Ship Finance International Limited (NYSE: SFL) - Earnings Release

Reports preliminary 3Q 2016 results and quarterly dividend of \$0.45 per share

Hamilton, Bermuda, November 29, 2016. Ship Finance International Limited (“Ship Finance” or the “Company”) today announced its preliminary financial results for the quarter ended September 30, 2016.

Highlights

- Declaration of third quarter dividend of \$0.45 per share
- \$5.5 million in profit share in the quarter
- Successful placement of a \$225 million convertible bond in October
- Continued fleet renewal with an agreement to sell an older VLCC
- Selected key financial data:

Three Months Ended

	Sep 30,	Jun 30,
	2016	2016
Charter revenues ⁽¹⁾	\$149m	\$159m
Adjusted EBITDA ⁽²⁾	\$115m	\$128m
Net income	\$32m	\$39m
Earnings per share	\$0.35	\$0.42

Ole B. Hjertaker, CEO of Ship Finance Management AS, said in a comment: “We are pleased to post yet another positive result for Ship Finance, and have now declared our 51st consecutive quarterly cash dividend. Our diversified backlog now stands at \$3.9 billion with a weighted average charter period of nearly 9 years. While we have not committed to new investments in recent months, we have strengthened our balance sheet through the issuance of a \$225 million convertible bond in October, and are continuously evaluating investment opportunities.”

Dividends and Results for the Quarter Ended September 30, 2016

The Board of Directors has declared a quarterly cash dividend of \$0.45 per share. The dividend will be paid on or around December 29 to shareholders on record as of December 12, and the ex-dividend date on the New York Stock Exchange will be December 8, 2016.

The Company reported total U.S. GAAP operating revenues on a consolidated basis of \$93.5 million, or \$1.00 per share, in the third quarter of 2016. This number excludes \$7.2 million of charter revenues classified as ‘repayment of investment in finance leases’ and \$48.3 million of charter revenues earned by 100% owned assets classified as ‘investment in associate’. Inclusive of those revenues, the total actual revenues were \$149.0 million, or \$1.59 per share. The 50% profit share agreement with Frontline Shipping Limited (“Frontline”) contributed \$5.4 million, or \$0.06 per share, in the third quarter, above the contracted base rates. There was also a \$0.2 million profit share in the third quarter relating to some of our other vessels.

1. Charter revenues include total charter hire from all vessels and rigs, including assets in 100% owned subsidiaries classified as ‘Investment in associates’ and profit share income.
2. Adjusted EBITDA is a non- GAAP measure and includes assets in 100% owned subsidiaries classified as ‘Investment in associates’. For more details please see Appendix 1.

Reported net operating income pursuant to U.S. GAAP for the quarter was \$32.7 million, or \$0.35 per share, and reported net income was \$32.3 million, or \$0.35 per share.

Business Update

As of September 30, 2016, and adjusted for subsequent sales, the fixed-rate charter backlog from the Company's fleet of 73 vessels and rigs was approximately \$3.9 billion, with an average remaining charter term of 4.8 years, or 8.7 years if weighted by charter revenue. Some of our charters include purchase options which, if exercised, may reduce the fixed charter backlog and the average remaining charter term, but will increase capital available for new investments. Additionally, several charters include profit sharing provisions that may increase our operating results.

In July 2016, Ship Finance agreed to amend the terms of the long-term charter agreement with an affiliate of Deep Sea Supply PLC (“DESS”) relating to five offshore support vessels. The previous charter guarantor, a 50/50 owned joint venture between DESS and the Brazilian company BTG Pactual, was replaced by DESS under the amended agreement. The charter rates have been reduced until May 2018, in exchange for extending the original charter period by three years and introducing a 50% profit share on charter revenues earned by the vessels above the reduced base rates. The new agreement effectively increased our charter backlog by approximately \$21 million, while leaving distributable cash flow from the vessels intact.

The 1998-built VLCC Front Vanguard was successfully delivered to its new owners in July 2016 following its announced sale in May 2016. Net sales proceeds were approximately \$24 million, including compensation received from Frontline for the early termination of the charter. The transaction had no material profit and loss effect.

In November 2016, Ship Finance agreed to sell the 1998-built VLCC Front Century, to an unrelated third party, in combination with a termination of the charter. The net sales price for the vessel is approximately \$24.2 million, including compensation from Frontline for the early termination of the charter. Expected delivery to the new owner is in the first quarter of 2017, and the Company does not expect a material book effect. Disposing of older vessels is a part of the Company's strategy of continuously renewing its fleet, and following the sale, Ship Finance will have 12 vessels remaining on charter to Frontline, including 10 VLCCs and two Suezmax crude oil carriers.

The Company also has exposure to the crude oil tanker market through two modern Suezmax tankers trading in a pool with two sister vessels owned by Frontline. The average daily time charter equivalent rate earned by these vessels was approximately \$24,300 during the third quarter. The majority of the vessels trading in this pool have been chartered out until late 2017 with a floor rate plus profit share on some of the vessels. These charters partially mitigated the effect of the softer tanker market in the third quarter.

The crude oil tanker market softened in the third quarter compared to the strong second quarter. The relatively softer market continued into the fourth quarter, but has strengthened again in November. The profit share contribution from the crude carriers on charter to Frontline amounted to approximately \$5.4 million in the third quarter, down from \$14.0 million in the second quarter.

The Company's drilling units generated approximately \$48.3 million in aggregate charter revenues in the third quarter of 2016. Three of our four rigs are chartered out on bareboat charters whereby our customers are responsible for operating costs and maintenance. We are looking for new employment for the jack-up drilling rig Soehanah, which is currently undergoing a comprehensive special periodic survey paid by Apexindo. The 2007-built rig is of standard design and with a maximum water depth of 375 feet. The rig has a very good track record in Indonesia, and is being marketed for new chartering opportunities in the South-East Asia and Middle East regions. While the drilling market is currently very soft, we believe the rig is well positioned for new employment after the completion of the special periodic survey.

The drilling market has experienced a dramatic downturn linked to reduced activity following the decline in the price of crude oil. It is important to note that the Company has always focused on rapidly reducing financial leverage on its drilling rigs and has already paid down more than 50% of the aggregate original loan amounts. The Soehanah is currently debt free.

One of the Company's 1,700 TEU feeder-size container vessels is chartered out on a short term time charter, while another is currently idle and being marketed for hire. Seven Handysize dry bulk carriers are trading in the spot market, and the rates achieved in the third quarter were marginally above operating expense levels. There are indications that market sentiment may be gradually improving for the dry bulk vessels, and the Company intends to continue trading these vessels in the spot market until long term rates improve.

Ship Finance owns a number of other vessels, including container vessels, car carriers, chemical tankers and dry bulk carriers. The majority of our vessels and rigs are chartered out on long term, fixed rate contract that provide the Company with stability in cash flow and earnings, despite fluctuations in the short term charter markets.

Financing and Capital Expenditure

As of September 30, 2016, Ship Finance had approximately \$238 million of available liquidity, including \$63 million in cash and approximately \$175 million freely available under revolving credit facilities.

In addition, the Company had marketable securities of approximately \$116 million, based on prevailing market prices at quarter end. This includes 11 million shares in Frontline and financial investments in senior secured bonds.

Frontline today announced a dividend of \$0.10 per share, payable in December.

In September 2016, Ship Finance announced the issuance of \$225 million senior unsecured convertible notes due 2021 (the "2021 Notes"). The five-year notes bear an interest of 5.75% per annum and have an initial conversion price of approximately \$17.77 per share. The majority of the proceeds from the 2021 Notes were used to repurchase a significant portion of the existing \$350 million convertible notes due 2018 (the "2018 Notes"). The average repurchase price of the 2018 Notes was approximately 108% of par value due to the adjusted strike price of the 2018 Notes, and the net outstanding amount of 2018 Notes has been reduced to approximately \$184 million.

The higher interest rate on the 2021 Notes compared to the 2018 Notes is due to limited dividend protection and a higher conversion price than the 2018 Notes. Based on the Company's current dividend level, the 2021 Notes are therefore potentially significantly less dilutive than the 2018 Notes. The 2021 Notes were issued in October, and the transaction will be reflected in the accounts for the fourth quarter. While the repurchase of the 2018 Notes has reduced the potential for equity dilution, the net book effect of the repurchase in the fourth quarter is expected to be a cost of approximately \$17 million. The net cash proceeds to the Company from the issuance of the 2021 Notes, after the repurchase of the 2018 Notes, was approximately \$40 million.

As of September 30, 2016, the Company had remaining capital expenditure commitments related to two 19,200 TEU container vessels and two 114,000 dwt LR2 product tankers. The two 19,200 TEU container vessels have expected delivery dates in late 2016 and early 2017 and will be financed through a 15-year non-recourse lease agreement, matching the term of the vessels' charters to Mediterranean Shipping Company that will commence upon their respective deliveries. Net remaining capital expenditure is limited to \$15 million per vessel, payable upon the vessels' respective deliveries from the shipyard.

The two 114,000 dwt LR2 product tankers are due for delivery in the second half of 2017, with remaining capital expenditure of approximately \$82 million for the two vessels combined. Both vessels have been chartered out on long term time charters to Phillips 66, with a minimum period of seven years and options for the charterer to extend the period up to 12 years. The Company intends to secure long term financing for the two vessels well before delivery.

The Company is in compliance with all financial covenants and several of our financing arrangements are in subsidiaries with only limited guarantees from Ship Finance. Additionally, there are no loan maturities coming due before the fourth quarter of 2017.

Strategy and Outlook

Management is committed to maintaining the conservative profile of the Company and our strategy is to charter out the majority of our assets on long-term charters to reputable operators in the shipping and offshore markets. Our diversified and extensive charter portfolio with nearly nine years weighted average remaining charter coverage provides the Company with a robust business platform.

Whilst there have been situations where we have renegotiated terms or charters have been terminated, the majority of our clients have performed well during the recent downturn in the shipping and offshore markets, and our profit share agreements continue to generate incremental cash flows for us. The Company is well positioned for further growth and we expect to develop new attractive opportunities going forward. Also, the recent successful transaction in the bond market confirms our strong position in the capital markets.

We believe the combination of a challenging banking market for many players and low asset prices will create significant opportunities for Ship Finance in finding investment opportunities with limited downside on asset values. In this market we could also be prepared to take on more asset exposure in order to gain upside from potential appreciation in asset values.

Accounting Items

Under accounting principles generally accepted in the United States of America (“U.S. GAAP”), subsidiaries owning the drilling units West Hercules, West Taurus and West Linus have been accounted for as ‘investment in associate’ using the ‘equity method’.

All these equity accounted subsidiaries are wholly owned by Ship Finance, but due to the conservative structure of the leases, Ship Finance has not been deemed ‘primary beneficiary’ according to U.S. GAAP. As a result of the accounting treatment, operating revenues, operating expenses and net interest expenses in these subsidiaries are not shown in Ship Finance’s consolidated income statement. Instead, the net contribution from these subsidiaries is recognized as a combination of ‘Interest income from associates and long term investments’ and ‘Results in associate’.

In Ship Finance’s consolidated balance sheet, the net investments are shown as a combination of ‘Investment in associate’ and ‘Amount due from related parties - Long term’. The reason for this treatment is that a part of the investment in these subsidiaries is in the form of intercompany loans. For a further detailed explanation of these features, please consult our ‘Accounting Items’ presentation available as webcast at our website at www.shipfinance.bm.

Forward Looking Statements

This press release contains forward looking statements. These statements are based upon various assumptions, many of which are based, in turn, upon further assumptions, including Ship Finance management's examination of historical operating trends, data contained in the Company's records and other data available from third parties. Although Ship Finance believes that these assumptions were reasonable when made, because assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond its control, Ship Finance cannot give assurance that it will achieve or accomplish these expectations, beliefs or intentions.

Important factors that, in our view, could cause actual results to differ materially from those discussed in the forward looking statements include the strength of world economies, fluctuations in currencies and interest rates, general market conditions including fluctuations in charter hire rates and vessel values, changes in demand in the markets in which we operate, changes in demand resulting from changes in OPEC's petroleum production levels and worldwide oil consumption and storage, developments regarding the technologies relating to oil exploration, changes in market demand in countries which import commodities and finished goods and changes in the amount and location of the production of those commodities and finished goods, increased inspection procedures and more restrictive import and export controls, changes in our operating expenses, including bunker prices, dry docking and insurance costs, performance of our charterers and other counterparties with whom we deal, timely delivery of vessels under construction within the contracted price, changes in governmental rules and regulations or actions taken by regulatory authorities, potential liability from pending or future litigation, general domestic and international political conditions, potential disruption of shipping routes due to accidents or political events, and other important factors described from time to time in the reports filed by the Company with the Securities and Exchange Commission.

(1) Interest income excludes interest income generated from financial investments.

'Adjusted EBITDA' is not a US-GAAP figure. It is defined as aggregate charter hire from all our 100% owned

(2) assets, cash sweep/profit share income and dividends and interest received from financial investments, less vessel operating expenses and general & administrative expenses.
