Review report of independent registered public accounting firm

To the Board of Directors and Shareholders of
Petróleo Brasileiro S.A. - Petrobras

We have reviewed the accompanying condensed consolidated balance sheet of Petróleo Brasileiro S.A. - Petrobras and its subsidiaries as of June 30, 2008, and the related condensed consolidated statements of income, cash flows and changes in shareholders' equity for the six-month periods ended June 30, 2008 and 2007. These condensed consolidated financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with accounting principles generally accepted in the United States.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expressed in Millions of United States Dollars

(except when specifically indicated)

(unaudited)

1. Basis of Financial Statements Preparation

The accompanying unaudited consolidated financial statements of Petróleo Brasileiro S.A. - Petrobras (the Company) have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and the rules and regulations of the Securities and Exchange Commission (SEC) for interim financial statements. Accordingly they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. These unaudited consolidated financial statements and the accompanying notes should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2007 and the notes thereto.

The balance sheet at December 31, 2007 has been derived from the audited consolidated financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

The consolidated financial statements as of June 30, 2008 and for the six-month periods ended June 30, 2008 and 2007, included in this report, are unaudited. However, in management's opinion, such consolidated financial statements reflect all normal recurring adjustments that are necessary for a fair presentation. The results for the interim periods are not necessarily indicative of trends or of results expected for the full year ending December 31, 2008.

The preparation of these financial statements requires the use of estimates and assumptions that reflect the assets, liabilities, revenues and expenses reported in the financial statements, as well as amounts included in the notes thereto.

Pursuant to Rule 436 (c) under the Securities Act of 1933 (the Act), this is not a report and should not be considered a part of any registration statement prepared or certified within the meanings of Sections 7 and 11 of the Act and therefore, the independent accountant's liability under section 11 does not extend to the information included herein.

2. Recently Adopted Accounting Standards

a) FASB Statement N° 157, Fair Value Measurements (SFAS 157)

In September 2006, the FASB issued SFAS 157, which became effective for the Company on January 1, 2008. This standard defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements but would apply to assets and liabilities that are required to be recorded at fair value under other accounting standards.

In February 2008, the FASB issued FASB Staff Position (FSP) FSP 157-2, Effective Date of FASB Statement N° 157 , which became effective for the Company on January 1, 2008. This FSP delays the effective date of SFAS 157, for non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually).

The Company implemented SFAS 157 and FSP 157-2 effective on January 1, 2008 with no material impact due to the implementation, other than additional disclosures.

SFAS 157 and FSP 157-2 require disclosures that categorize assets and liabilities measured at fair value on a recurring basis into one of three different levels depending on the observability of the inputs applied in the measurement. Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Level 2 inputs are observable inputs other than quoted prices included within Level 1 for the asset or liability, either directly or indirectly through market-corroborated inputs. Level 3 inputs are unobservable inputs for the asset or liability reflecting the Company's assumptions about pricing by market participants.

The disclosure requirements of SFAS 157 and FSP 157-2 were applied to the Company's derivative instruments and certain equity and debt securities recognized in accordance with SFAS 115.

The Company's commodities derivatives and marketable and government securities fair values were recognized in accordance with exchanged quoted prices as the balance sheet date for identical assets in active markets, and, therefore, were classified as Level 1.

2. Recently Adopted Accounting Standards (Continued)**a) FASB Statement N° 157, Fair Value Measurements (SFAS 157) (Continued)**

The fair values of Company's forward contracts of US dollars and cross currency swaps were calculated using observable interest rates in JPY, USD and BRL for the full term of the contracts, and, therefore, were classified as Level 2.

The fair value hierarchy for the Company's financial assets and liabilities accounted for at fair value on a recurring basis at June 30, 2008, was:

	As of June 30, 2008			
	Level 1	Level 2	Level 3	Total
Assets				
Marketable securities	2,144	-	-	2,144
Government securities	769	-	-	769
Foreign exchange derivatives	-	24	-	24
Total assets	2,913	24	-	2,937
Liabilities				
Commodity derivatives	67	-	-	67
Total liabilities	67	-	-	67

b) FASB Statement 159 The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159)

In February 2007, the FASB issued SFAS 159, that permits the measurement of certain financial instruments at fair value. Entities may choose to measure eligible items at fair value at specified election dates, reporting unrealized gains and losses on such items at each subsequent reporting period. SFAS 159 is effective for fiscal years beginning after November 15, 2007. SFAS 159 became effective for the Company on January 1, 2008 with no impact to its consolidated financial statements.

3. Derivative Instruments, Hedging and Risk Management Activities

The Company is exposed to a number of market risks arising from its normal course of business. Such market risks principally involve the possibility that changes in interest rates, foreign currency exchange rates or commodity prices will adversely affect the value of the Company's financial assets and liabilities or future cash flows and earnings. The Company maintains a corporate risk management policy that is executed under the direction of the Company's executive officers.

3. Derivative Instruments, Hedging and Risk Management Activities (Continued)

The Company may use derivative and non-derivative instruments to implement its corporate risk management strategy. However, by using derivative instruments, the Company exposes itself to credit and market risk. Credit risk is the failure of a counterparty to perform under the terms of the derivative contract. Market risk is the possible adverse effect on the value of an asset or liability, including financial instruments that results from changes in interest rates, currency exchange rates, or commodity prices. The Company addresses credit risk by restricting the counterparties to such derivative financial instruments to major financial institutions. Market risk is managed by the Company's executive officers. The Company does not hold or issue financial instruments for trading purposes.

a) Foreign currency risk management

The Company's foreign currency risk management strategy may involve the use of derivative instruments to protect against foreign exchange rate volatility which may impact the value of certain of the Company's obligations.

The table below provides information about the Company's foreign exchange derivative contracts:

Foreign Currency		Fair value		
		Notional Amount	June 30, 2008	December 31, 2007

3. Derivative Instruments, Hedging and Risk Management Activities (Continued)**a) Foreign currency risk management (Continued)****Cash flow hedge**

In September, 2006, Petrobras International Finance Company - PifCo entered into cross currency swap under which it swaps principal and interest payments on Yen denominated funding into U.S. dollar amounts. The assessment of hedge effectiveness indicates that the change in fair value of the designated hedging instrument is highly effective.

Average Receive Rate (JPY)	2.15%

b) Commodity price risk management**Petroleum and oil products**

The Company is exposed to commodity price risks as a result of the fluctuation of crude oil and oil product prices. The Company's commodity risk management activities are primarily undertaken through the uses of future contracts traded on stock exchanges; and options and swaps entered into with major financial institutions. The futures contracts provide economic hedges for anticipated crude oil purchases and sales, generally forecasted to occur within a 30 to 360 day period, and reduce the Company's exposure to volatility of such prices.

3. Derivative Instruments, Hedging and Risk Management Activities (Continued)

b) Commodity price risk management (Continued)

The Company's exposure from these contracts is limited to the difference between the contract value and market value on the volumes contracted. Crude oil future contracts are marked-to-market and related gains and losses are recognized in currently period earnings, irrespective of when the physical crude sales occur. For the six-month periods ended June 30, 2008 and 2007, the Company entered into commodity derivative transactions for 64.6% and 46.1%, respectively, of its total import and export trade volumes.

The open positions in the futures market, compared to spot market value, resulted in recognized losses of US\$31 and US\$12 during the six-month periods ended June 30, 2008 and 2007, respectively.

c) Interest rate risk management

The Company's interest rate risk is a function of the Company's long-term debt and to a lesser extent, its short-term debt. The Company's foreign currency floating rate debt is principally subject to fluctuations in LIBOR and the Company's floating rate debt denominated in Reais is principally subject to fluctuations in the Brazilian long-term interest rate (TJLP) as fixed by the National Monetary Counsel. The Company currently does not utilize derivative financial instruments to manage its exposure to fluctuations in interest rates.

a) Ipiranga current status and restructuring of the Petrochemical companies with Braskem

On April 18, 2007, Ultrapar (the Comissioner), having Braskem S.A. and Petróleo Brasileiro S.A. - Petrobras (through a commission agreement) as intervening parties, acquired control of companies comprising Ipiranga Group for the amount of US\$2,694 (R\$5,486 million).

On February 27, 2008, in fulfillment of the Investment Agreement signed on March 18, 2007, Ultrapar transferred an interest of 40% of the shares comprising the share capital of Ipiranga Química S.A. to Petrobras, which disbursed US\$552. The purchase price of the petrochemical assets has been allocated US\$154, net of tax to property, plant and equipment, US\$194 to goodwill and the remaining US\$204 referred to net assets acquired.

On May 14, 2008, Ultrapar effected the transfer of the fuel and lubricants Distribution Assets located in the North, Northeast and Central-West and the asphalt Assets received by Petrobras through a special purpose company called 17 de Maio Participações S.A (17 de Maio).

17 de Maio is a closed-capital corporation and its relevant assets are the asphalt assets, contained within Ipiranga Asfaltos - IASA, and the distribution assets held by a limited company called Alvo Distribuidora de Combustíveis Ltda. Petrobras disbursed the amount of US\$619. This amount has been allocated US\$52, net of tax to property, plant and equipment, US\$229 to goodwill and the remaining US\$338 referred to net assets acquired.

On July 24, 2008, the Administrative Board for Economic Defense (CADE) accepted Petrobras request to revise the Agreement to Preserve Reversibility of Transaction (APRO) so as to no longer impede immediate access to Alvo s accounting and financial information, removing the obligatory 60-day delay to such access.

18. Acquisitions (Continued)

a) Ipiranga current status and restructuring of the Petrochemical companies with Braskem (Continued)

Petrobras has not consolidated the Northern Distribution Assets, in its financial statements as CADE is still reviewing this acquisition and the APRO's agreement signed with CADE restricts the control over such assets, including obtaining formal approval for certain administrative, sales and operational decisions.

The excess of allocation made to property, plant and equipment will be amortized over their remaining useful life.

a.1) Braskem Investment Agreement

On November 30, 2007, an investment agreement was signed between Braskem, Odebrecht, Petrobras, Petroquisa and Norquisa, by which it was agreed that some petrochemical assets held by Petrobras and Petroquisa would be integrated in Braskem in exchange for a participation interest in Braskem. On May 14, 2008, an addendum to the investment agreement was made dividing the exchange transaction into two stages.

The first stage was completed on May 30, 2008, whereby Petrobras and Petroquisa transferred to Braskem the following participation interests: (i) 37.30% of the voting and total capital of Copesul; (ii) 40% of the voting and total capital of IPQ; (iii) 40% of the voting and total capital of IQ; (iv) 40% of the voting and total capital of Petroquímica Paulínia (PPSA), in exchange for 21.9% of the voting capital and 16,3% of the total capital of Braskem. The exchange transaction was based on the fair value of the participation interest exchanged.

The transaction was accounted for in accordance with FASB Statement N° 153 - Exchanges of Non-monetary Assets - An Amendment of APB Opinion No. 29, (SFAS 153) and FASB Statement N° 140 - Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, (SFAS140) based on the fair value of the participation interest received from Braskem.
