PETROBRAS ANNOUNCES FIRST HALF OF 2010 RESULTS

(Rio de Janeiro □ August 24, 2010) Petróleo Brasileiro S.A. - Petrobras today announced its consolidated results stated in U.S. dollars, prepared in accordance with U.S. GAAP.

Consolidated net income attributable to Petrobras reached U.S.\$8,563 million in the first half of 2010.

HIGHLIGHTS

1Q-2010	2Q-2010	2Q-2009		For the first half of	
4,317	4,246		Consolidated net income		
		3,991	attributable to Petrobras	8,563	6,627
2,547	2,587		Total domestic and international		
		2,524	oil and natural gas production		
			(mmbbl/d)	2,568	2,503
8,352	8,228	8,092	Adjusted EBITDA	16,580	13,482

Consolidated net income attributable to Petrobras for the first half of 2010 increased 29.2% compared to the first half of 2009, primarily due to higher export prices and to the recovery of domestic sales volumes, which increased 11.1% compared to the prior-year period.

Capital expenditures amounted to U.S.\$19,387 million in the first half of 2010, a 35.8% increase compared to our investments in the first half of 2009. Most of the capital expenditures in the first half of 2010 were allocated to the expansion of

future oil and gas production capacity, to the petrochemical sector and to the improvement of our refineries.

Our internal cash generation is allowing us to maintain our projected investments and our target financial leverage in accordance with our 2010-2014 Business Plan.

Monthly domestic crude oil production reached a record of 2,033 mbb/d in April 2010.

We announced light crude oil discoveries in the Caratinga field, in the second quarter of 2010. These discoveries are important because they are near producing fields, enabling us to utilize our existing infrastructure, reducing production costs and leading to the fast start-up of production of newly discovered volumes.

In the second quarter of 2010 occurred the operational start-up of production of FPSO Capixaba in the Cachalote field, in the region known as Parque das Baleias. This start-up is an example of the Company's operational flexibility, as the FPSO Capixaba was previously located in the Golfinho field and was quickly adapted to pre-salt production in this new region.

This document may contain forward-looking statements about future events that are not based on historical facts and are not assurances of future results. Such forward-looking statements merely reflect the

Company's current views and estimates of future economic circumstances, industry conditions, company performance and financial results. Such terms as anticipate, believe, expect, forecast, intend, plan, seek, should, along with similar or analogous expressions, are used to identify such forward-looking statements. Readers are cautioned that these statements are only projections and may differ materially from actual future results or events. Readers are referred to the documents filed by the Company with the SEC, specifically the Company's most recent Annual Report on Form 20-F, which identify important risk factors that could cause actual results to differ from those contained in the forward-looking statements, including, among other things, risks relating to general economic and business conditions, including crude oil and other commodity prices, refining margins and prevailing exchange rates, uncertainties inherent in making estimates of our oil and gas reserves including recently discovered oil and gas reserves, international and Brazilian political, economic and social developments, natural disasters and accidents, receipt of governmental approvals and licenses and our ability to obtain financing. All forward-looking statements are qualified in their entirety by this cautionary statement. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.

Dear shareholders and investors,

We are passing through an exceptional time in our history. In the first six months of 2010, we invested a record amount of U.S.\$19,387 million, 35,8% more than the same period last year, primarily allocated to increasing oil and gas production capacity, modernizing and expanding our refineries and reorganizing our interests in the petrochemical sector, particularly in regard to Braskem.

This substantial increase in capital expenditures is a reflection of the number and quality of projects in our investment portfolio, as reflected in the expansion of our strategic business plan. In June, we released the 2010-2014 Business Plan, in which we project investment spending of U.S.\$224 billion, or approximately U.S.\$45 billion per year. In the Plan we have maintained our aggressive production targets, which are based only on existing projects in the portfolio, without taking into account the potential output from the Deed of Onerous Assignment.

The Exploration and Production segment, which commands the largest share of our capital spend, has been strengthened by our recent exploration success and new projects. In April, a new exploratory well confirmed Tupi's light crude potential. In June, the Company announced probable oil reserves in the pre-salt layer in Albacora Leste and new discoveries of light crude oil in the Brava exploratory area of the Marlim field. On July 14, we began pre-salt production in the Baleia Franca field, in Espírito Santo, less than two years after these reserves were discovered. Initial output was around 13,000 barrels per day, and we expect to reach the maximum of 20,000 barrels per day by the end of the year. In the second half of 2010, we will begin the Tupi pilot project with an expected capacity of 100,000 barrels per day.

Despite the Exploration and Production segment's evident importance and potential, I must emphasize that our investments are diversified and aimed at integrating our various operations. Petrobras is an energy company primarily focused on the oil and natural gas production chain with integrated business segments to ensure a higher market share and to maximize returns.

This is why we have increased our investments in the Refining, Transportation and Marketing segment, especially refining. Following a lengthy period when our expenditures on these assets were limited to maintenance, we accelerated our investments, not only to increase refining capacity, but also to bring production in line with demand, improve product quality and process the country's heavy crude. Brazil's burgeoning oil output, together with economic growth, has made it imperative to build new capacity, whereas the new demand profile for more noble and qualified oil products drives us to invest on the production adequacy.

Another relevant subject of our capital expenditures is related to health, safety and the environment (HSE). In 2009 alone we invested U.S.\$2.5 billion in HSE. Since 2000, when we implemented one of the most comprehensive HSE programs in the world, we have developed around 4,000 projects for improving operational safety and protecting the environment both in Brazil and abroad. Between 2000 and 2009, we reduced our average annual incidence of spills by 96% and trained 400 workers who are entirely dedicated to responding to any type of accident, seven days a week, 24 hours a day. We also acquired a large amount of specialized equipment to cope with spills and other accidents. We currently have a fleet of 30 OSRVs (oil spill response vessels) and more than 300 km of spill boom.

Our financial results for the first half of 2010 are entirely compatible with higher investments and increased profitability, without neglecting social and environmental responsibility. With our dominant position in the Brazilian market, together with our adequate pricing policy that stabilizes prices in the short term, we generated Adjusted EBITDA of U.S.\$16,580 million and a 29.2% increase in the consolidated net income attributable to Petrobras in the first half of 2010. Our future is certainly challenging, but one that is full of opportunities for all our shareholders.

30.3	27.8	37.5	Adjusted EBITDA margin (%)⁽¹⁾	29.0	33.9

(1) Adjusted EBITDA margin equals adjusted EBITDA divided by net operating revenues.

Our adjusted EBITDA and our adjusted EBITDA margin are not U.S. GAAP measures and it is possible that they may not be comparable with indicators with the same name reported by other companies. Adjusted EBITDA should not be considered as a substitute for operational profit or as a better measure of liquidity than operational cash flow, both of which are calculated in accordance with U.S. GAAP. We provide our adjusted EBITDA and adjusted EBITDA margin to give additional information about our capacity to pay debt, carry out investments and cover working capital needs.

The comparison between our results of operations for the first half of 2010 and for the first half of 2009 has been affected by the 22.0% increase in the value of the Real against the U.S. dollar during that period.

Net Income

Consolidated net income attributable to Petrobras increased 29.2% to U.S.\$8,563 million in the first half of 2010 compared to U.S.\$6,627 million in the first half of 2009, primarily due to a 2.6% increase of total domestic and international oil and natural gas production, increased export prices and the recovery of domestic sales volumes, which increased 11.1% in the period. These factors more than offset lower diesel and gasoline domestic prices and higher government participation and import costs, which also resulted from higher crude oil prices.

The increase in operating expenses was generated mainly by: provisions for contingencies related to the IPI (Federal VAT tax) tax credit-premium assignment (U.S.\$255 million); a tax claim against the Company in connection with the charge of ICMS tax (domestic value-added tax) related to the P-36 platform (U.S.\$250 million); ICMS tax debts (U.S.\$61 million); and increased sales expenses.

Financial income (expense), net amounted to a net expense of U.S.\$679 million in the first half of 2010, compared to a net expense of U.S.\$560 million in the first half of 2009, primarily as a result of higher financial expenses related to our debt, partially offset by lower foreign exchange losses on net monetary assets denominated in U.S. dollars, lower losses on derivative instruments, higher capitalized interest income and higher income on financial investments.

Adjusted EBITDA

Adjusted EBITDA increased 23.0% to U.S.\$16,580 million in the first half of 2010, compared to U.S.\$13,482 million in the first half of 2009, primarily due to higher production, higher average export sales and international sales prices and higher domestic sales volumes. These effects were partially offset by higher unit costs related to higher government participation expenses, increased oil product imports, lower domestic sales prices generated by lower diesel (15% decrease) and gasoline (5% decrease) prices in June 2009, in addition to higher operating expenses.

ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We earn income from:

domestic sales, which consist of sales of oil products (such as diesel oil, gasoline, jet fuel, naphtha, fuel oil and liquefied petroleum gas), natural gas, ethanol, electricity and petrochemical products;

export sales, which consist primarily of sales of crude oil and oil products;

international sales (excluding export sales), which consist of sales of crude oil, natural gas and oil products that are purchased, produced and refined abroad; and

other sources, including services, investment income and foreign exchange gains.

Our expenses include:

costs of sales (which are composed of labor expenses, operating costs and purchases of crude oil and oil products); maintaining and repairing property, plant and equipment; depreciation and amortization of fixed assets; depletion of oil fields; and exploration costs;

selling (which include expenses for transportation and distribution of our products), general and administrative expenses; and

interest expense, monetary and foreign exchange losses.

Fluctuations in our financial condition and results of operations are driven by a combination of factors, including:

the volume of crude oil, oil products and natural gas we produce and sell;

changes in international prices of crude oil and oil products, which are denominated in U.S. dollars;

related changes in the domestic prices of crude oil and oil products, which are denominated in Reais;

fluctuations in the Real/U.S. dollar and to a lesser degree, Argentine peso/U.S. dollar exchange rates; and

the amount of production taxes that we are required to pay with respect to our operations.

Virtually all of our revenues and expenses for our Brazilian activities are denominated and payable in Reais. When the Real strengthens relative to the U.S. dollar, as it did in the first half of 2010 (an appreciation of 22.0%) the effect is to generally increase both revenues and expenses when expressed in U.S. dollars. However, the appreciation of the Real against the U.S. dollar affects the line items discussed below in different ways. The following comparison between our results of operations in the first half of 2010 and in the first half of 2009 was impacted by the increase in the value of the Real against the U.S. dollar during that period.

RESULTS OF OPERATIONS FOR THE FIRST HALF OF 2010 COMPARED TO THE FIRST HALF OF 2009

The comparison between our results of operations has been affected by the 22.0% increase in the value of the Real against the U.S. dollar in the first half of 2010 compared to the first half of 2009.

Revenues

Net operating revenues increased 43.7% to U.S.\$57,183 million in the first half of 2010 compared to U.S.\$39,794 million in the first half of 2009. This increase was primarily attributable to higher average sales prices of crude oil and natural gas in the international market and crude oil in the domestic market and to an 11.1% increase in sales volumes in the domestic market. For more information on the domestic increase of sales volume, see the discussion of domestic sales volumes on page 18.

Consolidated sales of products and services increased 43.4% to U.S.\$71,548 million in the first half of 2010 compared to U.S.\$49,900 million in the first half of 2009 due to the increases mentioned above.

Included in sales of products and services are the following amounts that we collected on behalf of federal or state governments:

Value-added, Programa de Formação do Patrimônio do Servidor Público (Civil Servant Savings Programs, or PASEP), Contribuição para o Financiamento da Seguridade Social (Contribution for the Financing of Social Security, or COFINS) and other taxes on sales of products and services and social security contributions. These taxes increased 37.3% to U.S.\$12,416 million in the first half of 2010 compared to U.S.\$9,043 million in the first half of 2009, primarily due to higher prices and higher domestic sales volumes; and

Contribuição de Intervenção no Domínio Econômico (Contribution for Intervention in the Economic Sector, or CIDE), the per-transaction fee due to the Brazilian government, which increased 83.3% to U.S.\$1,949 million in the first half of 2010 compared to U.S.\$1,063 million in the first half of 2009, primarily due to higher prices and higher domestic sales volumes.

Cost of Sales (Excluding Depreciation, Depletion and Amortization)

Cost of sales in the first half of 2010 increased 56.7% to U.S.\$32,713 million compared to U.S.\$20,882 million in the first half of 2009. This increase was principally a result of:

74.9% (U.S.\$4,394 million) increase in the cost of imports due to higher volumes and prices;
137.9% (U.S.\$2,970 million) increase in costs for our international trading activities due to increased offshore operations conducted by our international subsidiary Petrobras International Finance Company (PifCo); and
89.5% (U.S.\$2,601 million) increase in production taxes and charges in the first half of 2010 compared to the first half of 2009. These include royalties, which increased 77.9% (U.S.\$1,144 million); special participation charge (an extraordinary charge payable in the event of high production or profitability from our fields), which increased 103.2% (U.S.\$1,452 million); and costs associated with rental of areas, which increased 15.6% (U.S.\$5 million). The increase in production taxes and charges in the first half of 2010 was due to a 57.9% increase in the reference price for domestic oil, which averaged U.S.\$68.88 in the first half of 2010 compared to U.S.\$43.62 in the first half of 2009, reflecting the Brent price on the international market and higher production taxes of the Marlim Sul and Marlim Leste fields due to higher produced volumes.

Depreciation, Depletion and Amortization

We calculate depreciation, depletion and amortization of most of our exploration and production assets using the units of production method. Depreciation, depletion and amortization expenses increased 42.9% to U.S.\$4,130 million in the first half of 2010 compared to U.S.\$2,891 million in the first half of 2009, due to higher capital expenditures and increased oil and gas production.

Exploration, Including Exploratory Dry Holes

Exploration costs, including costs for exploratory dry holes, increased 11.8% to U.S.\$892 million in the first half of 2010 compared to U.S.\$798 million in the first half of 2009. Excluding the impact of the appreciation of the Real, exploration, including exploratory dry holes decreased 8.4% in the first half of 2010 compared to the first half of 2009 primarily due to the lower write-off of dry wells.

Impairment

In the first half of 2010, we recorded an impairment charge of U.S.\$94 million compared to zero in the first half of 2009. This expense is related to losses on the recoverable amount of our 65% interest in the Breitener thermoelectric power plant in Manaus, Amazonas - Brazil and on the recoverable amount of assets held for sale in the International segment (related to Refining, Transportation and Marketing and Distribution activities) which were written down to their fair value for the period.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased 34.4% to U.S.\$4,200 million in the first half of 2010 compared to U.S.\$3,125 million in the first half of 2009.

Selling expenses increased 44.1% to U.S.\$2,208 million in the first half of 2010 compared to U.S.\$1,532 million in the first half of 2009. This increase was primarily attributable to the impact of the appreciation of

the Real and also to higher sales expenses related to NGL reconverter ships.

General and administrative expenses increased 25.0% to U.S.\$1,992 million in the first half of 2010 compared to U.S.\$1,593 million in the first half of 2009. The increase in general and administrative expenses was primarily attributable to the impact of the appreciation of the Real and also to higher personnel expenses due to increased workforce and pay raises.

Research and Development Expenses

Research and development expenses increased 39.1% to U.S.\$448 million in the first half of 2010 compared to U.S.\$322 million in the first half of 2009. This higher expense was primarily due to increased average sales prices, which are the basis for a fixed 0.5% provision for expenses on research and development investment required by Brazilian law.

Employee Benefit Expense for Non-Active Participants

Employee benefit expense for non-active participants consists of financial costs associated with our expected pension and health care costs of retired employees. Our employee benefit expense for non-active participants increased 24.4% to U.S.\$403 million in the first half of 2010 compared to U.S.\$324 million in the first half of 2009. Excluding the impact of the appreciation of the Real, the employee benefit expense for non-active participants remained relatively constant in the first half of 2010 compared to the first half of 2009.

Other Operating Expenses

Other operating expenses increased 195.3% to U.S.\$1,878 million in the first half of 2010 compared to U.S.\$636 million in the first half of 2009. A breakdown of other operating expenses by segment is included on page 28.

The most significant changes between the first half of 2010 and the first half of 2009 are described below:

648.5% (U.S.\$655 million) increase in expense for losses and contingencies related to legal proceedings, to U.S.\$756 million in the first half of 2010 compared to U.S.\$101 million in the first half of 2009, mainly due to provisions for contingencies related to the IPI (Federal VAT tax) tax credit-premium assignment (U.S.\$255 million); a tax claim against the Company in connection with the charge of ICMS tax (domestic value-added tax) related to the P-36 platform (U.S.\$250 million) and to ICMS tax debts (U.S.\$61 million);

U.S.\$ 342 million increase in losses due to exchange of equity method investments, as a result of the integration of the petrochemical investments in Braskem;

49.5% (U.S.\$96 million) increase in expense for institutional relations and cultural projects, to U.S.\$290 million in the first half of 2010 compared to U.S.\$194 million in the first half of 2009;

43.3% (U.S.\$29 million) increase in expense for health, safety, and environment (HSE), to U.S.\$96 million in the first half of 2010 compared to U.S.\$67 million in the first half of 2009;

These increases were partially offset by:

15.1% (U.S.\$22 million) decrease in operating expense at thermoelectric power plants, to U.S.\$124 million in the first half of 2010 compared to U.S.\$146 million in the first half of 2009;

15.6% (U.S.\$32 million) decrease in expense for marking inventory to market value, to U.S.\$173 million in the first half of 2010 compared to U.S.\$205 million in the first half of 2009; and

29.7% (U.S.\$47 million) decrease in expense for unscheduled stoppages of plant and equipment, to U.S.\$111 million in the first half of 2010 compared to U.S.\$158 million in the first half of 2009.

Equity in Results of Non-Consolidated Companies

Equity in results of non-consolidated companies decreased to a loss of U.S.\$28 million in the first half of 2010 compared to a gain of U.S.\$215 million in the first half of 2009, primarily due to a loss from investments in the petrochemical sector.

Financial Income

We derive financial income from several sources, including interest on cash and cash equivalents. The majority of our cash equivalents are short-term Brazilian government securities, including securities indexed to the U.S. dollar. We also hold U.S. dollar deposits.

Financial income increased 12.4% to U.S.\$924 million in the first half of 2010 compared to U.S.\$822 million in the first half of 2009. This increase was primarily attributable to higher income on financial investments (U.S.\$59 million increase) and higher income on clients (U.S.\$11 million increase). A breakdown of financial income is set forth in Note 11 of our unaudited consolidated financial statements for the six-month period ended June 30, 2010.

Financial Expenses

Financial expenses increased 70.5% to U.S.\$822 million in the first half of 2010 compared to U.S.\$482 million in the first half of 2009. This increase was primarily attributable to increased financial expenses related to our debt (U.S.\$675 million increase), partially offset by lower losses on derivative instruments (U.S.\$262 million decrease)

and by higher capitalized interest income (U.S.\$230 million decrease). A breakdown of financial expense is set forth in Note 11 of our unaudited consolidated financial statements for the six-month period ended June 30, 2010.

Monetary and Exchange Variation

Monetary and exchange variation decreased 13.2% to a loss of U.S.\$781 million in the first half of 2010 compared to a loss of U.S.\$900 million in the first half of 2009. The lower loss in the first half of 2010 compared to the first half of 2009 was primarily due to foreign exchange gains on net monetary assets denominated in U.S. dollars.

Other Taxes

Other taxes, consisting of various taxes on financial transactions, increased 12.2% to U.S.\$166 million in the first half of 2010 compared to U.S.\$148 million in the first half of 2009. Excluding the impact of the appreciation of the Real, other taxes, consisting of various taxes on financial transactions remained relatively constant in the first half of 2010 compared to the first half of 2009.

Other Expenses, Net

Other expenses, net are primarily composed of gains and losses recorded on sales of fixed assets and certain other non-recurring charges. Other expenses, net increased to a gain of U.S.\$97 million in the first half of 2010 compared to a loss of U.S.\$77 million in the first half of 2009, primarily attributable to a U.S.\$147 million provision for losses from the Pasadena Refinery in the first quarter of 2009.

Income Tax (Expense) Benefit

Income before income taxes and non-controlling interest increased 13.7% to U.S.\$11,649 million in the first half of 2010 compared to U.S.\$10,246 million in the first half of 2009. Income tax expense increased 22.0% to U.S.\$3,047 million in the first half of 2010, compared to U.S.\$2,498 million in the first half of 2009, primarily due to the increase of taxable income and to the decrease of tax benefits related to foreign income (U.S.\$83 million decrease), partially offset by the increase of the tax benefit related to the provisioning of interest on shareholders' equity (U.S.\$215 million increase). The reconciliation between the tax calculated based upon statutory tax rates to income tax expense and effective rates is set forth in Note 4 of our unaudited consolidated financial statements for the six-month period ended June 30, 2010.

NET INCOME BY BUSINESS SEGMENT

Petrobras is an integrated energy company, with the greater part of oil and gas production in the Exploration and Production segment being sold or transferred to other business segments of the Company.

EXPLORATION AND PRODUCTION

(U.S.\$ million)		
For the first half of		
7,839		3,597

Our Exploration and Production segment includes our exploration, development and production activities in Brazil, sales and transfers of crude oil in domestic and foreign markets, transfers of natural gas to our Gas and Power segment and sales of oil products produced at natural gas processing plants.

The increased net income from Exploration and Production for the first half of 2010 compared to the first half of 2009 was primarily due to the recovery of the international market of heavy oil in relation to light oil since our production consists primarily of heavy oil and a 2.0% increase in oil and NGL production.

These effects were offset by increased expenses from government participations and losses in legal proceedings related to the levying of the ICMS/RJ tax on the P-36 platform.

The spread between the average domestic oil sale/transfer price and the average Brent price narrowed from US\$10.86/bbl in the first half of 2009 to US\$ 3.92/bbl in the first half of 2010.

					For the first half of	
1Q-2010	2Q-2010	2Q-2009	EXPLORATION AND PRODUCTION BRAZIL			
			Average daily crude oil and gas production			
			Crude oil and NGLs	Brazil (mmbbl/d)		
1,985	2,010	1,964 ⁽¹⁾			1,998	1,958
1,902	1,986	1,914	Natural gas - Brazil	(mmcf/d) ⁽²⁾	1,944	1,884

- (1) Includes production from shale oil reserves.

(2) Does not include LNG. Includes reinjected gas.

(Jan-Jun/2010 x Jan-Jun/2009): Natural decline in crude oil and NGL production from mature fields was offset by increased production from platforms P-51 in the Marlim Sul field, P-53 in the Marlim Leste field, P-54 in the Roncador field, P-34 in the Jubarte field, the Tiro extended well test (EWT) in the SS-11 field, Tupi EWT (FPSO-Cidade de São Vicente), FPSO-Cidade de Niterói in the Marlim Leste field, FPSO-Frade (Frade), FPSO-Cidade de Vitória (Golfinho) and FPSO-Espírito Santo (Parque da Conchas).

Domestic natural gas production increased 3.2% to 1,944 mmcf/d in the first half of 2010 compared to 1,884 mmcf/d in the first half of 2009 due to increased production from our platforms.

	LIFTING COSTS BRAZIL			For the first half of
	1Q-2010	2Q-2010	2Q-2009	
	(U.S. dollars/boe)			

Crude oil and natural gas Brazil

9.40	9.79	8.72	Excluding production taxes ⁽¹⁾	9.60	8.27
------	------	------	---	------	------

23.73	24.50	19.50	Including production taxes ⁽¹⁾	24.12	17.11
-------	-------	-------	---	-------	-------

- (1) Production taxes include royalties, special government participation and rental of areas.

Lifting Costs - Excluding production taxes

(Jan-Jun/2010 x Jan-Jun/2009): Our unit lifting cost in Brazil, excluding production taxes (consisting of royalties, special government participation and rental of areas) increased 16.1% to U.S.\$9.60/bbl in the first half of 2010 compared to U.S.\$8.27/bbl in the first half of 2009, due mainly to the appreciation of the Real.

Lifting Costs - Including production taxes

(Jan-Jun/2010 x Jan-Jun/2009): Our production taxes in Brazil on a per barrel basis increased 64.3% to U.S.\$14.52/bbl in the first half of 2010 compared to U.S.\$8.84/bbl in the first half of 2009. This increase is attributable to a 57.9% increase in the reference price for domestic oil, which averaged U.S.\$68.88 in the first half of 2010 compared to U.S.\$43.62 in the first half of 2009, reflecting the Brent price on the international market and higher production taxes of the Marlim Sul and Marlim Leste fields due to higher produced volumes.

			Net exports (imports) of crude oil and oil products		
126	158	267		142	184
			Other imports and exports (mmbbl/d)		
6	28	10	Imports of other products	17	7
2	0	1	Exports of other products ⁽²⁾	1	1

(1) Includes third-party sales by our international subsidiary, Petrobras International Finance Company (PifCo) and also crude oil export volumes of Refining, Transportation and Marketing and Exploration and Production segments.

(2) Includes exports in progress.

(Jan-Jun/2010 x Jan-Jun/2009): Higher crude oil exports are primarily attributable to higher production and to a decline in the volume of crude oil processed at certain of our refineries due to scheduled stoppages, primarily at the Replan Refinery, in the first half of 2010. Higher oil product imports were due to higher demand for diesel, due to increased agricultural activity in 2010 and public works projects under the *Programa de Aceleração do Crescimento* (Growth Acceleration Program) and higher demand for gasoline due to lower ethanol availability in the market in the beginning of 2010.

			For the first half of

Domestic crude oil as % of total feedstock					
80	81	79	processed	81	79
(1)	As registered by the National Petroleum, Natural Gas and Biofuels Agency (ANP).				

(Jan-Jun/2010 x Jan-Jun/2009): Refinery output in Brazil remained relatively constant in the first half of 2010 compared to the first half of 2009.

			For the first half of	
1Q-2010	2Q-2010	2Q-2009	REFINING COSTS BRAZIL	
			(U.S. dollars/boe)	
3.64	3.93	3.07	Refining costs - Brazil	3.79
				2.83

(Jan-Jun/2010 x Jan-Jun/2009): Excluding the impact of the appreciation of the Real, our refining costs in Brazil increased 9.9% in the first half of 2010 compared to the first half of 2009 due to higher personnel expenses, increased scheduled stoppages and higher maintenance and technical repairs third-party service costs.

GAS AND POWER

(U.S.\$ million)		
For the first half of		
393		188

Our Gas and Power segment consists principally of the purchase, sale, transportation and distribution of natural gas produced in or imported into Brazil. Additionally, this segment includes our participation in domestic natural gas transportation, natural gas distribution, thermoelectric power generation and our two domestic fertilizer plants.

The improved results for our Gas and Power segment for the first half of 2010 compared to the first half of 2009 were due to higher natural gas sales to the non-thermoelectric segment, growth in the industrial sector, increased fixed income from energy auctions, higher energy sales, increased hydroelectric reservoir levels, a reduction in the average energy acquisition cost and increased sales margins, and lower import/transfer costs of natural gas reflecting international prices.

These effects were partially offset by a reduction in exported electricity volumes and increased selling expenses related to our LNG regasification vessels.

1Q-2010	2Q-2010	2Q-2009	IMPORTS OF LPG	For the first half of	
			Imports (mbl/d)		
152	168	158	Imports of LPG	160	142
41					

DISTRIBUTION

(U.S.\$ million)		
For the first half of		
341		252

Our Distribution segment comprises the oil product and ethanol distribution activities conducted by our majority owned subsidiary, Petrobras Distribuidora S.A. BR, in Brazil.

The increased net income from the Distribution segment in the first half of 2010 compared to the same period of 2009 was primarily due to higher sales margins and the upturn in sales volumes, despite the increase in selling, general and administrative expenses. These effects were partially offset by a provision for tax contingencies.

The Distribution segment accounted for 38.7% of the national fuel distribution market in the first half of 2010, versus 38.4% in the first half of 2009.

INTERNATIONAL

(U.S.\$ million)		
For the first half of		
564		(344)

The International segment comprises our activities in countries other than Brazil, which include exploration and production, refining, transportation and marketing, distribution and gas and power.

The improved result in the International segment in the first half of 2010 compared to the first half of 2009 was due to the recovery of international oil prices and higher volumes in Exploration and Production activities, as a result of the operational start-up of production in Akpo, Nigeria, which occurred in March 2009.

This effect was offset by a loss related to Pasadena Refinery in the first half of 2009.

1Q-2010	2Q-2010	2Q-2009	EXPLORATION AND PRODUCTION INTERNATIONAL	For the first half of	
			Average daily crude oil and gas production		
			Crude oil and NGLs International		
142	146	130	(mmbbl/d) ⁽¹⁾	144	122
			Natural gas - International (mmcf/d)		
570	552	606	⁽²⁾	564	588
			Non-consolidated international production ⁽³⁾		
8	8	10		8	11

- (1) Includes production from shale oil reserves.

(2) Does not include LNG. Includes reinjected gas.

(3) Non-consolidated companies in Venezuela.

(Jan-Jun/2010 x Jan-Jun/2009): International consolidated crude oil and NGL production increased 18.0% due to the start-up of production in Akpo, Nigeria, in March 2009.

International consolidated gas production decreased 4.1% as a result of the decline of mature wells and also of operating problems at a natural gas processing plant in Argentina.

			LIFTING COSTS INTERNATIONAL		For the first half of	
1Q-2010	2Q-2010	2Q-2009	(U.S. dollars/boe)			
5.23	5.60	4.93	Crude oil and natural gas	international	5.42	4.68

(Jan-Jun/2010 x Jan-Jun/2009): The 15.8% increase in our international lifting costs was primarily due to higher operating costs as a result of higher contractual prices in Argentina.

			For the first half of		
1Q-2010	2Q-2010	2Q-2009	OUTPUT OF OIL PRODUCTS INTERNATIONAL		
			Refining and marketing operations (mmbbl/d)		
			International		
225	208	196	Output of oil products	216	208
281	281	281	Installed capacity	281	281
73	63	60	Utilization	68	64

(Jan-Jun/2010 x Jan-Jun/2009): Our international refinery output increased 3.8% as a result of the improved operational performance at the Pasadena Refinery in the United States due to improved operating reliability and improved margins in Argentina. Our increased output was partially offset by a scheduled stoppage at the Nansei Sekiyu Refinery in Japan.

1Q-2010	2Q-2010	2Q-2009	REFINING COSTS INTERNATIONAL	For the first half of	
			(U.S. dollars/boe)		
3.32	3.68	5.90	Refining costs - International	3.49	5.27

(Jan-Jun/2010 x Jan-Jun/2009): International refining costs decreased 33.8% in the first half of 2010 compared to the first half of 2009 due to lower maintenance and repair expenses and higher processed crude volumes at the Pasadena Refinery in the United States, which is a result of its improved operating reliability.

1Q-2010	2Q-2010	2Q-2009	SALES VOLUMES	mbbl/d	For the first half of

569	644	466	International sales		607	580
1,318	1,421	1,216	Total international market ⁽²⁾		1,370	1,289
3,507	3,704	3,321	Total		3,606	3,302

(1) Mainly composed of asphalt sales volume, due to higher consumption in infrastructure sectors.

(2) Includes third-party sales by our international subsidiary, Petrobras International Finance Company (PifCo).

Our domestic sales volumes increased 11.1% to 2,236 mbb/d in the first half of 2010 compared to 2,013 mbb/d in the first half of 2009, primarily due to:

- Diesel (increase of 9.2%) The increase in diesel sales was primarily due to the recovery of the Brazilian economy, increased agricultural activity and growing investments in infrastructure sectors.
- Gasoline (increase of 18.8%) The increase in gasoline sale volume was due to higher gasoline consumption in flex-fuel vehicles as a result of low ethanol supply in the beginning of 2010, a decrease in the mandatory percentage of ethanol contained in gasoline sold in Brazil from 25% to 20% in February 2010 and higher retail consumption.
- Natural gas (increase of 17.5%) The increase in natural gas sales was due to higher consumption in the non-thermoelectric market which was generated by a recovery of industrial activity.
- Jet fuel (increase of 15.1%) The increase in jet fuel sales was also due to the recovery of the Brazilian economy which stimulated the domestic aviation market.

Crude oil export volumes increased 7.6% as a result of increased production generated by the start-up of several platforms in the first half of 2010 and a decline in the volume of crude oil processed at certain of our refineries due to scheduled stoppages during the same period.

International sales increased 4.7% mainly due to increased production in Nigeria and to market opportunities in 2010.

LIQUIDITY AND CAPITAL RESOURCES

Our principal uses of funds are for capital expenditures, dividend payments and repayment of debt. Historically, we have met these requirements with internally generated funds, short-term debt, long-term debt, project financing and sale and lease-back transactions. We believe these sources of funds, together with our strong position of cash and cash equivalents, will continue to allow us to meet our current capital requirements.

Financing Strategy

On June 18, 2010, our Board of Directors approved our Business Plan for 2010 through 2014, providing for planned investments totaling U.S.\$224 billion for the period. We will continue our policy of extending the term of our debt maturity profile. We intend to fund our financial needs by issuing equity in addition to raising debt capital through a variety of medium and long-term financing arrangements, including the issuance of bonds in the international capital markets, supplier financing, project financing and bank financing.

Government Regulation

The Brazilian Ministry of Planning, Budget and Management controls the total amount of medium and long-term debt that we and our Brazilian subsidiaries can incur through the annual budget approval process (Plano de Dispêndio Global, or PDG). Before issuing medium and long-term debt, we and our Brazilian subsidiaries must also obtain the approval of the National Treasury Secretariat.

All of our foreign currency denominated debt, as well as the foreign currency denominated debt of our Brazilian subsidiaries, require registration with the Central Bank. The issuance of debt by our international subsidiaries, however, is not subject to registration with the Central Bank or approval by the National Treasury Secretariat. In addition, all issuances of medium and long-term notes and debentures require the approval of our board of directors. Borrowings that exceed the approved budgeted amount for any year also require approval of the Brazilian Senate.

Sources of Funds

Our Cash Flow

On June 30, 2010, we had cash and cash equivalents of U.S.\$12,972 million compared to U.S.\$16,169 million at December 31, 2009.

Operating activities provided net cash flows of U.S.\$13,439 million in the first half of 2010 compared to U.S.\$9,771 million in the first half of 2009. Cash generated by operating activities was mainly affected by net operating revenues, which increased U.S.\$17,389 million during the first half of 2010 compared to the first half of 2009.

Net cash used in investing activities increased to U.S.\$21,631 million in the first half of 2010 compared to U.S.\$14,863 million in the first half of 2009. This increase was due primarily to capital expenditures mainly related to our exploration and production projects in Brazil (U.S.\$2,284 million); and to the modernization of our refineries (U.S.\$2,580 million).

Net cash provided by financing activities was U.S.\$5,451 million in the first half of 2010 compared to net cash provided by financing activities of U.S.\$2,660 million in the first half of 2009. This increase was primarily due to the drawdown in the amount of U.S.\$4,000 million in the first half of 2010 with respect to the financing agreement of U.S.\$10,000 million entered into with the China Development Bank Corporation (CDB), in November 2009, and also to new financings obtained from Banco do Brasil (U.S.\$1,221 million) and the Caixa Econômica Federal (U.S.\$1,110 million) both in June 2010.

Our net debt increased to U.S.\$51,772 million as of June 30, 2010 compared to U.S.\$40,963 million as of December 31, 2009, primarily due to the new borrowings mentioned above.

(U.S.\$ Million)

Reconciliation of Net debt

Total long-term debt	50,477	48,149	28,309
Plus short-term debt	13,911	8,553	6,241
Plus total capital lease obligations	356	430	511
Less cash and cash equivalents	12,972	16,169	4,870
Net debt ⁽¹⁾	51,772	40,963	30,191

(1) Our net debt is not computed in accordance with U.S. GAAP and should not be considered in isolation or as a substitute for total long-term debt calculated in accordance with U.S. GAAP. Our calculation of net debt may not be comparable to the calculation of net debt by other companies. Management believes that net debt is an appropriate supplemental measure that helps investors assess our liquidity and assists management in targeting leverage improvements. Please see the table above for a reconciliation of net debt to total long-term debt.

(2) Petrobras shareholders equity includes adjustments in the amount of U.S.\$1,581 million (loss) on June 30, 2010 and U.S.\$1,646 million (loss) on December 31, 2009, related to Post-retirement benefit reserves adjustments, net of tax - pension and health care costs .

(3) Total capitalization is calculated as Petrobras shareholders equity plus short-term debt, total long-term debt and total capital lease obligations.

Total Short-Term Debt

Our outstanding short-term debt serves mainly to support our working capital and our imports of crude oil and oil products, and is provided almost entirely by international banks. On June 30, 2010, our total short-term debt amounted to U.S.\$13,911 million compared to U.S.\$8,553 million on December 31, 2009.

Total Long-Term Debt

Our outstanding long-term debt consists primarily of securities issued in the international capital markets, debentures issued in the domestic capital markets, amounts outstanding under facilities guaranteed by export credit agencies and multilateral agencies, loans from the BNDES and other financial institutions and project financings. Our total long-term debt amounted to U.S.\$50,477 million on June 30, 2010 compared to U.S.\$48,149 million on December 31, 2009. See Note 10 of our unaudited consolidated financial statements as of June 30, 2010.

Off Balance Sheet Arrangements

As of June 30, 2010, there were no off-balance sheet arrangements that have, or are reasonably likely to have, a material effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Dividends and Interest on Shareholders Equity

a) Related to 2009 results

The General Shareholders Meeting of April 22, 2010 approved dividends relating to the year ended December 31, 2009 in the amount of U.S.\$4,560 million to common and preferred shares, without distinction, restated in accordance with the SELIC rate from December 31, 2009 until the date of payment on April 30, 2010.

Interest on shareholders equity in the total amount of U.S.\$3,912 million is included in these dividends and was distributed as follows:

- On June 24, 2009, in the amount of U.S.\$1,347 million, which was made available to shareholders on November 30, 2009, based on the share position of July 3, 2009.
- On September 21, 2009, in the amount of U.S.\$964 million, which was made available to shareholders on December 21, 2009, based on the share position of September 30, 2009.
- On December 17, 2009, in the amount of U.S.\$1,002 million, which was made available to shareholders on December 29, 2009, based on the share position of December 18, 2009.
- On February 26, 2010, the final portion of interest on shareholders equity, which was made available to shareholders on April 30, 2010, based on the shareholding position as of April 22, 2010, in the amount of U.S.\$599 million, together with the dividends of U.S.\$648 million.

b) Interest on shareholders' equity fiscal year 2010

The Company's Board of Directors approved distributions to shareholders in the form of interest on shareholders equity in advance of the close of our 2010 fiscal year, as contemplated by the Brazilian Corporate Law, as follows:

- On May 14, 2010, in the amount of U.S.\$977 million which was made available to shareholders on May 31, 2010, based on the shareholding position on May 21, 2010.

- On July 16, 2010, in the amount of U.S.\$986 million to be made available not later than September 30, 2010, based on the shareholding position on July 30, 2010.

Advance payments of interest on shareholders' equity will be counted toward the remuneration that is required to be distributed upon the close of 2010 fiscal year. This amount will be updated according to the SELIC rate from the date of payment until the end of the aforementioned fiscal year.

The interest on shareholders' equity is subject to income tax at the rate of 15%, except for shareholders that are declared immune or exempt.

Subsequent Events

Notice of infraction – National Agency for Petroleum, National Gas and Biofuel – ANP

On July 1, 2010, the Company received a notice that a suit had been filed by ANP, in the amount of US\$123 million, for the alleged miscalculations of the special participation tax basis in the Barracuda and Caratinga fields. Petrobras is presenting a defense at the administrative level and the estimated maximum exposure for this infraction is US\$229 million.

Resolution of the Special General Shareholders' Meeting

On August 12, 2010, the Special General Shareholders' Meeting decided on and approved the following matters:

- Ratify the engagement of the specialized company PricewaterhouseCoopers Corporate Finance & Recovery Ltda. (PwC) for preparation of an appraisal report of 4 (four) series on Financial Treasury Bills (LFT) issued by the Federal Government (Report) with maturity on September 7, 2014, March 7, 2015, September 7, 2015 and September 7, 2016 (LFT), to be used optionally by the shareholders of the Company to pay up the shares they subscribe in the environment of the public offering of the first distribution of shares of the Company to be made in observance of Article 62 of the Company's bylaws and in the terms of CVM Instruction 400 of December 29, 2003, as amended;

- Approve the criteria and methodologies for determining the value of the LFTs, as proposed by PwC in the draft of the Report (Appraisal Criteria); and
- Approve the delegation of powers to the Company's Board of Directors to approve the Report, ratifying the definitive amount of each series of LFTs, as presented in the Report, through application of the Appraisal Criteria.

The Company further informs that the Federal Government abstained from voting on the matters subject to this Extraordinary General Meeting. Additionally, the shareholders were informed during the Meeting that the Minority Shareholder's Committee understands the LFT Valuation Criteria submitted for approval at the Meeting to be appropriate.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (Exchange Act) that are not based on historical facts and are not assurances of future results. These forward-looking statements are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.

All forward-looking statements are expressly qualified in their entirety by this cautionary statement, and you should not place reliance on any forward-looking statement contained in this press release. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.
