with the rules-based Index methodology.

WisdomTree Investments currently uses Standard & Poor’s Global Industry Classification Standards (“S&P GICS”) to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the financial and information technology sectors.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund’s Prospectus titled “Additional Principal Risk Information About the Funds” and “Additional Non-Principal Risk Information.”

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Market Risk. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares

Table of Contents**Table of Contents**

in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

Capital Controls and Sanctions Risk. Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions may, without prior warning, lead to foreign government intervention (including intervention by the U.S. government with respect to foreign governments, economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Capital controls and/or sanctions may also impact the ability of the Fund to buy, sell, transfer, receive, deliver or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of the Fund, and cause the Fund to decline in value.

Currency Exchange Rate Risk. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Emerging Markets Risk. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

Financial Sector Risk. The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

Foreign Securities Risk. Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in Japan and Europe, particularly the United Kingdom, although this may change from time to time. In June 2016, the United Kingdom voted in a referendum to leave the European Union (“EU”). It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for “Brexit” is uncertain.

Table of Contents

Table of Contents

Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets.

Geopolitical Risk. Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Index and Data Risk. The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Information Technology Sector Risk. The Fund currently invests a significant portion of its assets in the information technology sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Large-Capitalization Investing Risk. The Fund invests a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Fund Performance

The Fund commenced operations on February 10, 2017, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

Table of Contents

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. BNY Mellon Asset Management North America Corporation (“Mellon Capital”) serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in February 2017.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in February 2017.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in February 2017.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

WisdomTree Trust Prospectus 45

Table of ContentsTable of Contents

WisdomTree Global Hedged SmallCap Dividend Fund

Investment Objective

The WisdomTree Global Hedged SmallCap Dividend Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Global Hedged SmallCap Dividend Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.43%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Acquired Fund Fees and Expenses	0.43%
Total Annual Fund Operating Expenses	0.86% ¹
Fee Waivers	(0.43)% ²
Total Annual Fund Operating Expenses After Fee Waivers	0.43% ²

The Total Annual Fund Operating Expenses in this fee table may not correlate to the expense ratios in the Fund’s financial highlights and financial statements because the financial highlights and financial statements reflect only the operating expenses of the Fund and do not include Acquired Fund Fees and Expenses, which are fees and expenses incurred indirectly by the Fund through its investments in certain underlying investment companies.

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to waive a portion of its Management Fee in an amount equal to the Acquired Fund Fees and Expenses attributable to the Fund’s investments in the Underlying Fund, as defined below, through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 44	\$ 231	\$ 435	\$ 1,021

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 3% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of securities in the Index (including indirect investments through the WisdomTree Global SmallCap Dividend Fund (the “Underlying Fund”)) whose risk, return and other characteristics resemble the risk, return, and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index (including indirect investments in the Underlying Fund) and investments that have economic characteristics that are substantially identical to the economic characteristics of

46 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

such component securities. The Underlying Fund tracks the price and yield performance, before fees and expenses, of the WisdomTree Global SmallCap Dividend Index (the “Underlying Fund Index”). The Index and the Underlying Fund Index have identical component securities and employ identical methodologies except that the Underlying Fund Index does not hedge against currency fluctuations; whereas, the Index hedges against currency fluctuations by applying an applicable published one-month currency forward rate to the total equity exposure of each country in the Index. The Underlying Fund, which is also advised by WisdomTree Asset Management, may constitute a substantial portion of the Fund’s assets.

The Index is a fundamentally weighted index designed to provide exposure to small-capitalization companies selected from the WisdomTree Global Dividend Index (“Parent Index”), which defines the dividend-paying universe of companies in the United States, developed countries, and emerging markets throughout the world, while at the same time neutralizing exposure to fluctuations between the value of foreign currencies and the U.S. dollar. The starting universe of the Index consists of the bottom 5% of the total market capitalization of the Parent Index that have (i) a market capitalization of at least \$200 million as of the Index screening date; (ii) an average daily dollar volume of at least \$100,000 for the three months preceding the Index screening date; and (iii) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date. The Index then selects the largest 1,000 companies after the initial market cap and liquidity screens are applied. Securities are then weighted based on dividends paid. Companies that pay a greater total dollar amount of dividends are more heavily weighted. As of September 30, 2017, the Index had a market capitalization range from \$296 million to \$12.4 billion, with an average market capitalization of \$1.6 billion. As noted above, the Underlying Fund Index applies the same eligibility criteria and weighting scheme with respect to its component stocks.

To derive a company’s initial Index weight, (i) multiply the U.S. dollar value of the company’s annual gross dividend per share by the number of common shares outstanding for that company (the “Cash Dividend Factor”); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies’ Cash Dividend Factors; and (iv) divide the company’s Cash Dividend Factor by the sum of all Cash Dividend Factors. After a company’s initial weight is determined by cash dividends, the Index will apply a regional adjustment factor. This factor adjusts the weight allocated to each region (i.e., three regions—U.S., developed and emerging market countries) of the Index so the regional weights match those of the float-adjusted market cap weighted universe of dividend and non-dividend paying companies that meet the liquidity and market capitalization criteria for the Parent Index. “Float-adjusted” market cap means that the share amounts used in calculating the market cap reflect only shares available to investors. To the extent a region’s weight in the Index needs to be increased or decreased, the weight of each component security in that region will be increased or decreased, respectively, on a pro rata basis. After the regional adjustment factor is applied, the Index will cap any one sector at 25%; however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security’s weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities. The Fund’s investment adviser expects that, under normal circumstances, non-U.S. equity securities will comprise at least 40% of the Fund (either directly or via investments in the Underlying Fund).

WisdomTree Investments, Inc. (“WisdomTree Investments”), as index provider, currently uses Standard & Poor’s Global Industry Classification Standards (“S&P GICS”) to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the industrial and consumer discretionary sectors.

The Index “hedges” against fluctuations in the relative value of foreign currencies against the U.S. dollar. This Index is designed to have higher returns than an equivalent unhedged investment when foreign currencies are falling relative to the dollar. Conversely, the Index is designed to have lower returns than an equivalent unhedged investment when foreign currencies are rising relative to the U.S. dollar. The Index applies an applicable published one-month currency forward rate to the total equity exposure of each country in the Index to hedge against fluctuations in the relative value of each such foreign currency against the U.S. dollar.

Forward currency contracts or futures contracts are used to offset the Fund’s exposure to the foreign currencies represented in the Index. The amount of forward contracts and futures contracts in the Fund is based on the aggregate exposure of the Fund and Index to these foreign currencies. While this approach is designed to minimize the impact of currency fluctuations on Fund returns, it does not necessarily eliminate the Fund’s exposure to all

WisdomTree Trust Prospectus 47

Table of Contents**Table of Contents**

currency fluctuations. The return of the forward currency contracts and currency futures contracts may not perfectly offset the actual fluctuations of these foreign currencies relative to the U.S. dollar.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Market Risk. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

Capital Controls and Sanctions Risk. Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions may, without prior warning, lead to foreign government intervention (including intervention by the U.S. government with respect to foreign governments, economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Capital controls and/or sanctions may also impact the ability of the Fund to buy, sell, transfer, receive, deliver or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of the Fund, and cause the Fund to decline in value.

Consumer Discretionary Sector Risk. The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

Currency Exchange Rate Risk. The Fund uses various strategies to attempt to minimize the impact of changes in the value of the non-U.S. currencies against the U.S. dollar. These strategies may not be successful. In order to minimize transaction costs, or for other reasons, the Fund's exposure to such currencies may not be fully hedged at all times. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in the Fund may also go up or down quickly and unpredictably and investors may lose money.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information.

Table of Contents

Table of Contents

Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Derivatives Risk. The Fund invests in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and/or futures contracts. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the futures contracts at any particular time.

Dividend Paying Securities Risk. Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

Emerging Markets Risk. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

Foreign Securities Risk. Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in the United States and Europe, although this may change from time to time. In June 2016, the United Kingdom voted in a referendum to leave the European Union ("EU"). It is currently expected that the United Kingdom will

withdraw from the EU by March 2019, but the precise timeframe for “Brexit” is uncertain. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets.

Geopolitical Risk. Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.

Hedging Risk. Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. There can be no assurance that the Fund’s hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund’s equity holdings fall.

Table of Contents

Table of Contents

Index and Data Risk. The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Industrial Sector Risk. The Fund currently invests a significant portion of its assets in the industrial sector, and therefore the Fund’s performance could be negatively impacted by events affecting this sector. The industrial sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

Investment in the Underlying Fund Risk. The Fund’s investment performance and risks may be directly related to the investment performance and risks of the Underlying Fund.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Mid-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Small-Capitalization Investing Risk. The Fund invests primarily in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to adverse economic developments as well as changes in interest rates, government regulation, borrowing costs and earnings.

Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. If WisdomTree Asset Management had not waived certain fees during certain periods, the Fund's returns would have been lower. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

50 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

The Fund's year-to-date total return as of September 30, 2017 was 8.46%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

Return Quarter/Year

Highest Return 10.49% 4Q/2016

Lowest Return 2.46% 1Q/2016

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2016

	1 Year	Since Inception November 19, 2015
WisdomTree Global Hedged SmallCap Dividend Fund		
Return Before Taxes Based on NAV	24.26%	20.26%
Return After Taxes on Distributions	23.14%	19.16%
Return After Taxes on Distributions and Sale of Fund Shares	14.20%	15.19%
WisdomTree Global Hedged SmallCap Dividend Index (Reflects no deduction for fees, expenses or taxes)	24.53%	20.63%
MSCI AC World Small Cap Local Currency Index (Reflects no deduction for fees, expenses or taxes)	12.76%	10.16%

Management**Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. BNY Mellon Asset Management North America Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2015.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2015.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2015.

Table of Contents

Table of Contents

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

Table of ContentsTable of Contents

WisdomTree Global SmallCap Dividend Fund

Investment Objective

The WisdomTree Global SmallCap Dividend Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Global SmallCap Dividend Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.43%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.43%

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 44	\$ 138	\$ 241	\$ 542

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 33% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of securities in the Index whose risk, return and other characteristics resemble the risk, return, and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a fundamentally weighted index that consists of small-capitalization companies selected from the WisdomTree Global Dividend Index (“Parent Index”), which defines the dividend-paying universe of companies in the United States, developed countries, and emerging markets throughout the world. The starting universe of the Index consists of the bottom 5% of the total market capitalization of the Parent Index that have (i) a market capitalization of at least \$200 million as of the Index screening date; (ii) an average daily dollar volume of at least \$100,000 for the three months preceding the Index screening date; and (iii) trading of at least 250,000 shares per month for each of the

six months preceding the Index screening date. The Index then selects the largest 1,000 companies after the initial market cap and liquidity screens are applied. Securities are then weighted based on dividends paid. Companies that pay a greater total dollar amount of dividends are more heavily weighted. As of

WisdomTree Trust Prospectus 53

Table of Contents**Table of Contents**

September 30, 2017, the Index had a market capitalization range from \$296 million to \$12.4 billion, with an average market capitalization of \$1.6 billion.

To derive a company's initial Index weight, (i) multiply the U.S. dollar value of the company's annual gross dividend per share by the number of common shares outstanding for that company (the "Cash Dividend Factor"); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies' Cash Dividend Factors; and (iv) divide the company's Cash Dividend Factor by the sum of all Cash Dividend Factors. After a company's initial weight is determined by cash dividends, the Index will apply a regional adjustment factor. This factor adjusts the weight allocated to each region (i.e., three regions – U.S., developed and emerging market countries) of the Index so the regional weights match those of the float-adjusted market cap weighted universe of dividend and non-dividend paying companies that meet the liquidity and market capitalization criteria for the Parent Index. "Float-adjusted" market cap means that the share amounts used in calculating the market cap reflect only shares available to investors. To the extent a region's weight in the Index needs to be increased or decreased, the weight of each component security in that region will be increased or decreased, respectively, on a pro rata basis. After the regional adjustment factor is applied, the Index will cap any one sector at 25%; however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities. The Fund's investment adviser expects that, under normal circumstances, non-U.S. equity securities will comprise at least 40% of the Fund.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As September 30, 2017, a significant portion of the Index is comprised of companies in the industrial and consumer discretionary sectors.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Market Risk. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund’s primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

Capital Controls and Sanctions Risk. Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions may, without prior warning, lead to foreign government intervention (including intervention by the U.S. government with respect to foreign governments,

Table of Contents

Table of Contents

economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Capital controls and/or sanctions may also impact the ability of the Fund to buy, sell, transfer, receive, deliver or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of the Fund, and cause the Fund to decline in value.

Consumer Discretionary Sector Risk. The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

Currency Exchange Rate Risk. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Dividend Paying Securities Risk. Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

Emerging Markets Risk. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

Foreign Securities Risk. Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to

withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in the United States and Europe, although this may change from time to time. In June 2016, the United Kingdom voted in a referendum to leave the European Union (“EU”). It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for “Brexit” is uncertain. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets.

Geopolitical Risk. Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental

Table of Contents

Table of Contents

disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Index and Data Risk. The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Industrial Sector Risk. The Fund currently invests a significant portion of its assets in the industrial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The industrial sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Mid-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Small-Capitalization Investing Risk. The Fund invests primarily in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to adverse economic developments as well as changes in interest rates, government regulation, borrowing costs and earnings.

Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

56 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

The Fund's year-to-date total return as of September 30, 2017 was 11.46%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

Return Quarter/Year

Highest Return 6.91% 4Q/2016

Lowest Return 3.09% 2Q/2016

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2016

WisdomTree Global SmallCap Dividend Fund	1 Year	Since Inception November 12, 2015
Return Before Taxes Based on NAV	24.00%	21.00%
Return After Taxes on Distributions	22.91%	19.94%
Return After Taxes on Distributions and Sale of Fund Shares	14.16%	15.85%
WisdomTree Global SmallCap Dividend Index (Reflects no deduction for fees, expenses or taxes)	23.93%	20.92%
MSCI AC World Small Cap Index (Reflects no deduction for fees, expenses or taxes)	11.59%	10.20%

Management**Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. BNY Mellon Asset Management North America Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2015.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2015.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2015.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy WisdomTree Trust Prospectus

Table of Contents

Table of Contents

and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

Table of ContentsTable of Contents

WisdomTree Fundamental U.S. Corporate Bond Fund

Investment Objective

The WisdomTree Fundamental U.S. Corporate Bond Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Fundamental U.S. Corporate Bond Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.28%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.28%
Fee Waivers	(0.10)% ¹
Total Annual Fund Operating Expenses After Fee Waivers	0.18% ¹

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.18% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 18	\$ 80	\$ 147	\$ 346

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 45% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is designed to capture the performance of selected issuers in the U.S. investment grade corporate bond market that are deemed to have favorable fundamental and income characteristics. The Index employs a multi-step process, which screens based on fundamentals to identify bonds with favorable characteristics and then tilts to those which offer favorable income characteristics. The goal is to improve the risk-adjusted performance of traditional market capitalization-weighted approaches of corporate bond indices.

WisdomTree Trust Prospectus 59

Table of Contents**Table of Contents**

The Index is comprised of corporate bonds of public issuers domiciled in the United States. To be eligible for inclusion in the Index, bonds must meet the following criteria: (i) pay fixed-rate coupons; (ii) have at least \$350 million in par amount outstanding; (iii) have a remaining maturity of at least one year; and (iv) rated investment grade (at least BBB- or Baa3) by Standard & Poor's or Moody's. All bonds are denominated in U.S. dollars.

The Index utilizes a "screen and tilt" rules-based approach to isolate bonds that have favorable fundamentals and tilts to those bonds with favorable income and valuation characteristics. Once the Index universe is defined from the eligibility criteria, individual bonds are assigned a factor score against their industry sector peers (industrials, financials and utilities) based on rules-based fundamental metrics distinguishing cash flow, profitability and leverage. Bonds are ranked within each sector based on factor score and then screened so that the lowest 20% factor scores in each sector are removed from the Index. The remaining bonds are then assigned an income tilt score based on the probability of default and duration. The income tilt score is then applied within each sector to determine a bond's weight in the Index, with bonds receiving higher income tilt scores within each sector more heavily weighted. Issuer exposure is capped at 5%, with excess exposure distributed to the remaining bonds on a pro-rata basis. The Index is rebalanced quarterly.

The Fund may invest up to 20% of its assets in other securities and/or derivatives. Derivative investments may include interest rate futures, swaps, forward contracts and repurchase agreements. The Fund's use of derivatives will be underpinned by investments in cash or other liquid assets.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Market Risk. The trading prices of fixed income securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data,

denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Derivatives Risk. The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the

Table of Contents**Table of Contents**

other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts, futures contracts and/or swaps. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts and/or swaps, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the securities and the prices of futures contracts and/or swaps; and (3) no guarantee that an active market will exist for the futures contracts and/or swaps at any particular time.

Geopolitical Risk. The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Index and Data Risk. The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Interest Rate Risk. Interest rate risk is the risk that fixed income securities will decline in value because of an increase in interest rates and changes to other factors, such as perception of an issuer's creditworthiness. Funds with higher durations generally are subject to greater interest rate risk. For example, the price of a security with a seven-year duration would be expected to drop by approximately 7% in response to a 1% increase in interest rates.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer Credit Risk. The financial condition of an issuer of a debt security or other instrument may cause such issuer to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer defaults, changes in the credit ratings of the Fund's portfolio investments and/or perceptions related thereto.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Fund Performance

The Fund commenced operations on April 27, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

Table of Contents

Table of Contents

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Voya Investment Management Co., LLC (“Voya IM”) serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Voya IM’s Investment Grade Credit Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below. Travis King, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016. Anil Katarya, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016. Kurt Kringelis, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

Table of ContentsTable of Contents

WisdomTree Fundamental U.S. High Yield Corporate Bond Fund

Investment Objective

The WisdomTree Fundamental U.S. High Yield Corporate Bond Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Fundamental U.S. High Yield Corporate Bond Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.48%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.48%
Fee Waivers	(0.10)% ¹
Total Annual Fund Operating Expenses After Fee Waivers	0.38% ¹

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.38% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 39	\$ 144	\$ 259	\$ 594

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 51% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is designed to capture the performance of selected issuers in the U.S. non-investment-grade corporate bond (“junk bonds”) market that are deemed to have favorable fundamental and income characteristics. The Index employs a multi-step process, which screens based on fundamentals to identify bonds with favorable characteristics and then tilts to those individual securities which offer favorable income characteristics. The goal is to improve the

WisdomTree Trust Prospectus 63

Table of Contents**Table of Contents**

risk-adjusted performance of traditional market capitalization-weighted approaches of high-yield corporate bond indices.

The Index is comprised of corporate bonds of public issuers domiciled in the United States. To be eligible for inclusion in the Index, bonds must meet the following criteria: (i) pay fixed-rate coupons; (ii) have at least \$500 million in par amount outstanding; (iii) have a remaining maturity of at least one year; (iv) rated non-investment grade by Moody's or Standard & Poor's. In addition, the issuer cannot have defaulted or be in distress. For the purposes of the Index, bonds issued under Regulation S are excluded from eligibility. All bonds are denominated in U.S. dollars.

The Index utilizes a "screen and tilt" rules-based approach to isolate bonds that have favorable fundamentals and tilts to those bonds with favorable income and valuation characteristics. Once the Index universe is defined from the eligibility criteria, individual bonds are assigned a factor score against their industry sector peers (industrials, financials, utilities, consumer and energy) based on rules-based fundamental metrics distinguishing cash flow characteristics and discards the securities with poor cash flow performance. Remaining bonds are ranked within each sector based on liquidity scores and then screened so that the lowest 5% liquidity scores in each sector are removed from the Index. The remaining bonds are then assigned an income tilt score based on the probability of default. The income tilt score is then applied within each sector to determine a bond's weight in the Index, with bonds receiving higher income tilt scores within each sector more heavily weighted. Issuer exposure is capped at 2%, with excess exposure distributed to the remaining bonds on a pro-rata basis. The Index is rebalanced semi-annually.

The Fund may invest up to 20% of its assets in other securities and/or derivatives. Derivative investments may include interest rate futures, swaps, forward contracts and repurchase agreements. The Fund's use of derivatives will be underpinned by investments in cash or other liquid assets.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Market Risk. The trading prices of fixed income securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Table of Contents**Table of Contents**

Derivatives Risk. The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts, futures contracts and/or swaps. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts and/or swaps, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the securities and the prices of futures contracts and/or swaps; and (3) no guarantee that an active market will exist for the futures contracts and/or swaps at any particular time.

Geopolitical Risk. The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

High Yield Securities Risk. Higher yielding, high risk debt securities, sometimes referred to as junk bonds, may present additional risk because these securities may be less liquid and present more credit risk than investment grade bonds. The price of high yield securities tends to be more susceptible to issuer-specific operating results and outlook and to real or perceived adverse economic and competitive industry conditions.

Index and Data Risk. The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Interest Rate Risk. Interest rate risk is the risk that fixed income securities will decline in value because of an increase in interest rates and changes to other factors, such as perception of an issuer's creditworthiness. Funds with higher durations generally are subject to greater interest rate risk. For example, the price of a security with a five-year duration would be expected to drop by approximately 5% in response to a 1% increase in interest rates.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in

declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer Credit Risk. The financial condition of an issuer of a debt security or other instrument may cause such issuer to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer defaults, changes in the credit ratings of the Fund's portfolio investments and/or perceptions related thereto.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to

Table of Contents

Table of Contents

the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Fund Performance

The Fund commenced operations on April 27, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Voya Investment Management Co., LLC ("Voya IM") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Voya IM's High Yield Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below. Randall Parrish, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016. Rick Cumberledge, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

Table of ContentsTable of Contents

WisdomTree Fundamental U.S. Short-Term Corporate Bond Fund

Investment Objective

The WisdomTree Fundamental U.S. Short-Term Corporate Bond Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Fundamental U.S. Short-term Corporate Bond Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.28%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.28%
Fee Waivers	(0.10)% ¹
Total Annual Fund Operating Expenses After Fee Waivers	0.18% ¹

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.18% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 18	\$ 80	\$ 147	\$ 346

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 38% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is designed to capture the performance of selected issuers in the short-term U.S. investment grade corporate bond market that are deemed to have favorable fundamental and income characteristics. The Index employs a multi-step process, which screens based on fundamentals to identify bonds with favorable characteristics and then tilts to those which offer favorable income characteristics. The goal is to improve the risk-adjusted performance of traditional market capitalization- weighted approaches of corporate bond indices.

WisdomTree Trust Prospectus 67

Table of Contents**Table of Contents**

The Index is comprised of corporate bonds of public issuers domiciled in the United States. To be eligible for inclusion in the Index, bonds must meet the following criteria: (i) pay fixed-rate coupons; (ii) have at least \$350 million in par amount outstanding; (iii) have a remaining maturity of at least one year and at most five years; and (iv) rated investment grade (at least BBB- or Baa3) by Standard & Poor's or Moody's. All bonds are denominated in U.S. dollars.

The Index utilizes a “screen and tilt” rules-based approach to isolate bonds that have favorable fundamentals and tilts to those bonds with favorable income and valuation characteristics. Once the Index universe is defined from the eligibility criteria, individual bonds are assigned a factor score against their industry sector peers (industrials, financials and utilities) based on rules-based fundamental metrics distinguishing cash flow, profitability and leverage. Bonds are ranked within each sector based on factor score and then screened so that the lowest 20% factor scores in each sector are removed from the Index. The remaining bonds are then assigned an income tilt score based on the probability of default and duration. The income tilt score is then applied within each sector to determine a bond's weight in the Index, with bonds receiving higher income tilt scores within each sector more heavily weighted. Issuer exposure is capped at 5%, with excess exposure distributed to the remaining bonds on a pro-rata basis. The Index is rebalanced quarterly.

The Fund may invest up to 20% of its assets in other securities and/or derivatives. Derivative investments may include interest rate futures, swaps, forward contracts and repurchase agreements. The Fund's use of derivatives will be underpinned by investments in cash or other liquid assets.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled “Additional Principal Risk Information About the Funds” and “Additional Non-Principal Risk Information.”

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Market Risk. The trading prices of fixed income securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to,

disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Derivatives Risk. The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an

Table of Contents**Table of Contents**

investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts, futures contracts and/or swaps. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts and/or swaps, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the securities and the prices of futures contracts and/or swaps; and (3) no guarantee that an active market will exist for the futures contracts and/or swaps at any particular time.

Geopolitical Risk. The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Index and Data Risk. The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Interest Rate Risk. Interest rate risk is the risk that fixed income securities will decline in value because of an increase in interest rates and changes to other factors, such as perception of an issuer's creditworthiness. Funds with higher durations generally are subject to greater interest rate risk. For example, the price of a security with a three-year duration would be expected to drop by approximately 3% in response to a 1% increase in interest rates.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer Credit Risk. The financial condition of an issuer of a debt security or other instrument may cause such issuer to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer defaults, changes in the credit ratings of the Fund's portfolio investments and/or perceptions related thereto.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Fund Performance

The Fund commenced operations on April 27, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

Table of ContentsTable of Contents

WisdomTree Fundamental U.S. Short-Term High Yield Corporate Bond Fund

Investment Objective

The WisdomTree Fundamental U.S. Short-Term High Yield Corporate Bond Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Fundamental U.S. Short-term High Yield Corporate Bond Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.48%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.48%
Fee Waivers	(0.10)% ¹
Total Annual Fund Operating Expenses After Fee Waivers	0.38% ¹

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.38% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 39	\$ 144	\$ 259	\$ 594

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 69% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is designed to capture the performance of selected issuers in the short-term U.S. non-investment-grade corporate bond (“junk bonds”) market that are deemed to have favorable fundamental and income characteristics. The Index employs a multi-step process, which screens based on fundamentals to identify bonds with favorable

WisdomTree Trust Prospectus 71

Table of Contents**Table of Contents**

characteristics and then tilts to those individual securities which offer favorable income characteristics. The goal is to improve the risk-adjusted performance of traditional market capitalization-weighted approaches of high-yield corporate bond indices.

The Index is comprised of corporate bonds of public issuers domiciled in the United States. To be eligible for inclusion in the Index, bonds must meet the following criteria: (i) pay fixed-rate coupons; (ii) have at least \$350 million in par amount outstanding; (iii) have a remaining maturity of at least one year and at most five years; (iv) rated non-investment grade by Moody's or Standard & Poor's. In addition, the issuer cannot have defaulted or be in distress. For the purposes of the Index, bonds issued under Regulation S are excluded from eligibility. All bonds are denominated in U.S. dollars.

The Index utilizes a "screen and tilt" rules-based approach to isolate bonds that have favorable fundamentals and tilts to those bonds with favorable income and valuation characteristics. Once the Index universe is defined from the eligibility criteria, individual bonds are assigned a factor score against their industry sector peers (industrials, financials, utilities, consumer and energy) based on rules-based fundamental metrics distinguishing cash flow characteristics and discards the securities with poor cash flow performance. Remaining bonds are ranked within each sector based on liquidity scores and then screened so that the lowest 5% liquidity scores in each sector are removed from the Index. The remaining bonds are then assigned an income tilt score based on the probability of default. The income tilt score is then applied within each sector to determine a bond's weight in the Index, with bonds receiving higher income tilt scores within each sector more heavily weighted. Issuer exposure is capped at 3%, with excess exposure distributed to the remaining bonds on a pro-rata basis. The Index is rebalanced semi-annually.

The Fund may invest up to 20% of its assets in other securities and/or derivatives. Derivative investments may include interest rate futures, swaps, forward contracts and repurchase agreements. The Fund's use of derivatives will be underpinned by investments in cash or other liquid assets.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Market Risk. The trading prices of fixed income securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Table of Contents**Table of Contents**

Derivatives Risk. The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund’s Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund’s use of forward currency contracts, futures contracts and/or swaps. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts and/or swaps, these risks include but are not limited to: (1) the success of the adviser’s and sub-adviser’s ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the securities and the prices of futures contracts and/or swaps; and (3) no guarantee that an active market will exist for the futures contracts and/or swaps at any particular time.

Geopolitical Risk. The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.

High Yield Securities Risk. Higher yielding, high risk debt securities, sometimes referred to as junk bonds, may present additional risk because these securities may be less liquid and present more credit risk than investment grade bonds. The price of high yield securities tends to be more susceptible to issuer-specific operating results and outlook and to real or perceived adverse economic and competitive industry conditions.

Index and Data Risk. The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Interest Rate Risk. Interest rate risk is the risk that fixed income securities will decline in value because of an increase in interest rates and changes to other factors, such as perception of an issuer’s creditworthiness. Funds with higher durations generally are subject to greater interest rate risk. For example, the price of a security with a three-year duration would be expected to drop by approximately 3% in response to a 1% increase in interest rates.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in

declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer Credit Risk. The financial condition of an issuer of a debt security or other instrument may cause such issuer to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer defaults, changes in the credit ratings of the Fund's portfolio investments and/or perceptions related thereto.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to

Table of Contents

Table of Contents

the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Fund Performance

The Fund commenced operations on April 27, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Voya Investment Management Co., LLC ("Voya IM") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Voya IM's High Yield Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below. Randall Parrish, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016. Rick Cumberledge, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

Table of ContentsTable of Contents

WisdomTree Dynamic Bearish U.S. Equity Fund

Investment Objective

The WisdomTree Dynamic Bearish U.S. Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Bearish U.S. Equity Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.53%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.53%
Fee Waivers	(0.05)% ¹
Total Annual Fund Operating Expenses After Fee Waivers	0.48% ¹

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.48% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 49	\$ 165	\$ 291	\$ 660

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 153% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index includes: (i) long U.S. equity positions (the “Long Equity Basket”) or long U.S. Treasury positions (the “Long Treasury Basket”); and (ii) short U.S. equity positions (the “Short Equity Basket”). The Long Equity Basket consists of approximately 100 U.S. large-capitalization stocks that meet Index eligibility requirements and have the best combined score based on fundamental growth and value signals. The starting universe of companies eligible for inclusion in the Long Equity Basket includes companies that meet the following criteria: (i) incorporated and headquartered in the United States; (ii) listed on the New York Stock Exchange, NASDAQ Global or NASDAQ

WisdomTree Trust Prospectus 75

Table of Contents**Table of Contents**

Global Select Market; (iii) market capitalization of at least \$2 billion by the Index screening date; and (iv) average daily dollar volume of at least \$100,000 for three months preceding the Index screening date. Eligible securities for the Long Equity Basket are organized by sector such that the sectors within the Long Equity Basket are weighted the same (i.e., sector neutral) as the eleven (11) sectors in a market capitalization weighted portfolio of the largest 500 U.S. companies. Within the sector designations, stocks are selected based on a sector-specific indicator which scores companies based on fundamental growth and value signals, as described below, and the stocks with the highest scores within each sector are selected for a total of approximately 100 stocks in the Long Equity Basket. Stocks are then weighted within each sector of the Long Equity Basket according to their volatility characteristics with greater weight given to stocks with lower volatility. Weighting is determined by using the standard deviation (a measure of volatility) and beta (a measure of correlation) of such stocks. The Long Treasury Basket consists of U.S. Treasury bills with maturities of up to one (1) year.

The Short Equity Basket consists of short positions in the largest 500 U.S. companies, weighted by float-adjusted market capitalization, designed to act as a market risk hedge. Short selling involves selling a security that is not owned but has been borrowed from a third party with the intention of buying an identical security at the market price at a later date to return to that third party. Unlike long positions which profit from increases in the price of a security, short positions profit from the falling price of a security.

The Index provides a dynamic allocation of either (i) 100% exposure to the Long Equity Basket and 0% exposure to the Long Treasury Basket, or (ii) 0% exposure to the Long Equity Basket and 100% exposure to the Long Treasury Basket, while employing a variable hedge of either 75% or 100% exposure to the Short Equity Basket, based on a quantitative rules-based market indicator that scores growth and value market signals. Accordingly, the Index is designed to have favorable returns during a declining U.S. equity market (a “bear” market”). The growth and value signals are determined by the following criteria: (i) the growth indicator is predicated on the change of the profit margin (e.g., operating income to sales) and profit quality (e.g., operating cash flow over operating income) of the securities in the starting universe of companies; and (ii) the value indicator is predicated on the value of the price multiples (e.g., market capitalization to equity) of the securities in the starting universe of companies. The resulting value and growth scores are equally weighted and calculated using rolling three- month averages. During times when the market indicator model shows attractive readings (high score) on valuation and growth characteristics, which are designed to indicate more favorable conditions for the U.S. equity market environment, the Index provides 100% exposure to the Long Equity Basket (and, accordingly, 0% exposure to the Long Treasury Basket) and a hedge with 75% exposure to the Short Equity Basket. During times when the market indicator model shows unattractive readings (low score) on valuation and growth characteristics, which are designed to indicate less favorable conditions for the U.S. equity market environment, the Index provides 0% exposure to the Long Equity Basket (and, accordingly, 100% exposure to the Long Treasury Basket) and a hedge with 100% exposure to the Short Equity Basket.

The stocks within the Index’s Long Equity Basket are reconstituted and rebalanced on a quarterly basis. The amount of exposure to the Index’s Short Equity Basket is reset on a monthly basis; however, the stocks within the Index’s Short Equity Basket are reconstituted and rebalanced annually.

The Fund will generally hold long positions (and may hold short positions) in a manner similar to the Index, although the Fund’s exposure to short positions is expected to be obtained through derivatives, such as futures contracts and swaps.

WisdomTree Investments, Inc. (“WisdomTree Investments”), as index provider, currently uses Standard & Poor’s Global Industry Classification Standards (“S&P GICS”) to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Long Equity Basket is comprised of companies in the information technology and financial sectors.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections

76 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Market Risk. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

Counterparty and Issuer Credit Risk. The financial condition of an issuer of a debt security or other instrument or a counterparty to a derivative or other contract may cause such issuer or counterparty to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer or counterparty to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer or counterparty defaults, changes in the credit ratings of the Fund's portfolio investments and/or perceptions related thereto.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Derivatives Risk. The Fund invests in derivatives, including as a substitute to gain short exposure to equity securities and equity indexes. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of futures contracts and/or swaps. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to swaps and futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to

predict movements in the prices of individual indexes or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the indexes or securities and the prices of swaps and futures contracts; and (3) no guarantee that an active market will exist for swaps and futures contracts at any particular time.

Financial Sector Risk. The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

Geopolitical Risk. The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market

Table of Contents

Table of Contents

dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Hedging Risk. Derivatives used by the Fund to offset its exposure to market volatility may not perform as intended. There can be no assurance that the Fund's hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if securities shorted by the Fund appreciate at the same time the Fund's long positions decrease in value.

Index and Data Risk. The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Information Technology Sector Risk. The Fund currently invests a significant portion of its assets in the information technology sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Large-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

Mid-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if

securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Table of Contents

Table of Contents

Portfolio Turnover Risk. The Fund’s investment strategy may result in a high portfolio turnover rate. High portfolio turnover would result in correspondingly greater transaction expenses and may result in the distribution to shareholders of additional capital gains for tax purposes. These factors may negatively affect the Fund’s performance.

Short Sales Risk. The Fund will engage in “short sale” transactions. The Fund will lose value if the security or instrument that is the subject of a short sale increases in value. The Fund also may enter into short positions in equities as well as a short derivative position through swaps and futures contracts on equities. If the price of the security or derivative that is the subject of a short sale increases, then the Fund will incur a loss equal to the increase in price from the time that the short sale was entered into plus any premiums and interest paid to a third party in connection with the short sale. The risk of loss on a shorted position arises from the increase in value of the security sold short and is potentially unlimited unlike the risk of loss on a long position, which is limited to the amount paid for the investment plus transaction costs. Therefore, short sales involve the risk that losses may be exaggerated, potentially losing more money than the actual cost of the investment. Also, there is the risk that the third party to the short sale may fail to honor its contract terms, causing a loss to the Fund. Further, in times of unusual or adverse economic, market or political conditions, the Fund may not be able to fully or partially implement its short selling strategy.

Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund’s average annual total returns, both before and after taxes. This table also shows how the Fund’s performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. If WisdomTree Asset Management had not waived certain fees during certain periods, the Fund’s returns would have been lower. The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

The Fund’s year-to-date total return as of September 30, 2017 was 2.53%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

Return Quarter/Year

Highest Return 2.02% 3Q/2016

Lowest Return (0.98)% 1Q/2016

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2016

Management**Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. BNY Mellon Asset Management North America Corporation (“Mellon Capital”) serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in December 2015.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in December 2015.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in December 2015.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

Table of ContentsTable of Contents

WisdomTree Dynamic Long/Short U.S. Equity Fund

Investment Objective

The WisdomTree Dynamic Long/Short U.S. Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Long/Short U.S. Equity Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.53%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.53%
Fee Waivers	(0.05)% ¹
Total Annual Fund Operating Expenses After Fee Waivers	0.48% ¹

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.48% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 49	\$ 165	\$ 291	\$ 660

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 126% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index includes long U.S. equity positions (the “Long Equity Basket”) and, at times, short U.S. equity positions (the “Short Equity Basket”). The Long Equity Basket consists of approximately 100 U.S. large-capitalization stocks that meet Index eligibility requirements and have the best combined score based on fundamental growth and value signals. The starting universe of companies eligible for inclusion in the Long Equity Basket includes companies that meet the following criteria: (i) incorporated and headquartered in the United States; (ii) listed on the New York Stock Exchange, NASDAQ Global or NASDAQ Global Select Market; (iii) market capitalization of at least \$2 billion

WisdomTree Trust Prospectus 81

Table of Contents**Table of Contents**

by the Index screening date; and (iv) average daily dollar volume of at least \$100,000 for three months preceding the Index screening date. Eligible securities for the Long Equity Basket are organized by sector such that the sectors within the Long Equity Basket are weighted the same (i.e., sector neutral) as the eleven (11) sectors in a market capitalization weighted portfolio of the largest 500 U.S. companies. Within the sector designations, stocks are selected based on a sector-specific indicator which scores companies based on fundamental growth and value signals, as described below, and the stocks with the highest scores within each sector are selected for a total of approximately 100 stocks in the Long Equity Basket. Stocks are then weighted within each sector of the Long Equity Basket according to their volatility characteristics with greater weight given to stocks with lower volatility. Weighting is determined by using the standard deviation (a measure of volatility) and beta (a measure of correlation) of such stocks. The Short Equity Basket consists of short positions in the largest 500 U.S. companies, weighted by float-adjusted market capitalization, designed to act as a market risk hedge. Short selling involves selling a security that is not owned but has been borrowed from a third party with the intention of buying an identical security at the market price at a later date to return to that third party. Unlike long positions which profit from increases in the price of a security, short positions profit from the falling price of a security.

The Index maintains 100% exposure to the Long Equity Basket while employing a variable hedge ranging from 0% to 100% exposure to the Short Equity Basket based on a quantitative rules-based market indicator that scores growth and value market signals. The growth and value signals are determined by the following criteria: (i) the growth indicator is predicated on the change of the profit margin (e.g., operating income to sales) and profit quality (e.g., operating cash flow over operating income) of the securities in the starting universe of companies; and (ii) the value indicator is predicated on the value of the price multiples (e.g., market capitalization to equity) of the securities in the starting universe of companies. The resulting value and growth scores are equally weighted and calculated using rolling three-month averages. During times when the market indicator model shows attractive readings (high score) on valuation and growth characteristics, which are designed to indicate more favorable conditions for the broader U.S. equity market, the Index is unhedged with 0% exposure to the Short Equity Basket. During times when the market indicator model shows unattractive readings (low score) on valuation and growth characteristics, which are designed to indicate less favorable conditions for the broader U.S. equity market, the Index seeks to hedge broader U.S. equity market risk by increasing exposure to the Short Equity Basket.

The stocks within the Index's Long Equity Basket are reconstituted and rebalanced on a quarterly basis. The amount of exposure to the Index's Short Equity Basket is reset on a monthly basis; however, the stocks within the Index's Short Equity Basket are reconstituted and rebalanced annually.

The Fund will generally hold long positions (and may hold short positions) in a manner similar to the Index, although the Fund's exposure to short positions is expected to be obtained through derivatives, such as futures contracts and swaps.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Long Equity Basket is comprised of companies in the information technology and financial sectors.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or

ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

82 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

Market Risk. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

Counterparty and Issuer Credit Risk. The financial condition of an issuer of a debt security or other instrument or a counterparty to a derivative or other contract may cause such issuer or counterparty to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer or counterparty to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer or counterparty defaults, changes in the credit ratings of the Fund's portfolio investments and/or perceptions related thereto.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Derivatives Risk. The Fund invests in derivatives, including as a substitute to gain short exposure to equity securities and equity indexes. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of futures contracts and/or swaps. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to swaps and futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual indexes or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the indexes or securities and the prices of swaps and futures contracts; and (3) no guarantee that an active market will exist for swaps and futures contracts at any particular time.

Financial Sector Risk. The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

Geopolitical Risk. The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Hedging Risk. Derivatives used by the Fund to offset its exposure to market volatility may not perform as intended. There can be no assurance that the Fund's hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if securities shorted by the Fund appreciate at the same time the Fund's long positions decrease in value.

Table of Contents

Table of Contents

Index and Data Risk. The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Information Technology Sector Risk. The Fund currently invests a significant portion of its assets in the information technology sector, and therefore the Fund’s performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Large-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

Mid-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To

the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Portfolio Turnover Risk. The Fund's investment strategy may result in a high portfolio turnover rate. High portfolio turnover would result in correspondingly greater transaction expenses and may result in the distribution to shareholders of additional capital gains for tax purposes. These factors may negatively affect the Fund's performance.

Short Sales Risk. The Fund will engage in "short sale" transactions. The Fund will lose value if the security or instrument that is the subject of a short sale increases in value. The Fund also may enter into short positions in equities as well as a short derivative position through swaps and futures contracts on equities. If the price of the security or derivative that is the subject of a short sale increases, then the Fund will incur a loss equal to the increase in price from the time that the short sale was entered into plus any premiums and interest paid to a third party in connection with the short sale. The risk of loss on a shorted position arises from the increase in value of the security sold short and is potentially unlimited unlike the risk of loss on a long position, which is

Table of Contents**Table of Contents**

limited to the amount paid for the investment plus transaction costs. Therefore, short sales involve the risk that losses may be exaggerated, potentially losing more money than the actual cost of the investment. Also, there is the risk that the third party to the short sale may fail to honor its contract terms, causing a loss to the Fund. Further, in times of unusual or adverse economic, market or political conditions, the Fund may not be able to fully or partially implement its short selling strategy.

Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. If WisdomTree Asset Management had not waived certain fees during certain periods, the Fund's returns would have been lower. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

The Fund's year-to-date total return as of September 30, 2017 was 12.70%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

Return Quarter/Year

Highest Return 6.67% 1Q/2016

Lowest Return (0.41)% 4Q/2016

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2016

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in December 2015.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in December 2015.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in December 2015.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

Table of Contents**Table of Contents****Additional Information About the Funds****Additional Information About the Funds' Investment Objective**

Each Fund seeks to track the price and yield performance, before fees and expenses, of a particular index (“Index”) developed by WisdomTree Investments. Each Index consists of securities in the market suggested by its name that meet specific criteria developed by WisdomTree Investments. Since each Fund’s investment objective has been adopted as a non-fundamental investment policy, each Fund’s investment objective may be changed without a vote of shareholders upon 60 days’ written notice to shareholders.

Additional Information About the Funds’ Investment Strategies

Each Fund will normally invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in the types of securities suggested by its name (i.e., investments connoted by its Index), as applicable. Each applicable Fund anticipates meeting this policy because, under normal circumstances, at least 80% of each Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of its underlying Index (including indirect investments through the Underlying Fund for each of the Global Hedged SmallCap Dividend Fund and the Dynamic Currency Hedged International Quality Dividend Growth Fund) and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities, such as TBA Transactions and depositary receipts based on component securities. WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) expects that, over time, the correlation between a Fund’s performance and that of its Index, before fees and expenses, will be 95% or better. A number of factors may affect a Fund’s ability to achieve a high degree of correlation with its Index, and there can be no guarantee that a Fund will achieve a high degree of correlation.

Funds designated as “International” generally invest in developed markets outside the United States. Funds designated as “Global” generally invest in developed and emerging markets throughout the world, including the United States and other regions.

The quantity of holdings in a Fund, by using a representative sampling strategy, will be based on a number of factors, including asset size of the Fund. In addition, from time to time, securities are added to or removed from an Index and consequently the attributes of an Index, such as sectors, industries or countries represented in an Index and weightings, may change. The Fund may sell securities that are represented in an Index, or purchase securities that are not yet represented in an Index, in anticipation of their removal from or addition to an Index or to reflect various corporate actions or other changes to an Index. Further, the Fund may overweight or underweight securities in an Index, purchase or sell securities not in the Index, or utilize various combinations of other available techniques, in seeking to track an Index.

Indices. Each Index is either (i) “fundamentally weighted” and differs from most traditional indexes in that the proportion, or “weighting,” of the securities in each Index is based on a measure of fundamental value, such as dividends or volatility, or (ii) modified market capitalization weighted based on a combination of market cap and a correlation rank factor based on equity performance. Most traditional indexes and index funds weight their securities by looking simply at the market capitalization of such securities.

For each “Dividend Index” only regular dividends (i.e., established or quarterly dividends as opposed to non-recurring or special dividends) are included in the determination of cash dividends or dividend yield.

International Equity ETFs. For U.S. investors, international equity investments include two components of return. The first is the return attributable to stock prices in the non-U.S. market or markets in which an investment is made. The second is the return attributable to the value of non-U.S. currencies in these markets relative to the U.S. dollar.

Hedged Equity Funds. Each Hedged Equity Fund employs strategies to “hedge” against fluctuations in the relative value of non-U.S. currencies included in its underlying Index against the U.S. dollar. The Global Hedged SmallCap Dividend Fund seeks to track the performance of equity securities in a foreign market that is attributable solely to stock prices. The Dynamic Currency Hedged Europe Equity Fund, Dynamic Currency Hedged International Equity Fund, Dynamic Currency Hedged International Quality Dividend Growth Fund, Dynamic Currency Hedged

International SmallCap Equity Fund and Dynamic Currency Hedged Japan Equity Fund (collectively, the “Dynamic Hedged Equity Funds”) seek to track the performance of equity securities in foreign markets while dynamically hedging currency fluctuations in the relative value of applicable foreign currencies against the U.S. dollar using quantitative signals to determine hedge ratios on the foreign currencies. While currency hedging seeks to reduce or eliminate losses from currency, it can also reduce or eliminate gains from currency to the extent a currency hedge is applied at an inopportune time.

WisdomTree Trust Prospectus 87

Table of Contents**Table of Contents**

Global ex-Mexico Equity Fund. The Fund's Index only includes components from countries defined to be eligible for investments (outside Mexico) by The National Commission for the Pension System (CONSAR). Currently allowable countries are set forth in the Fund's principal investment strategies, but the country list is subject to change and WisdomTree Investments reserves the right to adjust the Index's allowable country list based on CONSAR eligibility.

Non-Principal Information About the Funds' Investment Strategies

Each Fund may invest in other investments that the Fund believes will help it track its Index, including cash and cash equivalents, as well as in shares of other investment companies (including affiliated investment companies, such as ETFs), forward contracts, futures contracts, options on futures contracts, options and swaps.

Each Fund may lend its portfolio securities in an amount not to exceed one third (33 1/3%) of the value of its total assets via a securities lending program through its securities lending agent, State Street Bank and Trust Company, to brokers, dealers and other financial institutions desiring to borrow securities to complete transactions and for other purposes. A securities lending program allows a Fund to receive a portion of the income generated by lending its securities and investing the respective collateral. A Fund will receive collateral for each loaned security which is at least equal to the market value of that security, marked to market each trading day. In the securities lending program, the borrower generally has the right to vote the loaned securities; however, a Fund may call loans to vote proxies if a material issue affecting the Fund's economic interest in the investment is to be voted upon. Security loans may be terminated at any time by a Fund.

Additional Principal Risk Information About the Funds

This section provides additional information regarding the principal risks described under "Principal Risks of Investing in the Fund" in the Fund Summaries. Risk information may not be applicable to each Fund. Please consult each Fund's Summary sections to determine which risks are applicable to a particular Fund. Each of the factors below could have a negative impact on Fund performance and trading prices.

Capital Controls and Sanctions Risk

Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions, may, without prior warning, lead to government intervention (including intervention by the U.S. government with respect to foreign governments, economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Levies may be placed on profits repatriated by foreign entities (such as the Funds). Capital controls and/or sanctions may also impact the ability of a Fund to buy, sell, transfer, receive, deliver or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of a Fund, and cause a Fund to decline in value.

Cash Redemption Risk

The Emerging Market Dividend Fund's investment strategy requires it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds, it may be required to sell or unwind portfolio investments in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize capital gains that it might not have recognized if it had made a redemption in-kind (i.e., distribute securities as payment of redemption proceeds). As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used.

Counterparty and Issuer Credit Risk

The Funds intend to engage in investment transactions or enter into derivative or other contracts with third parties (i.e., "counterparties"). The Funds bear the risk that the counterparty to such contracts may default on its obligations or otherwise fail to honor its obligations or cause such issuer or counterparty to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. If a counterparty defaults on its

payment obligations a Fund will lose money and the value of an investment in Fund shares may decrease. In addition, the Funds may engage in such investment transactions with a limited number of counterparties, which may increase a Fund's exposure to counterparty credit risk. Listed futures contracts can be traded on futures exchanges without material counterparty credit. After a trade is cleared, the exchange is the ultimate counterparty for all contracts, so the counterparty risk on a listed futures contract ultimately is the creditworthiness of the exchange's clearing corporation.

Table of Contents**Table of Contents****Currency Exchange Rate Risk**

Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of a Fund's investments and the value of a Fund's shares. Because each Fund's NAV is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in a Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in the Fund's holdings goes up. Conversely, the dollar value of your investment in the Fund may go up if the value of the local currency appreciates against the U.S. dollar.

The value of the U.S. dollar measured against other currencies is influenced by a variety of factors. These factors include interest rates, national debt levels and trade deficits, changes in balances of payments and trade, domestic and foreign interest and inflation rates, global or regional political, economic or financial events, monetary policies of governments, actual or potential government intervention, and global energy prices. Political instability, the possibility of government intervention and restrictive or opaque business and investment policies may also reduce the value of a country's currency. Government monetary policies and the buying or selling of currency by a country's government may also influence exchange rates. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in a Fund may change quickly and without warning, and you may lose money.

Hedged Equity Funds Only: Each of the Hedged Equity Funds employs various strategies to minimize the impact of changes in the value of applicable currencies, such as the euro, the British pound, the Korean won and the Japanese yen, against the U.S. dollar. However, these strategies may not be successful. In addition, a Fund may not be fully hedged at all times in order to minimize transaction costs or for other reasons.

Cyber Security Risk

The Funds and their service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Funds in many ways, including, but not limited to, disruption of a Fund's operational capacity, loss of proprietary information, theft or corruption of data maintained online or digitally, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting a Fund's third-party service providers, including the investment adviser, sub-adviser, administrator, custodian, and transfer agent, may subject a Fund to many of the same risks associated with direct cyber security breaches and adversely impact the Fund. For instance, cyber-attacks may impact a Fund's ability to calculate its NAV, cause the release of confidential business information, impede trading, cause a Fund to incur additional compliance costs associated with corrective measures, subject a Fund to regulatory fines or other financial losses, and/or cause reputational damage to a Fund. Cyber security breaches of market makers, Authorized Participants, or the issuers of securities in which a Fund invests could also have material adverse consequences on a Fund's business operations and cause financial losses for a Fund and its shareholders. While the Funds and their service providers have established business continuity plans and risk management systems designed to address cyber security risks, prevent cyber-attacks and mitigate the impact of cyber security breaches, there are inherent limitations on such plans and systems. In addition, the Funds have no control over the cyber security protections put in place by their service providers or any other third parties whose operations may affect the Funds or their shareholders.

Derivatives Risk

Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or currency exchange rate. Derivatives are subject to a number of risks described elsewhere in this Prospectus, such as market risk and issuer-specific risk. They also involve the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index, or that the counterparty to a derivative contract might default on its obligations. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in a Fund may change quickly and without warning, and you may lose money. Derivatives include forward currency contracts, futures contracts, currency swaps, interest rate swaps,

total return swaps and credit linked notes.

Forward Currency Contracts

A forward currency contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A non-deliverable forward currency contract is a contract where there is no physical settlement of two currencies at maturity. Rather, based on the movement of the currencies, a net cash settlement will be made by one party to the other. The risks of forward currency contracts include but are not limited to the risk that the counterparty will default on its obligations.

WisdomTree Trust Prospectus 89

Table of Contents**Table of Contents****Futures Contracts**

A futures contract may generally be described as an agreement for the future sale by one party and the purchase by another of a specified security or instrument at a specified price and time. A currency futures contract is a contract to exchange one currency for another at a specified date in the future at an agreed upon exchange rate. The risks of futures contracts include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the contracts at any particular time.

Swaps

A currency swap is an agreement between two parties to exchange one currency for another at a future rate. An interest rate swap typically involves the exchange of a floating interest rate payment for a fixed interest payment. A total return swap is an agreement between two parties in which one party agrees to make payments of the total return of a reference asset in return for payments equal to a rate of interest on another reference asset. The risks of swaps include but are not limited to the potential to increase or decrease the overall volatility of the Fund's investments and its share price.

Credit Linked Notes

A credit linked note is a type of structured note whose value is linked to an underlying reference asset or entity. Credit linked notes typically provide periodic payments of interest as well as payment of principal upon maturity. The risks of credit linked notes include but are not limited to default by the issuer and the underlying reference asset or entity.

Foreign Securities Risk

Investments in non-U.S. securities and instruments involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may be subject to different accounting, auditing, financial reporting and investor protection standards than U.S. issuers. Investments in non-U.S. securities may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. With respect to certain countries, there is the possibility of government intervention and expropriation or nationalization of assets. Because legal systems differ, there is also the possibility that it will be difficult to obtain or enforce legal judgments in certain countries. Since foreign exchanges may be open on days when a Fund does not price its shares, the value of the securities in a Fund's portfolio may change on days when shareholders will not be able to purchase or sell a Fund's shares. Conversely, Fund shares may trade on days when foreign exchanges are closed. Each of these factors can make investments in a Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging market countries. Foreign securities also include American Depositary Receipts ("ADRs") which are U.S. dollar-denominated receipts representing shares of foreign-based corporations. ADRs are issued by U.S. banks or trust companies and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Global Depositary Receipts ("GDRs"), which are similar to ADRs, represent shares of foreign-based corporations and are generally issued by international banks in one or more markets around the world. Investments in ADRs and GDRs may be less liquid and more volatile than underlying shares in their primary trading markets.

Geographic Investment Risk

To the extent that a Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. For example, political and economic conditions and changes in regulatory, tax, or economic policy in a country could significantly affect the market in that country and in surrounding or related countries and have a negative impact on the Fund's performance. Currency developments or restrictions, political and social instability, and changing economic conditions have

resulted in significant market volatility.

Emerging Markets Risk

Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. For example, developing and emerging markets may be subject to (i) greater market volatility, (ii) lower trading volume and liquidity, (iii) greater social, political and economic uncertainty,

90 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

(iv) governmental controls on foreign investments and limitations on repatriation of invested capital, (v) lower disclosure, corporate governance, auditing and financial reporting standards, (vi) fewer protections of property rights, (vii) restrictions on the transfer of securities or currency or payment of dividends and (viii) settlement and trading practices that differ from U.S. markets. Each of these factors may impact a Fund's ability to buy, sell, transfer, receive, deliver or otherwise obtain exposure to, emerging market securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of the Fund and cause a Fund to decline in value. The volatility of emerging markets may be heightened by the actions (such as significant buying and selling) of a few major investors. For example, substantial increases or decreases in cash flows of funds investing in these markets could significantly affect local securities' prices and cause Fund share prices to decline. For these and other reasons, investments in emerging markets are often considered speculative.

Geographic Concentration in China

Although the Chinese economy has grown rapidly during recent years and the Chinese government has implemented significant economic reforms to liberalize trade policy, promote foreign investment, and reduce government control of the economy, there can be no guarantee that economic growth or these reforms will continue. Economic liberalization in China may also result in disparities of wealth that lead to social disorder, including violence and labor unrest. The Chinese economy may also experience slower growth if global or domestic demand for Chinese goods decreases significantly and/or key trading partners apply trade tariffs or implement other protectionist measures. The Chinese economy is also susceptible to rising rates of inflation, economic recession, market inefficiency, volatility, and pricing anomalies that may be connected to governmental influence, a lack of publicly-available information and/or political and social instability. Strained relationships with neighboring countries, including any military conflicts in response to such confrontations, may negatively impact China's economic development and destabilize the region. The government of China maintains strict currency controls in order to achieve economic, trade and political objectives and regularly intervenes in the currency market. The Chinese government places strict regulation on the Renminbi and Hong Kong dollar and manages the Renminbi and Hong Kong dollar so that they have historically traded in a tight range relative to the U.S. dollar. The Chinese government has been under pressure to manage the currency in a less restrictive fashion so that it is less correlated to the U.S. dollar. It is expected that such action would increase the value of the Renminbi and the Hong Kong dollar relative to the U.S. dollar. Of course, there can be no guarantee that this will occur, or that the Renminbi or the Hong Kong dollar will move in relation to the U.S. dollar as expected. The Chinese government also plays a major role in the country's economic policies regarding foreign investments. Foreign investors are subject to the risk of loss from expropriation or nationalization of their investment assets and property, governmental restrictions on foreign investments and the repatriation of capital invested. China's authoritarian government has also used force in the past to suppress civil dissent, and China's foreign and domestic policies remain in conflict with those of Hong Kong as well as nationalist and religious groups in Xinjiang and Tibet. These and other factors could have a negative impact on the Chinese economy as a whole.

Investments in Europe

Most developed countries in Western Europe are members of the European Union ("EU"), many are also members of the European Economic and Monetary Union ("EMU"), and most EMU members are part of the euro zone, a group of EMU countries that share the euro as their common currency. Members of the EMU must comply with restrictions on inflation rates, deficits, debt levels, and fiscal and monetary controls. The implementation of any of these EMU restrictions or controls, as well as any of the following events in Europe, may have a significant impact on the economies of some or all European countries: (i) the default or threat of default by an EU member country on its sovereign debt, (ii) economic recession in an EU member country, (iii) changes in EU or governmental regulations on trade, (iv) substantial changes in currency exchange rates of the euro, the British pound, and other European currencies, (v) significant changes in the supply and demand for European imports or exports, and (vi) high unemployment rates.

In June 2016, the United Kingdom voted in a referendum to leave the EU. As a result of the referendum, S&P downgraded the United Kingdom's credit rating from "AAA" to "AA" and the EU's credit rating from "AA+" to "AA" in the days that followed the vote. Other credit ratings agencies have taken similar actions. Although the precise timeframe for "Brexit" is uncertain, it is currently expected that the United Kingdom will withdraw from the EU by March 2019. It is unclear how withdrawal negotiations will be conducted and what the potential consequences may be. In addition, it is possible that measures could be taken to revote on the issue of Brexit, or that portions of the United Kingdom could seek to separate and remain a part of the EU. As a result of the political divisions within the United Kingdom and between the United Kingdom and the EU that the referendum vote has highlighted and the uncertain consequences of a Brexit, the economies of the United

Table of Contents**Table of Contents**

Kingdom and Europe as well as the broader global economy could be significantly impacted, which may result in increased volatility and illiquidity, and potentially lower economic growth on markets in the United Kingdom, Europe and globally that could potentially have an adverse effect on the value of a Fund's investments.

Investments in India

Political and economic conditions and changes in regulatory, tax, or economic policy in India could significantly affect the market in India and in surrounding or related countries and could have a negative impact on Funds that invest in India. The Indian economy may differ favorably or unfavorably from the U.S. economy in such respects as the rate of growth of gross domestic product, the rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position. The Indian government has exercised and continues to exercise significant influence over many aspects of the economy, and the number of public sector enterprises in India is substantial. Accordingly, Indian government actions in the future could have a significant effect on the Indian economy.

Despite recent downturns, the Indian economy has experienced generally sustained growth during the last several years. There are no guarantees this will continue. While the Indian government has implemented economic structural reforms with the objective of liberalizing India's exchange and trade policies, reducing the fiscal deficit, controlling inflation, promoting a sound monetary policy, reforming the financial sector, and placing greater reliance on market mechanisms to direct economic activity, there can be no assurance that these policies will continue or that the economic recovery will be sustained. Religious and border disputes persist in India. In addition, India has experienced civil unrest and hostilities with neighboring countries such as Pakistan. The Indian government has confronted separatist movements in several Indian states. Investment and repatriation restrictions and tax laws in India may impact the ability of a Fund to track its index.

Investments in Japan

Economic growth in Japan is heavily dependent on international trade, government support, and consistent government policy supporting its export market. Slowdowns in the economies of key trading partners such as the United States, China and countries in Southeast Asia could have a negative impact on the Japanese economy as a whole. Trade tariffs and other protectionist measures could also have an adverse impact on the Japanese export market. The Japanese economy has in the past been negatively affected by, among other factors, government intervention and protectionism and an unstable financial services sector. While the Japanese economy has recently emerged from a prolonged economic downturn, some of these factors, as well as other adverse political developments, increases in government debt, changes to fiscal, monetary or trade policies, escalating political tension in the region, or other events, such as natural disasters, could have a negative impact on Japanese securities.

Investments in Korea

The economy of Korea is heavily dependent on exports and the demand for certain finished goods. Korea's main industries include electronics, automobile production, chemicals, shipbuilding, steel, textiles, clothing, footwear, and food processing. Conditions that weaken demand for such products worldwide or in other Asian countries could have a negative impact on the Korean economy as a whole. Relations with North Korea could also have a significant impact on the economy of Korea. These and other factors could have a negative impact on the Fund's performance.

Investments in Taiwan

The economy of Taiwan is heavily dependent on exports. Currency fluctuations, increasing competition from Asia's other emerging economies, and conditions that weaken demand for Taiwan's export products worldwide could have a negative impact on the Taiwanese economy as a whole. Concerns over Taiwan's history of political contention and its current relationship with China may also have a significant impact on the economy of Taiwan.

Geopolitical Risk

Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of such countries or regions) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world

economies and markets generally. Such geopolitical and other events may also disrupt securities markets and, during such market disruptions, a Fund's exposure to the other risks described herein will likely increase. For example, a market disruption may adversely affect the orderly functioning of the securities markets. Each of the foregoing may negatively impact the Fund's investments.

92 WisdomTree Trust Prospectus

Table of Contents**Table of Contents****Hedging Risk**

Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. When a derivative is used as a hedge against a position that the Fund holds, any loss generated by the derivative generally should be substantially offset by gains on the hedged investment, and vice versa. While hedging can reduce or eliminate losses, it can also reduce or eliminate gains. Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. Since the derivatives used by the Fund to offset foreign currency exposure are generally reset on a monthly basis, currency risk can develop intra-month. There can be no assurance that the Fund's hedging transactions will be effective. The Fund does not attempt to mitigate other factors which may have a greater impact on the Fund's equity holdings and its performance than currency exposure. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund's equity holdings fall.

High Yield Securities Risk

Investing in these securities involves special risks in addition to the risks associated with investments in higher-rated fixed income securities. While offering a greater potential for capital appreciation and higher yields, high yield securities typically entail higher price volatility and may be less liquid than securities with higher ratings. High yield securities may be regarded as predominantly speculative with respect to the issuer's continuing ability to meet principal and interest payments. Issuers of securities in default may fail to resume principal or interest payments, in which case the Funds may lose their entire investment.

Index and Data Risk

The Funds are not "actively" managed and seek to track the price and yield performance, before fees and expenses, of the applicable Index. The Index Provider has the right to make adjustments to the Indexes or to cease making the Indexes available without regard to the particular interests of the Funds or the Funds' shareholders. While the Index Provider provides a rules-based methodology that describes what each Index is designed to achieve within a particular set of rules, neither the Index Provider, its agents nor data providers provide any warranty or accept any liability in relation to the quality, accuracy or completeness of the applicable Index, its calculation, valuation or its related data, and they do not guarantee that the applicable Index will be in line with the Index Provider's methodology, regardless of whether or not the Index Provider is affiliated with the Adviser. The composition of the Index is dependent on data from one or more third parties and/or the application of such data within the rules of the Index methodology, which may be based on assumptions or estimates. If the computers or other facilities of the Index Provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index computations and/or the construction of the Indexes may occur from time to time and may not be identified and/or corrected by the Index Provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Funds and their shareholders. The potential risk of continuing error may be particularly heightened in the case of the Indexes, which are generally not used as benchmarks by other funds or managers. Any of the foregoing may lead to the inclusion of securities in an Index, exclusion of securities from an Index or the weighting of securities in an Index that would have been different had data or other information been correct or complete, which may lead to a different investment outcome than would have been the case had such events not occurred. The Adviser, through a Sub-Adviser, seeks to manage each Fund to correspond to the applicable Index provided by the Index Provider. Consequently, losses or costs associated with an Index's errors or other risks described above will generally be borne by the Funds and their shareholders and neither the Adviser nor its affiliates or agents make any representations or warranties regarding the foregoing.

Interest Rate Risk

The market value of fixed income securities, and financial instruments related to fixed income securities, will change in response to changes in interest rates and may change in response to other factors, such as perception of an issuer's creditworthiness. As interest rates rise, the value of certain fixed income securities is likely to decrease. Similarly, if

interest rates decline, the value of fixed income securities is likely to increase. While securities with longer maturities tend to produce higher yields, the prices of longer maturity securities tend to be more sensitive to changes in interest rates and thus subject to greater volatility than securities with shorter maturities. The “average portfolio maturity” of a Fund is the average of all the current maturities of the individual securities in the Fund’s portfolio. Average portfolio maturity is important to investors as an indication of the Fund’s sensitivity to changes in interest rates. Funds with longer portfolio maturities generally are subject to greater interest rate risk.

WisdomTree Trust Prospectus 93

Table of Contents**Table of Contents****Investment Risk**

As with all investments, an investment in a Fund is subject to investment risk. Investors in a Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time. An investment in a Fund is not a bank deposit and it is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Investment in an Underlying Fund Risk

Because the Global Hedged SmallCap Dividend Fund and Dynamic Currency Hedged International Quality Dividend Growth Fund may invest a substantial portion of their assets in an Underlying Fund, the Fund's investment performance and risks may be directly related to the investment performance and risks of the applicable Underlying Fund. Fund shareholders indirectly bear a proportionate share of the fees and expenses of an Underlying Fund in addition to the Fund's expenses absent a waiver. These risks include the possibility that an Underlying Fund may experience a lack of liquidity that can result in greater volatility than its underlying securities; an Underlying Fund may trade at a premium or discount to its net asset value; or an Underlying Fund may not replicate exactly the performance of the benchmark index it seeks to track.

Investment Style Risk

Each Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Funds do not attempt to outperform their Indexes or take defensive positions in declining markets. As a result, each Fund's performance may be adversely affected by a general decline in the market segments relating to its Index. The returns from the types of securities in which a Fund invests may underperform returns from the various general securities markets or different asset classes. This may cause a Fund to underperform other investment vehicles that invest in different asset classes. Different types of securities (for example, large-, mid- and small-capitalization stocks) tend to go through cycles of doing better – or worse – than the general securities markets. In the past, these periods have lasted for as long as several years.

Dividend Paying Securities Risk

Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by a Fund or the capital resources available for such company's dividend payments may adversely affect the Fund. In the event a company reduces or eliminates its dividend, a Fund may not only lose the dividend payout but the stock price of the company may also fall.

Growth Investing Risk

Growth stocks, as a group, may be out of favor with the market and underperform value stocks or the overall equity market. Growth stocks generally are priced higher than non-growth stocks, in relation to the issuer's earnings and other measures, because investors believe they have greater growth potential, but there is no guarantee that their growth potential will be realized. Growth stocks are generally more sensitive to market movements than other types of stocks primarily because their prices are based heavily on future expectations. If investors believe an issuing company's future earnings expectations will not be met, growth stock prices can decline rapidly and significantly. An investment in growth stocks may also be susceptible to rapid price swings during periods of economic uncertainty.

Issuer Credit Risk

The financial condition of an issuer of a debt security or other instrument may cause such issuer to default, become unable to pay interest or principal due on the security, or otherwise fail to honor its obligations or cause such issuer to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The Funds cannot collect interest and principal payments on a security if the issuer defaults. Recent events in the financial sector have resulted in increased concerns about credit risk and exposure. Well-known financial institutions have experienced significant liquidity and other problems and have defaulted on their debt. The degree of credit risk for a particular debt security or other issuer may be reflected in its credit rating. A credit rating is a measure of a bond issuer's ability to make timely payments of interest and principal. Rating agencies (such as Moody's Investors

Service, Inc., Standard & Poor's Corporation, or Fitch) assign letter designations typically ranging from AAA to A- (lower default risk) through CCC to C (higher default risk) or D (in default). A credit rating of BBB- or higher generally is considered "investment grade." Credit ratings are subjective, do not remove market risk, and represent the opinions of the rating agencies as to the quality of the securities they rate. Credit ratings can change quickly and may not accurately reflect the risk of an issuer. Generally, investment risk and price volatility increase as the credit rating of a security declines. The value of an investment in the Funds may

94 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

change quickly and without warning in response to issuer defaults and changes in the credit ratings of the Funds' portfolio investments.

Issuer-Specific Risk

Changes in the actual or perceived financial condition of an issuer or counterparty, changes in specific economic or political conditions that affect a particular type of security or issuer, and changes in general economic or political conditions can affect a security's or instrument's value. The value of securities of smaller, less well-known issuers can be more volatile than that of larger issuers. Issuer-specific events can have a negative impact on the value of a Fund.

Market Risk

The trading prices of equity securities, fixed income securities, currencies, commodities, and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, including, but not limited to, changes in interest rates, government regulation, and the outlook for economic growth or recession, as well as events that impact specific issuers, such as changes to an issuer's actual or perceived creditworthiness. A Fund's NAV and market price, like security and commodity prices generally, may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Market Capitalization Risk**Small-Capitalization Investing**

The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of larger-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some small capitalization companies have limited product lines, markets, and financial and managerial resources and tend to concentrate on fewer geographical markets relative to larger capitalization companies. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies. Small-capitalization companies also may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.

Mid-Capitalization Investing

The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole. Some medium capitalization companies have limited product lines, markets, financial resources, and management personnel and tend to concentrate on fewer geographical markets relative to large-capitalization companies.

Large-Capitalization Investing

Securities of large-capitalization companies may underperform securities of smaller companies or the market as a whole. The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

Non-Correlation Risk

As with all index funds, the performance of a Fund and its Index may vary somewhat for a variety of reasons. For example, each Fund incurs operating expenses and portfolio transaction costs, while also managing cash flows and potential operational inefficiencies, not incurred by its Index. In addition, a Fund may not be fully invested in the securities of its Index at all times or may hold securities not included in its Index or may be subject to pricing differences, differences in the timing of dividend accruals, tax gains or losses, currency convertibility and repatriation, operational inefficiencies and the need to meet various new or existing regulatory requirements. For example, it may take several business days for additions and deletions to an Index to be reflected in the portfolio composition of a Fund. The use of sampling techniques may affect a Fund's ability to achieve close correlation with its

Index. By using a representative sampling strategy, a Fund generally can be expected to have a greater non-correlation risk and this risk may be heightened during times of market volatility or other unusual market conditions.

WisdomTree Trust Prospectus 95

Table of Contents**Table of Contents****Non-Diversification Risk**

Each Fund is considered to be non-diversified. This means that each Fund may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, a Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase a Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on a Fund's performance.

Portfolio Turnover Risk

The Funds' investment strategies may result in high portfolio turnover rates for the Funds. High portfolio turnover would result in correspondingly greater transaction expenses and may result in the distribution to shareholders of additional capital gains for tax purposes. These factors may negatively affect a Fund's performance.

Sector Risks**Consumer Discretionary Sector Risk**

The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, changes in domestic and international economies, exchange and interest rates, worldwide demand, competition, consumers' disposable income levels, propensity to spend and consumer preferences, social trends, and marketing campaigns. Companies in the consumer discretionary sector have historically been characterized as relatively cyclical and therefore more volatile in times of change.

Consumer Staples Sector Risk

The consumer staples sector includes, for example, food and drug retail and companies whose primary lines of business are food, beverage and other household items, including agricultural products. This sector can be affected by, among other things, changes in price and availability of underlying commodities, rising energy prices and global economic conditions. Unlike the consumer discretionary sector, companies in the consumer staples sector have historically been characterized as non-cyclical in nature and therefore less volatile in times of change.

Financial Sector Risk

The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis. These factors and events have had, and may continue to have, a significant negative impact on the valuations and stock prices of companies in this sector and have increased the volatility of investments in this sector.

Health Care Sector Risk

The health care sector includes, for example, biotechnology, pharmaceutical, health care facilities, and health care equipment and supply companies. This sector can be significantly affected by, among other things, lapsing patent protection, technological developments that make drugs obsolete, government regulation, price controls, and approvals for drugs.

Industrial Sector Risk

The industrial sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economic growth, government and corporate spending, supply and demand for specific products and manufacturing, rapid technological developments, international political and economic developments, environmental issues, and tax and governmental regulatory policies. As the demand for, or prices of, industrials increase, the value of a Fund's investments generally would be expected to also increase. Conversely, declines in the demand for, or prices of, industrials generally would be expected to contribute to declines in the value of such securities. Such declines may occur quickly and without warning and may negatively impact the value of a Fund and your investment.

Information Technology Sector Risk

The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation. Challenges facing companies in the information technology sector include distressed cash flows

96 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

due to the need to commit substantial capital to meet increasing competition, particularly in formulating new products and services using new technology, technological innovations that make existing products and services obsolete, and satisfying consumer demand.

Shares of the Funds May Trade at Prices Other Than NAV

As with all ETFs, Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of a Fund will not materially differ from a Fund's NAV, there may be times when the market price and the NAV vary significantly, including due to timing reasons, perceptions about the NAV, supply and demand of a Fund's shares (including disruptions in the creation/redemption process), during periods of market volatility and/or other factors. Because securities held by the International Equity Funds trade on foreign exchanges that are closed when the Funds' primary listing exchange is open, there are likely to be deviations between the current price of an underlying security and the security's last quoted price from the closed foreign market. This may result in premiums and discounts that are greater than those experienced by domestic ETFs. Thus, you may pay more (or less) than NAV when you buy shares of a Fund in the secondary market, and you may receive more (or less) than NAV when you sell those shares in the secondary market. If an investor purchases Fund shares at a time when the market price is at a premium to the NAV of the Fund's shares or sells at a time when the market price is at a discount to the NAV of the Fund's shares, an investor may sustain losses.

Short Sales Risk

The Funds will engage in "short sale" transactions. A short sale involves the sale by a Fund of an instrument or security that it does not own with the hope of purchasing the same security at a later date at a lower price. Short sales are designed to profit from a decline in the price of a security or instrument. A Fund will lose value if the security or instrument that is the subject of a short sale increases in value. This is the opposite of traditional "long" investments where the value of the Fund increases as the value of a portfolio security or instrument increases. A Fund may enter into short positions in equities as well as short derivative positions through swaps and futures contracts on equities. If the price of the security or derivative that is the subject of a short sale increases, then a Fund will incur a loss equal to the increase in price from the time that the short sale was entered into plus any premiums and interest paid to a third party in connection with the short sale. The risk of loss on a shorted position arises from the increase in value of the security sold short and is potentially unlimited unlike the risk of loss on a long position, which is limited to the amount paid for the investment plus transaction costs. Therefore, short sales involve the risk that losses may be exaggerated, potentially losing more money than the actual cost of the investment. Also, there is the risk that the third party to the short sale may fail to honor its contract terms, causing a loss to a Fund. Further, in times of unusual or adverse economic, market or political conditions, the Fund may not be able to fully or partially implement its short selling strategy.

Additional Non-Principal Risk Information

Trading. Although each Fund's shares are listed for trading on NYSE Arca, Inc. or Cboe BZX Exchange, Inc. (each, a "Listing Exchange") and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Listing Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. The trading market in a Fund's shares may become less liquid in response to deteriorating liquidity in the markets for a Fund's holdings or due to irregular trading activity in the markets. Trading in shares may be halted due to market conditions or for reasons that, in the view of the Listing Exchange, make trading in shares inadvisable. In addition, trading in shares on the Listing Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Listing Exchange "circuit breaker" rules. There can be no assurance that the requirements of the Listing Exchange necessary to maintain the listing of a Fund will continue to be met or will remain unchanged or that Fund shares will trade with any volume, or at all, on any stock exchange.

Costs of Buying or Selling Shares. Investors buying or selling Fund shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts

of Fund shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to buy shares (the “bid” price) and the price at which an investor is willing to sell shares (the “ask” price). This difference in bid and ask prices is often referred to as the “spread” or “bid/ask spread.” The bid/ask spread varies over time for shares based on trading volume and market liquidity (including for the underlying securities held by a Fund), and is generally lower if a Fund’s shares have more trading volume and market liquidity and higher if a Fund’s shares have little trading volume and market liquidity. Further, a relatively small investor base in a Fund, asset swings in a Fund and/or increased market volatility may cause increased bid/ask spreads. Shares of the Funds, similar to shares of other issuers listed on a stock exchange, may be sold short and are therefore subject to the risk of increased volatility associated with short selling. Due to the costs

Table of Contents

Table of Contents

of buying or selling Fund shares, including bid/ask spreads, frequent trading of Fund shares may significantly reduce investment results and an investment in shares may not be advisable for investors who anticipate regularly making small investments.

Securities Lending. Although the Funds are indemnified by the Funds' lending agent for losses incurred in connection with a borrower's default with respect to a loan, the Funds bear the risk of loss of investing cash collateral and may be required to make payments to a borrower upon return of loaned securities if invested collateral has declined in value. Furthermore, because of the risks in delay of recovery, a Fund may lose the opportunity to sell the securities at a desirable price, and the Fund will generally not have the right to vote securities while they are being loaned. These events could also trigger negative tax consequences for a Fund.

Authorized Participants, Market Makers and Liquidity Providers Concentration Risk. The Funds have a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund shares may trade at a prolonged and material premium or discount to NAV (or not trade at all) and possibly face trading halts and/or delisting: (i) APs exit the business, have a business disruption (including through the types of disruptions described under "Cyber Security Risk" and "Operational Risk") or otherwise become unable or unwilling to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business, have a business disruption (including through the types of disruptions described under "Cyber Security Risk" and "Operational Risk") or significantly reduce their business activities and no other entities step forward to perform their functions.

This risk may be heightened for Funds that invest in markets that require foreign securities settlement and/or because Authorized Participants may be required to post collateral in relation to securities settlement, which only certain Authorized Participants may be able to do.

Operational Risk. The Funds and their service providers, including the investment adviser, sub-adviser, administrator, custodian, and transfer agent, may experience disruptions that arise from human error, processing and communications errors, counterparty or third-party errors, technology or systems failures, any of which may have an adverse impact on the Funds. Although the Funds and their service providers seek to mitigate these operational risks through their internal controls and operational risk management processes, these measures may not identify or may be inadequate to address all such risks.

Portfolio Holdings Information

Information about each Fund's daily portfolio holdings is available at www.wisdomtree.com. In addition, each Fund discloses its complete portfolio holdings as of the end of its fiscal year (June 30) and its second fiscal quarter (December 31) in its reports to shareholders. Each Fund files its complete portfolio holdings as of the end of its first and third fiscal quarters (March 31 and September 30, respectively) with the SEC on Form N-Q no later than 60 days after the relevant fiscal period. You can find the SEC filings on the SEC's website, www.sec.gov. A summarized description of each Fund's policies and procedures with respect to the disclosure of each Fund's portfolio holdings is available in the Trust's Statement of Additional Information ("SAI").

Management

Investment Adviser

As investment adviser, WisdomTree Asset Management has overall responsibility for the general management and administration of the Trust and each of its separate investment portfolios called “Funds.” WisdomTree Asset Management is a registered investment adviser with offices located at 245 Park Avenue, 35th Floor, New York, New York 10167, and is a leader in ETF management. As of September 30, 2017, WisdomTree Asset Management had assets under management totaling approximately \$44.2 billion. WisdomTree Investments* is the parent company of WisdomTree Asset Management. WisdomTree Asset Management provides an investment program for each Fund. The Adviser provides proactive oversight of the Sub-Adviser, defined below, daily monitoring of the Sub-Adviser’s buying and selling of securities for each Fund, and regular review of the Sub-Adviser’s performance. In addition, the Adviser arranges for sub-advisory, transfer agency, custody, fund administration, securities lending, and all other non-distribution related services necessary for the Funds to operate.

* “WisdomTree” is a registered mark of WisdomTree Investments and has been licensed for use by the Trust.

WisdomTree Investments has patent applications pending on the methodology and operation of its Indexes and the Funds.

For the fiscal year ended June 30, 2017, the Funds paid advisory fees to the Adviser, as a percentage of average daily net assets, in the amounts listed below.

Name of Fund	Management Fee
Dynamic Currency Hedged Europe Equity Fund	0.48% ¹
Dynamic Currency Hedged International Equity Fund	0.40% ²
Dynamic Currency Hedged International Quality Dividend Growth Fund	0.58% ³
Dynamic Currency Hedged International SmallCap Equity Fund	0.48% ¹
Dynamic Currency Hedged Japan Equity Fund	0.48% ¹
Emerging Markets Dividend Fund	0.32%
Europe Domestic Economy Fund	0.58% ⁴
Global ex-Mexico Equity Fund	0.20%
Global Hedged SmallCap Dividend Fund	0.43% ⁵
Global SmallCap Dividend Fund	0.43%
Fundamental U.S. Corporate Bond Fund	0.28% ⁶
Fundamental U.S. High Yield Corporate Bond Fund	0.48% ⁷
Fundamental U.S. Short-Term Corporate Bond Fund	0.28% ⁶
Fundamental U.S. Short-Term High Yield Corporate Bond Fund	0.48% ⁷
Dynamic Bearish U.S. Equity Fund	0.53% ⁴
Dynamic Long/Short U.S. Equity Fund	0.53% ⁴

(1) The Adviser has contractually agreed to limit the Management Fee to 0.43% through October 31, 2018, unless earlier terminated by the Board of Trustees of the Trust (the “Board”) for any reason at any time.

(2) The Adviser has contractually agreed to limit the Management Fee to 0.35% through October 31, 2018, unless earlier terminated by the Board for any reason at any time.

(3) The Adviser has contractually agreed to waive a portion of its Management Fee in an amount equal to the Acquired Fund Fees and Expenses attributable to the Fund’s investments in the Underlying Fund, as well as an additional 0.10%, through October 31, 2018, unless earlier terminated by the Board for any reason at any time.

(4)

Edgar Filing: WisdomTree Trust - Form 497

The Adviser has contractually agreed to limit the Management Fee to 0.48% through October 31, 2018, unless earlier terminated by the Board for any reason at any time.

- (5) The Adviser has contractually agreed to waive a portion of its Management Fee in an amount equal to the Acquired Fund Fees and Expenses attributable to the Fund's investments in the Underlying Fund through October 31, 2018, unless earlier terminated by the Board for any reason at any time.
- (6) The Adviser has contractually agreed to limit the Management Fee to 0.18% through October 31, 2018, unless earlier terminated by the Board for any reason at any time.
- (7) The Adviser has contractually agreed to limit the Management Fee to 0.38% through October 31, 2018, unless earlier terminated by the Board for any reason at any time.

Under the Investment Advisory Agreement for each Fund, WisdomTree Asset Management has agreed to pay generally all expenses of each Fund, subject to certain exceptions. For a detailed description of the Investment Advisory Agreement for each Fund, please see the "Management of the Trust" section of the SAI. Pursuant to a separate contractual arrangement, WisdomTree Asset Management arranges for the provision of chief compliance officer ("CCO") services with respect to each Fund, and is liable and responsible for, and administers, payments to

Table of ContentsTable of Contents

the CCO, the Independent Trustees and counsel to the Independent Trustees. WisdomTree Asset Management receives a fee of up to 0.0044% of each Fund's average daily net assets for providing such services and paying such expenses. WisdomTree Asset Management provides CCO services to the Trust.

Except as noted below, the basis for the Board of Trustees' approval of the Funds' Investment Advisory Agreements will be available in the Trust's Semi-Annual Report to Shareholders for the period ended December 31, 2017. The basis for the Board of Trustees' approval of the Investment Advisory Agreements, with respect to the Global ex-Mexico Equity Fund is available in the Trust's Annual Report to Shareholders dated June 30, 2017.

Sub-Advisers

BNY Mellon Asset Management North America Corporation: Mellon Capital is responsible for the day-to-day management of the Dynamic Bearish U.S. Equity Fund and Dynamic Long/Short U.S. Equity Fund (together, the "Alternative Funds"), Emerging Markets Dividend Fund, Europe Domestic Economy Fund, Global ex-Mexico Equity Fund, Global Hedged SmallCap Dividend Fund, Global SmallCap Dividend Fund, and the Dynamic Hedged Equity Funds (collectively, the "Equity Funds"). Mellon Capital, a registered investment adviser, is a leading innovator in the investment industry and manages global quantitative-based investment strategies for institutional and private investors. Its principal office is located at 50 Fremont Street, San Francisco, California 94105. As of September 30, 2017, Mellon Capital had assets under management totaling approximately \$363 billion. Mellon Capital is a wholly-owned indirect subsidiary of The Bank of New York Mellon Corporation, a publicly traded financial holding company. Mellon Capital chooses each Fund's portfolio investments and places orders to buy and sell the portfolio investments. WisdomTree Asset Management pays Mellon Capital for providing sub-advisory services to the Funds. Except as noted below, the basis for the Board of Trustees' approval of each Equity Fund's Sub-Advisory Agreement will be available in the Trust's Semi-Annual Report to Shareholders for the fiscal period ending December 31, 2017. The basis for the Board of Trustees' approval of the Investment Sub-Advisory Agreements, with respect to the Global ex-Mexico Equity Fund is available in the Trust's Annual Report to Shareholders dated June 30, 2017.

Voya Investment Management Co., LLC: Voya IM is responsible for the day-to-day management of the Fixed Income Funds. Voya IM, a registered investment adviser, is a leading innovator in the investment industry and manages global quantitative-based investment strategies for institutional and private investors. Its principal office is located at 230 Park Avenue, New York, New York 10169. As of June 30, 2017, Voya IM had assets under management totaling approximately \$224 billion. The Sub-Adviser is a wholly-owned indirect subsidiary of Voya Financial, Inc. (formerly, ING U.S., Inc.), a publicly traded financial holding company. Voya IM chooses the portfolio investments of each Fixed Income Fund and places orders to buy and sell the portfolio investments. WisdomTree Asset Management pays Voya IM for providing sub-advisory services to the Fixed Income Funds.

The basis for the Board of Trustees' approval of each Fixed Income Fund's Sub-Advisory Agreement will be available in the Trust's Semi-Annual Report to Shareholders for the fiscal period ending December 31, 2017.

WisdomTree Asset Management, as the investment adviser for the Funds, may hire one or more sub-advisers to oversee the day-to-day activities of the Funds. The sub-advisers are subject to oversight by WisdomTree Asset Management. WisdomTree Asset Management and the Trust have received an exemptive order from the SEC that permits WisdomTree Asset Management, with the approval of the Independent Trustees of the Trust, to retain unaffiliated investment sub-advisers for each Fund, without submitting the sub-advisory agreement to a vote of the Fund's shareholders. The Trust will notify shareholders in the event of any change in the identity of such sub-adviser or sub-advisers. WisdomTree Asset Management has ultimate responsibility for the investment performance of the Funds due to its responsibility to oversee each sub-adviser and recommend their hiring, termination and replacement. WisdomTree Asset Management is not required to disclose fees paid to any sub-adviser retained pursuant to the order.

Portfolio Managers

Mellon Capital

Equity Funds

Each Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Funds' portfolios are described below.

Ms. Karen Q. Wong, CFA, a Managing Director and Head of Equity Portfolio Management, has been with Mellon Capital since June 2000. Ms. Wong heads a team of portfolio managers responsible for overseeing all

100 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

passive equity funds, including ETFs. She is responsible for refinement and implementation of the equity portfolio management process. Ms. Wong is a member of the Senior Management Group, ESG Committee, Risk and Compliance Committee, Investment Management Committee, Investment Research Committee, Risk Management Committee, and Trade Management Oversight Committee. She is also a member of CFA Institute and CFA Society San Francisco, as well as the S&P Index Advisory Panel, MSCI Index Client Advisory Committee, and FTSE Russell Americas Regional Advisory Committee. Prior to joining Mellon Capital, Ms. Wong worked as a security analyst at Redwood Securities. Ms. Wong attained the Chartered Financial Analyst designation. She graduated with a B.A. from San Francisco State University, and obtained an M.B.A. in Finance from San Francisco State University. Ms. Wong is a member of the CFA Institute and the CFA Society of San Francisco. She is also a member of the S&P Index Advisory Panel and Russell Index Advisory Board.

Mr. Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been with Mellon Capital since August 1995. Mr. Brown heads a team of portfolio managers covering domestic and international passive equity funds. He is responsible for refinement and implementation of the equity portfolio management process. Mr. Brown attained the Chartered Financial Analyst designation. Mr. Brown graduated with an M.B.A. from California State University at Hayward and is a member of the CFA Institute and the CFA Society of San Francisco. He has over 20 years of investment experience. He is vice chairman of the BNY Mellon Proxy Voting and Governance Committee and a member of the Mellon Capital ESG Committee.

Mr. Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been with Mellon Capital since January 2000. Mr. Durante heads a team of portfolio managers covering domestic and international index portfolios. He is responsible for refinement and implementation of the equity portfolio management process. Prior to joining Mellon Capital, Mr. Durante worked in the fund accounting department for The Dreyfus Corporation. Mr. Durante attained the Chartered Financial Analyst designation. Mr. Durante graduated with a B.A. in Accounting from Fairfield University and is a member of the CFA Institute and the CFA Society of Pittsburgh. He has over 33 years of investment experience.

Voya IM

Fundamental U.S. Corporate Bond Fund and Fundamental U.S. Short-Term Corporate Bond Fund

Each Fund is managed by Voya IM's Investment Grade Credit Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Funds' portfolios are described below.

Travis King, CFA, Co-Head of the Investment Grade Credit Team, joined Voya IM in 2005. Prior to that Mr. King was a senior fixed income analyst with Reams Asset Management.

Anil Katarya, CFA, Co-Head of the Investment Grade Credit Team, joined Voya IM in 2000 and is responsible for managing the credit allocation for external client business across multi-sector and credit portfolios.

Kurt Kringelis, CFA, Head Macro Credit Strategist, joined Voya IM in 1998 and provides credit market insight and macro research broadly across the Fixed Income Team. Prior to his tenure with Voya, he was an associate portfolio manager with the high-yield group at Equitable Investment Services from 1995 to 1997.

Fundamental U.S. High Yield Corporate Bond Fund and Fundamental U.S. Short-Term High Yield Corporate Bond Fund

Each Fund is managed by Voya IM's High Yield Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Funds' portfolios are described below.

Randall Parrish, CFA, Head of Credit and Senior High Yield Portfolio Manager, joined Voya IM in 2001. Before being named a portfolio manager in 2007, Mr. Parrish served as a high-yield analyst focused on the media and retail/consumer sectors. Prior to joining Voya IM, Mr. Parrish was a corporate banker in leveraged finance with Sun Trust Bank and predecessors to Bank of America.

Rick Cumberledge, CFA, Head of High Yield and Senior High Yield Portfolio Manager, joined Voya IM in 2007. Prior to joining Voya IM, Mr. Cumberledge was a senior high-yield credit analyst at Federated Investors (2001–2007).

The Funds' SAI provides additional information about the Portfolio Managers' compensation, other accounts managed by the Portfolio Managers, and the Portfolio Managers' ownership of shares in the Funds.
WisdomTree Trust Prospectus 101

Table of Contents**Table of Contents****Additional Information on Buying and Selling Fund Shares**

Most investors will buy and sell shares of the Funds through brokers. Shares of the Funds trade on the Listing Exchange and elsewhere during the trading day and can be bought and sold throughout the trading day like other shares of publicly traded securities. When buying or selling shares through a broker, most investors will incur customary brokerage commissions and charges. Shares of the Funds trade under the trading symbols listed on the cover of this Prospectus.

Share Trading Prices

Transactions in Fund shares will be priced at NAV only if you are an institutional investor (e.g., broker-dealer) that has signed an agreement with the Distributor (as defined below) and you thereafter purchase or redeem shares directly from a Fund in Creation Units. As with other types of securities, the trading prices of shares in the secondary market can be affected by market forces such as supply and demand, economic conditions and other factors. The price you pay or receive when you buy or sell your shares in the secondary market may be more or less than the NAV of such shares.

The approximate value of shares of each Fund, also known as the “indicative optimized portfolio value” or IOPV, is disseminated every 15 seconds throughout the trading day by the Listing Exchange or by other information providers. This approximate value should not be viewed as a “real-time” update of the Funds' NAV because the approximate value may not be calculated in the same manner as the NAV, which is computed once per day. The approximate value generally is determined by using current market quotations, price quotations obtained from broker-dealers that may trade in the securities and instruments held by the Funds, and/or amortized cost for securities with remaining maturities of 60 days or less, based on securities and/or cash as reflected in the basket for a Creation Unit. If applicable, each approximate value also reflects changes in currency exchange rates between the U.S. dollar and the applicable currency. The approximate value is based on applicable quotes or closing prices from the securities' local market and may not reflect events that occur subsequent to the local market's close. The approximate value does not necessarily reflect the precise composition of the current portfolio of securities held by the Fund at a particular point in time (e.g., the securities in the basket for a Creation Unit may include securities that are not part of the Fund's portfolio) or the precise valuation of the current portfolio. The Funds, the Adviser and their affiliates are not involved in, or responsible for, the calculation or dissemination of the approximate value and make no warranty as to its accuracy.

Determination of Net Asset Value

The NAV of each Fund's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the Listing Exchange, generally 4:00 p.m. New York time (the “NAV Calculation Time”). NAV per share is calculated by dividing a Fund's net assets by the number of Fund shares outstanding.

In calculating its NAV, a Fund generally values: (i) equity securities (including preferred stock) traded on any recognized U.S. or non-U.S. exchange at the last sale price or official closing price on the exchange or system on which they are principally traded; (ii) unlisted equity securities (including preferred stock) at the last quoted sale price or, if no sale price is available, at the mean between the highest bid and lowest ask price; and (iii) fixed income securities at current market quotations or mean prices obtained from broker-dealers or independent pricing service providers. In addition, a Fund may invest in money market funds which are valued at their NAV per share and affiliated ETFs which are valued at their last sale or official closing price on the exchange on which they are principally traded or at their NAV per share in instances where the affiliated ETF has not traded on its principal exchange.

Fair value pricing is used by the Funds when reliable market valuations are not readily available or are not deemed to reflect current market values. Securities that may be valued using “fair value” pricing may include, but are not limited to, securities for which there are no current market quotations or whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by “significant events.” An example of a significant event is an event

occurring after the close of the market in which a security trades but before a Fund's next NAV Calculation Time that may materially affect the value of the Fund's investment (e.g., government action, natural disaster, or significant market fluctuation). When fair-value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities.

102 WisdomTree Trust Prospectus

Table of Contents**Table of Contents****Dividends and Distributions**

The Fixed Income Funds intend to pay out dividends on a monthly basis. The Equity Funds intend to pay out dividends on a quarterly basis, except for the Alternative Funds, which intend to pay out dividends on an annual basis. Nonetheless, a Fund may not make a dividend payment every month or quarter, as applicable.

Each Fund intends to distribute its net realized capital gains to investors annually. The Funds occasionally may be required to make supplemental distributions at some other time during the year. Distributions in cash may be reinvested automatically in additional whole shares only if the broker through whom you purchased shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Book Entry

Shares of the Funds are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding shares of each Fund.

Investors owning shares of the Funds are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all shares of the Funds. Participants include DTC, securities brokers and dealers, banks, trust companies, clearing corporations, and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of shares, you are not entitled to receive physical delivery of stock certificates or to have shares registered in your name, and you are not considered a registered owner of shares.

Therefore, to exercise any right as an owner of shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any securities that you hold in book-entry or “street name” form. Your broker will provide you with account statements, confirmations of your purchases and sales, and tax information.

Delivery of Shareholder Documents – Householding

Householding is an option available to certain investors of the Funds. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Funds is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

Frequent Purchases and Redemptions of Fund Shares

The Funds have adopted policies and procedures with respect to frequent purchases and redemptions of Creation Units of Fund shares. Since the Funds are ETFs, only a few institutional investors (known as “Authorized Participants”) are authorized to purchase and redeem shares directly from the Funds. Because purchase and redemption transactions with Authorized Participants are an essential part of the ETF process and may help keep ETF trading prices in line with NAV, each Fund accommodates frequent purchases and redemptions by Authorized Participants. Frequent purchases and redemptions for cash may increase index tracking error and portfolio transaction costs and may lead to the realization of capital gains. Frequent in-kind creations and redemptions generally do not give rise to these concerns. Each Fund reserves the right to reject any purchase order at any time. Each Fund reserves the right to impose restrictions on disruptive, excessive, or short-term trading.

Investments by Investment Companies

Section 12(d)(1) of the Investment Company Act of 1940 restricts investments by investment companies in the securities of other investment companies, including shares of each Fund. Registered investment companies and unit investment trusts that enter into a participation agreement with the Trust (“Investing Funds”) are permitted to invest in the WisdomTree Funds, except the Global Hedged SmallCap Dividend Fund and the Dynamic Currency Hedged International Quality Dividend Growth Fund beyond the limits set forth in Section 12(d)(1) of the 1940 Act subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust. With respect to the Global Hedged SmallCap Dividend Fund and the Dynamic Currency Hedged International Quality Dividend Growth Fund, which invest in an Underlying Fund, Investing Funds must adhere to the limits set forth in Section 12(d)(1) when

investing in those Funds.

WisdomTree Trust Prospectus 103

Table of Contents**Table of Contents****Additional Tax Information**

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Funds. Your investment in a Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Fund shares, including the possible application of foreign, state, and local tax laws.

Each Fund intends to qualify each year for treatment as a regulated investment company. If it meets certain minimum distribution requirements, a regulated investment company is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, a Fund's failure to qualify as a regulated investment company or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and consequently a reduction in income available for distribution to shareholders. Unless you are a tax-exempt entity or your investment in Fund shares is made through tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when:

A Fund makes distributions;

You sell Fund shares; and

You purchase or redeem Creation Units (institutional investors only).

Taxes on Distributions

For federal income tax purposes, distributions of investment income are generally taxable as ordinary income or qualified dividend income. Taxes on distributions of capital gains (if any) are determined by how long a Fund owned the assets that generated them, rather than how long a shareholder has owned his or her Fund shares. Sales of assets held by a Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by a Fund for one year or less generally result in short-term capital gains and losses. Distributions of a Fund's net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are properly reported by the Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gains. For non-corporate shareholders, long-term capital gains are generally subject to tax at reduced rates. Distributions of short-term capital gain will generally be taxable as ordinary income. Distributions reported by a Fund as "qualified dividend income" are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided holding period and other requirements are met. "Qualified dividend income" generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Fund received in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. However, to the extent a Fund lends its securities and receives substitute dividend payments, such payments are not expected to generate qualified dividend income when distributed to shareholders. Certain dividends received by a Fund on stock of U.S. corporations (generally, dividends received by a Fund in respect of any share of stock (1) as to which the Fund has met certain holding period requirements and (2) that is held in an unleveraged position) may be eligible for the dividends-received deduction generally available to corporate shareholders under the Code, provided such dividends are also appropriately reported as eligible for the dividends-received deduction by a Fund. In order to qualify for the dividends-received deduction, corporate shareholders must also meet minimum holding period requirements with respect to their Fund shares, taking into account any holding period reductions from certain hedging or other transactions or positions that diminish their risk of loss with respect to their Fund shares. The trading strategies of certain Funds, particularly the International Equity ETFs and Fixed Income ETFs, may significantly limit their ability to distribute dividends eligible for the dividends-received deduction for corporations. Since each other Fund's income is derived primarily from investments other than stock of U.S. corporations, it is not expected that dividends paid by such Fund will qualify for the

dividends-received deduction for corporate shareholders.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by a Fund before your investment (and thus were included in the price you paid for your shares).

104 WisdomTree Trust Prospectus

Table of Contents**Table of Contents**

Dividends and distributions from the Funds and capital gain on the sale of Fund shares are generally taken into account in determining a shareholder's "net investment income" for purposes of the Medicare contribution tax applicable to certain individuals, estates and trusts.

A Fund may include cash when paying the redemption price for Creation Units in addition to, or in place of, the delivery of a basket of securities. A Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment than if the in-kind redemption process was used.

Certain positions undertaken by the Funds, including its variable hedging strategy and its use of derivatives may result in "straddles" for federal income tax purposes. Because application of the straddle rules may affect the character of gains or losses, defer losses and/or accelerate the recognition of gains or losses from the affected straddle positions, the amount which must be distributed to shareholders as ordinary income or long-term capital gain may be increased or decreased substantially as compared to a Fund that did not engage in such transactions.

Distributions (other than Capital Gain Dividends) paid to individual shareholders that are neither citizens nor residents of the U.S. or to foreign entities will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. A Fund may, under certain circumstances, report all or a portion of a dividend as an "interest related dividend" or a "short term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met.

The Funds (or financial intermediaries, such as brokers, through which shareholders own Fund shares) generally are required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and the sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding.

Taxes When You Sell Fund Shares

Any capital gain or loss realized upon a sale of Fund shares is generally treated as a long-term gain or loss if you held the shares you sold for more than one year. Any capital gain or loss realized upon a sale of Fund shares held for one year or less is generally treated as a short-term gain or loss, except that any capital loss on a sale of shares held for six months or less is treated as a long-term capital loss to the extent of Capital Gain Dividends paid with respect to such shares. The ability to deduct capital losses may be limited depending on your circumstances.

Taxes on Creation and Redemption of Creation Units

An Authorized Participant having the U.S. dollar as its functional currency for U.S. federal income tax purposes that exchanges securities for Creation Units generally will recognize a gain or loss equal to the difference between (i) the sum of the market value of the Creation Units at the time of the exchange and any amount of cash received by the Authorized Participant in the exchange and (ii) the sum of the exchanger's aggregate basis in the securities surrendered and any amount of cash paid for such Creation Units. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate U.S. dollar market value of the securities plus the amount of any cash received for such Creation Units. The Internal Revenue Service, however, may assert that a loss that is realized upon an exchange of securities for Creation Units may not be permitted to be currently deducted under the rules governing "wash sales" (for a person who does not mark-to-market their holdings), or on the basis that there has been no significant change in economic position.

Gain or loss recognized by an Authorized Participant upon an issuance of Creation Units in exchange for non-U.S. currency will generally be treated as ordinary income or loss. Gain or loss recognized by an Authorized Participant upon an issuance of Creation Units in exchange for securities, or upon a redemption of Creation Units, may be capital or ordinary gain or loss depending on the circumstances. Any capital gain or loss realized upon an issuance of Creation Units in exchange for securities will generally be treated as long-term capital gain or loss if the securities have been held for more than one year. Any capital gain or loss realized upon the redemption of a Creation Unit will

generally be treated as long-term capital gain or loss if the Fund shares comprising the Creation Unit have been held for more than one year. Otherwise, such capital gains or losses are treated as short-term capital gains or losses. A person subject to U.S. federal income tax with the U.S. dollar as its functional currency who receives non-U.S. currency upon a redemption of Creation Units and does not immediately convert the non-U.S. currency into U.S. currency.

WisdomTree Trust Prospectus 105

Table of Contents**Table of Contents**

dollars may, upon a later conversion of the non-U.S. currency into U.S. dollars, recognize any gains or losses resulting from fluctuations in the value of the non-U.S. currency relative to the U.S. dollar since the date of the redemption.

Any such gains or losses will generally be treated as ordinary income or loss.

Persons exchanging securities or non-U.S. currency for Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction and whether the wash sales rules apply and when a loss might be deductible. If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Fund shares you purchased or redeemed and at what price.

Foreign Investments by the Fund

Dividends, interest and other income received by a Fund with respect to foreign securities may give rise to withholding and other taxes imposed by foreign countries. Tax conventions between certain countries and the United States may reduce or eliminate such taxes. The Funds may need to file special claims for refunds to secure the benefits of a reduced rate. If as of the close of a taxable year more than 50% of the total assets of a Fund consist of stock or securities of foreign corporations, the Fund intends to elect to “pass through” to investors the amount of foreign income and similar taxes (including withholding taxes) paid by the Fund during that taxable year. If a Fund elects to “pass through” such foreign taxes, then investors will be considered to have received as additional income their respective shares of such foreign taxes, but may be entitled to either a corresponding tax deduction in calculating taxable income, or, subject to certain limitations, a credit in calculating federal income tax.

Distribution

Foreside Fund Services, LLC (the “Distributor”) serves as the distributor of Creation Units for each Fund on an agency basis. The Distributor does not maintain a secondary market in shares of the Funds. The Distributor’s principal address is Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor has no role in determining the policies of any Fund or the securities that are purchased or sold by any Fund.

Premium/Discount and NAV Information

Information regarding a Fund’s NAV and how often shares of each Fund traded on the Listing Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund during the past calendar year and most recent calendar quarter is available at www.wisdomtree.com.

Additional Notices**Listing Exchange**

Shares of the Funds are not sponsored, endorsed, or promoted by the Listing Exchange. The Listing Exchange makes no representation or warranty, express or implied, to the owners of the shares of any Fund or any member of the public regarding the ability of a Fund to track the total return performance of any Index or the ability of any Index identified herein to track stock market performance. The Listing Exchange is not responsible for, nor has it participated in, the determination of the compilation or the calculation of any Index, nor in the determination of the timing of, prices of, or quantities of the shares of any Fund to be issued, nor in the determination or calculation of the equation by which the shares are redeemable. The Listing Exchange has no obligation or liability to owners of the shares of any Fund in connection with the administration, marketing, or trading of the shares of the Fund.

The Listing Exchange does not guarantee the accuracy and/or the completeness of any Index or any data included therein. The Listing Exchange makes no warranty, express or implied, as to results to be obtained by the Trust on behalf of its Funds, owners of the shares, or any other person or entity from the use of the subject Indexes or any data included therein. The Listing Exchange makes no express or implied warranties, and hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose with respect to any Index or any data included therein. Without limiting any of the foregoing, in no event shall the Listing Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

WisdomTree and the Funds

WisdomTree Investments and WisdomTree Asset Management (together, “WisdomTree”) and the Funds make no representation or warranty, express or implied, to the owners of shares of the Funds or any member of the public

regarding the advisability of investing in securities generally or in the Funds particularly or the ability of the Index to track general stock market performance. WisdomTree Investments is the licensor of certain Indexes, trademarks, service marks and trade names of the Funds. WisdomTree Investments has no obligation to take the needs of the Funds or the owners of shares of the Funds into consideration in determining, composing, or calculating the Indexes. WisdomTree Investments is not responsible for, and has not participated in, the determination of the

timing of, prices of, or quantities of shares of the Funds to be issued or in the determination or calculation of the equation by which the shares of the Funds are redeemable. WisdomTree and the Funds do not guarantee the accuracy, completeness, or performance of any Index or the data included therein and shall have no liability in connection with any Index or Index calculation. An Index's past performance is not necessarily an indication of how the Index will perform in the future. WisdomTree Investments has contracted with an independent calculation agent to calculate each Index.

Financial Highlights

The financial highlights table is intended to help you understand each Fund's financial performance for the past five fiscal years or, if shorter, the period since a Fund's inception. The total return in the table represents the rate that an investor would have earned (or lost) on an investment in the respective Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the financial statements audited by Ernst & Young LLP, an independent registered public accounting firm, whose report, along with the Funds' financial statements, are included in the Funds' Annual Report, which is available upon request.

TOTAL RETURN ²	20.56%	8.71%
RATIOS/SUPPLEMENTAL DATA:		
Net assets, end of period (000's omitted)	\$27,561	\$36,716
Ratios to average net assets of:		
Expenses	0.43%	0.43% ⁵
Net investment income	2.76%	3.88% ⁵
Portfolio turnover rate ⁶	33%	8%

* Commencement of operations.

¹ Based on average shares outstanding.²

Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. Total return calculated for a period of less than one year is not annualized. For the periods in which the investment advisor waived advisory fees for the WisdomTree Global Hedged SmallCap Dividend Fund, the total return would have been lower if certain expenses had not been waived.

³ The ratios to average net assets do not include net investment income (loss) or expenses of other funds in which the Fund invests.

⁴ Amount represents less than 0.005%.

⁵ Annualized.

⁶ Portfolio turnover rate is not annualized and excludes the value of the portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares. Short-term securities with maturities less than or equal to 365 days are excluded from the portfolio turnover calculation as well.

Table of Contents**GENERAL DESCRIPTION OF THE TRUST AND THE FUNDS**

The Trust was organized as a Delaware statutory trust on December 15, 2005 and is authorized to issue multiple series or portfolios. The Trust is an open-end management investment company, registered under the Investment Company Act of 1940, as amended (the "1940 Act"). The offering of the Trust's shares is registered under the Securities Act of 1933, as amended (the "Securities Act"). Each Fund described in this SAI seeks to track the price and yield performance, before fees and expenses, of a particular index ("Index"). The Indexes are created using proprietary methodology developed by WisdomTree Investments, Inc. ("WisdomTree Investments"). WisdomTree Investments is the parent company of WisdomTree Asset Management, Inc. ("WisdomTree Asset Management" or the "Adviser"), the investment adviser to each Fund. BNY Mellon Asset Management North America Corporation ("Mellon Capital") is the investment sub-adviser to Dynamic Currency Hedged Europe Equity Fund, Dynamic Currency Hedged International Equity Fund, Dynamic Currency Hedged International Small Cap Equity Fund, Dynamic Currency Hedged International Quality Dividend Growth Fund, Dynamic Currency Hedged Japan Equity Fund, Emerging Markets Dividend Fund, Europe Domestic Economy Fund, Global ex-Mexico Equity Fund, Global Hedged SmallCap Dividend Fund, Global SmallCap Dividend Fund, Dynamic Bearish U.S. Equity Fund and Dynamic Long/Short U.S. Equity Fund (collectively, the "Equity Funds"), and Voya Investment Management Co., LLC ("Voya IM") is the investment sub-adviser to the Fundamental U.S. Corporate Bond Fund, Fundamental U.S. High Yield Corporate Bond Fund, Fundamental U.S. Short-Term Corporate Bond Fund, and Fundamental U.S. Short-Term High Yield Corporate Bond Fund (collectively, the "Fixed Income Funds"). Mellon Capital and Voya IM (each a "Sub-Adviser", and together, the "Sub-Advisers") and the Adviser may be referred to collectively as the "Advisers". Foreside Fund Services, LLC serves as the distributor (the "Distributor") of the shares of each Fund.

Each Fund issues and redeems shares at net asset value per share ("NAV") only in large blocks of shares, typically 25,000 shares or more ("Creation Units" or "Creation Unit Aggregations"). Currently, Creation Units generally consist of 50,000 shares (except Creation Units consist of (1) 100,000 shares with respect to the Dynamic Currency Hedged Japan Equity Fund, Emerging Markets Dividend Fund, Global ex-Mexico Equity Fund, Global SmallCap Dividend Fund, and the Fixed Income Funds), though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. These transactions are usually in exchange for a basket of securities and/or an amount of cash. As a practical matter, only institutions or large investors purchase or redeem Creation Units. Except when aggregated in Creation Units, shares of each Fund are not redeemable securities.

Shares of each Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. or NYSE Arca, Inc. (each, a "Listing Exchange"), and trade throughout the day on the Listing Exchange and other secondary markets at market prices that may differ from NAV. As in the case of other publicly traded securities, brokers' commissions on transactions will be based on commission rates charged by the applicable broker.

The Trust reserves the right to adjust the prices of shares in the future to maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the applicable Fund.

WisdomTree is a registered mark of WisdomTree Investments and has been licensed for use by the Trust. WisdomTree Investments has patent applications pending on the methodology and operation of its Indexes and the Funds.

INVESTMENT STRATEGIES AND RISKS

Each Fund's investment objective, principal investment strategies and associated risks are described in the Fund's Prospectus. The sections below supplement these principal investment strategies and risks and describe the Funds' additional investment policies and the different types of investments that may be made by a Fund as a part of its non-principal investment strategies. With respect to each Fund's investments, unless otherwise noted, if a percentage limitation on investment is adhered to at the time of investment or contract, a subsequent increase or decrease as a result of market movement or redemption will not result in a violation of such investment limitation.

Each Fund intends to qualify each year for treatment as a regulated investment company (a "RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), so that it will not be subject to federal income tax on income and gains that are timely distributed to Fund shareholders. Each Fund will invest its assets, and otherwise conduct its operations, in a manner that is intended to satisfy the qualifying income, diversification and distribution requirements necessary to establish and maintain eligibility for such treatment.

Each Fund is considered "non-diversified," as such term is used in the 1940 Act.

GENERAL RISKS

Edgar Filing: WisdomTree Trust - Form 497

An investment in a Fund should be made with an understanding that the value of a Fund's portfolio securities may fluctuate in accordance with changes in the financial condition of an issuer or counterparty, changes in specific economic or political conditions that affect a particular security or issuer and changes in general economic or political conditions. A Fund may not outperform other investment strategies over short- or long-term market cycles and the Fund may decline in value. Fund shares may trade above or below their net asset value. An investor in a Fund could lose money over short or long periods of time. The price of the securities and other investments held by a Fund and thus the value of the Fund's portfolio is expected to fluctuate in accordance with general economic conditions, interest rates, political events, and other factors.

Table of Contents

Investor perceptions may also impact the value of Fund investments and the value of an investment in Fund shares. These investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic or banking crises.

Equity Funds. An investment in an Equity Fund should also be made with an understanding of the risks inherent in an investment in equity securities, including the risk that the financial condition of issuers may become impaired or that the general condition of the stock market may deteriorate (either of which may cause a decrease in the value of a Fund's portfolio securities and therefore a decrease in the value of shares of the Fund). Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence and perceptions change.

Holders of common stocks incur more risk than holders of preferred stocks and debt obligations because common stockholders, as owners of the issuer, generally have inferior rights to receive payments from the issuer in comparison with the rights of creditors or holders of debt obligations or preferred stocks. Further, unlike debt securities, which typically have a stated principal amount payable at maturity (whose value, however, is subject to market fluctuations prior thereto), or preferred stocks, which typically have a liquidation preference and which may have stated optional or mandatory redemption provisions, common stocks have neither a fixed principal amount nor a maturity. Common stock values are subject to market fluctuations as long as the common stock remains outstanding.

An investment in the Global Hedged SmallCap Dividend Fund should be made with the understanding that the Fund attempts to minimize or hedge against changes in the value of the U.S. dollar against foreign currencies. An investment in the Dynamic Currency Hedged Europe Equity Fund, Dynamic Currency Hedged International Equity Fund, Dynamic Currency Hedged International Small Cap Equity Fund, Dynamic Currency Hedged International Quality Dividend Growth Fund or Dynamic Currency Hedged Japan Equity Fund (collectively, the Dynamic Hedged Equity Funds) should be made with the understanding that these Funds attempt to minimize or hedge against changes in the value of the U.S. dollar against the euro, Japanese yen, or other foreign currencies, as applicable, in accordance with the currency hedge ratios determined by quantitative signals based on interest rate differentials, valuations and relative price momentum of the foreign currencies compared to the U.S. dollar. Dynamic Hedged Equity Funds and the Global Hedged SmallCap Dividend Fund are collectively referred to as the Hedged Equity Funds. The other International Equity ETFs do not seek to hedge against such fluctuations.

Fixed Income Funds. An investment in the Fixed Income Funds should be made with the understanding that although these Funds attempt to invest in liquid securities and instruments, there can be no guarantee that a liquid market for such securities and instruments will be made or maintained or that any such market will be or remain liquid. The price at which securities may be sold and the value of a Fund's shares will be adversely affected if trading markets for a Fund's portfolio securities are limited or absent, or if bid/ask spreads are wide.

Issuer-specific conditions may also affect the value of a Fixed Income Fund's investments. The financial condition of an issuer of a security or counterparty to a contract may cause it to default or become unable to pay interest or principal due on the security or contract. A Fund cannot collect interest and principal payments if the issuer or counterparty defaults. Accordingly, the value of an investment in a Fixed Income Fund may change in response to issuer or counterparty defaults and changes in the credit ratings of the Fund's portfolio securities. The price at which securities may be sold and the value of a Fund's shares will be adversely affected if trading markets for the Fund's portfolio securities are limited or absent, or if bid/ask spreads are wide.

All Funds. Although all of the securities in the Indexes are generally listed on one or more major U.S. or non-U.S. stock exchanges, there can be no guarantee that a liquid market for such securities will be maintained. The existence of a liquid trading market for certain securities may depend on whether dealers will make a market in such securities. There can be no assurance that a market will be made or maintained or that any such market will be or remain liquid. The price at which securities may be sold and the value of a Fund's shares will be adversely affected if trading markets for a Fund's portfolio securities are limited or absent, or if bid/ask spreads are wide.

Events in the financial sector have resulted, and may continue to result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. Domestic and foreign fixed income and equity markets experienced extreme volatility and turmoil starting in late 2008 and volatility has continued to be experienced in the markets. Issuers that have exposure to the real estate, mortgage and credit markets have been particularly affected, and well-known financial institutions have experienced significant liquidity and other problems. Some of these institutions have declared bankruptcy or defaulted on their debt. It is uncertain whether or for how long these conditions will continue. These events and possible continuing market turbulence may have an adverse effect on Fund performance.

A Fund may be included in model portfolios developed by WisdomTree Asset Management for use by financial advisors and/or investors. The market price of shares of a Fund, costs of purchasing or selling shares of a Fund, including the bid/ask spread, and liquidity of a Fund may be impacted by purchases and sales of such Fund by one or more model-driven investment portfolios.

Table of Contents

Authorized Participants should refer to the section herein entitled "Creation and Redemption of Creation Unit Aggregations" for additional information that may impact them.

BORROWING. Although the Funds do not intend to borrow money as part of their principal investment strategies, a Fund may do so to the extent permitted by the 1940 Act. Under the 1940 Act, a Fund may borrow up to 33% of its net assets, but under normal market conditions, no Fund expects to borrow greater than 10% of such Fund's net assets. A Fund will borrow only for short-term or emergency purposes. Borrowing will tend to exaggerate the effect on net asset value of any increase or decrease in the market value of a Fund's portfolio. Money borrowed will be subject to interest costs that may or may not be recovered by earnings on the securities purchased. A Fund also may be required to maintain minimum average balances in connection with a borrowing or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

CAPITAL CONTROLS AND SANCTIONS RISK. Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions may, without prior warning, lead to government intervention (including intervention by the U.S. government with respect to foreign governments, economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Countries use these controls to, among other reasons, restrict movements of capital entering (inflows) and exiting (outflows) their country to respond to certain economic or political conditions. By way of example, such controls may be applied to short-term capital transactions to counter speculative flows that threaten to undermine the stability of the exchange trade and deplete foreign exchange reserves. Levies may be placed on profits repatriated by foreign entities (such as the Funds). Capital controls and/or sanctions may also impact the ability of a Fund to buy, sell, transfer, receive, deliver (*i.e.*, create and redeem Creation Units) or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of a Fund (*e.g.*, cause a Fund to trade at prices materially different from its NAV), and cause the Fund to decline in value. A Fund may change its creation and or redemption procedures without notice in response to the imposition of capital controls or sanctions. There can be no assurance a country in which a Fund invests or the U.S. will not impose a form of capital control or sanction to the possible detriment of a Fund and its shareholders.

CURRENCY EXCHANGE RATE RISK. Investments denominated in non-U.S. currencies and investments in securities or derivatives that provide exposure to such currencies, currency exchange rates or interest rates are subject to non-U.S. currency risk. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of a Fund's investment and the value of your Fund shares. Because a Fund's NAV is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in the Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in a Fund's holdings goes up. Conversely, the U.S. dollar value of your investment in a Fund may go up if the value of the local currency appreciates against the U.S. dollar.

The value of the U.S. dollar measured against other currencies is influenced by a variety of factors. These factors include interest rates, national debt levels and trade deficits, changes in balances of payments and trade, domestic and foreign interest and inflation rates, global or regional political, economic or financial events, monetary policies of governments, actual or potential government intervention, and global energy prices. Political instability, the possibility of government intervention and restrictive or opaque business and investment policies may also reduce the value of a country's currency. Government monetary policies and the buying or selling of currency by a country's government may also influence exchange rates. Currencies of emerging or developing market countries may be subject to significantly greater risks than currencies of developed countries. Many developing market countries have experienced steady declines or even sudden devaluations of their currencies relative to the U.S. dollar. Some non-U.S. market currencies may not be traded internationally, may be subject to strict limitations on foreign investment and may be subject to frequent and unannounced government intervention. Government intervention and currency controls can decrease the value and significantly increase the volatility of an investment in non-U.S. currency. Although the currencies of some developing market countries may be convertible into U.S. dollars, the achievable rates may differ from those experienced by domestic investors because of foreign investment restrictions, withholding taxes, lack of liquidity or other reasons.

The Hedged Equity Funds use various strategies in an attempt to minimize changes in the value of the applicable currency or currencies, which may not be successful. In addition, a Hedged Equity Fund may not be fully hedged at all times in order to minimize transaction costs or for other reasons.

CYBER SECURITY RISK. Investment companies, such as the Funds, and their service providers may be prone to operational and information security risks resulting from cyber-attacks. Cyber-attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber-attacks affecting a Fund or the Adviser, Sub-Advisers, accountant, custodian, transfer agent, index providers, market makers, Authorized Participants and other third-party service providers may adversely impact a Fund. For instance, cyber-attacks may interfere with the

Edgar Filing: WisdomTree Trust - Form 497

processing of Authorized Participant transactions, impact the Fund's ability to calculate its net asset value, cause the release of private shareholder information or confidential company information, impede trading, subject a Fund to regulatory fines or financial losses, and cause reputational damage. A Fund could incur extraordinary expenses for

Table of Contents

cyber security risk management purposes, prevention and/or resolution. Similar types of cyber security risks are also present for issuers of securities in which a Fund invests, which could result in material adverse consequences for such issuers, and may cause the Fund's investment in such portfolio companies to lose value.

FOREIGN SECURITIES RISK. The International Equity ETFs invest a portion of their assets in non-U.S. securities and instruments, or in instruments that provide exposure to such securities and instruments. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may be subject to different accounting, auditing, financial reporting and investor protection standards than U.S. issuers. Investments in non-U.S. securities may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks (including restrictions on the transfers of securities). With respect to certain countries, there is the possibility of government intervention and expropriation or nationalization of assets. Because legal systems differ, there is also the possibility that it will be difficult to obtain or enforce legal judgments in certain countries. Since foreign exchanges may be open on days when a Fund does not price its shares, the value of the securities in a Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares. Conversely, Fund shares may trade on days when foreign exchanges are closed. Each of these factors can make investments in a Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging market countries. Foreign securities also include American Depositary Receipts (ADRs) which are U.S. dollar-denominated receipts representing shares of foreign-based corporations. ADRs are issued by U.S. banks or trust companies and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Global Depositary Receipts (GDRs), which are similar to ADRs, represent shares of foreign-based corporations and are generally issued by international banks in one or more markets around the world. Investments in ADRs and GDRs may be less liquid and more volatile than underlying shares in their primary trading markets. In addition, the Fund may change its creation or redemption procedures without notice in connection with restrictions on the transfer of securities. For more information on creation and redemption procedures, see "Creation and Redemption of Creation Unit Aggregations" herein.

HIGH YIELD RISK. The Fundamental U.S. High Yield Corporate Bond Fund and Fundamental U.S. Short-Term High Yield Corporate Bond Fund invest in non-investment grade securities rated lower than Baa by Moody's Investors Services, Inc. (Moody's), or equivalently rated by Standard & Poor's Corporation (S&P) or Fitch. Such securities are sometimes referred to as "high yield securities" or "junk bonds." Investing in these securities involves special risks in addition to the risks associated with investments in higher-rated fixed income securities. While offering a greater potential for capital appreciation and higher yields, high yield securities typically entail higher price volatility and may be less liquid than securities with higher ratings. High yield securities may be regarded as predominantly speculative with respect to the issuer's continuing ability to meet principal and interest payments. Issuers of securities in default may fail to resume principal or interest payments, in which case a Fund may lose its entire investment.

LACK OF DIVERSIFICATION. Each Fund is considered to be non-diversified. A non-diversified classification means that a Fund is not limited by the 1940 Act with regard to the percentage of its total assets that may be invested in the securities of a single issuer. As a result, each of the Funds may invest more of its total assets in the securities of a single issuer or a smaller number of issuers than if it were classified as a diversified fund. Therefore, each Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a small number of issuers than a fund that invests more widely, which may have a greater impact on the Fund's volatility and performance.

TAX RISK. To qualify for the favorable U.S. federal income tax treatment accorded to RICs, each Fund must, among other things, derive in each taxable year at least 90% of its gross income from certain prescribed sources. The U.S. Treasury Department has authority to issue regulations that would exclude foreign currency gains from qualifying income if such gains are not directly related to a Fund's business of investing in stock or securities. Accordingly, regulations may be issued in the future that could treat some or all of a Fund's foreign currency gains as nonqualifying income, which might jeopardize such Fund's status as a RIC for all years to which the regulations are applicable. If for any taxable year a Fund does not qualify as a RIC, all of its taxable income (including its net capital gain) for that year would be subject to tax at regular corporate rates without any deduction for distributions to shareholders, and such distributions would be taxable to shareholders as dividend income to the extent of the Fund's current and accumulated earnings and profits.

A discussion of some of the other risks associated with an investment in a Fund is contained in each Fund's Prospectus.

SPECIFIC INVESTMENT STRATEGIES

A description of certain investment strategies and types of investments used by some or all of the Funds is set forth below.

BANK DEPOSITS AND OBLIGATIONS. The Fixed Income Funds may invest in deposits and other obligations of U.S. and non-U.S. banks and financial institutions. Deposits and obligations of banks and financial institutions include certificates of deposit, time deposits, and bankers acceptances. Certificates of deposit and time deposits represent an institution's obligation to repay funds deposited with it that earn a specified

Edgar Filing: WisdomTree Trust - Form 497

interest rate. Certificates of deposit are negotiable certificates, while time deposits are non-negotiable deposits. A banker's acceptance is a time draft drawn on and accepted by a bank that becomes a primary and unconditional

Table of Contents

liability of the bank upon acceptance. Investments in obligations of non-U.S. banks and financial institutions may involve risks that are different from investments in obligations of U.S. banks. These risks include future unfavorable political and economic developments, seizure or nationalization of foreign deposits, currency controls, interest limitations or other governmental restrictions that might affect the payment of principal or interest on the securities held in a Fund.

COMMERCIAL PAPER. The Fixed Income Funds may invest in commercial paper. Commercial paper is an unsecured short-term promissory note with a fixed maturity of no more than 270 days issued by corporations, generally to finance short-term business needs. The commercial paper purchased by the Fund generally will be rated in the upper two short-term ratings by at least two Nationally Recognized Statistical Rating Organizations (NRSROs) or, if unrated, deemed to be of equivalent quality by the Adviser or the Sub-Adviser. If a security satisfies the rating requirement upon initial purchase and is subsequently downgraded, the Fund is not required to dispose of the security. In the event of such an occurrence, the Adviser or the Sub-Adviser will determine what action, including potential sale, is in the best interest of the Fund. The Fund may also purchase unrated commercial paper provided that such paper is determined to be of comparable quality by the Adviser or the Sub-Adviser. Commercial paper issuers in which the Fund may invest include securities issued by corporations without registration under the Securities Act in reliance on the exemption from such registration afforded by Section 3(a)(3) thereof, and commercial paper issued in reliance on the so-called private placement exemption from registration, which is afforded by Section 4(2) of the Securities Act (Section 4(2) paper). Section 4(2) paper is restricted as to disposition under the federal securities laws in that any resale must similarly be made in an exempt transaction. Section 4(2) paper is normally resold to other institutional investors through or with the assistance of investment dealers who make a market in Section 4(2) paper, thus providing liquidity.

CORPORATE DEBT OBLIGATIONS. The Fixed Income Funds may invest in corporate debt obligations. Corporate debt obligations are interest bearing securities in which the corporate issuer has a contractual obligation to pay interest at a stated rate on specific dates and to repay principal periodically or on a specified maturity date. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities. The primary differences between the different types of corporate debt securities are their maturities and secured or un-secured status. Commercial paper has the shortest term and is usually unsecured.

Corporate debt may be issued by domestic or foreign companies of all kinds, including those with small-, mid- and large-capitalizations. Corporate debt may be rated investment-grade or below investment-grade and may carry variable or floating rates of interest.

Because of the wide range of types, and maturities, of corporate debt obligations, as well as the range of creditworthiness of its issuers, corporate debt obligations have widely varying potentials for return and risk profiles. For example, commercial paper issued by a large established domestic corporation that is rated investment-grade may have a modest return on principal, but carries relatively limited risk. On the other hand, a long-term corporate note issued by a small foreign corporation from an emerging market country that has not been rated may have the potential for relatively large returns on principal, but carries a relatively high degree of risk.

Like most fixed income securities, corporate debt obligations carry both credit risk and interest rate risk. Credit risk is the risk that the Fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Interest rate risk is the risk that the value of certain corporate debt securities will tend to fall when interest rates rise. In general, corporate debt securities with longer terms tend to fall more in value when interest rates rise than corporate debt securities with shorter terms. Aggregate portfolio duration is important to investors as an indication of the Fund's sensitivity to changes in interest rates. Funds with higher durations generally are subject to greater interest rate risk. For example, the value of a fund with a portfolio duration of ten years would be expected to drop by 10% for every 1% increase in interest rates. The Fund's actual portfolio duration may be longer or shorter depending upon market conditions.

CURRENCY TRANSACTIONS. The International Equity ETFs may enter into foreign currency forward and foreign currency futures contracts to facilitate local securities settlements or to protect against currency exposure in connection with distributions to shareholders. The Funds, other than the Hedged Equity Funds, do not expect to engage in currency transactions for the purpose of hedging against declines in the value of a Fund's total assets that are denominated in one or more foreign currencies. Each Hedged Equity Fund invests in various types of currency contracts to hedge against changes in the value of the U.S. dollar against foreign currencies.

Foreign Currency Futures Contracts. A foreign currency futures contract is a contract involving an obligation to deliver or acquire the specified amount of a specific currency, at a specified price and at a specified future time. Futures contracts may be settled on a net cash payment basis rather than by the sale and delivery of the underlying currency.

Forward Foreign Currency Contracts. A forward foreign currency exchange contract (forward contract) involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are principally traded in the interbank market conducted directly between currency traders (usually large commercial banks) and their customers. Forward contracts are contracts between parties in which one party agrees to make a payment to the other party (the counterparty) based on the market value or level of a specified currency. In return, the counterparty agrees to

Edgar Filing: WisdomTree Trust - Form 497

make payment to the first party based on the return of a different specified currency. A forward contract generally has no margin deposit requirement, and no commissions are charged at any stage for trades. These contracts typically are settled by physical delivery of the underlying currency or currencies in the amount of the full contract value to the extent they are not agreed to be carried forward to another expiration date (*i.e.*, rolled over).

Table of Contents

A non-deliverable forward contract is a forward contract where there is no physical settlement of two currencies at maturity. Non-deliverable forward contracts will usually be done on a net basis, with a Fund receiving or paying only the net amount of the two payments. The net amount of the excess, if any, of each Fund's obligations over its entitlements with respect to each non-deliverable forward contract is accrued on a daily basis and an amount of cash or liquid securities having an aggregate value at least equal to the accrued excess is maintained to cover such obligations. The risk of loss with respect to non-deliverable forward contracts generally is limited to the net amount of payments that a Fund is contractually obligated to make or receive.

Currency exchange transactions involve a significant degree of risk and the markets in which currency exchange transactions are effected are highly volatile, highly specialized and highly technical. Significant changes, including changes in liquidity and prices, can occur in such markets within very short periods of time, often within minutes. Currency exchange trading risks include, but are not limited to, exchange rate risk, maturity gap, interest rate risk, and potential interference by foreign governments through regulation of local exchange markets, foreign investment or particular transactions in foreign currency. If a Fund utilizes foreign currency transactions at an inappropriate time, such transactions may not serve their intended purpose of improving the correlation of a Fund's return with the performance of its underlying Index and may lower the Fund's return. A Fund could experience losses if the value of any currency forwards and futures positions is poorly correlated with its other investments or if it could not close out its positions because of an illiquid market. Such contracts are subject to the risk that the counterparty will default on its obligations. In addition, each Fund will incur transaction costs, including trading commissions, in connection with certain foreign currency transactions.

DEPOSITARY RECEIPTS. To the extent a Fund invests in stocks of foreign corporations, a Fund's investment in such stocks may be in the form of Depositary Receipts or other similar securities convertible into securities of foreign issuers. Depositary Receipts may not necessarily be denominated in the same currency as the underlying securities into which they may be converted. ADRs are receipts typically issued by an American bank or trust company that evidence ownership of underlying securities issued by a foreign corporation. European Depositary Receipts (EDRs) are receipts issued in Europe that evidence a similar ownership arrangement. GDRs are receipts issued throughout the world that evidence a similar arrangement. Non-Voting Depositary Receipts (NVDRs) are receipts issued in Thailand that evidence a similar arrangement. Generally, ADRs, in registered form, are designed for use in the U.S. securities markets, and EDRs, in bearer form, are designed for use in European securities markets. GDRs are tradable both in the United States and in Europe and are designed for use throughout the world. NVDRs are tradable on the Stock Exchange of Thailand.

A Fund will not generally invest in any unlisted Depositary Receipts or any Depositary Receipt that WisdomTree Asset Management or the relevant Sub-Adviser deems to be illiquid or for which pricing information is not readily available. In addition, all Depositary Receipts generally must be sponsored; however, a Fund may invest in unsponsored Depositary Receipts under certain limited circumstances. The issuers of unsponsored Depositary Receipts are not obligated to disclose material information in the United States, and, therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the Depositary Receipts. The use of Depositary Receipts may increase tracking error relative to an underlying Index.

DERIVATIVES. Each Fund may use derivative instruments as part of its investment strategies. No Fund will use derivatives to increase leverage, and each Fund will provide margin or collateral, as applicable, with respect to investments in derivatives in such amounts as determined under applicable law, regulatory guidance or related interpretations.

Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to bonds, interest rates, currencies, commodities, and related indexes. Examples of derivative instruments include forward currency contracts, currency and interest rate swaps, currency options, futures contracts, options on futures contracts and swap agreements.

With respect to certain kinds of derivative transactions that involve obligations to make future payments to third parties, including, but not limited to, futures contracts, forward contracts, swap contracts, the purchase of securities on a when-issued or delayed delivery basis, or reverse repurchase agreements, under applicable federal securities laws, rules, and interpretations thereof, a Fund must set aside (referred to sometimes as asset segregation) liquid assets, or engage in other measures to cover open positions with respect to such transactions in a manner consistent with the 1940 Act, specifically sections 8 and 18 thereunder. In complying with such requirements, the Fund will include assets of any wholly-owned subsidiary in which that Fund invests on an aggregate basis.

For example, with respect to forward contracts and futures contracts that are not contractually required to cash-settle, the Fund must cover its open positions by having available liquid assets equal to the contracts' full notional value. The Funds treat deliverable forward contracts for currencies that are liquid as the equivalent of cash-settled contracts. As such, a Fund may have available liquid assets in an amount equal to the Fund's daily marked-to-market (net) obligation (*i.e.*, the Fund's daily net liability, if any) rather than the full notional amount under such deliverable forward contracts. Similarly, with respect to futures contracts that are contractually required to cash-settle, the Fund may have available liquid assets in an amount equal to the Fund's daily marked-to-market (net) obligation rather than the notional value. The Fund reserves the right to modify these policies in the future.

Edgar Filing: WisdomTree Trust - Form 497

Forwards, swaps and certain other derivatives are subject to regulation under The Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) in the U.S. and certain non-U.S. jurisdictions. Physically-settled forwards entered into between

Table of Contents

eligible contract participants, such as the Fund, are generally subject to fewer regulatory requirements in the U.S. than non-deliverable forwards. Under the Dodd-Frank Act, non-deliverable forwards are regulated as swaps and are subject to rules requiring central clearing and mandatory trading on an exchange or facility that is regulated by the Commodity Futures Trading Commission (the "CFTC"). Under the Dodd-Frank Act, non-deliverable forwards, swaps and certain other derivatives traded in the OTC market are subject to initial and variation margin requirements. The Fund's counterparties may be subject to additional regulatory requirements and/or apply the regulatory requirements more broadly than is required for administrative and other reasons, including, for example, by (i) applying the stricter regulatory requirements to physically-settled forwards that are applicable to non-deliverable forwards even though the stricter rules are not technically applicable to such physically-settled forwards; and (ii) applying smaller thresholds for the delivery of variation margin than required. As such, a Fund using currency forwards, and particularly a currency hedged Fund that uses currency forwards, may need to hold more cash than it has historically, which may include raising cash by selling securities and/or obtaining cash through other arrangements in order to meet margin requirements, which may, among other potential consequences, cause increased index tracking error, cause an increase in expense ratio, lead to the realization of taxable gains, increase costs to a Fund of trading or otherwise affect returns to investors in such Fund.

Effective April 24, 2012, the CFTC revised, among other things, CFTC Rule 4.5 and rescinded CFTC Rule 4.13(a)(4). The CFTC has adopted amendments to its regulations of commodity pool operators ("CPOs") managing funds registered under the 1940 Act that harmonize the SEC's and the CFTC's regulatory schemes. The adopted amendments to the CFTC regulations allow CPOs to registered investment companies to satisfy certain recordkeeping, reporting and disclosure requirements that would otherwise apply to them under Part 4 of the CFTC's regulations by continuing to comply with comparable SEC requirements. To the extent that the CFTC recordkeeping, disclosure and reporting requirements deviate from the comparable SEC requirements, such deviations are not expected to materially adversely affect the ability of the Funds to continue to operate and achieve their investment objectives. If, however, these requirements or future regulatory changes result in a Fund having difficulty in achieving its investment objectives, the Trust may determine to reorganize or close the Fund, materially change the Fund's investment objectives and strategies, or operate the Fund as a regulated commodity pool pursuant to WisdomTree Asset Management's CPO registration.

With regard to each Fund, WisdomTree Asset Management will continue to claim relief from the definition of CPO under revised CFTC Rule 4.5. Specifically, pursuant to CFTC Rule 4.5, WisdomTree Asset Management may claim exclusion from the definition of CPO, and thus from having to register as a CPO, with regard to a Fund that enters into commodity futures, commodity options or swaps solely for bona fide hedging purposes, or that limits its investment in commodities to a de minimis amount, as defined in CFTC rules, so long as the shares of such Fund are not marketed as interests in a commodity pool or other vehicle for trading in commodity futures, commodity options or swaps.

Credit-Linked Notes. A credit-linked note is a type of structured note whose value is linked to an underlying reference asset. Credit-linked notes typically provide periodic payments of interest as well as payment of principal upon maturity. The value of the periodic payments and the principal amount payable upon maturity are tied (positively or negatively) to a reference asset, such as an index, government bond, interest rate or currency exchange rate. The ongoing payments and principal upon maturity typically will increase or decrease depending on increases or decreases in the value of the reference asset. A credit-linked note typically is issued by a special purpose trust or similar entity and is a direct obligation of the issuing entity. The entity, in turn, invests in bonds or derivative contracts in order to provide the exposure set forth in the credit-linked note. The periodic interest payments and principal obligations payable under the terms of the note typically are conditioned upon the entity's receipt of payments on its underlying investment. If the underlying investment defaults, the periodic payments and principal received by a Fund will be reduced or eliminated. The buyer of a credit-linked note assumes the risk of default by the issuer and the underlying reference asset or entity. Generally, investors in credit-linked notes assume the risk of default by the issuer and the reference entity in return for a potentially higher yield on their investment or access to an investment that they could not otherwise obtain. In the event the issuer defaults or there is a credit event that relates to the reference asset, the recovery rate is generally less than a Fund's initial investment and the Fund may lose money.

Swap Agreements. Each Fund may enter into swap agreements, including currency swaps, interest rate swaps, credit default swaps, and total return swaps. A typical foreign currency swap involves the exchange of cash flows based on the notional differences among two or more currencies (e.g., the U.S. dollar and the euro). A typical interest rate swap involves the exchange of a floating interest rate payment for a fixed interest payment. A typical credit default swap ("CDS") involves an agreement to make a series of payments by the buyer in exchange for receipt of payment by the seller if the loan defaults. In the event of default the buyer of the CDS receives compensation (usually the face value of the loan), and the seller of the CDS takes possession of the defaulted loan. In the event that the Fund acts as a protection seller of a CDS, the Fund will segregate assets equivalent to the full notional value of the CDS. In the event that the Fund acts as a protection buyer of a CDS, the Fund will cover the total amount of required premium payments plus the pre-payment penalty. Total return swaps involve the exchange of payments based on the total return on an underlying reference asset. The total return includes appreciation or depreciation on the reference asset, plus any interest or dividend payments. Swaps agreements can be structured to provide for periodic payments over the term of the swap contract or a single payment at maturity (also known as a "bullet swap"). Swap agreements may be used to hedge or achieve exposure to, for example, currencies, interest rates, and money market securities without actually purchasing such currencies or securities. Each Fund may use swap agreements to invest in a market without owning or taking physical custody of the underlying securities in circumstances in which direct investment is restricted for legal reasons or is otherwise impracticable. Swap agreements will tend to shift a Fund's investment exposure from one

type of investment to another or from one payment stream to another.

Table of Contents

Depending on their structure, swap agreements may increase or decrease a Fund's exposure to long- or short-term interest rates (in the United States or abroad), foreign currencies, corporate borrowing rates, or other factors, and may increase or decrease the overall volatility of a Fund's investments and its share price. When a Fund purchases or sells a swap contract, the Fund is required to cover its position in order to limit the risk associated with the use of leverage and other related risks. To cover its position, the Fund will maintain with its custodian bank (and mark-to-market on a daily basis) a segregated account consisting of cash or liquid securities that, when added to any amounts deposited as margin, are equal to the market value of the swap contract or otherwise cover its position in a manner consistent with the 1940 Act or the rules and SEC interpretations thereunder. If the Fund continues to engage in the described securities trading practices and properly segregates assets, the segregated account will function as a practical limit on the amount of leverage which the Fund may undertake and on the potential increase in the speculative character of the Fund's outstanding portfolio securities. Additionally, such segregated accounts will generally ensure the availability of adequate funds to meet the obligations of the Fund arising from such investment activities.

Futures, Options and Options on Futures Contracts. Each Fund may enter into U.S. or foreign futures contracts, options and options on futures contracts. When a Fund purchases a futures contract, it agrees to purchase a specified underlying instrument at a specified future date. When a Fund sells a futures contract, it agrees to sell the underlying instrument at a specified future date. The price at which the purchase and sale will take place is fixed when the Fund enters into the contract. Futures can be held until their delivery dates, or can be closed out before then if a liquid secondary market is available.

Each Fund may purchase and write call or put options on an exchange or over the counter (OTC). A put option on a security gives the purchaser of the option, in exchange for payment of a premium, the right, but not the obligation, to sell, and the writer of the option the obligation to buy, the underlying security at a stated price (the exercise price) at any time before the option expires. A call option on a security gives the purchaser of the option, in exchange for payment of a premium, the right, but not the obligation, to buy, and the writer the obligation to sell, the underlying security at the exercise price at any time before the option expires. A premium is paid to the writer of an option as consideration for undertaking the obligation in the contract. OTC options differ from exchange-traded options in several respects. They are transacted directly with dealers and not with a clearing corporation, and therefore entail the risk of non-performance by the dealer. OTC options are available for a greater variety of securities and for a wider range of expiration dates and exercise prices than are available for exchange-traded options. Because OTC options are not traded on an exchange, pricing is done normally by reference to information from a market maker. It is the SEC's position that OTC options are generally illiquid.

The risk of loss in trading futures contracts or uncovered call options in some strategies (e.g., selling uncovered stock index futures contracts) is potentially unlimited. The Funds do not plan to use futures and options contracts in this way. The risk of a futures position may still be large as traditionally measured due to the low margin deposits required. In many cases, a relatively small price movement in a futures contract may result in immediate and substantial loss or gain to the investor relative to the size of a required margin deposit. The Funds, however, intend to utilize futures and options contracts in a manner designed to limit their risk exposure to levels comparable to direct investment in stocks.

Utilization of futures and options on futures by a Fund involves the risk of imperfect or even negative correlation to the underlying Index if the index underlying the futures contract differs from a Fund's underlying Index. There is also the risk of loss by a Fund of margin deposits in the event of bankruptcy of a broker with whom a Fund has an open position in the futures contract or option. The purchase of put or call options will be based upon predictions by the Fund as to anticipated trends, which predictions could prove to be incorrect.

The potential for loss related to the purchase of an option on a futures contract is limited to the premium paid for the option plus transaction costs. Because the value of the option is fixed at the point of sale, there are no daily cash payments by the purchaser to reflect changes in the value of the underlying contract; however, the value of the option changes daily and that change would be reflected in the NAV of each Fund. The potential for loss related to writing options is unlimited.

Although each Fund intends to enter into futures contracts only if there is an active market for such contracts, there is no assurance that an active market will exist for the contracts at any particular time.

EQUITY SECURITIES. Equity securities, such as the common stocks of an issuer, are subject to stock market fluctuations and therefore may experience volatile changes in value as market conditions, consumer sentiment or the financial condition of the issuers change. A decrease in value of the equity securities in a Fund's portfolio may also cause the value of a Fund's shares to decline.

EXCHANGE TRADED PRODUCTS. Each Fund may invest in exchange traded products (ETPs), which include exchange traded funds registered under the 1940 Act, exchange traded commodity trusts and exchange traded notes. The Adviser may receive management or other fees from the ETPs in which the Fund may invest (Affiliated ETPs), as well as a management fee for managing the Fund. It is possible that a conflict of interest among the Fund and Affiliated ETPs could affect how the Adviser fulfills its fiduciary duties to the Fund and the Affiliated ETPs. Although the Adviser takes steps to address the conflicts of interest, it is

Table of Contents

possible that the conflicts could impact the Fund. A Fund may invest in new ETPs or ETPs that have not yet established a deep trading market at the time of investment. Shares of such ETPs may experience limited trading volume and less liquidity, in which case the spread (the difference between bid price and ask price) may be higher.

Exchange Traded Funds. Each Fund may invest in ETFs. ETFs are investment companies that trade like stocks on a securities exchange at market prices rather than NAV. As a result, ETF shares may trade at a price greater than NAV (premium) or less than NAV (discount). A Fund that invests in an ETF indirectly bears fees and expenses charged by the ETF in addition to the Fund's direct fees and expenses. Investments in ETFs are also subject to brokerage and other trading costs that could result in greater expenses for the Fund.

Exchange Traded Commodity Trusts. An exchange traded commodity trust is a pooled trust that invests in physical commodities or commodity futures, and issues shares that trade on a securities exchange at a discount or premium to the value of the trust's holdings. Investments in exchange traded commodity trusts are also subject to brokerage and other trading costs, which could result in greater expenses to the Fund. Exchange traded commodity trusts are not investment companies registered under the 1940 Act. As a result, in connection with any such investments, a Fund will not have the protections associated with ownership of shares in an investment company registered under the 1940 Act. Investments in exchange traded commodity trusts, like investments in other commodities, may increase the risk that a Fund may not qualify as RIC under the Code. If the Fund fails to qualify as a RIC, the Fund will be subject to tax, which will reduce returns to shareholders. Such a failure will also alter the treatment of distributions to its shareholders.

Exchange-Traded Notes. Each Fund may invest in exchange traded notes (ETNs). ETNs generally are senior, unsecured, unsubordinated debt securities issued by a sponsor, such as an investment bank. ETNs are traded on exchanges and the returns are linked to the performance of market indexes. In addition to trading ETNs on exchanges, investors may redeem ETNs directly with the issuer on a periodic basis, typically in a minimum amount of 50,000 units, or hold the ETNs until maturity. The value of an ETN may be influenced by time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in the underlying market, changes in the applicable interest rates, and economic, legal, political or geographic events that affect the referenced market. Because ETNs are debt securities, they are subject to credit risk. If the issuer has financial difficulties or goes bankrupt, a Fund may not receive the return it was promised. If a rating agency lowers an issuer's credit rating, the value of the ETN may decline and a lower credit rating reflects a greater risk that the issuer will default on its obligation. There may be restrictions on a Fund's right to redeem its investment in an ETN. There are no periodic interest payments for ETNs, and principal is not protected. A Fund's decision to sell its ETN holdings may be limited by the availability of a secondary market.

FINANCIAL SECTOR INVESTMENTS. Each Fund may engage in transactions with or invest in companies that are considered to be in the financial sector, including commercial banks, brokerage firms, diversified financial services, a variety of firms in all segments of the insurance industry (such as multi-line, property and casualty, and life insurance) and real estate-related companies. There can be no guarantee that these strategies may be successful. A Fund may lose money as a result of defaults or downgrades within the financial sector.

Events in the financial sector have resulted in increased concerns about credit risk and exposure. Well-known financial institutions have experienced significant liquidity and other problems and have defaulted on their debt obligations. Issuers that have exposure to real estate, mortgage and credit markets have been particularly affected. It is uncertain whether or how long these conditions will continue. These events and possible continuing market turbulence may have an adverse effect on Fund performance.

Rule 12d3-1 under the 1940 Act limits the extent to which a fund may invest in the securities of any one company that derives more than 15% of its revenues from brokerage, underwriting or investment management activities. A Fund may purchase securities of an issuer that derived more than 15% of its gross revenues in its most recent fiscal year from securities-related activities, subject to the following conditions: (1) the purchase cannot cause more than 5% of the Fund's total assets to be invested in securities of that issuer; (2) for any equity security, the purchase cannot result in the Fund owning more than 5% of the issuer's outstanding securities in that class; and (3) for a debt security, the purchase cannot result in the Fund owning more than 10% of the outstanding principal amount of the issuer's debt securities. A Fund, in seeking to comply with this rule, may experience greater index tracking error because an Index is not subject to the rule.

In applying the gross revenue test, an issuer's own securities-related activities must be combined with its ratable share of securities-related revenues from enterprises in which it owns a 20% or greater voting or equity interest. All of the above percentage limitations, as well as the issuer's gross revenue test, are applicable at the time of purchase. With respect to warrants, rights, and convertible securities, a determination of compliance with the above limitations shall be made as though such warrant, right, or conversion privilege had been exercised. A Fund will not be required to divest its holdings of a particular issuer when circumstances subsequent to the purchase cause one of the above conditions to not be met. The purchase of a general partnership interest in a securities-related business is prohibited.

FIXED INCOME SECURITIES. Fixed income securities, such as corporate debt, bonds and notes, change in value in response to interest rate changes and other factors, such as the perception of the issuer's creditworthiness. For example, the value of fixed income securities will generally decrease when interest rates rise, which may cause the value of the Fund to decrease. In addition, investments in fixed income securities with

longer maturities will generally fluctuate more in response to interest rate changes. The capacity of

Table of Contents

traditional dealers to engage in fixed income trading has not kept pace with the bond market's growth and dealer inventories of bonds are at or near historic lows relative to market size. Because market makers provide stability to fixed income markets, the significant reduction in dealer inventories could lead to decreased liquidity and increased volatility, which may become exacerbated during periods of economic or political stress. In addition, liquidity risk may be magnified in a rising interest rate environment in which investor redemptions (or selling of fund shares in the secondary market) from fixed income funds may be higher than normal.

FLOATING AND ADJUSTABLE RATE NOTES. The Fixed Income Funds may purchase floating-rate and adjustable rate obligations, such as demand notes, bonds, and commercial paper. Variable- and floating-rate securities generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. Conversely, floating-rate securities will not generally increase in value if interest rates decline. When the Fund holds variable- or floating-rate securities, a decrease (or, in the case of inverse floating-rate securities, an increase) in market interest rates will adversely affect the income received from such securities and the net asset value of the Fund's shares.

These securities may bear interest at a rate that resets based on standard money market indices or are remarketed at current market rates. They may permit the holder to demand payment of principal at any time or at specified intervals not exceeding 397 days. The issuer of such obligations may also have the right to prepay, in its discretion, the principal amount of the obligations plus any accrued interest. The reset date of securities held by the Fund may not be longer than 397 days (and therefore would be considered to be within the Fund's general maturity restriction of 397 days). Given that most floating-rate securities reset their interest rates prior to their final maturity date, the Fund uses the period to the next reset date to calculate the securities contribution to the average portfolio maturity of the Fund.

FUTURE DEVELOPMENTS. The Trust's Board of Trustees (the Board) may, in the future, authorize a Fund to invest in securities contracts and investments other than those listed in this SAI and in the Fund's Prospectus, provided they are consistent with the Fund's investment objective and do not violate any investment restrictions or policies.

ILLIQUID SECURITIES. Each Fund may invest up to an aggregate amount of 15% of its net assets in illiquid securities. Illiquid securities include securities subject to contractual or other restrictions on resale and other instruments that lack readily available markets to the extent the Adviser or relevant Sub-Adviser has not deemed such securities to be liquid. The inability of a Fund to dispose of illiquid or not readily marketable investments readily or at a reasonable price could impair a Fund's ability to raise cash for redemptions or other purposes. The liquidity of securities purchased by a Fund which are eligible for resale pursuant to Rule 144A, except for certain 144A bonds, will be monitored by each Fund on an ongoing basis. In the event that such a security is deemed to be no longer liquid, a Fund's holdings will be reviewed to determine what action, if any, is required to ensure that the retention of such security does not result in a Fund having more than 15% of its net assets invested in illiquid securities.

INFLATION-LINKED BONDS. The Fixed Income Funds may invest in inflation-indexed bonds. Inflation-indexed bonds are fixed income securities whose principal value is periodically adjusted according to the rate of inflation. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds. However, the current market value of the bonds is not guaranteed, and will fluctuate with market conditions. Investments in other inflation-linked bonds may not provide a similar guarantee and the principal amount repaid could be less than the original principal if inflation falls over the period.

The value of inflation-indexed bonds is expected to change in response to changes in real interest rates. Real interest rates in turn are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if the rise in inflation exceeds the rise in nominal rates, real rates are likely to decline, leading to an increase in the market value of the bonds. Conversely, if the rise in nominal interest rates outpaces the pickup in the rate of inflation, real interest might rise, generating a decline in the market value of the inflation-linked security.

The periodic adjustment of U.S. inflation-indexed bonds generally is tied to the Consumer Price Index for Urban Consumers (CPI-U), which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI-U is a measurement of changes in the cost of living, made up of components such as housing, food, transportation and energy. Inflation-indexed bonds issued by a foreign government are generally adjusted to reflect a comparable country or regional inflation measure calculated by that government. There can be no assurance that the CPI-U or any foreign inflation index will accurately measure the real rate of inflation in the prices of goods and services. Moreover, there can be no assurance that the rate of inflation in a foreign country will be correlated to the rate of inflation in the United States. Any increase in the principal amount of an inflation-indexed bond will be considered taxable ordinary income, even though investors do not receive their principal until maturity.

Inflation-linked bonds held by a Fund may experience an increase in original issue value due to inflation-linked adjustments. The inflation-linked growth in the value of these bonds may be reflected in the Fund's gross income. While inflation-adjusted growth does not result in cash payments to the Fund, the Fund may be required to make distributions to shareholders for any increase in value in excess of the cash actually received by the Fund during the taxable year. The Fund may be required to sell portfolio securities to make these distribution payments. This may lead to higher transaction costs, losses from sale during unfavorable market conditions and higher capital gains taxes. If

Edgar Filing: WisdomTree Trust - Form 497

deflation-linked adjustments decrease the value of inflation-linked bonds held by the Fund, income distributions previously made by the Fund during the taxable year may be deemed a return of capital.

Table of Contents

INVESTMENT COMPANY SECURITIES. Each Fund may invest in the securities of other investment companies (including money market funds and certain ETPs). The 1940 Act generally prohibits a Fund from acquiring more than 3% of the outstanding voting shares of an investment company and limits such investments to no more than 5% of the Fund's total assets in any single investment company and no more than 10% in any combination of two or more investment companies although a Fund may invest in excess of these limits in affiliated ETPs and to the extent it enters into agreements and abides by certain conditions of the exemptive relief issued to non-affiliated ETPs. Each Fund may purchase or otherwise invest in shares of affiliated ETFs and affiliated money market funds.

MONEY MARKET INSTRUMENTS. Each Fund may invest a portion of its assets in high-quality money market instruments on an ongoing basis to provide liquidity or for other reasons. The instruments in which a Fund may invest include: (i) short-term obligations issued by the U.S. government; (ii) negotiable certificates of deposit (CDs), fixed time deposits and bankers' acceptances of U.S. and foreign banks and similar institutions; (iii) commercial paper rated at the date of purchase Prime-1 by Moody's or A-1+ or A-1 by S&P or, if unrated, of comparable quality as determined by the Fund; and (iv) repurchase agreements. CDs are short-term negotiable obligations of commercial banks. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Bankers' acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

MORTGAGE-BACKED AND ASSET-BACKED SECURITIES. The Fixed Income Funds may invest in mortgage-backed and asset-backed securities. Mortgage-backed securities are secured (or backed) by pools of commercial or residential mortgages. Asset-backed securities are secured (or backed) by other types of assets, such as automobile loans, installment sale contracts, credit card receivables or other similar assets. Mortgage-backed and asset-backed securities are issued by entities such as Ginnie Mae, Fannie Mae, the Federal Home Loan Mortgage Corporation, commercial banks, trusts, special purpose entities, finance companies, finance subsidiaries of industrial companies, savings and loan associations, mortgage banks and investment banks. Investing in mortgage-backed and asset-backed securities is subject to credit risk and interest rate risk. They are also subject to the risk of prepayment, which can change the nature and extent of the Fund's interest rate risk. The market for mortgage-backed securities may not be liquid under all interest rate scenarios, which may prevent the Fund from selling such securities held in its portfolio at times or prices that it desires.

MUNICIPAL SECURITIES. The Fixed Income Funds may invest in municipal securities (including taxable municipal securities), the interest payments of which are subject to U.S. federal income tax. Such investments may include securities issued in the U.S. market by U.S. states and territories, municipalities and other political subdivisions, agencies, authorities and instrumentalities of states and multi-state agencies or authorities. The municipal securities which the Fund may purchase also include general obligation bonds and limited obligation bonds (or revenue bonds), including industrial development bonds issued pursuant to former U.S. federal tax law. General obligation bonds are obligations involving the credit of an issuer possessing taxing power and are payable from such issuer's general revenues and not from any particular source. Limited obligation bonds are payable only from the revenues derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source. Industrial development bonds generally are also revenue bonds and thus are not payable from the issuer's general revenues. The credit and quality of industrial development bonds are usually related to the credit of the corporate user of the facilities. Payment of interest on and repayment of principal of such bonds is the responsibility of the corporate user (and/or any guarantor). The Fund may invest in private activity bonds, which are bonds issued by or on behalf of public authorities to obtain funds to provide privately operated housing facilities, airport, mass transit or port facilities, sewage disposal, solid waste disposal or hazardous waste treatment or disposal facilities and certain local facilities for water supply, gas or electricity. Other types of private activity bonds, the proceeds of which are used for the construction, equipment, repair or improvement of privately operated industrial or commercial facilities, may constitute municipal securities, although the current U.S. federal tax laws place substantial limitations on the size of such issues.

NON-U.S. SECURITIES. The International Equity ETFs invest in non-U.S. equity securities. Investments in non-U.S. equity securities involve certain risks that may not be present in investments in U.S. securities. For example, non-U.S. securities may be subject to currency risks or to foreign government taxes. There may be less information publicly available about a non-U.S. issuer than about a U.S. issuer, and a foreign issuer may or may not be subject to uniform accounting, auditing and financial reporting standards and practices comparable to those in the U.S. Other risks of investing in such securities include political or economic instability in the country involved, the difficulty of predicting international trade patterns and the possibility of imposition of exchange controls. The prices of such securities may be more volatile than those of domestic securities. With respect to certain foreign countries, there is a possibility of expropriation of assets or nationalization, imposition of withholding taxes on dividend or interest payments, difficulty in obtaining and enforcing judgments against foreign entities or diplomatic developments which could affect investment in these countries. Losses and other expenses may be incurred in converting between various currencies in connection with purchases and sales of foreign securities.

Non-U.S. stock markets may not be as developed or efficient as, and may be more volatile than, those in the U.S. While the volume of shares traded on non-U.S. stock markets generally has been growing, such markets usually have substantially less volume than U.S. markets. Therefore, a Fund's investment in non-U.S. equity securities may be less liquid and subject to more rapid and erratic price movements than comparable securities listed for trading on U.S. exchanges. Non-U.S. equity securities may trade at price/earnings multiples higher than comparable U.S. securities and such levels may not be sustainable. There may be less government supervision and regulation of foreign stock exchanges, brokers,

banks and listed companies abroad than in the U.S. Moreover, settlement practices

Table of Contents

for transactions in foreign markets may differ from those in U.S. markets. Such differences may include delays beyond periods customary in the U.S. and practices, such as delivery of securities prior to receipt of payment, that increase the likelihood of a failed settlement, which can result in losses to a Fund. The value of non-U.S. investments and the investment income derived from them may also be affected unfavorably by changes in currency exchange control regulations. Foreign brokerage commissions, custodial expenses and other fees are also generally higher than for securities traded in the U.S. This may cause the International Equity ETFs to incur higher portfolio transaction costs than domestic equity funds. Fluctuations in exchange rates may also affect the earning power and asset value of the foreign entity issuing a security, even one denominated in U.S. dollars. Dividend and interest payments may be repatriated based on the exchange rate at the time of disbursement, and restrictions on capital flows may be imposed.

Set forth below for certain markets in which the International Equity ETFs may invest, consistent with their principal investment strategies, are brief descriptions of some of the conditions and risks in each such market.

Investments in Emerging Markets Securities. Investments in securities listed and traded in emerging markets are subject to additional risks that may not be present for U.S. investments or investments in more developed non-U.S. markets. Such risks may include: (i) greater market volatility; (ii) lower trading volume; (iii) greater social, political and economic uncertainty; (iv) governmental controls on foreign investments and limitations on repatriation of invested capital; (v) the risk that companies may be held to lower disclosure, corporate governance, auditing and financial reporting standards than companies in more developed markets; and (vi) the risk that there may be less protection of property rights than in other countries. Emerging markets are generally less liquid and less efficient than developed securities markets.

Investments in China and Hong Kong. In addition to the aforementioned risks of investing in non-U.S. securities, investing in securities listed and traded in Hong Kong involves special considerations not typically associated with investing in countries with more democratic governments or more established economies or securities markets. Such risks may include: (i) the risk of nationalization or expropriation of assets or confiscatory taxation; (ii) greater social, economic and political uncertainty (including the risk of war); (iii) dependency on exports and the corresponding importance of international trade; (iv) increasing competition from Asia's other low-cost emerging economies; (v) currency exchange rate fluctuations and the lack of available currency hedging instruments; (vi) higher rates of inflation; (vii) controls on foreign investment and limitations on repatriation of invested capital and on the Fund's ability to exchange local currencies for U.S. dollars; (viii) greater governmental involvement in and control over the economy; (ix) the risk that the Chinese government may decide not to continue to support the economic reform programs implemented since 1978 and could return to the prior, completely centrally planned, economy; (x) the fact that Chinese companies, particularly those located in China, may be smaller, less seasoned and newly organized; (xi) the differences in, or lack of, auditing and financial reporting standards which may result in unavailability of material information about issuers, particularly in China; (xii) the fact that statistical information regarding the economy of China may be inaccurate or not comparable to statistical information regarding the U.S. or other economies; (xiii) the less extensive, and still developing, regulation of the securities markets, business entities and commercial transactions; (xiv) the fact that the settlement period of securities transactions in foreign markets may be longer; (xv) the fact that the willingness and ability of the Chinese government to support the Chinese and Hong Kong economies and markets is uncertain; (xvi) the risk that it may be more difficult, or impossible, to obtain and/or enforce a judgment than in other countries; (xvii) the rapid and erratic nature of growth, particularly in China, resulting in inefficiencies and dislocations; (xviii) the risk that, because of the degree of interconnectivity between the economies and financial markets of China and Hong Kong, any sizable reduction in the demand for goods from China, or an economic downturn in China, could negatively affect the economy and financial market of Hong Kong as well; and (xix) the risk that certain companies in a Fund's Index may have dealings with countries subject to sanctions or embargoes imposed by the U.S. Government or identified as state sponsors of terrorism.

After many years of steady growth, the growth rate of China's economy has recently slowed. Although this slowdown was to some degree intentional, the slowdown has also slowed the once rapidly growing Chinese real estate market and left local governments with high debts with few viable means to raise revenue, especially with the fall in demand for housing. Despite its attempts to restructure its economy towards consumption, China remains heavily dependent on exports. Accordingly, China is susceptible to economic downturns abroad, including any weakness in demand from its major trading partners, including the United States, Japan, and Europe. In addition, China's aging infrastructure, worsening environmental conditions, rapid and inequitable urbanization, quickly widening urban and rural income gap, domestic unrest and provincial separatism all present major challenges to the country. Further, China's territorial claims, including its land reclamation projects and the establishment of an Air Defense Identification Zone over islands claimed and occupied by Japan, are another source of tension and present risks to diplomatic and trade relations with certain of China's regional trade partners.

Investments in Hong Kong are also subject to certain political risks not associated with other investments. Following the establishment of the People's Republic of China by the Communist Party in 1949, the Chinese government renounced various debt obligations incurred by China's predecessor governments, which obligations remain in default, and expropriated assets without compensation. There can be no assurance that the Chinese government will not take similar action in the future. Investments in China and Hong Kong involve risk of a total loss due to government action or inaction. China has committed by treaty to preserve Hong Kong's autonomy and its economic, political and social freedoms for 50 years from the July 1, 1997 transfer of sovereignty from the United Kingdom to China. However, if China would exert its authority so as

to alter the

Table of Contents

economic, political or legal structures or the existing social policy of Hong Kong, investor and business confidence in Hong Kong could be negatively affected, which in turn could negatively affect markets and business performance. In addition, the Hong Kong dollar trades at a fixed exchange rate in relation to (or, is pegged to) the U.S. dollar, which has contributed to the growth and stability of the Hong Kong economy. However, it is uncertain how long the currency peg will continue or what effect the establishment of an alternative exchange rate system would have on the Hong Kong economy. Because each Fund's NAV is denominated in U.S. dollars, the establishment of an alternative exchange rate system could result in a decline in a Fund's NAV. These and other factors could have a negative impact on a Fund's performance.

Investments in Europe. Most developed countries in Western Europe are members of the European Union (EU), and many are also members of the European Economic and Monetary Union (EMU), which requires compliance with restrictions on inflation rates, deficits, and debt levels. Unemployment in certain European nations is historically high and several countries face significant debt problems. These conditions can significantly affect every country in Europe. The euro is the official currency of the EU. Funds that invest in Europe may have significant exposure to the euro and events affecting the euro. Recent market events affecting several of the EU member countries have adversely affected the sovereign debt issued by those countries, and ultimately may lead to a decline in the value of the euro. A significant decline in the value of the euro may produce unpredictable effects on trade and commerce generally and could lead to increased volatility in financial markets worldwide. In particular, due to recent political and economic events in Greece, a member of the EMU, it is possible that Greece may be unable to repay its sovereign debt, forcing Greece into default. Greece may also exit the EMU as a result of these events. A default or exit from the EMU by Greece, or any other EMU member, may adversely affect the value of the euro as well as the performance of other European economies and issuers.

In June 2016, the United Kingdom voted in a referendum to leave the EU. As a result of the referendum, S&P downgraded the United Kingdom's credit rating from AAA to AA and the EU's credit rating from AA+ to AA in the days that followed the vote. Other credit ratings agencies have taken similar actions. Although the precise timeframe for Brexit is uncertain, it is currently expected that the United Kingdom will invoke article 50 of the Lisbon Treaty to withdraw from the EU by the end of March 2019, two years after the United Kingdom notified the European Council of the United Kingdom's intention to withdraw. It is unclear how withdrawal negotiations will be conducted and what the potential consequences may be. In addition, it is possible that measures could be taken to revote on the issue of Brexit, or that portions of the United Kingdom could seek to separate and remain a part of the EU. As a result of the political divisions within the United Kingdom and between the United Kingdom and the EU that the referendum vote has highlighted and the uncertain consequences of a Brexit, the economies of the United Kingdom and Europe as well as the broader global economy could be significantly impacted, which may result in increased volatility and illiquidity, and potentially lower economic growth on markets in the United Kingdom, Europe and globally that could potentially have an adverse effect on the value of a Fund's investments.

Investments in France. France is a member of the EMU. Members of the EMU must comply with restrictions on inflation rates, deficits, debt levels, and fiscal and monetary controls. The implementation of any such restrictions or controls, the default of an EU member country on its sovereign debt, significant fluctuations in the euro's exchange rate, or a change in EU or governmental trade regulations could each have a significant impact on the French economy as well as the economies of some or all European countries. These and other factors, including the potential consequences of the withdrawal of the United Kingdom from the EU as described above, could have a negative impact on a Fund's performance.

Investments in Germany. Germany is a member of the EMU. EMU member countries share coordinated economic policies and a common currency. Members of the EMU must comply with restrictions on inflation rates, deficits, debt levels, and fiscal and monetary controls. The implementation of any such restrictions or controls, the default of an EU member country on its sovereign debt, significant fluctuations in the euro's exchange rate, or a change in EU or governmental trade regulations could each have a significant impact on the German economy as well as the economies of some or all European countries. In addition, challenges related to the rebuilding of infrastructure and unemployment in the former area of East Germany may also impact the economy of Germany. These and other factors, including the potential consequences of the withdrawal of the United Kingdom from the EU as described above, could have a negative impact on a Fund's performance.

Investments in Italy. Italy is a member of the EMU. Members of the EMU must comply with restrictions on inflation rates, deficits, debt levels, and fiscal and monetary controls. The implementation of any such restrictions or controls, the default of an EU member country on its sovereign debt, significant fluctuations in the euro's exchange rate, or a change in EU or governmental trade regulations could each have a significant impact on the Italian economy as well as the economies of some or all European countries. Recently, the Italian economy has experienced volatility due to concerns about economic downturn and rising government debt levels. These and other factors, including the potential consequences of the withdrawal of the United Kingdom from the EU as described above, could have a negative impact on a Fund's performance.

Investments in Japan. Although Japan continues to recover from a prolonged economic downturn dating back to 2000, Japan's economic growth rate has remained relatively low and it may remain low in the future and/or continue to lag the growth rates of other developed nations and its Asian neighbors. Economic growth in Japan is heavily dependent on international trade, government support of the financial services sector and other troubled sectors, and consistent government policy supporting its export market. In the past, Japanese exports have been

adversely affected by trade tariffs and other protectionist measures as

Table of Contents

well as increased competition from developing nations. Japan has few natural resources and is heavily dependent on oil imports. Higher commodity prices could therefore have a negative impact on the Japanese economy. Slowdowns in the economies of key trading partners such as the United States, China and/or countries in Southeast Asia, including economic, political or social instability in such countries, could also have a negative impact on the Japanese economy as a whole. Despite the emergence of China as an important trading partner of Japan, strained relationships between Japan and its neighboring countries, including China, Russia, South Korea and North Korea, based on historical grievances, territorial disputes, and defense concerns, may also inject uncertainty into Japanese markets. Increased political tension between countries in the region could adversely affect the Japanese economy and, in the event of a crisis, destabilize the region. The Japanese economy is also vulnerable to concerns of economic slowdown from within the Japanese financial system, including high levels of nonperforming loans, over-leveraged corporate balance sheets, extensive cross-ownership by major corporations, a changing corporate governance structure, and large government deficits. Japanese currency fluctuations may also adversely impact the Japanese economy and its export market. In the past, the Japanese government has intervened in its currency market to maintain or reduce the value of the yen. Any such intervention in the currency markets could cause the value of the yen to fluctuate sharply and unpredictably and could cause losses to investors. In addition, Japan's labor market is adapting to an aging workforce, declining population, and demand for increased labor mobility. These demographic shifts and fundamental structural changes to the labor market may negatively impact Japan's economic competitiveness.

In March 2011, a massive earthquake and tsunami struck northeastern Japan causing major damage to the country's domestic energy supply, including damage to nuclear power plants. In the wake of this natural disaster, Japan's financial markets fluctuated dramatically and the resulting economic distress affected Japan's recovery from its recession. The government injected capital into the economy and proposed plans for massive spending on reconstruction efforts in disaster-affected areas in order to stimulate economic growth. The full extent of the disaster's impact on Japan's economy and foreign investment in Japan is difficult to estimate. The risks of natural disasters of varying degrees, such as earthquakes and tsunamis, and the resulting damage, continue to exist. These and other factors could have a negative impact on a Fund's performance.

Investments in Korea. The economy of Korea is heavily dependent on exports and the demand for certain finished goods. Korea's main industries include electronics, automobile production, chemicals, shipbuilding, steel, textiles, clothing, footwear, and food processing. Conditions that weaken demand for such products worldwide or in other Asian countries could have a negative impact on the Korean economy as a whole. The Korean economy's reliance on international trade makes it highly sensitive to fluctuations in international commodity prices, currency exchange rates and government regulation, and vulnerable to downturns of the world economy, particularly with respect to its four largest export markets (the EU, Japan, United States, and China). Korea has experienced modest economic growth in recent years, but such continued growth may slow due, in part, to the economic slowdown in China and the increased competitive advantage of Japanese exports with the weakened yen. Relations with North Korea could also have a significant impact on the economy of Korea. Relations between South Korea and North Korea remain tense, as exemplified in periodic acts of hostility, and the possibility of serious military engagement still exists. These and other factors could have a negative impact on a Fund's performance.

Investments in Taiwan. The economy of Taiwan is heavily dependent on exports. Currency fluctuations, increasing competition from Asia's other emerge economies, and conditions that weaken demand for Taiwan's export products worldwide could have a negative impact on the Taiwanese economy as a whole. Concerns over Taiwan's history of political contention and its current relationship with China may also have a significant impact on the economy of Taiwan. These and other factors could have a negative impact on a Fund's performance.

Investments in the United Kingdom. The United Kingdom has one of the largest economies in Europe and trades heavily with other European countries and the United States. The economy of the United Kingdom may be impacted by changes to the economic health of other European countries and the United States. The United Kingdom also relies heavily on the export of financial services. Accordingly, a slowdown in the financial services sector may have an adverse impact on the United Kingdom's economy. In June 2016, the United Kingdom voted in a referendum to leave the EU. For more information about Brexit and the associated risks, see the above description of Investments in Europe. These and other factors could have a negative impact on a Fund's performance.

REAL ESTATE INVESTMENT TRUSTS. Each Fund may invest in the securities of real estate investment trusts (REITs) to the extent allowed by law. Risks associated with investments in securities of REITs include decline in the value of real estate, risks related to general and local economic conditions, overbuilding and increased competition, increases in property taxes and operating expenses, changes in zoning laws, casualty or condemnation losses, variations in rental income, changes in neighborhood values, the appeal of properties to tenants, and increases in interest rates. In addition, equity REITs may be affected by changes in the values of the underlying property owned by the trusts, while mortgage REITs may be affected by the quality of credit extended. REITs are dependent upon management skills, may not be diversified and are subject to the risks of financing projects. REITs are also subject to heavy cash-flow dependency, defaults by borrowers, self-liquidation and the possibility of failing to maintain exemption from the 1940 Act, and, for U.S. REITs, the possibility of failing to qualify for the favorable U.S. federal income tax treatment available to U.S. REITs under the Code. If an issuer of debt securities collateralized by real estate defaults, it is conceivable that the REITs could end up holding the underlying real estate.

Table of Contents

REPURCHASE AGREEMENTS. Each Fund may enter into repurchase agreements with counterparties that are deemed to present acceptable credit risks. A repurchase agreement is a transaction in which a Fund purchases securities or other obligations from a bank or securities dealer (or its affiliate) and simultaneously commits to resell them to a counterparty at an agreed-upon date or upon demand and at a price reflecting a market rate of interest unrelated to the coupon rate or maturity of the purchased obligations. A Fund maintains custody of the underlying obligations prior to their repurchase, either through its regular custodian or through a special tri-party custodian or sub-custodian that maintains separate accounts for both the Fund and its counterparty. Thus, the obligation of the counterparty to pay the repurchase price on the date agreed to or upon demand is, in effect, secured by such obligations.

Repurchase agreements carry certain risks not associated with direct investments in securities, including a possible decline in the market value of the underlying obligations. If their value becomes less than the repurchase price, plus any agreed-upon additional amount, the counterparty must provide additional collateral so that at all times the collateral is at least equal to the repurchase price plus any agreed-upon additional amount. The difference between the total amount to be received upon repurchase of the obligations and the price that was paid by a Fund upon acquisition is accrued as interest and included in its net investment income. Repurchase agreements involving obligations other than U.S. government securities (such as commercial paper and corporate bonds) may be subject to special risks and may not have the benefit of certain protections in the event of the counterparty's insolvency. If the seller or guarantor becomes insolvent, the Fund may suffer delays, costs and possible losses in connection with the disposition of collateral.

REVERSE REPURCHASE AGREEMENTS. Each Fund may enter into reverse repurchase agreements, which involve the sale of securities held by a Fund subject to its agreement to repurchase the securities at an agreed-upon date or upon demand and at a price reflecting a market rate of interest. Reverse repurchase agreements are subject to each Fund's limitation on borrowings and may be entered into only with banks or securities dealers or their affiliates. While a reverse repurchase agreement is outstanding, a Fund will maintain the segregation, either on its records or with the Trust's custodian, of cash or other liquid securities, marked-to-market daily, in an amount at least equal to its obligations under the reverse repurchase agreement.

Reverse repurchase agreements involve the risk that the buyer of the securities sold by a Fund might be unable to deliver them when that Fund seeks to repurchase. If the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the buyer or trustee or receiver may receive an extension of time to determine whether to enforce a Fund's obligation to repurchase the securities, and the Fund's use of the proceeds of the reverse repurchase agreement may effectively be restricted pending such decision.

SECURITIES LENDING. Each Fund may lend portfolio securities to certain creditworthy borrowers, including the Fund's securities lending agent. Loans of portfolio securities provide the Funds with the opportunity to earn additional income on the Fund's portfolio securities. All securities loans will be made pursuant to agreements requiring the loans to be continuously secured by collateral in cash, or money market instruments, money market funds or U.S. government securities at least equal at all times to the market value of the loaned securities. The borrower pays to the Funds an amount equal to any dividends or interest received on loaned securities. The Funds retain all or a portion of the interest received on investment of cash collateral or receive a fee from the borrower. Lending portfolio securities involves risks of delay in recovery of the loaned securities or in some cases loss of rights in the collateral should the borrower fail financially. Furthermore, because of the risks of delay in recovery, the Fund may lose the opportunity to sell the securities at a desirable price. A Fund will generally not have the right to vote securities while they are being loaned.

SHORT SALE TRANSACTIONS. The Alternative ETFs will engage in short sale transactions. A short sale involves the sale by a Fund of a listed futures contract, security or commodity that it does not own at a specified price on a future date. Entering into a short sale transaction, the Fund would generally expect the trading price of the subject listed futures contract, security or commodity to be lower on the specified future date than the price at which it agreed to sell the security or commodity. The Fund would hope to acquire the listed futures contract, security or commodity at a lower price on such date, thereby realizing a gain equal to the difference in the acquisition price and the sale price (less any costs). The Fund may also enter into a short derivative position through a futures contract or swap agreement. If the price of the listed futures contract, security, commodity or derivative subject to a short sale transaction increases during the period covered by the contract, then the Fund will incur a loss equal to the increase in price from the time that the short sale was entered (plus any costs). Because it requires little or no money to enter into a short sale transaction, a Fund could potentially lose more money than the actual cost of entering into the transaction.

Also, there is the risk that the third party to the short sale may fail to honor its contract terms, causing a loss to a Fund. A Fund engaging in short sale transactions may be subject to expenses related to short sales that are not typically associated with investing in securities directly, such as costs of borrowing and margin account maintenance costs associated with the Fund's open short positions. These expenses negatively impact the performance of the Fund. A Fund's investment performance may also suffer if the Fund is required to close out a short position earlier than it had intended. The Fund is required to segregate cash and other assets on its books to cover its short sale obligations. This means that such cash and other assets may not be available to meet the Fund's needs for immediate cash or other liquidity.

Edgar Filing: WisdomTree Trust - Form 497

TRACKING STOCKS. Each Fund may invest in tracking stocks. A tracking stock is a separate class of common stock whose value is linked to a specific business unit or operating division within a larger company and which is designed to track the performance of such business unit or division. The tracking stock may pay dividends to shareholders independent of the parent company. The parent company, rather than the business unit or division, generally is the issuer of tracking stock. However, holders of the tracking stock may not have the same rights as holders of the company's common stock.

Table of Contents

U.S. GOVERNMENT SECURITIES. Each Fund may invest in obligations issued or guaranteed by the U.S. Treasury or the agencies or instrumentalities of the U.S. government. Such obligations may be short-, intermediate- or long-term. U.S. government securities are obligations of, or guaranteed by, the U.S. government, its agencies or government-sponsored enterprises. U.S. government securities are subject to market and interest rate risk, and may be subject to varying degrees of credit risk. U.S. government securities include inflation-indexed fixed income securities, such as U.S. Treasury Inflation Protected Securities (TIPS). U.S. government securities include zero coupon securities, which tend to be subject to greater market risk than interest-paying securities of similar maturities.

PROXY VOTING POLICY

The Trust has adopted as its proxy voting policies for each Fund the proxy voting guidelines of each Fund's applicable Sub-Adviser. The Trust has delegated to the Sub-Advisers the authority and responsibility for voting proxies on the portfolio securities held by each Fund. The remainder of this section discusses each Fund's proxy voting guidelines and each Sub-Adviser's role in implementing such guidelines.

All Mellon Capital Managed Funds. The Trust has adopted as its proxy voting policies for each Mellon Capital Managed Fund the proxy voting guidelines of Mellon Capital. Mellon Capital has adopted the proxy voting policy and voting guidelines of The Bank of New York Mellon Corporation's Proxy Voting and Governance Committee (the PVGC) which are applied to those client accounts over which it has been delegated the authority to vote proxies. Under this policy, the PVGC permits member firms (such as Mellon Capital) to consider specific interests and issues and cast votes differently from the collective vote of the PVGC where Mellon Capital determines that a different vote is in the best interests of the affected account(s). In voting proxies, Mellon Capital takes into account long-term economic value in evaluating issues relating to corporate governance, including structures and practices, the nature of long-term business plans, including sustainability policies and practices to address environmental and social factors that are likely to have an impact on shareholder value, and other financial and non-financial measures of corporate performance. Mellon Capital will carefully review proposals that would limit shareholder control or could affect the value of a client's investment. It will generally oppose proposals designed to insulate an issuer's management unnecessarily from the wishes of a majority of shareholders. It will generally support proposals designed to provide management with short-term insulation from outside influences so as to enable management to negotiate effectively and otherwise achieve long-term goals. On questions of social responsibility where economic performance does not appear to be an issue, Mellon Capital will attempt to ensure that management reasonably responds to the social issues. Responsiveness will be measured by management's efforts to address the proposal including, where appropriate, assessment of the implications of the proposal to the ongoing operations of the company. Mellon Capital will pay particular attention to repeat issues where management has failed in its commitment in the intervening period to take action on issues. Mellon Capital recognizes its duty to vote proxies in the best interests of its clients. Mellon Capital seeks to avoid material conflicts of interest through its participation in the PVGC, which applies detailed, predetermined proxy voting guidelines in an objective and consistent manner across client accounts, based on internal and external research and recommendations provided by a third-party vendor, and without consideration of any client relationship factors. Further, Mellon Capital and its affiliates engage a third party as an independent fiduciary to vote all proxies for BNY Mellon securities and affiliated mutual fund securities.

Proxy voting proposals are reviewed, categorized, analyzed and voted in accordance with Mellon Capital's voting guidelines. These guidelines are reviewed periodically and updated as necessary to reflect new issues and any changes in policies on specific issues. Items that can be categorized under these voting guidelines will be voted in accordance with any applicable guidelines or referred to the PVGC, if the applicable guidelines so require. Proposals that cannot be categorized under these voting guidelines will be referred to the PVGC for discussion and vote. Additionally, the PVGC may review any proposal where it has identified a particular company, industry or issue for special scrutiny. With regard to voting proxies of foreign companies, Mellon Capital may weigh the cost of voting, and potential inability to sell the securities (which may occur during the voting process), against the benefit of voting the proxies to determine whether or not to vote.

In evaluating proposals regarding incentive plans and restricted stock plans, the PVGC typically employs a shareholder value transfer model. This model seeks to assess the amount of shareholder equity flowing out of the company to executives as options are exercised. After determining the cost of the plan, the PVGC evaluates whether the cost is reasonable based on a number of factors, including industry classification and historical performance information. The PVGC generally votes against proposals that permit the repricing or replacement of stock options without shareholder approval.

All Voya IM Managed Funds. The Trust has adopted as its proxy voting policies for each Voya IM Managed Fund the proxy voting guidelines of Voya IM. Voya IM has adopted a Proxy Voting Policy, related procedures, and voting guidelines which are applied to those client accounts over which it has been delegated the authority to vote proxies. In voting proxies, Voya IM seeks to act in the best interest of its clients and in accordance with its fiduciary duties. Specific votes depend on the particular facts and circumstances of each proxy vote. Voya IM generally votes in support of decisions reached by independent boards of directors. The policy establishes additional guidance to promote independence, alignment of compensation with long-term performance, and prudent fiscal management with respect to votes on specific matters, such as individual board elections, executive compensation, and capitalization. Voya IM seeks to avoid material conflicts of interest through the application of detailed predetermined proxy voting guidelines in an objective and consistent manner across client accounts, based on internal and

Edgar Filing: WisdomTree Trust - Form 497

external research and recommendations provided by a third-party vendor, and without consideration of any client relationship factors.

Table of Contents

A complete copy of the Sub-Adviser's proxy voting policy may be obtained by calling 1-866-909-9473 or by writing to: WisdomTree Trust, c/o Foreside Fund Services, LLC, Three Canal Plaza, Suite 100, Portland, Maine 04101.

The Trust is required to disclose annually the Funds' complete proxy voting record on Form N-PX covering the period from July 1 of one year through June 30 of the next year and to file Form N-PX with the SEC no later than August 31 of each year. The current Form N-PX for the Funds may be obtained at no charge upon request by calling 1-866-909-9473 or by visiting the SEC's website at www.sec.gov.

PORTFOLIO HOLDINGS DISCLOSURE POLICIES AND PROCEDURES

The Trust has adopted a Portfolio Holdings Policy (the Policy) designed to govern the disclosure of Fund portfolio holdings and the use of material non-public information about Fund holdings. The Policy applies to all officers, employees, and agents of the Funds, including the Advisers. The Policy is designed to ensure that the disclosure of information about each Fund's portfolio holdings is consistent with applicable legal requirements and otherwise in the best interest of each Fund.

As ETFs, information about each Fund's portfolio holdings is made available on a daily basis in accordance with the provisions of any Order of the SEC applicable to the Funds, regulations of a Fund's Listing Exchange and other applicable SEC regulations, orders and no-action relief. Such information typically reflects all or a portion of a Fund's anticipated portfolio holdings as of the next Business Day. A Business Day with respect to each Fund is any day on which its respective Listing Exchange is open for business. As of the date of this SAI, each Listing Exchange observes the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day. This information is used in connection with the creation and redemption process and is disseminated on a daily basis through the facilities of the Listing Exchange, the National Securities Clearing Corporation (NSCC) and/or third-party service providers.

Daily access to each Fund's portfolio holdings with no lag time is permitted to personnel of the Advisers, the Distributor and the Fund's administrator (the Administrator), custodian and accountant and other agents or service providers of the Trust who have need of such information in connection with the ordinary course of their respective duties to the Fund. The Funds' Chief Compliance Officer (CCO) may authorize disclosure of portfolio holdings.

Each Fund may disclose its complete portfolio holdings or a portion of its portfolio holdings online at www.wisdomtree.com. Online disclosure of such holdings is publicly available at no charge.

Each Fund will disclose its complete portfolio holdings schedule in public filings with the SEC on a quarterly basis, based on the Fund's fiscal year, within sixty (60) days of the end of the quarter, and will provide that information to shareholders, as required by federal securities laws and regulations thereunder.

No person is authorized to disclose a Fund's portfolio holdings or other investment positions except in accordance with the Policy. The Board reviews the implementation of the Policy on a periodic basis.

WISDOMTREE INDEX DESCRIPTION

A description of each WisdomTree Index on which a Fund's investment strategy is based is provided in the relevant Fund's Prospectus under Principal Investment Strategies of the Fund with certain additional details provided below. Additional information about each Index, including the components and weightings of the Indexes, as well as the Index methodology, which contains the rules that govern inclusion and weighting in each of the Indexes, is available at www.wisdomtree.com under WisdomTree Resources in the Resource Library.

Dynamic Currency Hedging Quantitative Signals. WisdomTree Investments has entered into a licensing agreement with Record Currency Management Limited (Record) to provide rules-based signals used to determine the Index's dynamic currency hedge ratio on a monthly basis. The Dynamic Hedged Equity Funds are not sponsored, endorsed, sold or promoted by Record. Record has licensed certain rights to WisdomTree Investments, as the index provider to the Dynamic Hedged Equity Funds, and Record is providing no investment advice to the Funds or their Advisers. Record makes no representation or warranty, expressed or implied, to the owners of a Fund regarding any associated risks or the advisability of investing in the Fund.

Annual Index Screening/Rebalance Dates.

Edgar Filing: WisdomTree Trust - Form 497

All Equity Funds, except Alternative ETFs. Each Index is rebalanced or reconstituted on an annual basis. New securities are added to the Index only on the annual screening date. The annual screening date of the Dynamic Currency Hedged Equity Indexes takes place after the close of trading on the last trading day in June of each year. The annual screening date of the Emerging Markets Dividend Index, Global ex-Mexico Equity Index, Global SmallCap Dividend Index and the Global Hedged SmallCap Dividend Index takes place after the close of trading on the last trading day in September of each year. The annual screening date of the U.S. Equity Indexes and the Strong Dollar Emerging Markets Equity Index takes place after the close of trading on the last trading day in February of each year. The annual screening date of the Europe Domestic Economy Index takes place after the close of trading on the last trading day in May of each year.

Table of Contents

Alternative ETFs. The stocks within each Index's Long Equity Basket are reconstituted and rebalanced on a quarterly basis. The quarterly screening date of each Index takes place in March, June, September and December of each year. The amount of exposure to each Index's Short Equity Basket is reset on a monthly basis; however, the stocks within the Index's Short Equity Basket are reconstituted and rebalanced annually.

Fixed Income Funds. The Fundamental U.S. High Yield Corporate Bond Index and the Fundamental U.S. Short-Term High Yield Corporate Bond Index are rebalanced or reconstituted on a semi-annual basis on the last business days of May and November. New securities are added to the Index only during the semi-annual rebalance. The Fundamental U.S. Corporate Bond Index and the Fundamental U.S. Short-Term Corporate Bond Index are rebalanced on a quarterly basis on the last business days of February, May, August and November. New securities are added to the Index only during the quarterly rebalance.

All Funds. During the rebalance on the annual, semi-annual, or quarterly screening date, as applicable, securities are screened to determine whether they comply with WisdomTree's proprietary Index methodology and are eligible to be included in the Index. This date is sometimes referred to as the Index measurement date or the Screening Point. Based on this screening, securities that meet Index requirements are added to the Index, and securities that do not meet such requirements are dropped from the Index. In response to market conditions, security, country and sector weights may fluctuate above or below a specified cap between Index screening dates.

The approximate number of components of each Index is disclosed herein as of September 30, 2017.

Name of WisdomTree Index*	Approximate Number of Components
WisdomTree Dynamic Currency Hedged Europe Equity Index	437
WisdomTree Dynamic Currency Hedged International Equity Index	2,679
WisdomTree Dynamic Currency Hedged International Quality Dividend Growth Index	299
WisdomTree Dynamic Currency Hedged International SmallCap Equity Index	1,594
WisdomTree Dynamic Currency Hedged Japan Equity Index	1,141
WisdomTree Emerging Markets Dividend Index	1,317
WisdomTree Europe Domestic Economy Index	258
WisdomTree Global ex-Mexico Equity Index	1,982
WisdomTree Global Hedged SmallCap Dividend Index	962
WisdomTree Global SmallCap Dividend Index	962
WisdomTree Fundamental U.S. Corporate Bond Index	3,060
WisdomTree Fundamental U.S. High Yield Corporate Bond Index	392
WisdomTree Fundamental U.S. Short-term Corporate Bond Index	1,148
WisdomTree Fundamental U.S. Short-term High Yield Corporate Bond Index	170
WisdomTree Dynamic Bearish U.S. Equity Index	2
WisdomTree Dynamic Long/Short U.S. Equity Index	2

* Funds not listed in the table above had not commenced operations as of the date of this SAI.

International Equity ETFs Applying the Calculated Volume Factor Adjustment. After applying the initial Index eligibility criteria screens and weighting scheme, each Index component's calculated volume factor is determined for each International Equity Index. The calculated volume factor is the security's average daily dollar trading volume for the three months preceding the Index screening date divided by the security's weight in the Index. If a component security's calculated volume factor is:

- (i) at least \$400 million, the security is included in the Index and its weight in the Index is not reduced.
- (ii) less than \$200 million and the security was not in the Index immediately prior to the Index screening date, the security is deleted from the Index and its weight is allocated pro rata among the remaining component securities. For example, if a security's weight in the Index is 2%, but its calculated volume factor is only \$100 million, the security is deleted from the Index. Accordingly, 2% of the Index's weight would be reallocated among the other Index components on a pro rata basis.

Edgar Filing: WisdomTree Trust - Form 497

- (iii) less than \$200 million and the security was in the Index immediately prior to the Index screening date, the security's weight in the Index will be reduced in the manner described in (iv) below.

- (iv) \$200 million or more, but less than \$400 million, the security's weight in the Index will be reduced. The component security's reduced weight is calculated by *dividing* its calculated volume factor *by* \$400 million and *multiplying* this fraction by the company's weight. For example, if a security's weight in the Index is 2%, but its calculated volume factor is only \$300 million, the security's weight in the Index is reduced to 1.5% (*i.e.*, the outcome of *dividing* \$300 million *by* \$400 million and *multiplying by* 2%). The reduction in weight is reallocated pro rata among the other component securities in the Index. Accordingly, 0.5% of the Index's weight would be reallocated among the other Index components on a pro rata basis.

Table of Contents

In response to market conditions and volume factor adjustments, security, country, and sector weights may fluctuate above or below a specified cap between annual Index screening dates.

Index Maintenance. Index maintenance occurs throughout the year and includes monitoring and implementing the adjustments for company additions and deletions, stock splits, stock dividends, spin-offs, corporate restructurings and other corporate actions. Corporate actions are generally implemented after the close of trading on the day prior to the ex-date of such corporate actions. To the extent reasonably practicable, such changes will be announced at least two days prior to their implementation.

For each Index, should any company achieve a weighting equal to or greater than 24% of the Index, its weighting will be reduced at the close of the current calendar quarter, and other components in the Index will be rebalanced. Moreover, for each Index, should the collective weight of Index component securities whose individual current weights equal or exceed 5% of an Index, when added together, exceed 50% of such Index, the weightings in those component securities will be reduced so that their collective weight equals 40% of the Index as of the close of the current calendar quarter, and other components in the Index will be rebalanced.

Index Availability. Although U.S. and European WisdomTree Indexes are calculated and disseminated throughout each day the Listing Exchange is open for trading, all Global, International, Emerging Markets, and Asia Pacific Funds Indexes are calculated only on an end-of-day basis due to differences in time zone and the fact that these markets are not open during the Listing Exchanges market hours.

Changes to the Index Methodology. The WisdomTree Indexes are governed by published, rules-based methodologies. Changes to a methodology will be publicly disclosed at www.wisdomtree.com/etfs/index-notice.aspx prior to implementation. Sixty days notice will be given prior to the implementation of any such change.

Index Calculation Agent. In order to minimize any potential for conflicts caused by the fact that WisdomTree Investments and its affiliates act as Index provider and investment adviser to the Funds, WisdomTree Investments has retained an unaffiliated third party to calculate each Index (the Calculation Agent). The Calculation Agent, using the applicable rules-based methodology, will calculate and disseminate the Indexes on a daily basis. WisdomTree Investments will monitor the results produced by the Calculation Agent to help ensure that the Indexes are being calculated in accordance with the applicable rules-based methodology. In addition, WisdomTree Investments and WisdomTree Asset Management have established policies and procedures designed to prevent non-public information about pending changes to the Indexes from being used or disseminated in an improper manner. Furthermore, WisdomTree Investments and WisdomTree Asset Management have established policies and procedures designed to prevent improper use and dissemination of non-public information about the Funds portfolio strategies.

INVESTMENT LIMITATIONS

The following fundamental investment policies and limitations supplement those set forth in each Fund's Prospectus. Unless otherwise noted, whenever a fundamental investment policy or limitation states a maximum percentage of a Fund's assets that may be invested in any security or other asset, or sets forth a policy regarding quality standards, such standard or percentage limitation will be determined immediately after and as a result of the Fund's acquisition of such security or other asset. Accordingly, other than with respect to a Fund's limitations on borrowings, any subsequent change in values, net assets, or other circumstances will not be considered when determining whether the investment complies with a Fund's investment policies and limitations.

Each Fund's fundamental investment policies cannot be changed without the approval of the holders of a majority of that Fund's outstanding voting securities as defined under the 1940 Act. Each Fund, however, may change the non-fundamental investment policies described below, its investment objective, and its underlying Index without a shareholder vote provided that it obtains Board approval and notifies its shareholders with at least sixty (60) days prior written notice of any such change.

Fundamental Policies. The following investment policies and limitations are fundamental and may NOT be changed without shareholder approval.

Each Fund, as a fundamental investment policy, may not:

Senior Securities

Issue senior securities, except as permitted under the 1940 Act.

Borrowing

Edgar Filing: WisdomTree Trust - Form 497

Borrow money, except as permitted under the 1940 Act.

Underwriting

Act as an underwriter of another issuer's securities, except to the extent that each Fund may be considered an underwriter within the meaning of the Securities Act in the disposition of portfolio securities.

Concentration

Purchase the securities of any issuer (other than securities issued or guaranteed by the U.S. Government or any of its agencies or instrumentalities) if, as a result, more than 25% of the Fund's total assets would be invested in the securities of companies whose

Table of Contents

principal business activities are in the same industry, except that each Fund will invest more than 25% of its total assets in securities of the same industry to approximately the same extent that each Fund's underlying Index concentrates in the securities of a particular industry or group of industries.

Real Estate

Purchase or sell real estate unless acquired as a result of ownership of securities or other instruments (but this shall not prevent the Fund from investing in securities or other instruments backed by real estate, real estate investment trusts or securities of companies engaged in the real estate business).

Commodities

Purchase or sell physical commodities unless acquired as a result of ownership of securities or other instruments (but this shall not prevent each Fund from purchasing or selling options and futures contracts or from investing in securities or other instruments backed by physical commodities).

Loans

Lend any security or make any other loan except as permitted under the 1940 Act.

This means that no more than 33 1/3% of the Fund's total assets would be lent to other parties. This limitation does not apply to purchases of debt securities or to repurchase agreements, or to acquisitions of loans, loan participations or other forms of debt instruments, permissible under each Fund's investment policies.

Non-Fundamental Policies. The following investment policy is not fundamental and may be changed without shareholder approval. Prior to any change in the Fund's 80% policy, the Fund will provide shareholders with 60 days' notice.

Each applicable Fund has adopted a non-fundamental investment policy in accordance with Rule 35d-1 under the 1940 Act to invest, under normal circumstances, at least 80% of the value of its net assets, plus the amount of any borrowings for investment purposes, in the types of securities suggested by the Fund's name, including investments that are tied economically to the particular country or geographic region suggested by the Fund's name. If, subsequent to an investment, the 80% requirement is no longer met, such Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy.

CONTINUOUS OFFERING

The method by which Creation Unit Aggregations of shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Unit Aggregations of shares are issued and sold by the Funds on an ongoing basis, at any point a distribution, as such term is used in the Securities Act, may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Unit Aggregations after placing an order with the Distributor, breaks them down into constituent shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not underwriters but are effecting transactions in shares, whether or not participating in the distribution of shares, generally are required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. Firms that incur a prospectus delivery obligation with respect to shares of the Funds are reminded that, pursuant to Rule 153 under the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with the sale on the Listing Exchange is satisfied by the fact that the prospectus is available at the Listing Exchange upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

Edgar Filing: WisdomTree Trust - Form 497

WisdomTree Investments, the parent company of WisdomTree Asset Management (the Selling Shareholder), may purchase Creation Unit Aggregations through a broker-dealer to seed (in whole or in part) Funds as they are launched or thereafter, may purchase shares from broker-dealers or other investors that have previously provided seed for Funds when they were launched or otherwise in secondary market transactions, and because the Selling Shareholder may be deemed an affiliate of such Funds, the shares are being registered to permit the resale of these shares from time to time after purchase. The Fund will not receive any of the proceeds from the resale by the Selling Shareholders of these shares.

The Selling Shareholder intends to sell all or a portion of the shares owned by it and offered hereby from time to time directly or through one or more broker-dealers, and may also hedge such positions. The shares may be sold on any national securities exchange on which the shares may be listed or quoted at the time of sale, in the over-the-counter market or in transactions other than on these exchanges or systems at fixed prices, at prevailing market prices at the time of the sale, at varying prices determined at the time of

Table of Contents

sale, or at negotiated prices. These sales may be effected in transactions, which may involve crosses or block transactions. The Selling Shareholder may use any one or more of the following methods when selling shares:

ordinary brokerage transactions through brokers or dealers (who may act as agents or principals) or directly to one or more purchasers;

privately negotiated transactions;

through the writing or settlement of options or other hedging transactions, whether such options are listed on an options exchange or otherwise; and

any other method permitted pursuant to applicable law.

The Selling Shareholder may also loan or pledge shares to broker-dealers that in turn may sell such shares, to the extent permitted by applicable law. The Selling Shareholder may also enter into options or other transactions with broker-dealers or other financial institutions or the creation of one or more derivative securities which require the delivery to such broker-dealer or other financial institution of shares, which shares such broker-dealer or other financial institution may resell.

The Selling Shareholder and any broker-dealer or agents participating in the distribution of shares may be deemed to be underwriters within the meaning of Section 2(11) of the Securities Act in connection with such sales. In such event, any commissions paid to any such broker-dealer or agent and any profit on the resale of the shares purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act. The Selling Shareholder who may be deemed an underwriter within the meaning of Section 2(11) of the Securities Act will be subject to the applicable prospectus delivery requirements of the Securities Act.

The Selling Shareholder has informed the Funds that it is not a registered broker-dealer and does not have any written or oral agreement or understanding, directly or indirectly, with any person to distribute the shares. Upon the Funds being notified in writing by the Selling Shareholder that any material arrangement has been entered into with a broker-dealer for the sale of shares through a block trade, special offering, exchange distribution or secondary distribution or a purchase by a broker or dealer, a supplement to this SAI will be filed, if required, pursuant to Rule 497 under the Securities Act, disclosing (i) the name of each Selling Shareholder and of the participating broker-dealer(s), (ii) the number of shares involved, (iii) the price at which such shares were sold, (iv) the commissions paid or discounts or concessions allowed to such broker-dealer(s), where applicable, (v) that such broker-dealer(s) did not conduct any investigation to verify the information set out or incorporated by reference in the Fund's Prospectus and SAI, and (vi) other facts material to the transaction.

The Selling Shareholder and any other person participating in such distribution will be subject to applicable provisions of the Exchange Act and the rules and regulations thereunder, including, without limitation, to the extent applicable, Regulation M of the Exchange Act, which may limit the timing of purchases and sales of any of the shares by the Selling Shareholder and any other participating person. To the extent applicable, Regulation M may also restrict the ability of any person engaged in the distribution of the shares to engage in market-making activities with respect to the shares. All of the foregoing may affect the marketability of the shares and the ability of any person or entity to engage in market-making activities with respect to the shares. There is a risk that the Selling Shareholder may redeem its investments in the Fund or otherwise sell its shares to a third party that may redeem. As with redemptions by other large shareholders, such redemptions could have a significant negative impact on the Fund and its shares.

MANAGEMENT OF THE TRUST

Board Responsibilities. The Board is responsible for overseeing the management and affairs of the Funds and the Trust. The Board has considered and approved contracts, as described herein, under which certain companies provide essential management and administrative services to the Trust. Like most ETFs, the day-to-day business of the Trust, including the day-to-day management of risk, is performed by third-party service providers, such as the Advisers, Distributor and Administrator. The Board is responsible for overseeing the Trust's service providers and, thus, has oversight responsibility with respect to the risk management performed by those service providers. Risk management seeks to identify and eliminate or mitigate the potential effects of risks, *i.e.*, events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Trust or the Funds. Under the overall supervision of the Board and the Audit Committee (discussed in more detail below), the service providers to the Funds employ a variety of processes,

Edgar Filing: WisdomTree Trust - Form 497

procedures and controls to identify risks relevant to the operations of the Trust and the Funds to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Each service provider is responsible for one or more discrete aspects of the Trust's business (*e.g.*, the Advisers are responsible for the day-to-day management of the Funds' portfolio investments) and, consequently, for managing the risks associated with that activity.

The Board's role in risk management oversight begins before the inception of a Fund, at which time the Fund's Adviser presents the Board with information concerning the investment objectives, strategies and risks of the Fund. Additionally, the Fund's Adviser and Sub-Advisers provide the Board periodically with an overview of, among other things, its investment philosophy, brokerage practices and compliance infrastructure. Thereafter, the Board oversees the risk management of the Fund's operations, in part, by requesting periodic reports from and otherwise communicating with various personnel of the Fund and its service providers, including the Trust's CCO and the Fund's independent accountants. The Board and, with respect to identified risks that relate to its scope of expertise, the Audit Committee, oversee efforts by management and service providers to manage risks to which the Fund may be exposed.

Table of Contents

The Board is responsible for overseeing the nature, extent and quality of the services provided to the Funds by the Adviser and receives information about those services at its regular meetings. In addition, on at least an annual basis, in connection with its consideration of whether to renew any Advisory Agreements and Sub-Advisory Agreements with the Adviser and Sub-Advisers, respectively, the Board meets with the Adviser and Sub-Advisers to review such services. Among other things, the Board regularly considers the Adviser's and relevant Sub-Adviser's adherence to each Fund's investment restrictions and compliance with various Fund policies and procedures and with applicable securities regulations. The Board also reviews information about each Fund's performance and investments.

The Trust's CCO meets regularly with the Board to review and discuss compliance and other issues. At least annually, the Trust's CCO provides the Board with a report reviewing the adequacy and effectiveness of the Trust's policies and procedures and those of its service providers, including the Adviser and Sub-Advisers. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report; material changes to the policies and procedures since the date of the last report; any recommendations for material changes to the policies and procedures; and material compliance matters since the date of the last report.

The Board receives reports from the Trust's service providers regarding operational risks, portfolio valuation and other matters. Annually, an independent registered public accounting firm reviews with the Audit Committee its audit of the Funds' financial statements, focusing on major areas of risk encountered by the Fund and noting any significant deficiencies or material weaknesses in the Funds' internal controls.

The Board recognizes that not all risks that may affect a Fund can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Fund's goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, despite the periodic reports the Board receives and the Board's discussions with the service providers to a Fund, it may not be made aware of all of the relevant information related to a particular risk. Most of the Trust's investment management and business affairs are carried out by or through the Funds' Adviser, Sub-Advisers and other service providers, each of which has an independent interest in risk management but whose policies and methods by which one or more risk management functions are carried out may differ from the Trust's and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board's risk management oversight is subject to substantial limitations.

Members of the Board and Officers of the Trust. Set forth below are the names, birth years, positions with the Trust, term of office, number of portfolios overseen, and principal occupations and other directorships held during the last five years of each of the persons currently serving as members of the Board and as Executive Officers of the Trust. Also included below is the term of office for each of the Executive Officers of the Trust. The members of the Board serve as Trustees for the life of the Trust or until retirement, removal, or their office is terminated pursuant to the Trust's Declaration of Trust. The address of each Trustee and Officer is c/o WisdomTree Asset Management, Inc., 245 Park Avenue, 35th Floor, New York, New York 10167.

The Chairman of the Board, Victor Ugolyn, is not an interested person of the Funds as that term is defined in the 1940 Act. The Board is composed of a super-majority (83.3%) of Trustees who are not interested persons of the Funds (*i.e.*, Independent Trustees). There is an Audit Committee, Governance, Nominating and Compliance Committee, Contracts Review Committee, and Investment Committee of the Board, each of which is chaired by an Independent Trustee and comprised solely of Independent Trustees. The Committee chair for each is responsible for running the Committee meetings, formulating agendas for those meetings, and coordinating with management to serve as a liaison between the Committee members and management on matters within the scope of the responsibilities of the Committee as set forth in its Board-approved charter. The Funds have determined that this leadership structure is appropriate given the specific characteristics and circumstances of the Funds. The Funds made this determination in consideration of, among other things, the fact that the Independent Trustees of the Funds constitute a super-majority of the Board, the assets under management of the Funds, the number of Funds overseen by the Board, the total number of Trustees on the Board, and the fact that an Independent Trustee serves as Chairman of the Board.

* Chair of the Audit Committee.

** Chair of the Contracts Review Committee.

*** Chair of the Governance and Nominating Committee.

**** Chair of the Investment Committee.

***** Elected by and serves at the pleasure of the Board.

+ As of April 1, 2018.

Audit Committee. Ms. Raso Kirstein and Messrs. Chrencik and Ugolyn, each an Independent Trustee, are members of the Board's Audit Committee. The principal responsibilities of the Audit Committee are the appointment, compensation and oversight of the Trust's independent registered public accounting firm, including the resolution of disagreements regarding financial reporting between Trust management and such independent registered public accounting firm. The Audit Committee's responsibilities include, without limitation, to (i) oversee the accounting and financial reporting processes of the Trust and to receive reports regarding the Trust's internal control over financial reporting; (ii) oversee the

Edgar Filing: WisdomTree Trust - Form 497

quality and integrity of the Funds' financial statements and the independent audits thereof; (iii) oversee, or, as appropriate, assist Board oversight of, the Trust's compliance with legal and regulatory requirements that relate to the Trust's accounting and financial reporting, and independent audits; (iv) approve prior to appointment the engagement of the Trust's independent registered public accounting firm and, in connection therewith, to review and evaluate the qualifications, independence and performance of the Trust's independent registered public accounting firm; and (v) act as a liaison between the Trust's independent auditors and the full Board. The Independent Trustees' independent legal counsel assists the Audit Committee in connection with these duties. The Board has adopted a written charter for the Audit Committee. During the fiscal year ended June 30, 2017, the Audit Committee held seven meetings.

Governance, Nominating and Compliance Committee. Ms. Massaro and Messrs. Goldberg and Ugolyn, each an Independent Trustee, are members of the Board's Governance, Nominating and Compliance Committee. The principal responsibilities of the Governance, Nominating and Compliance Committee are to (i) provide assistance to the Board in fulfilling its responsibility with respect to the oversight of appropriate and effective governance of the Trust; (ii) identify individuals qualified to serve as Independent

Table of Contents

Trustees of the Trust and to recommend its nominees for consideration by the full Board; and (iii) provide assistance to the Board in fulfilling its responsibility with respect to overseeing the CCO and overseeing compliance matters involving the Funds and their service providers as reported to the Board. While the Governance, Nominating and Compliance Committee is solely responsible for the selection and nomination of the Trust's Independent Trustees, the Governance, Nominating and Compliance Committee may consider nominations for the office of Trustee made by Trust shareholders as it deems appropriate. The Governance, Nominating and Compliance Committee considers nominees recommended by shareholders if such nominees are submitted in accordance with Rule 14a-8 of the Securities Exchange Act of 1934 (the "1934 Act"), in conjunction with a shareholder meeting to consider the election of Trustees. Trust shareholders who wish to recommend a nominee should send nominations to the Secretary of the Trust that include biographical information and set forth the qualifications of the proposed nominee. The Board has adopted a written charter for the Governance, Nominating and Compliance Committee. During the fiscal year ended June 30, 2017, the Governance, Nominating and Compliance Committee held four meetings.

Contracts Review Committee. Ms. Massaro and Messrs. Goldberg and Ugolyn, each an Independent Trustee, are members of the Board's Contracts Review Committee. The principal responsibilities of the Contracts Review Committee are to provide assistance to the Board in fulfilling its responsibilities under Section 15 of the 1940 Act, and other applicable Sections, rules and interpretative guidance related thereto, with respect to reviewing the performance of, and reasonableness of fees paid to, the Adviser, Sub-Advisers, and core service providers for each series of the Trust, and to make recommendations to the Board regarding the contractual arrangements for such services. On March 12, 2014, the Board created the Contracts Review Committee. The Board has adopted a written charter for the Contracts Review Committee. During the fiscal year ended June 30, 2017, the Contracts Review Committee held four meetings.

Investment Committee. Ms. Raso Kirstein and Messrs. Goldberg and Ugolyn, each an Independent Trustee, are members of the Board's Investment Committee. The principal responsibilities of the Investment Committee are to support, oversee and organize on behalf of the Board the process for overseeing Fund performance and related matters (it being the intention of the Board that the ultimate oversight of Fund performance shall remain with the full Board), address such other matters that the Board shall determine and provide recommendations to the Board as needed in respect of the foregoing matters. On December 11, 2015, the Board created the Investment Committee. The Board has adopted a written charter for the Investment Committee. During the fiscal year ended June 30, 2017, the Investment Committee held five meetings.

Individual Trustee Qualifications. The Board has concluded that each of the Trustees is qualified to serve on the Board because of his or her ability to review and understand information about the Trust and the Funds provided by management, to identify and request other information he or she may deem relevant to the performance of the Trustees' duties, to question management and other service providers regarding material factors bearing on the management and administration of the Funds, and to exercise his or her business judgment in a manner that serves the best interests of the Funds' shareholders. The Trust has concluded that each of the Trustees is qualified to serve as a Trustee based on his or her own experience, qualifications, attributes and skills as described below.

The Board has concluded that Mr. Steinberg is qualified to serve as Trustee of the Funds because of the experience he has gained as President, Chief Executive Officer and director of WisdomTree Investments and the Adviser, his knowledge of and experience in the financial services industry, and the experience he has gained serving as President and Trustee of the Trust since 2005.

The Board has concluded that Mr. Chrencik is qualified to serve as Trustee of the Funds because of the experience he gained as an audit partner of a public accounting firm as well as his experience in and knowledge of the financial services industry, including his service as the chief financial officer of a hedge fund and his prior service as a board member of several other investment funds, and the experience he has gained serving as an Independent Trustee of the Trust since 2014.

The Board has concluded that Mr. Goldberg is qualified to serve as Trustee of the Funds because of the experience he has gained as a member of the staff of the SEC, including his service as Director of the SEC's Division of Investment Management, his experience as legal counsel for many mutual funds, investment advisers, and independent directors as well as the experience he has gained serving as an Independent Trustee of the Trust since 2012.

The Board has concluded that Ms. Massaro is qualified to serve as Trustee of the Funds because of the experience she has gained as a law professor, dean and advisor at various universities, and the experience she has gained serving as Independent Trustee of the Trust since 2006.

The Board has concluded that Ms. Raso Kirstein is qualified to serve as Trustee of the Funds because of her experience in and knowledge of the financial services industry, including her service as a vice president, senior portfolio manager of fixed income management and director of tax exempt fund research of an investment advisory firm, as well as the experience she has gained serving as an Independent Trustee of the Trust since 2014.

Edgar Filing: WisdomTree Trust - Form 497

The Board has concluded that Mr. Ugolyn is qualified to serve as Trustee of the Funds because of the experience he gained as chief executive officer of a firm specializing in financial services, his experience in and knowledge of the financial services industry, his experience as a member of the Board of Directors of The New York Society of Security Analysts, Inc., his service as chairman for another mutual fund family, and the experience he has gained serving as an Independent Trustee and Chairman of the Board of the Trust since 2006.

Table of Contents

Fund Shares Owned by Board Members. The following table shows the dollar amount range of each Trustee's beneficial ownership of shares of the Funds and each series of the Trust as of the end of the most recently completed calendar year. Dollar amount ranges disclosed are established by the SEC. Beneficial ownership is determined in accordance with Rule 16a-1(a)(2) under the 1934 Act. The Trustees and officers of the Trust collectively own less than 1% of the outstanding shares of the Trust.

Name of Trustee	Name of Fund	Dollar Range of Equity Securities in the Funds*		Investment Companies*	
Interested Trustee					
Jonathan L. Steinberg	N/A	None		Over \$100,000	
Independent Trustees					
David G. Chrencik	N/A	None		Over \$100,000	
Joel H. Goldberg	N/A	None		Over \$100,000	
Toni M. Massaro	WisdomTree Dynamic Long/Short U.S. Equity Fund	\$10,001	\$50,000	Over \$100,000	
Melinda A. Raso Kirstein	WisdomTree Dynamic Long/Short U.S. Equity Fund	\$10,001	\$50,000	Over \$100,000	
Victor Ugolyn	N/A	None		\$50,001	\$100,000

*These values are based on the Trustee's ownership as of December 31, 2016.

Board Compensation. The following table sets forth the compensation paid by the Trust to each Trustee for the fiscal year ended June 30, 2017.

Name of Interested Trustee	Aggregate Compensation from the Trust	Pension or Retirement Benefits Accrued As		Estimated Annual Benefits upon Retirement	Total Compensation from the Funds and Fund Complex*
		Part of Company Expenses			
Jonathan Steinberg	\$ 0	None		None	\$ 0

Name of Independent Trustee	Aggregate Compensation from the Trust	Pension or Retirement Benefits Accrued as		Estimated Annual Benefits upon Retirement	Total Compensation from the Funds and Fund Complex*
		Part of Company Expenses			
David G. Chrencik	\$ 305,800	None		None	\$ 305,800
Joel Goldberg	\$ 305,800	None		None	\$ 305,800
Toni Massaro	\$ 305,800	None		None	\$ 305,800
Melinda A. Raso Kirstein	\$ 305,800	None		None	\$ 305,800
Victor Ugolyn	\$ 417,000	None		None	\$ 417,000

*The Trust is the only trust in the Fund Complex.

Control Persons and Principal Holders of Securities. Although the Trust does not have information concerning the beneficial ownership of shares held in the names of Depository Trust Company participants (DTC Participants), as of September 30, 2017, the name and percentage ownership of each DTC Participant that owned of record 5% or more of the outstanding shares of a Fund is set forth in the table below:

Table of Contents

Certain officers, employees, accounts or affiliates of WisdomTree Asset Management (such as WisdomTree Investments, 245 Park Avenue, 35th Floor, New York, NY), including other funds advised by WisdomTree Asset Management or third parties, may from time to time own a substantial amount of a Fund's shares, including as an initial or seed investor. Such positions may be held for a limited period of time, including to facilitate commencement of a Fund, to facilitate a Fund's achieving size or scale or in seeking to track model portfolios of ETFs developed and maintained by the Adviser. Such shareholders, individually and/or collectively, could at times be considered to control that Fund (i.e., own greater than 25% of that Fund's shares) and may purchase or sell shares, including large blocks of shares, at any given time. There can be no assurance that any such entity or person would not redeem or sell its investment, that the size of that Fund would be maintained at such levels or that a Fund would continue to meet applicable listing requirements, which could negatively impact that Fund and its shares. In addition, such transactions may account for a large percentage of secondary market trading volume and may, therefore, not be sustainable and/or may have a material upward or downward effect on the market price of the shares.

Investment Adviser. WisdomTree Asset Management serves as investment adviser to each Fund pursuant to an investment advisory agreement between the Trust and WisdomTree Asset Management (the "Investment Advisory Agreement"). WisdomTree Asset Management is a Delaware corporation registered as an investment adviser under the Investment Advisers Act of 1940, as amended (the "Advisers Act"), and has offices located at 245 Park Avenue, 35th Floor, New York, New York 10167.

Under the Investment Advisory Agreement, WisdomTree Asset Management is responsible for the overall management and administration of the Trust. WisdomTree Asset Management provides an investment program for each Fund. The Adviser also provides proactive oversight of the Sub-Advisers' daily monitoring of the Sub-Advisers' buying and selling of securities for each Fund, and regular review of the Sub-Advisers' performance. In addition, the Adviser arranges for, and oversees, sub-advisory, transfer agency, custody, fund administration, securities lending, and all other non-distribution related services necessary for the Funds to operate. The Adviser furnishes to the Trust all office facilities, equipment, services and executive and administrative personnel necessary for managing the investment program of the Trust for each Fund, including:

Overseeing the Trust's insurance program;

Overseeing and coordinating all governance matters for the Trust;

Coordinating meetings of the Board of Trustees;

Devoting time and resources to maintaining an efficient market for each Fund's shares;

Coordinating with outside counsel on all Trust related legal matters;

Coordinating the preparation of the Trust's financial statements;

Coordinating all regulatory filings and shareholder reporting;

Overseeing each Fund's tax status and tax filings;

Maintaining and updating a website for certain required disclosures; and

Edgar Filing: WisdomTree Trust - Form 497

Providing shareholders with additional information about the Funds.

Each Fund pays WisdomTree Asset Management the Management Fee, based on a percentage of the Fund's average daily net assets, indicated below.

Name of Fund*	Management Fee
Dynamic Currency Hedged Europe Equity Fund	0.48% ¹
Dynamic Currency Hedged International Equity Fund	0.40% ²
Dynamic Currency Hedged International Quality Dividend Growth	0.58% ³
Dynamic Currency Hedged International SmallCap Equity Fund	0.48% ¹
Dynamic Currency Hedged Japan Equity Fund	0.48% ¹
Emerging Markets Dividend Fund	0.32% ⁷
Europe Domestic Economy Fund	0.58% ⁴
Global ex-Mexico Equity Fund	0.20%
Global Hedged SmallCap Dividend Fund	0.43% ⁵
Global SmallCap Dividend Fund	0.43%
Fundamental U.S. Corporate Bond Fund	0.28% ⁷
Fundamental U.S. High Yield Corporate Bond Fund	0.48% ⁷
Fundamental U.S. Short-Term Corporate Bond Fund	0.28% ⁶
Fundamental U.S. Short-Term High Yield Corporate Bond Fund	0.48% ⁷
Dynamic Bearish U.S. Equity Fund	0.53% ⁴
Dynamic Long/Short U.S. Equity Fund	0.53% ⁴

* Funds not listed in the table above had not commenced operations as of the date of this SAI.

Table of Contents

- (1) The Adviser has contractually agreed to limit the Management Fee to 0.43% through October 31, 2018, unless earlier terminated by the Board for any reason at any time.
- (2) The Adviser has contractually agreed to limit the Management Fee to 0.35% through October 31, 2018, unless earlier terminated by the Board for any reason at any time.
- (3) The Adviser has contractually agreed to waive a portion of its Management Fee in an amount equal to the Acquired Fund Fees and Expenses attributable to the Fund's investments in the Underlying Fund, as defined below, as well as an additional 0.10%, through October 31, 2018, unless earlier terminated by the Board for any reason at any time.
- (4) The Adviser has contractually agreed to limit the Management Fee to 0.48% through October 31, 2018, unless earlier terminated by the Board for any reason at any time.
- (5) The Adviser has contractually agreed to waive a portion of its Management Fee in an amount equal to the Acquired Fund Fees and Expenses attributable to the Fund's investments in the Underlying Fund through October 31, 2018, unless earlier terminated by the Board for any reason at any time.
- (6) The Adviser has contractually agreed to limit the Management Fee to 0.18% through October 31, 2018, unless earlier terminated by the Board for any reason at any time.
- (7) The Adviser has contractually agreed to limit the Management Fee to 0.38% through October 31, 2018, unless earlier terminated by the Board for any reason at any time.

Pursuant to an investment advisory agreement on behalf of the Funds, WisdomTree Asset Management has agreed to pay all expenses of the Trust, except for: (i) brokerage expenses and other fees, charges, taxes, levies or expenses (such as stamp taxes) incurred in connection with the execution of portfolio transactions or in connection with creation and redemption transactions (including without limitation any fees, charges, taxes, levies or expenses related to the purchase or sale of an amount of any currency, or the patriation or repatriation of any security or other asset, related to the execution of portfolio transactions or any creation or redemption transactions); (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of each Independent Trustee; (iv) compensation and expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust's CCO; (vi) extraordinary expenses (in each case as determined by a majority of the Independent Trustees); (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; (viii) interest and taxes of any kind or nature (including, but not limited to, income, excise, transfer and withholding taxes); (ix) fees and expenses related to the provision of securities lending services; and (x) the advisory fee payable to WisdomTree Asset Management. The internal expenses of pooled investment vehicles in which the New Investment Advisory Agreement Funds may invest (acquired fund fees and expenses) are not expenses of such Funds and are not paid by WisdomTree Asset Management.

Table of Contents

Pursuant to a separate contractual arrangement, WisdomTree Asset Management arranges for the provision of CCO services with respect to each Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees. WisdomTree Asset Management receives a fee of up to 0.0044% of the Fund's average daily net assets for providing such services and paying such expenses. WisdomTree Asset Management provides CCO services to the Trust.

For the following period, the Adviser received the following fees:

Name*	Commencement of Operations	For the Year Ended June 30, 2017			For the Period Ended June 30, 2016

* Funds not listed in the table above had not commenced operations as of June 30, 2017.

Table of Contents

The Adviser, from its own resources, including profits from advisory fees received from the Funds, provided such fees are legitimate and not excessive, may make payments to broker-dealers and other financial institutions for their expenses in connection with the distribution of Fund shares, and otherwise currently pays all distribution costs for Fund shares.

The Investment Advisory Agreement with respect to each Fund continues in effect for two years from its effective date, and thereafter is subject to annual approval by (i) the Board or (ii) the vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund, provided that in either event such continuance also is approved by a vote of a majority of the Trustees of the Trust who are not interested persons (as defined in the 1940 Act) of the Fund, by a vote cast in person at a meeting called for the purpose of voting on such approval. If the shareholders of any Fund fail to approve the Investment Advisory Agreement, WisdomTree Asset Management may continue to serve in the manner and to the extent permitted by the 1940 Act and rules and regulations thereunder.

The Investment Advisory Agreement with respect to any Fund is terminable without any penalty, by vote of the Board or by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of that Fund, or by WisdomTree Asset Management, in each case on not less than thirty (30) days nor more than sixty (60) days prior written notice to the other party; provided that a shorter notice period shall be permitted for a Fund in the event its shares are no longer listed on a national securities exchange. The Investment Advisory Agreement will terminate automatically and immediately in the event of its assignment (as defined in the 1940 Act).

Sub-Advisers. **BNY Mellon Asset Management North America Corporation** serves as sub-adviser to, and is responsible for the day-to-day management of the Equity Funds. Mellon Capital, a registered investment adviser, manages global quantitative-based investment strategies for institutional and private investors. Its principal office is located at 50 Fremont Street, Suite 3900, San Francisco, California 94105. Mellon Capital is a wholly-owned indirect subsidiary of The Bank of New York Mellon, a publicly traded financial holding company. Mellon Capital manages each Equity Fund's portfolio investments and places orders to buy and sell each Equity Fund's portfolio investments. WisdomTree Asset Management pays Mellon Capital for providing sub-advisory services to the Equity Funds.

Mellon Capital believes that it may perform sub-advisory and related services for the Trust without violating applicable banking laws or regulations. However, the legal requirements and interpretations about the permissible activities of banks and their affiliates may change in the future. These changes could prevent Mellon Capital from continuing to perform services for the Trust. If this happens, the Board would consider selecting other qualified firms.

The Sub-Advisory Agreement, with respect to the Equity Funds, continues in effect for two years from its effective date, and thereafter is subject to annual approval by (i) the Board or (ii) the vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the applicable Fund, provided that in either event such continuance is also approved by a vote of a majority of the Trustees of the Trust who are not interested persons (as defined in the 1940 Act) of the Fund, by a vote cast in person at a meeting called for the purpose of voting on such approval. If the shareholders of a Fund fail to approve that Fund's Sub-Advisory Agreement, WisdomTree Asset Management may continue to serve in the manner and to the extent permitted by the 1940 Act and rules and regulations thereunder. The Sub-Advisory Agreement is terminable without any penalty, by vote of the Board or by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund, or by WisdomTree Asset Management, in each case on not less than thirty (30) days nor more than sixty (60) days prior written notice to the other party; provided that a shorter notice period shall be permitted for the Funds in the event its shares are no longer listed on a national securities exchange. The Sub-Advisory Agreement will terminate automatically and immediately in the event of its assignment (as defined in the 1940 Act).

Portfolio Managers. Each Equity Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team responsible for the day-to-day management of each Fund's portfolio are Karen Q. Wong, Richard A. Brown, and Thomas J. Durante.

Including the WisdomTree ETFs, as of September 30, 2017, the Mellon Capital's Index Fund Management team managed 128 registered investment companies with approximately \$106 billion in assets; 103 pooled investment vehicles with approximately \$89 billion in assets and 129 other accounts with approximately \$99 billion in assets.

Portfolio Manager Fund Ownership. As of June 30, 2017, none of the portfolio managers owned shares of the Equity Funds.

Portfolio Manager Compensation. The primary objectives of the Mellon Capital compensation plans are to:

Motivate and reward superior investment and business performance

Edgar Filing: WisdomTree Trust - Form 497

Motivate and reward continued growth and profitability

Attract and retain high-performing individuals critical to the on-going success of Mellon Capital

Create an ownership mentality for all plan participants

Cash compensation is comprised primarily of a market-based base salary and variable incentives (cash and deferred). Base salary is determined by the employees' experience and performance in the role, taking into account ongoing compensation benchmark analyses. Base salary is generally a fixed amount that may change as a result of an annual review, upon assumption of new duties, or when a market adjustment of the position occurs. Funding for the Mellon Capital Annual and Long Term Incentive Plan is through a pre-determined fixed percentage of overall Mellon Capital profitability. Therefore, all bonus awards are based initially on Mellon

Table of Contents

Capital's financial performance. The performance period under which annual incentive opportunities are earned covers the January 1 through December 31st calendar year. The compensation for each individual is evaluated on a total compensation basis, in which combined salaries and incentives are reviewed against competitive market data (benchmarks) for each position annually. Awards are 100% discretionary. Factors considered in awards include individual performance, team performance, investment performance of the associated portfolio(s) (including both short and long term returns) and qualitative behavioral factors. Other factors considered in determining the award are the asset size and revenue growth/retention of the products managed (if applicable). Awards are paid partially in cash with the balance deferred through the Long Term Incentive Plan.

Participants in the Long Term Incentive Plan have a high level of accountability and a large impact on the success of the business due to the position's scope and overall responsibility. This plan provides for an annual award, payable in cash after a three-year cliff vesting period as well as a grant of BNY Mellon Restricted Stock for senior level roles.

Mellon Capital's Portfolio Managers responsible for managing funds are paid by Mellon Capital and not by the funds. The same methodology described above is used to determine Portfolio Manager compensation with respect to the management of funds and other accounts. Fund Portfolio Managers are also eligible for the standard retirement benefits and health and welfare benefits available to all Mellon Capital employees. Certain Portfolio Managers may be eligible for additional retirement benefits under several supplemental retirement plans that Mellon Capital provides to restore dollar-for-dollar the benefits of management employees that had been cut back solely as a result of certain limits due to the tax laws. These plans are structured to provide the same retirement benefits as the standard retirement benefits. In addition, fund Portfolio Managers whose compensation exceeds certain limits may elect to defer a portion of their salary and/or bonus under The Bank of New York Mellon Corporation Deferred Compensation Plan for Employees.

Voya Investment Management Co., LLC serves as sub-adviser and is responsible for the day-to-day management of the Fixed Income Funds. Voya IM, a registered investment adviser, manages global quantitative-based investment strategies for institutional and private investors. Its principal office is located at 230 Park Avenue, New York, New York 10169. Voya IM is a wholly-owned indirect subsidiary of Voya Financial, Inc. (formerly, ING U.S., Inc.), a publicly traded financial holding company. Voya IM chooses the portfolio investments of each Fixed Income Fund and places orders to buy and sell the portfolio investments. WisdomTree Asset Management pays Voya IM for providing sub-advisory services to the Fixed Income Funds.

The Sub-Adviser believes that it may perform sub-advisory and related services for the Trust without violating applicable banking laws or regulations. However, the legal requirements and interpretations about the permissible activities of banks and their affiliates may change in the future. These changes could prevent the Sub-Adviser from continuing to perform services for the Trust. If this happens, the Board would consider selecting other qualified firms.

The Sub-Advisory Agreement with respect to the Fixed Income Funds continues in effect for two years from its effective date, and thereafter is subject to annual approval by (i) the Board or (ii) the vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund, provided that in either event such continuance is also approved by a vote of a majority of the Trustees of the Trust who are not interested persons (as defined in the 1940 Act) of the Fund, by a vote cast in person at a meeting called for the purpose of voting on such approval. The Sub-Advisory Agreement is terminable without any penalty, by (i) vote of the Board or by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund, in each case, on not more than sixty (60) days' written notice to the Sub-Adviser, (ii) WisdomTree Asset Management or the Sub-Adviser for cause on at least sixty (60) days' written notice to the other party, and (iii) WisdomTree Asset Management or the Sub-Adviser on at least 120 days' written notice to the other party prior to any annual renewal term. The Sub-Advisory Agreement will terminate automatically and immediately in the event of its assignment (as defined in the 1940 Act).

Portfolio Managers. The Fundamental U.S. Corporate Bond Fund and Fundamental U.S. Short-Term Corporate Bond Fund ² are managed by Voya IM's Investment Grade Credit Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of each Fund's portfolio are Travis King, Anil Katarya, and Kurt Kringelis.

The Fundamental U.S. High Yield Corporate Bond Fund and Fundamental U.S. Short-Term High Yield Corporate Bond Fund are managed by Voya IM's High Yield Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of each Fund's portfolio are Randall Parrish and Rick Cumberledge.

As of June 30, 2017, the Voya Investment Grade Credit team managed five registered investment companies totaling \$1,870 million in assets and approximately \$46 billion in other investment vehicles.

Edgar Filing: WisdomTree Trust - Form 497

As of June 30, 2017, the Voya High Yield team managed four registered investment companies totaling \$1.2 billion in assets and approximately \$2.5 billion in other investment vehicles.

Portfolio Manager Fund Ownership. As of June 30, 2017, none of the portfolio managers owned shares of the Fixed Income Funds.

Portfolio Manager Compensation. The firm's compensation philosophy is to pay for performance and to leverage the variable side of the compensation equation. Annually, the firm participates in comprehensive industry surveys and compares the relevant data to ensure that its compensation plans remain aligned to the market.

Key investment professionals are paid competitive base salaries, are eligible for discretionary bonuses, and generally participate in the firm's long-term compensation program.

Table of Contents

The overall design of the annual incentive plan for investment professionals was developed to tie pay to both portfolio performance and profitability and is structured to drive performance and promote retention of top talent. Individual bonus target awards are determined and set based on external market data and internal comparators.

Investment performance is measured on both relative and absolute performance in all areas, and performance goals are set to appropriately reflect requirements for the investment team. The results for overall Voya IM include a review of firm profitability, team performance and the Investment professionals' individual performance, all of which influence the outcome of the discretionary bonus award recommendation process. The measures for each team are reviewed on an annual basis by the firm's Executive Management, and includes the measure of investment performance versus benchmark and peer groups over one-, three- and five-year periods, and contributions to the firm's revenue growth, and profitability.

The annual incentive bonus may be subject to a deferral mechanism into a long-term compensation plan, as determined by the plan in effect at the time of payment. In addition, if an employee's fixed base salary compensation exceeds a particular threshold, the employee may participate in Voya Financial's deferred compensation plan.

Voya IM's long-term incentive plan is designed to provide ownership-like incentives to reward continued employment and to link long-term compensation to the financial performance of the business. Based on job function, internal comparators and external market data, employees may be granted long-term awards. Participants are eligible to receive annual awards determined by the Management Committee based largely on investment performance and their contribution to firm performance. Awards are based on the current year's performance as defined by the Voya Financial long term incentive plan. Awards may include a combination of performance share units, restricted stock units, and/or a notional investment in a predefined set of Voya IM Mutual Funds. Awards are subject to a time based vesting schedule.

Description of Material Conflicts of Interest – Mellon Capital.

Mellon Capital manages numerous accounts with a variety of interests. This necessarily creates potential conflicts of interest for us. For example, Mellon Capital or an affiliate may cause multiple accounts to invest in the same investment. Such accounts may have conflicting interests and objectives in connection with such investment, including differing views on the operations or activities of the portfolio company, the targeted returns for the transaction, and the timeframe for and method of exiting the investment. Conflicts may also arise in cases where multiple Mellon Capital and/or affiliate client accounts are invested in different parts of an issuer's capital structure. For example, one of Mellon Capital's client accounts could acquire debt obligations of a company while an affiliate's client account acquires an equity investment. In negotiating the terms and conditions of any such investments, Mellon Capital may find that the interests of the debt-holding client accounts and the equity-holding client accounts may conflict. If that issuer encounters financial problems, decisions over the terms of the workout could raise conflicts of interest (including, for example, conflicts over proposed waivers and amendments to debt covenants). For example, debt holding accounts may be better served by a liquidation of an issuer in which it could be paid in full, while equity holding accounts might prefer a reorganization of the issuer that would have the potential to retain value for the equity holders. As another example, holders of an issuer's senior securities may be able to act to direct cash flows away from junior security holders, and both the junior and senior security holders may be Mellon Capital client accounts. Any of the foregoing conflicts of interest will be discussed and resolved on a case-by-case basis. Any such discussions will factor in the interests of the relevant parties and applicable laws.

Mellon Capital has a fiduciary duty to manage all client accounts in a fair and equitable manner. To accomplish this, Mellon Capital has adopted various policies and procedures including, but not limited to, policies relating to trading operations, best execution, trade order aggregation and allocation, short sales, cross-trading, code of conduct, personal securities trading, and purchases of securities from affiliated underwriters. These procedures are intended to help employees identify and mitigate potential side-by-side conflicts of interest such as those described above. Mellon Capital has also developed a conflicts matrix listing potential side-by-side conflicts, the compliance policies and procedures reasonably designed to mitigate such potential conflicts of interest, and the corresponding compliance testing program established with the goal of confirming Mellon Capital's adherence to such policies and procedures.

Performance Fees. The portfolio managers have entered into performance-based fee arrangements for certain client accounts and funds. Most of these arrangements provide for an asset-based management fee, based on the market value of the account at month end, quarter end or based on average market value, plus a performance fee based on the portfolio's net return in excess of a specified benchmark and/or hurdle rate during a designated period of time. The performance is based on both realized and unrealized gains and losses. Some performance fee calculations include a high water mark, which keeps track of the highest level of performance on which a performance fee has been paid and which must be exceeded in order for an additional performance fee to be assessed. For more detailed information on how performance fees are calculated, please see the applicable private placement memorandum or your investment management agreement.

Side-by-Side Management. Side-by-side management refers to a portfolio manager's simultaneous management of multiple types of client accounts/investment products. For example, the portfolio managers manage separate accounts, managed accounts/wrap-fee programs, and

Edgar Filing: WisdomTree Trust - Form 497

pooled investment vehicles for clients at the same time. The portfolio managers clients have a variety of investment objectives, policies, strategies, limitations, and restrictions. Side-by-side management gives rise to a variety of potential and actual conflicts of interest for the portfolio managers. Below is a discussion of the conflicts that the portfolio managers face when engaging in side-by-side management and how they deal with them. Note that

Table of Contents

certain of Mellon Capital's employees are also officers or employees of one or more Mellon Capital's affiliates (dual officers). These dual officers undertake investment management duties for the affiliates of which they are officers. When the portfolio managers concurrently manage client accounts/ investment products, and in particular when dual officers or dual employees are involved, this presents the same conflicts as described below. Note that portfolio managers manage their accounts consistent with applicable laws, and they follow procedures that are reasonably designed to treat clients fairly and to prevent any client or group of clients from being systematically favored or disadvantaged.

Conflicts of Interest Relating to Side-by-Side Management of Discretionary and Non-Discretionary Accounts. In limited circumstances, portfolio managers may provide to a third party for which they provide non-discretionary advisory services the same model portfolio used to manage certain of the portfolio managers' clients' accounts. In those cases where portfolio managers are implementing the model results for only a portion of the assets affected (for example, only the assets over which portfolio managers have discretionary management authority) and therefore, they cannot apply their internal trade allocation procedures, portfolio managers will (i) use reasonable efforts to agree on procedures with such non-discretionary clients designed to prevent one group of clients from receiving preferential trading treatment over another group, or (ii) determine that, due to the nature of the assets to be traded or the market on which they are traded, no client would likely be adversely affected if such procedures are not established.

Conflicts of Interest Relating to Performance-Based Fees When Engaging in Side-by-Side Management. Portfolio managers manage accounts that are charged a performance-based fee and other accounts that are charged a different type of fee, such as a flat asset-based fee. Portfolio managers have a financial incentive to favor accounts with performance-based fees because they (and Mellon Capital's employees and supervised persons) may have an opportunity to earn greater fees on such accounts as compared to client accounts without performance-based fees. Thus, portfolio managers have an incentive to direct their best investment ideas to client accounts that pay performance-based fees, and to allocate, aggregate, or sequence trades in favor of such accounts. Portfolio managers also have an incentive to give accounts with performance-based fees better execution and better brokerage commissions.

Conflicts of Interest Relating to Accounts with Different Strategies. Portfolio managers manage numerous accounts with a variety of strategies, which may present conflicts of interest. For example, a long/short position in two client accounts simultaneously can result in a loss to one client based on a decision to take a gain in the other. Taking concurrent conflicting positions in certain derivative instruments can likewise cause a loss to one client and a gain to another. Portfolio managers also may face conflicts of interest when they have uncovered option strategies and significant positions in illiquid securities in side-by-side accounts.

Conflicts of Interest Relating to the Management of Multiple Client Accounts. Portfolio managers perform investment advisory services for various clients. Portfolio managers may give advice and take action in the performance of their duties with respect to any of their other clients which may differ from the advice given, or the timing or nature of action taken, with respect another client. Portfolio managers have no obligation to purchase or sell for a client any security or other property which they purchase or sell for their own account or for the account of any other client, if they believe it is undesirable or impractical to take such action. Portfolio managers may give advice or take action in the performance of their duties with respect to any of their clients which may differ from the advice given, or the timing or nature of action taken, by their affiliates on behalf of their clients.

Conflicts of Interest Relating to Investment in Affiliated Accounts. To the extent permissible under applicable law, the portfolio managers may decide to invest some or all of their temporary investments in money market or similar accounts advised or managed by a BNY Mellon affiliate. In addition, the portfolio managers may invest client accounts in affiliated pooled vehicles. The portfolio managers have an incentive to allocate investments to these types of affiliated accounts in order to generate additional fees for themselves or their affiliates. In certain instances, portfolio managers may enter into revenue sharing arrangements with affiliates where they may receive a portion of the fee, or bill the full fee to the client and reimburse the affiliate. Portfolio managers may also enter into wholesale arrangements with affiliates where they receive only a portion of the client fee. For certain accounts with affiliates, some of the fees, such as custody fees, may be waived or rebated.

Conflicts of Interest Relating to the Discretion to Redeem from and Invest in Pooled Investment Vehicles. The portfolio manager's clients may give them discretion to allocate client assets to, and/or redeem client assets from, certain pooled investment vehicles they manage or sub-advise. Sometimes, such discretionary authority is restricted by asset allocation parameters which may limit the portfolio manager's discretion to allocate to a percentage range of the value of a client's account. When a client grants portfolio managers that discretion, a conflict could arise with respect to such client, and also with respect to other investors in such pooled investment vehicle. The portfolio managers may, for example, have an incentive to maintain a larger percentage of a client's assets in a fund in order for such assets to act as seed capital, to increase the fund's assets under management and thus, to make investment by other investors more attractive, or to maintain the continuity of a performance record if the client is the sole remaining investor. Likewise, as the manager or sub-adviser, they will have information that investors will not have about the investments held by a fund and about other investors' intentions to invest or redeem. Such information could potentially be used to favor one investor over another.

Table of Contents

Conflicts of Interest Relating to Proprietary Accounts. The portfolio managers, and Mellon Capital's existing and future employees may from time to time invest in products managed by Mellon Capital and they or related persons may establish seeded funds or accounts for the purpose of developing new investment strategies and products (collectively, Proprietary Accounts). Investment by Mellon Capital, or its employees in Proprietary Accounts that invest in the same securities as other client accounts may create conflicts of interest. Portfolio managers have an incentive to favor these Proprietary Accounts by directing their best investment ideas to these accounts or allocating, aggregating, or sequencing trades in favor of such accounts, to the disadvantage of other accounts. Portfolio managers also have an incentive to dedicate more time and attention to their Proprietary Accounts and to give them better execution and brokerage commissions than their other client accounts. The portfolio managers also may waive fees for Proprietary Accounts or for certain affiliated persons who invest in such Proprietary Accounts.

Valuations. A majority of Mellon Capital's fees are based on the valuations provided by clients' custodians or pooled accounts administrators. However, a conflict of interest may arise in overseeing the valuation of investments in the limited situations where Mellon Capital is involved in the determination of the valuation of an investment. In such circumstances, Mellon Capital requires, to the extent possible, pricing from an independent third party pricing vendor. If vendor pricing is unavailable, Mellon Capital then looks to other observable inputs for the valuations. In the event that a vendor price or other observable inputs are unavailable or deemed unreliable, Mellon Capital has established a Securities Pricing Committee to make a reasonable determination of a security's fair value.

Other Conflicts of Interest. As noted previously, portfolio managers manage numerous accounts with a variety of interests. This necessarily creates potential conflicts of interest for the portfolio managers. For example, portfolio managers may cause multiple accounts to invest in the same investment. Such accounts may have conflicting interests and objectives in connection with such investment, including differing views on the operations or activities of the portfolio company, the targeted returns for the transaction, and the timeframe for and method of exiting the investment. Conflicts may also arise in cases where multiple Mellon Capital and/or affiliate client accounts are invested in different parts of an issuer's capital structure. For example, one of the portfolio manager's client accounts could acquire debt obligations of a company while an affiliate's client account acquires an equity investment. In negotiating the terms and conditions of any such investments, portfolio managers may find that the interests of the debt-holding client accounts and the equity-holding client accounts may conflict. If that issuer encounters financial problems, decisions over the terms of the workout could raise conflicts of interest (including, for example, conflicts over proposed waivers and amendments to debt covenants). For example, debt holding accounts may be better served by a liquidation of an issuer in which it could be paid in full, while equity holding accounts might prefer a reorganization of the issuer that would have the potential to retain value for the equity holders. As another example, holders of an issuer's senior securities may be able to act to direct cash flows away from junior security holders, and both the junior and senior security holders may be Mellon Capital client accounts. Any of the foregoing conflicts of interest will be discussed and resolved on a case-by-case basis. Any such discussions will factor in the interests of the relevant parties and applicable laws.

Addressing Conflicts of Interest. Portfolio managers have a fiduciary duty to manage all client accounts in a fair and equitable manner. To accomplish this, Mellon Capital has adopted various policies and procedures (including, but not limited to, policies relating to trading operations, best execution, trade order aggregation and allocation, short sales, cross-trading, code of conduct, personal securities trading, and purchases of securities from affiliated underwriters). These procedures are intended to help employees identify and mitigate potential side-by-side conflicts of interest such as those described above. Mellon Capital has also developed a conflicts matrix listing potential side-by-side conflicts, the compliance policies and procedures reasonably designed to mitigate such potential conflicts of interest and the corresponding compliance testing program established with the goal of confirming Mellon Capital's adherence to such policies and procedures.

Description of Material Conflicts of Interest – Voya IM.

A portfolio manager may be subject to potential conflicts of interest because the portfolio manager is responsible for other accounts in addition to the Funds. These other accounts may include, among others, other mutual funds, separately managed advisory accounts, commingled trust accounts, insurance separate accounts, wrap fee programs, and hedge funds. Potential conflicts may arise out of the implementation of differing investment strategies for the portfolio manager's various accounts, the allocation of investment opportunities among those accounts or differences in the advisory fees paid by the portfolio manager's accounts.

A potential conflict of interest may arise as a result of the portfolio manager's responsibility for multiple accounts with similar investment guidelines. Under these circumstances, a potential investment may be suitable for more than one of the portfolio manager's accounts, but the quantity of the investment available for purchase is less than the aggregate amount the accounts would ideally devote to the opportunity. Similar conflicts may arise when multiple accounts seek to dispose of the same investment.

A portfolio manager may also manage accounts whose objectives and policies differ from those of the Funds. These differences may be such that under certain circumstances, trading activity appropriate for one account managed by the portfolio manager may have adverse consequences for another account managed by the portfolio manager. For example, if an account were to sell a significant position in a security, which could cause the market price of that security to decrease, while a Fund maintained its position in that security.

Table of Contents

A potential conflict may arise when a portfolio manager is responsible for accounts that have different advisory fees – the difference in the fees may create an incentive for the portfolio manager to favor one account over another, for example, in terms of access to particularly appealing investment opportunities. This conflict may be heightened where an account is subject to a performance-based fee. As part of its compliance program, Voya IM has adopted policies and procedures reasonably designed to address the potential conflicts of interest described above.

Finally, a potential conflict of interest may arise because the investment mandates for certain other accounts, such as hedge funds, may allow extensive use of short sales which, in theory, could allow them to enter into short positions in securities where other accounts hold long positions. Voya IM has policies and procedures reasonably designed to limit and monitor short sales by the other accounts to avoid harm to the Funds.

Codes of Ethics. The Trust, the Advisers and the Distributor have each adopted a Code of Ethics pursuant to Rule 17j-1 under the 1940 Act and Rule 204A-1 under the Advisers Act, where applicable. Each Code of Ethics permits personnel subject to that Code of Ethics to invest in securities for their personal investment accounts, subject to certain limitations, including securities that may be purchased or held by the Funds. Each Code of Ethics is on public file with, and is available from, the SEC.

Administrator, Custodian, Transfer Agent and Securities Lending Agent. State Street Bank and Trust Company (State Street) serves as administrator, custodian, transfer agent and securities lending agent for the Funds. State Street's principal address is One Lincoln Street, Boston, Massachusetts 02110. Under the Fund Administration Agreement with the Trust, State Street provides certain administrative, legal, tax, and financial reporting services for the maintenance and operations of the Trust and each Fund. Under the Master Custodian Agreement with the Trust, State Street acts as custodian of assets of the Trust, including securities which the Trust, on behalf of each Fund, desires to be held in places within the United States and securities it desires to be held outside the United States, and provides accounting and other services. State Street is required, upon the order of the Trust, to deliver securities held by State Street and to make payments for securities purchased by the Trust and for each Fund. Also, under the Master Custodian Agreement, State Street is authorized to appoint certain foreign custodians or foreign custody managers for Fund investments outside the United States. Pursuant to a Transfer Agency and Service Agreement with the Trust, State Street acts as transfer agent for the authorized and issued shares of beneficial interest for the Funds, and as dividend disbursing agent of the Trust. State Street also provides services, as applicable, for any wholly-owned subsidiary of a WisdomTree Fund. As compensation for the foregoing services, State Street receives certain out-of-pocket costs, transaction fees and asset-based fees which are accrued daily and paid monthly. State Street also serves as the Funds' securities lending agent. As compensation for providing such services, State Street receives a portion of the income earned by the Funds in connection with the lending program. With respect to the foregoing agreements, the Trust has agreed to limitation of liability for State Street and/or to indemnify State Street for certain liabilities.

Distributor. Foreside Fund Services, LLC serves as Distributor for the Trust and its principal address is Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor has entered into a Distribution Agreement with the Trust pursuant to which it distributes shares of each Fund. The Distribution Agreement will continue for two years from its effective date and is renewable annually. Shares are continuously offered for sale by the Funds through the Distributor only in Creation Unit Aggregations, as described in the applicable Prospectus and below in the Creation and Redemption of Creation Unit Aggregations section. Shares in less than Creation Unit Aggregations are not distributed by the Distributor. The Distributor will deliver the applicable Prospectus and, upon request, this SAI to persons purchasing Creation Unit Aggregations and will maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Distributor is a broker-dealer registered under the 1934 Act and a member of the Financial Industry Regulatory Authority (FINRA). The Distributor is not affiliated with WisdomTree Investments, WisdomTree Asset Management, or any stock exchange.

The Distribution Agreement for each Fund will provide that it may be terminated at any time, without the payment of any penalty, on at least sixty (60) days' prior written notice to the other party (i) by vote of a majority of the Independent Trustees or (ii) by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the relevant Fund. The Distribution Agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act).

The Distributor may also enter into agreements with securities dealers (Soliciting Dealers) who will solicit purchases of Creation Unit Aggregations of shares. Such Soliciting Dealers may also be Authorized Participants (as defined below) or DTC Participants (as defined below).

Intermediary Compensation. WisdomTree Asset Management or its affiliates, out of their own resources and not out of Fund assets (*i.e.*, without additional cost to a Fund or its shareholders), may pay certain broker-dealers, banks and other financial intermediaries (Intermediaries) for certain activities related to the Funds, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Funds, for other activities, such as marketing and educational training or support, or for data or platform access. In addition, WisdomTree Asset Management and E*Trade Securities LLC (ETS) have entered into an agreement whereby ETS has agreed not to charge its customers any transaction fee or brokerage commission for the purchase of shares of applicable Funds made through ETS's distribution system (the ETS fee waiver) and to disclose that such Funds are sold with the ETS fee waiver, and WisdomTree Asset Management has agreed to pay ETS during the term of the agreement an amount based on net purchases and sales of such Funds in the ETS

Edgar Filing: WisdomTree Trust - Form 497

distribution system. WisdomTree Asset Management has also agreed to make payments to Charles Schwab & Co., Inc. and TD Ameritrade, Inc. for the services described above including education costs and administrative costs with respect to applicable Funds made available and/or sold through the applicable platform. These arrangements are not financed by the Funds, and, thus, do not result in increased Fund expenses. They are

Table of Contents

not reflected in the fees and expenses listed in the fees and expenses sections of the Funds Prospectuses and they do not change the price paid by investors for the purchase of the Funds shares or the amount received by a shareholder as proceeds from the redemption of Fund shares.

Such compensation may be paid to Intermediaries that provide services to the Funds, including marketing and education support (such as through conferences, webinars and printed communications). WisdomTree Asset Management periodically assesses the advisability of continuing to make these payments. Payments to an Intermediary may be significant to the Intermediary, and amounts that Intermediaries pay to your adviser, broker or other investment professional, if any, may also be significant to such adviser, broker or investment professional. Because an Intermediary may make decisions about what investment options it will make available or recommend, and what services to provide in connection with various products, based on payments it receives or is eligible to receive, such payments create conflicts of interest between the Intermediary and its clients. For example, these financial incentives may cause the Intermediary to recommend the Fund over other investments. The same conflict of interest exists with respect to your financial adviser, broker or investment professionals if he or she receives similar payments from his or her Intermediary firm.

Intermediary information is current only as of the date of this SAI. Please contact your adviser, broker or other investment professional for more information regarding any payments his or her Intermediary firm may receive. Any payments made by WisdomTree Asset Management or its affiliates to an Intermediary may create the incentive for an Intermediary to encourage customers to buy shares of WisdomTree Funds.

If you have any additional questions, please call 1-866-909-9473.

BROKERAGE TRANSACTIONS

The Sub-Adviser assumes general supervision over placing orders on behalf of each Fund that it sub-advises for the purchase and sale of portfolio securities. In selecting the brokers or dealers for any transaction in portfolio securities, the Sub-Adviser's policy is to make such selection based on factors deemed relevant, including but not limited to the breadth of the market in the security; the price of the security; the reasonableness of the commission or mark-up or mark-down, if any; execution capability; settlement capability; back office efficiency and the financial condition of the broker or dealer, both for the specific transaction and on a continuing basis. The overall reasonableness of brokerage commissions paid is evaluated by the Sub-Adviser based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. Brokers may also be selected because of their ability to handle special or difficult executions, such as may be involved in large block trades, less liquid or foreign securities, broad distributions, or other circumstances. The Sub-Adviser does not consider the provision or value of research, products or services a broker or dealer may provide, if any, as a factor in the selection of a broker or dealer or the determination of the reasonableness of commissions paid in connection with portfolio transactions. The Trust has adopted policies and procedures that prohibit the consideration of sales of a Fund's shares as a factor in the selection of a broker or a dealer to execute its portfolio transactions. To the extent creation or redemption transactions are conducted on a cash or cash in lieu basis, a Fund may contemporaneously transact with broker-dealers for the purchase or sale of portfolio securities in connection with such transactions (see Creation and Redemption of Creation Unit Aggregations herein). Such orders may be placed with an Authorized Participant in its capacity as broker-dealer or with an affiliated broker-dealer of such Authorized Participant.

Brokerage Commissions

The table below sets forth the brokerage commissions paid by each Fund for the fiscal year or fiscal period ended June 30, 2017.

Name*	Commissions Paid	Commissions Paid
	for Fiscal Year Ended June 30, 2017	for Fiscal Period Ended June 30, 2016
Dynamic Currency Hedged Europe Equity Fund	\$ 372	\$ 799
Dynamic Currency Hedged International Equity Fund	70,340	26,453
Dynamic Currency Hedged International Quality Dividend Growth Fund	65	N/A

*Funds not listed in the table above had not commenced operations as of June 30, 2017.

Table of Contents**Portfolio Turnover**

Portfolio turnover rates for each Fund are disclosed in each Fund's Prospectus. Portfolio turnover may vary from year to year, as well as within a year. High turnover rates are likely to result in comparatively greater brokerage expenses. The overall reasonableness of brokerage commissions is evaluated by each Sub-Adviser based upon its knowledge of available information as to the general level of commissions paid by the other institutional investors for comparable services.

The table below sets forth the portfolio turnover rates of each Fund for the fiscal year or fiscal period ended June 30, 2017.

Name*	Portfolio Turnover Rate for Fiscal Year Ended June 30, 2017	Portfolio Turnover Rate for Fiscal Period Ended June 30, 2016
Dynamic Currency Hedged Europe Equity Fund	12%	25%

Fundamental U.S. Short-Term High Yield Corporate Bond Fund	69	0
Dynamic Bearish U.S. Equity Fund	153	4
Dynamic Long/Short U.S. Equity Fund	126	70

* Funds not listed in the table above had not commenced operations as of June 30, 2017.

** The Dynamic Currency Hedged International Quality Dividend Growth Fund commenced operations on November 3, 2016 and, therefore, did not have a portfolio turnover rate for the fiscal year ended June 30, 2016.

*** The Global ex-Mexico Equity Fund commenced operations on February 10, 2017 and, therefore, did not have a portfolio turnover rate for the fiscal year ended June 30, 2016.

ADDITIONAL INFORMATION CONCERNING THE TRUST

Shares. The Trust was established as a Delaware statutory trust on December 15, 2005, and consists of multiple series or funds. Each Fund issues shares of beneficial interest, with \$0.001 par value. The Board may establish additional funds. The Trust is registered with the SEC as an open-end management investment company.

Each share issued by a Fund has a pro rata interest in the assets of that Fund. Shares have no preemptive, exchange, subscription or conversion rights and are freely transferable. Each share is entitled to participate equally in dividends and distributions declared by the Board of Trustees with respect to the relevant Fund, and in the net distributable assets of such Fund on liquidation.

Each share has one vote with respect to matters upon which a shareholder vote is required consistent with the requirements of the 1940 Act and the rules promulgated thereunder. Shares of all Funds within the Trust vote together as a single class except that if the matter being voted on affects only a particular fund or if a matter affects a particular fund differently from other funds, that fund will vote separately on such matter.

Under Delaware law, the Trust is not required to hold an annual meeting of shareholders unless required to do so under the 1940 Act. The policy of the Trust is not to hold an annual meeting of shareholders unless required to do so under the 1940 Act. All shares (regardless of the Fund) have non-cumulative voting rights for the Board. Under Delaware law, Trustees of the Trust may be removed by vote of the shareholders.

Edgar Filing: WisdomTree Trust - Form 497

Following the creation of the initial Creation Unit Aggregation(s) of shares of a Fund and immediately prior to the commencement of trading in such Fund's shares, a holder of shares may be a control person of the Fund, as defined in the 1940 Act. A Fund cannot accurately predict the length of time for which one or more shareholders may remain a control person or persons of the Fund.

Shareholders may make inquiries by writing to the Trust, c/o Foreside Fund Services, LLC, Three Canal Plaza, Suite 100, Portland, Maine 04101.

Absent an applicable exemption or other relief from the SEC or its staff, beneficial owners of more than 5% of the shares of a Fund may be subject to the reporting provisions of Section 13 of the 1934 Act and the SEC's rules promulgated thereunder. In addition, absent an applicable exemption or other relief from the SEC staff, officers and Trustees of a Fund and beneficial owners of 10% of the shares of a Fund (Insiders) may be subject to the insider reporting, short-swing profit and short-sale provisions of Section 16 of the 1934 Act and the SEC's rules promulgated thereunder. Beneficial owners and Insiders should consult with their own legal counsel concerning their obligations under Sections 13 and 16 of the 1934 Act.

Table of Contents

Termination of the Trust or a Fund. The Trust or a Fund may be terminated by a majority vote of the Board of Trustees or the affirmative vote of a super-majority of the holders of the Trust or the Fund entitled to vote on termination. Although the shares are not automatically redeemable upon the occurrence of any specific event, the Trust's organizational documents provide that the Board will have the unrestricted power to alter the number of shares in a Creation Unit Aggregation. In the event of a termination of the Trust or a Fund, the Board, in its sole discretion, could determine to permit the shares to be redeemable in aggregations smaller than Creation Unit Aggregations or to be individually redeemable. In such circumstances, the Trust may make redemptions in-kind, for cash, or for a combination of cash and securities.

Role of the Depository Trust Company (DTC). DTC acts as Securities Depository for the shares of the Trust. Shares of each Fund are represented by securities registered in the name of DTC or its nominee and deposited with, or on behalf of, DTC.

DTC, a limited-purpose trust company, was created to hold securities of its participants (DTC Participants) and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of which (and/or their representatives) own DTC. More specifically, DTC is owned by a number of DTC Participants and by the NYSE and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (Indirect Participants).

Beneficial ownership of shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in shares (owners of such beneficial interests are referred to herein as Beneficial Owners) is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of shares. No Beneficial Owner shall have the right to receive a certificate representing such shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the Depository Agreement between the Trust and DTC, DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the shares of each Fund held by each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form and number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements. The foregoing processes may be conducted by the Trust via a third party.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all shares of the Trust. DTC or its nominee, upon receipt of any such distributions, shall immediately credit DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in shares of each Fund as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a street name, and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspect of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants. DTC may decide to discontinue its service with respect to shares of the Trust at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action to find a replacement for DTC to perform its functions at a comparable cost.

CREATION AND REDEMPTION OF CREATION UNIT AGGREGATIONS

Creation. The Trust issues and sells shares of each Fund only in Creation Unit Aggregations on a continuous basis through the Distributor, without a sales load, at the NAV next determined after receipt, on any Business Day, of an order in proper form.

Edgar Filing: WisdomTree Trust - Form 497

Fund Deposit. The consideration for purchase of Creation Unit Aggregations of a Fund generally consists of the in-kind deposit of a portfolio of securities (the Deposit Securities) and/or an amount of cash denominated in U.S. dollars (the Cash Component) computed as described below. Together, the Deposit Securities and the Cash Component constitute the Fund Deposit, which represents the minimum initial and subsequent investment amount for a Creation Unit Aggregation of any Fund.

The Fund or Advisers may permit or require the submission of a basket of securities and other instruments, non-U.S. currency or cash denominated in U.S. dollars that differs from the composition of the published basket(s). The Fund or Advisers may permit or require the consideration for Creation Unit Aggregations to consist solely of cash. The Fund or Advisers reserve the right to permit or require

Table of Contents

the substitution of an amount of cash denominated in U.S. dollars or non-U.S. currency (*i.e.*, a cash in lieu amount) to be added, at its discretion, to the Cash Component to replace any Deposit Security. For example, cash may be substituted to replace any Deposit Security that may not be available in sufficient quantity for delivery or that may not be eligible for transfer through the systems of DTC or the Clearing Process (discussed below). The Trust or Advisers reserve the right to permit or require a cash in lieu amount where the delivery of the Deposit Security by the Authorized Participant (as described below) would be prohibited or restricted under applicable securities laws, or in certain other situations at the sole discretion of the Trust.

The portion of the Cash Component that does not serve to replace a Deposit Security is sometimes also referred to as the Balancing Amount. The Balancing Amount is an amount equal to the difference between the NAV of the shares (per Creation Unit Aggregation) and the value of Deposit Securities. If the Balancing Amount is a positive number, the Authorized Participant will deliver the Balancing Amount. If the Balancing Amount is a negative number, the Authorized Participant will receive the Balancing Amount. The Balancing Amount does not include any stamp duty tax or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Securities. These are the sole responsibility of the Authorized Participant.

Each Fund, through the National Securities Clearing Corporation (NSCC), makes available on each Business Day, immediately prior to the opening of business on the applicable Listing Exchange (currently 9:30 a.m., Eastern time), the list of the names and the required number of shares of each Deposit Security and/or applicable Cash Component to be included in the current Fund Deposit (based on information at the end of the previous Business Day) for each Fund.

Such Deposit Securities are applicable, subject to any adjustments as described herein, in order to effect creations of Creation Unit Aggregations of a given Fund until such time as the next-announced composition of the Deposit Securities is made available.

The identity and number of shares of the Deposit Securities required for a Fund Deposit for each Fund changes from time to time based on changes to a Fund's Underlying Index and other factors.

Procedures for Creation of Creation Unit Aggregations. To be eligible to place orders with the Distributor and to create a Creation Unit Aggregation of a Fund, an entity must be: (i) a Participating Party, *i.e.*, a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC (the Clearing Process), a clearing agency that is registered with the SEC; or (ii) a DTC Participant. In each case, such entity must have executed an agreement with the Distributor with respect to creations and redemptions of Creation Unit Aggregations (a Participant Agreement). A Participating Party or DTC Participant that has entered a Participant Agreement is referred to as an Authorized Participant. Investors should contact the Distributor for the names of Authorized Participants that have signed a Participant Agreement. All shares of a Fund, however created, will be entered on the records of DTC in the name of Cede & Co. for the account of a DTC Participant.

All orders to create shares must be placed for one or more Creation Unit Aggregations. All orders to create Creation Unit Aggregations must be received by the Distributor by the designated closing time, which is no later than the closing time of the regular trading session on the applicable Listing Exchange (Closing Time) (ordinarily 4:00 p.m., Eastern time) on the date such orders are placed in order to receive that day's NAV. All orders must be received in proper form. The date on which an order to create Creation Unit Aggregations is placed is referred to as the Transmittal Date. Orders must be transmitted by an Authorized Participant by telephone, online portal or other transmission method acceptable to State Street and the Distributor pursuant to procedures set forth in the Participant Agreement, as described below, which procedures may change from time to time without notice at the discretion of the Trust. Economic or market disruptions or changes, or telephone or other communication failure, may impede the ability to reach State Street and the Distributor or an Authorized Participant. On days when the Listing Exchange or U.S. or non-U.S. markets close earlier than normal, the Fund may require purchase orders to be placed earlier in the day. All questions as to the number of Deposit Securities and/or Cash Component to be delivered, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities, will be determined by the Trust or Advisers, whose determination shall be final and binding.

All orders to create Creation Unit Aggregations through an Authorized Participant shall be placed with an Authorized Participant, in the form required by such Authorized Participant. In addition, the Authorized Participant may require an investor to make certain representations or enter into agreements with respect to the order, *e.g.*, to provide for payments of cash, when required. Investors should be aware that their particular broker may not have executed a Participant Agreement and, in that case, orders to create Creation Unit Aggregations of a Fund have to be placed by each investor's broker through an Authorized Participant that has executed a Participant Agreement. In such cases, there may be additional charges to such investor. At any given time, there may be only a limited number of broker-dealers that have executed a Participant Agreement and only a small number of such Authorized Participants may have international capabilities.

Those placing orders for Creation Unit Aggregations through the Clearing Process should afford sufficient time to permit proper submission of the order to the Distributor prior to the Closing Time on the Transmittal Date. Orders for Creation Unit Aggregations that are effected outside the Clearing Process are likely to require transmittal by the DTC Participant earlier on the Transmittal Date than orders effected using the

Edgar Filing: WisdomTree Trust - Form 497

Clearing Process. Those persons placing orders outside the Clearing Process should ascertain the deadlines applicable to DTC and the Federal Reserve Bank wire system by contacting the operations department of the broker or depository institution effectuating such transfer of Deposit Securities and the Cash Component.

Placement of Creation Orders Using the Clearing Process. Fund Deposits made through the Clearing Process must be delivered through a Participating Party that has executed a Participant Agreement. The Participant Agreement authorizes the Distributor or State Street to transmit through State Street to NSCC, on behalf of the Participating Party, such trade instructions as are necessary to effect the Participating Party's creation order. Pursuant to such trade instructions to NSCC, the Participating Party agrees to deliver the

Table of Contents

requisite Deposit Securities and the Cash Component to the Trust, together with such additional information as may be required by the Distributor. An order to create Creation Unit Aggregations through the Clearing Process is deemed received by the Distributor on the Transmittal Date if: (i) such order is received by the Distributor not later than the Closing Time on such Transmittal Date; and (ii) all other procedures set forth in the Participant Agreement are properly followed.

Placement of Creation Orders Outside the Clearing Process. Fund Deposits made outside the Clearing Process must be delivered through a DTC Participant that has executed a Participant Agreement. A DTC Participant who wishes to place an order creating Creation Unit Aggregations to be effected outside the Clearing Process does not need to be a Participating Party, but such orders must state that the DTC Participant is not using the Clearing Process and that the creation of Creation Unit Aggregations will instead be effected through a transfer of securities and cash directly through DTC. The Fund Deposit transfer must be ordered by the DTC Participant on the Transmittal Date in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities through DTC to the account of the Fund by no later than 2:00 p.m., Eastern time, on the Settlement Date. The Settlement Date is typically the second Business Day following the Transmittal Date. Each Fund reserves the right to settle transactions on a basis other than T plus two Business Days (i.e., days on which the NYSE is open) (T+2). In certain cases Authorized Participants will create and redeem Creation Unit Aggregations of the same Fund on the same trade date. In these instances, the Trust reserves the right to settle these transactions on a net basis.

On days when the Listing Exchange or U.S. markets close earlier than normal, the Fund may require purchase orders to be placed earlier in the day. All questions as to the number of Deposit Securities and/or Cash Component to be delivered, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities, will be determined by the Trust or Advisers, whose determination shall be final and binding. The amount of cash equal to the Cash Component must be transferred directly to State Street through the Federal Reserve Bank wire transfer system in a timely manner so as to be received by State Street no later than 2:00 p.m., Eastern time, on the Settlement Date. An order to create Creation Unit Aggregations outside the Clearing Process is deemed received by the Distributor on the Transmittal Date if: (i) such order is received by the Distributor not later than the Closing Time on such Transmittal Date; and (ii) all other procedures set forth in the Participant Agreement are properly followed. However, if State Street does not receive both the required Deposit Securities and the Cash Component by the specified time on the Settlement Date, the Trust may cancel or revoke acceptance of such order. Upon written notice to the Distributor, such canceled or revoked order may be resubmitted the following Business Day using a Fund Deposit as newly constituted to reflect the then-current NAV of the Funds. The delivery of Creation Unit Aggregations so created generally will occur no later than the Settlement Date.

Creation Unit Aggregations may be created in advance of receipt by the Trust of all or a portion of the applicable Deposit Securities as described below. In these circumstances, the initial deposit will have a value greater than the NAV of the shares on the date the order is placed in proper form since, in addition to available Deposit Securities, U.S. cash must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) generally between 102%-110%, as directed by the Trust or Advisers, which the Trust or Advisers may change from time to time, of the market value of the undelivered Deposit Securities (the Additional Cash Deposit) with the Fund pending delivery of any missing Deposit Securities.

If an Authorized Participant determines to post an Additional Cash Deposit as collateral for any undelivered Deposit Securities, such Authorized Participant must deposit with State Street the appropriate amount of federal funds by 2:00 p.m., Eastern time (or such other time as specified by the Trust), on the Settlement Date. If the Authorized Participant does not place its purchase order by the closing time or State Street does not receive federal funds in the appropriate amount by such time, then the order may be deemed to be rejected and the Authorized Participant shall be liable to the Fund for losses, if any, resulting therefrom. An additional amount of cash shall be required to be deposited with State Street, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount generally between 102%-110%, as directed by the Trust or Advisers, which the Trust or Advisers may change from time to time, of the daily marked-to-market value of the missing Deposit Securities. To the extent that missing Deposit Securities are not received by the specified time, on the Settlement Date or in the event a marked-to-market payment is not made within one Business Day following notification by the Distributor that such a payment is required, the Trust may use the Additional Cash Deposit to purchase the missing Deposit Securities. The Trust also requires delivery of Deposit Securities and/or an Additional Cash Deposit prior to settlement date by the Authorized Participant in relation to certain international markets.

The Authorized Participant will be liable to the Trust for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the market value of such Deposit Securities on the Transmittal Date plus the brokerage and related transaction costs associated with such purchases. The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by State Street or purchased by the Trust and deposited into the Trust. In addition, a Transaction Fee, as listed below, will be charged in all cases. The delivery of Creation Unit Aggregations so created generally will occur no later than the Settlement Date. In no event will an Authorized Participant receive or be entitled to interest or other consideration associated with or in relation to the Additional Cash Deposit.

Edgar Filing: WisdomTree Trust - Form 497

Cash Purchases. When, in the sole discretion of the Trust or Advisers, cash purchases of Creation Unit Aggregations of shares are available or specified for a Fund, such purchases shall be effected in essentially the same manner as in-kind purchases thereof. In the case of a cash purchase, the Authorized Participant must pay the cash equivalent of the Deposit Securities it would otherwise be required to provide through an in-kind purchase, plus the same Cash Component required to be paid by an in-kind purchaser. In addition, to offset brokerage and other costs associated with using cash to purchase the requisite Deposit Securities, the Authorized

Table of Contents

Participant must pay the Transaction Fees required by each Fund. If the Authorized Participant acts as a broker for the Fund in connection with the purchase of Deposit Securities, the Authorized Participant will also be required to pay certain brokerage commissions, taxes, and transaction and market impact costs as discussed under the heading **Brokerage Transactions** herein.

Acceptance of Orders for Creation Unit Aggregations. The Trust reserves the absolute right to reject or revoke acceptance of a creation order transmitted to it by the Distributor with respect to any Fund. Orders may be rejected and acceptance may be revoked if, for example: (i) the order is not in proper form; (ii) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of any Fund; (iii) the Deposit Securities delivered are not the same as those disseminated through the facilities of the NSCC for that date by the Fund as described above; (iv) acceptance of the Deposit Securities would have certain adverse tax consequences to the Fund; (v) acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (vi) acceptance of the Fund Deposit would otherwise, in the discretion of the Trust or WisdomTree Asset Management, have an adverse effect on the Trust or the rights of beneficial owners; or (vii) in the event that circumstances outside the control of the Trust, State Street, the Distributor or WisdomTree Asset Management make it for all practical purposes impossible to process creation orders. Examples of such circumstances include acts of God; public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, WisdomTree Asset Management, the Distributor, DTC, NSCC, State Street or a sub-custodian or any other participant in the creation process and similar extraordinary events. The Distributor shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of the creator of a Creation Unit Aggregation of its rejection of the order of such person. The Trust, State Street, a sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall any of them incur any liability for the failure to give any such notification.

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust, and the Trust's determination shall be final and binding.

Creation/Redemption Transaction Fee. Each Fund imposes a Transaction Fee or CU Fee on investors purchasing or redeeming Creation Units. The purpose of the Transaction Fee is to protect the existing shareholders of the Fund from the dilutive costs associated with the purchase and redemption of Creation Units. Where a Fund permits cash creations (or redemptions) or cash in lieu of depositing one or more Deposit Securities, the purchaser (or redeemer) may be assessed a higher Transaction Fee to offset the transaction cost to the Fund of buying (or selling) those particular Deposit Securities. Transaction Fees for each Fund will differ from Transaction Fees for other WisdomTree Funds, depending on the transaction expenses related to each Fund's portfolio securities, and will be limited to amounts that have been determined by WisdomTree Asset Management to be appropriate. The maximum Transaction Fee, as set forth in the table below for each Fund, may be charged in cases where a Fund permits cash or cash in lieu of Deposit Securities. Investors purchasing or redeeming through the DTC process generally will pay a higher Transaction Fee than will investors doing so through the NSCC process. Also, investors who use the services of a broker or other such intermediary may be charged a fee for such services, in addition to the Transaction Fee imposed by a Fund.

The following table sets forth the standard and maximum creation and redemption Transaction Fee for each of the Funds. These fees may be changed by the Trust.

Fund Ticker	Fund Name	CU Fee*	Maximum CU Fee*
DDEZ	Dynamic Currency Hedged Europe Equity Fund	\$ 2,500	\$ 10,000
DDWM	Dynamic Currency Hedged International Equity Fund	\$ 5,500	\$ 22,000
DHDG	Dynamic Currency Hedged International Quality Dividend Growth Fund	\$ 100	\$ 7,200
DDLS	Dynamic Currency Hedged International SmallCap Equity Fund	\$ 7,000	\$ 28,000
DDJP	Dynamic Currency Hedged Japan Equity Fund	\$ 3,250	\$ 13,000
DVEM	Emerging Markets Dividend Fund	\$ 7,000	\$ 28,000
EDOM	Europe Domestic Economy Fund	\$ 2,100	\$ 8,400
XXM	Global ex-Mexico Equity Fund	\$ 3,250	\$ 13,000
HGSD	Global Hedged SmallCap Dividend Fund	\$ 100	\$ 18,400
GSD	Global SmallCap Dividend Fund	\$ 4,600	\$ 18,400
WFIG	Fundamental U.S. Corporate Bond Fund	\$ 250	\$ 1,000
WFHY	Fundamental U.S. High Yield Corporate Bond Fund	\$ 250	\$ 1,000
SFIG	Fundamental U.S. Short-Term Corporate Bond Fund	\$ 250	\$ 1,000
SFHY	Fundamental U.S. Short-Term High Yield Corporate Bond Fund	\$ 250	\$ 1,000
DYB	Dynamic Bearish U.S. Equity Fund	\$ 400	\$ 1,600

Edgar Filing: WisdomTree Trust - Form 497

DYLS	Dynamic Long/Short U.S. Equity Fund	\$ 400	\$ 1,600
------	-------------------------------------	--------	----------

*Each Fund may charge, either in lieu of or in addition to the Transaction Fees, in the sole discretion of the Trust or as determined by the Adviser, a variable fee for creations and redemptions in order to cover certain brokerage, tax, foreign exchange, execution, market impact and other costs and expenses related to the execution of trades resulting from such transaction, up to any applicable legal limits.

Table of Contents

Placement of Redemption Orders for Using the Clearing Process. Orders to redeem Creation Unit Aggregations through the Clearing Process must be delivered through a Participating Party that has executed the Participant Agreement. Except as described herein, an order to redeem Creation Unit Aggregations using the Clearing Process is deemed received by the Trust on the Transmittal Date if: (i) such order is received by State Street (in its capacity as Transfer Agent) not later than the Closing Time on such Transmittal Date, and (ii) all other procedures set forth in the Participant Agreement are properly followed. Such order will be effected based on the NAV of the Fund as next determined. The consideration for redemption of Creation Unit Aggregations of a Fund generally consists of (i) a portfolio of securities (the Fund Securities) and/or (ii) an amount of cash denominated in U.S. dollars (the Cash Redemption Amount) as described below. The requisite Fund Securities and the Cash Redemption Amount generally will be transferred by the second NSCC Business Day following the date on which such request for redemption is deemed received.

Placement of Redemption Orders Outside the Clearing Process. Orders to redeem Creation Unit Aggregations outside the Clearing Process must be delivered through a DTC Participant that has executed the Participant Agreement. An order to redeem Creation Unit Aggregations outside the Clearing Process is deemed received by the Trust on the Transmittal Date if: (i) such order is received by State Street (in its capacity as Transfer Agent) not later than the Closing Time on such Transmittal Date; (ii) such order is accompanied or followed by the requisite number of shares of the Fund specified in such order, which delivery must be made through DTC to State Street no later than instructed, which is typically one day after Transmittal Date (presuming T+2 settlement); and (iii) all other procedures set forth in the Participant Agreement are properly followed. After the Trust has deemed an order for redemption outside the Clearing Process received, the Trust will initiate procedures to transfer the requisite Fund Securities which are expected to be delivered within two Business Days and the Cash Redemption Amount to the Authorized Participant on behalf of the redeeming Beneficial Owner by the Settlement Date. In certain cases Authorized Participants will redeem and create Creation Unit Aggregations of the same Fund on the same trade date. In these instances, the Trust reserves the right to settle these transactions on a net basis.

If the requisite number of shares of the Fund is not delivered as described above or an Additional Cash Deposit is not made, as applicable, in the sole discretion of the Trust or Advisers, in no event will an Authorized Participant receive or be entitled to interest or other consideration associated with or in relation to the Additional Cash Deposit, the Fund may reject or revoke acceptance of the redemption request because the Authorized Participant has not satisfied all of the settlement requirements.

The current procedures for collateralization of missing shares require, among other things, that any Additional Cash Deposit shall be in the form of U.S. dollars in immediately available funds and shall be held by State Street and marked-to-market daily, and that the fees of State Street and any sub-custodians in respect of the delivery, maintenance and redelivery of the Additional Cash Deposit shall be payable by the Authorized Participant. The Authorized Participant's agreement will permit the Trust, on behalf of the affected Fund, to purchase the missing shares or acquire the Deposit Securities and the Cash Component underlying such shares at any time and will subject the Authorized Participant to liability for any shortfall between the cost to the Trust of purchasing such shares, Deposit Securities or Cash Component and the value of the collateral.

The calculation of the value of the Fund Securities and the Cash Redemption Amount to be delivered upon redemption will be made by State Street according to the procedures set forth under Determination of NAV computed on the Business Day on which a redemption order is deemed received by the Trust.

A Fund or the Advisers may also, in their sole discretion, upon request of an Authorized Participant, provide such redeemer a portfolio of securities that differs from the exact composition of the Fund Securities but does not differ in NAV.

Redemptions of shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and each Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Unit Aggregations for cash to the extent that the Trust could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws. An Authorized Participant or an investor for which it is acting subject to a legal restriction with respect to a particular security included in the Fund Securities applicable to the redemption of a Creation Unit Aggregation may be paid an equivalent amount of cash. The Authorized Participant may request the redeeming Beneficial Owner of the shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment.

Because the portfolio securities of an International Fund may trade on the relevant exchange(s) on days that the Listing Exchange for the International Fund is closed or that are otherwise not Business Days for such International Fund, stockholders may not be able to redeem their shares of such International Fund, or to purchase and sell shares of such International Fund on the Listing Exchange for the International Fund, on days when the NAV of such International Fund could be significantly affected by events in the relevant foreign markets.

Cash Redemptions. A Fund may pay out the proceeds of redemptions of Creation Unit Aggregations solely in cash or through any combination of cash or securities. In addition, an investor may request a redemption in cash that the Fund may, in its sole discretion, permit. In either case, the

Edgar Filing: WisdomTree Trust - Form 497

investor will receive a cash payment equal to the NAV of its shares based on the NAV of shares of the Fund next determined after the redemption request is received in proper form (minus a redemption transaction fee and additional charge for requested cash redemptions specified above, to offset the Trust's brokerage and other transaction costs associated with the disposition of Fund Securities). Proceeds will be paid to the Authorized Participant redeeming shares on behalf of the redeeming investor as soon as practicable after the date of redemption. If the Authorized Participant acts as a broker for the Fund in connection with the sale of Fund Securities, the Authorized Participant will also be required to pay certain brokerage commissions, taxes, and transaction and market impact costs as discussed under the heading Brokerage Transactions herein.

Table of Contents

Redemptions of shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and the Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Unit Aggregations for cash to the extent that the Trust could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws.

In-Kind Redemptions. The ability of the Trust to effect in-kind creations and redemptions is subject, among other things, to the condition that, within the time period from the date of the order to the date of delivery of the securities, there are no days that are holidays in the applicable foreign market. For every occurrence of one or more intervening holidays in the applicable foreign market that are not holidays observed in the U.S. equity market, the redemption settlement cycle may be extended by the number of such intervening holidays. In addition to holidays, other unforeseeable closings in a foreign market due to emergencies may also prevent the Trust from delivering securities within the normal settlement period. The Funds will not suspend or postpone redemption beyond seven days, except as permitted under Section 22(e) of the 1940 Act. Section 22(e) provides that the right of redemption may be suspended or the date of payment postponed with respect to any Fund (1) for any period during which the New York Stock Exchange (NYSE) is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the NYSE is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the shares of the Fund s portfolio securities or determination of its NAV is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

REGULAR HOLIDAYS AND OTHER SETTLEMENT MATTERS

Each Fund generally intends to effect deliveries of Creation Unit Aggregations and portfolio securities on a basis of T+2. Each Fund may effect deliveries of Creation Unit Aggregations and portfolio securities on a basis other than T+2 in order to accommodate local holiday schedules, to account for different treatment among foreign and U.S. markets of security delivery practices and/or dividend record dates and ex-dividend dates, or under certain other circumstances. The ability of the Trust to effect in-kind creations and redemptions within two Business Days of receipt of an order in good form is subject, among other things, to the condition that, within the time period from the date of the order to the date of delivery of the securities, there are no days that are holidays in the applicable foreign market. For every occurrence of one or more intervening holidays in the applicable foreign market that are not holidays observed in the U.S. equity market, the redemption settlement cycle will be extended by the number of such intervening holidays. New or special holidays, treatment by market participants of certain days as informal holidays (e.g., days on which no or limited securities transactions occur, as a result of substantially shortened trading hours), the elimination of existing holidays or changes in local securities delivery practices (including lengthening settlement cycles, which may also occur in connection with a security sale and its settlement, with limitations or delays in the settlement itself and/or the convertibility or repatriation of the local proceeds associated therewith), could impede a Fund s ability to satisfy redemption requests in a timely manner. In addition, other unforeseeable closings or changes in a foreign market due to emergencies may also prevent the Trust from delivering redemption proceeds within the normal settlement period or in a timely manner.

The securities delivery cycles currently practicable for transferring portfolio securities to redeeming investors, coupled with foreign market holiday schedules, will require a delivery process longer than seven calendar days for some funds, in certain circumstances. The holidays applicable to each Fund during such periods are listed below, as are instances where more than seven days will be needed to deliver redemption proceeds. Although certain holidays may occur on different dates in subsequent years, the number of days required to deliver redemption proceeds in any given year is not expected to exceed the maximum number of days listed below for each Fund. The proclamation of new holidays, the treatment by market participants of certain days as informal holidays (e.g., days on which no or limited securities transactions occur, as a result of substantially shortened trading hours), the elimination of existing holidays, or changes in local securities delivery practices could affect the accuracy of information set forth herein.

Redemptions. The longest redemption cycle for a Fund is a function of the longest redemption cycle among the countries whose securities comprise the Funds. In calendar year 2018, the dates of regular holidays affecting the following securities markets present the worst-case redemption cycles* for a Fund as follows:

2018

TAXES

The following discussion of certain U.S. federal income tax consequences of investing in the Funds is based on the Code, U.S. Treasury regulations, and other applicable authority, all as in effect as of the date of the filing of this SAI. These authorities are subject to change by legislative or administrative action, possibly with retroactive effect. The following discussion is only a summary of some of the important U.S. federal income tax considerations generally applicable to investments in the Funds. There may be other tax considerations applicable to particular shareholders. Shareholders should consult their own tax advisors regarding their particular situation and the possible application of foreign, state, and local tax laws.

Qualification as a Regulated Investment Company. Each Fund has elected or intends to elect to be treated, and intends to qualify each year, as a RIC under Subchapter M of the Code. In order to qualify for the special tax treatment accorded RICs and their shareholders, each Fund must, among other things:

- (a) derive at least 90% of its gross income each year from (i) dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock or securities or foreign currencies, or other income (including but not limited to gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and (ii) net income derived from interests in qualified publicly traded partnerships (as defined below);
- (b) diversify its holdings so that, at the end of each quarter of its taxable year, (i) at least 50% of the market value of the Fund's total assets consists of cash and cash items, U.S. government securities, securities of other RICs and other securities, with investments in such other securities limited with respect to any one issuer to an amount not greater than 5% of the value of the Fund's total assets and not greater than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of the Fund's total assets is invested, including through corporations in which the Fund owns a 20% or more or more voting stock interest, in (1) the securities (other than those of the U.S. government or other RICs) of any one issuer or two or more issuers that are controlled by the Fund and

Edgar Filing: WisdomTree Trust - Form 497

that are engaged in the same, similar or related trades or businesses or (2) the securities of one or more qualified publicly traded partnerships; and

- (c) distribute with respect to each taxable year an amount equal to or greater than the sum of 90% of its investment company taxable income (as that term is defined in the Code without regard to the deduction for dividends paid generally taxable ordinary income and the excess, if any, of net short-term capital gains over net long-term capital losses) and 90% of its net tax-exempt interest income.

Table of Contents

In general, for purposes of the 90% qualifying income test described in (a) above, income derived from a partnership will be treated as qualifying income only to the extent such income is attributable to items of income of the partnership that would be qualifying income if realized directly by a Fund. However, 100% of the net income derived from an interest in a qualified publicly traded partnership (generally, a partnership (i) interests in which are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof and (ii) that derives less than 90% of its income from the qualifying income described in clause (a)(i) of the description of the 90% qualifying income test applicable to RICs, above) will be treated as qualifying income.

Taxation of the Funds. If a Fund qualifies for treatment as a RIC, that Fund will not be subject to federal income tax on income and gains that are distributed in a timely manner to its shareholders in the form of dividends.

If, for any taxable year, a Fund were to fail to qualify as a RIC or were to fail to meet the distribution requirement described above, it would be taxed in the same manner as an ordinary corporation and distributions to its shareholders would not be deductible by the Fund in computing its taxable income. In addition, the Fund's distributions, to the extent derived from the Fund's current and accumulated earnings and profits, including any distributions of net long-term capital gains, would be taxable to shareholders as ordinary dividend income for federal income tax purposes. However, such dividends would be eligible, subject to any generally applicable limitations, (i) to be treated as qualified dividend income in the case of shareholders taxed as individuals and (ii) for the dividends-received deduction in the case of corporate shareholders. Moreover, the Fund would be required to pay out its earnings and profits accumulated in that year in order to qualify for treatment as a RIC in a subsequent year. Under certain circumstances, a Fund may be able to cure a failure to qualify as a RIC, but in order to do so the Fund may incur significant Fund-level taxes and may be forced to dispose of certain assets. If a Fund failed to qualify as a RIC for a period greater than two taxable years, the Fund would generally be required to recognize any net built-in gains with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a RIC in a subsequent year.

Each Fund intends to distribute at least annually to its shareholders substantially all of its investment company taxable income (computed without regard to the dividends-paid deduction) and its net capital gain (the excess of the Fund's net long-term capital gain over its net short-term capital loss). Investment income that is retained by a Fund will generally be subject to tax at regular corporate rates. If a Fund retains any net capital gain, that gain will be subject to tax at corporate rates, but the Fund may designate the retained amount as undistributed capital gains in a notice to its shareholders who (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their shares of such undistributed amount, (ii) will be deemed to have paid their proportionate shares of the tax paid by the Fund on such undistributed amount against their federal income tax liabilities, if any, and (iii) will be entitled to claim refunds on a properly filed U.S. tax returns to the extent the credit exceeds such liabilities. For federal income tax purposes, the tax basis of shares owned by a shareholder of that Fund will be increased by an amount equal to the difference between the amount of undistributed capital gains included in the shareholder's gross income and the tax deemed paid by the shareholder.

If a Fund fails to distribute in a calendar year an amount at least equal to the sum of 98% of its ordinary income for such year and 98.2% of its capital gain net income for the one-year period ending October 31 of such year, plus any retained amount from the prior year, the Fund will be subject to a non-deductible 4% excise tax on the undistributed amount. For these purposes, a Fund will be treated as having distributed any amount on which it has been subject to corporate income tax for the taxable year ending within the calendar year. Each Fund intends to declare and pay dividends and distributions in the amounts and at the times necessary to avoid the application of the 4% excise tax, although there can be no assurance that it will be able to do so.

A Fund may elect to treat part or all of any qualified late year loss as if it had been incurred in the succeeding taxable year in determining such Fund's taxable income, net capital gain, net short-term capital gain, and earnings and profits. A qualified late year loss generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year, and certain other late-year losses.

The treatment of capital loss carryovers for the Funds is similar to the rules that apply to capital loss carryovers of individuals, which provide that such losses are carried over indefinitely. If a Fund has a net capital loss (that is, capital losses in excess of capital gains), the excess of the Fund's net short-term capital losses over its net long-term capital gains is treated as a short-term capital loss arising on the first day of the Fund's next taxable year, and the excess (if any) of the Fund's net long-term capital losses over its net short-term capital gains is treated as a long-term capital loss arising on the first day of the Fund's next taxable year. The carryover of capital losses may be limited under the general loss limitation rules if a Fund experiences an ownership change as defined in the Code.

Fund Distributions. Distributions are generally taxable whether shareholders receive them in cash or reinvest them in additional shares. Moreover, distributions on the Funds' shares are generally subject to federal income tax as described herein to the extent they do not exceed the Funds' realized income and gains, even though such distributions may economically represent a return of a particular shareholder's investment. Investors may therefore wish to avoid purchasing shares at a time when a Fund's NAV reflects gains that are either unrealized, or realized but not distributed. Realized income and gains must generally be distributed even when a Fund's NAV also reflects unrealized losses.

Edgar Filing: WisdomTree Trust - Form 497

Dividends and other distributions by a Fund are generally treated under the Code as received by the shareholders at the time the dividend or distribution is made. However, if any dividend or distribution is declared by a Fund in October, November or December of any calendar year and payable to its shareholders of record on a specified date in such a month but is actually paid during the following January, such dividend or distribution will be deemed to have been received by each shareholder on December 31 of the year in which the dividend was declared.

Table of Contents

Distributions by the Funds of investment income are generally taxable as ordinary income. Taxes on distributions of capital gains are determined by how long a Fund owned the assets that generated those gains, rather than how long a shareholder has owned his or her Fund shares. Sales of assets held by a Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by a Fund for one year or less generally result in short-term capital gains and losses. Distributions from a Fund's net capital gain that are properly reported by the Fund as capital gain dividends (Capital Gain Dividends) will be taxable as long-term capital gains. For individuals, long-term capital gains are subject to tax at reduced maximum tax rates. Distributions of gains from the sale of investments that the Fund owned for one year or less will be taxable as ordinary income.

For non-corporate shareholders, distributions of investment income reported by a Fund as derived from qualified dividend income will be taxed at the rates applicable to long-term capital gain, provided holding period and other requirements are met at both the shareholder and Fund level. In order for some portion of the dividends received by a Fund shareholder to be qualified dividend income, the Fund making the distribution must meet holding period and other requirements with respect to some portion of the dividend-paying stocks in its portfolio and the shareholder must meet holding period and other requirements with respect to the Fund's shares. A dividend will not be treated as qualified dividend income (at either the Fund or shareholder level) (1) if the dividend is received with respect to any share of stock held for fewer than 61 days during the 121-day period beginning on the date that is 60 days before the date on which such share becomes ex-dividend with respect to such dividend (or, in the case of certain preferred stock, 91 days during the 181-day period beginning 90 days before the ex-dividend date), (2) to the extent that the recipient is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property, (3) if the recipient elects to have the dividend income treated as investment income for purposes of the limitation on deductibility of investment interest, or (4) if the dividend is received from a foreign corporation that is (a) not eligible for the benefits of a comprehensive income tax treaty with the United States (with the exception of dividends paid on stock of such a foreign corporation that is readily tradable on an established securities market in the United States) or (b) treated as a passive foreign investment company.

In general, distributions of investment income reported by a Fund as derived from qualified dividend income will be treated as qualified dividend income by a shareholder taxed as an individual, provided the shareholder meets the holding period and other requirements described above with respect to the Fund's shares. If the aggregate qualified dividend income received by a Fund during any taxable year represents 95% or more of its gross income (excluding net long-term capital gain over net short-term capital loss), then 100% of the Fund's dividends (other than Capital Gain Dividends) will be eligible to be reported as qualified dividend income. To the extent that a Fund makes a distribution of income received by the Fund in lieu of dividends (a substitute payment) with respect to securities on loan pursuant to a securities lending transaction, such income will not constitute qualified dividend income to individual shareholders and will not be eligible for the dividends-received deduction for corporate shareholders.

Certain dividends received by a Fund on stock of U.S. corporations (generally, dividends received by a Fund in respect of any share of stock (1) as to which the Fund has met certain holding period requirements and (2) that is held in an unleveraged position) may be eligible for the dividends-received deduction generally available to corporate shareholders under the Code, provided such dividends are also appropriately reported as eligible for the dividends-received deduction by a Fund. In order to qualify for the dividends-received deduction, corporate shareholders must also meet minimum holding period requirements with respect to their Fund shares, taking into account any holding period reductions from certain hedging or other transactions or positions that diminish their risk of loss with respect to their Fund shares. The trading strategies of certain Funds, particularly the International Equity ETFs and Fixed Income ETFs, may significantly limit their ability to distribute dividends eligible for the dividends-received deduction for corporations.

Dividends and distributions from a Fund and capital gain on the sale of Fund shares are generally taken into account in determining a shareholder's net investment income for purposes of the Medicare contribution tax applicable to certain individuals, estates and trusts.

If a Fund makes distributions in excess of the Fund's current and accumulated earnings and profits in any taxable year, the excess distribution to each shareholder will be treated as a return of capital to the extent of the shareholder's tax basis in its shares, and will reduce the shareholder's tax basis in its shares. After the shareholder's basis has been reduced to zero, any such distributions will result in a capital gain, assuming the shareholder holds his or her shares as capital assets. A reduction in a shareholder's tax basis in its shares, will reduce any loss or increase any gain on a subsequent taxable disposition by the shareholder of its shares.

Sale or Exchange of Shares. A sale or exchange of shares in a Fund may give rise to a gain or loss. In general, any gain or loss realized upon a taxable disposition of shares will be treated as long-term capital gain or loss if the shares have been held for more than 12 months. Otherwise, the gain or loss on the taxable disposition of shares will be treated as short-term capital gain or loss. However, any loss realized upon a taxable disposition of shares held for six months or less will be treated as long-term, rather than short-term, to the extent of any long-term capital gain distributions received (or deemed received) by the shareholder with respect to the shares. All or a portion of any loss realized upon a taxable disposition of shares will be disallowed if substantially identical shares of a Fund are purchased within 30 days before or after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss.

Edgar Filing: WisdomTree Trust - Form 497

Backup Withholding. The Funds (or financial intermediaries, such as brokers, through which a shareholder holds Fund shares) generally are required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported

Table of Contents

dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding. The backup withholding tax rate is 28%. Backup withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability, provided the appropriate information is furnished to the Internal Revenue Service (the IRS).

Federal Tax Treatment of Certain Fund Investments. Transactions of the Funds in options, futures contracts, hedging transactions, forward contracts, swap agreements, straddles and foreign currencies may be subject to various special and complex tax rules, including mark-to-market, constructive-sale, straddle, wash-sale and short-sale rules. These rules could affect a Fund's ability to qualify as a RIC, affect whether gains and losses recognized by a Fund are treated as ordinary income or capital gain, accelerate the recognition of income to a Fund, or defer a Fund's ability to recognize losses. These rules may in turn affect the amount, timing or character of the income distributed to shareholders by a Fund.

A Fund is required, for federal income tax purposes, to mark to market and recognize as income for each taxable year its net unrealized gains and losses as of the end of such year on certain regulated futures contracts, foreign currency contracts and options that qualify as Section 1256 contracts in addition to the gains and losses actually realized with respect to such contracts during the year. Except as described below under **Certain Foreign Currency Tax Issues**, gain or loss from Section 1256 contracts that are required to be marked to market annually will generally be 60% long-term and 40% short-term capital gain or loss. Application of this rule may alter the timing and character of distributions to shareholders.

Certain Foreign Currency Tax Issues. The U.S. Treasury Department has authority to issue regulations that would exclude foreign currency gains from the 90% test described above if such gains are not directly related to a fund's business of investing in stock or securities. Accordingly, regulations may be issued in the future that could treat some or all of the Fund's non-U.S. currency gains as non-qualifying income, thereby potentially jeopardizing the Fund's status as a RIC for all years to which the regulations are applicable.

Under the Code, gains or losses attributable to fluctuations in exchange rates which occur between the time the Fund accrues income or other receivables or accrues expenses or other liabilities denominated in a foreign currency and the time the Fund actually collects such income or receivables or pays such expenses or liabilities generally are treated as ordinary income or loss. Similarly, on disposition of debt securities denominated in a foreign currency and on disposition of certain other instruments, gains or losses attributable to fluctuations in the value of the foreign currency between the date of acquisition of the security or contract and the date of disposition are also treated as ordinary gain or loss. The gains and losses may increase or decrease the amount of the Fund's income to be distributed to its shareholders as ordinary income.

A Fund's gain or loss on foreign currency denominated debt securities and on certain other financial instruments, such as forward currency contracts and currency swaps, that is attributable to fluctuations in exchange rates occurring between the date of acquisition and the date of settlement or disposition of such securities or instruments generally will be treated under Section 988 of the Code as ordinary income or loss. A Fund may elect out of the application of Section 988 of the Code with respect to the tax treatment of each of its foreign currency forward contracts to the extent that (i) such contract is a capital asset in the hands of the Fund and is not part of a straddle transaction and (ii) the Fund makes an election by the close of the day the contract is entered into to treat the gain or loss attributable to such contract as capital gain or loss.

A Fund's forward contracts may qualify as so-called Section 1256 contracts if the underlying currencies are currencies for which there are futures contracts that are traded on and subject to the rules of a qualified board or exchange. However, a forward currency contract that is a Section 1256 contract would, absent an election out of Section 988 of the Code as described in the preceding paragraph, be subject to Section 988. Accordingly, although such a forward currency contract would be marked to market annually like other Section 1256 contracts, the resulting gain or loss would be ordinary. If a Fund were to elect out of Section 988 with respect to forward currency contracts that qualify as Section 1256 contracts, the tax treatment generally applicable to Section 1256 contracts would apply to those forward currency contracts: that is, the contracts would be marked to market annually and gains and losses with respect to the contracts would be treated as long-term capital gains or losses to the extent of 60% thereof and short-term capital gains or losses to the extent of 40% thereof. If a Fund were to elect out of Section 988 with respect to any of its forward currency contracts that do not qualify as Section 1256 contracts, such contracts would not be marked to market annually and the Fund would recognize short-term or long-term capital gain or loss depending on the Fund's holding period therein. A Fund may elect out of Section 988 with respect to some, all or none of its forward currency contracts.

Finally, regulated futures contracts and non-equity options that qualify as Section 1256 contracts and are entered into by a Fund with respect to foreign currencies or foreign currency denominated debt instruments will be subject to the tax treatment generally applicable to Section 1256 contracts unless the Fund elects to have Section 988 apply to determine the character of gains and losses from all such regulated futures contracts and non-equity options held or later acquired by the Fund.

Foreign Investments. Income received by a Fund from sources within foreign countries (including, for example, dividends or interest on stock or securities of non-U.S. issuers) may be subject to withholding and other taxes imposed by such countries. Tax treaties between such countries and the U.S. may reduce or eliminate such taxes. If more than 50% of the value of a Fund's assets at the close of any taxable year consists of stock or securities of foreign corporations, which for this purpose may include obligations of foreign governmental issuers, the Fund may elect,

Edgar Filing: WisdomTree Trust - Form 497

for U.S. federal income tax purposes, to treat any foreign income or withholding taxes paid by the Fund as paid by its shareholders. For any year that a Fund is eligible for and makes such an election, each shareholder of that Fund will be required to include in income an amount equal to his or her allocable share of qualified foreign income taxes paid by the

Table of Contents

Fund, and shareholders will be entitled, subject to certain holding period requirements and other limitations, to credit their portions of these amounts against their U.S. federal income tax due, if any, or to deduct their portions from their U.S. taxable income, if any. No deductions for foreign taxes paid by a Fund may be claimed, however, by non-corporate shareholders who do not itemize deductions. No deduction for such taxes will be permitted to individuals in computing their alternative minimum tax liability. Foreign taxes paid by a Fund will reduce the return from the Fund's investments.

If a Fund holds shares in a passive foreign investment company (PFIC), it may be subject to U.S. federal income tax on a portion of any excess distribution or gain from the disposition of such shares even if such income is distributed as a taxable dividend by the Fund to its shareholders. Additional charges in the nature of interest may be imposed on the Fund in respect of deferred taxes arising from such distributions or gains.

A Fund may be eligible to treat a PFIC as a qualified electing fund under the Code in which case, in lieu of the foregoing requirements, such Fund will be required to include in income each year a portion of the ordinary earnings and net capital gains of the qualified electing fund, even if not distributed to the Fund, and such amounts will be subject to the 90% and excise tax distribution requirements described above. In order to make this election, a Fund would be required to obtain certain annual information from the PFICs in which it invests, which may be difficult or impossible to obtain. Alternatively, a Fund may make a mark-to-market election that will result in such Fund being treated as if it had sold and repurchased its PFIC stock at the end of each year. In such case, the Fund would report any gains resulting from such deemed sales as ordinary income and would deduct any losses resulting from such deemed sales as ordinary losses to the extent of previously recognized gains. The election must be made separately for each PFIC owned by the Fund and, once made, is effective for all subsequent taxable years, unless revoked with the consent of IRS. By making the election, a Fund could potentially ameliorate the adverse tax consequences with respect to its ownership of shares in a PFIC, but in any particular year may be required to recognize income in excess of the distributions it receives from PFICs and its proceeds from dispositions of PFIC stock. A Fund may have to distribute this excess income to satisfy the 90% distribution requirement and to avoid imposition of the 4% excise tax. In order to distribute this income and avoid a tax at the Fund level, a Fund might be required to liquidate portfolio securities that it might otherwise have continued to hold, potentially resulting in additional taxable gain or loss.

A U.S. person that owns (directly, indirectly or constructively) 10% or more of the total combined voting power of all classes of stock of a foreign corporation is a U.S. Shareholder for purposes of the Controlled Foreign Corporation (CFC) provisions of the Code. A foreign corporation is a CFC if, on any day of its taxable year, more than 50% of the voting power or value of its stock is owned (directly, indirectly or constructively) by U.S. Shareholders. If a Fund is a U.S. Shareholder of a CFC, the Fund will be required to include in its gross income for United States federal income tax purposes the CFC's subpart F income (described below), whether or not such income is distributed by the CFC. Subpart F income generally includes interest, original issue discount, dividends, net gains from the disposition of stocks or securities, receipts with respect to securities loans and net payments received with respect to equity swaps and similar derivatives. Subpart F income also includes the excess of gains over losses from transactions (including futures, forward and similar transactions) in any commodities. A Fund's recognition of subpart F income will increase a Fund's tax basis in the CFC. Distributions by a CFC to a Fund will be tax-free, to the extent of its previously undistributed subpart F income, and will correspondingly reduce the Fund's tax basis in the CFC. Subpart F income is generally treated as ordinary income, regardless of the character of the CFC's underlying income.

In general, each U.S. Shareholder is required to file IRS Form 5471 with its U.S. federal income tax (or information) returns providing information about its ownership of the CFC. In addition, a U.S. Shareholder may in certain circumstances be required to report a disposition of shares in the CFC by attaching IRS Form 5471 to its U.S. federal income tax (or information) return that it would normally file for the taxable year in which the disposition occurs. In general, these filing requirements will apply to investors of a Fund if the investor is a U.S. person who owns directly, indirectly or constructively (within the meaning of Sections 958(a) and (b) of the Code) 10% or more of the total combined voting power of all classes of voting stock of a foreign corporation that is a CFC for an uninterrupted period of thirty (30) days or more during any tax year of the foreign corporation, and who owned that stock on the last day of that year.

Additional Tax Information Concerning REITs. Certain Funds may invest in entities treated as REITs for U.S. federal income tax purposes. A Fund's investments in REIT equity securities may at times result in the Fund's receipt of cash in excess of the REIT's earnings; if the Fund distributes these amounts, these distributions could constitute a return of capital to Fund shareholders for federal income tax purposes. Dividends received by a Fund from a REIT generally will not constitute qualified dividend income.

A Fund may invest in REITs that hold residual interests in real estate mortgage investment conduits (REMICs) or which are, or have certain wholly-owned subsidiaries that are, taxable mortgage pools (TMPs). Under certain Treasury guidance, a portion of a Fund's income from a REIT that is attributable to the REIT's residual interest in a REMIC or equity interests in a TMP (referred to in the Code as an excess inclusion) will be subject to federal income tax in all events. This guidance provides that excess inclusion income of a RIC, such as a Fund, must generally be allocated to shareholders of the RIC in proportion to the dividends received by such shareholders, with the same consequences as if the shareholders held the related REMIC residual interest or TMP interests directly. In general, excess inclusion income allocated to shareholders (i) cannot be offset by net operating losses (subject to a limited exception for certain thrift institutions), (ii) will constitute unrelated business taxable income to entities (including a qualified pension plan, an individual retirement account, a 401(k) plan, a Keogh plan or other tax-exempt

Edgar Filing: WisdomTree Trust - Form 497

entity) subject to tax on unrelated business income, thereby potentially requiring such an entity, which otherwise might not be required to file a tax return, to file a tax return and pay tax on such income (see [Taxes](#) [Tax-Exempt Shareholders](#) below), and (iii) in the case of a foreign shareholder, will not qualify for any reduction in U.S. federal withholding tax. No Fund intends to invest a substantial portion of its assets in REITs which generate excess inclusion income.

Table of Contents

Tax-Exempt Shareholders. Under current law, income of a RIC that would be treated as unrelated business taxable income (UBTI) if earned directly by a tax-exempt entity generally will not be attributed as UBTI to a tax-exempt entity that is a shareholder in the RIC. Notwithstanding this blocking effect, a tax-exempt shareholder could realize UBTI by virtue of its investment in a Fund if shares in that Fund constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of Code Section 514(b) or if the Fund invests in REITs that hold residual interests in REMICs.

Non-U.S. Shareholders. In general, dividends other than Capital Gain Dividends paid by a Fund to a shareholder that is not a U.S. person within the meaning of the Code are subject to withholding of U.S. federal income tax at a rate of 30% (or lower applicable treaty rate) on distributions derived from taxable ordinary income. A Fund may, under certain circumstances, report all or a portion of a dividend as an interest related dividend or a short term capital gain dividend, which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax.

A beneficial holder of shares who is a non-U.S. person is not, in general, subject to U.S. federal income tax on gains (and is not allowed a U.S. income tax deduction for losses) realized on a sale of shares of a Fund or on Capital Gain Dividends unless (i) such gain or dividend is effectively connected with the conduct of a trade or business carried on by such holder within the United States or (ii) in the case of an individual holder, the holder is present in the United States for a period or periods aggregating 183 days or more during the year of the sale or the receipt of the Capital Gain Dividend and certain other conditions are met.

Unless certain non-U.S. entities that hold Fund Shares comply with IRS requirements that generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a 30% withholding tax may apply to Fund distributions payable to such entities and may apply to redemptions and certain capital gain dividends payable to such entities after December 31, 2018. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the U.S. and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of the agreement.

In order for a non-U.S. investor to qualify for an exemption from backup withholding, described above, the non-U.S. investor must comply with special certification and filing requirements. Non-U.S. investors in the Funds should consult their tax advisors in this regard.

A beneficial holder of shares who is a non-U.S. person may be subject to state and local tax and to the U.S. federal estate tax in addition to the federal income tax consequences referred to above. If a shareholder is eligible for the benefits of a tax treaty, any income or gain effectively connected with a U.S. trade or business will generally be subject to U.S. federal income tax on a net basis only if it is also attributable to a permanent establishment maintained by the shareholder in the United States.

Creation and Redemption of Creation Units. An Authorized Participant having the U.S. dollar as its functional currency for U.S. federal income tax purposes that exchanges securities for Creation Units generally will recognize a gain or loss equal to the difference between (i) the sum of the market value of the Creation Units at the time of the exchange and any cash received by the Authorized Participant in the exchange and (ii) the sum of the exchanger's aggregate basis in the securities or non-U.S. currency surrendered and any cash paid for such Creation Units. All or a portion of any gain or loss recognized by an Authorized Participant exchanging a currency other than its functional currency for Creation Units may be treated as ordinary income or loss. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate U.S. dollar market value of any securities or non-U.S. currency received plus the amount of any cash received for such Creation Units. The IRS, however, may assert that a loss that is realized by an Authorized Participant upon an exchange of securities or non-U.S. currency for Creation Units may not be currently deducted, under the rules governing wash sales (for an Authorized Participant that does not mark-to-market its holdings), or on the basis that there has been no significant change in economic position. All or some portion of any capital gain or loss realized upon the creation of Creation Units in exchange for securities will generally be treated as long-term capital gain or loss if securities exchanged for such Creation Units have been held for more than one year.

Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if the Creation Units have been held for more than one year. Otherwise, such capital gains or losses will be treated as short-term capital gains or losses.

A person subject to U.S. federal income tax with the U.S. dollar as its functional currency for U.S. federal income tax purposes who receives non-U.S. currency upon a redemption of Creation Units and does not immediately convert the non-U.S. currency into U.S. dollars may, upon a later conversion of the non-U.S. currency into U.S. dollars, or upon the use of the non-U.S. currency to pay expenses or acquire assets, recognize as ordinary gains or losses any gains or losses resulting from fluctuations in the value of the non-U.S. currency relative to the U.S. dollar since the date of the redemption.

Edgar Filing: WisdomTree Trust - Form 497

Persons exchanging securities or non-U.S. currency for Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction and whether the wash sales rules apply and when a loss might be deductible.

Table of Contents

Section 351. The Trust on behalf of each Fund has the right to reject an order for a purchase of shares of the Fund if the purchaser (or any group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of a given Fund and if, pursuant to Section 351 of the Code, that Fund would have a basis in the securities different from the market value of such securities on the date of deposit. The Trust also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination.

Certain Reporting Regulations. Under U.S. Treasury regulations, generally, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file with the IRS a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance shareholders of a RIC are not excepted. Significant penalties may be imposed for the failure to comply with the reporting regulations. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

Cost Basis Reporting. The cost basis of shares acquired by purchase will generally be based on the amount paid for the shares and then may be subsequently adjusted for other applicable transactions as required by the Code. The difference between the selling price and the cost basis of shares generally determines the amount of the capital gain or loss realized on the sale or exchange of shares. Contact the broker through whom you purchased your shares to obtain information with respect to the available cost basis reporting methods and elections for your account.

General Considerations. The federal income tax discussion set forth above is for general information only. Prospective investors should consult their tax advisors regarding the specific federal income tax consequences of purchasing, holding and disposing of shares of the Funds, as well as the effect of state, local and foreign tax law and any proposed tax law changes.

DETERMINATION OF NAV

The NAV of each Fund's shares is calculated each day a Fund is open for business as of the regularly scheduled close of regular trading on the New York Stock Exchange, normally 4:00 p.m. Eastern Time (the NAV Calculation Time). NAV per share is calculated by dividing a Fund's net assets by the number of Fund shares outstanding.

In calculating a Fund's NAV, Fund investments generally are valued using market valuations. Each Fund generally values: (i) equity securities (including preferred stock) traded on any recognized U.S. or non-U.S. exchange at the last sale price or official closing price on the exchange or system on which they are principally traded; (ii) unlisted equity securities (including preferred stock) at the last quoted sale price or, if no sale price is available, at the mean between the highest bid and lowest ask price; and (iii) short-term debt securities with remaining maturities of 60 days or less at current market quotations or mean prices obtained from broker-dealers or independent pricing service providers. U.S. fixed income assets may be valued as of the announced closing time for such securities on any day that the Securities Industry and Financial Markets Association announces an early closing time. The values of any assets or liabilities of the Funds that are denominated in a currency other than the U.S. dollar are converted into U.S. dollars using an exchange rate deemed appropriate by the Fund. In addition, each Fund may invest in money market funds which are valued at their NAV per share and affiliated ETFs which are valued at their last sale or official closing price on the exchange on which they are principally traded.

In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, a Fund's investments will be valued in accordance with the Fund's pricing policy and procedures. Securities that may be valued using fair value pricing may include, but are not limited to, securities for which there are no current market quotations or whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers and reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events. An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund's next NAV Calculation Time that may materially affect the value of a Fund's investment (e.g., government action, natural disaster, or significant market fluctuation). Price movements in U.S. markets that are deemed to affect the value of foreign securities, or reflect changes to the value of such securities, also may cause securities to be fair valued.

The sale price a Fund could receive for a security or other asset may differ from the Fund's valuation of the security or other asset and/or from the value used by its index (if applicable), particularly for securities or other assets that trade in low volume or volatile markets or that are valued using a fair value methodology. When fair value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities. In addition, particularly for a Fund holding foreign securities or assets, the value of the securities or other assets in such Fund's portfolio may change on days or during time periods when shareholders will not be able to purchase or sell a Fund's shares. As a result, the price received upon the sale of an investment may be less than the value ascribed by a Fund, and the Fund could realize a greater than expected loss or lesser than expected gain upon the sale of the investment. A Fund's ability to value its investment may also be impacted by technological issues, pricing methodology issues and/or errors by pricing services or other third-party service providers.

Edgar Filing: WisdomTree Trust - Form 497

Fund shares are purchased or sold on a national securities exchange at market prices, which may be higher or lower than NAV. No secondary sales will be made to brokers or dealers at a concession by the Distributor or by a Fund. Purchases and sales of shares in the secondary market, which will not involve a Fund, will be subject to customary brokerage commissions and charges. Transactions in Fund shares will be priced at NAV only if you purchase or redeem shares directly from a Fund in Creation Units.

Table of Contents

DIVIDENDS AND DISTRIBUTIONS

The Fixed Income Funds intend to pay out dividends on a monthly basis but in any event no less frequently than annually. The Equity Funds, except the Alternative ETFs, intend to pay out dividends, if any, on a quarterly basis but in any event no less frequently than annually. The Alternative ETFs each intend to pay out dividends on an annual basis. Each Fund intends to distribute its net realized capital gains, if any, to investors annually. The Funds may occasionally be required to make supplemental distributions at some other time during the year. Distributions in cash may be reinvested automatically in additional whole shares only if the broker through whom you purchased shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

The Trust reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of each Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income.

FINANCIAL STATEMENTS

The audited financial statements, including the financial highlights appearing in the Trust's Annual Report to Shareholders for the fiscal year ended June 30, 2017 and filed electronically with the SEC, are incorporated by reference and made part of this SAI for the Funds that were operating during the fiscal year ended June 30, 2017. You may request a copy of the Trust's Annual Report at no charge by calling 866-909-9473 or through the Trust's website at www.wisdomtree.com.
