### FORWARD LOOKING STATEMENTS

This presentation contains forward looking statements. These statements are based upon various assumptions, many of which are based, in turn, upon further assumptions, including Ship Finance management's examination of historical operating trends, data contained in the Company's records and other data available from third parties. Although Ship Finance believes that these assumptions were reasonable when made, because assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond its control, Ship Finance cannot give assurance that it will achieve or accomplish these expectations, beliefs or intentions.

Important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include the strength of world economies, fluctuations in currencies and interest rates, general market conditions including fluctuations in charter hire rates and vessel values, changes in demand in the markets in which we operate, changes in demand resulting from changes in OPEC's petroleum production levels and world wide oil consumption and storage, developments regarding the technologies relating to oil exploration, changes in market demand in countries which import commodities and finished goods and changes in the amount and location of the production of those commodities and finished goods, increased inspection procedures and more restrictive import and export controls, changes in our operating expenses, including bunker prices, drydocking and insurance costs, performance of our charterers and other counterparties with whom we deal, timely delivery of vessels under construction within the contracted price, changes in governmental rules and regulations or actions taken by regulatory authorities, potential liability from pending or future litigation, general domestic and international political conditions, potential disruption of shipping routes due to accidents or political events, and other important factors described from time to time in the reports filed by the Company with the Securities and Exchange Commission.

### OFFERING PURSUANT TO A PROSPECTUS SUPPLEMENT

The offering of the stock dividend will be made only pursuant to a prospectus supplement to the Company's shelf registration statement on Form F-3, as amended (Registration No. 333-158162), which is filed with the SEC.

This report does not constitute an offer to sell or the solicitation of an offer to buy shares of the Company's securities, nor will there be any sale of the securities in any state or jurisdiction in which such offer, solicitation or sale would be unlawful. Shareholders are advised to refer to the registration statement filed with the SEC and the prospectus supplement, which will be filed with the SEC, for additional information regarding the dividend.
