SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended June 30, 2012

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from _____ to _____

Commission File Number 1-9853

EMC CORPORATION

(Exact name of registrant as specified in its charter)

Massachusetts

(State or other jurisdiction of
incorporation or organization)

04-2680009

(I.R.S. Employer
Identification Number)

176 South Street

Hopkinton, Massachusetts

(Address of principal executive offices)

(508) 435-1000

(Registrant's telephone number, including area code)

01748

(Zip Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of common stock, par value \$.01 per share, of the registrant outstanding as of June 30, 2012 was 2,098,719,769.

FACTORS THAT MAY AFFECT FUTURE RESULTS

This Quarterly Report on Form 10-Q contains forward-looking statements, within the meaning of the Federal securities laws, about our business and prospects. The forward-looking statements do not include the potential impact of any mergers, acquisitions, divestitures, securities offerings or business combinations that may be announced or closed after the date hereof. Any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the foregoing, the words "believes," "plans," "intends," "expects," "goals" and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these words. Our future results may differ materially from our past results and from those projected in the forward-looking statements due to various uncertainties and risks, including those described in Item 1A of Part II (Risk Factors). The forward-looking statements speak only as of the date of this Quarterly Report and undue reliance should not be placed on these statements. We disclaim any obligation to update any forward-looking statements contained herein after the date of this Quarterly Report.

EMC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

Company

EMC Corporation (“EMC”) and its subsidiaries develop, deliver and support the Information Technology (“IT”) industry’s broadest range of information infrastructure and virtual infrastructure technologies, solutions and services.

EMC’s Information Infrastructure business provides a foundation for organizations to store, manage, protect, analyze and secure their vast and ever-increasing quantities of information, improve business agility, lower cost of ownership and enhance their competitive advantage within traditional data centers, virtual data centers and cloud-based IT infrastructures. EMC’s Information Infrastructure business comprises three segments – Information Storage, RSA Information Security and Information Intelligence Group.

EMC’s VMware Virtual Infrastructure business, which is represented by EMC’s majority equity stake in VMware, Inc. (“VMware”), is the leader in virtualization and virtualization-based cloud infrastructure solutions utilized by businesses to help them transform the way they build, deliver and consume IT resources in a manner that is evolutionary and based on their specific needs. VMware’s virtualization infrastructure software solutions run on industry-standard desktop computers and servers and support a wide range of operating system and application environments, as well as networking and storage infrastructures.

General

The accompanying interim consolidated financial statements are unaudited and have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information. These consolidated financial statements include the accounts of EMC, its wholly owned subsidiaries and VMware, a company majority-owned by EMC. All intercompany transactions have been eliminated.

Certain information and footnote disclosures normally included in our annual consolidated financial statements have been condensed or omitted. Accordingly, these interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2011 which are contained in our Annual Report on Form 10-K filed with the Securities and Exchange Commission on February 24, 2012.

The results of operations for the interim periods are not necessarily indicative of the results of operations to be expected for any future period or the entire fiscal year. The interim consolidated financial statements, in the opinion of management, reflect all adjustments necessary to fairly state the results as of and for the three- and six-month periods ended June 30, 2012 and 2011.

Net Income Per Share

Basic net income per weighted average share has been computed using the weighted average number of shares of common stock outstanding during the period. Diluted net income per weighted average share is computed using the weighted average number of common and dilutive common equivalent shares outstanding during the period. Common equivalent shares consist of stock options, restricted stock and restricted stock units, our \$1.725 billion 1.75% convertible senior notes due 2013 and associated warrants. Additionally, for purposes of calculating diluted net income per weighted average share, net income is adjusted for the difference between VMware’s reported diluted and basic net income per weighted average share, if any, multiplied by the number of shares of VMware held by EMC.

Adjustments for Immaterial Prior Period Accounting Error

During the three months ended June 30, 2012, we determined that since VMware’s initial public offering in 2007, we have incorrectly recorded deferred tax liabilities on the gains and losses associated with changes in the non-controlling interest. These deferred tax liabilities were recorded as a reduction to additional paid-in capital and therefore had no impact on our previously reported consolidated income statements. The error resulted in an overstatement of our deferred tax liability and understatement of our additional paid-in capital of \$352.6 million in our December 31, 2011 consolidated balance sheet and an understatement of additional paid-in capital of \$407.2 million in our statement of shareholders’ equity for the six months ended June 30, 2011. These corrections are reflected in the consolidated

balance sheets as of December 31, 2011 and in the statements of shareholders' equity for the six months ended June 30, 2012 and 2011 and are not material to the consolidated balance sheets or statements of shareholders' equity for the years ended December 31, 2011, 2010, 2009, 2008 or 2007 or any related interim periods. In addition, the error resulted in an overstatement of our deferred tax liability and an understatement of our additional paid-in capital of \$467.1 million in our December 31, 2010 consolidated balance sheet and statement of shareholders' equity and an understatement of additional paid-in capital of \$499.6 million in our statement of shareholders' equity at December 31, 2009. These adjusted prior-period balances will be reflected in our future filings.

Recent Accounting Pronouncements

In May 2011, the Financial Accounting Standards Board ("FASB") issued new guidance to achieve common fair value measurement and disclosure requirements between GAAP and International Financial Reporting Standards. This new guidance amends current fair value measurement and disclosure guidance to include increased disclosures regarding valuation inputs and investment categorization. The adoption of this new accounting guidance in 2012 did not have a material impact on our consolidated financial position, results of operations or cash flows.

2. Non-controlling Interest in VMware, Inc.

The non-controlling interests' share of equity in VMware is reflected as Non-controlling interest in VMware, Inc. in the accompanying consolidated balance sheets and was \$1,101.9 million and \$968.1 million as of June 30, 2012 and December 31, 2011, respectively. At June 30, 2012, EMC held approximately 97% of the combined voting power of VMware's outstanding common stock and approximately 79% of the economic interest in VMware.

The effect of changes in our ownership interest in VMware on our equity was as follows (table in thousands):

	For the Six Months Ended	
	June 30, 2012	June 30, 2011
Net income attributable to EMC Corporation	\$1,236,356	\$1,023,642
Transfers (to) from the non-controlling interest in VMware, Inc.:		
Increase in EMC Corporation's additional paid-in-capital for VMware's equity issuances	77,477	112,736
Decrease in EMC Corporation's additional paid-in-capital for VMware's other equity activity	(249,792)	(335,523)
Net transfers (to) from non-controlling interest	(172,315)	(222,787)
Change from net income attributable to EMC Corporation and transfers from the non-controlling interest in VMware, Inc.	\$1,064,041	\$800,855

3. Business Combinations, Intangibles and Goodwill

During the six months ended June 30, 2012, we acquired five companies. We acquired all of the outstanding capital stock of Likewise Software, a provider of technology for managing cross-platform access to data files and software for managing unstructured data; Pivotal Labs, a provider of services and technology to build Big Data applications; XtremIO, a provider of Flash enterprise storage systems; and Watch4Net, a provider of enterprise and carrier-class performance management software. These acquisitions complement and expand our Information Storage segment. We also acquired all of the outstanding capital stock of Syncplicity, a provider of cloud-based synch and share file management which complements and expands our Information Intelligence Group segment. In connection with our acquisitions, we had adjustments to the fair value of previously held interests in XtremIO of \$31.6 million which were recognized in other income. Additionally, during the six months ended June 30, 2012, VMware acquired three companies. The aggregate consideration for these eight acquisitions was \$629.0 million which consisted of \$624.5 million of cash consideration, net of cash acquired and \$4.5 million for the fair value of our stock options granted in exchange for the acquirees' stock options.

The consideration paid was allocated to the fair value of the assets acquired and liabilities assumed based on estimated fair values as of the respective acquisition dates. The aggregate allocation to goodwill, intangibles and net liabilities was approximately \$508.2 million, \$133.0 million and \$12.2 million, respectively. The intangible assets are being amortized based upon the pattern in which the economic benefits of the intangible assets are being utilized. The results

of these acquisitions have been included in the consolidated financial statements from the date of purchase. Pro forma results of operations have not been presented as the results of the acquired companies were not material, individually or in the aggregate, to our consolidated results of operations for the three or six months ended June 30, 2012 or 2011.

4. Convertible Debt

In November 2006, we issued our \$1,725 million 1.75% convertible senior notes due 2011 (the “2011 Notes”) and our \$1,725 million 1.75% convertible senior notes due 2013 (the “2013 Notes”) for total gross proceeds of \$3.45 billion. The 2011 Notes and 2013 Notes are senior unsecured obligations and rank equally with all other existing and future senior unsecured debt.

The 2011 Notes matured and a majority of the noteholders exercised their right to convert the outstanding 2011 Notes at the end of 2011. Pursuant to the settlement terms, the majority of the converted 2011 Notes were not settled until January 9, 2012. At that time, we paid the noteholders \$1,699.8 million in cash for the outstanding principal and 29.5 million shares for the \$661.4 million in excess of the conversion value over the principal amount, as prescribed by the terms of the 2011 Notes.

The holders of the 2013 Notes may convert their 2013 Notes at their option on any day prior to the close of business on the scheduled trading day immediately preceding September 1, 2013 only under the following circumstances: (1) during the five business-day period after any five consecutive trading-day period (the “measurement period”) in which the price per 2013 Note for each day of that measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such day; (2) during any calendar quarter, if the last reported sale price of our common stock for 20 or more trading days in a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter exceeds 130% of the applicable conversion price in effect on the last trading day of the immediately preceding calendar quarter; or (3) upon the occurrence of certain events specified in the 2013 Notes. Additionally, the 2013 Notes will become convertible during the last six months prior to their maturity.

Upon conversion, we will pay cash up to the principal amount of the debt converted. With respect to any conversion value in excess of the principal amount of the 2013 Notes converted, we have the option to settle the excess with cash, shares of our common stock, or a combination of cash and shares of our common stock based on a daily conversion value, determined in accordance with the indenture, calculated on a proportionate basis for each day of the relevant 20-day observation period. The initial conversion rate for the 2013 Notes will be 62.1978 shares of our common stock per one thousand dollars of principal amount of 2013 Notes, which represents a 27.5% conversion premium from the date the 2013 Notes were issued and is equivalent to a conversion price of approximately \$16.08 per share of our common stock. The conversion price is subject to adjustment in some events as set forth in the indenture. In addition, if a “fundamental change” (as defined in the indenture) occurs prior to the maturity date, we will in some cases increase the conversion rate for a holder of 2013 Notes that elects to convert its 2013 Notes in connection with such fundamental change.

At June 30, 2012, the contingent conversion thresholds on the 2013 Notes were exceeded. As a result, the 2013 Notes became convertible at the option of the holder through September 30, 2012. Accordingly, since the terms of the 2013 Notes require the principal to be settled in cash, we reclassified from shareholders’ equity the portion of the 2013 Notes attributable to the conversion feature which had not yet been accreted to its face value, and the 2013 Notes were classified as a current liability. Contingencies continue to exist regarding the holders’ ability to convert the 2013 Notes in future quarters. The determination of whether the 2013 Notes are convertible will be performed on a quarterly basis. Consequently, the 2013 Notes might not be convertible in future quarters and therefore the 2013 Notes may be reclassified as long-term debt if the contingent conversion thresholds are not met. Approximately \$14.7 million of the 2013 Notes have been converted as of June 30, 2012.

Edgar Filing: EMC CORP - Form 10-Q

The carrying amount of the 2013 Notes reported in the consolidated balance sheets as of June 30, 2012 was \$1,621.6 million and the fair value was \$2,702.2 million. The carrying amount of the equity component of the 2013 Notes was \$190.5 million at June 30, 2012. As of June 30, 2012, the unamortized discount on the 2013 Notes consists of \$88.7 million, which will be fully amortized by December 1, 2013.

The 2013 Notes pay interest in cash at a rate of 1.75% semi-annually in arrears on December 1 and June 1 of each year. The effective interest rate on the 2011 Notes and 2013 Notes was 5.6% for both the three months ended June 30, 2012 and 2011.

The following tables represent the key components of our interest expense on convertible debt (table in thousands):

	For the Three Months Ended	
	June 30, 2012	June 30, 2011
Contractual interest expense on the coupon	\$7,422	\$15,094
Amortization of the discount component recognized as interest expense	14,954	29,959
Total interest expense on the convertible debt	\$22,376	\$45,053
	For the Six Months Ended	
	June 30, 2012	June 30, 2011
Contractual interest expense on the coupon	\$14,945	\$30,188
Amortization of the discount component recognized as interest expense	29,654	59,322
Total interest expense on the convertible debt	\$44,599	\$89,510

In connection with the issuance of the 2011 Notes and 2013 Notes, we entered into separate convertible note hedge transactions with respect to our common stock (the "Purchased Options"). The Purchased Options allow us to receive shares of our common stock and/or cash related to the excess conversion value that we would pay to the holders of the 2011 Notes and 2013 Notes upon conversion. The Purchased Options will cover, subject to customary anti-dilution adjustments, approximately 215 million shares of our common stock. We paid an aggregate amount of \$669.1 million of the proceeds from the sale of the 2011 Notes and 2013 Notes for the Purchased Options that was recorded as additional paid-in-capital in shareholders' equity. In the fourth quarter of 2011, we exercised 107.5 million of the Purchased Options in conjunction with the planned settlements of the 2011 Notes, and we received 29.5 million shares of net settlement on January 9, 2012, representing the excess conversion value of the options. The remaining 107.5 million of the Purchased Options expire on December 1, 2013.

We also entered into separate transactions in which we sold warrants to acquire, subject to customary anti-dilution adjustments, approximately 215 million shares of our common stock at an exercise price of approximately \$19.55 per share of our common stock. We received aggregate proceeds of \$391.1 million from the sale of the associated warrants. Upon exercise, the value of the warrants is required to be settled in shares. Half of the associated warrants were exercised between February 15, 2012 and March 14, 2012 and the remaining half of the associated warrants have expiration dates between February 18, 2014 and March 18, 2014. During the first quarter of 2012, the exercised warrants were settled with 32.3 million shares of our common stock.

The Purchased Options and associated warrants will generally have the effect of increasing the conversion price of the 2013 Notes to approximately \$19.55 per share of our common stock, representing an approximate 55% conversion premium based on the closing price of \$12.61 per share of our common stock on November 13, 2006, which was the issuance date of the 2013 Notes.

In 2010, EMC entered into interest rate swap contracts with an aggregate notional amount of approximately \$900 million. These swaps were designated as cash flow hedges of the semi-annual interest payments of the forecasted issuance of debt in 2011 when our 2011 Notes were scheduled to become due. As such, the unrealized loss on these hedges was recognized in other comprehensive loss. In November 2011, we settled these swaps and replaced them with new interest rate swap contracts for the forecasted issuance of debt in 2012. In April 2012, we settled these swaps and replaced them with new interest rate swap contracts for the forecasted issuance of debt in 2012. Each of these new

swaps was deemed as an effective hedge as the notional amounts and other terms matched the underlying hedged item. Realized losses on the replaced interest rate swap contracts at the time of settlements of \$141.0 million and \$23.0 million in November 2011 and April 2012, respectively, were deferred as they were expected to be realized over the life of the new debt issued under the related interest rate swap contracts and recognized as a component of interest expense in the consolidated income statements.

In June 2012, management changed its forecast date for the issuance of debt from 2012 to the first quarter of 2014. Consequently, hedge accounting effectively ceased as the terms of the swaps no longer matched the terms of the underlying hedged item resulting in changes in the fair value of the swaps being recorded in the consolidated income statement. The swaps were subsequently re-designated as cash flow hedges and achieved hedge accounting. The change in the forecasted timeframe for the issuance of debt resulted in certain previously-anticipated hedge interest payments no longer being expected to occur within the window covered by the hedge designation. As a result, \$39.5 million of accumulated realized losses in other comprehensive income related to these previously-anticipated interest payments was reclassified from other comprehensive income and recognized in the consolidated income statements for the three and six months ended June 30, 2012.

EMC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

5. Fair Value of Financial Assets and Liabilities

Our fixed income and equity investments are classified as available for sale and recorded at their fair market values. We determine fair value using the following hierarchy:

Level 1 – Quoted prices in active markets for identical assets or liabilities.

Level 2 – Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Most of our fixed income securities are classified as Level 2, with the exception of some of our U.S. government and agency obligations and our investments in publicly traded equity securities, which are classified as Level 1, and all of our auction rate securities, which are classified as Level 3. In addition, our strategic investments held at cost are classified as Level 3. At June 30, 2012, the vast majority of our Level 2 securities were priced by pricing vendors. These pricing vendors utilize the most recent observable market information in pricing these securities or, if specific prices are not available for these securities, use other observable inputs like market transactions involving identical or comparable securities. In the event observable inputs are not available, we assess other factors to determine the security's market value, including broker quotes or model valuations. Each month, we perform independent price verifications of all of our fixed income holdings. In the event a price fails a pre-established tolerance check, it is researched so that we can assess the cause of the variance to determine what we believe is the appropriate fair market value.

In general, investments with remaining effective maturities of 12 months or less from the balance sheet date are classified as short-term investments. Investments with remaining effective maturities of more than 12 months from the balance sheet date are classified as long-term investments. Our publicly traded equity securities are classified as long-term investments and our strategic investments held at cost are classified as other assets. As a result of the lack of liquidity for auction rate securities, we have classified these as long-term investments as of June 30, 2012 and December 31, 2011. At June 30, 2012 and December 31, 2011, all of our short- and long-term investments, excluding auction rate securities, were recognized at fair value, which was determined based upon observable inputs from our pricing vendors for identical or similar assets. At June 30, 2012 and December 31, 2011, auction rate securities were valued using a discounted cash flow model.

The following tables summarize the composition of our short- and long-term investments at June 30, 2012 and December 31, 2011 (tables in thousands):

	June 30, 2012			Aggregate
	Amortized	Unrealized	Unrealized	Aggregate
	Cost	Gains	(Losses)	Fair Value
U.S. government and agency obligations	\$2,301,054	\$9,614	\$(1,231)) \$2,309,437
U.S. corporate debt securities	1,498,162	9,087	(642)) 1,506,607
High yield corporate debt securities	442,573	22,658	(2,844)) 462,387
Asset-backed securities	39,898	85	(11)) 39,972
Municipal obligations	1,217,070	2,860	(852)) 1,219,078
Auction rate securities	80,706	—	(6,810)) 73,896
Foreign debt securities	1,192,128	6,351	(551)) 1,197,928
Total fixed income securities	6,771,591	50,655	(12,941)) 6,809,305
Publicly traded equity securities	46,433	57,955	(633)) 103,755
Total	\$6,818,024	\$108,610	\$(13,574)) \$6,913,060

We held approximately \$1.2 billion in foreign debt securities at June 30, 2012. These securities have an average credit rating of AA-, and approximately 6% of these securities are deemed sovereign debt with an average credit rating of AA. None of the securities deemed sovereign debt are from Greece, Italy, Ireland, Portugal or Spain. Additionally, we have an immaterial amount of exposure to French agencies and financial institutions.

Interest rate swap contracts	—	(30,207)	—	(30,207)

Our auction rate securities are predominantly rated investment grade and are primarily collateralized by student loans. The underlying loans of all but two of our auction rate securities, with a market value of \$16.1 million, have partial guarantees by the U.S. government as part of the Federal Family Education Loan Program (“FFELP”) through the U.S. Department of Education. FFELP guarantees at least 95% of the loans which collateralize the auction rate securities. We believe the quality of the collateral underlying most of our auction rate securities will enable us to recover our principal balance.

To determine the estimated fair value of our investment in auction rate securities, we used a discounted cash flow model using a five year time horizon. As of June 30, 2012, the coupon rates used ranged from 0% to 4% and the discount rate was 1%, which rate represents the rate at which similar FFELP backed securities with a five year time horizon outside of the auction rate securities market were trading at June 30, 2012. The assumptions used in preparing

the discounted cash flow model include an incremental discount rate for the lack of liquidity in the market (“liquidity discount margin”) for an estimated period of time. The discount rate we selected was based on AA-rated banks as the majority of our portfolio is invested in student loans where EMC acts as a financier to these lenders. The liquidity discount margin represents an estimate of the additional return an investor would require for the lack of liquidity of these securities over an estimated five-year holding period. The rate used for

9

Table of Contents

EMC CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

the discount margin was 1% at June 30, 2012 compared to 2% at December 31, 2011 due to the narrowing of credit spreads on AA-rated banks during 2012.

The following table provides a summary of changes in fair value of our Level 3 auction rate securities for the three and six months ended June 30, 2012 (table in thousands):

	Three Months Ended June 30, 2012	Six Months Ended June 30, 2012
Balance, beginning of the period	\$78,397	\$74,596
Calls at par value	—	(225)
Other-than-temporary impairment loss	(1,969)	(1,969)
(Increase) decrease in previously recognized unrealized losses included in other comprehensive income	(2,532)	1,494)
Balance, end of the period	\$73,896	\$73,896

Significant changes in the unobservable inputs discussed above could result in a significantly lower or higher fair value measurement. Generally, an increase in the discount rate, liquidity discount margin or coupon rate results in a decrease in our fair value measurement and a decrease in the discount rate, liquidity discount margin or coupon rate results in an increase in our fair value measurement.

We perform a fair value calculation of our strategic investments held at cost on a quarterly basis using the most currently available information. To determine the estimated fair value of private strategic investments held at cost we use a combination of several valuation techniques including discounted cash flow models, acquisition comparables and trading comparables. In addition, we evaluate the impact of pre- and post-money valuations of recent financing events and the impact of those on our fully diluted ownership percentages, and we consider any available information regarding the issuer's historical and forecasted performance as well as market comparables and conditions. The fair value of these investments is considered in our review for impairment if any events and changes in circumstances occur that might have a significant adverse effect on their value.

Investment Losses

Unrealized losses on investments at June 30, 2012 by investment category and length of time the investment has been in a continuous unrealized loss position are as follows (table in thousands):

	Less Than 12 Months		12 Months or Greater		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
U.S. government and agency obligations	\$821,950	\$(1,170)	\$8,029	\$(61)	\$829,979	\$(1,231)
