UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

Form 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2013

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Transition Period from _____ to _____

Commission File No. 001-32260

Westlake Chemical Corporation
(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or organization)
2801 Post Oak Boulevard, Suite 600
Houston, Texas 77056
(Address of principal executive offices, including zip code)
(713) 960-9111
(Registrant's telephone number, including area code)

76-0346924
(I.R.S. Employer Identification Number)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act) Yes No

The number of shares outstanding of the registrant's sole class of common stock as of November 1, 2013 was 66,770,803.

WESTLAKE CHEMICAL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

(in thousands of dollars, except share amounts and per share data)

1. Basis of Financial Statements

The accompanying unaudited consolidated interim financial statements were prepared in accordance with the rules and regulations of the Securities and Exchange Commission (the "SEC") for interim periods. Accordingly, certain information and footnotes required for complete financial statements under generally accepted accounting principles in the United States ("U.S. GAAP") have not been included. These interim consolidated financial statements should be read in conjunction with the December 31, 2012 financial statements and notes thereto of Westlake Chemical Corporation (the "Company") included in the annual report on Form 10-K for the fiscal year ended December 31, 2012 (the "2012 Form 10-K"), filed with the SEC on February 22, 2013. These financial statements have been prepared in conformity with the accounting principles and practices as disclosed in the notes to the consolidated financial statements of the Company for the fiscal year ended December 31, 2012.

In the opinion of the Company's management, the accompanying unaudited consolidated interim financial statements reflect all adjustments (consisting only of normal recurring adjustments) that are necessary for a fair statement of the Company's financial position as of September 30, 2013, its results of operations for the three and nine months ended September 30, 2013 and 2012 and the changes in its cash position for the nine months ended September 30, 2013 and 2012.

Results of operations and changes in cash position for the interim periods presented are not necessarily indicative of the results that will be realized for the fiscal year ending December 31, 2013 or any other interim period. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Revisions

The consolidated statement of cash flows for the nine months ended September 30, 2012 has been revised to correct the presentation of windfall tax benefits from share-based compensation of \$7,792 in financing activities, instead of operating activities. The Company has determined that this revision was immaterial to the Company's previously issued financial statements.

Recent Accounting Pronouncements

Disclosures about Offsetting Assets and Liabilities

In December 2011, the Financial Accounting Standards Board ("FASB") issued an accounting standards update on disclosures for offsetting assets and liabilities. The new accounting guidance requires companies to disclose both gross and net information about (1) instruments and transactions eligible for offset in the statement of financial position, and (2) instruments and transactions subject to an agreement similar to a master netting arrangement. The FASB issued another accounting standards update clarifying the scope of the assets and liabilities offset disclosure requirements in January 2013. The effective date of the disclosure requirements remains unchanged. The Company adopted the new guidance as of January 1, 2013, and the adoption did not have an impact on the Company's consolidated financial position, results of operations or cash flows.

Testing Indefinite-Lived Intangible Assets for Impairment

In July 2012, the FASB issued an accounting standards update to simplify how entities test indefinite-lived intangible assets for impairment and to improve consistency in impairment testing guidance among long-lived asset categories. The new accounting guidance provides an entity with an option to first assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test under current accounting guidance. If an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then the entity is not required to take further action. However, if an entity concludes otherwise, then it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the

carrying amount in accordance with current accounting guidance. Also under this new accounting guidance, an entity has the option to bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to performing the quantitative impairment test, but may resume performing the qualitative assessment in any subsequent period. The Company adopted the new indefinite-lived intangible assets test guidance as of January 1, 2013, and the adoption did not have a material impact on the Company's consolidated financial position, results of operations or cash flows.

WESTLAKE CHEMICAL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

(Unaudited)

(in thousands of dollars, except share amounts and per share data)

Reclassifications Out of Accumulated Other Comprehensive Income

In February 2013, the FASB issued an accounting standards update on reporting items reclassified out of accumulated other comprehensive income. The new accounting guidance requires companies to present either parenthetically on the face of the financial statements or in the notes, significant amounts reclassified from each component of accumulated other comprehensive income and the income statement line items affected by the reclassification, with certain exceptions. The Company adopted the new guidance as of January 1, 2013, and the adoption did not have an impact on the Company's consolidated financial position, results of operations or cash flows.

2. Current Marketable Securities

The Company's investments in current marketable securities were classified as follows:

	September 30, 2013	December 31, 2012
Available-for-sale securities	\$120,602	\$—
Held-to-maturity securities	4,995	124,873
Marketable securities	\$125,597	\$124,873

Available-for-Sale Securities

The cost, gross unrealized gains, gross unrealized losses and fair value of the Company's available-for-sale securities were as follows:

	September 30, 2013			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses ⁽¹⁾	Fair Value
Debt securities				
Corporate bonds	\$11,888	\$191	\$(21) \$12,058
U.S. government debt ⁽²⁾	26,400	23	(6) 26,417
Asset-backed securities	82,109	27	(9) 82,127
Total available-for-sale securities	\$120,397	\$241	\$(36) \$120,602

(1) All unrealized loss positions were held at a loss for less than 12 months.

(2) U.S. Treasury obligations, U.S. government agency obligations and U.S. government agency mortgage-backed securities.

As of September 30, 2013, net unrealized gains on the Company's available-for-sale securities of \$131, net of income tax expense of \$74, were recorded in accumulated other comprehensive income. See Note 10 for the fair value hierarchy of the Company's available-for-sale securities.

As of September 30, 2013, the corporate bond securities held by the Company had maturities between one to five years, U.S. government debt securities, excluding U.S. government agency mortgage-backed securities, had maturities of less than one year, U.S. government agency mortgage-backed securities had maturities between four to 26 years and asset-backed securities had maturities between two to five years.

Held-to-Maturity Securities

The Company owned held-to-maturity securities of \$4,995 and \$124,873 at September 30, 2013 and December 31, 2012, respectively, consisting of short-term corporate debt securities with maturities exceeding three months at the date of acquisition. These debt securities are carried at amortized cost, which approximates their fair value.

WESTLAKE CHEMICAL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

(Unaudited)

(in thousands of dollars, except share amounts and per share data)

3. Accounts Receivable

Accounts receivable consist of the following:

	September 30, 2013	December 31, 2012
Trade customers	\$404,678	\$388,949
Affiliates	333	258
Allowance for doubtful accounts	(9,832) (11,172)
	395,179	378,035
Federal and state taxes	20,421	4,011
Other	17,425	18,113
Accounts receivable, net	\$433,025	\$400,159

4. Inventories

Inventories consist of the following:

	September 30, 2013	December 31, 2012
Finished products	\$198,762	\$200,940
Feedstock, additives and chemicals	194,558	143,912
Materials and supplies	58,251	54,446
Inventories	\$451,571	\$399,298

5. Property, Plant and Equipment

As of September 30, 2013, the Company had property, plant and equipment, net totaling \$1,952,918. The Company assesses these assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable, including when negative conditions such as significant current or projected operating losses exist. Other factors considered by the Company when determining if an impairment assessment is necessary include, but are not limited to, significant changes or projected changes in supply and demand fundamentals (which would have a negative impact on operating rates or margins), new technological developments, new competitors with significant raw material or other cost advantages, adverse changes associated with the U.S. and world economies and uncertainties associated with governmental actions. Long-lived assets assessed for impairment are grouped at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. Depreciation expense on property, plant and equipment of \$32,460 and \$30,055 is included in cost of sales in the consolidated statements of operations for the three months ended September 30, 2013 and 2012, respectively. Depreciation expense on property, plant and equipment of \$95,995 and \$90,615 is included in cost of sales in the consolidated statements of operations for the nine months ended September 30, 2013 and 2012, respectively.

6. Other Assets

Amortization expense on intangible and other assets of \$8,634 and \$8,717 is included in the consolidated statements of operations for the three months ended September 30, 2013 and 2012, respectively. Amortization expense on intangible and other assets of \$21,392 and \$20,135 is included in the consolidated statements of operations for the nine months ended September 30, 2013 and 2012, respectively.

Table of Contents

(in thousands of dollars, except share amounts and per share data)

7. Long-Term Debt

Long-term debt consists of the following:

	September 30, 2013	December 31, 2012
3.60% senior notes due 2022	\$248,960	\$248,872
6 ½% senior notes due 2029	100,000	100,000
6 ¾% senior notes due 2032	250,000	250,000
6 ½% senior notes due 2035 (the "6 ½% GO Zone Senior Notes Due 2035")	89,000	89,000
6 ½% senior notes due 2035 (the "6 ½% IKE Zone Senior Notes Due 2035")	65,000	65,000
Loan related to tax-exempt waste disposal revenue bonds due 2027	10,889	10,889
Long-term debt, net	\$763,849	\$763,761

Revolving Credit Facility

The Company has a \$400,000 senior secured revolving credit facility. The facility includes a provision permitting the Company to increase the size of the facility, up to four times, in increments of at least \$25,000 each (up to a maximum of \$150,000) under certain circumstances if lenders agree to commit to such an increase. At September 30, 2013, the Company had no borrowings outstanding under the revolving credit facility. Any borrowings under the facility will bear interest at either LIBOR plus a spread ranging from 1.75% to 2.25% or a base rate plus a spread ranging from 0.25% to 0.75%. The revolving credit facility also requires an unused commitment fee of 0.375% per annum. All interest rates under the facility are subject to monthly grid pricing adjustments based on prior month average daily loan availability. The revolving credit facility matures on September 16, 2016. As of September 30, 2013, the Company had outstanding letters of credit totaling \$16,921 and borrowing availability of \$383,079 under the revolving credit facility.

8. Stock-Based Compensation

Under the Westlake Chemical Corporation 2013 Omnibus Incentive Plan (as amended and restated, the "2013 Plan"), all employees and nonemployee directors of the Company, as well as certain individuals who have agreed to become the Company's employees, are eligible for awards. Shares of common stock may be issued as authorized in the 2013 Plan. At the discretion of the administrator of the 2013 Plan, employees and nonemployee directors may be granted awards in the form of stock options, stock appreciation rights, stock awards, restricted stock units or cash awards (any of which may be a performance award). Total stock-based compensation expense related to the 2013 Plan was \$1,680 and \$1,515 for the three months ended September 30, 2013 and 2012, respectively, and \$4,804 and \$4,640 for the nine months ended September 30, 2013 and 2012, respectively.

9. Derivative Instruments

Commodity Risk Management

The Company uses derivative instruments to reduce price volatility risk on raw materials and products as a substantial portion of its raw materials and products are commodities whose prices fluctuate as market supply and demand fundamentals change. Business strategies to protect against such instability include ethylene product feedstock flexibility and moving downstream into the olefins and vinyls products where pricing is more stable. The Company does not use derivative instruments to engage in speculative activities.

For derivative instruments that are designated and qualify as fair value hedges, the gains or losses on the derivative instruments, as well as the offsetting losses or gains on the hedged items attributable to the hedged risk, were included in cost of sales in the consolidated statements of operations for the three and nine months ended September 30, 2013 and 2012. As of September 30, 2013, the Company had 10,710,000 gallons of feedstock forward contracts designated as fair value hedges.

Gains and losses from changes in the fair value of derivative instruments that are not designated as hedging instruments were included in cost of sales in the consolidated statements of operations for the three and nine months

ended September 30, 2013 and 2012.

The exposure on commodity derivatives used for price risk management includes the risk that the counterparty will not pay if the market declines below the established fixed price. In such case, the Company would lose the benefit of the derivative

8

Table of Contents

WESTLAKE CHEMICAL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

(Unaudited)

(in thousands of dollars, except share amounts and per share data)

differential on the volume of the commodities covered. In any event, the Company would continue to receive the market price on the actual volume hedged. The Company also bears the risk that it could lose the benefit of market improvements over the fixed derivative price for the term and volume of the derivative instruments (as such improvements would accrue to the benefit of the counterparty).

Disclosures related to the Company's derivative assets and derivative liabilities subject to enforceable master netting arrangements have not been presented as they are not material to the Company's consolidated balance sheets at September 30, 2013 and December 31, 2012.

The fair values of derivative instruments in the Company's consolidated balance sheets were as follows:

		Derivative Assets	
		Fair Value as of	
	Balance Sheet Location	September 30, 2013	December 31, 2012
Designated as hedging instruments			
Commodity forward contracts	Accounts receivable, net	\$3,208	\$13,032
Not designated as hedging instruments			
Commodity forward contracts	Accounts receivable, net	2,541	1,395

		Derivative Liabilities	
		Fair Value as of	
	Balance Sheet Location	September 30, 2013	December 31, 2012
Designated as hedging instruments			
Commodity forward contracts	Accrued liabilities	\$—	\$399
Not designated as hedging instruments			
Commodity forward contracts	Accrued liabilities	2,090	13,295
Total derivative liabilities		\$2,090	\$13,694

The following tables reflect the impact of derivative instruments designated as fair value hedges and the related hedged item on the Company's consolidated statements of operations. For the three and nine months ended September 30, 2013 and 2012, there was no material ineffectiveness with regard to the Company's qualifying fair value hedges.

Derivatives in Fair Value Hedging Relationships	Location of Gain (Loss) Recognized in Income on Derivative	Three Months Ended		Nine Months Ended	
		September 30, 2013	2012	September 30, 2013	2012
Commodity forward contracts	Cost of sales	\$(232) \$(515) \$(342) \$12,345
Hedged Items in Fair Value Hedging Relationships	Location of Gain (Loss) Recognized in Income on Hedged Items	Three Months Ended		Nine Months Ended	
		September 30, 2013	2012	September 30, 2013	2012
Firm commitment designated as the hedged item	Cost of sales	\$236	\$515	\$15	\$(13,546)

The impact of derivative instruments that have not been designated as hedges on the Company's consolidated statements of operations were as follows:

Derivatives Not Designated as	Location of Gain (Loss) Recognized in	Three Months Ended		Nine Months Ended	
		September 30,		September 30,	

Edgar Filing: WESTLAKE CHEMICAL CORP - Form 10-Q

Hedging Instruments	Income on Derivative	2013	2012	2013	2012
Commodity forward contracts	Cost of sales	\$4,854	\$249	\$9,897	\$(783)

See Note 10 for the fair value of the Company's derivative instruments.

(in thousands of dollars, except share amounts and per share data)

10. Fair Value Measurements

The Company reports certain assets and liabilities at fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). Under the accounting guidance for fair value measurements, inputs used to measure fair value are classified in one of three levels:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data.

Level 3: Unobservable inputs that are not corroborated by market data.

The following tables summarize, by level within the fair value hierarchy, the Company's assets and liabilities that were accounted for at fair value on a recurring basis:

	September 30, 2013		
	Level 1	Level 2	Total
Derivative instruments			
Risk management assets - Commodity forward contracts	\$1,808	\$3,941	\$5,749
Risk management liabilities - Commodity forward contracts	(74) (2,016) (2,090
Firm commitments			
Hedged portion of firm commitment	—	(3,208) (3,208
Marketable securities			
Available-for-sale securities	14,998	105,604	120,602
	December 31, 2012		
	Level 1	Level 2	Total
Derivative instruments			
Risk management assets - Commodity forward contracts	\$1,395	\$13,032	\$14,427
Risk management liabilities - Commodity forward contracts	—	(13,694) (13,694
Firm commitments			
Hedged portion of firm commitment	—	399	399
Hedged portion of firm commitment	—	(13,032) (13,032

The Level 2 measurements for the Company's commodity contracts are derived using forward curves supplied by industry-recognized and unrelated third-party services. The Level 2 measurements for the Company's available-for-sale securities are derived using market-based pricing provided by unrelated third-party services. There were no transfers in and out of Levels 1 and 2 of the fair value hierarchy for the nine months ended September 30, 2013 and 2012.

In addition to the financial assets and liabilities above, the Company has other financial assets and liabilities subject to fair value measures. These financial assets and liabilities include cash and cash equivalents, accounts receivable, net, accounts payable and long-term debt, all of which are recorded at carrying value. The amounts reported in the consolidated balance sheets for cash and cash equivalents, accounts receivable, net and accounts payable approximate their fair value due to the short maturities of these instruments. The carrying and fair values of the Company's long-term debt are summarized in the table below. The Company's long-term debt instruments are publicly-traded. A market approach, based upon quotes from financial reporting services, is used to measure the fair value of the Company's long-term debt. Because the Company's long-term debt instruments may not be actively traded, the inputs used to measure the fair value of the Company's long-term debt are classified as Level 2 inputs within the fair value hierarchy.

Loan related to tax-exempt waste disposal revenue bonds due 2027	10,889	10,889	10,889	10,889

11. Income Taxes

The effective income tax rate was 35.8% for the nine months ended September 30, 2013. The effective income tax rate for the 2013 period was above the U.S. federal statutory rate of 35.0% primarily due to state income taxes, partially offset by the domestic manufacturing deduction. The effective income tax rate was 33.5% for the nine months ended September 30, 2012. The effective income tax rate for the 2012 period was below the U.S. federal statutory rate of 35.0% primarily due to state tax credits and the domestic manufacturing deduction, partially offset by state income taxes.

There was no material change to the total gross unrecognized tax benefits for the nine months ended September 30, 2013. Management anticipates reductions to the total amount of unrecognized tax benefits of an additional \$621 within the next twelve months due to expiring statutes of limitations.

The Company recognizes penalties and interest accrued related to unrecognized tax benefits in income tax expense. As of September 30, 2013, the Company had no material accrued interest and penalties related to uncertain tax positions.

The Company files income tax returns in the U.S. federal jurisdiction, various states and foreign jurisdictions. The Company is no longer subject to examinations by tax authorities before the year 2007.

12. Earnings per Share

The Company has unvested shares of restricted stock and restricted stock units outstanding that are considered participating securities and, therefore, computes basic and diluted earnings per share under the two-class method. Basic earnings per share for the periods are based upon the weighted average number of shares of common stock outstanding during the periods. Diluted earnings per share include the effect of certain stock options.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
Net income	\$170,290	\$86,964	\$439,453	\$290,278
Less:				
Net income attributable to participating securities	(587) (452) (1,691) (1,682
Net income attributable to common shareholders	\$169,703	\$86,512	\$437,762	\$288,596

Table of Contents

WESTLAKE CHEMICAL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

(Unaudited)

(in thousands of dollars, except share amounts and per share data)

The following table reconciles the denominator for the basic and diluted earnings per share computations shown in the consolidated statements of operations:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
Weighted average common shares—basic	66,628,747	66,311,958	66,628,027	66,240,225
Plus incremental shares from:				
Assumed exercise of options	276,807	344,802	275,352	381,295
Weighted average common shares—diluted	66,905,554	66,656,760	66,903,379	66,621,520
Earnings per share:				
Basic	\$2.55	\$1.30	\$6.57	\$4.36
Diluted	\$2.54	\$1.30	\$6.54	\$4.33

Excluded from the computation of diluted earnings per share are options to purchase 68,662 and 168,362 shares of common stock for the three months ended September 30, 2013 and 2012, respectively, and 57,759 and 293,062 shares of common stock for the nine months ended September 30, 2013 and 2012, respectively. These options were outstanding during the periods reported but were excluded because the effect of including them would have been antidilutive.

13. Pension and Post-Retirement Benefit Costs

Components of net periodic benefit cost are as follows:

	Three Months Ended September 30,				Nine Months Ended September 30,			
	Pension		Post-retirement Healthcare		Pension		Post-retirement Healthcare	
	2013	2012	2013	2012	2013	2012	2013	2012
Service cost	\$275	\$250	\$2	\$2	\$815	\$754	\$7	\$7
Interest cost	515	645	147	185	1,531	1,936	442	555
Expected return on plan assets	(713)	(623)	—	—	(2,140)	(1,867)	—	—
Amortization of prior service cost	74	74	21	21	223	223	63	63
Amortization of net loss	510	445	90	44	1,449	1,329	269	132
Net periodic benefit cost	\$661	\$791	\$260	\$252	\$1,878	\$2,375	\$781	\$757

The Company contributed \$776 and \$2,283 to the Salaried pension plan in the first nine months of 2013 and 2012, respectively, and contributed \$640 and \$1,542 to the Wage pension plan in the first nine months of 2013 and 2012, respectively. The Company expects to make additional contributions of \$388 to the Salaried pension plan and \$290 to the Wage pension plan during the fiscal year ending December 31, 2013.

14. Accumulated Other Comprehensive Loss

Changes in accumulated other comprehensive income (loss) by component for the nine months ended September 30, 2013 were as follows:

	Benefits Liability, Net of Tax	Cumulative Foreign Currency Exchange	Net Unrealized Holding Gains on Investments, Net of Tax	Total
Balances at December 31, 2012	\$(16,351)	\$5,511	\$—	\$(10,840)
Other comprehensive (loss) income before reclassifications	(601)	(844)	131	(1,314)
Amounts reclassified from accumulated other comprehensive loss	1,233	—	—	1,233
Net other comprehensive income (loss) for the period	632	(844)	131	(81)
Balances at September 30, 2013	\$(15,719)	\$4,667	\$131	\$(10,921)

The following table provides the details of the amounts reclassified from accumulated other comprehensive income (loss) into net income in the consolidated statements of operations for the three and nine months ended September 30, 2013:

Details about Accumulated Other Comprehensive Income (Loss) Components	Location of Reclassification (Income (Expense)) in Consolidated Statements of Operations	Three Months Ended September 30, 2013	Nine Months Ended September 30, 2013
Amortization of pension and other post-retirement items			
Prior service costs	(1)	\$(95)	\$(286)
Net loss	(1)	(600)	(1,718)
		(695)	(2,004)
	Provision for income taxes	267	771
Total reclassifications for the period		\$(428)	\$(1,233)

These accumulated other comprehensive loss components are included in the computation of net periodic benefit (1)cost. For additional information, please read Note 8 (Employee Benefits) to the financial statements included in the 2012 Form 10-K.

15. Acquisitions

On May 1, 2013, the Company acquired assets comprising CertainTeed Corporation's Pipe and Foundation Group ("PFG") business and accounted for the asset acquisition as a business combination. The PFG acquisition includes the PVC pipe, fittings, profiles and foundation business and associated facilities in Lodi, California and McPherson, Kansas with production capacity of approximately 150 million pounds per year. The Company also acquired technologies and intellectual property for the production of a number of specialized products, including Certa-Lok® restrained joint pipe and Yelomine™ branded products for a variety of end-market applications. The Company's management believes that this acquisition will enhance the Company's building products portfolio by adding new specialty product lines and supporting technology.

The closing date purchase price of \$178,309 was paid with available cash on hand. This amount is subject to a post-closing working capital adjustment. The acquisition is being accounted for under the acquisition method of

accounting. The assets acquired and liabilities assumed and the results of operations of this acquired business are included in the Vinyls segment. The revenue and earnings of the PFG business included in the consolidated statement of operations since the acquisition date have not been presented separately as they are not material to the Company's consolidated statements of operations for the three and nine months ended September 30, 2013. The pro forma impact of this business combination has not been presented as it is not material to the Company's consolidated statements of operations for the three and nine months ended September 30, 2013 and 2012.

For the nine months ended September 30, 2013, the Company recognized \$1,124 of acquisition-related costs. These costs are included in selling, general and administrative expenses in the consolidated statement of operations for the nine months ended September 30, 2013.

Table of Contents

WESTLAKE CHEMICAL CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued
 (Unaudited)
 (in thousands of dollars, except share amounts and per share data)

The following table summarizes the consideration transferred and the estimated fair value of identified assets acquired and liabilities assumed at the date of acquisition. The final determination of fair value for certain assets and liabilities will be completed as soon as the information necessary to complete the analysis is obtained. These amounts will be finalized as soon as possible, but no later than one year from the acquisition date.

Fair value of consideration transferred:

Cash	\$ 178,309
Preliminary allocation of consideration transferred to net assets acquired:	
Accounts receivable ⁽¹⁾	\$ 17,695
Inventories	25,948
Property, plant and equipment	31,261
Intangible assets:	
Customer relationships (weighted average life of 15 years)	57,600
Trademarks	5,200
Developed technology (weighted average life of 15 years)	18,900
Other intangibles (weighted average life of two years)	300
Current liabilities	(10,595)
Other liabilities	(26)
Total identifiable net assets	146,283
Goodwill ⁽²⁾	32,026
Consideration transferred	\$ 178,309

(1) The fair value of accounts receivable acquired is \$17,695, with the gross contractual amount being \$17,772. The Company expects \$77 to be uncollectible.

The goodwill recognized is primarily attributable to synergies from the Company's vinyls integration strategy expected to arise from the Company's PFG acquisition, as well as intangible assets that do not qualify for separate recognition. The goodwill is expected to be deductible for income tax purposes. The Company has not yet completed the process of assigning the goodwill to its reporting units.

Supplemental Noncash Investing Cash Flow Information

In conjunction with the acquisition, liabilities assumed consist of the following:

Fair value of assets acquired	\$ 188,930
Cash paid	(178,309)
Liabilities assumed	\$ 10,621

16. Commitments and Contingencies

The Company is subject to environmental laws and regulations that can impose civil and criminal sanctions and that may require it to mitigate the effects of contamination caused by the release or disposal of hazardous substances into the environment. Under one law, an owner or operator of property may be held strictly liable for remediating contamination without regard to whether that person caused the contamination, and without regard to whether the practices that resulted in the contamination were legal at the time they occurred. Because several of the Company's production sites have a history of industrial use, it is impossible to predict precisely what effect these legal requirements will have on the Company.

Contract Disputes with Goodrich and PolyOne. In connection with the 1990 and 1997 acquisitions of the Goodrich Corporation ("Goodrich") chemical manufacturing complex in Calvert City, Kentucky, Goodrich agreed to indemnify the Company for any liabilities related to preexisting contamination at the complex. For its part, the Company agreed

to indemnify Goodrich for post-closing contamination caused by the Company's operations. The soil and groundwater at the complex, which does not include the Company's nearby PVC facility, had been extensively contaminated under Goodrich's operations. In 1993,

Table of Contents

WESTLAKE CHEMICAL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

(Unaudited)

(in thousands of dollars, except share amounts and per share data)

Goodrich spun off the predecessor of PolyOne Corporation ("PolyOne"), and that predecessor assumed Goodrich's indemnification obligations relating to preexisting contamination.

In 2003, litigation arose among the Company, Goodrich and PolyOne with respect to the allocation of the cost of remediating contamination at the site. The parties settled this litigation in December 2007 and the case was dismissed. In the settlement the parties agreed that, among other things: (1) PolyOne would pay 100% of the costs (with specified exceptions), net of recoveries or credits from third parties, incurred with respect to environmental issues at the Calvert City site from August 1, 2007 forward; (2) either the Company or PolyOne might, from time to time in the future (but not more than once every five years), institute an arbitration proceeding to adjust that percentage; and (3) the Company and PolyOne would negotiate a new environmental remediation utilities and services agreement to cover the Company's provision to or on behalf of PolyOne of certain environmental remediation services at the site. The current environmental remediation activities at the Calvert City complex do not have a specified termination date but are expected to last for the foreseeable future. The costs incurred by the Company that have been invoiced to PolyOne to provide the environmental remediation services were \$2,687 in 2012. By letter dated March 16, 2010, PolyOne notified the Company that it was initiating an arbitration proceeding under the settlement agreement. In this proceeding, PolyOne seeks to readjust the percentage allocation of costs and to recover approximately \$1,400 from the Company in reimbursement of previously paid remediation costs. The arbitration is currently stayed.

Administrative Proceedings. There are several administrative proceedings in Kentucky involving the Company, Goodrich and PolyOne related to the same manufacturing complex in Calvert City. In 2003, the Kentucky Environmental and Public Protection Cabinet (the "Cabinet") re-issued Goodrich's Resource Conservation and Recovery Act ("RCRA") permit which requires Goodrich to remediate contamination at the Calvert City manufacturing complex. Both Goodrich and PolyOne challenged various terms of the permit in an attempt to shift Goodrich's clean-up obligations under the permit to the Company. The Company intervened in the proceedings. The Cabinet has suspended all corrective action under the RCRA permit in deference to a remedial investigation and feasibility study ("RIFS") being conducted pursuant to an Administrative Settlement Agreement ("AOC"), which became effective on December 9, 2009. See "Change in Regulatory Regime" below. The proceedings have been postponed. Periodic status conferences will be held to evaluate whether additional proceedings will be required.

Change in Regulatory Regime. In May 2009, the Cabinet sent a letter to the U.S. Environmental Protection Agency ("EPA") requesting the EPA's assistance in addressing contamination at the Calvert City site under the U.S. Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"). In its response to the Cabinet also in May 2009, the EPA stated that it concurred with the Cabinet's request and would incorporate work previously conducted under the Cabinet's RCRA authority into the EPA's cleanup efforts under CERCLA. Since 1983, the EPA has been addressing contamination at an abandoned landfill adjacent to the Company's plant which had been operated by Goodrich and which was being remediated pursuant to CERCLA. During the past two years, the EPA has directed Goodrich and PolyOne to conduct additional investigation activities at the landfill and at the Company's plant. In June 2009, the EPA notified the Company that the Company may have potential liability under section 107(a) of CERCLA at its plant site. Liability under section 107(a) of CERCLA is strict and joint and several. The EPA also identified Goodrich and PolyOne, among others, as potentially responsible parties at the plant site. The Company negotiated, in conjunction with the other potentially responsible parties, the AOC and an order to conduct the RIFS. The parties submitted and received EPA approval for a RIFS work plan to implement the AOC. On July 12, 2013, the parties submitted separate draft RIFS reports to the EPA.

Monetary Relief. Except as noted above with respect to the settlement of the contract litigation among the Company, Goodrich and PolyOne, none of the court, the Cabinet nor the EPA has established any allocation of the costs of remediation among the various parties that are involved in the judicial and administrative proceedings discussed above. At this time, the Company is not able to estimate the loss or reasonable possible loss, if any, on the Company's financial statements that could result from the resolution of these proceedings. Any cash expenditures that the

Company might incur in the future with respect to the remediation of contamination at the complex would likely be spread out over an extended period. As a result, the Company believes it is unlikely that any remediation costs allocable to it will be material in terms of expenditures made in any individual reporting period.

In addition to the matters described above, the Company is involved in various routine legal proceedings incidental to the conduct of its business. The Company does not believe that any of these routine legal proceedings will have a material adverse effect on its financial condition, results of operations or cash flows.

20. Guarantor Disclosures

The Company's payment obligations under the 3.60% senior notes due 2022 are fully and unconditionally guaranteed by each of its current and future domestic subsidiaries that guarantee other debt of the Company or of another guarantor of the 3.60% senior notes due 2022 in excess of \$5,000 (the "Guarantor Subsidiaries"). Each Guarantor Subsidiary is 100% owned by Westlake Chemical Corporation. These guarantees are the joint and several obligations of the Guarantor Subsidiaries. The following unaudited condensed consolidating financial information presents the financial condition, results of operations and cash flows of Westlake Chemical Corporation, the Guarantor Subsidiaries and the remaining subsidiaries that do not guarantee the 3.60% senior notes due 2022 (the "Non-Guarantor Subsidiaries"), together with consolidating adjustments necessary to present the Company's results on a consolidated basis.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This discussion and analysis should be read in conjunction with information contained in the accompanying unaudited consolidated interim financial statements of Westlake Chemical Corporation and the notes thereto and the consolidated financial statements and notes thereto of Westlake Chemical Corporation included in Westlake Chemical Corporation's Annual Report on Form 10-K for the fiscal year ended December 31, 2012 (the "2012 Form 10-K"). The following discussion contains forward-looking statements. Please read "Forward-Looking Statements" for a discussion of limitations inherent in such statements.

We are a vertically integrated manufacturer and marketer of petrochemicals, polymers and fabricated building products. Our two principal business segments are Olefins and Vinyls. We use the majority of our internally-produced basic chemicals to produce higher value-added chemicals and building products.

Since 2009 and continuing through the third quarter of 2013, a cost advantage for natural gas liquids-based ethylene producers over naphtha-based ethylene producers has allowed a strong export market for ethylene derivatives and higher margins for North American chemical producers, including Westlake. Increased global demand for polyethylene in recent years in particular has resulted in improved operating margins and cash flow for our Olefins segment. However, some olefins industry consultants predict that a significant increase in worldwide ethylene and ethylene derivative capacity may occur within the next decade, with the largest increases in Asia and North America. As a result, our Olefins segment operating margins may be negatively impacted.

Continued weakness in the U.S. construction markets and budgetary constraints in municipal spending have contributed to lower domestic demand for our vinyls products. In addition, increases in feedstock costs, combined with the industry's inability to sufficiently raise domestic prices for polyvinyl chloride ("PVC") resin and building products in order to offset cost increases, affected our Vinyls segment's operating results in 2010 and 2011. However, since late 2010, the PVC industry has experienced an increase in PVC resin export demand, driven largely by more competitive feedstock and energy cost positions in North America. As a consequence, domestic PVC resin industry operating rates have improved since 2010, largely due to higher PVC resin export shipments. However, looking forward, our Vinyls segment operating rates and margins may continue to be negatively impacted by the slow recovery of U.S. construction markets.

The current U.S. economic environment, while slowly improving, continues to be somewhat challenging for our customers. However, we believe our customer base is generally healthy. As we continue to manage our business in this environment, including the slowdown in construction activity, we have taken steps designed to address the changes in demand and margins in our Vinyls segment and its resulting impact on our operations by matching production with sales demand and continuing to operate our plants in an efficient manner. We continue to monitor our cost management programs and discretionary capital spending. The impact of the weak global economic environment has been challenging to our business and, depending on the performance of the global economy in the remainder of 2013 and beyond, could have a negative effect on our financial condition, results of operations or cash flows.

Recent Developments

In August 2008, we announced plans for the construction of a new chlor-alkali plant at our vinyls manufacturing complex in Geismar, Louisiana. We commenced construction of the plant in 2011. Presently, we expect the new chlor-alkali plant to be operational by the end of 2013. The new chlor-alkali plant is designed to produce 350,000 electro chemical units ("ECUs"), or 700 million pounds of chlorine, per annum. The new plant is expected to improve the vertical integration of our vinyls business from chlorine downstream into vinyl chloride monomer ("VCM") and PVC and increase caustic soda sales.

Summary

For the quarter ended September 30, 2013, net income was \$170.3 million, or \$2.54 per diluted share, on net sales of \$1,004.2 million. This represents an increase in net income of \$83.3 million, or \$1.24 per diluted share, compared to the quarter ended September 30, 2012 net income of \$87.0 million, or \$1.30 per diluted share, on net sales of \$821.2 million. Net sales for the third quarter of 2013 increased by \$183.0 million compared to net sales for the third quarter of 2012, mainly attributable to higher sales volumes for styrene and caustic, higher sales prices for most of our major products and sales contributed by our specialty PVC pipe business, which we acquired in May 2013. Income from operations was \$266.6 million for the third quarter of 2013 as compared to \$142.5 million for the third quarter of 2012. Income from operations for the third quarter of 2013 benefited primarily from improved olefins and vinyls integrated product margins, predominantly due to higher sales prices for most of our major products and lower overall feedstock costs as compared to the prior year period.

For the nine months ended September 30, 2013, net income was \$439.5 million, or \$6.54 per diluted share, on net sales of \$2,807.9 million. This represents an increase in net income of \$149.2 million, or \$2.21 per diluted share, from the nine months ended September 30, 2012 net income of \$290.3 million, or \$4.33 per diluted share, on net sales of \$2,770.0 million. Net sales for the nine months ended September 30, 2013 increased marginally by \$37.9 million compared to the prior year period mainly due to higher sales volumes and sales prices for styrene, PVC resin and caustic, higher polyethylene sales prices and sales contributed by our specialty PVC pipe business, mostly offset by lower feedstock, ethylene and ethylene co-products sales volumes. Income from operations was \$695.9 million for the nine months ended September 30, 2013 as compared to \$459.1 million for the nine months ended September 30, 2012. The increase in income from operations was primarily attributable to higher olefins and vinyls integrated product margins, predominantly due to a significant decrease in feedstock costs as average industry ethane prices decreased 40.4% and average industry propane prices decreased 10.1% for the nine months ended September 30, 2013 as compared to the prior year period. The increase in income from operations was partially offset by the lost production and the unabsorbed fixed manufacturing costs and other costs associated with the turnaround and expansion of one of the Lake Charles, Louisiana ethylene units and the specialty PVC pipe business acquisition-related costs, including the effect of selling higher cost inventory recorded at fair value, of \$5.8 million, or \$0.06 per diluted share, after tax.

RESULTS OF OPERATIONS

Third Quarter 2013 Compared with Third Quarter 2012

Net Sales. Net sales increased by \$183.0 million, or 22.3%, to \$1,004.2 million in the third quarter of 2013 from \$821.2 million in the third quarter of 2012, primarily attributable to higher sales volumes for styrene and caustic, higher sales prices for most of our major products and sales contributed by our specialty PVC pipe business. Average sales prices for the third quarter of 2013 increased by 9.7% as compared to the third quarter of 2012. Overall sales volumes increased by 12.6% as compared to the third quarter of 2012.

Gross Profit. Gross profit margin percentage increased to 30.3% for the third quarter of 2013 from 21.0% for the third quarter of 2012, driven mainly by improved olefins and vinyls integrated product margins, primarily attributable to higher sales prices for most of our major products and lower ethane costs, partially offset by higher propane costs. The third quarter 2013 gross profit margin also benefited from higher styrene and caustic sales volumes. Our raw material cost in both segments normally tracks industry prices, which experienced a decrease of 26.3% for ethane and an increase of 15.1% for propane, as compared to the third quarter of 2012. Sales prices increased an average of 9.7% for

the third quarter of 2013 as compared to the third quarter of 2012. The gross profit margin for the third quarter of 2012 was negatively impacted by the unabsorbed fixed manufacturing costs associated with a planned outage of our styrene plant in Lake Charles.

Selling, General and Administrative Expenses. Selling, general and administrative expenses for the third quarter of 2013 of \$37.9 million increased by \$8.2 million as compared to the third quarter of 2012, mainly due to an increase in payroll and related labor costs, including incentive compensation, and an increase in selling expenses associated with the increase in sales.

Table of Contents

Interest Expense. Interest expense decreased by \$8.6 million to \$3.3 million in the third quarter of 2013 from \$11.9 million in the third quarter of 2012 largely as a result of increased capitalized interest on major capital projects as compared to the prior year period. Debt balances remained relatively unchanged from the prior year period.

Other (Expense) Income, Net. Other (expense) income, net was net expense of \$0.3 million in the third quarter of 2013 compared to net income of \$1.2 million in the third quarter of 2012, mainly due to lower investment income and related write-offs and lower interest income in the third quarter of 2013.

Income Taxes. The effective income tax rate was 35.3% for the third quarter of 2013. The effective income tax rate for the third quarter of 2013 was above the U.S. federal statutory rate of 35.0% primarily due to state income taxes, mostly offset by the domestic manufacturing deduction. The effective income tax rate was 30.5% for the third quarter of 2012. The effective income tax rate for the third quarter of 2012 was below the U.S. federal statutory rate of 35.0% primarily due to state tax credits, the domestic manufacturing deduction and a reduction in state income taxes.

Olefins Segment

Net Sales. Net sales increased by \$139.5 million, or 25.8%, to \$679.3 million in the third quarter of 2013 from \$539.8 million in the third quarter of 2012, predominantly due to higher styrene sales volumes and higher sales prices for our major products as compared to the prior year period. Styrene sales volumes for the third quarter of 2012 were negatively impacted by a planned outage of our styrene plant in Lake Charles. Average sales prices for the Olefins segment increased by 11.5% in the third quarter of 2013 as compared to the third quarter of 2012. Average sales volumes for the Olefins segment increased by 14.3% in the third quarter of 2013 as compared to the third quarter of 2012.

Income from Operations. Income from operations increased by \$112.7 million, or 90.5%, to \$237.2 million in the third quarter of 2013 from \$124.5 million in the third quarter of 2012. This increase was mainly attributable to higher olefins integrated product margins as compared to the prior year period, primarily as a result of higher sales prices for most of our major products and significantly lower feedstock costs. In addition, olefins integrated margins benefited from the increased ethylene production at our Lake Charles complex after the completion in the first quarter of 2013 of the expansion project to increase the ethane-based ethylene capacity of one of the ethylene units at that complex. Trading activity in the third quarter of 2013 resulted in a gain of \$4.9 million as compared to a gain of \$0.2 million in the third quarter of 2012. Third quarter 2012 income from operations was negatively impacted by the lost production and unabsorbed fixed manufacturing costs associated with the planned outage of our styrene plant in Lake Charles.

Vinyls Segment

Net Sales. Net sales increased by \$43.4 million, or 15.4%, to \$324.8 million in the third quarter of 2013 from \$281.4 million in the third quarter of 2012. This increase was mainly attributable to higher caustic sales volume, higher PVC resin and caustic sales prices and the sales contributed by our specialty PVC pipe business. Average sales prices for the Vinyls segment increased by 6.2% in the third quarter of 2013 as compared to the third quarter of 2012. Average sales volumes for the Vinyls segment increased by 9.3% in the third quarter of 2013 as compared to the third quarter of 2012.

Income from Operations. Income from operations increased by \$15.5 million, or 64.3%, to \$39.6 million in the third quarter of 2013 from \$24.1 million in the third quarter of 2012. This increase was primarily driven by higher vinyls integrated product margins, largely resulting from higher sales prices for all major products, higher caustic sales volume and improved operating rates as compared to the prior year period.

Nine Months Ended September 30, 2013 Compared with Nine Months Ended September 30, 2012

Net Sales. Net sales increased marginally by \$37.9 million, or 1.4%, to \$2,807.9 million for the nine months ended September 30, 2013 from \$2,770.0 million for the nine months ended September 30, 2012, primarily attributable to higher sales volumes and sales prices for styrene, PVC resin and caustic, higher polyethylene sales prices and sales contributed by our specialty PVC pipe business, mostly offset by lower feedstock, ethylene and ethylene co-products sales volumes. Ethylene and ethylene co-product sales volumes were lower primarily due to the first quarter 2013 turnaround and expansion of one of the Lake Charles ethylene units. Average sales prices for the nine months ended September 30, 2013 increased by 2.1% as compared to the nine months ended September 30, 2012. Overall sales volumes for the nine months ended September 30, 2013 decreased by 0.7% as compared to the nine months ended

September 30, 2012.

Gross Profit. Gross profit margin percentage of 28.7% for the nine months ended September 30, 2013 increased from the 19.7% gross profit margin percentage for the nine months ended September 30, 2012. The improvement in gross profit margin percentage was predominantly due to lower feedstock costs. Our raw material cost in both segments normally tracks industry prices, which experienced a decrease of 40.4% and 10.1% for ethane and propane, respectively, as compared to the nine months

27

Table of Contents

ended September 30, 2012. Sales prices increased an average of 2.1% for the nine months ended September 30, 2013 as compared to the prior year period.

Selling, General and Administrative Expenses. Selling, general and administrative expenses for the nine months ended September 30, 2013 increased by \$22.3 million as compared to the nine months ended September 30, 2012, mainly attributable to an increase in payroll and related labor costs, including incentive compensation, and an increase in the provision for doubtful accounts.

Interest Expense. Interest expense decreased by \$20.8 million to \$14.9 million for the nine months ended September 30, 2013, largely due to increased capitalized interest on major capital projects and lower average interest rates in the first nine months of 2013 as compared to the prior year period. Debt balances remained relatively unchanged from the prior year period.

Other Income, Net. Other income, net decreased by \$0.6 million to \$3.1 million for the nine months ended September 30, 2013 from \$3.7 million for the nine months ended September 30, 2012. The decrease was principally due to lower investment income and related write-offs, lower interest income and higher losses on foreign exchange as compared to the prior year period, mostly offset by the settlement of a claim against a supplier during the period.

Income Taxes. The effective income tax rate was 35.8% for the nine months ended September 30, 2013. The effective income tax rate for the 2013 period was above the U.S. federal statutory rate of 35.0% primarily due to state income taxes, partially offset by the domestic manufacturing deduction. The effective income tax rate was 33.5% for the nine months ended September 30, 2012. The effective income tax rate for the 2012 period was below the U.S. federal statutory rate of 35.0% primarily due to state tax credits and the domestic manufacturing deduction, partially offset by state income taxes.

Olefins Segment

Net Sales. Net sales decreased by \$59.3 million, or 3.0%, to \$1,885.5 million for the nine months ended September 30, 2013 from \$1,944.8 million for the nine months ended September 30, 2012, mainly due to lower feedstock, ethylene and ethylene co-products sales volumes, partially offset by higher sales volumes for styrene and higher sales prices for polyethylene and styrene. Ethylene and ethylene co-product sales volumes were lower primarily due to the first quarter 2013 turnaround and expansion of one of the Lake Charles ethylene units. Average sales prices for the Olefins segment increased by 2.0% for the nine months ended September 30, 2013 as compared to the nine months ended September 30, 2012. Average sales volumes for the Olefins segment decreased by 5.1% for the nine months ended September 30, 2013 as compared to the nine months ended September 30, 2012.

Income from Operations. Income from operations increased by \$176.4 million, or 43.1%, to \$586.0 million for the nine months ended September 30, 2013 from \$409.6 million for the nine months ended September 30, 2012. This increase was mainly attributable to higher olefins integrated product margins as compared to the prior year period. Margins improved primarily as a result of significantly lower feedstock costs. Income from operations for the nine months ended September 30, 2013 was negatively impacted by the lost production and the expensing of \$19.9 million related to unabsorbed fixed manufacturing costs and other costs associated with the turnaround and expansion of one of the Lake Charles ethylene units. Trading activity for the nine months ended September 30, 2013 resulted in a gain of \$9.9 million as compared to a loss of \$0.8 million for the prior year period. Income from operations for the first nine months of 2012 was negatively impacted by the lost production and unabsorbed fixed manufacturing costs associated with the planned outage of our Lake Charles styrene plant.

Vinyls Segment

Net Sales. Net sales increased by \$97.1 million, or 11.8%, to \$922.3 million for the nine months ended September 30, 2013 from \$825.2 million for the nine months ended September 30, 2012. This increase was primarily attributable to higher sales volumes for caustic and PVC resin, higher sales prices for most major products and sales contributed by our specialty PVC pipe business. Sales volumes for the first nine months of 2012 were negatively impacted by the lower operating rates at our Geismar vinyls complex as a result of operational issues related to the unscheduled shut down at the complex. Average sales prices for the Vinyls segment increased by 2.1% for the nine months ended September 30, 2013 as compared to the nine months ended September 30, 2012, while average sales volumes increased by 9.7% for the nine months ended September 30, 2013 as compared to the nine months ended September

30, 2012.

Income from Operations. Income from operations increased by \$68.4 million to \$136.1 million for the nine months ended September 30, 2013 from \$67.7 million for the nine months ended September 30, 2012. This increase was predominantly driven by lower feedstock costs, higher sales volumes for caustic and PVC resin and higher operating rates as compared to the prior year period, partially offset by the specialty PVC pipe business acquisition-related costs, including the effect of selling higher cost inventory recorded at fair value. The Vinyls segment's operating results for the first nine months of 2012 were

28

Table of Contents

negatively impacted by the lost production, lost sales and unabsorbed manufacturing and other costs associated with the unscheduled shut down at our Geismar vinyls complex.

CASH FLOW DISCUSSION FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2013 AND 2012

Cash Flows

Operating Activities

Operating activities provided cash of \$547.5 million in the first nine months of 2013 compared to cash provided of \$492.8 million in the first nine months of 2012. The \$54.7 million increase in cash flows from operating activities was mainly due to an increase in income from operations, partially offset by an increase in the use of cash for working capital purposes and deferred turnaround costs from the turnaround of one of our Lake Charles ethylene units. Income from operations increased by \$236.8 million in the first nine months of 2013 primarily as a result of higher olefins and vinyls integrated product margins as compared to the prior year period. Changes in components of working capital, which we define for purposes of this cash flow discussion as accounts receivable, net, inventories, prepaid expenses and other current assets, less accounts payable and accrued liabilities, used cash of \$46.5 million in the first nine months of 2013, compared to \$115.3 million of cash provided in the first nine months of 2012, an unfavorable change of \$161.8 million. The change was caused by higher accounts receivable balances largely attributable to an increase in average sales volumes during the third quarter of 2013 as compared to the third quarter of 2012 and an increase in inventory during the 2013 period.

Investing Activities

Net cash used for investing activities during the first nine months of 2013 was \$694.6 million as compared to net cash used for investing activities of \$194.6 million in the first nine months of 2012. Capital expenditures were \$498.3 million in the first nine months of 2013 compared to \$235.5 million in the first nine months of 2012. The higher capital expenditures in the first nine months of 2013 were largely attributable to the construction of the new chlor-alkali plant at our Geismar facility (which is expected to be operational by the end of 2013), the feedstock conversion, PVC plant expansion and ethylene furnaces modernization projects at our Calvert City, Kentucky complex and the expansion of one of the ethylene units at our Lake Charles complex. Capital expenditures in the first nine months of 2012 were mainly incurred on the construction of the new Geismar chlor-alkali plant and the expansion of one of the ethylene units at our Lake Charles complex. The remaining capital expenditures in the first nine months of 2013 and 2012 primarily related to projects to improve production capacity or reduce costs and maintenance, safety and environmental projects at our various facilities. We used \$178.3 million of cash to acquire our specialty PVC pipe business. Purchases of securities in the first nine months of 2013 totaled \$232.3 million and were comprised of short-term commercial paper and corporate and U.S. government debt securities. We also received aggregate proceeds of \$239.8 million from the maturities of short-term commercial paper in the first nine months of 2013. The activity during the first nine months of 2012 was primarily related to the proceeds received from the sale of equity securities.

Financing Activities

Net cash used for financing activities during the first nine months of 2013 was \$51.4 million as compared to net cash provided of \$74.3 million in the first nine months of 2012. The activity during the first nine months of 2013 was primarily related to the \$40.2 million payment of cash dividends and \$19.4 million of cash used for the repurchase of shares of our common stock, partially offset by proceeds of \$3.2 million from the exercise of stock options. The activity during the first nine months of 2012 was mainly related to the draw-down of our restricted cash and proceeds from the exercise of stock options, partially offset by the \$22.3 million payment of cash dividends, \$10.8 million of repurchases of shares of our common stock and \$2.2 million of debt issuance costs associated with the issuance of our 3.60% senior notes due 2022.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity and Financing Arrangements

Our principal sources of liquidity are from cash and cash equivalents, investments in current marketable securities, cash from operations, short-term borrowings under our revolving credit facility and our long-term financing.

In October 2012, we announced a project to convert the feedstock for our Calvert City ethylene plant from propane to ethane and the planned increase in ethylene capacity from 450 million pounds annually to 630 million pounds annually. The ethylene expansion and feedstock conversion project is targeted for start-up in the second quarter of 2014. In addition, we announced an expansion of the existing PVC plant in Calvert City, which should allow us to take advantage of the increased ethylene production at our Calvert City complex and to provide additional PVC resin to meet the growing demands of our global customers. The expansion of the Calvert City PVC plant is expected to increase PVC resin capacity by approximately

Table of Contents

200 million pounds annually and is targeted for completion by the second half of 2014. These projects are currently estimated to cost in the range of \$210.0 million to \$240.0 million in the aggregate.

In August 2010, we announced that we intend to proceed with the previously announced plans for the construction of a new chlor-alkali plant at our Geismar facility. The project is currently estimated to cost in the range of \$400.0 million to \$425.0 million and is targeted for start-up in the fourth quarter of 2013.

These capital projects are expected to be funded with cash on hand, cash flow from operations, and, if necessary, borrowings under our revolving credit facility and other external financing. As of September 30, 2013, we had incurred a total cost of approximately \$465.3 million on these capital projects.

In April 2011, we announced an expansion program to increase the ethane-based ethylene capacity of both of the ethylene units at our Lake Charles complex. We completed the expansion of the first ethylene unit in the first quarter of 2013. We are evaluating plans for the expansion of the second ethylene unit at our Lake Charles complex in 2015.

In August 2011, our Board of Directors authorized a stock repurchase program totaling \$100.0 million. As of September 30, 2013, we had repurchased 506,525 shares of our common stock for an aggregate purchase price of approximately \$32.7 million under this program. During the three months ended September 30, 2013, we repurchased 59,700 shares of our common stock for an aggregate purchase price of approximately \$6.1 million under this program.

Purchases under this program may be made either through the open market or in privately negotiated transactions.

Decisions regarding the amount and the timing of purchases under the program will be influenced by our cash on hand, our cash flow from operations, general market conditions and other factors. The program may be discontinued by our Board of Directors at any time.

We believe that our sources of liquidity as described above will be adequate to fund our normal operations and ongoing capital expenditures. Funding of any potential large expansions or any potential acquisitions may depend on our ability to obtain additional financing in the future. We may not be able to access additional liquidity at cost effective interest rates due to the volatility of the commercial credit markets.

Cash, Cash Equivalents and Current Marketable Securities

As of September 30, 2013, our cash, cash equivalents and current marketable securities totaled \$717.2 million. In addition, we have a revolving credit facility available to supplement cash if needed, as described under "Debt" below.

As of September 30, 2013, our long-term debt, including current maturities, totaled \$763.8 million, consisting of \$250.0 million principal amount of 3.60% senior notes due 2022 (less the unamortized discount of \$1.1 million), \$100.0 million of 6 ½% senior notes due 2029, \$250.0 million of 6 ¾% senior notes due 2032, \$89.0 million of 6 ½% senior notes due 2035 (the "6 ½% GO Zone Senior Notes Due 2035"), \$65.0 million of 6 ½% senior notes due 2035 (the "6 ½% IKE Zone Senior Notes Due 2035") (collectively, but excluding the 3.60% senior notes due 2022, the "Senior Notes") and a \$10.9 million loan from the proceeds of tax-exempt waste disposal revenue bonds (supported by an \$11.3 million letter of credit). The 6 ½% senior notes due 2029, the 6 ¾% senior notes due 2032, the 6 ½% GO Zone Senior Notes Due 2035 and the 6 ½% IKE Zone Senior Notes Due 2035 evidence and secure our obligations to the Louisiana Local Government Environmental Facility and Development Authority (the "Authority"), a political subdivision of the State of Louisiana, under four loan agreements relating to the issuance of \$100.0 million, \$250.0 million, \$89.0 million and \$65.0 million aggregate principal amount of the Authority's tax-exempt revenue bonds, respectively. As of September 30, 2013, debt outstanding under the tax-exempt waste disposal revenue bonds bore interest at a variable rate. As of September 30, 2013, we were in compliance with all of the covenants with respect to the 3.60% senior notes due 2022, the Senior Notes, our waste disposal revenue bonds and our revolving credit facility.

Revolving Credit Facility

We have a \$400.0 million senior secured revolving credit facility. The facility includes a provision permitting us to increase the size of the facility, up to four times, in increments of at least \$25.0 million each (up to a maximum of \$150.0 million) under certain circumstances if certain lenders agree to commit to such an increase.

At September 30, 2013, we had no borrowings outstanding under the revolving credit facility. Any borrowings under the facility will bear interest at either LIBOR plus a spread ranging from 1.75% to 2.25% or a base rate plus a spread ranging from 0.25% to 0.75%. The revolving credit facility also requires an unused commitment fee of 0.375% per

annum. All interest rates under the facility are subject to monthly grid pricing adjustments based on prior month average daily loan availability. The revolving credit facility matures on September 16, 2016. As of September 30, 2013, we had outstanding letters of credit totaling \$16.9 million and borrowing availability of \$383.1 million under the revolving credit facility.

30

Table of Contents

Our revolving credit facility requires us to maintain a minimum fixed charge coverage ratio of 1.0:1 for successive 30-day periods after any date on which the borrowing availability under the facility is less than the greater of (1) 12.5% of the commitments under the facility and (2) \$50.0 million, until the borrowing availability exceeds the greater of the amount in clause (1) and the amount in clause (2) for a 30-day period.

In order to make acquisitions or investments, our revolving credit facility provides that (1) we must maintain a minimum borrowing availability of at least the greater of \$100.0 million or 25% of the total bank commitments under our revolving credit facility or (2) we must maintain a minimum borrowing availability of at least the greater of \$70.0 million or 17.5% of the total bank commitments under our revolving credit facility and meet a minimum fixed charge coverage ratio of 1.0:1 under our revolving credit facility. However, we may make specified distributions up to an aggregate of \$25.0 million and specified acquisitions up to an aggregate of \$25.0 million if either we maintain a minimum borrowing availability of at least the greater of \$70.0 million or 17.5% of the total bank commitments under our revolving credit facility or we meet the minimum fixed charge coverage ratio of 1.0:1 under our revolving credit facility. Notwithstanding the foregoing, we may make (1) investments up to \$200.0 million in one or more joint ventures that own feedstock, raw material and ethylene pipeline, storage and fractionating facilities and (2) additional investments up to \$55.0 million in Suzhou Huasu Plastics Co., Ltd. The revolving credit facility contains other customary covenants and events of default that impose significant operating and financial restrictions on us. These restrictions, among other things, provide limitations on the occurrence of additional indebtedness and our ability to create liens, to engage in certain affiliate transactions and to engage in sale-leaseback transactions. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Debt" in the 2012 Form 10-K for more information on the revolving credit facility.

GO Zone and IKE Zone Bonds

As of September 30, 2013, we had drawn all the proceeds from the issuance of the 6 ½% senior notes due 2029, 6 ¾% senior notes due 2032, 6 ½% GO Zone Senior Notes Due 2035 and 6 ½% IKE Zone Senior Notes Due 2035. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Debt" in the 2012 Form 10-K for more information on the 6 ½% senior notes due 2029, the 6 ¾% senior notes due 2032, the 6 ½% GO Zone Senior Notes Due 2035 and the 6 ½% IKE Zone Senior Notes Due 2035. All domestic restricted subsidiaries that guarantee other debt of ours or of another guarantor of the Senior Notes in excess of \$5.0 million are guarantors of these notes.

The indentures governing the Senior Notes contain customary covenants and events of default. Accordingly, these agreements generally impose significant operating and financial restrictions on us. These restrictions, among other things, provide limitations on incurrence of additional indebtedness, the payment of dividends, certain investments and acquisitions and sales of assets. However, the effectiveness of certain of these restrictions is currently suspended because the Senior Notes are currently rated investment grade by at least two nationally recognized credit rating agencies. The most significant of these provisions, if it were currently effective, would restrict us from incurring additional debt, except specified permitted debt (including borrowings under our credit facility), when our fixed charge coverage ratio is below 2.0:1. These limitations are subject to a number of important qualifications and exceptions, including, without limitation, an exception for the payment of our regular quarterly dividend of up to \$0.20 per share (currently \$0.2250 per share). If the restrictions were currently effective, distributions in excess of \$100.0 million would not be allowed unless, after giving pro forma effect to the distribution, our fixed charge coverage ratio is at least 2.0:1 and such payment, together with the aggregate amount of all other distributions after January 13, 2006, is less than the sum of 50% of our consolidated net income for the period from October 1, 2003 to the end of the most recent quarter for which financial statements have been filed, plus 100% of net cash proceeds received after October 1, 2003 as a contribution to our common equity capital or from the issuance or sale of certain securities, plus several other adjustments.

3.60% Senior Notes due 2022

The 3.60% senior notes due 2022 are unsecured and were issued with an original issue discount of \$1.2 million. There is no sinking fund and no scheduled amortization of the 3.60% senior notes due 2022 prior to maturity. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital

Resources—Debt" in the 2012 Form 10-K for more information on the 3.60% senior notes due 2022. All of our domestic subsidiaries that guarantee other indebtedness of ours or of another guarantor of the 3.60% senior notes due 2022 in excess of \$5.0 million are guarantors of the 3.60% senior notes due 2022.

The indenture governing the 3.60% senior notes due 2022 contains customary events of default and covenants that will restrict our and certain of our subsidiaries' ability to (1) incur certain secured indebtedness, (2) engage in certain sale-leaseback transactions and (3) consolidate, merge or transfer all or substantially all of our assets.

Table of Contents

Revenue Bonds

In December 1997, we entered into a loan agreement with a public trust established for public purposes for the benefit of the Parish of Calcasieu, Louisiana. The public trust issued \$10.9 million principal amount of tax-exempt waste disposal revenue bonds in order to finance our construction of waste disposal facilities for an ethylene plant. The waste disposal revenue bonds expire in December 2027 and are subject to redemption and mandatory tender for purchase prior to maturity under certain conditions. Interest on the waste disposal revenue bonds accrues at a rate determined by a remarketing agent and is payable quarterly.

Our ability to make payments on our indebtedness and to fund planned capital expenditures will depend on our ability to generate cash in the future, which is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. Based on our current level of operations, we believe our cash flow from operations, available cash and available borrowings under our revolving credit facility will be adequate to meet our normal operating needs for the foreseeable future.

Off-Balance Sheet Arrangements

None.

FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 provides safe harbor provisions for forward-looking information. Certain of the statements contained in this report are forward-looking statements. All statements, other than statements of historical facts, included in this report that address activities, events or developments that we expect, project, believe or anticipate will or may occur in the future are forward-looking statements. Forward-looking statements can be identified by the use of words such as "believes," "intends," "may," "should," "could," "anticipates," "expected" or comparable terminology, or by discussions of strategies or trends. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we cannot give any assurances that these expectations will prove to be correct. Forward-looking statements relate to matters such as:

- future operating rates, margins, cash flow and demand for our products;
- industry market outlook;
- production capacities;
- our ability to borrow additional funds under our credit facility;
 - our ability to meet our liquidity needs;
- our intended quarterly dividends;
- future capacity additions and expansions in the industry;
- timing, funding and results of the expansion and feedstock conversion programs at our Lake Charles and Calvert City complexes;
- timing, funding and results of the planned new chlor-alkali plant in Geismar;
- health of our customer base;
- pension plan funding requirements and investment policies;
- compliance with present and future environmental regulations and costs associated with environmentally related penalties, capital expenditures, remedial actions and proceedings, including any new laws, regulations or treaties that may come into force to limit or control carbon dioxide and other greenhouse gases emissions or to address other issues of climate change;
- effects of pending legal proceedings; and
- timing of and amount of capital expenditures.

We have based these statements on assumptions and analyses in light of our experience and perception of historical trends, current conditions, expected future developments and other factors we believe were appropriate in the circumstances when the statements were made. Forward-looking statements by their nature involve substantial risks and uncertainties that could significantly impact expected results, and actual future results could differ materially from those described in such statements. These statements are subject to a number of assumptions, risks and uncertainties, including those described in "Risk Factors" in the 2012 Form 10-K and the following:

Table of Contents

• general economic and business conditions;
• the cyclical nature of the chemical industry;
• the availability, cost and volatility of raw materials and energy;
• uncertainties associated with the United States and worldwide economies, including those due to political tensions in the Middle East and elsewhere;
• current and potential governmental regulatory actions in the United States and regulatory actions and political unrest in other countries;
• industry production capacity and operating rates;
• the supply/demand balance for our products;
• competitive products and pricing pressures;
• instability in the credit and financial markets;
• access to capital markets;
• terrorist acts;
• operating interruptions (including leaks, explosions, fires, weather-related incidents, mechanical failure, unscheduled downtime, labor difficulties, transportation interruptions, spills and releases and other environmental risks);
• changes in laws or regulations;
• technological developments;
• our ability to implement our business strategies; and
• creditworthiness of our customers.

Many of these factors are beyond our ability to control or predict. Any of the factors, or a combination of these factors, could materially affect our future results of operations and the ultimate accuracy of the forward-looking statements. These forward-looking statements are not guarantees of our future performance, and our actual results and future developments may differ materially from those projected in the forward-looking statements. Management cautions against putting undue reliance on forward-looking statements or projecting any future results based on such statements or present or prior earnings levels. Every forward-looking statement speaks only as of the date of the particular statement, and we undertake no obligation to publicly update or revise any forward-looking statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Commodity Price Risk

A substantial portion of our products and raw materials are commodities whose prices fluctuate as market supply and demand fundamentals change. Accordingly, product margins and the level of our profitability tend to fluctuate with changes in the business cycle. We try to protect against such instability through various business strategies. Our strategies include ethylene feedstock flexibility and moving downstream into the olefins and vinyls products where pricing is more stable. We use derivative instruments in certain instances to reduce price volatility risk on feedstocks and products. Based on our open derivative positions at September 30, 2013, a hypothetical \$0.10 increase in the price of a gallon of ethane would have increased our income before taxes by \$2.4 million and a hypothetical \$0.10 increase in the price of a pound of ethylene would have decreased our income before taxes by \$3.9 million. Additional information concerning derivative commodity instruments appears in Notes 9 and 10 to the unaudited consolidated financial statements within this Quarterly Report on Form 10-Q.

Interest Rate Risk

We are exposed to interest rate risk with respect to fixed and variable rate debt. At September 30, 2013, we had variable rate debt of \$10.9 million outstanding. All of the debt outstanding under our revolving credit facility (none was outstanding at September 30, 2013) and our loan relating to the tax-exempt waste disposal revenue bonds are at variable rates. We do not currently hedge our variable interest rate debt, but we may do so in the future. The average variable interest rate for our variable rate debt of \$10.9 million as of September 30, 2013 was 0.16%. A hypothetical 100 basis point increase in the average interest rate on our variable rate debt would increase our annual interest expense by approximately \$0.1 million. Also, at September 30, 2013, we had \$754.0 million aggregate principal amount of fixed rate debt. We are subject to the risk of higher interest cost if and when this debt is refinanced. If interest rates are 1% higher at the time of refinancing, our annual interest expense would increase by approximately

\$7.5 million.

Item 4. Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our President and Chief Executive Officer and our Senior Vice President, Chief Financial Officer and Treasurer, of the effectiveness of our disclosure controls and procedures pursuant to Rules 13a-15 or 15d-15 under the Securities Exchange Act of 1934 as of the end of the period covered by this report. Based upon that evaluation, our President and Chief Executive Officer and our Senior Vice President, Chief Financial Officer and Treasurer concluded that our disclosure controls and procedures are effective with respect to (i) the accumulation and communication to our management, including our Chief Executive Officer and our Chief Financial Officer, of information required to be disclosed by us in the reports that we submit under the Exchange Act, and (ii) the recording, processing, summarizing and reporting of such information within the time periods specified in the SEC's rules and forms.

There were no changes in our internal control over financial reporting that occurred during the three months ended September 30, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The 2012 Form 10-K, filed on February 22, 2013, contained a description of various legal proceedings in which we are involved, including environmental proceedings at our facilities in Calvert City. See Note 16 to the unaudited consolidated financial statements within this Quarterly Report on Form 10-Q for a description of certain of those proceedings, which information is incorporated by reference herein.

Item 1A. Risk Factors

For a discussion of risk factors, please read Item 1A, "Risk Factors" in the 2012 Form 10-K and in our Quarterly Report on Form 10-Q for the quarter ended March 31, 2013. There have been no material changes from those risk factors.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information on our purchase of equity securities during the quarter ended September 30, 2013:

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs ⁽¹⁾
July 2013	—	\$—	—	\$ 73,415,000
August 2013	—	\$—	—	\$ 73,415,000
September 2013	59,700	\$102.62	59,700	\$ 67,289,000
	59,700	\$102.62	59,700	

On August 22, 2011, we announced the authorization by our Board of Directors of a \$100.0 million stock repurchase program. As of September 30, 2013, 506,525 shares of common stock had been acquired at an (1) aggregate purchase price of \$32.7 million. Decisions regarding the amount and the timing of purchases under the program will be influenced by our cash on hand, our cash flow from operations, general market conditions and other factors. The program may be discontinued by our Board of Directors at any time.
