

RADIANT LOGISTICS, INC
Form 10-K
September 13, 2016

U.S. SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-K

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the fiscal year ended June 30, 2016

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____

Commission File Number 001-35392

RADIANT LOGISTICS, INC.

(Exact name of Registrant as Specified in Its Charter)

Delaware	04-3625550
(State or other jurisdiction	(IRS Employer
of incorporation or organization)	Identification Number)

405 114th Avenue S.E., Third Floor

Bellevue, WA 98004

(Address of Principal Executive Offices)

(425) 943-4599

(Registrant's Telephone Number, Including Area Code)

Securities registered pursuant to Section 12(b) of the Act:

Edgar Filing: RADIANT LOGISTICS, INC - Form 10-K

Title of Each Class Name of Exchange on which Registered
Common Stock, \$.001 Par Value NYSE MKT

Securities registered under Section 12(g) of the Exchange Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if the disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant based on the closing share price of the registrant's common stock on December 31, 2015 as reported on the NYSE MKT was \$117,601,299. Shares of common stock held by each current executive officer and director and by each person who is known by the registrant to own 10% or more of the outstanding common stock have been excluded from this computation in that such persons may be deemed to be affiliates of the registrant. This determination of affiliate status is not a conclusive determination for other purposes.

As of August 31, 2016, 48,874,068 shares of the registrant's common stock were outstanding.

Documents Incorporated by Reference: Portions of the registrant's proxy statement for the 2016 Annual Meeting of Stockholders are incorporated herein by reference in Part III of this Annual Report on Form 10-K. Such proxy statement will be filed with the Securities and Exchange Commission within 120 days of the registrant's fiscal year ended June 30, 2016.

EXPLANATORY NOTE

The Company meets the "accelerated filer" requirements as of the end of its 2016 fiscal year pursuant to Rule 12b-2 of the Securities Exchange Act of 1934, as amended. However, pursuant to Rule 12b-2 and SEC Release No. 33-8876, the Company (as a smaller reporting company transitioning to the larger reporting company system based on its public float as of December 31, 2015) is not required to satisfy the larger reporting company requirements until its first quarterly report on Form 10-Q for the 2017 fiscal year and thus remains eligible to use the scaled disclosure requirements applicable to smaller reporting companies under Item 10 of Regulation S-K under the Securities Act of 1933, as amended, in this Annual Report on Form 10-K.

CAUTIONARY STATEMENT ABOUT FORWARD-LOOKING STATEMENTS

Cautionary Statement for Forward-Looking Statements

This report contains “forward-looking statements” within the meaning set forth in United States securities laws and regulations – that is, statements related to future, not past, events. In this context, forward-looking statements often address our expected future business, financial performance and financial condition, and often contain words such as “anticipate,” “believe,” “estimates,” “expect,” “future,” “intend,” “may,” “plan,” “see,” “seek,” “strategy,” or “will” or the negative of any variation thereon or similar terminology or expressions. These forward-looking statements are not guarantees and are subject to known and unknown risks, uncertainties and assumptions about us that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. We have developed our forward-looking statements based on management’s beliefs and assumptions, which in turn rely upon information available to them at the time such statements were made. Such forward-looking statements reflect our current perspectives on our business, future performance, existing trends and information as of the date of this report. These include, but are not limited to, our beliefs about future revenue and expense levels, growth rates, prospects related to our strategic initiatives and business strategies, along with express or implied assumptions about, among other things: the continued retention of our relationships with our strategic operating partners; the performance of our historic business, as well as the businesses we have recently acquired, at levels consistent with recent trends and reflective of the synergies we believe will be available to us as a result of such acquisitions; our ability to successfully integrate our recently acquired businesses; our ability to locate suitable acquisition opportunities and secure the financing necessary to complete such acquisitions; the occurrence of no adverse developments effecting domestic and international economic, political or competitive conditions within our industry; transportation costs remaining in-line with recent levels and expected trends; our ability to mitigate, to the best extent possible, our dependence on current management and certain of our larger strategic operating partners; the absence of any adverse laws or governmental regulations affecting the transportation industry in general, and our operations in particular; and such other factors that may be identified from time to time in our filings with the Securities and Exchange Commission (“SEC”) and other public announcements including those set forth below under the caption “Risk Factors” in Part 1 Item 1A of this report. All subsequent written and oral forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by the foregoing. Readers are cautioned not to place undue reliance on our forward-looking statements, as they speak only as of the date made. We disclaim any obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

PART I

ITEM 1. BUSINESS

Our Company

Radiant Logistics, Inc. (the “Company”, “we” or “us”), operates as a third party logistics company, providing multi-modal transportation and logistics services primarily in the United States and Canada. We service a large and diversified account base consisting of consumer goods, food and beverage, manufacturing and retail customers which we support from an extensive network of approximately 140 operating locations across North America as well as an integrated international service partner network located in other key markets around the globe. We provide these services through a multi-brand network including 18 Company-owned offices. As a third party logistics company, we have approximately 10,000 asset-based transportation companies, including motor carriers, railroads, airlines and ocean lines in our carrier network. We believe shippers value our services because we are able to objectively arrange the most efficient and cost-effective means, type and provider of transportation service without undue influence caused by the ownership of transportation assets. In addition, our minimal investment in physical assets affords us the opportunity for a higher return on invested capital and net cash flows than our asset-based competitors.

Through our operating locations across North America, we offer domestic and international air and ocean freight forwarding services and freight brokerage services including truckload services, less than truckload (“LTL”) services, and intermodal services, which is the movement of freight in trailers or containers by combination of truck and rail. Our primary business operations involve arranging the shipment, on behalf of our customers, of materials, products, equipment and other goods that are generally larger than shipments handled by integrated carriers of primarily small parcels, such as FedEx, DHL and UPS, including arranging and monitoring all aspects of material flow activity utilizing advanced information technology systems. We also provide other value-added logistics services, including customs brokerage and materials management and distribution solutions to complement our core transportation service offering.

We expect to grow our business organically and by completing acquisitions of other companies with complementary geographic and logistics service offerings. Our organic growth strategy will continue to focus on strengthening existing and expanding new customer relationships leveraging the benefit of our truck brokerage and intermodal service offerings, while continuing our efforts on the organic build-out of our network of strategic operating partner locations. In addition to our focus on organic growth, we continue to search for acquisition candidates that bring critical mass to our geographic scope and/or purchasing power along with complementary service offerings to the current platform. As we continue to grow and scale the business, we believe that we are creating density in our trade lanes that creates opportunities for us to more efficiently source and manage our transportation capacity. In addition, we remain focused on leveraging our back-office infrastructure to drive productivity improvement across the organization.

Competitive Strengths

As a non-asset based third-party logistics provider, we believe that we are well-positioned to provide cost-effective and efficient solutions to address the demand in the marketplace for transportation and logistics services. We believe that the most important competitive factors in our industry are quality of service, including reliability, responsiveness, expertise and convenience, scope of operations, geographic coverage, information technology and price. We believe our primary competitive advantages are as follows:

Non-asset based business model

As a non-asset based provider, we own only a minimal amount of equipment. By not owning the transportation equipment used to transport the freight, which results in relatively minimal fixed operating costs, we are able to leverage our network of locations to offer competitive pricing and flexible solutions to our customers. Moreover, our balanced product offering provides us with revenue streams from multiple sources and enables us to retain customers even as they shift across various modes of transportation. We believe our low capital intensity model allows us to provide low-cost solutions to our customers, operate our business with strong cash flow characteristics, and retain significant flexibility in responding to changing industries and economic conditions.

Offer significant advantages to our strategic operating partners

Our current network is predominantly represented by independent agents, who we also refer to as our “strategic operating partners”, who rely on us for operating authority, technology, sales and marketing support, access to working capital, our carrier and international partner networks, and collective purchasing power. Through this alliance, our strategic operating partners have the ability to focus on the operational and sales support aspects of the business without diverting costs or expertise to the structural aspect of their operations, thus, providing our strategic operating partners with the regional, national and global brand recognition that they would not otherwise be able to achieve acting alone.

Lower-risk operation of network of strategic operating partners

We derive a substantial portion of our revenue pursuant to agreements with our strategic operating partners operating under our various brands. These arrangements afford us with a relatively low risk growth model as each operating partner is responsible for its own sales and costs of operations. Under shared economic arrangements, we are responsible to provide to our strategic operating partners centralized back-office infrastructure, transportation and accounting systems, billing and collection services.

Diverse customer base

We service a large and diversified account base of over 12,000 accounts consisting of consumer goods, food and beverage, manufacturing and retail customers. As of the date of this report, no single customer and no strategic operating partner represented more than 5% of our net revenues, reducing risks associated with any particular industry, geographic or customer concentration.

Information technology resources

A primary component of our business strategy is the continued development of advanced information systems to provide accurate and timely information to our management, strategic operating partners and customers. We believe that the ability to provide accurate real-time information on the status of shipments has and will become increasingly important in our industry. Our customer delivery tools enable connectivity with our customers' and trading partners' systems, which leads to more accurate and up-to-date information on the status of shipments. Our centralized transportation management system (rating, routing, tender and financial settlement process) drives significant efficiency across our network.

Global network of transportation providers

We provide worldwide supply chain services, which include international air and ocean services that complement our domestic service offerings. These offerings include heavyweight and small package air services, providing same day (next flight out) air charters, next day a.m./p.m., second day a.m./p.m. as well as time definite surface transport moves. Our non-asset based business model allows us to use commercial passenger and cargo flights. Thus, we have thousands of daily flight options to choose from, and our pickup and delivery network provides us with zip code to zip code coverage throughout North America.

Sourcing and managing transportation

As we continue to grow and scale the business, we are developing density in our trade lanes which creates opportunities for us to more efficiently source and manage our transportation capacity. With our acquisition of Wheels in 2015, our network now has access to truck brokerage and intermodal capabilities. We believe the benefit of our relative purchasing power along with our recent service line expansion will serve as a competitive differentiator in the marketplace to help us secure new customers and attract additional strategic operating partners to our network.

Value-added Services

In addition to our core transportation service offerings, we also provide value-added supply chain services including customs brokerage, order fulfillment, inventory management and warehouse and distribution services. We believe that our value-added services allow us to leverage our transportation services in order to generate additional revenue and provide additional convenience to our customers.

Industry Overview

The logistics industry is highly fragmented with thousands of companies of various sizes competing in the domestic and international markets. As business requirements for efficient and cost-effective logistics services have increased, so has the importance and complexity of effectively managing freight transportation. Businesses increasingly strive to minimize inventory levels, perform manufacturing and assembly operations in the lowest cost locations, and distribute their products in numerous global markets. As a result, companies are increasingly looking to third-party logistics providers to help them execute their supply chain strategies.

Shippers typically manage their supply chains using some combination of asset and non-asset based service providers. We operate principally as a non-asset based third party logistics provider competing in the three markets of freight forwarding, truck brokerage and intermodal transportation services. According to Armstrong and Associates, the market for third party logistics services in the United States and Canada is estimated at approximately \$158 billion.

Because non-asset based companies select from various transportation options in routing customer shipments, they are often able to serve customers less expensively and with greater flexibility than their asset based competitors, who are typically focused on maximizing the utilization of their own captive fleets of trucks, aircraft and ships rather than the specific needs of the customer. Over the past two decades, the U.S. third party logistics markets has grown at a cumulative annual growth rate of approximately 9%, higher than U.S. trade growth and the average growth in GDP.

We believe there are several factors that are increasing demand for global logistics solutions. These factors include:

- Outsourcing of non-core activities;
- Globalization of trade;
- Increased need for time-definite delivery;
- Consolidation of global logistics providers; and
- Increasing influence of e-business and the Internet.

Our Growth Strategy

Our objective is to provide customers with comprehensive multi-modal transportation and logistics solutions offered by us through our Radiant®, Wheels™, Airgroup®, Adcom®, DBA™ and Service By Air™ brands. Since inception of our business in 2006, we have executed a strategy to expand operations through a combination of organic growth and the strategic acquisition of non-asset based transportation and logistics providers meeting our acquisition criteria. We have successfully completed 15 acquisitions since our initial acquisition of Airgroup in January of 2006, including:

- Automotive Services Group, expanding our services into the automotive industry, in 2007;
- Adcom Express, Inc., (“Adcom”) adding domestic operating partner locations, in 2008;
- DBA Distribution Services, Inc., (“DBA”) adding two Company-owned locations and operating partner locations, in 2011;
- ISLA International Ltd., (“ISLA”) adding a Company-owned location in Laredo, Texas, providing us with bilingual expertise in both north and south bound cross-border transportation and logistics services, in 2011;
- Brunswicks Logistics, Inc., (“ALBS”) adding a strategic Company-owned location in New York-JFK, in 2012;
- Marvir Logistics, Inc., (“Marvir”) adding a Company location in Los Angeles from the conversion of a former operating partner since 2006, in 2012;
- International Freight Systems of Oregon, Inc., (“IFS”) adding a Company location in Portland, Oregon, from the conversion of a former operating partner since 2007, in 2012;
- On Time Express, Inc., (“On Time”) adding three Company-owned locations in Phoenix, Arizona, Dallas, Texas and Atlanta, Georgia, to providing additional line-haul and time critical logistics capabilities, in 2013;
- Phoenix Cartage and Air Freight, LLC, (“PCA”) opening a Company-owned location in Philadelphia, Pennsylvania, in 2014;
- Trans-NET, Inc. (“TNI”) expanding Company-owned operations in Seattle, Washington and providing a gateway of services to the Russian Far East, in 2014;
- Don Cameron and Associates, Inc. (“DCA), a Minnesota based, privately held company that provides a full range of domestic and international transportation and logistics services across North America, in 2014;
- Wheels Group, Inc. (“Wheels”), one of the largest third party logistics providers in Canada, offering truck brokerage services and intermodal service offering throughout the United States and Canada along with value-added warehouse and distribution service offerings in support of U.S. shippers looking to access the Canadian markets, in 2015;
- Service By Air (“SBA”), a privately-held corporation based in New York, adding three Company-owned operating locations and forty strategic operating partner locations across North America, in 2015;

- Highways and Skyways (“Highways”), a privately held Kentucky-based company, adding a Company-owned location near the Cincinnati airport from the conversion of a former SBA operating partner in 2015; and
- Copper Logistics, Inc. (“Copper”), a Minneapolis, Minnesota based privately held company that provides a full range of domestic and international transportation and logistics services across North America, in 2015.

We expect to grow our business organically and by completing acquisitions of other companies with complementary geographical and logistics service offerings. We will continue to make enhancements to our back-office infrastructure, transportation management, and accounting systems to support this growth. Our organic growth strategy will continue to focus on strengthening existing and expanding new customer relationships, while continuing our efforts on the organic build-out of our network of strategic operating partner locations. In addition, we will also be working to drive further productivity improvements enabled through our value-added truck brokerage and customs house brokerage service capabilities.

Our acquisition strategy has been designed to take advantage of shifting market dynamics. The third party logistics industry continues to grow as an increasing number of businesses outsource their logistics functions to more cost effectively manage and extract value from their supply chains. The industry is positioned for further consolidation as it remains highly fragmented, and as customers are demanding the types of sophisticated and broad reaching service offerings that can more effectively be handled by larger more diverse organizations. We believe the highly fragmented composition of the marketplace, the industry participants’ need for capital, and their owners’ desire for liquidity has and will continue to produce a large number of attractive acquisition candidates. For the most part, our target acquisition candidates are generally smaller than those identified as acquisition targets of larger public companies and have limited ability to conduct their own public offerings or obtain financing that will provide them with capital for liquidity or rapid growth. We believe that many of these “smaller” companies are receptive to our acquisition program as a vehicle for liquidation or growth. We intend to be opportunistic in executing our acquisition strategy with a goal of expanding both our domestic and international capabilities.

Our Operating Strategy

Leverage the People, Process and Technology Available through a Central Platform. A key element of our operating strategy is to maximize our operational efficiencies by integrating general and administrative functions into our back-office operations and reducing or eliminating redundant functions and facilities at acquired companies. This is designed to enable us to quickly realize potential savings and synergies, efficiently control and monitor operations of acquired companies, and allow acquired companies to focus on growing their sales and operations.

Develop and Maintain Strong Customer Relationships. We seek to develop and maintain strong interactive customer relationships by anticipating and focusing on our customers’ needs. We emphasize a relationship-oriented approach to business, rather than the transaction or assignment-oriented approach used by many of our competitors. To develop close customer relationships, we and our network of operating partners regularly meet with both existing and prospective customers to help design solutions for, and identify the resources needed to execute, their supply chain strategies. We believe that this relationship-oriented approach results in greater customer satisfaction and reduced business development expense.

Operations

Through our operating locations across North America, we offer domestic and international air and ocean freight forwarding services and freight brokerage services including truckload services, LTL services, and intermodal services, which is the movement of freight in trailers or containers by combination of truck and rail. As a third-party logistics provider, our primary business operations involve arranging the shipment, on behalf of our customers, of materials, products, equipment and other goods that are generally larger than shipments handled by integrated carriers of primarily small parcels, such as FedEx, DHL and UPS, including arranging and monitoring all aspects of material

flow activity utilizing advanced information technology systems. We also provide other value-added logistics services, including customs brokerage, order fulfillment, inventory management and warehousing services to complement our core transportation service offering.

As a non-asset based provider we generally do not own the transportation equipment used to transport the freight. We generally expect to neither own nor operate any material transportation assets and, consequently, arrange for transportation of our customers' shipments via trucking companies, commercial airlines, air cargo carriers, railroads, ocean carriers and other non-asset based third-party providers. We select the carrier for a shipment based on route, departure time, available cargo capacity and cost. We may charter cargo aircraft and/or ocean vessel's from time to time depending upon seasonality, freight volumes and other factors. We generate our gross margin on the difference between what we charge to our customers for the services provided to them, and what we pay to the transportation providers to transport the freight.

We are organized functionally in two geographic operating segments: U.S. and Canada. Our transportation services for both the U.S. and Canada segments can be broadly placed into the categories of freight forwarding and freight brokerage services:

Freight Forwarding. As a freight forwarder, we operate as a non-asset based carrier providing domestic and international air and ocean freight forwarding services. Our freight forwarding operations involve obtaining shipment or material orders from customers, creating and delivering a wide range of logistics solutions to meet customers' specific requirements for transportation and related services, and arranging and monitoring all aspects of material flow activity utilizing advanced information technology systems. We arrange for transportation of our customers' shipments via trucking companies, commercial airlines, air cargo carriers, ocean carriers and other asset and non-asset based third-party providers. We select the carrier for a shipment based on route, departure time, available cargo capacity and cost. We charter cargo aircraft from time to time depending upon seasonality, freight volumes and other factors.

Freight Brokerage. We also provide significant bi-modal brokerage capabilities providing truck load, LTL and intermodal services throughout the United States and Canada. We have a sales presence in approximately 25 key markets across North America which is managed through our centralized service centers in Chicago, Illinois and Toronto, Ontario. We offer temperature-controlled, dry van, intermodal drayage, and flatbed services and specialize in the transport of food and beverage, consumer packaged goods and frozen food and refrigerated products.

As a truck broker, we match the customers' needs with carriers' capacity to provide the most effective combination of service and price. We have contracts with a substantial base of carriers allowing us to meet the varied needs of our customers. As part of the truck brokerage services, we negotiate rates, track shipments in transit and handle claims for freight loss and damage on behalf of our customers. For our LTL service, we employ a point-to-point model that we believe serves as a competitive advantage over the traditional hub and spoke LTL model in terms of faster transit times, lower incidence of damage, and reduced fuel consumption.

As an intermodal marketing company, we arrange for the movement of our customers' freight in containers, trailers and rail boxcars, typically over long distances of 750 miles or more. We contract with railroads to provide transportation for the long-haul portion of the shipment and with local trucking companies, known as "drayage companies," for pickup and delivery. As part of our intermodal services, we negotiate rail and drayage rates, electronically track shipments in transit, consolidate billing and handle claims for freight loss or damage on behalf of our customers.

To complement our core transportation service offerings, we also provide a number of value-added, including customs brokerage and materials management and distribution solutions.

Information Services

The regular enhancement of our information systems and ultimate migration of acquired companies and additional strategic operating partner locations to a common set of back-office and customer facing applications is a key component of our growth strategy. We believe that the ability to provide accurate real-time information on the status of shipments has become increasingly important and that our efforts in this area will result in competitive service advantages. In addition, we believe that centralizing our transportation management system (rating, routing, tender and financial settlement processes) will continue to drive significant productivity improvement across our network.

In our forwarding operations, we use a web-enabled third-party freight forwarding software (Cargowise) that is integrated to our third-party accounting system (SAP). These systems combine to form the foundation of our supply-chain technologies, which we call "Globalvision", and which provides us with a common set of back-office operating, accounting and customer facing applications used across our network. In our brokerage operations, we

utilize Wheels' TEDS system for transportation management and Megatrans for intermodal services. In our warehousing operations, we use Microsoft's Navision. These systems are connected to Epicor for accounting and financial reporting. All brokerage systems are integrated with "Wheelslink", our online customer facing application providing information and reporting across all services. We have and will continue to assess and invest in technologies to maintain a "best-of-breed" technology solution set using a combination of owned and licensed technologies.

Sales and Marketing

We principally market our services through our network of Company-owned and strategic operating partner locations across North America. Each office is staffed with operational employees to provide support for the sales team, develop frequent contact with the customer's traffic department, and maintain customer service. Our current network is predominantly represented by strategic operating partners that rely on us for operating authority, technology, sales and marketing support, access to working capital, our carrier network, and collective purchasing power. Through this strategic alliance, our operating partners have the ability to focus on the operational and sales support aspects of the business without diverting costs or expertise to the structural aspect of their operations,

providing our partners with the regional, national and global brand recognition that they would not otherwise be able to achieve by solely serving their local market. We have no customers or strategic operating partners that separately account for more than 5% of our consolidated net revenues, although we do have a number of significant customers and strategic operating partner locations with volume and stature, the loss of one or more of which could negatively impact our ability to retain and service our customers.

Research and Development

During the past three years, we have not spent any material amount on research and development activities.

Competition and Business Conditions

The logistics business is directly impacted by the volume of domestic and international trade. The volume of such trade is influenced by many factors, including economic and political conditions in the United States and abroad, major work stoppages, exchange controls, currency fluctuations, acts of war, terrorism and other armed conflicts, United States and international laws relating to tariffs, trade restrictions, foreign investments and taxation.

The global transportation and logistics services industry is intensively competitive and is expected to remain so for the foreseeable future. We will compete against asset based and other non-asset based third party logistics companies, consultants, information technology vendors and shippers' transportation departments. This competition is based primarily on rates, quality of service (such as damage-free shipments, on-time delivery and consistent transit times), reliable pickup and delivery and scope of operations. Certain of our competitors have substantially greater financial resources than we do. However, we believe the incremental service offerings enabled through our acquisition strategy (e.g. Wheels' truck brokerage and intermodal capabilities) will serve as a catalyst for margin expansion in our existing business and a competitive differentiator in the marketplace to help us secure new customers and attract additional strategic operating partners to our network.

Business Organization

We have two geographic operating segments: United States and Canada. Further information regarding our geographic operating segments may be found in Part II, Item 7 of this Form 10-K under the subheading "Results of Operations," and in the Notes to Consolidated Financial Statements in Note 13, "Operating and Geographic Segment Information."

Regulation

Interstate and international transportation of freight is highly regulated. Failure to comply with applicable state and federal regulations, or to maintain required permits or licenses, can result in substantial fines or revocation of operating permits or authorities imposed on both transportation intermediaries and their shipper customers. We cannot give assurance as to the degree or cost of future regulations on our business. Some of the regulations affecting our current and prospective operations are described below.

Air freight forwarding operations are subject to regulation, as an indirect air cargo carrier, under the Federal Aviation Act as enforced by the Federal Aviation Administration of the U.S. Department of Transportation, and the Transportation Security Administration of the Department of Homeland Security. While air freight forwarders are exempted from most of the Federal Aviation Act's requirements by the Economic Aviation Regulations, the industry is subject to ongoing regulatory and legislative developments that can impact the economics of the industry by requiring changes to operating practices or influencing the demand for, and the costs of, providing services to customers.

Surface freight forwarding operations are subject to various state and federal statutes, and are regulated by the Federal Motor Carrier Safety Administration of the U.S. Department of Transportation and, to a very limited extent, the Surface Transportation Board. These federal agencies have broad investigatory and regulatory powers, including the power to issue a certificate of authority or license to engage in the business, to approve specified mergers, consolidations and acquisitions, and to regulate the delivery of some types of domestic shipments and operations within particular geographic areas.

The Federal Motor Carrier Safety Administration also has the authority to regulate interstate motor carrier operations, including the regulation of certain rates, charges and accounting systems, to require periodic financial reporting, and to regulate insurance, driver qualifications, operation of motor vehicles, parts and accessories for motor vehicle equipment, hours of service of drivers, inspection, repair, maintenance standards and other safety related matters. The federal laws governing interstate motor carriers have both direct and indirect application to the Company. The breadth and scope of the federal regulations may affect our operations and the motor carriers that are used in the provisioning of the transportation services. In certain locations, state or local permits or registrations may also be required to provide or obtain intrastate motor carrier services.

The Federal Maritime Commission, or FMC, regulates and licenses ocean forwarding operations. Non-vessel operating common carriers are subject to FMC regulation, under the FMC tariff filing and surety bond requirements, and under the Shipping Act of 1984, particularly those terms proscribing rebating practices.

United States customs brokerage operations are subject to the licensing requirements of the Bureau of Customs and Border Protection of the Department of Homeland Security. As we broaden our capabilities to include customs brokerage operations, we will be subject to regulation by the Bureau of Customs and Border Protection. Likewise, any customs brokerage operations must also be licensed in and subject to the regulations of countries into which freight is imported.

Personnel

As of the date of this report, we have 640 employees, of which 607 are full time. None of these employees are covered by a collective bargaining agreement. We have experienced no work stoppages and consider our relations with our employees to be good.

ITEM 1A. RISK FACTORS

RISKS PARTICULAR TO OUR BUSINESS

You should carefully consider the risk factors set forth below as well as the other information contained in or incorporated by reference into this Form 10-K before investing in our common stock. Any of the following risks could materially and adversely affect our business, financial condition or results of operations. In such a case, you may lose all or part of your investment. The risks described below are not the only risks facing us. Additional risks and uncertainties not currently known to us or those we currently view to be immaterial may also materially adversely affect our business, financial condition or results of operations. The future trading price of shares of our common stock will be affected by the performance of our business relative to, among other things, competition, market conditions and general economic and industry conditions.

Risks Related to our Business

We need to maintain and expand our existing strategic operating partner network to increase revenues.

We sell our services through Company-owned locations operating under the Radiant and Wheels brands and through a network of strategic operating partners throughout North America operating under the Airgroup, Adcom, DBA and Service by Air brands. For the years ended June 30, 2016 and 2015, approximately 59% and 63% of our consolidated net revenues were derived through our strategic operating partners. We believe our strategic operating partners will remain critical to our success for the foreseeable future. Although the terms of our strategic operating partner agreements vary widely, they generally cover the manner and amount of payments, the services to be performed, the length of the contract, and provide us with certain protections such as partner-funded reserves and indemnification obligations, and in certain instances include a personal guaranty of the independent owner. Additionally, certain of our strategic operating partner agreements may impose restrictions on us, including our ability to provide services in certain territories or to certain customers and our ability to hire employees of our strategic operating partners. Certain of our strategic operating partner agreements are for defined terms, while others are subject to “evergreen” terms, or contain automatic renewal provisions or are at-will on a month-to-month basis. Regardless of stated term, in most situations, however, the agreements can be terminated by the strategic operating partner with prior notice. As certain agreements expire, there can be no assurance that we will be able to enter into new agreements that provide for the

same terms and economics as those previously agreed upon, if at all. Thus, we are subject to the risk of strategic operating partner terminations and the failure or refusal of certain of our strategic operating partners to renew their existing agreements. This risk is often accentuated upon the acquisition of a new agency-based network as, for example, we experienced the loss of certain strategic operating partners when we acquired DBA in 2011, and could face similar departures in connection with our 2015 acquisition of SBA, particularly as certain of their agents are operating under month-to-month arrangements. We have a number of customers and strategic operating partner locations with significant volume and stature, although with the benefit of our recent acquisitions, no single customer or strategic operating partner location represents more than 5% of our net revenues. We cannot be certain that we will be able to maintain and expand our existing strategic operating partner relationships or enter into new strategic operating partner relationships, or that new or renewed strategic operating partner relationships will be available on commercially reasonable terms. If we are unable to maintain and expand our existing strategic operating partner relationships, renew existing strategic operating partner relationships, or enter into new strategic operating partner relationships, we may lose customers, customer introductions and co-marketing benefits, and our operating results may be negatively impacted, and we may be restricted from growing in certain territories or with certain customers, except through our strategic operating partners.

If our strategic operating partners fail to maintain adequate reserves against unpaid customer invoices, or if we are unable to offset against commissions earned and payable by us to our strategic operating partners for unpaid customer invoices, our results of operations and financial condition may be adversely affected.

We derive a substantial portion of our revenue pursuant to agreements with independently-owned strategic operating partners operating under our various brands. Under these agreements, each individual strategic operating partner office is responsible for some or all of the bad debt expense related to the underlying customers being serviced by the strategic operating partner. Certain of our strategic operating partners are required to maintain a security deposit with us that is recognized as a liability in our financial statements and used as a bad debt reserve for each strategic operating partner. We charge each of the strategic operating partners' bad debt reserve accounts for any accounts receivable aged beyond 90 days. The bad debt reserve account may carry a deficit balance when amounts charged to this reserve exceed amounts otherwise available in the bad debt reserve account. In these circumstances, deficit bad debt reserve accounts as well as other deficit balances owed to us by our strategic operating partners are recognized as a receivable in our financial statements. Other strategic operating partners are not responsible to establish a bad debt reserve, however, they are still responsible for deficits and their strategic operating partner agreements provide that we may withhold all or a portion of future commission checks payable to the strategic operating partner in satisfaction of any deficit balance. As of June 30, 2016, a number of our strategic operating partners had a deficit balance in their bad debt reserve account totaling approximately \$1.0 million. To the extent any of these strategic operating partners cease operations or are otherwise unable to replenish these deficit accounts or repay the deficit balances, we would be at risk of loss for any such amount.

Failure to comply with obligations as an "indirect air carrier" could result in penalties and fines and limit our ability to ship freight.

We are regulated, among other things, as "indirect air carriers" by the Transportation Security Administration of the Department of Homeland Security. These agencies provide requirements, guidance and, in some cases, administer licensing requirements and processes applicable to the freight forwarding industry. We monitor our compliance and the compliance of our subsidiaries with such agency requirements. We rely on our strategic operating partners to monitor their own compliance, except when we are notified of a violation, when we may become involved. Failure to comply with these requirements, policies and procedures could result in penalties and fines. To date, a limited number of our strategic operating partners have been out of compliance with the "indirect air carrier" regulations, resulting in fines to us, which we attempt to collect from the strategic operating partners. There is no assurance that additional violations will not take place, which could result in penalties or fines or, in the extreme case, limits on our ability to ship freight.

Our business will be seriously harmed if we fail to develop, implement, maintain, upgrade, enhance, protect and integrate information technology systems.

We rely heavily on our information technology systems to efficiently run our business, and they are a key component of our growth strategy. To keep pace with changing technologies and customer demands, we must correctly interpret and address market trends and enhance the features and functionality of our technology platform in response to these trends, which may lead to significant ongoing software development or licensing costs. We may be unable to accurately determine the needs of our customers and strategic operating partners and the trends in the transportation services industry, or to design or license and implement the appropriate features and functionality of our technology platform in a timely and cost-effective manner, which could result in decreased demand for our services and a corresponding decrease in our revenues. Despite testing, external and internal risks, such as malware, insecure coding, "Acts of God," data leakage and human error pose a direct threat to our information technology systems and operations. We may also be subject to cybersecurity attacks and other intentional hacking. Any failure to identify and address such defects or errors or prevent a cyber-attack could result in service interruptions, operational difficulties, loss of

revenues or market share, liability to customers or others, diversion of resources, injury to our reputation and increased service and maintenance costs. Addressing such issues could prove to be impossible or very costly and responding to resulting claims or liability could similarly involve substantial cost. We must maintain and enhance the reliability and speed of our information technology systems to remain competitive and effectively handle higher volumes of freight through our network and the various service modes we offer. If our information technology systems are unable to manage additional volume for our operations as our business grows, or if such systems are not suited to manage the various service modes we offer or businesses we acquire, our service levels and operating efficiency could decline. We expect customers and strategic operating partners to continue to demand more sophisticated, fully integrated information systems from their supply chain services providers. If we fail to hire and retain qualified personnel to implement, protect and maintain our information technology systems or if we fail to upgrade our systems to meet our customers' and strategic operating partners' demands, our business and results of operations could be seriously harmed. This could result in a loss of customers or a decline in the volume of freight we receive from customers.

In addition, acquired companies will need to be integrated with our information technology systems, which may cause additional training or licensing cost and disruption. In such event, our revenue, financial results and ability to operate profitably could be negatively impacted. The challenges associated with integration of our acquisitions may increase these risks.

During fiscal 2016, we installed an updated version of our accounting software package. We are now working to integrate the financial reporting systems of several of our more recently acquired operations. If we experience problems with the operation of the accounting system update, or if we fail to adequately onboard the data of our recently acquired operations into the new system, our business and financial results could be negatively affected.

Our management information and financial reporting systems are spread across diverse platforms and geographies, and we depend on information provided by strategic operating partners and acquired companies, not all of which have systems that are compatible with ours.

The growth of our business through acquisitions and strategic operating partners has resulted in our reliance on the accounting, business information, and other computer systems of these acquired or affiliated entities to capture and transmit information concerning customer orders, carrier payment, payroll, and other critical business data. Our intention is to convert acquired companies to our main accounting system, including the recent acquisitions of Wheels, SBA, and Highways. In addition, in certain instances our strategic operating partners remain on their own systems and are not integrated. As long as an acquired business or strategic operating partner remains on another information technology system, we face additional manual calculations, training costs, delays, and an increased possibility of inaccuracies in the data we use to manage our business and report our financial results. Any delay in compiling, assessing, and reporting information could adversely impact our business, our ability to timely react to changes in volumes, prices, or other trends, or to take actions to comply with financial covenants, all of which could negatively impact our stock price.

We depend on third-party carriers to transport our customers' cargo.

We rely on commercial airfreight carriers and air charter operators, ocean freight carriers, trucking companies, major U.S. railroads, other transportation companies, draymen and longshoremen for the movement of our customers' cargo. Consequently, our ability to provide services for our customers could be adversely impacted by: shortages in available cargo capacity; changes by carriers and transportation companies in policies and practices such as scheduling, pricing, payment terms and frequency of service or increases in the cost of fuel, taxes and labor; and other factors not within our control. Reductions in airfreight or ocean freight capacity could negatively impact our yields. Material interruptions in service or stoppages in transportation, whether caused by strike, work stoppage, lock-out, slowdown or otherwise, could adversely impact our business, results of operations and financial condition.

We operate principally as a non-asset based transportation and logistics services company. As a result, we depend on a variety of asset-based third-party carriers, whose actions we do not directly control.

The quality and profitability of our services depend upon our effective selection and management of third-party carriers. Changes in the financial stability, operating capabilities and capacity of our third-party carriers could affect us in unpredictable ways, including volatility in pricing and to our ability to remain profitable. Any determination that our third-party carriers have violated laws and regulations could seriously damage our reputation and brands, resulting in diminished revenue and profit and increased operating costs.

Our profitability depends on our ability to effectively manage our cost structure as we grow the business.

We have increased, and intend to further increase, our revenue through organic growth, adding strategic operating partners, and acquisitions. We believe that certain of our costs, such as those related to information technology, physical locations, senior management, and sales and general operations, and excluding non-cash amortization, should grow more slowly than our net revenue, which would lead to improved cash flow margins over time. Historically, our cash flow margins have fluctuated, and have not always improved as we have grown. To the extent we fail to manage our costs, including purchased transportation, strategic operating partner commissions, personnel expenses, and sales and general expenses, our profitability may not improve or may decrease. This could adversely impact our business, results of operation, financial condition, and the trading price of our common stock.

Our business is subject to seasonal trends.

Historically, our operating results have been subject to seasonal trends when measured on a quarterly basis. Our first and fourth fiscal quarters are traditionally weaker compared with our second and third fiscal quarters. As a result, our quarterly operating results are likely to continue to fluctuate. This trend is dependent on numerous factors, including the markets in which we operate, holiday seasons, climate, economic conditions and numerous other factors. A substantial portion of our revenue is derived from customers in industries whose shipping patterns are tied closely to consumer demand which can sometimes be difficult to predict or are based on

just-in-time production schedules. Therefore, our revenue is, to a large degree, affected by factors that are outside of our control. There can be no assurance that our historic operating patterns will continue in future periods as we cannot influence or forecast many of these factors.

Comparisons of our operating results from period to period are not necessarily meaningful and should not be relied upon as an indicator of future performance.

Our operating results have fluctuated in the past and likely will continue to fluctuate in the future because of a variety of factors, many of which are beyond our control. A substantial portion of our revenue is derived from customers in industries whose shipping patterns are tied closely to economic trends and consumer demand that can be difficult to predict, or are based on just-in-time production schedules. Because our quarterly revenues and operating results vary significantly, comparisons of our results from period to period are not necessarily meaningful and should not be relied upon as an indicator of future performance. Additionally, the timing of acquisitions, as well as the revenue and expenses of the acquired operations, the transaction expenses, amortization of intangibles, and interest expense associated with acquisitions can make our operating results from period to period difficult to compare. Accordingly, there can be no assurance that our historical operating patterns will continue in future periods or that comparisons to prior periods will be meaningful.

Economic recessions and other factors that reduce freight volumes could have a material adverse impact on our business.

The transportation industry historically has experienced cyclical fluctuations in financial results due to economic recession, downturns in business cycles of our customers, interest rate fluctuations and other economic factors beyond our control. Deterioration in the economic environment subjects our business to various risks that may have a material impact on our operating results and cause us to not reach our long-term growth goals, and which may include the following:

- A reduction in overall freight volumes in the marketplace reduces our opportunities for growth. In addition, if a downturn in our customers' business cycles causes a reduction in the volume of freight shipped by those customers, our operating results could be adversely affected;
- Some of our customers may face economic difficulties and may not be able to pay us, and some may go out of business. In addition, some customers may not pay us as quickly as they have in the past, causing our working capital needs to increase;
- A significant number of our transportation providers may go out of business and we may be unable to secure sufficient equipment or other transportation services to meet our commitments to our customers; and
- We may not be able to appropriately adjust our expenses to changing market demands. In order to maintain high variability in our business model, it is necessary to adjust staffing levels to changing market demands. In periods of rapid change, it is more difficult to match our staffing level to our business needs. In addition, we have other primarily variable expenses that are fixed for a period of time, and we may not be able to adequately adjust them in a period of rapid change in market demand.

Higher carrier prices may result in decreased net revenue margin.

Carriers can be expected to charge higher prices if market conditions warrant, or to cover higher operating expenses. Our net revenues and income from operations may decrease if we are unable to increase our pricing to our customers. Increased demand for truckload services and pending changes in regulations may reduce available capacity and increase carrier pricing.

We face intense competition in the freight forwarding, freight brokerage, logistics and supply chain management industry.

The freight forwarding, freight brokerage, logistics and supply chain management industry is intensely competitive and is expected to remain so for the foreseeable future. We face competition from a number of companies, including many that have significantly greater financial, technical and marketing resources. Customers increasingly are turning to competitive bidding processes, in which they solicit bids from a number of competitors, including competitors that are larger than us. Increased competition may lead to revenue reductions, reduced profit margins, or a loss of market share, any one of which could harm our business. There are many factors that could impair our profitability, including the following:

- competition with other transportation services companies, some of which have a broader coverage network, a wider range of services, more fully developed information technology systems and greater capital resources than we do;
- reduction by our competitors of their rates to gain business, especially during times of declining growth rates in the economy, which reductions may limit our ability to maintain or increase rates, maintain our operating margins or maintain significant growth in our business;
- shift in the business of shippers to asset-based trucking companies that also offer brokerage services in order to secure access to those companies' trucking capacity, particularly in times of tight industry-wide capacity;
- solicitation by shippers of bids from multiple transportation providers for their shipping needs and the resulting depression of freight rates or loss of business to competitors; and
- establishment by our competitors of cooperative relationships to increase their ability to address shipper needs.

Our industry is consolidating and if we cannot gain sufficient market presence, we may not be able to compete successfully against larger companies in our industry.

There currently is a trend within our industry towards consolidation of the niche players into larger companies that are attempting to increase global operations through the acquisition of regional and local freight forwarders, brokers, and other freight logistics providers. If we cannot gain sufficient market presence or otherwise establish a successful strategy in our industry, we may not be able to compete successfully against larger companies in our industry.

If we are not able to limit our liability for customers' claims for loss or damage to their goods through contract terms and limit our exposure through the purchase of insurance, we could be required to pay large amounts to our customers as compensation for their claims and our results of operations could be materially adversely affected.

In our freight forwarding operations, we have liability under law to our customers for loss or damage to their goods. We attempt to limit our exposure through release limits, indemnification by the air, ocean, and ground carriers that transport the freight, and insurance. Moreover, because a freight forwarder relationship to an airline or ocean carrier is that of a shipper to a carrier, the airline or ocean carrier generally assumes the same responsibility to us as we assume to our customers. When we act in the capacity of an authorized agent for an air or ocean carrier, the carrier, rather than us, assumes liability for the safe delivery of the customer's cargo to its ultimate destination, unless due to our own errors and omissions. However, these efforts may prove unsuccessful and we may be liable for loss and damage to the goods.

In addition to legal liability, from time to time customers exert economic pressure when the underlying carrier fails to cover the costs of loss or damage. We have, from time to time, made payments to our customers for claims related to our services and may make such payments in the future. Should we experience an increase in the number or size of such claims or an increase in liability pursuant to claims or unfavorable resolutions of claims, our results could be adversely affected.

There can be no assurance that our insurance coverage will provide us with adequate coverage for such claims or that the maximum amounts for which we are liable in connection with our services will not change in the future or exceed our insurance levels. As with every insurance policy, there are limits, exclusions and deductibles that apply and we could be subject to claims for which insurance coverage may be inadequate or even disputed and such claims could adversely impact our financial condition and results of operations. In addition, significant increases in insurance costs could reduce our profitability.

We may be subject to claims arising from transportation of freight by the carriers with which we contract.

We use the services of thousands of transportation companies in connection with our transportation operations. From time to time, the drivers employed and engaged by the carriers we contract with are involved in accidents which may result in serious personal injuries. The resulting types and/or amounts of damages may be excluded from or exceed the amount of insurance coverage maintained by the contracted carrier. Although these drivers are not our employees and all of these drivers are employees, owner-operators, or

independent contractors working for carriers, from time to time, claims may be asserted against us for their actions, or for our actions in retaining them. Claims against us may exceed the amount of our insurance coverage, or may not be covered by insurance at all. A material increase in the frequency or severity of accidents, liability claims or workers' compensation claims, or unfavorable resolutions of claims could materially and adversely affect our operating results. In addition, significant increases in insurance costs or the inability to purchase insurance as a result of these claims could reduce our profitability. Our involvement in the transportation of certain goods, including but not limited to hazardous materials, could also increase our exposure in the event one of our contracted carriers is involved in an accident resulting in injuries or contamination.

We are subject to various claims and lawsuits that could result in significant expenditures.

Our business exposes us to claims and litigation related to damage to cargo, labor and employment practices (including wage-and-hour, employment classification of independent contractor drivers, sales representatives, brokerage agents and other individuals, and other federal and state claims), personal injury, property damage, business practices, environmental liability and other matters. We carry insurance to cover most exposures, subject to specific coverage exceptions, aggregate limits, and self-insured retentions that we negotiate from time to time. However, not all claims are covered, and there can be no assurance that our coverage limits will be adequate to cover all amounts in dispute. For example, we are currently defending an employment-based claim with a wage and hour component that would not be covered by our insurance (description included in this report), and a claim for which the amount of asserted damages relating to the shipment of a customer's goods exceeds our coverage limits. Based on the early stages of both of these proceedings, we are unable to determine the likelihood of a successful defense or the ultimate amount of any damages that would be awarded. To the extent we experience claims that are uninsured, exceed our coverage limits, or involve significant aggregate use of our self-insured retention amounts, the expenses could have a material adverse effect on our business, results of operations, financial condition or cash flows, particularly in the quarter in which the amounts are accrued. In addition, in the future, we may be subject to higher insurance premiums or increase our self-insured retention amounts, which could increase our overall costs or the volatility of claims expense.

Our failure to comply with, or the costs of complying with, government regulation could negatively affect our results of operation.

Our business is subject to heavy, evolving, complex and increasing regulation by national and international sources. Regulatory changes could affect the economics of our industry by requiring changes in operating practices or influencing the demand for, and the costs of providing, services to customers. Future regulation and our failure to comply with any applicable regulations could have a material adverse effect on our business.

If we are unable to maintain our brand images and corporate reputation, our business may suffer.

Our success depends in part on our ability to maintain the image of the Radiant, Wheels, Airgroup, Adcom, DBA and Service By Air brands and our reputation for providing excellent service to our customers. Service quality issues, actual or perceived, even when false or unfounded, could tarnish the image of our brand and may cause customers to use other freight-forwarding companies. Damage to our reputation and loss of brand equity could reduce demand for our services and thus have an adverse effect on our business, financial position and results of operations, and could require additional resources to rebuild our reputation and restore the value of our brands.

Issues related to the intellectual property rights on which our business depends, whether related to our failure to enforce our own rights or infringement claims brought by others, could have a material adverse effect on our business, financial condition and results of operations.

We use both internally developed and purchased technology in conducting our business. Whether internally developed or purchased, it is possible that the user of these technologies could be claimed to infringe upon or violate the intellectual property rights of third parties. In the event that a claim is made against us by a third party for the infringement of intellectual property rights, any settlement or adverse judgment against us either in the form of increased costs of licensing or a cease and desist order in using the technology could have an adverse effect on us and our results of operations.

We also rely on a combination of intellectual property rights, including copyrights, trademarks, domain names, trade secrets, intellectual property licenses and other contractual rights, to establish and protect our intellectual property and technology. Any of our owned or licensed intellectual property rights could be challenged, invalidated, circumvented, infringed or misappropriated; our trade secrets and other confidential information could be disclosed in an unauthorized manner to third-parties or we may fail to secure the rights to intellectual property developed by our employees, contractors and others. Given our international operations, we seek to register our trademarks and other intellectual property domestically and internationally. The laws of certain foreign countries may not protect trademarks to the same extent as do the laws of the United States. Efforts to enforce our intellectual property rights may be

time consuming and costly, distract management's attention and resources and ultimately be unsuccessful. Moreover, our failure to develop and properly manage new intellectual property could adversely affect our market positions and business opportunities.

Our failure to obtain, maintain and enforce our intellectual property rights could therefore have a material adverse effect on our business, financial condition and results of operations.

We may not successfully manage our growth.

We intend to grow rapidly and substantially, including by expanding our internal resources, making acquisitions and entering into new markets. We may experience difficulties and higher-than-expected expenses in executing this strategy as a result of unfamiliarity with new markets, change in revenue and business models and entering into new geographic areas.

Our growth will place a significant strain on our management, operational and financial resources. We will need to continually improve existing procedures and controls as well as implement new transaction processing, operational and financial systems, and procedures and controls to expand, train and manage our employee base. Our working capital needs will increase substantially as our operations grow. Failure to manage growth effectively, or obtain necessary working capital, could have a material adverse effect on our business, results of operations, cash flows, stock price and financial condition.

Our loans and credit facilities contain financial covenants that may limit current availability and impose ongoing operational limitations and risk of compliance.

We currently maintain (i) a USD\$65.0 million revolving credit facility (the "Senior Credit Facility") with Bank of America, N.A. (the "Senior Lender") on its own behalf and as agent to the other lenders named therein, currently consisting of the Bank of Montreal (as the initial member of the syndicate under such loan), pursuant to an Amended and Restated Loan and Security Agreement (the "Senior Loan Agreement"), and (ii) a CAD\$29.0 million senior secured Canadian term loan from Integrated Private Debt Fund IV LP ("IPD") pursuant to a CAD\$29,000,000 Credit Facilities Loan Agreement (the "IPD Loan Agreement"). Repayment of the foregoing credit facilities is secured by our assets and the assets of our subsidiaries, including, without limitation, all of the capital stock of our subsidiaries.

Under the terms of the foregoing credit facilities, we are required to comply with certain financial covenants, including maintaining a fixed charge coverage ratio ranging from 1.05 to 1.0 and 1.1 to 1.0, depending on the type of loan facility and whether certain conditions are triggered. In addition, (i) under the IPD Loan Agreement, we are required to maintain (a) a debt service coverage ratio of at least 1.2 to 1.0 and (b) a senior debt to EBITDA ratio of at least 3.0 to 1.0.

Our compliance with the financial covenants of our credit facilities is particularly important given the materiality of such facilities to our day-to-day operations and overall acquisition strategy. If we fail to comply with these covenants and are unable to secure a waiver or other relief, our financial condition would be materially weakened and our ability to fund day-to-day operations would be materially and adversely affected. Accordingly, we intend to employ EBITDA and adjusted EBITDA as management tools to measure our historical financial performance and as a benchmark for future financial flexibility.

Under our credit facilities, we are prohibited from declaring and paying dividends unless: (i) there are no existing events of default under the credit facility or an event of default would not be caused by the declaration or payment of such dividend, and (ii) upon giving pro forma effect to the dividend, (1) the amount available under the credit facility after the pro forma effect of such dividend is equal to the greater of 20% of the U.S. borrowing base under the Senior

Credit Facility or \$12.5 million, and (2) U.S. availability is at least \$7.5 million.

We operate with a significant amount of indebtedness, which is secured by substantially all of our assets and subject to variable interest rates and restrictive covenants.

Our substantial indebtedness could have adverse consequences, such as:

- require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness with our lenders, which could reduce the availability of our cash flow to fund future operating capital, capital expenditures, acquisitions and other general corporate purposes;
- expose us to the risk of increased interest rates, as a substantial portion of our borrowings are at variable rates of interest;
- require us to sell assets to reduce indebtedness or influence our decisions about whether to do so;
- increase our vulnerability to general adverse economic and industry conditions;

14

- limit our flexibility in planning for, or reacting to, changes in our business and our industry;
- restrict us from making strategic acquisitions, buying assets or pursuing business opportunities; and
- limit, along with the financial and other restrictive covenants in our indebtedness, among other things, our ability to borrow additional funds.

In addition, violating covenants in these agreements could have a material adverse effect on our business, financial condition and results of operations. Consequences if the violations are not cured or waived could include substantially increasing our cost of borrowing, restricting our future operations, termination of our lenders' commitments to supply us with further funds, cross defaults to other obligations, or acceleration of our obligations. If some or all of our obligations are accelerated, we may not be able to fully repay them.

Dependence on key personnel.

For the foreseeable future, our success will depend largely on the continued services of our Chairman and Chief Executive Officer, Bohn H. Crain, as well as certain of the other key executives and executives of our acquired businesses because of their collective industry knowledge, marketing skills and relationships with vendors, customers and strategic operating partners. Should any of these individuals leave us, we could have difficulty replacing them with qualified individuals and it could have a material adverse effect on our future results of operations.

Our results of operations could vary as a result of the methods, estimates, and judgments that we use in applying our accounting policies.

The methods, estimates, and judgments that we use in applying our accounting policies have a significant impact on our results of operations (see "Critical Accounting Policies" in Part II, Item 7 of this report). Such methods, estimates, and judgments are, by their nature, subject to substantial risks, uncertainties, and assumptions, and factors may arise over time that lead us to change our methods, estimates, and judgments. Changes in those methods, estimates, and judgments could significantly affect our results of operations.

Terrorist attacks and other acts of violence, anti-terrorism measures or war may affect our operations and our profitability.

As a result of the potential for terrorist attacks, federal, state and municipal authorities have implemented and continue to follow various security measures, including checkpoints and travel restrictions on large trucks. Such measures may reduce the productivity of our independent contractors and transportation providers or increase the costs associated with their operations, which we could be forced to bear. For example, security measures imposed at bridges, tunnels, border crossings and other points on key trucking routes may cause delays and increase the non-driving time of our independent contractors and transportation providers, which could have an adverse effect on our results of operations. Congress has mandated security screening of air cargo traveling on passenger airlines effective July 2010, and for ocean freight, effective July 2012, which have increased costs associated with our air and freight forwarding operations. War, risk of war, or a terrorist attack also may have an adverse effect on the economy. A decline in economic activity could adversely affect our revenues or restrict our future growth. Instability in the financial markets as a result of terrorism or war also could impact our ability to raise capital. In addition, the insurance premiums charged for some or all of the coverage currently maintained by us could increase dramatically or such coverage could be unavailable in the future.

We intend to continue growing our international operations and will become increasingly subject to variations in the international trade market.

We provide services to customers engaged in international commerce, and intend to grow our international business in the coming years. For the years ended June 30, 2016 and 2015, international transportation revenue accounted for

48% and 36% of our net revenue, respectively. This amount is expected to increase after giving effect to our recent acquisition of Wheels Group Inc. (“Wheels”). All factors that affect international trade have the potential to expand or contract our international business and impact our operating results. For example, international trade is influenced by, among other things:

- currency exchange rates and currency control regulations;
- interest rate fluctuations;
- changes in governmental policies, such as taxation, quota restrictions, tariffs, other forms of trade barriers and/or restrictions and trade accords;
- changes in and application of international and domestic customs, trade and security regulations;

15

- wars, strikes, civil unrest, acts of terrorism, and other conflicts, such as the recent conflict in the Ukraine that has led to the imposition of economic sanctions by the United States and the European Union against Russia;
- natural disasters and pandemics;
- changes in consumer attitudes regarding goods made in countries other than their own;
- changes in availability of credit;
- economic conditions in other countries and regions;
- changes in supply chain design including those resulting from near shoring, widening and deepening of canals, and port congestion or disruption;
- changes in the price and readily available quantities of oil and other petroleum-related products; and
- increased global concerns regarding environmental sustainability.

If any of the foregoing factors have a negative effect on the international trade market, we could suffer a decrease in our international business, which could have a material adverse effect on our results of operations and financial condition.

In connection with our international business, we are subject to certain foreign regulatory requirements, and any failure to comply with these requirements could be detrimental to our business.

We provide services in parts of the world where common business practices could constitute violations of the anticorruption laws, rules, regulations and decrees of the United States, including the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act and of all other countries in which we conduct business; as well as trade control laws, or laws, regulations and Executive Orders imposing embargoes and sanctions; and anti-boycott laws and regulations. Compliance with these laws, rules, regulations and decrees is dependent on our employees, subcontractors, consultants, agents, third-party brokers and customers, whose individual actions could violate these laws, rules, regulations and decrees. Failure to comply could result in substantial penalties, damages to our reputation and restrictions on our ability to conduct business. In addition, any investigation or litigation related to such violations may require significant management time and could cause us to incur extensive legal and related costs, all of which may have a material adverse effect on our results of operations and operating cash flows.

International operations expose us to currency exchange risk and we cannot predict the effect of future exchange rate fluctuations on our business and operating results.

After giving effect to our recent acquisition of Wheels, we generate significant revenues from international operations, including a substantial amount in Canada. During the year ended June 30, 2016, approximately 48% of our net revenues were generated from international operations, 30% of which is attributable to Wheels. Our international operations are sensitive to currency exchange risks. We have currency exposure arising from both sales and purchases denominated in foreign currencies, as well as intercompany transactions. Significant changes in exchange rates between foreign currencies in which we transact business and the U.S. dollar may adversely affect our results of operations and financial condition. Historically, we have not entered into any hedging activities, and, to the extent that we continue not to do so in the future, we may be vulnerable to the effects of currency exchange-rate fluctuations.

In addition, our international operations also expose us to currency fluctuations as we translate the financial statements of our foreign operations to the U.S. dollar. There can be no guarantee that the effect of currency fluctuations will not be material in the future.

Ineffective internal controls could impact our business and operating results as well as our public reporting and stock price.

We are a relatively small company that has grown rapidly, and we face additional challenges of disparate systems and geographically dispersed management. Our internal controls over financial reporting and disclosure are strained at

times due to acquisitions and other corporate development activities. From time to time, we have experienced delays in filing certain reports required under the Exchange Act.

Our internal control over financial reporting may not prevent or detect misstatements because of its inherent limitations, including the possibility of human error, the circumvention or overriding of controls, or fraud. Even effective internal controls can provide only reasonable assurance with respect to the preparation and fair presentation of financial statements. If we fail to maintain the adequacy of our internal controls, including any failure to implement required new or improved controls, or if we experience difficulties in their implementation, our business and operating results could be harmed and we could fail to meet our financial reporting obligations.

Risks Related to our Acquisition Strategy

There is a scarcity of and competition for acquisition opportunities.

There are a limited number of operating companies available for acquisition that we deem to be desirable targets. In addition, there is a very high level of competition among companies seeking to acquire these operating companies. We are and will continue to be a very minor participant in the business of seeking acquisitions of these types of companies. A large number of established and well-financed entities are active in acquiring interests in companies that we may find to be desirable acquisition candidates. Many of these entities have significantly greater financial resources, technical expertise and managerial capabilities than us. Consequently, we will be at a competitive disadvantage in negotiating and executing possible acquisitions of these businesses. Even if we are able to successfully compete with these entities, this competition may affect the terms of completed transactions and, as a result, we may pay more or receive less favorable terms than we expected for potential acquisitions. We may not be able to identify operating companies that complement our strategy, and even if we identify a company that complements our strategy, we may be unable to complete an acquisition of such a company for many reasons, including:

- failure to agree on the terms necessary for a transaction, such as the purchase price;
- incompatibility between our operational strategies or management philosophies with those of the potential acquiree;
- competition from other acquirers of operating companies;
- lack of sufficient capital to acquire a profitable logistics company;
- unwillingness of a potential acquiree to agree to subordinate any future payment of earn-outs or promissory notes to the payments due to our lenders; and
- unwillingness of a potential acquiree to work with our management.

Risks related to acquisition financing.

We have a limited amount of financial resources and our ability to make additional acquisitions without securing additional financing from outside sources is limited. In order to continue to pursue our acquisition strategy, we may be required to obtain additional financing. We intend to obtain such financing through a combination of traditional debt financing or the placement of debt and equity securities. We may finance some portion of our future acquisitions by either issuing equity or by using shares of our common stock for all or a portion of the purchase price for such businesses. In the event that our common stock does not attain or maintain a sufficient market value, or potential acquisition candidates are otherwise unwilling to accept our common stock as part of the purchase price for the sale of their businesses, we may be required to use more of our cash resources, if available, in order to maintain our acquisition program. If we do not have sufficient cash resources, we will not be able to complete acquisitions and our growth could be limited unless we are able to obtain additional capital through debt or equity financings. The terms of our credit facility require that we obtain the consent of our lenders prior to securing additional debt financing. There could be circumstances in which our ability to obtain additional debt financing could be constrained if we are unable to secure such consent.

Our credit facilities place certain limits on the acquisitions we may make.

Under the terms of our credit facilities, we may be required to obtain the consent of each of our lenders prior to making any additional acquisitions.

We are permitted to make additional acquisitions without the consent of the lenders only if certain conditions are satisfied. These conditions include the following: (i) the absence of an event of default under the Senior Credit Facility, (ii) the acquisition must be consensual; (iii) the company to be acquired must be in the transportation and logistics industry, located in the United States, Canada or certain other approved jurisdictions, and have a positive

EBITDA for the 12 month period most recently ended prior to such acquisition, (iv) no debt or liens may be incurred, assumed or result from the acquisition, subject to limited exceptions, and (v) after giving effect for the funding of the acquisition, we must have availability under the Senior Credit Facility of at least the greater of 20% of the U.S.-based borrowing base and Canadian-based borrowing base or \$12.5 million, and U.S. availability of at least \$7.5 million.

In the event we are not able to satisfy the conditions of our credit facilities in connection with a proposed acquisition, we must either forego the acquisition, obtain the consent of the lenders, or retire the credit facility. This may prevent us from completing acquisitions that we determine are desirable from a business perspective and limit or slow our ability to achieve the critical mass we need to achieve our strategic objectives.

To the extent we make any material acquisitions, our earnings will be adversely affected by non-cash charges relating to the amortization of intangibles, which may cause our stock price to decline.

Under applicable accounting standards, purchasers are required to allocate the total consideration paid in a business combination to the identified acquired assets and liabilities based on their fair values at the time of acquisition. The excess of the consideration paid to acquire a business over the fair value of the identifiable tangible assets acquired must be allocated among identifiable intangible assets including goodwill. The amount allocated to goodwill is not subject to amortization. However, it is tested at least annually for impairment. The amount allocated to identifiable intangibles, such as customer relationships and the like, is amortized over the life of these intangible assets. We expect that this will subject us to periodic charges against our earnings to the extent of the amortization incurred for that period. Because our business strategy focuses, in part, on growth through acquisitions, our future earnings will be subject to greater non-cash amortization charges than a company whose earnings are derived solely from organic growth. As a result, we will experience an increase in non-cash charges related to the amortization of intangible assets acquired in our acquisitions. Our financial statements will show that our intangible assets are diminishing in value, even if the acquired businesses are increasing (or not diminishing) in value. Because of this discrepancy, we believe our EBITDA, a measure of financial performance that does not conform to generally accepted accounting principles (“GAAP”), provides a meaningful measure of our financial performance. However, the investment community generally measures a public company’s performance by its net income. Further, the financial covenants of our credit facility adjust EBITDA to exclude costs related to share-based compensation and other non-cash charges. Thus, we believe that EBITDA and adjusted EBITDA provide a meaningful measure of our financial performance. If the investment community elects to place more emphasis on net income, the future price of our common stock could be adversely affected.

We are not obligated to follow any particular criteria or standards for identifying acquisition candidates.

Other than as required under the credit facility, we are not obligated to follow any particular operating, financial, geographic or other criteria in evaluating candidates for potential acquisitions or business combinations. We will determine the purchase price and other terms and conditions of acquisitions. Our stockholders will not have the opportunity to evaluate the relevant economic, financial and other information that our management team will use and consider in deciding whether or not to enter into a particular transaction.

We may be required to incur a significant amount of indebtedness in order to successfully implement our acquisition strategy.

Subject to the restrictions contained under our current credit facilities, we may be required to incur a significant amount of indebtedness in order to complete future acquisitions. If we are not able to generate sufficient cash flow from the operations of acquired businesses to make scheduled payments of principal and interest on the indebtedness, then we will be required to use our capital for such payments. This will restrict our ability to make additional acquisitions. We may also be forced to sell an acquired business in order to satisfy indebtedness. We cannot be certain that we will be able to operate profitably once we incur this indebtedness or that we will be able to generate a sufficient amount of proceeds from the ultimate disposition of such acquired businesses to repay the indebtedness incurred to make these acquisitions.

We may experience difficulties in integrating the operations, personnel and assets of acquired businesses that may disrupt our business, dilute stockholder value and adversely affect our operating results.

A core component of our business plan is to acquire businesses and assets in the transportation and logistics industry. There can be no assurance that we will be able to identify, acquire or profitably manage businesses or successfully integrate acquired businesses into the Company without substantial costs, delays or other operational or financial

problems. Such acquisitions also involve numerous operational risks, including:

- difficulties in integrating operations, technologies, services and personnel;
 - the diversion of financial and management resources from existing operations;
- the risk of entering new markets;
- the potential loss of existing or acquired strategic operating partners following an acquisition;
- the potential loss of key employees following an acquisition and the associated risk of competitive efforts from such departed personnel;
- possible legal disputes with the acquired company following an acquisition; and
- the inability to generate sufficient revenue to offset acquisition or investment costs.

As a result, if we fail to properly evaluate and execute any acquisitions or investments, our business and prospects may be seriously harmed.

In certain acquisitions, we may recognize non-cash gains or losses on changes in contingent consideration. We include contingent consideration based on future financial performance as a portion of the purchase price of certain acquisitions. To the extent that an acquired operation underperforms relative to anticipated earnings levels, we are able to set-off certain levels of future unpaid purchase price for such acquired operations. This will result in the recognition of a non-cash gain on the change in contingent consideration. This occurred in connection with the performance of the Company's On Time, PCA, TNI, DCA, Highways and Copper operations. In the alternative, to the extent an acquired operation over performs anticipated earnings levels, we will recognize a non-cash expense on change in contingent consideration. These non-cash gains and expenses may have a material impact on our financial results, and the impact could be opposite to the underlying results of the acquired operation.

Not every acquisition is structured utilizing contingent consideration. Our acquisition in 2011 of DBA and our 2015 acquisitions of Wheels and SBA were structured without using contingent consideration. We will be unable to reduce the purchase price of these entities if they underperform relative to anticipated earnings levels.

We recently acquired Wheels, SBA and Highways and are currently integrating their businesses into our operations.

On April 2, 2015, we acquired all of the capital stock of Wheels through a court-approved plan of arrangement. Wheels now operates as our wholly-owned subsidiary. There can be no assurance of Wheels' ability following the acquisition to maintain and grow its revenues and operating margins in a manner consistent with its most recent operating results. Moreover, Wheels was our largest acquisition to date, and our ability to integrate Wheels' operations with our historic operations, to realize cost synergies with Wheels, and manage the effects of the acquisition on Wheels' existing customers and employees may be challenging.

In June 2015, we acquired SBA and Highways. These acquisitions were smaller than Wheels, but on a combined basis, the three acquisitions may strain our resources and ability to effectively integrate the companies into our operations. If we fail to integrate any or all of these companies effectively, or fail to achieve our revenue and cost expectations, our financial condition, results of operations, and stock price could be adversely affected.

Claims against us or other liabilities we incur relating to any acquisition or business combination may necessitate our seeking claims against the seller for which the seller may not indemnify us or that may exceed the seller's indemnification obligations.

There may be liabilities we assume in any acquisition or business combination that we did not discover or underestimated in the course of performing our due diligence investigation. A seller will normally have indemnification obligations to us under an acquisition or merger agreement, but these obligations will be subject to financial limitations, such as general deductibles and a cap, as well as time limitations. There can be no assurance that our right to indemnification from any seller will be enforceable, collectible or sufficient in amount, scope or duration to fully offset the amount of any undiscovered or underestimated liabilities. Any such liabilities, individually or in the aggregate, could have a material adverse effect on our business, results of operations or financial condition.

We may face competition from parties who sell us their businesses and from professionals who cease working for us.

In connection with our acquisitions, we generally obtain non-solicitation agreements from the professionals we hire, as well as non-competition agreements from senior managers and professionals. The agreements prohibit such individuals from competing with us during the term of their employment and for a fixed period afterwards and seeking to solicit our employees or clients. In some cases, but not all, we may obtain non-competition or non-solicitation agreements from parties who sell us their business or assets. Certain activities may be carved out of or otherwise may not be prohibited by these arrangements. We cannot assure that one or more of the parties from whom we acquire assets or a business or who do not join us or leave our employment will not compete with us or solicit our employees

or clients in the future. Even if ultimately resolved in our favor, any litigation associated with the non-competition or non-solicitation agreements could be time consuming, costly and distract management's focus from locating suitable acquisition candidates and operating our business. Moreover, states and foreign jurisdictions may interpret restrictions on competition narrowly and in favor of employees.

Therefore, certain restrictions on competition or solicitation may be unenforceable. In addition, we may not pursue legal remedies if we determine that preserving cooperation and a professional relationship with the former employee or his clients, or other concerns, outweigh the benefits of any possible legal recourse or the likelihood of success does not justify the costs of pursuing a legal remedy. Such persons, because they have worked for us or a business that we acquire, may be able to compete more effectively with us, or be more successful in soliciting our employees and clients, than unaffiliated third parties.

Risks Related to our Common Stock

The market price of our common stock may fluctuate significantly, and this may make it difficult for you to resell our common stock at times or at prices you find attractive.

The market price of our common stock may fluctuate significantly as a result of a number of factors, many of which are outside our control. The current market price of our common stock may not be indicative of future market prices. Fluctuations may occur in response to the other risk factors listed in this prospectus supplement and for many other reasons, including:

- actual or anticipated variations in earnings, financial or operating performance or liquidity, including those resulting from the seasonality of our business;
- our financial performance or the performance of our competitors and similar companies;
- the public's reaction to our press releases, other public announcements and filings with the SEC;
- changes in estimates of our performance or recommendations by securities analysts;
- failure to meet securities analysts' quarterly and annual projections;
- the impact of new federal or state regulations;
- changes in accounting standards, policies, guidance, interpretations or principles;
- the introduction of new services by us or our competitors;
- the arrival or departure of key personnel;
- acquisitions, strategic alliances or joint ventures involving us or our competitors;
- technological innovations or other trends in our industry;
- news affecting our customers;
- operating and stock performance of other companies deemed to be peers;
- regulatory or labor conditions applicable to us, our industry or the industries we serve;
- market conditions in our industry, the industries we serve, the financial markets and the economy as a whole;
- changes in our capital structure; and
 - sales of our common stock by us or members of our management team.

In addition, the stock market historically has experienced significant price and volume fluctuations. These fluctuations are often unrelated to the operating performance of a particular company. These broad market fluctuations may cause declines in the market price of our common stock.

Volatility in the market price of our common stock may make it difficult for you to resell shares of our common stock when you want or at attractive prices. In addition, when the market price of a company's common stock drops significantly, stockholders often institute securities class action lawsuits against the company. A lawsuit against us could cause us to incur substantial costs, including settlement costs or awards for legal damages, and could divert the time and attention of our management and other resources.

Provisions of our certificate of incorporation, bylaws and Delaware law may make a contested takeover more difficult.

Certain provisions of our certificate of incorporation, bylaws and the General Corporation Law of the State of Delaware ("DGCL") could deter a change in our management or render more difficult an attempt to obtain control of us, even if such a proposal is favored by a majority of our stockholders. For example, we are subject to the provisions of the DGCL that prohibit a public Delaware corporation from engaging in a broad range of business combinations with a person who, together with affiliates and associates, owns 15% or more of such corporation's outstanding voting shares (an "interested stockholder") for three years after the person became an interested stockholder, unless the business combination is approved in a prescribed manner. Our certificate of incorporation provides that directors may only be removed for cause by the affirmative vote of 75% of our outstanding shares and that amendments to our

bylaws require the affirmative vote of holders of two-thirds of our outstanding shares. Our certificate of incorporation also includes undesignated preferred stock, which may enable our board of directors to discourage an attempt to obtain control of us by means of a tender offer, proxy contest, merger or otherwise. Finally, our bylaws include an advance notice procedure for stockholders to nominate directors or submit proposals at a stockholders meeting.

20

Trading in our common stock has been limited.

Although our common stock is traded on the NYSE-MKT, it remains relatively illiquid, or “thinly traded”, as compared to the volume of trading activity associated with larger companies whose shares trade on the larger national exchanges. Because of this limited liquidity, stockholders may be unable to sell their shares at the prices or volumes they desire. The trading price of our shares may from time to time fluctuate widely. The trading price may be affected by a number of factors including events described in the risk factors set forth in this report as well as our operating results, financial condition, announcements, general conditions in the industry and the financial markets, and other events or factors. In recent years, broad stock market indices, in general, and smaller capitalization companies, in particular, have experienced substantial price fluctuations. In a volatile market, we may experience wide fluctuations in the market price of our common stock. These fluctuations may have a negative effect on the market price of our common stock.

The influx of additional shares of our common stock onto the market may create downward pressure on the trading price of our common stock.

We have completed several acquisitions which often include the issuance of additional shares pursuant to the purchase agreements. During the fiscal year ended June 30, 2016, we have issued approximately 7,000 unregistered shares of our common stock as part of the purchase price, or associated with the financing of a transaction. In addition, we may issue additional shares in connection with such acquisitions upon the achievement of certain earn-out thresholds or in connection with future acquisitions as part of the purchase consideration. The availability of additional shares for sale to the public under Rule 144 of the Securities Act of 1933, as amended (the “Securities Act”) and sale of such shares in public markets could have an adverse effect on the market price of our common stock. Such an adverse effect on the market price would make it more difficult for us to sell our equity securities in the future at prices we deem appropriate or to use our shares as currency for future acquisitions which will make it more difficult to execute our acquisition strategy.

The issuance of additional shares may result in additional dilution to our existing stockholders.

We have filed universal shelf registration statement that allows us to publicly issue up to \$100.0 million of additional securities, including debt, common stock, preferred stock, and warrants. After giving effect to our July 2015 public offering of common stock, approximately \$48.3 million remains available under the shelf registration statement. The shelf registration is intended to provide greater flexibility to us in financing growth or changing our capital structure.

At any time we may make private offerings of our securities. We have issued, and may be required to issue, additional shares of common stock or common stock equivalents in payment of the purchase price of businesses we have acquired. This will have the effect of further increasing the number of shares outstanding. In connection with future acquisitions, we may undertake the issuance of more shares of common stock without notice to our then existing stockholders. We may also issue additional shares in order to, among other things, compensate employees or consultants or for other valid business reasons in the discretion of our board of directors, which could result in diluting the interests of our existing stockholders.

The exercise or conversion of our outstanding options, warrants or other convertible securities or any derivative securities we issue in the future will result in the dilution of the ownership interests of our existing stockholders and may create downward pressure on the trading price of our common stock. We are currently authorized to issue 100 million shares of common stock. As of August 31, 2016, we had 48,874,068 outstanding shares of common stock. We may in the future issue up to 3,815,290 additional shares of our common stock upon exercise of existing options.

We may issue shares of preferred stock with greater rights than our common stock.

Our certificate of incorporation authorizes our board of directors to issue shares of preferred stock and to determine the price and other terms for those shares without the approval of our stockholders. Any such preferred stock we may issue in the future could rank ahead of our common stock in many ways, including in terms of dividends, liquidation rights, and voting rights.

As we do not anticipate paying dividends on our common stock, investors in our shares of common stock will not receive any dividend income.

We have not paid any cash dividends on our common stock since our inception and we do not anticipate paying cash dividends on our common stock in the foreseeable future. Any dividends that we may pay in the future will be at the discretion of our board of directors, and will depend on our future earnings, any applicable regulatory considerations, our financial requirements and other similarly unpredictable factors. Our ability to pay dividends on our common stock is further limited by the terms of our credit facilities and outstanding Series A Preferred Stock. Accordingly, investors seeking dividend income should not purchase our stock.

If we are unable to pay quarterly dividends to the holders of our Series A Preferred Shares, we may be subject to additional penalties and requirements, all of which could have a negative effect on the holders of our common stock.

We are required to pay quarterly dividends on the shares of our Series A Preferred Shares equal to 9.75% per annum per \$25.00 stated liquidation preference per Series A Preferred Share. If we do not pay dividends in full on the Series A Preferred Shares on any two dividend payment dates (whether consecutive or not), then the per annum dividend rate will increase by an additional 2.00% per \$25.00 stated liquidation preference, or \$0.50 per annum per Series A Preferred Share, commencing on and after the day following such second dividend payment date. On each subsequent dividend payment date on which cash dividends on the Series A Preferred Shares are not declared and paid, the annual dividend rate on the Series A Preferred Shares payable shall increase by an additional 2.00% per annum per \$25.00 stated liquidation preference per Series A Preferred Share, up to a maximum annual dividend rate on the Series A Preferred Shares of 19.00%. The increase in dividend rates would have a detrimental effect on the value of the Company and the holders of its common stock.

In addition, while the voting rights of Series A Preferred Shares is extremely limited, in the event that we fail to pay six quarterly dividends, whether consecutive or not, on the Series A Preferred Shares or fail to maintain a listing on a national securities exchange, the holders of Series A Preferred Shares will have the right, voting together as a class with all other classes or series of parity securities upon which like voting rights have conferred and are exercisable, to elect two additional directors to serve on our board of directors. The appointment of such two designees to our board of directors could inhibit our ability to execute our business plan and pursue additional acquisitions.

If securities or industry analysts do not publish research about our business, or publish negative reports about our business, our stock price and trading volume could decline.

The trading market for our common stock, to some extent, depends on the research and reports that securities or industry analysts publish about our business. We do not have any control over these analysts. If one or more of the analysts who cover us downgrade our shares or lower their opinion of our shares, our share price may decline. If one or more of these analysts ceases coverage of our business or fails to regularly publish reports on us, we could lose visibility in the financial markets, which could cause our share price or trading volume to decline.

Risks Related to our 9.75% Series A Cumulative Redeemable Perpetual Preferred Stock (“Series A Preferred Shares”).

We cannot assure you that quarterly dividends on, or any other payments in respect of, the Series A Preferred Shares will be made timely or at all.

We cannot assure you that we will be able to pay quarterly dividends on the Series A Preferred Shares or to redeem the Series A Preferred Shares, if we wanted to do so. Quarterly dividends on our Series A Preferred Shares will be paid from funds legally available for such purpose when, as and if declared by our board of directors. You should be aware that certain factors may influence our decision, or adversely affect our ability, to pay dividends on, or make other payments in respect of, our Series A Preferred Shares, including, among other things:

- the amount of our available cash or other liquid assets, including the impact of any liquidity shortfalls caused by the below-described restrictions on the ability of our subsidiaries to generate and transfer cash to us;
- any of the events described our filings with the SEC or the documents incorporated by reference herein or therein that impact our future financial position or performance;
- our ability to service and refinance our current and future indebtedness;
- changes in our cash requirements to fund capital expenditures, acquisitions or other operational or strategic initiatives;
- our ability to borrow or raise additional capital to satisfy our capital needs;

- restrictions imposed by our existing, or any future, credit facilities, debt securities or leases, including restricted payment and leverage covenants that could limit our ability to make payments to holders of the Series A Preferred Shares; and
- limitations on cash payments to shareholders under Delaware law, including limitations that require dividend payments be made out of surplus or, subject to certain limitations, out of net profits for the then-current or preceding year in the event there is no surplus.

Based on its evaluation of these and other relevant factors, our board of directors may, in its sole discretion, decide not to declare a dividend on the Series A Preferred Shares for any quarterly period for any reason, regardless of whether we have funds legally available for such purpose. In such event, the sole recourse will be the rights as a holder of Series A Preferred Shares specified in the

certificate of designation for such shares, including the right to cumulative dividends and the further right under certain specified circumstances to additional interest and limited conditional voting rights.

In addition, under our credit facility, we are prohibited from declaring and paying dividends unless: (i) there are no existing events of default under the credit facility or an event of default would not be caused by the declaration or payment of such dividend, and (ii) the amount available under the credit facility after the pro forma effect of such dividend is equal to the greater of 20% of the borrowing base under the credit facility or \$5.0 million.

The Series A Preferred Shares represent perpetual equity interests.

The Series A Preferred Shares represent perpetual equity interests in us and, unlike our indebtedness, will not entitle the holders thereof to receive payment of a principal amount at a particular date. As a result, holders of the Series A Preferred Shares may be required to bear the financial risks of an investment in the Series A Preferred Shares for an indefinite period of time. In addition, the Series A Preferred Shares will rank junior to all our indebtedness and other liabilities, and to any other senior securities we may issue in the future with respect to assets available to satisfy claims against us.

Increases in market interest rates may adversely affect the trading price of our Series A Preferred Shares.

One of the factors that will influence the trading price of our Series A Preferred Shares will be the dividend yield on the Series A Preferred Shares relative to market interest rates. An increase in market interest rates, which are currently at low levels relative to historical rates, may reduce demand for our Series A Preferred Shares and would likely increase our borrowing costs and potentially decrease funds available for distribution. Accordingly, higher market interest rates could cause the market price of our Series A Preferred Shares to decrease.

The Series A Preferred Shares have not been rated, and the lack of a rating may adversely affect the trading price of the Series A Preferred Shares.

We have not sought to obtain a rating for the Series A Preferred Shares, and the shares may never be rated. It is possible, however, that one or more rating agencies might independently determine to assign a rating to the Series A Preferred Shares or that we may elect to obtain a rating of our Series A Preferred Shares in the future. In addition, we may elect to issue other securities for which we may seek to obtain a rating. The market value of the Series A Preferred Shares could be adversely affected if:

- any ratings assigned to the Series A Preferred Shares in the future or to other securities we issue in the future are lower than market expectations or are subsequently lowered or withdrawn, or
- ratings for such other securities would imply a lower relative value for the Series A Preferred Shares.

Our Series A Preferred Shares are junior to our debt liabilities and lease obligations, the debt and other liabilities of our subsidiaries and third-party holders' of equity interests in our subsidiaries and the interests could be diluted by our issuance of additional shares of preferred stock, including additional Series A Preferred Shares, and by other transactions.

Our Series A Preferred Shares are subordinated to all of our existing and future indebtedness and lease obligations. As of June 30, 2016, we and our subsidiaries had outstanding indebtedness and liabilities of approximately \$144.3 million, all of which is senior in right of payment to the Series A Preferred Shares. Our existing indebtedness restricts, and our future indebtedness may include restrictions on our ability to pay dividends to preferred shareholders.

Our certificate of incorporation currently authorizes the issuance of up to five million shares of preferred stock in one or more classes or series, and we will be permitted, without notice to or consent of the holders of Series A Preferred

Shares, to issue additional Series A Preferred Shares or other securities that have rights junior to such shares, up to the maximum aggregate number of authorized shares of our preferred stock. The issuance of additional preferred stock on a parity with or senior to our Series A Preferred Shares would dilute the interests of the holders of our Series A Preferred Shares, and any issuance of preferred stock senior to or on a parity with our Series A Preferred Shares or of additional indebtedness could adversely affect our ability to pay dividends on, redeem or pay the liquidation preference on our Series A Preferred Shares.

Except in limited circumstances, no provisions relating to our Series A Preferred Shares protect the holders of our Series A Preferred Shares in the event of a highly leveraged or other transaction, including a merger or the sale, lease or conveyance of all or substantially all our assets or business, any of which might adversely affect the holders of our Series A Preferred Shares.

Holders of Series A Preferred Shares have extremely limited voting rights.

The voting rights of Series A Preferred Shares is extremely limited. However, in the event that six quarterly dividends, whether consecutive or not, payable on Series A Preferred Shares are in arrears or a listing failure has occurred and is continuing, the holders of Series A Preferred Shares will have the right, voting together as a class with all other classes or series of parity securities upon which like voting rights have conferred and are exercisable, to elect two additional directors to serve on our board of directors.

Investors should not expect us to redeem the Series A Preferred Shares on the date the Series A Preferred Shares becomes redeemable by the Company or on any particular date afterwards.

The shares of Series A Preferred Shares have no maturity or mandatory redemption date and are not redeemable at the option of investors under any circumstances. By their terms, the Series A Preferred Shares may be redeemed by us at our option either in whole or in part at any time on or after December 20, 2018 or, under certain circumstances, may be redeemed by us at our option, in whole, sooner than that date. Any decision we may make at any time regarding whether to redeem the Series A Preferred Shares will depend upon a wide variety of factors, including our evaluation of our capital position, our capital requirements and general market conditions at that time. You should not assume that we will redeem the Series A Preferred Shares at any particular time, or at all.

The Series A Preferred Shares are not convertible and purchasers may not realize a corresponding benefit if the trading price of our common stock rises.

The Series A Preferred Shares will not be convertible into common shares or other of our securities and will not have exchange rights or be entitled or subject to any preemptive or similar rights. In addition, the Series A Preferred Shares will earn dividends at a fixed rate (subject to adjustment). Accordingly, as noted in greater detail above, the market value of the Series A Preferred Shares may depend on, among other things, dividend and interest rates for other securities and other investment alternatives and our actual and perceived ability to make dividend or other payments in respect of our Series A Preferred Shares. Moreover, our right to redeem the Series A Preferred Shares on or after December 20, 2018 or in the event of a change in control could impose a ceiling on their value.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our principal executive offices are located in Bellevue, Washington. We also conduct business from Company-owned offices operating from the following leased locations:

Phoenix, Arizona	Bloomington, Minnesota	Portland, Oregon
Woodridge, Illinois	Southaven, Mississippi	Folcroft, Pennsylvania
Hebron, Kentucky	Woodbridge, New Jersey	Laredo, Texas
Louisville, Kentucky	Jamaica, New York	Mississauga, Ontario, Canada

We believe our current offices are adequately covered by insurance and are sufficient to support our operations for the foreseeable future.

ITEM 3. LEGAL PROCEEDINGS

From time to time, we and our operating subsidiaries are involved in claims, proceedings and litigation arising in the ordinary course of business, some of which are in the very early stages of litigation and therefore difficult to judge their potential materiality. For those claims for which we can judge the materiality, in the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on our consolidated financial position, results of operations or liquidity. Legal expenses are expensed as incurred. A summary of potential material litigation is as follows.

DBA Distribution Services, Inc. – Bretta Santini Pollara v. Radiant Logistics, Inc., United States District Court, Central District of California, Case No. 12-344 GAF

In December 2012, we recovered an award in arbitration against the former shareholders of DBA. The award arose out of a prior arbitration action against the former shareholders of DBA in which we asserted, among others, certain claims for indemnification

under the Agreement and Plan of Merger (the “DBA Agreement”) dated March 29, 2011, based upon breaches we believe occurred under the DBA Agreement. These breaches included, among others, the breach of certain non-competition and non-solicitation covenants by Paul Pollara, one of the DBA selling shareholders, and Bretta Santini Pollara, a former DBA employee and wife of Mr. Pollara.

In a related matter, in December 2011, Ms. Pollara filed a claim for declaratory relief against us seeking an order stipulating that she is not bound by the non-compete covenant contained within the DBA Agreement signed by her husband, Mr. Pollara. On January 23, 2012, we filed a counterclaim against Ms. Pollara, her company Santini Productions, Daniel Reffner (a former employee of the Company now working for Ms. Pollara), and Oceanair, Inc. (“Oceanair”, a company doing business with Santini Productions). Our counterclaim alleges claims for, among others, statutory and common law misappropriation of trade secrets, and sought damages in excess of \$1.0 million.

In April 2014, a jury returned a verdict in our favor in the amount of \$1.5 million, however, the judge entered a judgment notwithstanding the verdict and dismissed the case. We appealed the judgment to the 9th Circuit Court of Appeals. Santini and Oceanair also appealed the trial court’s denial of fees. On May 17, 2016, the Court of Appeals turned down the appeals of both sides and the case is now finished.

Ingrid Barahona v. Accountabilities, Inc. d/b/a Accountabilities Staffing, Inc., Radiant Global Logistics, Inc. and DBA Distribution Services, Superior Court of the State of California, Los Angeles County, Case No. BC525802

On October 25, 2013, plaintiff Ingrid Barahona filed a purported class action lawsuit against Radiant Global Logistics, Inc. (“Radiant”), DBA, and two third-party staffing companies (collectively, the “Staffing Defendants”) with whom Radiant and DBA contracted for temporary employees. In the lawsuit, Ms. Barahona, on behalf of herself and the putative class, seeks damages and penalties under California law, plus interest, attorneys’ fees, and costs, along with equitable remedies, alleging that she and the putative class were the subject of unfair and unlawful business practices, including certain wage and hour violations relating to, among others, failure to provide meal and rest periods, failure to pay minimum wages and overtime, and failure to reimburse employees for work-related expenses. Ms. Barahona alleges that she and the putative class members were jointly employed by the staffing companies and Radiant and DBA. Radiant and DBA deny Ms. Barahona’s allegations in their entirety, deny that we are liable to Ms. Barahona or the putative class members in any way, and are vigorously defending against these allegations based upon our preliminary evaluation of applicable records and legal standards.

If Ms. Barahona’s allegations were to prevail on all claims we, as well as our co-defendants, could be liable for uninsured damages in an amount that, while not significant when evaluated against either our assets or current and expected level of annual earnings, could be material when judged against our earnings in the particular quarter in which any such damages arose, if at all. However, based upon our preliminary evaluation of the matter, we do not believe we are likely to incur material damages, if at all, since, among others: (i) the amount of any potential damages remains highly speculative at this stage of the proceedings; (ii) we do not believe as a matter of law we should be characterized as Ms. Barahona’s employer; (iii) any settlement will be properly apportioned between all named defendants and Radiant and DBA will not exclusively fund the settlement; (iv) wage and hour class actions of this nature typically settle for amounts significantly less than plaintiffs’ demands because of the uncertainty with litigation and the difficulty in taking these types of cases to trial; and (v) Plaintiff has indicated her desire to resolve this matter through a mediated settlement. Plaintiff recently admitted in a report to the court that she is unable to prosecute the case because the payroll and personnel records she needs are in the possession of Tri-State and/or Accountabilities, and the case has been stayed as to them pending resolution of their chapter 11 bankruptcy proceedings. In January 2016, the court held a status conference, which has since been continued until October 31, 2016 so the parties can attempt to obtain the necessary documents. DBA and Radiant are currently attempting to obtain the necessary records through the Tri-State and Accountabilities’ Trustee. At this time, we are unable to express an opinion as to the likely outcome of the matter.

High Protection Company, a Utah Corporation, Plaintiff v. Professional Air Transportation, LLC, a Utah Limited Liability Company, d/b/a ADCOM, SLC; Radiant Logistics, Inc., a Foreign Corporation; ADCOM World-Wide,, an Operating Division of Radiant Logistics, Inc.; Radiant Global Logistics, Inc., a Foreign Corporation, d/b/a Container Lines; Felipe Lake, an Individual, Rubens Correa, an Individual; and Does 1-100, Defendants, United States District Court for the District Court of Utah (Central), Civil Docket No. 2:14-cv-00466-TC-BCW (formerly Salt Lake County, Utah, Case # 140902965)

On or about May 27, 2014, we, together with our co-defendants, including certain of our subsidiaries, were sued in the Third Judicial District Court, Salt Lake County, State of Utah. The matter was subsequently removed to the Federal Courts in the United States District Court, for the District of Utah. The lawsuit alleges liability and damages arising from the ocean shipment of five (5) armored vehicles from Jordan to the Kandahar Air Base, Afghanistan, commencing in August, 2011.

On April 10, 2011, the Plaintiff, High Protection Company, was awarded a contract from the United States Army in the amount of \$0.7 million for the manufacture and delivery of five armored vehicles. The vehicles were to be delivered to the Kandahar Airfield in Kandahar, Afghanistan, by May 16, 2011. The delivery of the vehicles was delayed into 2013 due to various delays that occurred during the shipping process, including the closing of the border between Pakistan and Afghanistan from November 2011 to July 2012. In June 2013, the United States Army terminated its contract with the Plaintiff. Plaintiff asserted damages against us and our co-defendants in excess of \$1.0 million, including loss of a \$0.7 million contract with the United States Army, demurrage and storage charges now alleged to exceed \$0.2 million, and loss of the vehicles.

Based upon our preliminary understanding of the claims, we do not believe it is likely that we will be exposed to damages, or damages that are material, since, among others: (i) we are insured for claims of this nature subject to a \$1.0 million aggregate limit for all claims made and reported during the policy period (subject to a typical reservation of rights letter received from the Underwriter); (ii) we believe the Plaintiff's losses, if any, were due, to a material extent, to its own contributory negligence; and (iii) the Plaintiff's claim should be limited as a result of the limitations upon liability contained within the air bill of lading and other shipping documents used in the transaction.

A mediation took place in early 2016 and the parties were unable to come to a resolution. We expect to continue to file motions and conduct additional discovery until January 2017, at which time the Court may request additional oral argument or additional briefing for the purposes of rendering determination on the outstanding motions and certain legal issues. Since the proceeding remains in its early stages, the Company is unable at this time to express an opinion as to the outcome of this matter.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock trades on the NYSE MKT under the symbol "RLGT." The following table states the range of the high and low sales price per share, as applicable, of our common stock for each calendar quarter during our past two fiscal years as reported by the NYSE MKT. The last price of our common stock as reported on the NYSE MKT on August 31, 2016, was \$2.92 per share.

	High	Low
Year ended June 30, 2016:		
Quarter ended June 30, 2016	\$4.19	\$4.06
Quarter ended March 31, 2016	3.78	3.64
Quarter ended December 31, 2015	4.57	4.30
Quarter ended September 30, 2015	7.75	7.50
Year ended June 30, 2015:		
Quarter ended June 30, 2015	\$8.00	\$4.86
Quarter ended March 31, 2015	5.33	4.10
Quarter ended December 31, 2014	4.24	3.65
Quarter ended September 30, 2014	4.00	2.93

Holders

As of August 31, 2016, the number of stockholders of record of our common stock was 117.

Dividend Policy

We have never declared or paid cash dividends on our common stock. In addition, we and our subsidiaries are subject to certain restrictions on declaring dividends under our existing credit facilities and the Certificate of Designation of our 9.75% Series A Cumulative Redeemable Perpetual Preferred Stock. We currently do not anticipate declaring or paying any cash dividends in the foreseeable future on our common stock. Any future determination to declare cash dividends will be made at the discretion of our board of directors, subject to applicable laws and contractual restrictions, and will depend on our financial condition, results of operations, capital requirements, general business conditions and other factors that our board of directors may deem relevant.

Transfer Agent

The transfer agent and registrar for our common stock is Broadridge Corporate Issuer Solutions, Inc. The transfer agent and registrar's address is 1717 Arch Street, Suite 1300, Philadelphia, Pennsylvania 19103.

Recent Issuance of Unregistered Securities

In December 2015, we issued 7,385 shares of common stock to the former shareholders of Copper in satisfaction of \$31,250 of the purchase price.

We did not utilize or engage a principal underwriter in connection with the above securities transaction. The above securities were only offered, sold to or transacted with earn-outs to “accredited investors” as that term is defined in Rule 501 of Regulation D, promulgated under the Securities Act of 1933, as amended. Management believes the above shares of common stock were issued pursuant to the exemption from registration under Section 4(a)(2) of the Securities Act of 1933, as amended.

ITEM 6. SELECTED FINANCIAL DATA

Not applicable.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and result of operations should be read in conjunction with the consolidated financial statements and the related notes and other information included elsewhere in this report.

Overview

We operate as a third party logistics company, providing multi-modal transportation and logistics services primarily in the United States and Canada. We service a large and diversified account base consisting of consumer goods, food and beverage, manufacturing and retail customers which we support from an extensive network of approximately 140 operating locations across North America as well as an integrated international service partner network located in other key markets around the globe. We provide these services through a multi-brand network including 18 Company-owned offices. As a third party logistics company, we have approximately 10,000 asset-based transportation companies, including motor carriers, railroads, airlines and ocean lines in our carrier network. We believe shippers value our services because we are able to objectively arrange the most efficient and cost-effective means, type and provider of transportation service without undue influence caused by the ownership of transportation assets. In addition, our minimal investment in physical assets affords us the opportunity for a higher return on invested capital and net cash flows than our asset-based competitors.

Through our operating locations across North America, we offer domestic and international air and ocean freight forwarding services and freight brokerage services including truckload services, LTL services, and intermodal services, which is the movement of freight in trailers or containers by combination of truck and rail. Our primary business operations involve arranging the shipment, on behalf of our customers, of materials, products, equipment and other goods that are generally larger than shipments handled by integrated carriers of primarily small parcels, such as FedEx, DHL and UPS, including arranging and monitoring all aspects of material flow activity utilizing advanced information technology systems. We also provide other value-added logistics services, including customs brokerage and materials management and distribution solutions to complement our core transportation service offering.

We expect to grow our business organically and by completing acquisitions of other companies with complementary geographic and logistics service offerings. Our organic growth strategy will continue to focus on strengthening existing and expanding new customer relationships leveraging the benefit of our new truck brokerage and intermodal service offerings, while continuing our efforts on the organic build-out of our network of strategic operating partner locations. In addition to our focus on organic growth, we continue to search for acquisition candidates that bring critical mass from a geographic standpoint, purchasing power and/or complementary service offerings to the current platform. As we continue to grow and scale our business, we believe that we are creating density in our trade lanes which creates opportunities for us to more efficiently source and manage our transportation capacity. In addition, we remain focused on leveraging our back-office infrastructure to drive productivity improvement across the organization.

Performance Metrics

Our principal source of income is derived from freight forwarding and freight brokerage services we provide to our customers. As a third party logistics provider, we arrange for the shipment of our customers' freight from point of origin to point of destination. Generally, we quote our customers a turnkey cost for the movement of their freight. Our price quote will often depend upon the customer's time-definite needs (first day through fifth day delivery), special handling needs (heavy equipment, delicate items, environmentally sensitive goods, electronic components, etc.), and the means of transport (motor carrier, air, ocean or rail). In turn, we assume the responsibility for arranging and paying

for the underlying means of transportation.

Our transportation revenue represents the total dollar value of services we sell to our customers. Our cost of transportation includes direct costs of transportation, including motor carrier, air, ocean and rail services. Our net transportation revenue (gross transportation revenue less the direct cost of transportation) is the primary indicator of our ability to source, add value and resell services provided by third parties, and is considered by management to be a key performance measure. In addition, management believes measuring its operating costs as a function of net transportation revenue provides a useful metric, as our ability to control costs as a function of net transportation revenue directly impacts operating earnings.

Our operating results will be affected as acquisitions occur. Since all acquisitions are made using the purchase method of accounting for business combinations, our financial statements will only include the results of operations and cash flows of acquired companies for periods subsequent to the date of acquisition.

Our GAAP-based net income will be affected by non-cash charges relating to the amortization of customer related intangible assets and other intangible assets attributable to completed acquisitions. Under applicable accounting standards, purchasers are required to allocate the total consideration in a business combination to the identified assets acquired and liabilities assumed based on their fair

values at the time of acquisition. The excess of the consideration paid over the fair value of the identifiable net assets acquired is to be allocated to goodwill, which is tested at least annually for impairment. Applicable accounting standards require that we separately account for and value certain identifiable intangible assets based on the unique facts and circumstances of each acquisition. As a result of our acquisition strategy, our net income will include material non-cash charges relating to the amortization of customer related intangible assets and other intangible assets acquired in our acquisitions. Although these charges may increase as we complete more acquisitions, we believe we will be growing the value of our intangible assets (e.g., customer relationships). Thus, we believe that earnings before interest, taxes, depreciation and amortization, or EBITDA, is a useful financial measure for investors because it eliminates the effect of these non-cash costs and provides an important metric for our business.

EBITDA is a non-GAAP measure of income and does not include the effects of preferred stock dividends, interest and taxes, and excludes the “non-cash” effects of depreciation and amortization on long-term assets. Companies have some discretion as to which elements of depreciation and amortization are excluded in the EBITDA calculation. We exclude all depreciation charges related to technology and equipment, all amortization charges (including amortization of leasehold improvements), and other intangible assets. We then further adjust EBITDA to exclude changes in contingent consideration, expenses specifically attributable to acquisitions, severance and lease termination costs, foreign exchange gains and losses, extraordinary items, share-based compensation expense, non-recurring litigation expenses, and other non-cash charges. Adjusted EBITDA is then normalized by excluding non-recurring transition costs. While management considers EBITDA, adjusted EBITDA, and normalized adjusted EBITDA useful in analyzing our results, it is not intended to replace any presentation included in our consolidated financial statements.

Our operating results are also subject to seasonal trends when measured on a quarterly basis. The impact of seasonality on our business will depend on numerous factors, including the markets in which we operate, holiday seasons, consumer demand and economic conditions. Since our revenue is largely derived from customers whose shipments are dependent upon consumer demand and just-in-time production schedules, the timing of our revenue is often beyond our control. Factors such as shifting demand for retail goods and/or manufacturing production delays could unexpectedly affect the timing of our revenue. As we increase the scale of our operations, seasonal trends in one area of our business may be offset to an extent by opposite trends in another area. We cannot accurately predict the timing of these factors, nor can we accurately estimate the impact of any particular factor, and thus we can give no assurance any historical seasonal patterns will continue in future periods.

Critical Accounting Policies

Accounting policies, methods and estimates are an integral part of the consolidated financial statements prepared by management and are based upon management’s current judgments. These judgments are normally based on knowledge and experience regarding to past and current events and assumptions about future events. Certain accounting policies, methods and estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ from management’s current judgments. While there are a number of accounting policies, methods and estimates that affect our financial statements, the areas that are particularly significant include revenue recognition, accruals for the cost of purchased transportation, the fair value of acquired assets and liabilities, changes in contingent consideration, accounting for the issuance of shares and share-based compensation, the assessment of the recoverability of long-lived assets, acquired intangible assets, goodwill, and the establishment of an allowance for doubtful accounts.

We perform an annual impairment test for goodwill as of April 1 of each year, unless events or circumstances indicate impairment may have occurred before that time. We assess qualitative factors to determine whether it is more likely than not that the fair value of the reporting unit is less than the carrying amount. After assessing qualitative factors, if further testing is necessary we would go into a 2-step impairment test. The first step of the impairment test requires us to determine the fair value of each reporting unit, and compare the fair value to the reporting unit’s carrying amount.

To the extent a reporting unit's carrying amount exceeds its fair value, an indication exists that the reporting unit's goodwill may be impaired and we must perform a second more detailed impairment assessment. The second impairment assessment involves allocating the reporting unit's fair value to all of its recognized and unrecognized assets and liabilities in order to determine the implied fair value of the reporting unit's goodwill as of the assessment date. The implied fair value of the reporting unit's goodwill is then compared to the carrying amount of goodwill to quantify an impairment charge as of the assessment date.

Acquired intangibles consist of customer related intangibles, trade names and trademarks, and non-compete agreements arising from our acquisitions. Customer related intangibles are amortized using the straight-line method over a period of up to 10 years, trademarks and trade names are amortized using the straight line method over 15 years, and non-compete agreements are amortized using the straight line method over the term of the underlying agreements.

We review long-lived assets to be held-and-used for impairment whenever events or changes in circumstances indicate the carrying amount of the assets may not be recoverable. If the sum of the undiscounted expected future cash flows over the remaining useful life of a long-lived asset is less than its carrying amount, the asset is considered to be impaired. Impairment losses are measured as the

amount by which the carrying amount of the asset exceeds the fair value of the asset. When fair values are not available, we estimate fair value using the expected future cash flows discounted at a rate commensurate with the risks associated with the recovery of the asset. Assets to be disposed of are reported at the lower of carrying amount or fair value less costs to sell.

As a non-asset based carrier, we do not generally own transportation assets. We do, however, own certain trailers and refrigerated trailers that we use in our business. We generate the majority of our air and ocean freight forwarding and freight brokerage revenues by purchasing transportation services from direct (asset-based) carriers and reselling those services to our customers. Based upon the terms in the contract of carriage, freight forwarding revenues related to shipments where we issue a House Airway Bill or a House Ocean Bill of Lading are recognized at the time the freight is tendered to the direct carrier at origin. Costs related to the shipments are also recognized at this same time based upon anticipated margins, contractual arrangements with direct carriers, and other known factors. The estimates are routinely monitored and compared to actual invoiced costs. The estimates are adjusted as deemed necessary by us to reflect differences between the original accruals and actual costs of purchased transportation. This method generally results in recognition of revenues and purchased transportation costs earlier than the preferred methods under GAAP which do not recognize revenue until a proof of delivery is received or which recognize revenue as progress on the transit is made. Our method of revenue and cost recognition does not result in a material difference from amounts that would be reported under such other methods.

All other revenue, including revenue from other value-added services including freight brokerage services, customs brokerage services and warehousing and fulfillment services, is recognized upon completion of the service.

Results of Operations

Fiscal year ended June 30, 2016, compared to fiscal year ended June 30, 2015

The following table summarizes transportation revenue, cost of transportation and net transportation revenue by geographic operating segments for the fiscal years ended June 30, 2016 and 2015 (in thousands):

	Year Ended June 30, 2016				Year Ended June 30, 2015			
	United States	Canada	Corporate/ Eliminations	Total	United States	Canada	Corporate/ Eliminations	Total
Transportation revenue								
Forwarding	\$538,011	\$2,486	\$(358)	\$540,139	\$434,976	\$3,427	\$—	\$438,403
Brokerage	139,530	99,008	(4,316)	234,222	37,575	25,881	(941)	62,515
	677,541	101,494	(4,674)	774,361	472,551	29,308	(941)	500,918
Cost of transportation

Brokerage	127,419	83,959	(4,316)	207,062	33,805	22,262	(941)	55,126

Edgar Filing: RADIANT LOGISTICS, INC - Form 10-K

	514,805	85,703	(4,674)	595,834	355,509	24,374	(941)	378,942
Net transportation revenue								
Forwarding	150,625	742	—	151,367	113,272	1,315	—	114,587
Brokerage	12,111	15,049	—	27,160	3,770	3,619	—	7,389
	162,736	15,791	—	178,527	117,042	4,934	—	121,976
Net transportation margins								
	24.0 %	15.6 %		23.1 %	24.8 %	16.8 %		24.4 %
Other value-added services								
	4,866	3,268	—	8,134	1,132	615	—	1,747
Net revenues	\$ 167,602	\$ 19,059	\$ —	\$ 186,661	\$ 118,174	\$ 5,549	\$ —	\$ 123,723

Transportation revenues for the year ended June 30, 2016 were \$774.4 million, consisting of Forwarding revenues of \$540.1 million and Brokerage revenues of \$234.2 million, compared to Transportation revenues of \$500.9 million for the year ended June 30, 2015, consisting of Forwarding revenues of \$438.4 million and Brokerage revenues of \$62.5 million. Total Transportation revenues for the year ended June 30, 2016 increased \$273.4 million, or 54.6%, over Transportation revenues for the year ended June 30, 2015. The increase in Forwarding revenues is attributable to the acquisition of Wheels and SBA, a full year of revenues for DCA and the addition of several new strategic operating partner locations. The increase in Brokerage revenues is due to a full year of revenues for Wheels. Net transportation margins were 23.1% for the year ending June 30, 2016 compared to 24.4% for the prior year period. The decrease in net margins is primarily attributable to the substantial brokerage operations added through the Wheels acquisition, which have lower margin characteristics than the forwarding operations. Net revenues were \$186.7 million for the year ended June 30, 2016 compared to \$123.7 million for the year ended June 30, 2015, representing an increase of \$63.0 million, or 50.9%.

---------------------	----------	---------	-------------	------------	----------	-------	-------------	---------

Operating partner commissions increased approximately \$24.1 million, or 40.0%, to \$84.5 million for the year ended June 30, 2016 primarily due to a full year of operations of SBA which added approximately 40 strategic operating partner locations whom are paid commissions, changes in sales mix with a higher percentage of domestic revenues, which tend to create higher commissions, compared to international revenues, and new strategic operating partners who joined the Radiant network.

Personnel costs increased approximately \$19.9 million, or 58.2%, to \$54.1 million for the year ended June 30, 2016 primarily due to a full year of operations associated with the acquisitions of Wheels, SBA, DCA and Highways, as well as increased investment in the management structure of the organization.

Selling, general and administrative (“SG&A”) expenses increased approximately \$10.3 million, or 67.3%, to \$25.7 million for the year ended June 30, 2016 primarily due to normal expenses associated with the acquisitions of Wheels, SBA, DCA and Highways which included increased costs for facilities, IT, communication and travel. Additionally, increased professional fees, insurance and claims were incurred due to an overall larger organization after recent acquisitions, offset partially by lower legal fees.

Depreciation and amortization costs increased approximately \$5.6 million, or 89.2%, to \$12.0 million for the year ended June 30, 2016 primarily due to increased amortization associated with a full year of the Wheels, SBA, DCA and Highways acquisitions from fiscal year 2015.

Transition and lease termination costs were \$5.9 million for the year ended June 30, 2016, compared to \$0.8 million for the year ended June 30, 2015. Transition and lease termination costs for the year ended June 30, 2016 were due to consolidation at the Wheels Toronto location and non-recurring personnel costs in connection with the winding-down of SBA's historical back-office operations.

Transition and lease termination costs for the year ended June 30, 2015 were due to the exit and downsizing of the former DBA warehouse and corporate headquarters in New Jersey to a smaller location, similar costs associated with a consolidation effort at the Wheels Toronto location, and non-recurring personnel costs in connection with the winding-down of SBA's historical back-office operations.

Impairment of acquired intangible assets is attributable to the customer related intangibles associated with On Time.

Change in contingent consideration represents the change in the fair value of contingent consideration due to former shareholders of acquired operations. There was a loss from change in contingent consideration of \$1.0 million for the year ended June 30, 2016, compared to a gain of \$3.9 million for the year ended June 30, 2015. The change is primarily attributable to an increase in management's estimates of future pay-outs with respect to DCA, PCA, and Highways, offset by a decrease in management's estimated future pay-outs for On Time, as it has not achieved its specified operating objectives.

Other expenses increased approximately \$2.4 million to \$5.0 million for the year ended June 30, 2016 primarily due to higher interest expense on indebtedness used to acquire Wheels and a loss on write off of loan fees, partially offset by foreign exchange gains.

Our net loss is principally due to increased depreciation, amortization, and interest expenses compared to the prior year, partially offset by an income tax benefit.

Our future financial results may be impacted by amortization of intangibles resulting from acquisitions as well as gains or losses from changes in contingent consideration that are difficult to predict.

Edgar Filing: RADIANT LOGISTICS, INC - Form 10-K

The following table provides a reconciliation for the fiscal years ended June 30, 2016 and 2015 of normalized adjusted EBITDA to net income (loss), the most directly comparable GAAP measure in accordance with SEC Regulation G (in thousands):

	Year Ended June 30, 2016				Year Ended June 30, 2015			
	United States	Canada	Corporate/ Eliminations	Total	United States	Canada	Corporate/ Eliminations	Total

Liquidity and Capital Resources

Net cash provided by operating activities was \$21.4 million for the year ended June 30, 2016, compared to \$2.1 million for the year ended June 30, 2015. The change is primarily attributable to our net income (loss) adjusted for amortization, contingent consideration, loss on the write-off of loan fees, lease termination costs, and changes in operating assets and liabilities (primarily the changes in accounts receivable and accounts payable).

Net cash used for investing activities was \$4.4 million for the year ended June 30, 2016, compared to \$47.9 million for the year ended June 30, 2015. Use of cash in 2016 consisted of the purchase of \$3.7 million of technology and equipment, \$0.8 million related to an acquisition, payments to former shareholders of acquired operations of \$0.7 million, partially offset by proceeds from the sale of technology and equipment of \$0.8 million. Use of cash in 2015 consisted of \$44.0 million related to acquisitions and the purchase of \$4.1 million of technology and equipment, partially offset by proceeds from the sale of technology and equipment of \$0.2 million.

Net cash used for financing activities was \$19.6 million for the year ended June 30, 2016, compared to net cash provided of \$50.6 million for the year ended June 30, 2015. The cash used in 2016 consisted of repayments to our credit facility of \$27.9 million, repayment of notes payable of \$26.3 million, preferred dividend payments of \$2.0 million, payments of contingent consideration made to former shareholders of acquired operations of \$1.6 million and payments of employee tax withholdings related to net share settlements of stock option exercises of \$0.3 million, partially offset by proceeds from the offering of \$38.4 million of common stock. Cash from financing activities in 2015 consisted of proceeds from our credit facility of \$30.6 million, proceeds from note payable of \$25.5 million, a tax benefit from the exercise of stock options of \$3.3 million and proceeds from the sale of common stock of \$0.1

million, offset by payment of employee tax withholdings related to net share settlements of stock option exercises of \$3.8 million, preferred dividend payments of \$2.0 million, payment of contingent consideration to former shareholders of acquired operations of \$1.5 million, payment of \$1.4 million of loan fees, payment of \$0.2 million of shelf registration costs, and \$0.1 million in non-controlling interest distributions.

Given our continued focus on the build-out of our network of operating partner locations, we believe that our current working capital and anticipated cash flow from operations are adequate to fund existing operations for the next 12 months. However, continued growth through strategic acquisitions will require additional sources of financing as our existing working capital is not sufficient to finance our operations and an acquisition program. Thus, our ability to finance future acquisitions will be limited by the availability of additional capital. We may, however, finance acquisitions using our common stock as all or some portion of the consideration. In the event that our common stock does not attain or maintain a sufficient market value or potential acquisition candidates are otherwise unwilling to accept our securities as part of the purchase price for the sale of their businesses, we may be required to utilize more of our cash resources, if available, in order to continue our acquisition program. If we do not have sufficient cash resources through either operations or from debt facilities, our growth could be limited unless we are able to obtain such additional capital.

Acquisitions

Below are descriptions of recent material acquisitions in the last two fiscal years including a breakdown of consideration paid at closing and future potential earn-out payments. We define “material acquisitions” as those with aggregate potential consideration of \$10.0 million or more.

On April 2, 2015, we acquired Wheels Group, Inc., one of the largest 3PL and transportation service providers in Canada, for aggregate consideration of approximately CAD\$33.8 million and 6,900,000 shares of our common stock, in addition to the refinancing of Wheels’ outstanding indebtedness of approximately CAD\$32.0 million. Wheels provides 3PL intermodal and truck brokerage services throughout the United States and Canada along with third party logistics solutions and value-added warehouse and distribution service offerings in support of U.S. shippers looking to access the Canadian markets.

On June 8, 2015, we acquired SBA, a domestic and international air freight forwarder serving manufacturers, distributors and retailers through a combination of three company-owned operating locations and forty independent agency locations across North America. The transaction was valued at approximately \$12.0 million in cash and remains subject to certain hold-back provisions.

Technology

A primary component of our business strategy is the continued development and implementation of advanced information systems to provide accurate and timely information to our management, strategic operating partners and customers. During the year ended June 30, 2016, we spent approximately \$3.0 million on enhancing our technology and software systems in order to increase our operating efficiency. This included an upgrade to our accounting system as well as investments in our overall network infrastructure. We intend to spend in excess of this amount during the year ended June 30, 2017 in order to continue improving our technology systems, which we expect will include the implementation of a key transportation management system that will, among other things, more fully integrate into our systems our strategic operating partners and any new operations that we may acquire in the future.

Senior Credit Facility

We have a USD\$65.0 million revolving credit facility (the “Senior Credit Facility”) with Bank of America, N.A. (“BofA”) on its own behalf and as agent to the other lenders named therein, currently consisting of the Bank of Montreal (as the initial member of the syndicate under such loan). The Senior Credit Facility matures on August 9, 2018 and is collateralized by a first-priority security interest in all of the assets of the U.S. co-borrowers, a first-priority security interest in all of the accounts receivable and associated assets of the Canadian co-borrowers (the “Canadian A/R Assets”) and a second-priority security interest on the other assets of the Canadian borrowers. Advances under the Senior Credit Facility were used to fund the Wheels acquisition and are available for future acquisitions, certain debt repayment and for other corporate purposes. Borrowings under the Senior Credit Facility accrue interest at a variable rate of interest based upon LIBOR and/or one or more other interest rate indices plus an applicable margin. The Senior Credit Facility provides for advances of up to 85% of our eligible Canadian and domestic accounts receivable, 75% of eligible accrued but unbilled domestic receivables and eligible foreign accounts receivable, all of which are subject to certain sub-limits, reserves and reductions.

The co-borrowers of the Senior Credit Facility include the following: (i) with respect to U.S. obligations under the Senior Credit Facility, Radiant Logistics, Inc., Radiant Global Logistics, Inc., Radiant Transportation Services, Inc., Radiant Logistics Partners LLC, Adcom Express, Inc., Radiant Customs Services, Inc., DBA Distribution Services, Inc., International Freight Systems (of Oregon), Inc., Radiant Off-Shore Holdings LLC, Green Acquisition Company, Inc., On Time Express, Inc., Clipper Exxpress Company,

Bluenose Finance LLC, Wheels MSM US, Inc., Service By Air, Inc., Highways and Skyways, Inc., and Radiant Trade Services, Inc.; and (ii) with respect to Canadian obligations under the Senior Credit Facility, Radiant Global Logistics, Ltd., Wheels Group Inc., 1371482 Ontario Inc., Wheels MSM Canada Inc., 2062698 Ontario Inc., Associate Carriers Canada Inc. and Wheels Associate Carriers Inc. As co-borrowers under the Senior Credit Facility, the accounts receivable of the foregoing entities are eligible for inclusion within the overall borrowing base of the Company and all borrowers are responsible for repayment of the debt associated with applicable advances (U.S. or Canadian) under the Senior Credit Facility. In addition, we and our U.S. subsidiaries guarantee both the U.S. and Canadian obligations under the Senior Credit Facility, while our Canadian subsidiaries guarantee only the Canadian obligations under the Senior Credit Facility.

The terms of the Senior Credit Facility are subject to a financial covenant which may limit the amount otherwise available under such facility. The covenant requires us to maintain a basic fixed charge coverage ratio of at least 1.1 to 1.0 during any period (the "Trigger Period") in which we are in default under the Senior Credit Facility, if total availability falls below \$10.0 million or if U.S. availability is less than \$6.0 million.

Under the terms of the Senior Credit Facility, we are permitted to make additional acquisitions without the consent of the senior lenders only if certain conditions are satisfied. The conditions imposed by the Senior Credit Facility include the following: (i) the absence of an event of default under the Senior Credit Facility, (ii) the acquisition must be consensual; (iii) the company to be acquired must be in the transportation and logistics industry, located in the United States or certain other approved jurisdictions, and have a positive EBITDA for the 12 month period most recently ended prior to such acquisition, (iv) no debt or liens may be incurred, assumed or result from the acquisition, subject to limited exceptions, and (v) after giving effect for the funding of the acquisition, we must have availability under the Senior Credit Facility of at least the greater of 20% of the U.S.-based borrowing base and Canadian-based borrowing base or \$12.5 million, and U.S. availability of at least \$7.5 million. In the event that we are not able to satisfy the conditions of the Senior Credit Facility in connection with a proposed acquisition, we must either forego the acquisition, obtain the consent of the senior lenders, or retire the Senior Credit Facility. This may limit or slow our ability to achieve the critical mass we may need to achieve our strategic objectives.

As of June 30, 2016, we have gross availability of \$41.3 million, net of letter of credit reserves of approximately \$0.4 million for approximately \$31.2 million in availability under the Credit Facility to support future acquisitions and our ongoing working capital requirements, excluding any availability attributable to accounts receivable of SBA. We expect to structure acquisitions with certain amounts paid at closing, and the balance paid over a number of years in the form of earn-out installments which are payable based upon the future earnings of the acquired businesses payable in cash, stock or some combination thereof. As we continue to execute our acquisition strategy, we will be required to make significant payments in the future if the earn-out installments under our various acquisitions become due. While we believe that a portion of any required cash payments will be generated by the acquired businesses, we may have to secure additional sources of capital to fund the remainder of any cash-based earn-out payments as they become due. This presents us with certain business risks relative to the availability of capacity under our Credit Facility, the availability and pricing of future fund raising, as well as the potential dilution to our stockholders to the extent the earn-outs are satisfied directly, or indirectly, from the sale of equity.

Senior Secured Integrated Private Debt Fund IV LP Term Loan

On April 2, 2015, Wheels obtained a CAD\$29.0 million senior secured Canadian term loan from Integrated Private Debt Fund IV LP ("IPD") pursuant to a \$29,000,000 Credit Facilities Loan Agreement (the "IPD Loan Agreement"). The Company and its U.S. and Canadian subsidiaries are guarantors of the Wheels obligations thereunder. The loan matures on April 1, 2024 and accrues interest at a rate of 6.65% per annum. The loan repayment consists of interest-only payments for the first 12 months followed by blended principal and interest payments for the next eight years. The loan may be prepaid in whole at any time upon providing at least 30 days prior written notice and paying

the difference between (i) the present value of the loan interest and the principal payments foregone discounted at the Government of Canada Bond Yield for the term from the date of prepayment to April 1, 2024, and (ii) the face value of the principal amount being prepaid. In connection with the loan, we paid an amount equal to five months of interest payments into a debt service reserve account controlled by IPD.

The loan is collateralized by a (i) first-priority security interest in all of the assets of Wheels except the Canadian A/R Assets, (ii) a second-priority security interest in the Canadian A/R Assets, and (iii) a second-priority security interest on all of our assets.

The terms of the loan are subject to certain financial covenants, which require us to maintain (i) a debt service coverage ratio of at least 1.2 to 1.0 and (ii) a senior debt to EBITDA ratio of at least 3.0 to 1.0. In addition, during any Trigger Period, the Company and its U.S. and Canadian subsidiaries must maintain a fixed charge coverage ratio of at least 1.1 to 1.0.

Under the terms of the IPD Loan Agreement, we are permitted to make additional acquisitions without IPD's consent only if certain conditions are satisfied, including, among others: (i) the equity interests or property acquired in such acquisition constitute a business

reasonably related to our business or the business of Wheels; (ii) no default or event of default shall exist prior to or will be caused as a result of such acquisition; (iii) we or Wheels shall have provided IPD with at least 10 business days prior written notice of such acquisition that must include certain descriptive information and pro forma information regarding the acquisition; (iv) such person whose equity interests or property are being acquired shall have, as of the last day of the most recent fiscal quarter of such person, actual (or pro forma to the extent approved in writing by IPD) positive EBITDA and net income, in each case for the 12 month period ending on such date; (v) the aggregate cash consideration payable at the closing of the acquisition shall not exceed \$10.0 million for any single transaction and \$25.0 million in the aggregate, in any fiscal year or such greater amount approved in writing by IPD; provided, however, that the foregoing limitation shall exclude cash consideration derived from the proceeds of sales of newly issued equity interests of Radiant during the twelve-month period prior to the closing of such acquisition (as described below); (vi) no debt or liens may be incurred, assumed or result from the acquisition, subject to limited exceptions; (vii) the assets subject to the acquisition are free from all liens except those permitted under the IPD Loan Agreement; and (viii) the post-closing U.S. availability under the Senior Credit Facility is at least \$7.5 million on a pro forma basis.

Subordinated Secured Alcentra Capital Corporation and Triangle Capital Corporation Term Loan

On April 2, 2015, we obtained a USD\$25.0 million subordinated secured term loan from Alcentra Capital Corporation (\$10.0 million) and Triangle Capital Corporation (\$15.0 million) (collectively, the “Subordinated Lenders”) pursuant to a Loan and Security Agreement (the “Alcentra/Triangle Subordinated Loan Agreement”). The loan matured on April 2, 2021 and accrued interest at a rate of 12% per annum during the first six months of the loan, followed by a variable rate of LIBOR plus 9.5%-12% (all with a 1% LIBOR floor), depending on the Company’s total leverage ratio. In April 2016, we repaid this loan in full, including a 3% prepayment premium.

For additional information regarding our indebtedness, see Note 6 to our consolidated financial statements contained elsewhere in this report.

Off Balance Sheet Arrangements

As of June 30, 2016, we did not have any relationships with unconsolidated entities or financial partners, such as entities often referred to as structured finance or special purpose entities, which had been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As such, we are not materially exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in such relationships.

Recent Accounting Pronouncements

The recent accounting pronouncements are discussed in Note 2 of the “Notes to Consolidated Financial Statements” contained elsewhere in this report.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risks in the ordinary course of business. These risks are primarily related to foreign exchange risk. We have currency exposure arising from both sales and purchases denominated in foreign currencies, as well as intercompany transactions. Significant changes in exchange rates between foreign currencies in which we transact business and the U.S. dollar may adversely affect our results of operations and financial condition. Historically, we have not entered into any hedging activities, and, to the extent that we continue not to do so in the future, we may be vulnerable to the effects of currency exchange-rate fluctuations

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The consolidated financial statements of Radiant Logistics, Inc. including the notes thereto and the report of our independent accountants are included in this report, commencing at page F-1.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

36

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

An evaluation of the effectiveness of our “disclosure controls and procedures” (as such term is defined in Rules 13a-15(e) or 15d-15(e) of the Exchange Act as of June 30, 2016, was carried out by our management under the supervision and with the participation of our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”). Based upon that evaluation, our CEO and CFO concluded that, as of June 30, 2016, our disclosure controls and procedures were effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms and (ii) accumulated and communicated to our management, including our CEO and CFO, as appropriate to allow timely decisions regarding disclosure.

Management’s Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) of the Exchange Act. Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an assessment of the effectiveness of our internal control over financial reporting. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) in Internal Control — Integrated Framework (2013). Based on management’s assessment based on the criteria of the COSO, we concluded that, as of June 30, 2016, our internal control over financial reporting is effective at the reasonable assurance level.

Our internal control system was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the U.S. Our internal control over financial reporting includes those policies and procedures which:

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;
- (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the U.S., and that receipts and expenditures of the Company are being made only in accordance with authorization of our management and directors; and
- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our consolidated financial statements.

Peterson Sullivan LLP, the independent registered public accounting firm that audited the consolidated financial statements included in this Form 10-K, has issued a report on our internal control over financial reporting as of June 30, 2016. Such report is included on page F-2 of this Form 10-K.

Changes in Internal Control Over Financial Reporting

There have not been any changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the fiscal quarter ended June 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The following table sets forth information concerning our executive officers and directors. Each of the executive officers will serve until his or her successor is appointed by our Board of Directors or such executive officer's earlier resignation or removal. Each of the directors will serve until the next annual meeting of stockholders or such director's earlier resignation or removal.

Name	Age	Position
Bohn H. Crain	52	Chief Executive Officer and Chairman of the Board of Directors
Stephen P. Harrington	59	Director
Jack Edwards	71	Director
Richard P. Palmieri	63	Director
Michael Gould.	52	Director
Arnold Goldstein	62	Senior Vice President & Chief Commercial Officer
Todd E. Macomber	52	Senior Vice President & Chief Financial Officer
Joseph Bento	53	Senior Vice President & Chief Operating Officer of Freight Forwarding Operations
Tim Boyce	56	Senior Vice President & Chief Operating Officer of Rail and Truck Brokerage Operations

Board of Directors

We believe that our Board should be composed of individuals with sophistication and experience in many substantive areas that impact our business. We believe that experience, qualifications, or skills in the following areas are most important: accounting and finance; strategic planning; logistics and operations, human resources and development practices; and board practices of other corporations. These areas are in addition to the personal qualifications described in this section. We believe that all of our current Board members possess the professional and personal qualifications necessary for board service, and have highlighted particularly noteworthy attributes for each Board member in the individual biographies below. The principal occupation and business experience, for at least the past five years, of each current director is as follows:

Bohn H. Crain. Mr. Crain has served as our Chief Executive Officer and Chairman of our Board of Directors since October 2005. Mr. Crain brings approximately 25 years of industry and capital markets experience in transportation and logistics. Since January 2005, Mr. Crain has served as the Managing Member of Radiant Capital Partners, LLC, an entity he formed to execute a consolidation strategy in the transportation/logistics sector. Prior to founding Radiant, Mr. Crain served as the executive vice president and the chief financial officer of Stonepath Group, Inc. from January 2002 until December 2004. In 2001, Mr. Crain served as the executive vice president and Chief Financial Officer of Schneider Logistics, Inc., a third-party logistics company, and from 2000 to 2001 he served as the Vice President and Treasurer of Florida East Coast Industries, Inc., a New York Stock Exchange listed company engaged in railroad and real estate businesses. Between 1989 and 2000, Mr. Crain held various vice president and treasury positions for CSX Corp., and several of its subsidiaries, a Fortune 500 transportation company listed on the New York Stock Exchange. He also serves on the Board of Trustees for Eastside Preparatory School in Bellevue, Washington. Mr. Crain earned a Bachelor of Arts in Business Administration with an emphasis in Accounting from the University of Texas. As a result of these and other professional experiences, Mr. Crain possesses particular knowledge and experience in logistics management, industry trends, business operations and accounting that strengthen the Board's collective qualifications, skills, and experience.

Stephen P. Harrington. Mr. Harrington was appointed as a director in October 2007. Mr. Harrington is currently self-employed as a business consultant and strategic advisor. He served as the Chairman, Chief Executive Officer, Chief Financial Officer, Treasurer and Secretary of Zone Mining Limited, a publicly-traded Nevada corporation, from August 2006 until January 2007. Mr. Harrington graduated with a B.S. from Yale University in 1980. As a result of these and other professional experiences, Mr. Harrington possesses particular knowledge and experience in corporate governance and financial management that strengthen the Board's collective qualifications, skills, and experience.

Jack Edwards. Mr. Edwards was appointed as a director in December 2011. Mr. Edwards is an independent business executive who since 2002 has been providing strategic, investment and operational advisory services to a broad range of corporate and private equity clients and boards. From 2001 through 2002, he was the President and Chief Executive Officer of American Medical Response, Inc., a provider of private ambulatory services. Prior to this, Mr. Edwards served as the President and Chief Executive Officer at a variety of logistics and freight-forwarding companies, including Danzas Corporation and ITEL Transportation Group. Previously he held senior executive positions at Circle International, American President Lines and The Southern Pacific Transportation Company. Mr. Edwards has served as a director of several publicly traded corporations, including Laidlaw Inc. (NYSE), ITEL Corp. (NYSE) and Sun Gro Horticulture Canada Ltd. (TSX) where he served as Chairman of the Board. Mr. Edwards currently serves as a director for Adelante

Media Group and Zonar Systems. Mr. Edwards received a Bachelor of Science in Food Science and Technology from the University of California, Davis, and a Masters of Business Administration in Marketing from the University of Oregon. As a result of these and other professional experiences, Mr. Edwards possesses particular knowledge and experience in the transportation and logistics industry, along with business combinations and financial management, that strengthen the Board's collective qualifications, skills, and experience.

Richard P. Palmieri. Mr. Palmieri was appointed as a director in March 2014. He has been the Managing Director of ANR Partners, LLC, a Philadelphia-based management and financial consulting firm, since 2012. Prior to this, from 2007 to 2012, Mr. Palmieri served as the President and CEO of Canon Financial Services, Inc., the captive finance subsidiary of Canon USA. From 2003 to 2006, he was the President and CEO of Schneider Financial Services, a financial services subsidiary of a large, privately held transportation and logistics company. From 1998 to 2003, he served as a Managing Director and co-head of the Transportation and Logistics investment banking group at Credit Suisse Group. From 1993 to 1998, he served as a Managing Director and co-head of the Transportation and Logistics investment banking group at Deutsche Securities. Before this, he served in various finance and management positions at several large companies, including Whirlpool Financial Corporation, PacificCorp Credit, Commercial Credit Company and GE Capital. Mr. Palmieri received a Bachelor of Science in Accounting from Wagner College. As a result of these and other professional experiences, Mr. Palmieri possesses particular knowledge and experience in logistics and financial management that strengthen the Board's collective qualifications, skills, and experience.

Michael Gould. Mr. Gould was appointed as a director in July 2016. Since May 2015, Mr. Gould has served as Senior Vice President, Oracle Consulting in North America at Oracle Corporation. Prior to this, from 2008 to May 2015, Mr. Gould served as the Vice President and General Manager for the Americas Technology Services Consulting Organization for Hewlett-Packard Company ("HP"). Also while at HP, he served as Vice President for Americas Alliances. Prior to HP, Mr. Gould served in various roles at Oracle, BearingPoint and BEA. He holds a Bachelor of Science degree in Mechanical Engineering from Texas A&M University and a Masters in Business Administration from Santa Clara University. As a result of these and other professional experiences, Mr. Gould possesses particular knowledge and experience in management and technology that strengthen the Board's collective qualifications, skills and experience.

Executive Officers

Arnold Goldstein. Mr. Goldstein has served as our Senior Vice President and Chief Commercial Officer since June 30, 2016. Mr. Goldstein also has significant experience within the transportation industry, having served as Chief Operating Officer of Service by Air, which was acquired by the Company in June 2015, and in various leadership roles at Hellman World Wide Logistics from May 2006 to June 2015. Mr. Goldstein earned a Bachelor of Arts in Psychology from the University of Rhode Island and a Masters of Business Administration from Bryant University.

Todd E. Macomber. Mr. Macomber has served as our Senior Vice President and Chief Financial Officer since March 2011, as our Senior Vice President and Chief Accounting Officer since August 2010, and as our Vice President and Corporate Controller since December 2007. Prior to joining us, Mr. Macomber served as Senior Vice President and Chief Financial Officer of Biotrace International, Inc., a subsidiary of Biotrace International PLC, an industrial microbiology company listed on the London Stock Exchange. Mr. Macomber earned a Bachelor of Arts, emphasis in Accounting from Seattle University.

Joseph Bento. Mr. Bento joined the Company in January 2016 and served as Senior Vice President of Operations until his recent appointment to Senior Vice President and Chief Operating Officer of Freight Forwarding Operations. Prior to joining the Company, Mr. Bento served in a variety of significant roles within the transportation industry, including, from September 2012 to April 2016, as the Chief Sales Officer of SEKO Logistics; and from 1998 to 2012, in various leadership roles at Eagle Global Logistics and its successor, CEVA Logistics. Mr. Bento earned a Bachelor

of Science in Finance from California State University – Long Beach.

Tim Boyce has served as our Senior Vice President and Chief Operating Officer of Rail and Truck Brokerage Operations since our acquisition of Wheels in April 2015. He came to Wheels on February 1, 2012 to serve as the Executive Vice President - Marketing and Sales, and was promoted to Chief Marketing Officer shortly thereafter. From October 2013 until April 2015, he served as President of Wheels' U.S. operations. Prior to joining Wheels, Mr. Boyce was employed by Canadian Pacific Railway where he served in various senior roles including General Manager - Sales and Marketing Domestic Intermodal. Prior to this, he was the Vice President - Sales and Marketing with Canpar Transport Ltd, a leading Canadian courier company, and TST (formerly TNT) Overland Express, a leading Canadian based LTL company serving customers across North America.
